Starkey Wins Turkey Tournery

Fifty entries were recorded in the Tennis Tournament held recently at Turkey. Entries came from Quitaque, Matador, Estelline, Memphis, Lakeview and Turkey.

Winners in all events are as follows:

Grade School:

Girls Singles — Sherri Rapp, Estelline.

Girls Doubles — Cherri Rapp and Anne Rapp, Estelline.

Boys Singles — Tim Salem, Turkey.

Boys Doubles — Rod Setliff and David Paul Majors, Turkey.

High School:

Girls Singles — Nikki Clements, Lakeview.

Girls Doubles — Nikki Clements and Chris Clements, Lakeview.

Boys Singles — Johnny Lacy of Turkey.

Mens Doubles — Pounds and Pate, Memphis.

Open:

Womens Singles — Karen Clements, Lakeview.

Womens Doubles — Karen and Nikki Clements, Lakeview.

Mens Singles — James Starkey, Quitaque.

Mens Doubles — Conroy Lacy, Turkey and Rolfe Wooten, Estelline.

Mixed Doubles — Conroy Lacy and Karen Clements, Lakeview.

Starkey won over Conroy Lacy in the Mens Singles for the championship in that division.

Mr. and Mrs. Eldon Lyles were hosts Thursday evening, July 4th, for a fish fry in their home. Those attending were Mr. and Mrs. Eugene Ferguson and family, Mr. and Mrs. James Fuston and family, Mr. and Mrs. Denny Fuston, Mrs. J. A. Fuston and Johnny of Turkey and Mrs. Betty George of Quitaque.

Mr. and Mrs. R. L. Brunson, Mr. and Mrs. Bobby Brunson and Mr. and Mrs. James Kimbell attended the rodeo at Clarendon the Fourth.

New Arrivals

Johnny Powell has been passing out cigars bearing the words "It's a Boy," this past week. The young man was born Tuesday, July 2, in Lockney General Hospital at 1:30 P. M., and has been named Timothy Edward. He weighed 6 lbs. and 11 ozs. Both mother and baby are doing fine.

Mr. and Mrs. Lonnie Payne of Muleshoe are the parents of a new boy, born Wednesday, July 3, at the Muleshoe Hospital. He weighed 7 lbs., 4 ozs. The couple have another son, born July 5, at St. Mary's Hospital in Lubbock. He weighed 8 lbs., 11 ozs. They have another son, born July 6, at the same hospital.

Mr. and Mrs. Joe Don Beavers of Lazbuddie are the parents of a boy born Friday morning, July 5, at St. Mary's Hospital in Lubbock. He weighed 8 lbs., 11 ozs. They have another son, born July 6, at the same hospital.

These ladies are sisters of Ellen Brummett. Neither babies had been named. The babies have been named. The babies have been named.

MRS. RODNEY HAMMONS RE-ENTERS HOSPITAL

Mrs. Rodney Hammons, who was recuperating from recent surgery at the home of her parents, Mr. and Mrs. Seburn O. Neatherlin, returned to the hospital at Clayton, N. M. for further treatment. She had been running temperature for several days and her mother called the doctor in Clayton, where she underwent emergency surgery about 3 weeks ago, and he advised them to bring her back. At the time this was written, her father had not received further report of her condition.

SCOTTY STARK CELEBRATES TENTH BIRTHDAY FRIDAY

Mrs. O. R. Stark, Jr. and Mrs. Orlin Stark took a group of boys to Roaring Springs Friday afternoon for a swimming party, the occasion being the tenth birthday of Scotty Stark. After an afternoon of swimming, the boys were served birthday cake and lemonade. Boys attending the outing were Eddie Owens, Johnny Griffin, Guy Davidson, Randy Stark and the honoree, Scotty Stark. Kim Ham was also a guest. The group returned home with the report of a very fine time.

Mr. and Mrs. Jerry King and Mark of Silverton visited Mr. and Mrs. Buddy Price and family Wednesday evening.

N. W. Herrington and family of Marlin visited his mother, Mrs. N. B. Herrington over the weekend and also with his brother Ross and family. Mrs. Herrington returned home with her son for a visit.

Mr. and Mrs. Gene Mayfield of Borger spent the July 4th holidays with his parents, Mr. and Mrs. Jim Mayfield and returned their sons home after their visit here with their grandparents.

Mr. and Mrs. Cecil Seaney and children of McLean visited her parents, Mr. and Mrs. A. C. Barrett from Tuesday until Thursday evening. Mrs. Clovis Hill and children of Amarillo visited her parents Tuesday, the occasion being to help Mrs. Barrett celebrate her birthday.

Mr. and Mrs. Buddy Riddle and Terry, and Johnny Austin of Ft. Worth visited during the July Fourth holidays with her parents, the Joe Bedwells. Jeri Riddle, who has visited her grandparents the past five weeks returned to her home at Fort Worth and Terry remained for a visit here.

