VOLUME 8 — NUMBER 9

QUITAQUE, BRISCOE COUNTY, TEXAS — THURSDAY, AUGUST 10, 1967

PRICE FIVE CENTS PER COPY

## CONGRESSMAN BOB PRICE'S WASHINGTON REPORT

Thomas Jefferson, the architect of our Constitution, wrote in 1771: "I had rather be exposed to the inconveniences attending too much liberty than to those attending too small a degree of it."

Were Jefferson here today, he would surely agree that there is more than inconvenience attending "too much liberty" or rather the abuse of liberty.

As Committees of Congress prepare to investigate recent riots and the breakdown of law and order in Detroit, Newark, and other cities, some of the civil rights leaders called for an end to mob law and supported the President's plea "upon all our people, black and white alike, in all our cities to join in a determined program to maintain law and order, to condemn and to combat lawlessness in all its forms, and firmly show by word and deed that riot, looting and public disorder will just not be tolerated."

But at the same time, another so-called civil rights leader, H. Rap Brown, a militant black power advocate, after being arrested and accused of inciting racial violence at Cambridge, Maryland, shouted "we built this country and we'll burn it down," as he was arrested — and later released on bond.

Later at a rally in Washington, D. C., Brown urged Negroes to shoot and loot.

"Lyndon Johnson is my enemy . . . If Washington D. C. doesn't come around, Washington, D. C. should be burned down."

He condemned the best-known leaders of the Civil Rights movement for their appeal to Negroes to cease rioting. "The Nation's Capital is apprehensive of what might follow. It is obvious that not only Washington but other major cities are 'powder kegs.'"

The cry has changed from civil rights to black power. Rep. Adam Clayton Powell from his Bimini retreat said "black rebellions are a necessary phase of the black revolution."

In Cuba, Stokely Carmichael was quoted as saying: "In Newark, we are applying the tactics of guerilla warfare. We are preparing groups of urban guerrillas for defense in the cities. This struggle is not going to be a mere street meeting. It is going to be a struggle to the death." Fidel Castro cheered the statement.

It is obvious now, as it has been to some before, that there is a definite pattern plan to the unrivings and that there will be more of them. Whatever the causes, it is past the time of pleading or any further kid-glove approach. Congress can and will conduct full-scale investigations of the violence. The President has appointed a Special Advisory Commission on Civil Disorders and I have joined other House members in a resolution calling for a full and complete investigation to determine the causes of the riots.

The House Un-American Activities Committee has also scheduled hearings on the subversive elements involved and the Senate Judiciary Committee has called hearings on the House-passed anti-riot bill.

But these hearings will not stop the near state of insurrection the country is now in.

The basic concept of government is protection of its citizens and the answer now must be a hard-hitting determined effort to stop the aggression of a relatively few so that law-abiding citizens can continue

## Fishing Notes -

Channel cat fishing is on the upswing on the local lakes according to reports coming in.

Lyn Payne, who is one of the top fishermen around here, caught a channel cat out at Cottonwood that weighed just a fraction under 7 pounds, a nice catch in any lake. Babe Chandler and Buster Chadwick brought in a real nice string of channels one morning last week and Orval Cobb and Buster were showing off another nice string the next morning. Some nice bass have also been caught at all of the area lakes. Dusty Taylor out at Bursion Lake, reports that brim fishing is real good, and that nice strings of bass and channel cat are also being caught.

## GREGG FAMILY REUNION HELD IN LUBBOCK

Fulton Gregg of Silverton, and his son-in-law, Buster Snodgrass of Oklahoma City, Okla. came for Mrs. J. W. Ewing Saturday and took her to Silverton with them. Mr. and Mrs. Gregg, Mr. and Mrs. Snodgrass, Mrs. Ewing and Mrs. Marie Boling went to Lubbock and spent the night with the John Bolings. Mr. and Mrs. Snodgrass' daughter and two children of Albuquerque, N. M. met them there also.

Sunday morning, Mr. and Mrs. Gregg, Mrs. Marie Boling and Mrs. Ewing went to McKenzie Park early and cooked their breakfast, and soon afterward others began to arrive at the park for the annual Gregg family reunion. All six of the Gregg children living were present. They were Lee Gregg, Miss Lizzie Gregg and Mrs. Bessie Frier, all of Lovington, N. M.; Fulton Gregg, Silverton; Arthur Gregg of Amarillo; and Mrs. Ewing, Quitaque.

There were 45 present to enjoy the noon meal, visiting and picture taking. They came from Lovington, Albuquerque, Tatum, and Cross Roads in New Mexico; Oklahoma City, Oklahoma; and Amarillo, Plainview, Tulia, Silverton, Lubbock and Quitaque. Michael Reed, a 7-year-old from a children's home in Portales, N. M. was spending a week's vacation with the Bill Boling family, brought to them through their church, and he thoroughly enjoyed the outing and the visit with the family.

Mrs. Ewing returned to Silverton with the Gregg family and spent Sunday night with them, returning home Monday afternoon.

to live under the protection of the local governments.

The evidence mounts that the riots, looting, arson and murder in city after city across the nation may be the result of organized planning and execution on a national scale. So while the duty to protect its citizens is primarily one of the local community, the Federal government must accept its national responsibility.

The violence of the few must not be allowed to injure the cause of the many. The most basic of civil rights is being denied the American people and it is time that all government officials make it absolutely clear that under no circumstances will violence and rioting be tolerated or rewarded. The abuse of freedom has gone too far.

Another Thomas Jefferson quote might be worthwhile reading for those who urge insurrection and rebellion: "A Republican government is slow to move, yet when once in motion, its momentum becomes irresistible."

Bob Price  
Member of Congress

## BARLEY NOT TO BE INCLUDED IN NEXT YEAR'S FEED GRAIN DIVERSION PROGRAM

Barley will not be in the feed grain diversion program next season. Consequently no diversion from the barley base acreage will be required of wheat producers requesting the establishment of a barley base for the purpose of growing wheat on such acreage.

