Heavy rains cause some flooding in area towns

Heavy rains throughout the Permian Basin and West Texas Wednesday afternoon and evening caused flooding in some area communities

and closed highways at others. Rainfall amounts throughout the area varied from little more than a

drizzle to several inches.

Hardest hit areas included Lamesa - where four to five inches of rain fell Wednesday night and continued today - Andrews and Big Spring.

Lamesa law enforcement officials reported this morning that rains in that area resulted in some house flooding. Officials-closed U.S. Highway 87 to Lubbock about four miles north of Lamesa, where only the tops of some cars showed above the water, officials said.

A spokesman for the Lamesa Police Department said it rained hard all Wednesday night, with heaviest rains to the north of the city.

At Big Spring, a downpour about 7 a.m. today reportedly resulted in high water on the service roads of Interstate 20 and in dips on Texas 350 to

Snyder. According to the Big Spring Police Department, lightning struck a tank battery south of the city Wednesday afternoon, causing a fire. No injuries resulted, the spokesman said.

Early today, officials were barricading U.S. Highway 87 to Lamesa at points one mile and six miles north of Big Spring due to high water.

The service roads of Big Spring Street in the city limits of Big Spring also were closed because of high

A downpour brought an estimated 3.5 inches of rain to Andrews this morning and, according to a law enforcement spokesman, caused flooding of some streets. The spokesman said the water was up to the pickup

Other areas receiving heavy and moderate rainfall Wednesday night and this morning included Garden City, 1.69 inches in an hour; Crane, .60 inch; Odessa, .83 inch, and Monahans, .75 inch.

Stanton reported rain and Rankin reported receiving a shower. Big Lake received a light shower Wednesday afternoon.

Midland received light rain overnight and this morning, but nothing to compare to the rainfall amounts received in area communities.

fice at Midland Regional Airport re-

The National Weather Service of-

ported .07 inch this morning, bringing the total for July to 1.77 inches and the total for 1979 to 8.75.

Warfield, seven miles west of Midland, received about the heaviest rain in the immediate vicinity, .60 inch Wednesday evening.

Midland College in North Midland reported .10 inch and the Midland Farmers Co-op, on the southeast limits of the Tall City, reported .05

But heavy clouds - and the weatherman - promised more rainfall for Midland tonight and Friday. Light

rain was falling this morning. Today's 60 percent chance of rain was to decrease to 50 percent chance

tonight and 30 percent on Friday. With the clouds and rain have come cooler temperatures, according to the weatherman. Low tonight should drop to near 70. High Friday should be in the middle 80s.

The weatherman said the rain is being caused by a combination of "just an awful lot of moisture" and the heat. The thunderstorms are stationary, he said.

Wednesday's high reached only 83, far short of the record high 100 degrees set in 1947. The overnight low dropped to a comfortable 70, still short of a record low 61, set in 1947.

Deputies arrest two Midlanders in shooting death

By MIKE SLATON

Two Midland men, ages 17 and 20, have been arrested by Midland County Sheriff's Department deputies in the shooting death of U.S. Army Sgt. J.B. England east of Midland about 4 a.m. Wednesday.

Continuing to act on information that led to the arrest of a man near Monahans Wednesday morning, deputies arrested a second man in Midland about 12:37 a.m. today, said Lt. John Kleinhans of the sheriff's of-

The 17-year-old man taken into custody this morning, Kelly Joe Chamblis, originally was sought as a material witness in the shooting of the 39-year-old Army sergeant, but, according to Kleinhans, Chamblis has charged with murder in connection with the case.

Chamblis was charged before Peace Justice Robert Pine. Bond was set at \$150,000.

About 10:30 a.m. Wednesday, officers from Ward County Sheriff's Department, Monahans Police Department and an officer from the Department of Public Safety assisted by two Midland County Sheriff's deputies apprehended the first Midland man to be arrested in connection with the

Raymond Wesley Mathis, 20, remained in Midland County Jail early today in lieu of \$150,000 bond set by District Judge Vann Culp. Mathis was indicted on a murder charge by a Midland County Grand Jury Wednesday afternoon.

A phone call from a Midlander early Wednesday gave deputies a starting place in the investigation of England's death, Chief Deputy George Thompson said Wednesday.