Mrs. Lela Mae Hutcheson and children were hosts for a backyard dinner Thursday evening at their home. The menu consisted of charcoal hamburgers and all the trimmings. Those enjoying the occasion were Mr. and Mrs. Ray Persons and Mrs. Pearl McBride, who is visiting here from Shafter, Calif. Mrs. E. E. Berry of Tulia and Mrs. James Purgason of Midland called later in the evening.

Jake Merrell drove to Ceta Glen Friday to return home the Methodist youth. Glen Roger Taylor, Larry Tyler and Joe Beth Merrell who had attended camp there.

Lakeview Tennis Tournery Begins Today (Thursday)

The Lakeview 7th Annual Tennis Tournament will get underway Thursday July 11, and will continue through Sunday, July 14, it was announced by Barney Bevens, sponsor.

Bevens said that they have received 75 entries to date, and that applications are being received daily. Entries are \$1.00 per person per event. He explained that doubles teams entry fee is \$2.00 per team, or \$1 per person.

The following division have been set up for the tournament:

High school boys doubles and singles; high school girls doubles and singles; grade school boys doubles and singles; grade school girls doubles and singles; open division mens doubles and singles; open division womens doubles and singles.

And mixed doubles will be played in all divisions.

Play will get underway at 4 P. M. July 11, he said.

Refreshments will be sold at the courts by the Lakeview Tennis Club.

Bevens also announced that he has purchased the trophies and other awards for the tournament.

Entries from Lakeview, Memphis, Quitaque, Turkey, Estelline and Amarillo have already been received.

Mr. and Mrs. John Lynn Johnson of Austin spent Wednesday night with his parents, Mr. and Mrs. Alton Johnson.

Midland Cotton Field Day Set

Briscoe County cotton producers, ginners and other interested persons are invited to attend a special cotton field day at the Sands Motor Hotel in Midland, on Thursday July 18, 1963, County Agent Leon Grosdidier announced today. The event will be held in conjunction with the 24th annual meeting of the American Cotton Congress.

The field day program, beginning at 9:00 A. M., will be devoted to discussions of research efforts designed to reduce costs of production.

Among those appearing on the program will be Burris Jackson, chairman, American Cotton Congress. Discussions on practices to reduce the cost of producing cotton will be presented by the following people from Texas A. & M. College: Charles A. Taylor, area farm management specialist, Agricultural Extension Service, Fort Stockton; Dr. Luther S. Bird, plant pathologist, Texas Agricultural Experiment Station and Cooperator USDA; Dr. J. C. Gaines, head, Department of Entomology; Dr. Paul J. Lyerly, research coordinator and superintendent, Texas Agricultural Experiment Station, El Paso; Dr. Donald E. Longnecker, agronomist, Texas Agricultural Experiment Station, El Paso; Lambert H. Wilkes, associate professor, Agriculture Engineering Department; Fred C. Elliott, cotton specialist, Agricultural Extension Service; Chas. W. Green, county agricultural agent, Texas Agricultural Extension Service, Midland, Texas.

The program will be held in the large dining area of the Sands Motor Hotel on the highway going west toward Odessa.

Child Photo Contest Winners Announced

Jayne Merrell was first prize winner, Blake Hamilton won second and Mike Rice was third prize winner in the child photo contest held several weeks ago by Winston B. Lucas of Irving, Texas. Shown below are the winners and the others who entered the contest.

First row, left to right: Mark Metzger, son of the Rev. and Mrs. Kenneth Metzger; Tawnya Carpenter, daughter of Mr. and Mrs. Gilbert Carpenter; and

Rodney Carpenter, son of Mr. and Mrs. Ronnie Carpenter. Second row: Dana Ramsey, daughter of Mr. and Mrs. Glenn Ramsey; Sue Rita King, daughter of Mr. and Mrs. Gene King; Mike Rice, son of Mr. and Mrs. Jarrell Rice.

Third row: Blake Hamilton, son of Mr. and Mrs. Jerry Hamilton; and Kelly Hamilton, daughter of Mr. and Mrs. Jerry Hamilton; David Clark, son of Mr. and Mrs. O. K. Clark.

☆☆☆ ☆☆☆

First row: Randy Clay Dudley, son of Mrs. Mary Helen Dudley; Bobby and Connie Brunson, children of Mr. and Mrs. Bobby Brunson.

Second row: Laneda Ann Payne, daughter of Mr. and Mrs. Junior Payne; Cheryl and Jayne Merrell, daughters of Mr. and Mrs. Truman Merrell.

☆☆☆ ☆☆☆

First row: Teddy Bedwell, Jr. son of Mr. and Mrs. Teddy Bedwell; Scott and Ronda Leeper, children of Mr. and Mrs. Wilburn Leeper.

Second Row: Barry Johnson, son of Mr. and Mrs. Ober Johnson; Johnny Monk, son of Mr. and Mrs. L. B. Monk; Dickie Johnson, son of Mr. and Mrs. Ober Johnson.