All barley producers will be eligible for barley price support regardless of acreage planted, however. The level of loan price-support will be announced later.

Major operating provisions of the 1968 wheat program were announced July 7 (Press Release USDA 2173-67). The barley provisions are being made known at this time so winter wheat producers can have ample time to make cropping plans. About half of the U. S. barley acreage is fall-seeded. Use of the substitution provisions between barley and wheat cropland will result in increased flexibility for grain growers.

Producers requesting establishment of a barley base (or an oats/rye base as previously announced for the wheat program) will need to participate in the 1968 feed grain program if there is a corn or a sorghum base established for the farm.

## BRUNSON REUNION HELD LAST WEEKEND AT LAKE TEXHOMA

The annual Brunson family reunion was held at Lake Texhoma on Friday, Saturday and Sunday, August 3, 4, and 5 with approximately 60 in attendance. Twelve of the thirteen children were present at the reunion.

Those present were George Brunson and family, Kress; H. E. Brunson and wife, Hamilton, Kansas; Mrs. Nettie Kensing, of Lawrenceburg, Tenn.; Mrs. Jack Jordan and her family of Kerrville; Mrs. Juanita Layton and son, Phil Pauls Valley, Okla.; Mrs. Ed Mabe and husband, Byars, Okla.; Mrs. Betty James, Amarillo; James Brunson and family, D. E. Brunson and family, Mrs. B. K. Hamilton and husband, Jess Brunson, and R. L. Brunson, all of Quitaque. Mrs. Ruby Ray of Los Angeles, Calif. was physically unable to be present.

Ray Don King had lunch with his grandparents, Mr. and Mrs. Buddy Morris on Friday of last week as he was enroute home from the coaching school in San Antonio. His wife and children remained in Cisco for a visit with her mother and grandmother.

Mrs. Amelia Johnson and Mrs. Don Johnson drove to Duncanville several weeks ago and attended the basketball game that concluded the State Girls Coaching School.

Jill Johnson, daughter of Amelia, was a member of the North All-Star team, which came from behind and won in the last second of play, 46-48. Jill started the game and played about three quarters. Freida Rousseau of Tulia, who scored the winning basket in the last seconds of play, scored 28 points for the winners.

Others attending the game were the O. R. Stark family, Felix Johnson, W. E. Hawkins and Butch Hamilton who flew down to the game; and John Lynn Johnson, who flew in from Corpus Christi to see his sister play. Jill returned home with John Lynn and visited several days with him and his family at Corpus Christi.

## Sick Report -

Jonann Rogers, small daughter of Mr. and Mrs. J. T. Rogers, Jr. has been quite ill at her home, and is under the care of a doctor in Lubbock. She was carried back to the doctor Monday for a checkup and reports were that she is much better.

Mr. and Mrs. Elmore Pointer drove to Lubbock Wednesday to be with her brother, Wallace Clark of Plainview, who was undergoing brain surgery at a hospital in Lubbock.

Mrs. Lela Mae Barrett took her father, Ray Persons to Tulia last week. They stopped in Silverton and Elaine Boyles accompanied them to Tulia, driving for them. Mr. Persons spent the night with his son, Tom and family, and Tom drove his father to Plainview Thursday morning for a check-up by his doctor, who gave Mr. Persons a good report. Tommy Persons drove his grandfather home that afternoon.

Lester Statser returned home from Dallas Monday where he had been at the bedside of his daughter, Mrs. Cecil Rice. He reports he condition about the same. Cecil Rice returned home Wednesday night, Renay driving over and returning his father home. Mr. Rice reports that he is feeling pretty good.

Mrs. J. W. Harvey was in Amarillo Monday of last week for a check-up by her doctor. She returned home Tuesday after getting a good report.

Sid McFall returned home from the hospital in Plainview on Saturday before last after spending several days there. Mrs. McFall reports that her husband is feeling better but is still weak.

Mr. and Mrs. Jack McFall and children of Snyder came and spent a recent weekend with their parents, Mr. and Mrs. Sid McFall. Bob Walters of Borger spent Friday night at the Sid McFall home.

Mr. and Mrs. Billy Joe McFall and baby daughter of Pam-pa came Sunday and spent the day with his parents, Mr. and Mrs. Sid McFall.

Mrs. N. V. Hamilton took her husband to Plainview to receive medical attention. He has been ill since Saturday of last week.

## PASTOR BILL CURRY'S MOTHER UNDERWENT SURGERY LAST WEEK

Mrs. Joe Curry of Plains, mother of the Rev. Bill Curry, underwent surgery in the hospital at Brownfield Thursday of last week. Her son and wife were at her bedside Thursday, Friday and Saturday and she is reported to be recovering satisfactorily.

## DWAYNE SMITH HOME ON LEAVE FROM NAVY

Dwayne Smith and his wife arrived last week on leave from his Naval duties and will visit his parents, Mr. and Mrs. Roy Smith, his sister, Mrs. Tommy Beck and her family, and with relatives in Floydada.

Dwayne is currently serving on the submarine USS Henry Clay, a Polaris-type vehicle. Dwayne says that most of their time is spent "below", consequently he sees very little of the world. They do not receive any leave time away from their home port.

He is an electrician.

# Faculty Complete

## Notice!

It has been brought to our attention several times in the past that the condition of the City Dump Ground is not good.

We have been real fortunate to have a good place to dispose of our refuse; sometimes, however, we take these things for granted and often abuse them.

We have found in the past few weeks that someone has been putting dead animals, and the waste from butchering, etc., at the dump ground. This is not permitted for several, but mainly from the health standpoint. Dead animals should be disposed of by those who pick them up for rendering purposes or by burning. Please, do not take them to the dump ground. Please do not dump paper, or paper boxes, or any other material that will blow into the pastures surrounding the dump ground. All trash should be dumped into the canyon, not just on the edge.

