CIA POINTS OUT SOVIET | cesses. Economic growth, main. ECONOMIC FAILURES

The super-secret Central Intelligence Agency has issued one of its rare reports—this one on problems in the world's leading underdeveloped nation, the Soviet Union. The CIA took careful aim in a short paper entitled "Soviet Economic Prob. lems Multiply" and gored the Red ox where it hurts. Soviet propagandists growled that the unflattering array of facts and figures were "preposterous and unconvincing," hoping, as you would expect, that the world's growth rate: 2.5 pecent. other underdeveloped nations would pay no heed to the CIA the Ruussian citizen is not far study.

it, they have all the answers for maintaining a thriving economy. Of course, we know better. Convincing some people in the world that the Reds are economic illiterates is a major task of the United States government, and the new CIA report -the first public report issued porarily put more grain in Soby the agency in four yearsshould help.

European satellites by making The Soviets have boasted that up deficits in their own farm by 1970 the Soviet Union will output. But the original soil overtake and surpass U. S. promoisture and fertility in the new duction. The CIA study, by acreage put under the plow were contrast, shows that the Soviets quickly used up and output fell not only are lagging in the race off. Soviet farm production on but that they keep falling fura per capita basis in 1963 was ther behind. The substance of about 10 percent below that of the report is that for several 1958. An estimated 10 to 12 inches of snow, plus rain and sleet brought an official 1.60 inches of most welcome moisture.

James Brunson, City Secretary and keeper of the official rain gauge, said that he had no way of telling how much snow did fall because of the fact that it was melting some here all of the time, but judging from the the amount of melt there must have been around 12 inches at

least. Quitaque and the immediate area has been more fortunate than most of the vast area covered by the blizard, in that we have had no high winds to drift the snow and as far as is known all roads have been passable around here for the most part. The local schools were dis-

missed Tuesday and Wednesday but classes were resumed Thursday with buses running on the pavement.

As of Thursday morning, no accidents or hardships of any kind had been reported here and all in all, the snowfall should prove to be most beneficial to the entire Panhandle.

Although this area was not actually suffering too bad as yet, Mr. and Mrs. Ray Cruse of the wheat was needing moisture lomot are the parents of a new the base than reported that some wheat was thought to be beyond saving but chances ar" that most of it will come out and make a pretty good stand

The last three Sunday morning worship services have been the best attended for a span of like length in this pastor's career in the ministry, aside from "special" days such as anniver. saries and revivals. The Sunday School numbers, though well below this, have also been relatively high. Work toward the organization of a young adult class, under the direction of Church School Superintendent J. M. Davidson, is to be brought to a climax soon. The general pattern on this is that when the younger member of the couple becomes 35 the two go on to the older class. This church has had three adult groups, and it is hoped to do this again some time, but we are putting this younger class on a first priority
