disposed of at an ever increasing rate by war assets, more than 50 million dollars in real property having been sold in the final month of 1947.

Southwestern schools and colleges have received almost half of the country's surplus buildings dis. posed of under the public benefit allowance plan, a War Assets Administration report disclosed. In the five states of this zone, educat\_ ional institutions got 4,138 of a national total of 9,652, thereby saving hundreds of thousands of dollars in campus construction programs. Within the state of Texas, schools acquired 374 buildings with an original cost valuation of \$36 424,393.

than ten years ago!

What can you buy today that is priced lower than it was ten years ago? It's hard to think of anything, isn't it? But there is one main item ... that's the low-cost, dependable electric service brought to you by Reddy Kilowatt, your electric servant.

Actually, the average price of a kilowatt hour of electric service to residential users is about one-sixth LESS than in 1937.

And it's less despite the fact that taxes, wages, the cost of materials and equipment are upaway up-to us, which necessitates increased efficiencies in all operations and finance.

Every effort is being made to keep the cost of electric service low so that you can continue to enjoy more of its comforts and conveniences.
