Carter's top officials offer to quit positions

WASHINGTON (AP) - With all of his Cabinet and high-level staff offering to resign, President Carter is expected to decide by Friday where the ax will fall as he works on a new lineup to revive his presidency.

Senior officials were shaken by the move - the latest surprise in Carter's self-declared turning point - which left the government in limbo.

The 34 top officials affected said little in public beyond confirming that they had been asked Tuesday to tender their resignations.

White House press secretary Jody Powell said the offers, made orally and not i writing, would be considered "carefully and expeditiously" by the president. Cabinet secretaries were led to believe they would hear

whether Carter would keep them on "in two or three days," one source said. Another source said the president's decision would come sometime "this week." Both sources asked not to be identified. One White House official, reflecting the extremely

secretive nature of the day's developments in this city that thrives on rumors, said, "Whatever the president's decisions may be, I can assure you he is keeping them to

adjacent ented for Call for

Realtors

The number of resignations the president will accept remained unclear, but one White House official said "the president will accept some." Said another: "It shows he means business. It isn't

fatuous. Members of Congress called Tuesday's announcement "strange" and "curious." Republican reaction was the

harshest, but several Democrats also questioned the president's actions. Powell's brief announcement that several high mem-

bers of the administration had tendered their resignations left unanswered several questions: What motivated the mass offer? Were the resignations

solicited? And by whom, the president or his chief aides as they seek flexibility in restructing the administration to bolster Carter's re-election odds? Dodging such questions, one official who asked for

anonymity, would say only that the resignations "were Asked why dozens of top people in government would be moved simultaneously to offer to quit without prodding,

the official responded: "We felt it to be an appropriate step to take at this time." Besides the 12 Cabinet officers, resignation offers came

from all presidential assistants and special assistants, including Hamilton Jordan, Carter's de facto, but untitled, chief of staff. When the smoke clears, Jordan is likely to emerge with that title.

Powell, a Georgian like Jordan, could also be given expanded authority. Speculation on those most likely to leave the Cabinet

focused on embattled Energy Secretary James R. Schlesinger, who has said he would leave before Carter opens his anticipated re-election campaign.

Treasury Secretary W. Michael Blumenthal, and Joseph A. Califano Jr., the secretary of health, education and welfare, both of whom have raised the ire of senior Carter aides, were also possible targets.

Reflecting the scope of the resignations, Warren Dunn, spokesman for Housing and Urban Development Secretary Patricia Roberts Harris said "my boss and everybody else's boss in Washington resigned today.'

One Cabinet member was described by an aide, asking not to be identified by name or department, as "literally shaken" by the prospect that his resignation offer might

Among those offering to resign wee U.N. Amassador Andrew Young; Budget Director James McIntyre; Middle East peace negotiator Robert Strauss; and Mary

Hoyt, first lady Rosalynn Carter's press secretary.

Alfred Kahn, chairman of the Council on Wage and Price Stability, was not asked for his resignation, a spokesman said. Nor were any changes said to be contemplated that involve key national security affairs posi-

Vice President Walter F. Mondale, whose chief of staff, Richard Moe, also offered to resign, said in Omaha, Neb., that "it was time ... to see if the personnel structure was entirely appropriate to the policies that the president is

The resignation offers pushed the dollar down at the close of Tuesday's currency trading in New York.

On Capitol Hill, Sen. Lowell Weicker, R-Conn., said, "I think the president is nuts." Referring to Carter's declaration that the nation is facing a "crisis of confidence," Weicker said the resignation offers were "just a continuation of the scapegoat operation. It is the president, not his Cabinet, that the American people have lost confidence

But Rep. Morris K. Udall, D-Ariz., said the president was "trying to give the impression that ... policies are going to change, that personnel are going to change."

The announcement came on the heels of a new Associated Press-NBC News poll showing that Americans agree with Carter's assessment of a nationwide crisis of confidence but that most of the public is not yet ready to say Carter is a strong leader in the face of energy shortages, continued inflation and national malaise.

868, north of Midland. Related story on Page 2A. (Staff Photo by Ed Todd)

Pact improves monitoring

WASHINGTON (AP) - Defense Secretary Harold Brown said today the SALT II treaty enhances the ability of the United States to monitor the Soviet nuclear attack force. He adds the United States could detect any significant pact violations in time to effectively counter them.

The necessary two-thirds majority of the Senate is unlikely to vote to

Police hunt assailants

After a 39-year-old man was found wounded alongside Interstate 20 east of Midland this morning, Midland County Sheriff's Department deputies today were conducting a search for the man's assailant or assailants.

The victim had been shot in the face with what may have been a .22-caliber weapon, deputies said. He was found still alive about 4: 30 a.m. today, they added.

-The man later died in Midland Memorial Hospital.

He was found about 10 miles east of Midland, according to Chief Deputy George Thompson of the Sheriff's De-

The man, whose name was being withheld early today pending notificiation of next of kin, reportedly was from Marion, N.C.

Deputies Jim Phipps and Benny Fishback arrived at the scene after receiving a call from the Department of Public Safety. The deputies found the man sitting

against his van, officials said. The man was alive when the deputies arrived and he indicated by sign language he had been shot, the deputies reported.

Peace Justice Robert Pine has ordered an autopsy in the case.

United States to effectively monitor Soviet strategic activities and to verify Soviet compliance with the treaty is in any doubt.

"The SALT II agreement does not present a verification problem,' Brown told the Senate Foreign Relations Committee. "On the contrary, it improves our ability to gather strate-

gic intelligence and enhances our national security. Brown said the treaty does this by forbidding interference with U.S. monitoring systems and by barring

Without SALT II we could be faced with concealment, countermeasures, plus all the actions that would be considered 'cheating' under the

impede verification.

agreement," Brown said. He said that to go udetected y American intelligence, Soviet cheating would have to be onso small scale

as to be of no military value "Ay cheating seious enouh to affect te militar balance woud be detetable in sufficient time to take whatever action the situation required," Brown

He said it is more likely the Soviets might attempt to exploit any ambiguities in the treaty text and contended there are far fewer of these than in the SALT I agreement. The United States uses photograph-

ic satelites to make pictures of launch sites, ground-based radar to track intercontinental ballistic missiles in flight, infrared detectors to measure engine heat, electronic listening posts, and, presumably, spies, to monitor the Soviet strategic force.

Brown said critics of the treaty who has been "fatally crippled" by the loss of stations in Iran which were used to monitor Soviet missile tests misunderstand the full extent of U.S. capabilities.

"Their loss reduced, but did not eliminate, our ability to make certain judgments about the tests," Brown

He asserted, as he has before, that the United States will regain much of the lost capacity within a year. But he said it will not be able to replace all of it until 1983 or 1984.

Three Midland men burned in oilfield pumping site fire

SPRABERRY - Three Midland men were burned, one critically, in an apparent flash fire while they were pulling tubing at a oilfield pumping site about 2 p.m. Tuesday on the Walton Ranch about 20 miles southeast of Midland.

Burned were Bill Shepherd, 17, 1300 Cotton Flat Road; William McGuffin, 56, 1004 S. Dallas St., and Jerry

herd, who sustained second- and third-degree burns over 55 percent of

dition this morning in Brooke Army Medical Center's Institute of Surgical Research-Burn Unit at San Antonio. He was flown by air ambulance

from Midland to San Antonio Tuesday afternoon

McGuffin, who suffered second-and third-degree burns, mostly on his face and hands, was listed in satisfactory condition this morning in Midland Memorial Hospital.

Baugh, who suffered first-degree burns on his face, was treated and released at Midland Memorial Hospital, authorities said.

The men were members of a crew pulling old casing from a pumping unit's well when gas from underground blew and erupted, said Midland County Sheriff's Deputy Robert

Defer and another deputy, Lt. John Kleinhans, investigated the fire.