The phone call came about 8:30 a.m. and the caller asked to talk to Sheriff Dallas Smith, Thompson After talking with a number of wit-

nesses as the result of the phone call, . the sheriff's office Wednesday issued a bulletin to other law enforcement agencies in an attempt to locate a particular car, Thompson explained. The car was seen in Monahans

about 9 a.m. and Lt. Kleinhans and

Sgt. Pat Fuller were dispatched to the

Staff Writer

scene, Thompson said. Mathis was arrested at a roadblock west of Monahans about 11/2 hours after the car first was seen.

Some evidence was recovered from the car Mathis was driving, Thompson said Wednesday.

Sgt. England, recently returned from duty in Korea, was shot at least twice in the head Wednesday morning about 10 miles east of Midland on Interstate 20, officials said.

England apparently was driving to Fort Bliss in El Paso from Marion, N.C., where he had been visiting his brother and sister, officials said.

The van he was driving - uniforms hung neatly in the back - had 6,087 miles recorded on the odometer.

Responding to a call from the DPS, Midland County Sheriff's deputies Jim Phipps and Benny Fishbeck arrived at the site of the shooting east of Midland and found England sitting against his van, which was parked on the side of the road, officials said.

The driver's side window of the van had been shattered by some kind of projectile, possibly a bullet, they

England still was alive when the

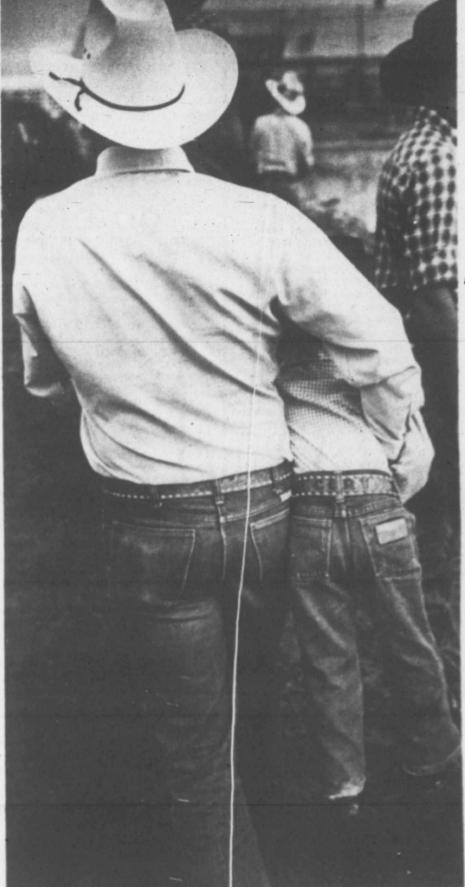

two deputies arrived and he signaled to them he had been shot about 20 minutes earlier, officials said.

The wounded man was transferred to Midland Memorial Hospital, where he died about 6 a.m. Wednesday

A full autopsy has been ordered, authorities have indicated, but a preliminary autopsy Wednesday revealed England had, in effect, drowned due to an accumulation of blood in his lungs - the bleeding having been from at least two bullet

Officials have said they believe England was shot with a .22-caliber

Hitching a ride has its advantages, especially if you're on the small side for slogging through Midland County mud. Cory McFadden, 3, calls on "pappy power" for transportation on the first night of the American Junior Rodeo Association rodeo at the Joe Thorp Arena. Although Wednesday afternoon rains muddled the arena, located northwest of Midland on FM 868, performances will continue at 7:30 p.m. today through Saturday. (Staff Photo by Brian Hendershot)

Califano said out of a job

WASHINGTON (AP) - HEW Secretary Joseph A. Califano Jr., has become the first casualty in President Carter's Cabinet reshuffling, administration and congressional sources said today.

Rep. Carl Perkins, D-Ky., chairman of the House Education and Labor Committee, said: "Califano told me himself that the president accepted his resignation last night at 6 o'clock."

Similar word came from high administration officials who declined to Califano had been scheduled to testify on overhauling the government's

student loan programs before an Education and Labor subcommittee, but he sent subordinates from the agency in his place and scheduled a 11:30 p.m. CDT news conference.

At the White House meeting, Carter reportedly cited Califano's frequent skirmishes with presidential aides over policy issues and appointments as one reason for accepting Califano's resignation as chief of the Department of Health, Education and Welfare.

There was no official confirmation immediately from the White House or Carter had been expected to announce by Friday which of the 34 resignations he requested from Cabinet officers and his top aides would be

HEW sources, who asked not to be named, agreed that the strengthening of Hamilton Jordan's hand as White House chief of staff Wednesday boded ill for Califano, who has feuded with Jordan from the outset of Carter's

administration. While the mood was grim among Califano's top aides, the secretary himself appeared in good spirits at a signing ceremony of a social security agreement with Switzerland.