Please help us carry out these regulations, in order that we can keep our dump ground as clean and orderly as possible.

W. J. Rice Mayor  
CITY OF QUITAQUE

Mr. and Mrs. Lawrence Bedwell of Plainview, N. L. Bedwell and Mrs. Gus Gibson visited in the John King home Sunday afternoon.

Mr. and Mrs. Gene Bedwell of Sunray spent the weekend with Mrs. Daisy Bedwell.

Mrs. James Hawkins and children and Mrs. Jerry Price and children, all of Fort Worth, arrived Wednesday of this week to visit their parents and grandparents. Mr. and Mrs. John King.

Lula Cramer of Arlington and her mother, Mrs. Ralph Stapleton of Flomot visited Mrs. Clarence Barrett recently.

Mr. and Mrs. Ray Gene Hutcheson and Billy of Lubbock spent last weekend with their parents, Mr. and Mrs. Joe Bedwell, and Mrs. Clarence Barrett. Mr. and Mrs. Buddy Riddle of Fort Worth were also here for the weekend. They took their children, Terry and Jeri home after a vacation spent here with their grandparents.

Mr. and Mrs. Johnny Kyle of Amarillo brought their children, Vicky, Ricky and James to Quitaque the past weekend to spend this week with their grandparents, Mr. and Mrs. W. O. Johnston.

## ROSS FAMILY REUNION HELD LAST WEEKEND

The Ross family reunion was held Sunday at the Community Room at the Bank.

Those attending were Alvin Ross, Mr. and Mrs. Buster Boyd and Mary Lou, Lubbock; Mr. and Mrs. Ross Yarborough and Aaron and Mrs. Ineatha Yarborough of Amarillo; Mrs. Ruby Partin of Pascagoula, Miss; Mr. and Mrs. Frank Hawkins of Lockney; Mr. and Mrs. Sam Ross and Jimmy of Flomot; Mr. and Mrs. C. A. Hawkins, Mr. and Mrs. E. W. Tibbets, Mr. and Mrs. Jack Loudermilk, Pam and Billy Jack, all of Quitaque.

A good time was had by all and it was voted to meet again November 29.

The local School Trustees completed the school faculty for the coming year during its regular meeting Monday night.

Phil Barefield was hired as elementary math teacher and also will coach the Junior High boys and girls basketball teams.

Tommy Haralson was also hired to teach in the grade school.

In other business, the Board also named Mrs. Ina Mae Baird to serve as Grade School Principal. Mrs. Baird has been a member of the faculty here for a number of years and had been rehired during the spring. The principal post became vacant when Wilburn Leeper resigned during the summer to take the principal's job at Wildorado Elementary School.

Phil Barefield is the son of Mr. and Mrs. James Barefield, and he graduated from QHS in

## NEW CROP DISEASE SUSPECTED ON HIGH PLAINS

LUBBOCK — A disease new to the West Texas area is suspected in some corn and grain sorghum fields. The invader is believed to be maize dwarf mosaic virus (MDMV), says Dr. Robert W. Berry, Extension plant pathologist at Texas A & M University's South Plains Research and Extension Center here.

Fields heavily infected with the suspected virus have been found in Deaf Smith, Parmer, Castro, Hallam, Moore, Donley, Hale, Crosby and Floyd Counties.

Infected plants show a mottled mosaic pattern of light and dark green on the new leaves as they emerge from the whorl, explains Berry. In grain sorghum, infected plants will turn bright red or reddish-brown in cool weather. In corn, however, the mottling is primarily brown.

Grain does not develop normally in crops infected by MDMV, points out the pathologist. On corn only a few grains may form on the cob while grain sorghum heads may be practically sterile.

This particular virus was first uncovered in South Central Texas last year in sweet corn and losses ranged from 10 to 50 per cent.

MDMV overwinters in the rhizomes of Johnson grass and is transmitted by aphids. As the tender shoots of this grass emerge in the spring, the aphids begin feeding, acquire the virus and move to susceptible crops where they transmit the disease.

There appears to be some varietal differences, adds Berry, but all varieties examined in the area are seemingly susceptible to the suspected virus.

At this time there are no control practices which will be of benefit to susceptible crops.

## BAILEY FAMILY GETS TOGETHER AT LAKE ALTUS IN OKLAHOMA

Mr. and Mrs. Bud Bailey, Charlene and Janet drove to Lake Altus last Friday to attend the annual Bailey family reunion. Others attending were Mr. and Mrs. H. B. Pinckard and Kim, Mrs. Bruce Hume, Mrs. H. J. Bailey, Mr. and Mrs. Joel Wasson and Joey., all of Amarillo; Mr. and Mrs. H. S. Bailey, Tulsa, Okla.; Mr. and Mrs. Loyd May, Alvin and Van, Silverton; and Mr. and Mrs. Bud Bailey and girls.

They returned home Sunday afternoon reporting a very good time.

the spring of 1964. He was salutatorian of that class. He also played basketball and was a member of the team that was nosed out by one point at the Regional finals by McAdoo, the team that went on and won the state championship.

Phil has attended Wayland Baptist College and is now a senior at West Texas State U.

Mr. Haralson is also a senior at WTSU and he hails from Quail. He graduated from Quail High School while Mr. Moseley was superintendent of schools there.

Mrs. Baird has taught in the local schools for twelve years and also has taught in other schools. The trustees and Mr. Moseley feel that they selected a very capable person to handle the duties of principal in the grades.

Dean Johnson, Phil Barefield and Tommy Haralson will drive the school buses this year. The only spot still vacant is the man who will service and maintain the buses and that job is scheduled to be filled Friday night at a special meeting of the board members.