Wallace raps Carter's crisis plan

By LANA CUNNINGHAM Staff Writer

Poor leadership on the part of the president and Congress has placed the United States in an economic crisis, Railroad Commissioner Mack Wallace said in Midland Tuesday. Speaking during a luncheon session of a seminar presented by the Rail-

road Commission in The Midland Hilton, Wallace attacked President Carter's plans announced Sunday during a televised speech. "I'm concerned about my country," the commissioner began, "I'm

concerned about my state.' The country's heavy dependency on foreign crude oil can be traced to a lack of leadership in this country, he said. "We have a shortage of oil and gas today," Wallace said, "but we don't have a shortage of taxes in the U.S. The president said the other night he

can solve it with \$140 billion of your money. A better solution to the energy crisis, according to Wallace, would be to "tell the wildcatters to go back to the field." Other methods, he said, could include repealing the Clean Air Act, the Endangered Species Act and the Environmental Protection Act.

His information on how to solve the problem comes from geologists and others in the business, Wallace said. "I can't retreat to Camp Athens," he said, drawing an analogy between Carter's Camp David and Wallace's home town of Athens, Texas.

If the Clean Air Act had been repealed some time ago, the California

to Midland pipeline would be a reality, bringing crude oil from Alaska. "But (California) Gov. Jerry Brown has preferred to play environ-mental games with the security of this nation," Wallace charged. "He blocked tha pipeline to Midland. Four years and 707 permits after the company (Standard Oil of Ohio) began, they said it had been too

The pipeline was dropped last spring by Sohio. The irony in Carter's Sunday address, Wallace said, is that the president remarked that in the future, if there is a need for pipeline, it will be built. But Carter had mentioned the need for the Sohio pipeline in an crisis)."

earlier speech, and no action came from it, said Wallace.

A Marine Animal Protection Act which applies to the state of Washington could stop a pipeline from Port Angeles, Wash., to Minnesota, Wal-

That line, intended to convey crude oil from Alaska, could save as much as \$2.50 a barrel on oil - * savings which might be passed on to the consumer at the gas pump, Wallace suggested.

Nor does it make sense that the federal government requires "a contraption under the hood of your car that uses 10 to 15 percent more gas during a gas shortage," he said.

'It (catalytic converter) may be okay in Los Angeles or Houston or Washington, D.C.," he said, then paused before adding, "but why would a rancher in Marfa have to use it to go pick up a sack of feed?" If it was not for the situation the country is in today, those rules and

regulations would be humorous, he added Wallace described Carter's proposals for increasing use of other types of energy - involving conversion to coal and solar energy - as "half mea-

"Solar energy will, I understand, heat water, but it can't run a car, a

boat, a plane," he said, Wallace also criticized the Energy Security Board proposed by Carter. He said such a board would require more taxes to operate and will be

essentially function as "the Red Tape-Cutting Board. "We're going to lick this dependence on foreign crude oil," Wallace predicted. "But you may have to smell some coal burning and the air

'We are at war for the economic survival of this nation," he added. "It can't be won with BB guns. It can be won with a drilling rig, with a coal shovel and with intelligent nuclear development with some additional

'But it is not going to be won with an additional board," Wallace said. Ending his talk on a wait-and-see note, he said, "In the next few weeks, the next few months, we'll be able to know if we're making a turn (in the

We're going to lick this dependence on foreign crude oil, but you may have to smell some coal burning and the air won't be as clean." - Mack

Rep. James Mattox, D-Texas, seems to be following the lead of Texas Gov. Bill Clements - each favors a "no coat, no tie" summer. Mattox has received publicity because he refused to wear the "uniform" during a recent House appearance. (AP Laserphoto)

Texan ready to 'sacrifice' his tie

WASHINGTON (AP)-Rep. Jim Mattox, who says he is a practical man and proud of his humble origins, wants to sacrifice coat-and-tie decorum at the altar of the energy short-

The Texas Democrat began the campaign Tuesday by appearing on the House floor without a coat and tie to deliver a speech about how to stay cool despite the new maximum 78-degree thermostat setting.

Mattox ignored requests House Speaker Thomas P. O'Neill made for him to leave.

"The gentleman knows he is embarrassing the chair (O'Neill)," the speaker said. "I don't know if he is

embarrassing himself." Male House members are required

to wear coats and ties. O'Neill asked Mattox three times "to retire from the chamber." Although no one threw the Texan out, he was not able to present his prepared remarks.

'Let us shed our coats and ties, roll up our sleeves and let the American people know we're serious about solving the country's energy problems," the text said.

In a post-encounter interview, Mattox said his mother was a waitress and his father a sheetmetal worker. His first job was on a freight dock. Ties are merely a device to distinguish between classes, he said.

'The whole concept of the coat and tie is an anachronism that should be changed," Mattox, a lawyer and former state representative, said. 'What utilitarian purpose is there for a piece of cloth hanging around your

He had his views on coats and ties read into the congressional record earlier in the summer, but said he decided to take action after hearing President Carter call for each American to examine his own energy usage.

Temperatures on the House floor have been reported to be among the hottest in the Capitol, and Mattox said the other solution mentioned for the discomfort problem was to set up electric fans to circulate the stuffy

The Texan said he would stick to his shirtsleeve position for the immediate future and was not worried about riling O'Neill.

'He's not upset," Mattox insisted. He said the speaker was concerned about the prerogatives of the chair and House traditions. "I understand

that and I don't object to it," Mattox said.

The burly 36-year-old added he would abandon the new shirtsleeve look if he found it obstructing his congressional effectiveness.

"I'm a very practical individual," Mattox said. "I'm not going to allow

Tragedy 'still with me,' Kennedy says

BOSTON (AP) - Sen. Edward M. Kennedy says the tragedy of Chappaquiddick Island is still with him a decade later and will be as long as he

Kennedy, whose personal life has been marked with tragedy, said the accident in which a young woman was killed "was different for me in that I was the one responsible.

"The other tragedies, the assassinations, the deaths of my brother and sister in World War II were imposed on me," he said. "They had enormous impact. But Chappaquiddick made me a much different person, avery different individual.'

In an interview in The Boston Globe today - 10 years after Chappaquiddick — the Massachusetts Democrat said that after the accident he "went through a very considerable period of self-evaluation, re-examination of my own life, my own values, my own purpose and the direction of my life. I wondered whether it would be possible to continue in the area of public service.

"There have been a series of traumatic events that have impacted my life," said Kennedy, the last of the four Kennedy brothers. His eldest died during World War II, an era that also saw the death of a sister in a plane crash. Brothers John and Robert died at the hands of assassins in

"But this tragic accident, which I bore the complete responsibility for and complete accountability for, had greater meaning. It made me re-evaluate my own direction and usefulness as a human being. After a period of time, I made up my mind that there was no turning back in life."

to get out."

When the car driven by Kennedy plunged off a bridge on Chappaquiddick Island on July 18, 1969, drowning secretary and campaign worker Mary Jo Kopechne, 28, it was 10 hours before the senator reported the accident, an action he later called "indefensible.

Asked what that said about his character and ability to withstand stress, Kennedy replied, "At the time

of the accident there was both the physical impact of the car going into the water and the sensation of almost drowning. I was going to drown and then I was at the surface," he recalled.

"The exhaustion surrounding that the sense of loss, the disorientation, the trauma of that incident does not, I think, relate to public policy ques-

Names in the News

MOSCOW (AP) - Foreign Minister Andrei Gromyko's 70th birthday present from Soviet leaders came in the form of a congratulatory telegram praising his 40 years of diplomatic service.

Tass, the Soviet news agency, said Tuesday the message came from the Communist Party Central Committee, the presidium of the Supreme Soviet and the Soviet government's Council of Ministers.

"At all posts of party and state work you devote your energies and experience to boundless devotion to the cause of communist construction and to the great ideals of Marxism-Leninism," the telegram said.

SANTA FE, N.M. (AP) → New Mexico's rancher-governor, Bruce King, says he may start riding his horse to work as part of his personal energy conservation program.

The governor said Tuesday he has set a goal of cutting his energy consumption between 5 percent and 10 percent. "If necessary, I'll bring up one of my saddle horses and ride to work."