Mr. and Mrs. Sid Bogan left Friday morning, July 5th, for Tres Ritos, N. M. to visit Mary Ollie Persons and spend a vacation. Mrs. Gladys Wise accompanied them to Tulia. She will visit her daughter, Mrs. Richard Tibbetts and her family in Amarillo and see her doctor while there.

Cotton Thirstiest While Fruiting

College Station, July 10 - Cotton's need for moisture is greatest during the square, bloom, and young boll stages, says Wayne Keese, extension agricultural engineer with the Texas Agricultural Extension Service.

The rate of water use by the cotton plant varies through the growing season and intelligent irrigation is based on the periods of greatest need, says the engineer. The plants use very little water for the first few weeks after emergence but beginning with the appearance of the first square the rate of water use increases steadily. When the first blooms appear, the water requirement again increases rapidly and the maximum rate of water use occurs at the peak bloom stage which is usually three to three and one-half months after planting, says Keese.

Shedding of fruit by cotton has been found to be associated with low soil moisture during the early bloom and fruiting stage and therefore an adequate supply is needed for high yields, Keese explains. Excessively high moisture levels should also be avoided especially after the first bolls appear. This moisture can cause late vegetative growth which probably will not increase lint yields and can be undesirable if machine picking is planned.

Keese warns not to wait until all the available moisture has been used before irrigating the crop. Normally, irrigation should be started when 50 to 60 percent of the available moisture in the root zone is depleted. He recommends regular examinations of the soil in the root zone to determine the amount of soil moisture remaining. A soil auger or a sharpshooter can be used to obtain the soil sample and the rooting depth of the crop can also be checked.

Don't overlook the importance of soil fertility in successful cotton irrigation as optimum yields are produced when soil fertility and soil moisture are balanced, says Keese. See your local County Agricultural Agent for more information on cotton irrigation and while there get a copy of B-896, "Texas Guide for Growing Irrigated Cotton."

Mr. and Mrs. Clyde Saul, Mr. and Mrs. Slocum Roberson, and Mr. and Mrs. Morris Wilson drove to Plainview Thursday evening, July 4th, for dinner.

Ethel and Margie Lewis of Levelland are visiting their aunt, Mrs. Ben White and their cousin, Mrs. P. John Monk and her family.

Mack Truelock and S. Yeary of South Plains and his grandson Melton Yeary, attended the rodeo at Clarendon July 4th.

Mr. and Mrs. Vance Robison and girls, Mr. and Mrs. Buster Chadwick and girls and Mr. and Mrs. Guy Smith of Turkey visited Mr. and Mrs. Guy Paul Smith and family in Plainview Thursday, night July 4th and attended the fireworks display.

☆☆☆ ☆☆☆

Darrell and Michael Dowd, sons of Mr. and Mrs. Ozean Dowd.

J. G. GOWIN RETURNS HOME AFTER SPENDING MONTH IN OKLA.

Mr. J. G. Gowin returned to his home here Monday of last week after spending a month in Oklahoma visiting relatives. His daughter, Mrs. S. L. Bodkin of Tulsa, Okla. and his sister, Mrs. Mabel Newell of Cheyenne, Okla. brought Mr. Gowin home. He visited Mrs. Bodkin at Tulsa, his son, John and family at Lawton, his sister, Mrs. Newell and a number of nieces and nephews while in Oklahoma.

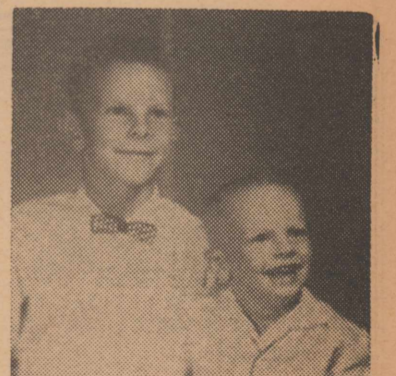

Dr. C. A. Holcomb, Jr. Stamford District Superintendent, was a visitor at the Methodist Parsonage on the afternoon of July 3.

The Rev. and Mrs. Melvin R. Mathis and daughters attended a family reunion in Hereford July 4. Others were present from Canyon, Quail, and Roswell.

Guests at the Clayton Johnson home for the Fourth of July holiday were her parents, Mr. and Mrs. Jimmy Rhoderick of Silverton, Mrs. Billy Frank Rhoderick and children of Lubbock and the Johnson's daughter, Tommy Lou, WTS student.

Mr. and Mrs. Wayne Whittington and children left Thursday, July 4th, for a vacation trip to Truth or Consequences, N. M.