## HIGH PLAINS RESEARCH CENTER'S FIELD DAY TO BE HELD ON THURSDAY, SEPTEMBER, 14

The farm equipment display and demonstration will again be a major attraction at the 11th Annual Field Day at the High Plains Research Foundation on Thursday, September 14, 1967. This feature of the Annual Field Day has grown in popularity each year. At the 1966 Field Day, sixty-two major firms had their latest in farm equipment on display. The exhibitors were occupied all afternoon showing, describing and operating their products for the thousands of farmers and other visitors.

The displays include nearly every kind of equipment used in successful operation of farms and ranches. Some of the displays included irrigation equipment, tractors, combines, land levelling, planting, cultivation, spraying flame farming, herbicides, insecticides and fertilizer equipment manufactured and sold by various companies and individuals.

A group of members of the Board of Trustees will be hosts for the display and exhibition. Members of the host committee will be on duty one hour each during the afternoon to direct visitors to the type of equipment they would like to see demonstrated. Cold drinks will be available as usual furnished through the courtesy of Gifford Hill Western. Their traditional location will be at the spot where visitors unload at the end of the field tours.

Dr. Tom Longnecker, Director, stated "It has been our custom to assign sites for the location of displays on a 'first reservation first choice basis'. Due to the number of people interested in the display who will arrive early on the 14th, it has been the custom to have the equipment in place by Wednesday evening."

Mr. and Mrs. Wendell Farley and family left Friday of last week to visit his mother, Mrs. E. J. Farley, and his brothers and sisters at Farmington, N. M. Mrs. D. C. Duck is keeping the Flower Shop and Variety Store while the Farleys are away. Roberta called her mother Wednesday to report that they are having a good time.

Visitors in the home of Mrs. Mitchell of Bryan and Mrs. Willie Lou Boyles during the weekend were Mrs. Howard John Boyles on Friday; George Boyles of Amarillo came Saturday.

## This is when you need an insurance agent on your side

If Lady Luck threw a monkey wrench into your plans like this, could you count on your insurance man to go right to work for you? You could, if he's an independent insurance agent. An independent agent is on your side when you need him most. He can serve you first because he's free to pick and choose among several fine insurance companies. He owes allegiance to no one company. To be sure you have an insurance man who represents your interests first, make sure he displays this Big "I" seal. As independent agents, we're ready to give you continuing, personal attention—The Big Difference in car, home, and business insurance. Let us prove what service beyond the call of duty can mean to you.

## Stark Insurance Agency

Phone 2331 Quitaque, Texas

urday; and Mrs. J. J. McCay of Amarillo, Mrs. Dud Waters of Silverton came Sunday.

Mr. and Mrs. J. W. Lyon of Silverton, Marie Bonds of Lebanon, Tenn. were supper guests of Mr. and Mrs. Will Lyon Wednesday of last week. Marie Bonds is Mrs. J. W. Lyon's sister and Jerry is a nephew. Marie and Jerry spent that night and Thursday with the Will Lyons, and they all drove out to Burson Lake in the afternoon. The Will Lyons have visited in Lebanon a number of times with their son and his wife.

Mr. and Mrs. A. C. Barrett and Mr. and Mrs. Cecil Price visited Otis Wilson at Plainview Hospital and Clinic Sunday.

Mr. and Mrs. Lawrence Stewart of Healdton, Okla. spent two days last week with her brother and his family, Mr. and Mrs. Cecil Price and Larry.

Mrs. Ralph Carter took her grandsons, Scott and Todd Hedrick, to Plainview Monday to visit their parents, Mr. and Mrs. Larry Hedrick. Mrs. Carter is in Plainview visiting her daughter this week.

Byron Young of Turkey and Ralph Carter drove over to Plainview Monday night to visit at the Hedrick home. Also present was a nephew and his wife, Mr. and Mrs. Lenard Fawver and two boys of Fort Worth, who had been vacationing at Ruidoso, N. M. and had stopped in Plainview for a visit as they were enroute home.

Mrs. George Owens and Sissy spent from Thursday of last week until Sunday with Mr. and Mrs. Bill Ebbs and Carl Wayne in Plainview. Mr. and Mrs. Ebbs drove them home Sunday afternoon and visited for awhile.

Mrs. Jack Hulsey returned home Wednesday of last week after spending a week with her daughter and family, Mr. and Mrs. James Brooks and children in Hereford. Mr. and Mrs. Harley Eddleman and boys of Claude spent Wednesday night with her.

Mr. and Mrs. E. D. Richmond of Turkey and Mary Ellen McCracken were recent visitors in the home of Mr. and Mrs. Lonnie Richmond and Ty in Lubbock.

Mr. and Mrs. Dwain Hen-

ROBERSON DRY GOODS

erson and Sonya of Silverton were Sunday visitors with his parents, Mr. and Mrs. Gaston Owens and Eddie.

Mr. and Mrs. Roy Smith have just returned from a trip to cool Colorado, leaving here Saturday, July 29, and returning on Wednesday of last week. They visited her brother and family, Mr. and Mrs. Cleo Montgomery at Olney Springs, and while there the Montgomerys took them on a tour of Colorado Springs, Cripple Creek, and Fair Play, which is a ghost town, and they report a very interesting tour. They left Colorado Sunday and drove to Felt, Okla. where they visited another brother and his wife, Mr. and Mrs. Oscar Montgomery. They left there and drove home Wednesday.