He said the thermostat at the governor's mansion in Santa Fe has been turned up to 78 degrees, and said he probably will walk more and use fuel-efficient automobiles for his travels around the state. Earlier this summer King directed state agencies to develop programs for a minimum 10 percent energy savings.

WASHINGTON (AP) - The Federal Election Commission finally has a registered candidate on its rolls named Carter. But the first name is Jack

The president's son registered as a congressional candidate from Georgia's 7th District, papers filed with the commission showed Tuesday. President Carter has yet to announce his 1980 candidacy.

The younger Carter has said he doesn't expect to make a formal announcement regarding his candidacy until December. He said last week he wants to "see what the district thinks of me" before making a final decision. The 7th District has been represented since 1975 by Rep. Larry McDonald, a conservative Democrat.

LOS ANGELES (AP) — Columnist Jimmy Breslin is refusing to talk with investigators about perjury allegations against actor Lee Marvin, says Los Angeles prosecutor John Kildebeck

The perjury investigation was launched after Breslin wrote a column quoting his old friend Marvin as saying that he "learned how to lie" during his property rights court battle with his former lover, Michelle Trial Judg. Arthur Marshall ordered the district attorney's office to

find out whether perjury was committed during the proceedings Last month, Breslin gave the court an affidavit saying he didn't think Marvin's words should be interpreted as a confession to perjury. Since then, Kildebeck said, the New York Daily News columnist has been

"I don't want to be critical of Breslin," said Kildebeck. "Maybe if I was a reporter, I would do the same thing...

Appeals pursued

TALLAHASSEE, Fla. (AP) - Convicted murderer Howard Virgil Lee Douglas is pursuing a string of court appeals, trying to avoid execution in Florida's electric chair, now scheduled for

Douglas lost one appeal hours after Gov. Bob Graham signed a death warrant Tuesday, the fifth death warrant of his administration. Circuit Judge William K. Love of Bartow, who sentenced Douglas, denied a request for a stay of exe-

Most lawyers, however, were confident Douglas would win a stay.

Defense lawyers Larry Spalding and Public Defender Elliott Metcalfe, both of Sarasota, said they would take their case to the state Supreme Court today. They are challenging his death sentence because the trial jury voted 12-0 in 1973 to recommend life imprisonment.

"There are two cases now pending before the Florida Supreme Court, both challenging the constitutionality of permitting a judge to overrule a jury," Spalding said in a telephone interview. "Howard shouldn't be executed until they rule on that point. You've got to go with what you have, and that's our strongest

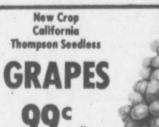

Spalding said if the Florida Supreme Court does not grant a delay, the lawyers would go to the U.S. District Court in

Panel to hear reactor's builders

WASHINGTON (AP) - The company that designed the crippled reactor at Three Mile Island is getting a chance to defend the plant before a presidential commission resuming its investigation into the nuclear accident there.

Representatives of the firm, Babcock & Wilcox, were scheduled to appear today and during two more days of hearings by the 12-member commission of citizens appointed by President Carter.

A variety of witnesses, including Nuclear Regulatory Commission staff members, utility executives, and workers at the Pennsylvania plant told the panel in late May the reactor's design contributed to the severity of the March 28 accident.

Commission Chairman John G. Kemeny, president of Dartmouth College and a computer expert, was openly critical of the layout of the reactor control room and said the instrumentation "seemed to be about 20 years out of date.'

After those hearings, Babcock & Wilcox, designer of eight other nuclear reactors around the country, met with reporters and sought to play down the role of design in the accident, saying it was primarily operator error which brought the accident near a melt-down.

'We don't believe we have blame in the Three Mile Island accident," John McMillan, vice president of the Virginia firm's nuclear power generation ivision, old reporters in Lynchburg, Va., in early June.

The latest round of hearings followed a revamping of the presidential commission's legal staff with a greater investigative roll given to the

panel's lawyers. Last month, after the resignation of the commission's chief counsel, Kemeny conceded to reporters that earlier questioning may have been harmed by the fact that the legal staff was not given enough of a role.

The presidential panel, which was sworn in last April, held its first hearings near the power plant in Pennsylpower until its hearings May 30-June in Washington.

In a related development, a lawyer for General Public Utilities, owner of the Three Mile Island plant, said Tuesday the utility will try to change a decision by the Nuclear Regulatory Commission to hold formal public hearings on the reopening of the Unit 1 reactor, which was undamaged by the March accident at Unit 2.

The commission already has told its ous financial problems.

staff to prepare an order for formal hearings by the Atomic Safety and Licensing Board, although legal advisers have said they easily could last 15 months.

George F. Trowbridge, a lawyer for GPU, told reporters that if formal hearings are held it could be two years before Unit 1 is reopened. GPU spokesmen have said such a delay could threaten the company with seri-

'Laundering' funds 'routine,' NTSU investigator tells panel

ely handle funds between themselves in a method that some would consider "laundering money," says a legislator involved in a probe of North Texas State University.

'Almost every university in the state has a private foundation," said Rep. Lee Jackson, R-Dallas. "Our concern is if it serves the public and if it leads to opportunities for abuses of the kind we've discovered."

Jackson and other members of the House General Investigating Committee turned over audit reports and other documents Tuesday to prosecutors from Denton and Austin.

At issue is whether North Texas State officials and officers of the North Texas State University Educational Foundation Inc. violated state law by depositing checks made out to the college in foundation accounts.

C.C. "Jitter" Nolen resigned as university president April 12 after mounting publicity over alleged misapplication of university funds. Hours after stepping down, Nolen and three other testified at a closed investigating committee hearing. One of the other witnesses, James Reid, recently announced his resignation effective Aug. 1 from his post as founda-

tion executive director. Two state audit report cite numerous instances of university donations being diverted to the foundation. State funds also were used to pay the salary of the foundation executive

Private foundations have been used as "bankers" by state colleges that need more money that the Legislature gives them, Jackson said. The foundations raise funds by contribu-

pursuing the matter. The committee will meet again Aug. 6 and Denton Slack said regardless of what Cobb

and Austin prosecutors decide, the committee probably will suggest legislative remedies and administrative changes at the university.

If criminal violations occurred, the the activity happened, Cobb said.

The committee also agreed to ask Attorney General Mark White to file civil suit if necessary to recover any state funds improperly spent for pri-

Showers sweep Permian Basin

A light but welcome rain fell throughout most of the Permian Basin Tuesday and the weatherman said more of the sweet wet precipitation should leave its mark tonight and possibly Thursday.

No large rainfall amounts nor hail were reported from Tuesday's showers, but a general light rain was reported throughout the area.

The largest rainfall reported in the area was 1.1 inch west of Big Spring in Howard County where cloudy skies prevailed again this morning.

Midland's rainfall late Tuesday afternoon was relatively light in comparison to Big Spring, with the National Weather Service at Midland Regional Airport recording .2 inch.

The Midland Farmers Co-op on the east side of the city recorded .2 inch with reports of similar amounts scattered throughout the city and immediate vicinity.

Firefighters answer several calls

Midland firefighters early today had not determined the cause of a fire Tuesday that resulted in heavy damage to a car in the parking lot at Dellwood Mall, Midkiff Road and Illinois Avenue, officials said.

Three firefighters responded to the fire about 3:30 p.m., officials said. A fire at Woodhill Medical Center, 3000 N. Garfield St., about 5:53 p.m. Tuesday caused heavy damage to the exterior covering of a stairway, officials

The Woodhill blaze probably was caused by sparks from a welder's torch, fire department officials said. A house fire at 1700 Butternut Lane about 2: 29 p.m. Tuesday was confined to

a closet, officials said. The fire caused heavy damage to the closet and smoke damage to the house, firefighters said.

The house is occupied by Grace Hines Preston, officials said.

Mayor schedules news conference

Mayor Ernest Angelo Jr. today scheduled a news conference for 10 a.m. Thursday in the City Hall Council Chambers to discuss the proposed 1979-80 city budget. A conference is held annually to make the public aware of the filing of

the budget, he said. A public hearing will be held Aug. 28 during a City Council session. The resultant budget will become effective Oct. 1, he said.