Mr. and Mrs. Jarrell Rice and son, Mike, visited her parents, Mr. and Mrs. Sam Sanders and son Tracy and daughter, DeLores at Hedley July 4th. Mrs. Rice's sisters were also guests at the home of her parents. They were Mr. and Mrs. J. H. Painter and family, Mr. and Mrs. Toby Woodard and family, Mr. and Mrs. Kenneth Houston and family, and Mrs. Betty McGure, all of Amarillo; and Mr. and Mrs. James Potts and family, Hedley; Mr. and Mrs. Frank Lindsay and family, Quail. Mr. and Mrs. Rice drove to Clarendon and renewed acquaintances with friends with whom they went to school at Clarendon Junior College.

Guy and Gill Davidson, sons of the Rev. and Mrs. Roy G. Davidson.

Stephen McWilliams, son of Mr. and Mrs. R. P. McWilliams.

Mr. and Mrs. Ray Persons and Mrs. Pearl McBride visited Mrs. M. T. Witcher and Mrs. W. R. Patrick in the Lockney Rest Home on the Fourth, and they took the ladies for a drive.

Mr. and Mrs. Herbert Dudley of Lockney and Joe Edd Price were guests at the Hubert Dudley home the Fourth.

Mrs. Lee Driver of Childress and Karen and Debbie Pharr of Lubbock visited Mrs. C. T. Rucker and family Thursday, July 4th. They were enroute to Palo Duro Canyon sight-seeing.

New Loan Guaranty Plan Announced

A new Loan Guaranty Plan,

in line with recommendations made to President Kennedy last February by the Interagency Committee on Federal Credit Programs, has been announced by the Small Business Administration.

The new loan plan, which went into effect July 1, modifies SBA's old deferred bank participation loan agreement, and changes the regulations covering such loans, to conform with the Committee recommendations.

The Committee recommended that Government-financed credit programs should supplement or stimulate private lending, rather than substitute for it, and President Kennedy suggested that all Federal credit agencies be guided by the principles outlined in the recommendations.

The Loan Guaranty Plan has

THE LADY OF THE HOUSE ANALYZED

Recent surveys on motivations of American homemakers have answered some intriguing questions. Is she an extravagant housekeeper? Does she want most of the good things in life for herself? Does she settle for merchandise other than the best? The answer to these questions, when she redeems her trading stamps, is a resounding "no".

According to panel members of the Plaid Stamp Homemakers Council, the composite woman they examined thinks of her home and family first. What she accomplishes with her stamp redemptions might prove to be a lesson to government economists.

The panel found that three rooms in the house account for seventy-five percent of the most wanted articles. Bedroom articles lead with thirty-five percent; kitchenware and equipment come next with twenty-five percent, and dining room items follow with fifteen percent, mostly for table accessories.

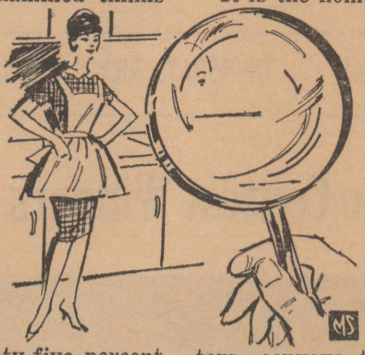

More often than not bedspreads win over glamorous cashmere sweaters with the

lady of the house. She may select dazzling white percale sheets — the number one choice on her list — instead of equally dazzling costume jewelry, and party casseroles in preference to snazzy handbags.

She keeps her family happy and improves her culinary achievements with the stamps she uses for electric mixers and skillets. Chafing dishes and lovely dinner and silverware are selected for regal entertainment.

It is the homemakers insistence on quality merchandise that induces manufacturers to constantly improve their products. The Plaid Stamp Homemakers Council, with its recommendations based on surveys of stamp collectors, conveys the ladies' desires to the producers of the fine products available through stamp plans.

With all the facts compiled, the panel has found the typical woman surveyed is, in brief, smart and practical, unselfish and thrifty, and, they might add, "She sure knows her onions."

the full endorsement of the American Bankers Association, and is a forward step designed to enable commercial banks to continue their cooperation with SBA in providing term loans to small concerns.

In announcing the Loan Guaranty Plan, Small Business Administrator John E. Horne said, "We are very appreciative of the cooperation we have received from the commercial banks of the country, and we are gratified that the Loan Guaranty Plan has the full support of the American Bankers Association."

"I am sure that the Nation's commercial banks will find our new program attractive and will cooperate with us in making this type of small business financing effective."

For a guaranty not exceeding 75 percent of the loan the bank will pay SBA one-half of one percent guaranty fee a year; and for a guaranty in an amount in excess of 75 percent of the loan, it will pay a guaranty fee to the SBA of one percent a year.

Under the new program, SBA will agree to purchase the guaranteed portion, not in excess of 90 percent of the outstanding loan, but only upon default, and further agrees to make available a liquidity advance to the bank up to the extent of the guaranteed portion of the loan if it is not in default. The liquidity privilege will be for a period or periods aggregating not more than 90 days during any 12 months from the date of the issuance of the guaranty. The minimum time of any period for which the bank may obtain an advance is 15 days. The bank will pay the SBA interest at the rate of 4½ percent

per annum during the time it uses the liquidity privilege.