Sunday visitors at the home of Mr. and Mrs. Roy Smith were their son, Dwayne and his wife, of Chaleston, S. C., who arrived in Floydada on Thursday of last week. They came Sunday to visit his parents, and were joined by Mr. and Mrs. Willie Bradshaw, J. Royce and Anna Leta of Floydada; Mr. and Mrs. Tommy Beck and family of Quitaque; Mrs. Smith's sister and family, Mr. and Mrs. Norman Price, Charles and Marie of Lubbock. Charles had just arrived home from Germany and none of them had seen him in quite some time and enjoyed a reunion with him. Mrs. Smith's niece and her family, Mr. and Mrs. Walter Coventry and 3 daughters of Lubbock, and Mrs. Smith's sister, Mrs. Bill Morris and daughter, Lillie Mae of Tulsa completed the visitor list. They report a nice visit together.

Mr. and Mrs. Jim Stevenson of Silverton and her brother, Casey Meeks, from Hereford visited Thursday night with Mr. and Mrs. Buddy Morris. Mrs. Stevenson and Mrs. Meeks are Mr. Morris' cousins.

Marilyn Hutcheson and Elaine Boyles spent last weekend in Amarillo at the home of Mr. and Mrs. Glynn Barrett.

Mr. and Mrs. Robert Hamilton spent the weekend with his parents, Mr. and Mrs. N. V. Hamilton, and his sister, Mrs. Billy Rodgers and Mischa of Tyler. The Robert Hamiltons took their children home with them Sunday afternoon. They had spent last week here with their grandparents, their aunt and cousin, Mrs. Rodgers and Mischa returned to their home at Tyler, Sunday, also.

Levi Imel, brother of Mrs. Gladys Wiley, has been visiting here several days with Mrs. Wiley and the Jack Cheatham family. His home is in California. He left Wednesday morning of this week and went to Parnell to visit another sister and her husband, Mr. and Mrs. Chester Weatherly.

### REGISTRATION DATES SET FOR WAYLAND BAPTIST COLLEGE

Dr. Roy C. McClung, president of Wayland Baptist College in Plainview, Texas announced today that registration for the fall term will begin on September 4th, and the term itself will start on September 7th. There are a limited number of openings still available.

In making this announcement, Dr. McClung pointed out three vital factors which make Wayland Baptist College appealing to students.

"The private nature of Wayland Baptist College emphasizes the free enterprise segment of higher education. The place of the private school is well established and the need for a good balance in the United States between public and private education has been recognized by Congress as well as business and industry. Strong private institutions are a further guarantee to the development of independent, free enterprise initiative on the part of budding young leaders."

Dr. McClung added: "Wayland Baptist College is small enough to provide education tailored to each individual's needs through personal counseling and individual attention. Expert teachers, including Ph. D.'s, deal with both freshmen and sophomores as well as advanced groups. Because of its smallness, Wayland can provide a flexibility in its educational program not possible at larger institutions."

"An evidence of this flexibility is the innovation in the 1967-68 academic year. The fall semester at Wayland which begins on September 7th will close on December 22nd. The second semester will begin on February 1st and close May 24. During the month of January, an interim term is being used for the first time to give an opportunity for students to receive three hours credit in three weeks in a very personalized classroom experience. Each professor will teach one course and each pupil will take one course, allowing classes to move "where the action is" during this three weeks period. During this interim term, new and challenging methods of instruction will be utilized."

The third feature of Wayland Baptist College which Dr. McClung feels is important is that it provides church related educational development.

"Wayland fits into that tradition of developing character and leadership qualities: because with the campus life structure, along with the academic program, the possibilities for constructive experience toward effective leadership are extremely strong. The spiritual atmosphere of the campus is informal and relaxed with an honest and mature approach to the settlement of each individual of a philosophy of life springing out of the great Christian tradition."

Wayland Baptist College will be operating this fall in recently improved facilities with the classroom space in Gates Hall completely modernized and each of the dormitories has been remodeled to give higher levels of comfort and pleasant group living. Thirty per cent of the faculty this academic year hold doctor's degrees. Dr. McClung's final statement is worthy of direct

THE 'QUITAQUE' TRIBUNE — THURSDAY, AUGUST 10, 1967

quotation: "The end product of Wayland's educational process is an intelligent, cultured, socially involved, highly motivated, capable leader ready for maximum participations in the movements of late 20th century society."

## OUR HEALTH

By J. M. Amberson, M.D.

### PSORIASIS: THE MYSTERY SKIN DISEASE

"Skin disease does not often end life, but it does often ruin it," a dermatologist observed recently.

Unlike heart, lung, and other internal diseases, skin disorders affect the one part of the body that is generally visible to others. The sufferer not only endures many hours of itching, burning, and general discomfort, but he must also constantly quell the anxieties of others—friends and strangers alike—who view his disorder with suspicious uncertainty.

Dr. Amberson says that those who suffer from psoriasis (pronounced so-RI-ah-sis), a skin disorder that afflicts one out of fifty in the United States.

This is often the problem of those who suffer from psoriasis (pronounced so-RI-ah-sis), a skin disorder that afflicts one out of fifty in the United States. This stubborn disorder can affect people regardless of age or sex, although most frequently it first appears between the ages of 15 and 30. Once the lesions appear, however, they usually will persist in varying degrees of intensity the rest of the person's life.

Most commonly, psoriasis appears as silvery-scaled red patches on the elbows, knees, scalp, and trunk. The nails, underarm and genital areas may also be involved.

When acute psoriasis appears, many small, raindrop-like lesions cover the affected area. Occasionally, there may be a severe flare-up in which

there is a painful reddening of the entire skin, cracking of the skin, and generalized shedding of large areas of scaling skin. Sufferers from this form of psoriasis often need to be hospitalized promptly and given intensive treatment.

Psoriasis, however, is not contagious and usually does not threaten or shorten the lives of those afflicted.

Although this stubborn skin disorder remains largely a "mystery" disease, much more is known about its complexity today than in the past. However, while psoriasis can be treated, there is still no known cure.

Medical research continues to explore the many mysteries of psoriasis, but until we finally have a cure, a more sympathetic understanding of the disease by the general public will greatly lessen the burden for those who must live with it.