Several members of the City Council likely will attend the news conference, Angelo added.

Robbery of Odessa store reported

ODESSA - An Odessa food store was robbed at gunpoint Tuesday night; according to Odessa police officials.

A man entered the Foodway Store at 1911 Kermit Highway about 9:55 p.m., went to a cash register attendant, produced a small caliber gun and demanded money, witnesses told police.

The man then left in a vehicle, taking an undisclosed amount of money, police were told.

The Permian Basin Petroleum Museum on the southern edge of Midland reported only a trace of rain while a farmer at Warfield said .3 inch fell there late Tuesday afternoon. Greenwood reported a sprinkle, but not enough to measure.

In the area, Andrews, Lamesa, Big Lake and Crane also received light showers Tuesday. Stanton received .30 inch this morning. Rankin reported a light shower Tuesday and the rain was continuing there this morn-

Garden City received misting rain Tuesday and it was continuing early Odessa reported a good rain Tues-

day, but a measurement was unavailable. points in the Permian Basin

reported cloudy skies again this morning. Midland's rainfall Tuesday boosted the total for this month to 1.73 inches

and the total so far this year to 8.71. High Tuesday just before the rain fell was 92 degrees at 6 p.m. But the brisk winds and light rain dropped the temperature to 77 degrees at 7 p.m.

and to 72 at 8 p.m. The cool relief from the summer heat should continue for a couple of days, the weatherman said. The National Weather Service office is predicting a 40 percent probability of more rain tonight and 20 percent on

According to the weatherman, the rain should come in the form of afternoon and nighttime thunderstorms. With that moisture should come somewhat cooler temperatures.

Tonight's low is predicted to drop into the middle 60s. High Thursday should be in the upper 80s. Winds should be easterly to north-

easterly at five to 15 mph. Tuesday's high temperature was 95 degrees, but that fell far short of the record 103 degrees set on July 17 last year. The low this morning was 70 degrees. Record low for a July 18 here is 62 degrees set in 1955.

Midkiff man dies in collision

A 17-year-old Midkiff man died shortly after noon Tuesday when the car he was driving and a tractor-trailer collided at the intersection of Midkiff Road and FM 868, north of Midland.

Killed was Joel Scott Russom, who was pronounced dead at the scene by Peace Justice Robert Pine. Midland police said time of the mishap was approximately 12:35 p.m. Russom died as a result of internal

and head injuries, officials said. Driver of the truck, Jerry Don Watson, 30, of Lubbock, was treated for shoulder injuries at Midland Memorial Hospital and was released.

The Russom vehicle was northbound on Midkiff Road and Watson's truck was westbound on FM 868 when the collision occurred, police said. The car and the truck ended up in a

barrow ditch just northwest of the intersection. According to Midland firemen, they used their "jaws of life" rescue tool to pry open the door and free Russom's body after a wrecker pulled the

crushed car away from the truck tractor. The tractor was pulling a lightly loaded flatbed trailer, officials said.

their beneficiaries, he added.

Chrysler hoping for break as new contract talks open

DETROIT (AP) — Chrysler Corp. is hoping for a break from the United Auto Workers as it enters negotiations for a new contract with 15,000 employees laid off and a 15-month loss of a quarter billion dollars.

GM opened bargaining with the union on Monday, Ford followed Tuesday and Chrysler was to begin

GM and Ford reported first-quarter profit records. Chrysler lost \$54 million to bring total losses to \$258 million in 15 months. Analysts expect a sizable second-quarter loss to be reported next week, and company executives have said they do not expect better times until 1981. Of Chrysler's 124,000 UAW employees in the United States and Canada, 15,000 are on indefinite layoff due to production cutbacks caused by slow sales. Unlike the other companies,

Chrysler works under a single con-

tract covering both countries. Chrysler has said it will close its Hamtramck assembly plant near Detroit at the end of the 1980 model run. The shift of Hamtramck cars to other plants will cost 2,200 jobs.

There has been no hint from the union that it would give Chrysler a break. But American Motors Corp. has won concessions from the union in

Many Los Angeles County workers returning to jobs

LOS ANGELES (AP) - County workers, satisfied their message of discontent has gotten through after rotating sickouts and overwhelming strike authorization votes, have started returning to their jobs. Officials of the two largest employ-

ee unions, locals 660 and 434 of the Service Employees International Union, said at a noon rally in Torrance on Tuesday that strike deadlines would not be announced as long as talks appeared to be progressing. Meanwhile, the Riverside City

Council has voted to reject a "bottom line" contract demand by striking municipal workers. The union made the demand, which it did not disclose, late Monday. The strike - the first ever by public employees in this conservative inland

community - has left garbage uncollected in residents' yards, halted the processing of utility and other bills, curtailed summer recreational programs and virtually halted maintenance of public lawns and gardens. Talks in Los Angeles County with unions representing many of the

county's 70,000 employees, were described as "very productive" by the county's assistantapersonnel chief; Herb Kaplan.

"I think the progress is being re-쌍

flected in the lower level of such activities as sickouts," Kaplan said. About 50 X-ray technicians at the seven county-run hospitals called in sick Tuesday, compared to the nearly

1,300 health workers who stayed out

Monday. For the past two weeks, services at county departments and medical facilities have been hampered by rotating sickouts which shift from one group of county employess to another.

SWEETWATER — Annie Margaret Lewis, 78, of Sweetwater, mother of Weldon Lewis of Big Spring, died Tuesday in a Sweetwater hospital-

Services will be at 10 a.m. Thursday in the Lamar Street Baptist Church with the Rev. Orval Brantley, pastor, and the Rev. Buddy Sipe officiating. Burial will be in Sweetwater Cemetery directed by McCoy Funeral Home ..

Mrs. Lewis was born Sept. 14, 1901, in Louisiana. She was married to M.C. Lewis Nov. 14, 1917, in Plano. Her husband preceded her in death.

Other survivors include five daughters, three sons, a brother, a sister, 27 grandchildren and 23 great-grand-

Gracie Cook

Services for Gracie Cook, 1705 N. Garfield St., were to be at 2 p.m. today in Newnie W. Ellis Funeral Home Chapel with the Rev. Royce Womack of St. Luke's United Methodist Church officiating.

Burial was to be in Resthaven Memorial Park.

Mrs. Cook died Monday. She was born in Burlington, Iowa and spent her early life in Iowa. She was married to Phineas K. Cook in Keokuk, Iowa. They moved to southwestern Montana in 1912 and lived there until moving to Midland in 1963. Cook died in 1965.

Mrs. Cook was a member of the Wesley Ann Sunday School Class at St. Luke's United Methodist Church.

Survivors include a son, Byron M. Cook of Midland; a daughter, Helen Brashear of Midland; a sister, Mrs. E.G. Woolenweber of Los Angeles, Calif., and a grandchild.

Pallbearers were to be Harold Huffman, Nugent Brasher, C.W. 'Dub" Wallis, Julian Clausen, Gayle Crawford and Tom Welch.

J.B. Johnson

GRANBURY - J.B. "Bill" Johnson, 70, a former resident of the Midkiff community near Midland, died Tuesday in a Granbury hospital.

Services will be at 10 a.m. Thursday in the Martin Funeral Home Chapel of Granbury, with burial to follow in Restlawn Cemetery at Sulphur Springs.

Johnson was employed as a machinist for El Paso Natural Gas Co., before his retirement, and resided at Midkiff for a number of years before moving to Granbury in 1971.

Surviving are his wife; three daughters, Diana Armstrong of Seminole, Okla., Mary L. Harmond of Grand Prairie and Paula Johnson of Abilene; two brothers, a sister and five grandchildren.

The family has requested that memorials be directed to the Heart

R.L. Davis

R.L. Davis, 73, 4605 Ric St., died Monday in a Midland hospital. Services were to be at 10 a.m. today in St. Ann's Catholic Church with

Father Cliff Blackburn officiating. Burial was to be in Resthaven Memorial Park.

Rosary was to be said at 7:30 p.m. today in the Newnie W. Ellis Funeral Home chapel.

