Battle of the Boll Weevil!

BOLL WEEVIL CAN BE BEAT

The efficiency and effectiveness of the 1964 weevil control program, together with the continued support of producers, strongly points toward a complete High Plains victory over this most dreaded and costly of all cotton insects.

20% LESS REQUESTED FOR WAR CHEST

Economies effected in the first year's spraying, plus the fact that over 97% of producers helped finance it, made possible a substantial carryover of funds from 1964 to be used in 1965. This in turn has made it possible to reduce the requested producer contribution in 1965 from 50 cents to 40 cents a bale. And there is hope this can be further reduced in 1966.

The following is a financial report from the Boll Weevil Steering Committee of Plains Cotton Growers, Inc. to those who are so wisely investing in this vital program:

The O. R. Stark family recently spent a couple of weeks in southern Missouri doing a lot of fishing, and according to O. R., without any outstanding catches. A few days after returning home O. The next morning early he was joined by son Scotty and again the bass were hitting. The next morning Mary joined O. R. and together they brought home still another nice string of bass. The above pictures are of the three morning's catches and not pictures of the same fish. Proof that there is no need to drive several hundred miles to catch bragging size fish!