### What Is Periodontal Disease?

Briefly stated, it is a disease of the supporting tissues around a tooth and it is treated by a specialist called a periodontist. However, while it is basically a condition involving the gums, it may also involve improper bite or bruxism (grinding of teeth). Modern periodontal procedures, which may involve cutting away part of the gums around a tooth, have been made easier by new techniques and medications for use during and after the procedure. One relatively new oral solution, called Chlorasptic, is a non-prescription topical anesthetic that relieves minor gum soreness within seconds.

**LOCAL BRIEFS**

Mr. and Mrs. W. W. Cheat-ham and family visited his par-ents. Mr. and Mrs. Bill Cheat-ham and other relatives in Brownfield Sunday.

Mr. and Mrs. R. B. Finney of Davidson, Okla. are spending today (Thursday) with his brother and wife, Mr. and Mrs. H. B. Finney.

Mr. and Mrs. S. L. Mc-Kenzie and their granddaughter, Sherri, of Fort Worth, visited her father, H. W. Hamilton at Nichols Manor on Wednesday of last week. They spent the night here with Mr.

and Mrs. Leroy Hamilton and L. W.

Mr. and Mrs. Bob Eudy and Mr. and Mrs. Jimmy Eudy of Fort Worth flew to Quitaque to visit relatives. They were dinner guests of Mr. and Mrs. Raymond Hamilton. Mr. and Mrs. Deloy Myers and baby were also dinner guests at the Hamilton home. That afternoon Mr. and Mrs. Bob Eudy and Mr. and Mrs. Leroy Hamilton drove to Lockney to visit their father, H. W. Hamilton at Nichols Manor.

Mr. and Mrs. H. S. Foster accompanied their daughter, Mrs. Cleo Smith, and her fam-

ily to Amarillo to visit the Foster's son, Zack, and his family. Mrs. Smith spent the weekend with her daughters and their families. Zack Foster has been hospitalized with a heart condition, spending two weeks in the hospital. Mrs. Foster reports that he is at home and improving but will have to take it easy for awhile.

Mr. and Mrs. B. K. Hamilton returned home Sunday after spending the summer at Lake Tawakoni near Greenville. They report that they are home to stay for awhile.

E. D. Richmond, Ronnie and Sandy visited Mary Ellen McCracken Sunday.

**HOME NOTES**  
(By Becky Hall)  
**Briscoe County**

**Home Demonstration Agent**

Every girl needs home economics as preparation for both marriage and career. Home economics equips the girl who marries after high school for the adventures of life . . . makes a rewarding career for a girl who will go on to college, a career, marriage, motherhood, and then back to a career . . . and aids the dedicated girl in every phase of her service. Home economics is, in fact, useful for every girl.

For the bride, home economics is the basis of homemaking. A BA or BS degree from one of the good home economics colleges is a ticket to a well-paying job anywhere in the country—and in a big city a girl with a Master degree and

some experience can "write her own ticket."

Home economists may to an average rate for most girls, and a better than average rate for career girls. A related statistic is that home economists have the lowest divorce rate of any group in America . . . perhaps an indication that the fundamentals of homemaking add up to successful husband care!

There is presently a drastic shortage of professional home economists. For the 10,000 girls—marriage-minded or dedicated—who graduate with that major each year, it is the key to 15,000 good jobs. There is bound to be an even greater demand for their services once it is recognized that they are best able to guide and protect consumers who are sometimes confused by the proliferation of new equipment, food, and fibers.

**BRUSH CONTROL**

**An Essential Step in Grassland Restoration**

The basic need to bring Texas' grassland back into high production is to improve or restore the plants that can produce high quality forage most efficiently under Texas conditions. Range restoration must consist of a four - point program: (1) Control of undesirable brush; (2) Re-establishment of the desirable plants by natural or artificial means; (3) Control of spouts and re-infestation; and (4) Management of the grass to maintain the grasslands in high productivity.

Extensive control efforts have already been made by soil and water conservation district cooperators but much more re-

mains to be done in this field.

Effective treatment of brush is a complex and difficult problem, as well as a costly operation. Complete treatment for some thickly infested areas may include many operations with a total outlay of \$12. to \$15 per acre. Brush control must be a part of a long-term conservation plan that is systematically applied if it is to be effective in restoring the grasslands to their potential productivity of high quality forage.

The second step in range restoration is to improve the stand and productivity of the forage plants once the brush has been controlled. Some grasslands have enough of the desirable plants left to make needed improvement if the grass is given a chance. Most grass on brushland is in low vigor, the result of competing with the brush for sunlight, moisture, and soil nutrients. A rest following treatment is essential. Deferring grazing following treatment is often the key to successful improvement. Treatment on many acres has been nullified because the grasses were not given a chance following brush control.

Reinfestation must be controlled as the third step in range conservation if lasting benefits are to be realized. Partial control, resprouts, and seed either on the ground or brought in by birds or animals are important sources of reinfestation. There is no treatment presently known that eradicates all the undesirable plants. Complete eradication is generally impossible and impractical; and, it is often not desirable because the woody plants may have consid-

erable value as wildlife food and cover plants.

The most important step in restoration and maintenance of grasslands is the wise use of plants. Plants manufacture food in their leaves from carbon dioxide taken from the air, and nutrients absorbed from soil. Remove the leaves and the plant can't grow, showing how important the leaves are in the growth process of the plant. Continuous close grazing will prevent the leaves from making foods, and will result in eventual death of the plant.

It has been found that plants can make satisfactory growth if no more than about half of the leaves are removed. This fact is the key in successful grassland management. A good stand of vigorous grasses is nature's best defense against invading weeds, shrubs, and trees, as well as insurance and reserve feed for a drought.