Mr. Horne said that other SBA loan plans, which include direct loans to small businesses as well as other types of bank participation agreements, will remain unchanged. Deferred bank participation loans approved by SBA prior to the July 1 deadline will, of course, not be affected by the revised loan plan.

The guaranty feature is also available under the Simplified Bank Loan Participation Plan (SBLP).

Hi-Plains Hi-Lights

NEWS from the High Plains Research Foundation

Sunflowers may be a new crop for the High Plains of Texas within the next three years. Research at the High Plains Research Foundation indicates that a profitable variety will soon

be available for commercial production.

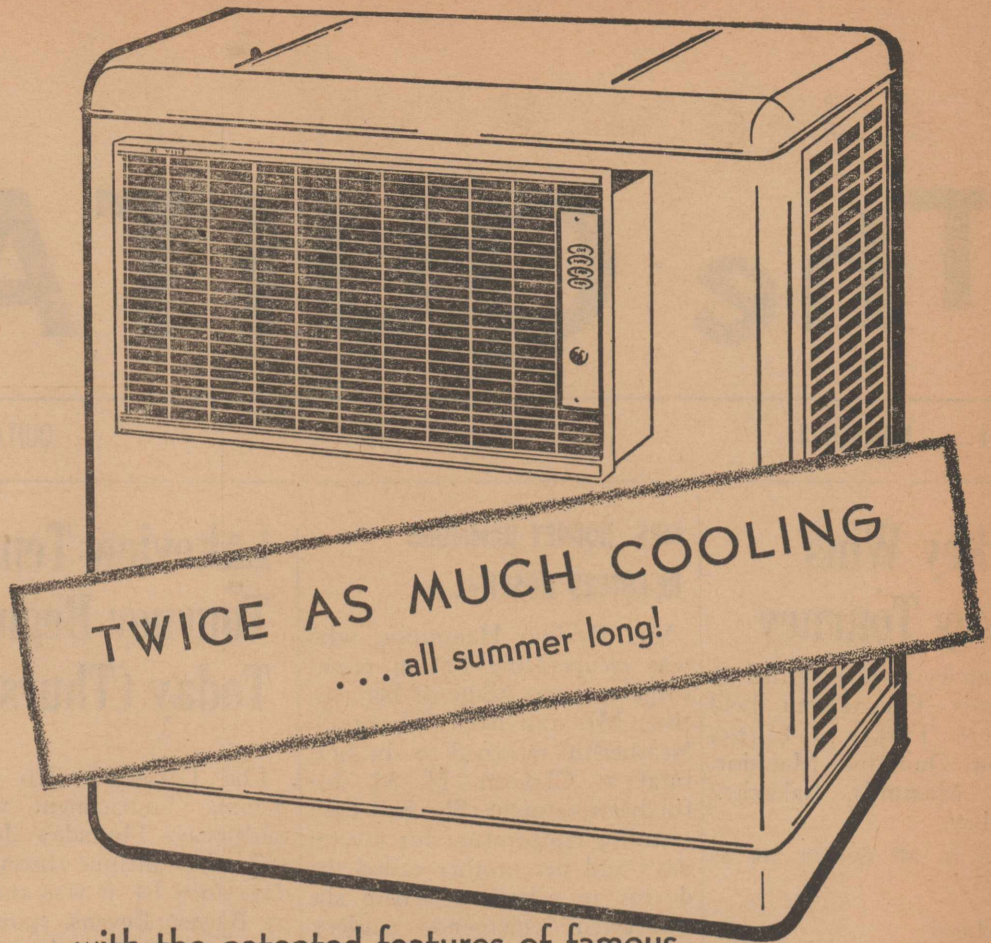

Seven hundred and twenty strains from seed selected in the breeding program in 1962 are growing at the Foundation Farm at Halfway. These strains were planted on April 24 and many of them will be ready for harvest in early August. These plants have stood up under the

adverse weather conditions of wind, hail and hard rain. They are resistant to the ravages of the Sunflower Moth, which has been the scourge of sunflower development in the area in the past.

Scientists at the Foundation are seeking a plant with one head to the stalk; a bent or crook stem which makes it diffi-

cult for birds to feed on; and a seed yield from 3,000 to 4,000 pounds to the acre. Most of the desirable strains are 30 to 36 inches which makes them easy to combine. The sunflower plant has a low water requirement which makes it fine for the area.