Davis was born Nov. 1, 1905, in Maude, Okla. He moved to Crowell as a child with his family and attended schools there. Later, he attended business school in Wichita Falls, where he worked for Continental Oil Co. for six years.

He worked for Wichita Falls Foundry and Machine Shop from 1937 until he retired in 1971. He moved to Midland in 1974.

Davis was married to Agnes Marie Mataska in Wichita Falls July 9, 1929. They celebrated their golden wedding anniversary July 7 in St. Ann's Catholic Church, where he was a member.

Survivors include his wife; a son, J.C. "Jim" Davis of Midland; a daughter, Diane Diaz of Midland; a brother, Ralph D. Davis of Lubbock; two sisters, Geneva Phariss of Lubbock and Jewel Bradford of Vernon, eight grandchildren and two greatgrandchildren.

Pallbearers were to be J.C. Davis Jr., John L. Davis and Alfred Fhurman, all of Midland, and Dick Reilly of McAllen, Ralph Sisk of Wichita Falls and Bob Bradford of Ada,

R.C. Carrol

O'DONNELL - Services for R.C. 'Bob" Carroll, 86, of O'Donnell, father of Joe Carroll of Lamesa, were to be at 2 p.m. today in the First Baptist Church with the Rev. Harry Kennedy, pastor, officiating.

Burial was to be in O'Donnell Cemetery directed by White Funeral

Carroll died Tuesday in a Lamesa nursing home after a lengthy illness. He was a native of Seymour and had attended school in Bomarton Carroll was married to Mary Ethel Arnold Jan. 10, 1917, in Bomarton. They moved to Lynn County in 1919 where Carroll farmed.

He was a Methodist, a Mason and a former city councilman. Other survivors include his wife, three sons, five grandchildren and

H.G. Smith

four great-grandchildren.

PLAINS - Services for H.G. Smith. 57, of Plains and formerly of Stanton, were to be at 10 a.m today in the First Baptist Church here with the Rev. Glenn Harlon officiating, assisted by the Rev. Tommy Wilson. Burial was to be in Plains Cemetery directed by Brownfield Funeral Home. Smith died Saturday in a Lubbock

hospital following a brief illness. He was raised in Stanton and the Courtney community and moved to Plains in 1954. He was a farmer and a

He was married to Barbara Schobert in Texas City.

Survivors include his wife; two daughters, Sharon Smith and Cathy Wilkins, both of Plains; his parents, Mr. and Mrs. Garrett Smith of Midland; a brother, Billy J. Smith of Denver City, a sister, Patsy Stewart of Midland, and four grandsons.

L.I. Dean Jr.

KINGSLAND - Services for L.I. Dean Jr., 63, of Kingsland, father of Johny Mac Dean of Midland and brother of Eva Gibson of Lamesa. were to be at 2 p.m. today in Waldrope Funeral Home in Kingsland. Burial was to be in Lakeland Hills Memorial Park near here.

He died Monday in a Kerrville hospital.

Dean was born April 4, 1916, in Anson. He was married to Mary McCauley Oct. 18, 1935, in Big Spring. He was a retired office photogra-

Questions surround departure of Tanzanian head

MONROVIA, Liberia (AP) — President Julius Nyerere of Tanzania flew home early today following a clash at the opening session of an African summit with Sudan's President Gaafar Nimeiri over the Tanzanian invasion of Uganda.

A Tanzanian delegation spokesman claimed Nyerere's departure only 12 hours after the summit opened was previously planned and had no connection with his polite but sharp exchange with Nimeiri in the conference

The spokesman said Nyerere had to return to Tanzania to prepare for a state visit by Britain's Queen Elizabeth II for the Commonwealth confer-

Liberia's President William R. Tolbert, Jr., host and chairman of the meeting of the Organization of African Unity, tried in vain to persuade Nyerere to remain at least another day at the three-day summit. A Liberian spokesman said Tolbert hoped Nyerere might have smoothed over his conflict with Nimeiri, the outgoing OAU chairman.

Tolbert already was disappointed by the turnout at the summit. Only 20 of the 49 full-ranking members sent their chiefs of state, and Nyerere's departure left 19. Tolbert had hoped for a turnout of about 40.

Nyerere had announced his plans well in advance, but some Liberian officials believed his short stay was deliberate because he had known, from public statements by Nimeiri, that the conflict would emerge.

Before leaving Monrovia, Nyerere circulated to the chiefs of state a 17-page printed statement outlining Tanzania's case against former Ugandan President Idi Amin and the Ugandan attempt to annex the Kagera salient, a 700-square mile area of Tanzania.

The statement described Amin as "an abominable murderer of the people of Uganda, a turbulent menace to the peace and security of East Africa; a standing scandal and disgrace to the honor of Africa, a blatant and bragging aggressor against Tanza-

"We are not sorry to be rid of him," the report concluded, in apparent rejection of Nimeiri's charges.

Nimeiri startled the formal opening session of the summit Tuesday with a detailed account of his vain efforts to mediate between Nyerere and Amin, and his opposition to the Tanzanian invasion of Uganda, as a matter of principle, and not in support of The public sessions opening the AU summit are traditionally devoted to non-controversial---speechmaking. Without once naming Nyerere, who listened impassively among the 2,000 delegates, Nimeiri said Tanzania was not interested in mediation of the dispute but only in an OAU condemnation of Amin.

Nimeiri said that as OAU chairman he had no mandate to issue such a condemnation which, in any event, would have doomed his mediation attempts. He told the summit that the Tanzanian invasion of Uganda and Amin's ouster "violated the principle

of non-interference" and created a dangerous precedent for all of AfriFo

□ REEVES PRODUCER

Gulf No. 3 S. E. Lingon-State has been completed as the sixth Devonian well in the Worsham-Bayer multipay pool of Reeves County, 11 miles northwest of Coyanosa.

It completed for a calculated absolute open flow potential of 4,600,000 cubic feet of gas per day, from open hole at 13,000-13,436 feet after 33,264 gallons of acid.

The well is 5/8 mile south of other Devonian production and 990 feet from northeast and southeast lines of section 16, block 7, H&GN survey.

WINKLER RE-ENTRY

The Superior Oil Co. will re-enter a former Silurian oil well in the Wheeler multipay field of Winkler county and attempt to complete it as the fourth Devonian oil well in the pool. Tests will be made above 8,555

It is 18 miles northeast of Kermit and 660 feet from south and 330 feet from est lines of section 10, block 46, T-1-S, T&P survey.

The project is No.2 R. A. Wheeler.

WARD WELL

Clayton Williams Jr. of Midland No. 1 Barbara M. Williams has been completed as a one and one-quarter mile southwest extension to the Scott (Delaware oil) pool in Ward County. The well, three miles southeast of

Barstow, finaled for a 24-hour flowing potential of 72 barrels of 38-gravity oil, plus 192 barrels of water, through a 15/64-inch choke.

The completion was through perforations from 4,906 to 4,928 feet after 1,000 gallons of acid and 10,000 gallons of fracture solution. The gas-oil ratio s is 7,042-1.

Location is 8,580 feet from northeast and 660 from northwest lines of

section 35, block 33, H&TC survey. Total depth is 6,500 feet and 5.5-inch casing is set on bottom. The plugged

back depth is 5,695 feet.

TIPRO head raps Carter energy plan

HOUSTON (AP) - President Carter's energy programs will "freeze and reduce" domestic oil and gas production and cause longer lines at the gasoline pumps, an oil industry spokesman maintains.

"The best way to cure the shortage is to be certain that oil and gas is the most profitable investment anywhere," D.K. Davis, vice president of the Texas Independent Producers and Royalty Owners Association, told the Men's Club of Houston Tuesday.

But Carter's plan is based on "the fallacious premise that we're out of oil or gas in this country," he said.

