HOME FROM HOSPITAL ___

DEAR READERS:

Due to the fact that our good right arm is in the hospital, we have had to be away from the shop much of the time this week. That among other things has delayed us to the extent that much of our locals did not get set into type. Mrs. Ralph Carter gathered a lot of locals for Quitaque, as did our Turkey reporter, Mrs. Billy Wheeler

We will catch up on our comings and goings next issue. The Owens' appreciate the many inquiries and concern regards Lottie. She will be out of the office for some time, and Mrs. Carter will continue to report the Quitaque news.

HAS SURGERY

In TO BE ADJUSTED PROPERLY 1969 we spent only 16.5% of our incomes for food as compared with 24% some 20 years ago and this despite the fact the producer is getting about nine cents less out of every food dollar than he received 20 years ago. Production expenses have continued to rise; thus, keeping the cost - price squeeze a major problem for agricultural producers.

Producers are continually searching for better and more efficient ways to keep the food and fiber lines filled. Today the U.S. farmer produces enough food and fiber for 45 people, about 39 at home and 6 abroad. A decade ago he supplied the agricultural need of only 24 people.

Other problems of common interest to farm and city residents are also cited by President Nixon in his Farm - City Week proclamation. He said, "With two-thirds of our population crowded onto only two percent of the land, many of our people are denied economic! opportunities, adequate living space, health, cultural fulfillment, and those spiritual values without which no nation can achieve greatness. "The time for action is at hand-for careful plans to be formulated, and for decisions to be made at local government levels, to foster the improved distribution of population and accompanying economic activity needed during the decade of the 1970's and beyond. The Government can provide assistance, but the effort will succeed only as Americans take part in developing a policy of sound national growth.

"In this effort, city dwellers and rural people alike have reason to work together toward common goals. The well-being of urban Americans and the welfare of rural America will increasingly intertwine as our total population expands. Better living in the one depends on better living in the

other. "I request the leaders of agricultural organizations, business groups, labor unions, youth and women's clubs, civic and fraternal associations, schools and others to join in noting not only the interdependent roles of the producers and consumers of America's

People who cook with pride cook with GAS. Mrs. Rolan Simpson does.

Some of the world's best cooks are found in the kitchens of America, and they give themselves every cooking advantage, like gas range cooking. Good cooks like Mrs. Simpson and nine out of 10 professional chefs agree that precise temperature control makes the difference in good cooking, and with gas you get exactly that. Gas also gives immediate response and constant temperature, so important in oven cooking.

So, give yourself every advantage and cook with gas. Remember, people who cook with pride cook with gas.

it with a damp towel and chill it.

WALNUT ROLL

Mrs. Rolan Simpson, 3213 56th St., Lubbock

Brush a jelly-roll pan, 10 x 15 inches, with oil, line it with wax paper, and oil the paper. Separate 7 eggs. Beat the yolks with 3/4 cup sugar until the mixture is pale in color and thick enough to "ribbon." Beat in 1½ cups ground walnuts and 1 teaspoon baking powder. Fold in egg whites, stiffly beaten. Spread the batter in the prepared pan and bake the cake in a moderate oven (350 degrees) 15 or 20 minutes or

Dust the cold cake generously with sifted confectioner sugar and turn it out on a board covered with two overlapping sheets of wax paper. Carefully strip the paper from bottom of cake. Spread cake with 1 cup heavy cream, whipped and flavored to taste with sugar and vanilla. Roll up the cake, using the paper as an aid, slide the roll onto a flat serving platter. Sprinkle with more confectioner sugar. (Rum or almond flavoring is also good.)

Through every generation - people have looked for peace and security. Hundreds of volumes have been written on the subject and thinkers and writers have devoted their lives to the search.

But of all these books, the Bible is most concerned with peace and security. "Fear not, for I am with you; be not dismayed for I am your God."

No man-made philosophy can banish the worries and troubles of today's complex life. But in the gospel we find assurance of His care.

God loves us. When we go to Him in humility, He cleanses us of sin. Our minds are put at ease. Peace fills our

Go then to the Book for modern man. Through study. prayer and worship we will find that peace which has been granted to millions - in every country - in every age. Discover anew the life for modern man.

The Bennetts live here. That's Grandmother Bennett's Bible on the window sill, and the whole family goes to the church across the snow covered field.

John Bennett works in the local bank. Martha, his wife, is president of the PTA, and they have three lovely children. Grandmother Bennett has been living with them for the past couple of years, since she broke her hip. She can't always get to church in wintertime and that's why she calls this her window. When she can't be in church, it helps to be able to see it.

To her, the church steeple represents a great many things, and brings back many memories. Her son was married in that church. Her busband was buried from it. Her grandchildren were christened in it.

The Church has helped her to bear grief, in hours of sorrow; and it has seemed to put a benediction upon her happiness, in times of joy. Most important of all, whatever the occasion, whatever the crisis . . . the Church has always been there.

To Grandmother Bennett, the most comforting thing in the world is knowing that it always will be there.

Clean Air Development

A secretary at Detroit Diesel Engine Division of General Motors holds a cutaway fuel injector which has been improved to substantially reduce exhaust emissions. In combining this latest refinement with other design changes made during the mid-1960's, engines built today emit 90% less hydrocarbon (an element in smog) and 40% less carbon monoxide than engines of 10 years ago.

With the growing concern over pollution, the following facts may prove to be enlight-

1. Diesels are the source of less than 1% of all U. S. Air pollution by actual

2. In the last 10 years Detroit Diesel has made design improvements which have reduced diesel exhaust smoke by two-thirds and odor intensity has been cut by 75%.

3. Some of the chemicals in air pollution which cause the greatest concern are

diesel trucks and buses is less serious than it may appear. The engines built by Detroit Diesel today emit amounts of carbon monoxide and hydro-