Noting the sizable media contingent on hand, he quipped, "It's a tribute to Switzerland....1'm delighted to see the Washington press corps interested in

To reporters who asked about his fate, Califano replied with a smile, "You'll be the first to know, I'm sure."

The outspoken former aide to Lyndon Johnson has close ties with traditional Democratic liberal leaders, and some were expected to plead his cause with the president, the sources said. It was not known whether Vice President Walter F. Mondale, who helped Califano land the Cabinet job, would intercede, Firing Califano now might improve Carter's chances of recapturing the

South in next year's elections. The secretary's anti-smoking crusade and college desegregation fight with North Carolina have made him anathema in parts of the region. On the other hand, Carter's hopes for passage of the hospital cost con-

tainment bill, which he has called a key to his anti-inflation fight, might be jeopardized by the ouster of Califano, who has also been credited with improving the management of HEW's huge empire. And firing him also would leave Carter several key vacancies to fill at

HEW. Its leadership ranks were thinned last month by a wave of resignations, including the No. 2 official, Undersecretary Hale Champion, Food and Drug Commissioner Donald M. Kennedy and Education Commis-Califano has positioned his hand-picked aides in several other top slots

at HEW, and they too could leave - or be booted out - with him.

Jordan new chief of staff

WASHINGTON (AP) - Hamilton Jordan, taking over as White House chief of staff, ordered an evaluation of top officials throughout the government while President Carter's Cabinet members waited today to learn whether their resignations would be accepted.

The only formal announcement Wednesday from the White House revealed Jordan's promotion. It was unclear whether Carter would announce today or Friday which resignations he would accept

among the 30 outstanding ones sub-

mitted earlier by his Cabinet and top White House staff. White House press secretary Jody

Powell said today the president "is well on the track of concluding those decisions, certainly within the next Continuing uncertainty about the

shakeup has helped depress the dollar on international money markets.

Nugent: 'Energy shortage is real

Severance taxes imposed by coal-By BILL MODISETT Staff Writer Texas Railroad Commissioner Jim Nugent, speaking at an oil and gas

that Texans had better realize the energy shortage is real. "Yes, we have an energy problem," Nugent told the gathering of oil men and women at a gas proration semin-

Commission Oil and Gas Division in The Midland Hilton. You need to tell your neighbors and friends it's not just a wild story to jack up the price," said Nugent. "You will never see this much oil and gas at

ar presented by the Texas Railroad

seminar here Wednesday, warned

this price again." Saying that it's difficult to convince the American public the nation is running out of oil and gas, Nugent cited statistics he said show that production of gas and crude oil in Texas is decreasing. Reserves are decreasing, too, he said.

Nugent said he hopes the federal government will take steps to encourage the oil and gas industry to explore for and develop new reserves.

While agreeing that Texas and the remainder of the nation needs to convert more to coal - particularly in power plants - Nugent noted the state faces a costly conversion to the fuel.

producing states will vastly increase cost of the fuel, he said. The railroad commissioner also noted that for years Texas provided natural gas to other parts of the nation at "a reasonable price."

Now the state is being hit by other areas of the nation with "unreasonable severance taxes" for coal.

Nugent also criticized federal regulations proposed for oil field injection projects by the Environmental Protection Agency.

"Federal regulations proposed by the Environmental Protection Agency for oil field injection projects will impede energy production and drive up the prices of oil and gas without improving the protection of the environment," Nugent said. Pointing out that Texas has regu-

lated underground injection projects for more than 50 years to protect the state's fresh waters, he added, "The Texas Railroad Commission wrote the book on underground injection programs and it was done before E'PA was ever thought of.

how to do this job," continued Nugent. 'The EPA would do well to follow the Texas lead." Nugent also stressed the commission's efforts to reduce paperwork,

Now EPA wants to add unneces-

sary costs and paperwork and tell us

that, he was a state representative for 18 years.

The seminar was to continue today with State Rep. Tom Craddick of Midland the guest speaker at an 11:30

delays and expenses of the regulatory agency, saying, "If we can reduce regulatory expenses, we can keep the consumer cost of energy down."

Prior to his address, Nugent told

news representatives he hoped President Carter's Sunday night address to the nation was well received.