"Under the Carter plan being debated, only \$8 million would go to the producers for exploration and \$40 billion of tax proceeds would go to the government," he said. The country's energy now consists of 53 percent oil, 21 percent natural

gas and 19 percent coal, Davis said, while all others - including hydroelectric, nuclear and geothermal power-make up just seven per-The Department of Energy's budget for 1980 sets aside \$3.6 billion for

alternate energy research projects, he said, with \$130 million to be spent on photovoltaic devices, which produce electricity from sunlight. The DOE's goal is to produce solar electricity at a cost of \$2 per kilowatt hour by the mid-1980s, he added.

But he scoffed at the cost effectiveness of these devices and other proposed energy alternatives.

"If your Houston electric bill is \$100 a month, photovoltaic electricity at its cheapest can be delivered to you for only \$6,670 a month — that's on a sunny day, of course," Davis said.

"The energy savings for a solar-heated school the DOE funded in Virginia two years ago will pay out the installation cost in 645 years," he Davis said the proposed production of alcohol from agricultural products is a "classic example of American ingenuity." About 30,000

gallons of ethanol a day is now being produced for \$1.22 to \$1.80 a gallon, "If we could increase the capacity by 120 times, enough could be pro-

duced by 1990 to put one-tenth of one percent of alcohol in the country's gasoline supply," Davis said. "Agricultural people say we can't grow enough crops to make even that much alcohol. "The making of alcohol for fuel will increase U.S. oil imports," he continued. "So take some of the publicity about agricultural alcohol

solving all our problems with a grain of salt." He said a demonstration windmill to generate 50 kilowatts in California cost taxpayers \$1.7 million, or \$28,330 per kilowatt.

'That's 30 times the cost of a nuclear plant," he said. Only 2 percent of the nation's potential oil and gas production has been

"The bureaucrats are determined that we should walk away from the potential of the other 98 percent," he said.

Senator is impressed

NEW ORLEANS (AP) - Sen. Max Baucus says he's impressed with the investment required to get oil out of the Gulf of Mexico.

The Montana Democrat was one of six senators flown out to the exotic world of offshore oil Monday by oil companies eager to hold off a tough windfall profits tax.

"We wanted to show the senators that it cost a lot of money to produce this energy," said Sen. Russell Long, Long was accompanied by five

members of his Senate Finance Committee - Baucus, William Bradley, D-N.J., David Pryor, D-Ark., David Boren, D-Okla,, and Malcolm Wallop,

The committee is pondering the windfall profits tax passed by the

That version is too stiff, Baucus

said after his tour. "We've got to give producers a break," he said.

While they were out in the gulf, being ferried about in six helicopters, President Carter said the nation must invest \$140 billion over the next 10 years to become self-sufficient in energy - and the money must come from the windfall profits tax.

"There will be a tax but I hope it will not be as severe as the bill passed by the House," said Sen. Long.

As the prime example of how much it costs to operate offshore, the senators were deposited on Cognac, the world's tallest platform, which Shell Oil Co. says cost about \$800 million to

Cognac stands on steel legs in water 1,027 feet deep in the Gulf of Mexico near the mouth of the Misisissippi River, 88 miles south of New Orleans. Fifteen companies joined in the venture, with Shell as the operator.

Flowing oil discoveries final in WT counties

Forest Oil Corp. has opened a Pennsylvanian oil pool in Dawson County, 11 miles southeast of Lamesa, and Union Texas Petroleum, a division of Allied Chemical Corp., and Houston Oil & Minerals Western Division, both operating from Midland, have potentialed a Silurian oil strike in Terry County. Both are flowing

Forest Oil staked location for a 10,700-foot wildcat one location southwest of its discovery.

Forest completed No. 1 Lloyd Cline Farms as the Pennsylvanian strike. It made 236 barrels of oil per day, plus .4 percent basic sediment and water, through a 10/64-inch choke. The gasoil ratio is 381-1, and gravity of the oil is 37.3 degrees. Tubing pressure ranged from 325 to 230 pounds.

Completion was through perforations from 8,570 to 8,573 feet after a 500-gallon mud-acid wash.

Total depth is 10,630 feet and 5.5inch casing is set at 8,724 feet. The Pennsylvanian was topped at

8,525 feet on kelly bushing elevation of 2,945 feet. Wellsite is 1,462 feet from north and

467 feet from east lines of section 25, block 34, T-5-N, T&P survey It is one and five-eighths miles

north of the Spraberry, Deep (lower Spragerry) field and three miles west of the Jo-Mill (Fusselman and Spraberry) area. The new Forest wildcat is No. 1

Grissom, 2,382 feet from north and 1,222 feet from east lines of section 25, block 34, T-5-N, T&P survey and 11 miles southeast of Lamesa. Union Texas and Houston Oil &

Minerals No. 1 Sara Bullard is the Terry County Silurian discovery, two miles north of Seagraves. The strike finaled for a 24-hour

flowing potential of 476 barrels of 36-gravity oil and 25 barrels of load water, with a tubing pressure of 550 The flow was gauged through a

14/64-inch choke and was from pay behind casing perforations from 13,-330 to 13,342 feet, after a 3,000-gallon acid treatment. The gas-oil ratio is The total depth is 13,641 feet and

5.5-inch casing is set at 13,620 feet. The plugged back depth is 13,480

Operator called the top of the Silurian at 13,330 feet on ground elevation of 3,355 feet. Other tops include the Wolfcamp at 10,156 feet, the Atoka at 11,933 feet and the Fusselman at

The discovery is 1,320 feet from south and 2,200 feet from east lines of section 81, block DD, John Gibson survey. The closest related production is six miles to the west in the

lease block on the prospect.

NOLAN DISCOVERY

Fisher-Webb, Inc., of Abilene No. 3 McLaughlin has been completed as a Canyon oil discovery in the JMM (upper Canyon oil and Canyon gas)field of Nolan County, 15 miles southwest of Maryneal.

The strike finaled for a daily flowing potential of 80 barrels of 44-gravity oil, no water, through a 12/64-inch choke and perforations from 5,796 to 5,804 feet and from 5,882 to 5,889 feet. The pay was fractured with 30,000 gallons, and the gas-oil ratio is 5,000-

The Canyon was topped at 5,690 feet on ground elevation of 2,361 feet. Total depth is 6,049 feet and 4.5-inch pipe is set at 6,001 feet.

The well is 2,130 feet fom south and 1,905 feet from west lines of section 9, block 1-A, H&TC survey and one location northeast of upper Canyon oil

Seagraves field. Union Texas is the operator. The companies jointly control a 1,960-acre

restoring land that has been mined.

Acting Director J. Randel Hill of the commission's Surface Mining and Reclamation Division said the 844page plan "will ultimately cut lots of red tape" for miners and the commis-

was the first such state plan submitted to the federal agency.

Investigation clears crude firms of creating shortage

WASHINGTON (AP) - A joint investigation by the Energy and Justice departments has found no evidence of any deliberate actions by oil companies to create the current gasoline shortage, an informed administration official says.

But the source, who asked not to be

ENERGY OIL & GAS

identified, said the investigation's final report may question the judgment of the companies, suggesting they have been overcautious in trying to make their oil supplies last

The joint investigation, cited by President Carter in a speech Monday in Kansas City, Mo., has been underway for several months and is near

85 Texas striks logged

AUSTIN, Texas (AP) - Texas operators reported 24 oil discoveries and 61 gas discoveries during the first half of July, the Railroad Commission said Tuesday.

The commission said through July 15 operators have reported 247 oil discoveries, an increase of four from the same period last year. There have been 70 discoveries, 127 more than in the first six months of last year.

The new oil discoveries included six in the Refugio area, five in North Texas, four in South Texas, three in the Lubbock area, two each in Southeast and West Central Texas and one each in East Texas and the San Anto-

The new gas discoveries included 26 in South Texas, 12 each in the Refugio area Southeast Texas, four near San Antonio, two each in East Central and West Central Texas and one each in North Texas, East Texas and the

Operators reported 164 dry holes in the July 1-15 period.

AUSTIN, Texas (AP) - August nominations for the purchase of Texas crude oil total 2,728,735 barrels a day, a decrease of 7,494 barrels a day from June, the Railroad Commission reported Tuesday.