The best sunflower strains (Continued On Page 3)

with the patented features of famous PARAMOUNT COOLERS

installed FREE in your home for as little as **6.90** A MONTH

- COOLS—Nature's air conditioning—with pump and blower on, fresh air is washed, filtered, and cooled to provide complete summer comfort.
- VENTILATES—With blower only, fresh outdoor air is circulated for year 'round ventilation.
- FILTERS THE AIR—Patented No-Clog Sta-Fresh Filters remove dust, pollen, and other impurities when cooling or ventilating.
- CONTROL OF AIR DIRECTION—Air Flo Grilles allow instant selection of concentrated or diffused cooling or ventilating.
- CONTROL OF COOLING—VENTILATING—Optional cooling or ventilating is immediately available with individual push button controls.
- PATENTED ALL WEATHER CONTROL—You can close and lock your window without removing cooler — shuts out dust, rain, icy winds, cold drafts, and illegal entry. (Prowlers)
- PATENTED "NO-CLOG" FILTER SCREENS—large, coarse mesh screen on the outside eliminates clogging from dust, dirt and foreign matter.
- PATENTED "GRIP-LOCK" FILTER HOLDERS—Positively locks filters in place eliminating filter sagging, loss of efficiency and danger of water being drawn into the blower.
- PATENTED "FREE-FLO" WATER TROUGH WITH VISIBLE OUTSIDE ADJUSTMENT—permits easy leveling of water trough while cooler is in operation, assuring uniform water distribution.

Corvair 700 Club Coupe

The hardest part about parking a Corvair is finding a nickel

That may be a slight overstatement, but such jauntiness comes easily when you're a Corvair owner.

And you can usually back it up—as easily as you can back up a Corvair. You'll find yourself doing that occasionally, if only to adjust the brakes—they're self-adjusting. That's all there is to it, and that's a good example of how delightfully easy Corvair is to own, drive and maintain.

But since we began by talking about driving, let's stick with that awhile. A large factor in the fun of driving a Corvair is the location of its engine in

the rear. Why the rear? It gives Corvair extra traction on any road surface. It provides a nearly flat floor for more useable interior space. Best of all, it produces steering so light, so responsive, you wonder why no other American-made car thought of it.

Corvair's engine is also air cooled, we might add, which means there's no anti-freeze or water for you to add. Ever.

All that pleasure from something so practical almost makes you think Corvair is unique among American cars. Well, it isn't surprising, because it is!

Caution Urged in Use Of Herbicides

The use of hormone-type herbicides—sometimes called weed killers—has proved to be of considerable value to many Texas farmers and ranchers. The application of such herbicides as 2,4-Dichlorophenoxy Acetic Acid and 2,4,5-Trichlorophenoxy Acetic Acid, usually referred to as 2,4-D and 2,4,5-T, respectively, can be of special benefit in weed control on pastures and ranges because they act selectively on broadleafed plants.

Along with these benefits, however, there can be an appreciable amount of risk in applying these useful chemicals. This is because many cultivated

plants within proximity of the area being treated can be accidentally damaged or killed by herbicides when proper precautions are not used. Cotton, Texas' largest crop, is particularly vulnerable to herbicide damage.

It is for this reason that farmers in many Texas counties are required by law to secure a permit from the Texas Department of Agriculture before using 2,4-D or 2,4,5-T for weed and brush control. Even when granted such a permit, the applicator must follow prescribed regulations when using the chemicals with reference to such matters as wind velocity (which would determine the amount of drift from the application area to surrounding acreage and close-ness to susceptible planted crops such as cotton and flax).

In 1963, a marked increase has been noted of people who are using 2,4-D (the more commonly used hormone-type herbicide) for the first time. There has also been noted a significant rise in complaints from people who have cause to believe that the application of herbicides by others has had some effect on their crops. Such complaints are serious and call for prompt attention by the Department of Agriculture when regulations apply.

It is therefore a matter of great importance that any person not having had previous experience in the use of these important chemicals first of all check with the nearest Texas Department of Agriculture office or write to John C. White, Commissioner, Texas Department of Agriculture, Austin, for information concerning regulation and use of herbicides in their home counties.

can be prevented... need not happen to them or their families. It's a matter of creating good safety attitudes... to make people really want to be safer and educating them on how to work, play and drive more safely. National Farm Safety Week is designed to present these facts and to encourage positive, personal action for safe farm-home and community living.

LOCAL BRIEFS

Mr. and Mrs. Roy Smith and Dwain spent last Wednesday night in Floydada with their daughter, Mrs. Willie Royce Bradshaw and family. The next day, July 4th, they drove to Amarillo to attend the annual Montgomery reunion. They returned to Plainview that night and joined the Guy Smiths, the Vance Robisons, the Buster Chadwicks and the Guy Paul Smiths and attended the fireworks display.

Mr. and Mrs. Johnny Brummett attended the rodeo at Clarendon Thursday, July 4th. They were supper guests of Mr. and Mrs. Clarence Redding that evening.

Mr. and Mrs. Wade Polk and children of Odessa spent the weekend with her parents, Mr. and Mrs. Leon McCracken, Paul and Laura remained for a two week's visit with their grandparents.

Green Thumb Tips

Where an attractive edging to flower beds is needed, how about curled parsley? Looks beautiful, tastes good.