Management of livestock to avoid excessive use is essential. Rainfall fluctuates widely and so does the forage produced. This requires seasonal and yearly changes in herd numbers, for it is during the dry years that the grasses can be hurt the most. Flexibility in animal numbers is needed to make adjustments in line with forage produced. For this reason, it is best to carry a permanent or base herd somewhat below the number that the forage will support in a good year. The extra forage produced in good years can be harvested with carryover or stocker animals. It is also important that the herd can be reduced readily without undue sacrifice when shortages occur.

It is wise management and good business to carry a feed reserve for poor moisture years. Reserve forage may be in the form of extra grass on the ground, reserve or rested pastures, stored feeds, or grazing crops. It will never hurt to have some extra feed, but it will hurt to have to buy high - priced feeds or to lose animals or production because the forage ran out.

Range restoration is not a simple job. It requires technical knowledge of many subjects. It requires an evaluation of the many-sided problems involved, and an analysis of the possible solutions to achieve the optimum benefits desired. It requires the development of a plan and systematic application of the needed treatment that will give the maximum results in line with a rancher's wishes and financial resources.

The high cost and complexity of the problems, the many species involved, the treatment required, and the need for more

**THE COLOR CORNER**

BY MARTHA BRANDT

It's a lot of fun to look at a rainbow, but if you're in the middle of one it's a bit hard to sort out the colors. There are at least 4,000 dyes or combinations of dyes coming out of colors being manufactured today, according to a leading source: the Textile Dye Institute.

One pot of gold at the end of this rainbow is information. Consumers can now count on some help from the industry which creates the colors in the first place. For starters, here are basic questions to keep in the back of your mind while you're holding those exciting new colors in front of your eyes:

Where Is the Purchase To Be Used? If you're buying draperies, for instance, either ready-made or by the yard, consider the windows they will frame or cover. If they are exposed to a lot of sunlight, make sure the fabric is colorfast to light (ask the salesperson, if there is no tag from the manufacturer, if you can't get an answer from the store, take time to write to the manufacturer).

If You're Buying Clothes, Think About What You Want. Are they washable or cleanable clothes — or both. Sometimes cottons (particularly those blended with other fibers) can be either washed or dry-cleaned. Women's dresses and men's suits as well can be cared for at home if they are labeled "washable."

You Should Also Check Labels For Any Information. If they are not informative, write to the manufacturer or a reputable organization who will help you find out. Obviously, if you're buying anything with color you want to have the color last as long as the garment. So make sure that you buy the best quality you can afford. The good manufacturer is interested in his good name, and he can best protect it with good quality products such as the best dyes/stuffs for colored fabrics.

effective control measures for some species of brush make it imperative that long - range plans be developed and carried out by all concerned. An all-out approach will involve research, financing, educational, and operational agencies, as well as unified and widespread action by livestock operators themselves through their local soil and water conservation districts.

**PUBLIC NOTICE**  
**Proposed CONSTITUTIONAL AMENDMENT**  
**NUMBER TWO ON THE BALLOT**

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article IX of the Constitution of the State of Texas be amended by adding a new Section 13 thereto to read as follows:

"Section 13. Notwithstanding any other section of this article, the Legislature in providing for the creation, establishment, maintenance, and operation of a hospital district, shall not be required to provide that such district shall assume full responsibility for the establishment, maintenance, support, or operation of mental health services or mental retardation services including the operation of any community mental health centers, community mental retardation centers or community mental health and mental retardation centers which may exist or be thereafter established within the boundaries of such district, nor shall the Legislature be required to provide that such district shall assume full responsibility of public health department units and clinics and related public health activities or services; and the Legislature shall not be required to restrict the power of any municipality or political subdivision to levy taxes or issue bonds or other obligations or to expend public moneys for the establishment, maintenance, support, or operation of mental health services, mental retardation services, public health units or clinics or related public health activities and may levy taxes, issue bonds or other obligations, and expend public moneys for such purposes as provided by law."

other than the hospital district in the establishment, maintenance, or support of mental health services, mental retardation services, public health units or clinics or related public health activities within or partly within the boundaries of any hospital district, any municipality or any other political subdivision or state-supported entity within the hospital district may participate in the establishment, maintenance, and support of mental health services, mental retardation services, public health units and clinics and related public health activities and may levy taxes, issue bonds or other obligations, and expend public moneys for such purposes as provided by law."

Sec. 2. The foregoing constitutional amendment shall be submitted to a vote of the qualified electors of this state at an election to be held on November 11, 1967, at which election all ballots shall have printed thereon the following:

"FOR the constitutional amendment to permit municipalities, other political subdivisions, and state-supported entities located within hospital districts to participate in the establishment, maintenance, support, or operation of mental health services, mental retardation services, or public health services."

"AGAINST the constitutional amendment to permit municipalities, other political subdivisions, and state-supported entities located within hospital districts to participate in the establishment, maintenance, support, or operation of mental health services, mental retardation services, or public health services."

**REPRESENTATIVE RALPH WAYNE WRITES TO THE EDITORS**

Only one thing seems certain at this time: 1968 promises to be a big political year in the State of Texas.

Much of what happens in Texas' politics next year hinges on a decision by Governor John Connally as to whether he will seek another term or whether he will retire from the political scene. The Governor has promised to make his decision within the next few weeks, although he may delay an announcement until later.

According to many political writers, Lieutenant Governor Preston Smith has made up his mind to be a candidate for governor and will so announce before the date Connally says he will make his decision. However, other observers are saying that Smith will not run against Connally.

The dynamic speaker of the

THE TRIBUNE

Texas House, seems certain of being a candidate for either governor or lieutenant governor. If Connally seeks another term, Barnes will almost surely run for lieutenant governor. However, if Connally bows out, Barnes will probably run for the governorship. Prognosticators have it that Don Yarborough will run again for governor, and that former Senator Franklin Spears might possibly run for lieutenant governor, both representing the liberal viewpoint. Rumors also persist that some other Senators will make a go for lieutenant governor, including Murray Watson of Waco.