The commission meets Thursday to set the statewide oil allowable for

AUSTIN, Texas (AP) - The Railroad Commission announced Tuesday it has approved the application of Texas Utilities Generating Co. to increase by 68.2 acres its Big Brown mining and power generating operation in Freestone County.

The Dallas firm's Big Brown operation is five miles northeast of Fairfield and five miles east of Interstate

AUSTIN, Texas (AP) - The Railroad Commission said Tuesday it has submitted to the federal Office of Surface Mining a Texas program for regulating strip mining for coal and

"Approval of the state program will allow Texas, through the Railroad Commission, to maintain primacy in the regulation of surface coal mining and reclamation in Texas," said legal examiner Chesley Blevins. Hill said he thought the Texas plan

completion, administration sources

Several drafts of its findings have been written and shunted back and forth for review by investigators in both departments and a final version may be sent to the White House within the next few days, these sources

said Carter said in his speech the Justice and Energy departments were assigned to find out whether the current gasoline shortage, which created long lines at gas stations in many areas, involved any "improper activity."

An administration official familiar with the investigation told The Associated Press the two departments had found no evidence so far of "massive hoarding or conscious manipulation by major refiners at a critical time of

The official said the main emphasis of the investigation report probably would focus on "judgmental fac-

These may include questions of whether the companies were too "conservative" in stockpiling oil and petroleum products for the future, in setting production rates for refineries and in determining the allocation fractions that regulate the flow of gasoline to customers.

Such criticism was leveled by Energy Secretary James R. Schlesinger early in June when he said refiners were being "unduly conservative" about operating refineries and using crude oil stocks.

Schlesinger had noticed that refineries had been operating at as little as 83 percent of their capacity, compared with normal operations of a point or two over 90 percent.

In a statement issued last Thurs-

day, Schlesinger said refiners have

recently increased their operations to

90 percent of capacity "at our urg-

ing," tapping their stockpiles for

perhaps into April. With new supplies thus reduced, refiners tapped their stocks of crude oil in January and February, drawing

Oil industry executives have said

them down below the levels estimated by the Energy Department as the "minimum acceptable" stockpiles. Most of those stocks do not sit idle in storage tanks, but are in pipelines, trucks, barges, refineries and other

parts of the system. The Energy De-

partment and the industry agree the stocks cannot be reduced below some

minimum level without causing disruptions of the refining system. Statistics show that in March the industry rebuilt its stocks above the minimum level by adding some 761,-

000 barrels of oil per day to the crude oil stockpile. And since then it has kept the crude stocks above the minimum, approaching in May the normal range of stocks for that period.

Thus, by its own standards and statistics, the administration seems unlikely to accuse the oil industry of stockpiling extravagant amounts of oil while gasoline pumps were al-

lowed to run dry. Its criticism, telegraphed earlier by Schlesinger, may take the form of suggesting that the industry could have eased the gasoline shortage somewhat by running more oil through refineries while letting the oil stocks skate closer to the edge of the "minimum acceptable level."

\$1.30 gas forecast

WASHINGTON (AP) - The Library of Congress estimated Tuesday that President Carter's effort to limit oil imports will have no effect until 1982, when it will help push the price of gasoline above \$1.30 a gallon.

The price of home heating oil would average about 95 cents a gallon, according to the study released by the House Ways and Means trade subcommittee. Library analyst Lawrence Kumins based

his predictions on assumptions that U.S. demand for foreign oil will rise above Carter's limit of about 8.5 millions barrels a day, resulting in a shortage, and that federal price controls on oil will expire as scheduled

His admittedly rough

WANT ADS

in late 1981.

estimates also assume that the price of crude oil will average \$27 a barrel in 1982, which is within the range of predictions by some government and private economists. "If our predictions are

accurate, an 8.5-millionbarrel-a-day quota will not begin to impinge upon demand until sometime during 1982,' Kumins wrote. "By 1983 the shortfall stemming from the quota will be significant and will likely be over 1 million barrels

Economic situation in U.S. raises tourism prospects for Canada

OTTAWA (AP) — The premium on U.S. dollars in Canada and the available supplies of gas generally has raised prospects for more tourist visits by Americans this year, a Canadian Press survey of tourist officials

The feeling is that this combination of circumstances should lure Americans here and deter Canadians from leaving home for a U.S. vacation.

But if the gas is so scarce in the United States that Americans can't make it to the border, then the tourist, business here could be in trouble, the officials said. Most tourists to Canada are Americans and about 80 percent of them come by car.

Tom Fletcher, assistant deputy minister in the federal tourism of fice, says the forecast for the 1979 season is generally promising. But the industry may suffer, he says, if Americans succumb to the fear of being stranded short of their destination, and therefore stay home.

For similar reasons, Canadians should be more inclined to vacation at home and Canada's travel deficit with the United States should be smaller than the record \$1.7 billion in 1978, he adds.

Fletcher says the American Auto Association is telling Americans that this is the year to visit Canada, especially if they can get to the border on one tank of gas. There is plenty of gasoline and no prospects of shortages and the Canadian dollar is now worth about 86 U.S. cents, meaning almost everything is cheaper.

Much of the U.S. road traffic comes from New York, Ohio and Michigan but the deputy minister admits that it's difficult to prediet how travellers from farther away might_

Fletcher says tourists also are beginning to react to the 15 percent drop in the value of the Canadian

The low Canadian dollar should encourage more Canadians to vacation at home, while attractive exchange rates draw more tourists from countries such as Japan and West Germany which have strong currencies. and find the Canadian dollar a

The number of Canadians travelling outside Canada increased steadily to 39.6 million in 1977 from 31.5 million in 1974. But a new trend apparently is emerging.

In 1978, Canadian visits to the United States fell to 39.1 million, and during the first four months of 1979, decreased by 5.8 percent from the same period in 1978.

Stock market loses

NEW YORK (AP) - Worries that President Carter's \$140 billion energy program might aggravate inflation and continuing concerns over the effects of a recession sent stock prices lower Tuesday.

Losses were widespread among all sectors as losing issues swamped gainers by a margin of more than 5-to-2.

Institutional investors, who largely sat out Monday's trading when the market mnaged a wak rally after four declining sessions, were far more active in selling Tuesday, traers said. The Dow ones averge of 30

indutrial stoks, which wasdown by 8 points late n the sesion, closed of 6.40 at828.50. Volume on the New York

Stock Exchange was 34.27 million shares, up strongly from 26.62 million the previous session.

IBM fell 11% to 69% as the most actively traded issue as of the 4 p.m. close of the NYSE. Trading included a 100,000-share block at 701/8.

Gambling and casino issues were generally lower. Caesars World fell 2% to 25 in active tradinx. Bally tumbled 3¼ to 39%. Del Webb lost ½ to 15% and Ramada Inn fell 1/2 to 101/2 in less active trading.

Oil issues were mostly lower but Getty bucked the trend with a gain of 1/8 to

55½. The NYSE composite index fell .55 to 57.88. Standard & Poor's 400 industrial index fell 1.08 to 112.50. S&P's 500-composite lost .91 to 101.83.

The Amex market value index fell 1.72 to 195.46. The NAS-DAQ composite of over-the-counter trading declined 1.03 to 137.86.

BUSINESS MIRR OR

Carter's energy proposals leave investors cold

By JOHN CUNNIFF **AP Busines s Analyst**

NEW YORK (AP) — The dollar's value slid on world markets, while prices of gold rose. Stock market averages barely n loved. Economists left short-range forecasts unchainged.

Except for increases in shaires of certain companies that might benefit im mediately, investors weren't exited by President C'arter's energy proposals. Nothing that wasn't anticipated, they said in

The most pronounced changes, in bonds and commodity prices, were generally negative. Bond prices fell; traders feared the program was inflationary. Commodity traders felt the same way; they bid up

In all, initial reactions from investment markets provided very little support for the Carter energy program, a program seemingly designed not only to resolve the energy crisis but to save his presidency as well.

First reactions, however, might not be the final judgment, especially since the program was so com plex, and vague in some areas, that assessments might take several days, and perhaps weeks or months.