Do you see an unattractive clothes pole from your kitchen window? Or an always-open garage door? Or a rough fence? Why not hide the unsightly view by planting morning glory seeds around or in front of the objectionable features. Plants grow rapidly, climb if given support, and furnish large, beautiful flowers in pink, white, or the most popular sky blue. There is also a double pink, Rose Marie, and a mixture of doubles, Tinkerbell's Petticoat.

Many people who pick their flowers to use in the house like the softness of baby's breath for use as a filler between sturdier blooms. Nothing could be easier to grow than annual baby's breath, but be sure to make several plantings two weeks apart so you'll have plenty of the delicate sprays to pick.

If this spring finds you without rhubarb for spring pies, why not plant seeds during late May so that next spring you'll have plants ready to set in a permanent row? After the following year you'll have plenty to use for pie fillings.

Inspection, Plus Correction, Equals Protection

This is the theme for 1963 National Farm Safety Week, July 21-27. Farm home and highway accidents are a serious and costly problem in rural areas. To assure accelerated progress in rural accident reduction, the facts on the tremendous loss and waste due to accidents must be known and comprehended by all farm residents. People also must realize that accidents

WOMEN DRIVERS SUPERIOR TO MEN SAFETY COUNCIL STATISTICS SHOW

The much abused woman driver doesn't have to take it any longer.

She's a safer driver than the male according to National Safety Council statistics of annual motor vehicle accidents. There are some 27 million members of the distaff side cruising the highways and byways of the nation and over 63 million males behind the wheel. The Council tells us men have a sharply higher accident involvement rate and offer figures to prove the point.

For 1961 the scoreboard shows almost 15 million of the stronger sex involved in motor mishaps while 3,600,000 women drivers ran into trouble.

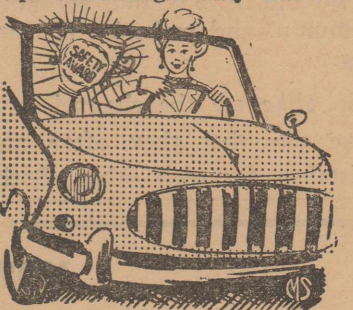

Men drivers, however, are not completely defenseless against these stark statistics. The Council offers some consolation by estimating that in terms of miles driven by each sex, males fare better accident-wise than females.

Automobile accidents for both sexes tend to be highest in the month of December and lowest in February. Increased pedestrian activity during the holiday season and longer hours of darkness are contributing factors in this trend.

"Any measure aiding a driver's visibility helps reduce motor accidents," says Matthew A. Broderick, technical service

expert for Allied Chemical Corporation's Solvay Process Division. A visual aid that he strongly supports is the yellow traffic line over the time-worn white ones.

Mr. Broderick, who has made lengthy studies on the subject, cites a recent statement made by Dr. Walter S. Atkinson before the American Medical Association. Dr. Atkinson pointed out that repetitious highway mark-

ings—such as white guard posts and broken white lines—cause fatigue and possibly accidents. He recommends replacing the broken white lines with a solid yellow line.

Driver reaction tests recently conducted by the Vision Conservation Institute in Philadelphia found that yellow traffic markings were 35 to 70 percent more visible than white markings under all weather conditions.

 Five Regular Commissions — Meet at 7:00 P. M., Fourth Monday every month, followed by Official Board at 8:00.

Sermon subject for next Sunday morning is "True Independence." This is to be ten days after July 4, actually nearer Bastille Day in France. Both of these days celebrate freedom. How free can we really become?

The evening discussion will be on the third chapter of "The Arm of Compassion." Eyes that See Not, Ears That Hear Not." On Tuesday evening, July 30, a very important Commissions Workshop is being staged in Plainview. This has a great deal to do with the successful organizational work of any local church, so a large attendance is urged.

Hi-Plains Hi-Lights

(Continued From Page Two) have 22 percent protein and 30 percent high quality vegetable oil. Sunflower meal or flour contains about 50 percent protein, is usually rich in calcium, an excellent source of thiamine or vitamin B.1, and particularly outstanding in its supply of niacin. The meal is also highly digestible.

Barry Love, Assistant Agronomist in charge of sunflower research, is seeking a combine-type variety with desirable chemical qualities.

The market for sunflower seeds is for human food, and as a protein feed for cattle, hogs, poultry and birds. It was used for food by the Indians before the white man came, and it is an important crop in Russia, South America and Canada. Sunflowers are subsidized in Canada as an oil seed.

Dr. Earl Collister, Director of the Foundation, who has conducted breeding work with sunflowers in Texas for fourteen years, stated that it offers great potential as another cash crop than can be grown in the diversified farming system on the High Plains.