All of which makes these "dog days" of summer look a bit more interesting. No one has announced definite plans as yet.

Before we start counting the size of the Tax Bill, which must be enacted next year before an appropriation bill can be passed for the second year of the biennium, it might be well to take a look at what can be expected in new revenue. The Middle East confron-

tation between the Arab states and Israel, which resulted in closing the Suez Canal, is putting dollars into the Texas State Treasury. The six day war, which started on June 5, caused the Texas Railroad Commission to meet and raise the allowable production quota for the last of June. The July allowable was again raised and following that, the August allowable production quota was raised.

Assuming that the crisis might possibly last until the end of the year, and then production be cut back to the May allowable, the total amount of increased revenue which would be deposited into the State Treasury would total over \$14,000,000. This increased revenue of course will make our tax bill next year much smaller.

On the 10th of August, officials from the State Department of Agriculture will be in the 79th Legislative District area to discuss research on the production and quality of castor beans. I have met several times with Commissioner John and Deputy Commissioner Bill Pieratt and they have appointed a committee from our area to work with them on the research. Money was included at my request in our recent appro-

riation bill of the 60th Session.

Officials of the Texas Water Development Board have tentatively scheduled a meeting later this month with the Advisory Water Committee of the West Texas Chamber of Commerce. It is hoped that time people from our area will be brought up to date on what planning is being done under the statewide water plan. This meeting should be of interest to all of us.

I might mention that many of our new driving laws go into effect September 1. The primary change raises the age at which a person may receive an operator's license from 14 to 16, if such a person has completed and passed a driver edu-

cation course, and from 16 to 18 for those who have not completed such a course. However, we still have our hardship exception as in the old law. The new law also provides

that all licenses issued to persons under 21 shall be provisional licenses, and all new driver's licenses issued and renewals will have a color photograph of the driver.

**PUBLIC NOTICE**  
Proposed CONSTITUTIONAL AMENDMENT  
NUMBER FIVE ON THE BALLOT

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article III of the Constitution of Texas be amended by adding a new section thereto to be known as Section 49-e, as follows:

"Section 49-e. The Parks and Wildlife Department, or its successor vested with the powers, duties, and authority which deals with the operation, maintenance, and improvement of State Parks, shall have the authority to provide for, issue and sell general obligation bonds of the State of Texas in an amount not to exceed Seventy-Five Million Dollars (\$75,000,000). The bonds authorized herein shall be called "Texas Park Development Bonds." shall be executed in such form, denominations, and upon such terms as may be prescribed by law, provided, however, that the bonds shall bear a rate or rates of interest as may be fixed by the Parks and Wildlife Department or its successor, but the weighted average annual interest rate, as that phrase is commonly and ordinarily used and understood in the municipal bond market, of all the bonds issued and sold in any installment of any bonds, shall not exceed four and one-half percent (4½%) interest per annum; they may be issued in such installments as said Parks and Wildlife Department, or its said successor, finds feasible and practical in accomplishing the purpose set forth herein.

"All moneys received from the sale of said bonds shall be deposited in a fund hereby created with the State Treasurer to be known as the Texas Park Development Fund to be administered (without further appropriation) by the said Parks and Wildlife Department, or its said successor, in such manner as prescribed by law.

partment, or its said successor, under such provisions as the Legislature may prescribe by general law, for the purposes of acquiring lands from the United States, or any governmental agency thereof, from any governmental agency of the State of Texas, or from any person, firm, or corporation, for State Park Sites and for developing said sites as State Parks.

"While any of the bonds authorized by this provision, or any interest on any such bonds, is outstanding and unpaid, there is hereby appropriated out of the first moneys coming into the Treasury in each fiscal year, not otherwise appropriated by this Constitution, an amount which is sufficient to pay the principal and interest on such bonds that mature or become due during such fiscal year, less the amount in the interest and sinking fund at the close of the prior fiscal year, which includes any receipts derived during the prior fiscal year by said Parks and Wildlife Department, or its said successor, from admission charges to State Parks, as the Legislature may prescribe by general law.

"The Legislature may provide for the investment of moneys available in the Texas Park Development Fund and the interest and sinking fund established for the payment of bonds issued by said Parks and Wildlife Department, or its said successor. Income from such investment shall be used for the purposes prescribed by the Legislature.

"From the moneys received by said Parks and Wildlife Department, or its said successor, from the sale of the bonds issued hereunder, there shall be deposited in the interest and sinking fund for the bonds authorized by this section sufficient moneys to pay the interest to become due during the State fiscal year in which the bonds were issued. After

all bonds have been fully paid with interest, or after there are on deposit in the interest and sinking fund sufficient moneys to pay all future maturities of principal and interest, additional moneys received from admission charges to State Parks shall be deposited to the State Parks Fund, or any successor fund which may be established by the Legislature as a depository for Park revenue earned by said Parks and Wildlife Department, or its said successor.

"All bonds issued hereunder shall after approval by the Attorney General, registration by the Comptroller of Public Accounts of the State of Texas, and delivery to the purchasers, be incontestable and shall constitute general obligations of the State of Texas under the Constitution of Texas.

"Should the Legislature enact enabling laws in anticipation of the adoption of this amendment, such Acts shall not be void by reason of their anticipatory nature."

Sec. 2. The foregoing amendment to the Constitution shall be submitted to a vote of the qualified electors of this State at an election to be held on November 11, 1967, at which election each ballot shall have printed thereon, the following words:

"FOR the amendment to the Constitution of Texas adding a new section to be known as Section 49-e of Article III, authorizing the issuance and sale of Seventy-Five Million Dollars (\$75,000,000) in bonds by the State of Texas to create the Texas Park Development Fund to acquire lands for State Park sites and to develop State Parks."