But an analysis of first-day results, plus inter-

views, shows clearly that: - In vestors weren't charged with confidence by the speech, despite the long buildup and the suggestions during the week that it would be hard-hitting, the president's most important address, a "turning

 Many apparently feel the proposals would pre-vent a ballanced budget, might add to or prolong the life of existing inflation, and could involve the federal government more deeply in business decisions.

-Some feeling exists that the president's acknowledged problems of leadership might make it difficult for him to enact any package of long-range energy proposals.

- Comments were made that the program does little to change immedate conditions. While solutions to short-range problems weren't really expected, their scarcity removed a potential jolt to markets. To business people, the Sunday night address and

two subsequent speeches on Monday, contained a disturbing contradiction in that Washington was berated for limitations and looked to for solutions. The main area of vagueness seems to be how the Energy Security Corp., for which Carter budgeted \$88 billion of the total \$146 billion to be spent over a

decade, will operate. As conceived by the administration, the corporation will be spon sored by the federal government but will involve the government no more than government is involved in most other independent corpor-

What puzzles many business people and others is the mandate it would be given: to invest in other companies, such as shale oil producers, or to develop programs on its own. The range leaves a void of

If the Energy Security Corp. decides to go into production directly, instead of through nongovernmental corporations, it conceivably could be a competitor rather than a n ally of private enterprise.

Extremely important also, but not about to be answered for some titne, is the question of who would be named chairman, and who, besides the three cabinet secretaries would sit on its seven-member

The matter of leader ship is important in assessing the direction and impact of the corporation. As real estate people assess property on the basis of location, corporate analysts analyze companies on management. Without answers to important questions, without further analysis of other parts of the program, and

with doubts about the president's ability to convice Congress, judgements night be slow to evolve. Monday's weak response to what the president apparently thought of as a tough, decisive and

country-shaking speech, might therefore not be the eventual decision of investors. But there's no doubt that on Monday a lot of them

decided to hold off and see how things evolved.

Mystery of Capitol bust remains unsolved

WASHINGTON (AP) - The face on the bust in the Capitol is that of a man in his 40s or 50s. He wears a high, clerical-type collar, has a large nose and a serious expression.

But the most important things about him for 66 years have been: Who is he? What part in U.S. history did he play? "We're still trying to identify it," said Florian

Thayn, referring to the myster; bust that sits atop filing cabinets in Room HB2'8, where she and reference assistants work. From time to time, art experts and historians drop by to gaze at the figure who's been guessed as Abner Doubleday, Hans Christian Andersen, Father Marquette, Thomas Jefferson and sormeone named Boni-

facio. But the experts are stumped. The quandary began in August 1913, when a worker stumbled across Mr. Anony mous in a room under the Capitol's crypt. Today, 66 years later, he waits in HB28 unidentified. with nothing to honor him for any achievements or claim to fame.

The inystery man is distinguished-looking, even handsorne. With updating indress and hair-style, he'd appear to be a natural for one of those television tales about Washington politics.

There is no sure explanation of the cross on his

One false alarm came in the late 1950s. An unidentified congressman rushed in, studied the bust briefly and said, no, it was not Bonifacio. Bonifacio was a Brazilian statesman, but no body remembered Congress ever ordering a bust of him. The most popular guess has been Christopher

Columbus whose sculpted images are all over town. But dampen ing that theory are the clerical garb and sideburns. H'eavy sideburns weren't all that stylish in Columbus 'day. "It isn't Columbus," says Ms. Thayn.

A Washington woman wrote the Capitol's art curator that the bust was a dead ringer for John J. McRae, a repr esentative from Mississippi before the Civil War. She 'd been reading a book called "Harper's History of the Great Rebellion," with sketches. Another writer was sure the work was a copy of a statue of Father Marquette, erected in 1908 on Mackinac Island, Mich. Problem is, the bust looks nothing

like another sta tue of the priest-explorer that adorns the Capitol's Statuary Hall. In that work, Marquette is dressed entirely differently and boasts whiskers and flowing mous-

tache. Nobody really k nowse But the detective work goes on, although no identity crisis is involved after the bust's threescore y ears in the Office of the Architect of the Capitol.

"We're not giving up," said Ms. Thayn,

Quad Squad effective parking law enforcers

CAPITOLA, Calif. (AP) - Drivers in this tiny beach town near Santa Cruz selciom fight back when their cars are ticketed by members of "The Capitola Electric Cavalry.'

"It's hard work to quarrel with a man in a wheelchair," said Police

Allen says the hiring of six disabler I men - paraplegics, quadriplegics and an amputee - who patrol their b eats in wheelchairs has "effectively taken 'the sting out of getting a park ing ticket."

Wearing red windbreakers and c arrying two-way radios, the six roll about town in electric and manually operated wheelchairs. They give tickets or man strategic corners to give visitors directions Residents of the beach community of 9,500, which attracts an equal

number of visitors daily during the summer and on holidays, have affectionately dubbed the group the "Quad Squad." One member — a victim of polio in his youth who admits he once "chewed out" a meter maid -- said he is "surprised how friendly

everyone is." "I've never seen anyone even come close to giving me a hard time,"

Allen founded the group two weeks ago after deciding that a single full-time salary for a "code enforcement" employee could be better used

as pay for several part-time pe ople during the summer season. We put the word out to d'afferent agencles that we'd consider the disabled for code enforcement and we got applications from everywhere," said Sgt. Joe Granatii, the squad's supervisor. Each man works 15 to 20 hours per week, with heavier patrols on

weekends. They earn \$5 an hour. 'At first, people ignored them," Granata said, "and some people still react in disbelief."

Generally, however, the presponse has been so favorable the city is considering beefing up the siquad with "code enforcement" insignia and whip-antenna flags to make the members more visible

Allen also said the police department and the city are considering keeping the squad on year-round.

Gas company wants ratepayers to pay for ads and contributions

analyst lawyer and a Plainview city councilman claim Pioneer Natural Gas Co. wants to foster a good corporate image at the ratepayers' ex-

Jack Hopper of Electric Consumers of Texas, Inc., accused the Amarillo company Tuesday of using corporate pressure to gain support for its proposal to make customers pay for gas utilities' advertising and charitable donations. "Believe me, there's been coercion to smoke people out to get them down here today," Hopper said at a Railroad Commission hearing.

Pioneer's proposed rule would allow gas utilities to charge up to 0.5 percent of their gross receipts for advertising and contributions.

"Advertising by utilities is not a four-letter word," said Tom Stephens, Pioneer spokesman.

Support for Pioneer's proposal came from hospitals such as Scott and White of Temple; charitable organizations such as United Way; chambers of commerce; private colleges such as Texas Christian and Abilene Christian universities; Entex, Inc.; Plano YMCA; Southern Union Gas Co.; and the Texas Association of Broadcasters.

Paul Plunket III of Houston, representing Entex, said the rule would add only one-half cent a day to the average customer's monthly bill.

He noted the Public Utility Commission allows electric utilities to pass on 0.3 percent of its gross receipts for advertising and donations, which gives them an advantage.

"If we have a story to tell, we need to be able to tell that story on the same basis as electric companies," Plunket said. "The Railroad Commission should

not be influenced by an error committed by the Public Utility Commission," said Plainview Councilman Tom Almon

He presented a council resolution opposing the proposed rule. 'There's no room to ape an unpalatable and unpopular rule of the

Public Utility Commission," said

Hopper's statement about company pressure referred to a letter from Pioneer President K. Bert Watson to those who had received company contributions. The letter asked for support of its proposed rule and stated,

Hopper.

EASTON, Md. (AP) Some 200 to 300 people were evacuated from their homes for a short time early today when a cloud of ammonia formed over a leaking storage tank near Easton, authorities said.

A valve on one of the storage tanks, owned by Kerr-McGee Corp. and leased to a local distributor, "apparently was open or broken," said Alan Smith, a dispatcher for the Talbot County Fire Control Board.

The cloud was spotted shortly before 1 a.m. by a passerby, who alerted