Operation BIG Program Has Full Support of FHA

"The Operation BIG Program has the full support of the Farmers Home Administration," was the statement made by L. J. Cappleman, State Director of the FHA, at a recent meeting. He said: "The Farmers Home Administration has out over \$50,000,000 in loans to farmers in the 51 counties that make up the Operation BIG area. During fiscal 1963 the FHA has made over 3,000 loans to farmers in this area for a total of over \$15,000,000.

"For instance," Mr. Cappleman said, "about 950 farmers who use FHA credit are growing about 100,000 acres in cotton. About 82,000 acres will be fertilized and 99,500 acres will be protected by the insect control program advocated by FHA. They have borrowed \$487,000 for fertilizer and \$610,000 for insecticides. About 630 of these farmers are growing 32,000 acres of grain sorghum, needing \$161,000 for fertilizer. In order for 440 farmers to grow 14,000 acres if wheat, FHA loaned them \$67,000 fertilizer. Over 900 farmers wasted to improve 26,000 acres of old pasture and plant 10,000 acres in coastal bermuda grass so F H A loaned them \$205,000 for fertilizer.

Beef cattle is a growing farm enterprise in the Operation BIG area and 1,254 farmers with herds of 10 head or over already have 35,000 head. FHA has loaned some 540 farmers \$1-

552,000 to buy 9,500 head of cows and 326 improved beef bulls."

Mr. Cappleman, in commenting on dairying in the 51 counties, said, "FHA is helping 371 dairymen with an average herd of 50 cows. The 1962 average production of these herds was 8,086 pounds of milk per cow." The 1962 estimated Texas state average of 5,610 pounds per cow and this was the highest annual Texas state average of record.

The FHA makes several different type loans such as Farm Ownership, Rural Housing, etc., where the payments are distributed over a period of years; and Mr. Cappleman said, "The balance owed FHA on loans in the BIG area as of December, 1962 was about \$35,000,000. In addition to the above, the FHA has loaned in 1963 \$1,740,000 to 107 farmers to either buy a family farm or enlarge their present small farm. Also 290 persons borrowed \$2,812,000 to build rural homes under the Rural Housing Program.

Water Distribution Loans are making it possible for over 3,200 users to have good water," he said, "as there are 34 of these associations operating in this area and the FHA has loaned the \$3,649,000 so they could get this water. The associations have to meet the standards of the Texas Public Health Department."

This amount of money released in this area has helped the overall economy of each community, towns, county as these farmers use this money to pay school taxes, church dues, and spend it with the business men, merchants, etc., in this area. Reputable authorities have said that a dollar such as this would turn over on an average of five to seven times before leaving a community. This means a 75 to 150 million dollar impact on the economy in this area.

WHERE THE BUFFALO ROAM

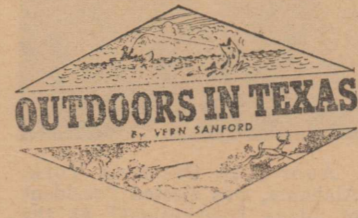

A herd of buffalo were racing across the western plains, when suddenly the shaggy leader stopped. "What's the matter?" asked his companion.

"Hold everything," answered the lead buffalo. "I just heard a discouraging word!"

Channel cats are the only fish of the catfish tribe to be considered truly game fish by Texas anglers. They rate on a par with white bass and crappie, and just below the lordly black bass. More pugnacious than crappie, they equal white bass as scrapers and measure only a few notches below black bass when it comes to putting up a fight. Also, they are the only cats to consistently strike on plugs and spoons.

Channel cats go by many names — mostly according to geography. Besides their ritzy Latin moniker, *Ictalurus lacustris punctatus*, they are known in some sections of the country as fiddlers. Other states call them spotted cat, forktail cat, marble cat, silver cat, and white cat. But in Texas they are just plain channel cat, a very descriptive name.

Distributed all over Texas, the channel cat is most abundant in streams that have swift currents and channels. However, the species often is taken from the big lakes and quiet rivers.

This succulent fish is similar to the blue cat that grows to such a size in the Mississippi River and its tributaries. This same blue is found in almost all Texas lakes and rivers, though in somewhat smaller sizes than the Mississippi River variety.

You might say that the channel cat is the blue cat's little brother. Where the blue cat sometimes reaches 50 or 75 pounds in weight, the world record channel cat only tipped the scales at 57 pounds. A five pound channel cat is considered good size. Two and three pounds are most common, and make better eating.

So alike are the channel and blue cats that they often are mistaken for each other. Both

are slim shaved with rather narrow heads and forked tails.

You can distinguish the species by the shape and structure of the anal fins. In the channel cats the outer edge of this fin is rounded and has 25 to 30 rays. Blue cats have 31 to 33 rays in a straight anal fin. Also, the coloring is different in the two fish. Where the channel cat are a darkish blue or muddy green on the back, going into whites on the sides and stomach, the blues are a much clearer blue on top and more striking white underneath. Channels under five pounds also have dark spots along their sides. These spots tend to disappear when the fish grows beyond five pounds.