"Hopefully, people will believe him when he says it's (the energy shortage) real." Nugent also said he regrets that

Energy Secretary James Schlesinger may be leaving the Carter administration soon. Nugent said Schlesinger was just beginning to gain the experience and

expertise needed to help relieve the country's energy problems. Appointed to the Railroad Commission by then-Gov. Dolph Briscoe, Nugent began serving on the commis-

sion in January this year. Prior to

Pope to visit United States

WASHINGTON (AP) - Pope John Paul II will visit the United States in October and has accepted an invitation to become the first pope to call on a president in the White House, the National Catholic News Service

The White House press office had no comment on the report today, but one source suggested that any announcement of a meeting between the pope and President Carter might first come from the Vatican.

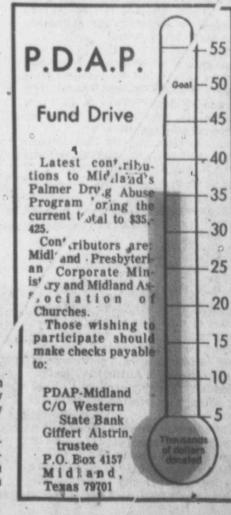

The only other visit to the United States by a pope occurred when Pope Paul VI addressed the United Nations in 1965, and President Lyndon B.

Johnson visited him in New York.

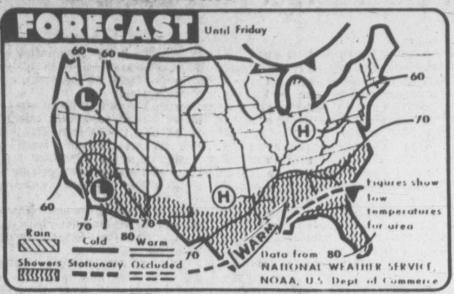

Richard Daw, director of the National Catholic News Service, said dztails of the visit are unsettled but the people planning it are now antici-pating a much shorter and less extended trip than originally foreseen

There may be only one stop in addition to Washington and 'New York, and possibly not even that, Daw

The Vatican has made no 'announcement regarding the trip, 'out for reasons of security church 'afficials often withhold such announr ements until a few weeks beforehar,d.

WEATHER SUMMARY

Widespread showers are expected today through Friday morning across the southern tier of states from California to Florida and in the Southeast. Warm temperatures are forecast for most of the nation. (AP Laserphoto Map)

Extended forecasts

Saturday through Monday

West Texas: Chance of afternoon and nightti warming trend Saturday through Monday. Highs mainly in the 90s except near 105 Big Bend valleys. Lows lower 60s to middle 70s.

North Texas: Clear to partly cloudy Saturday through Monday with isolated mainly afternoon and evening thunderstorms Saturday. Mild Saturday with a gradual warming Sunday and Monday. Highest temperatures 87 to 93 Saturday otherwise 90 to near 100. Lowest tempera-tures 68 to 78.

South Texas: Chance of showers and thundershowers Saturday and Sunday and near the coast on Monday. Otherwise partly cloudy and warm Saturday through Monday. High temperatures in the 90s except near 100 over southwestern portion and the Rio Grande Valley. Low temperatures in the 70s.

Border states forecasts

Oklahoma: Variable cloudiness and mild with scat-tered showers and thunderstorms. Fair to partly cloudy and a little warmer Friday. Highs mostly 80s. Lows in 60s.

New Mexico: Variable cloudiness with scattered thun-derstorms, especially during afternoon and early eve-ning hours. Some thundershowers with locally heavy-rain. Highs mostly in 70s mountains and 80s elsewhere. Lows from the 40s and 50s mountains to the mid 50s and 60s elsewhere.

Firefighters tackle rangeland blazes in four western states

By The Associated Press

Texas area forecasts

West Texas: Thunderstorms likely south and scattered north through Friday. A little warmer most sections Friday. Highs near 86 north to upper 90s Big Bend. Lows low 60s Panhandle to low 70s Big Bend. Highs Friday mid 80s Panhandle to upper 90s Big Bend.

North Texas: Partly cloudy warm and humid through Friday. Scattered mainly afternoon and evening thun-derstorms through tonight and east and south portions Friday. Highs 85 to 83. Lows 68 to 73.

South Texas: Considerable cloudiness through Friday with scattered showers and thunderstorms mainly northern sections. Not much temperature change. Highs Friday mid 80s to upper 90s except near 100 southwest. Lows in the 70s.

Port Arthur to Port O'Connor: Variable mostly north-east winds 10 knots or less through tonight and Friday. Seas less than 3 feet. Winds and seas higher in and near widely scattered showers and thundershowers.

Thousands of acres of rangeland flamed and smoldered today as firefighters battled new fires in areas of California, Oregon, Arizona and Idaho already deeply scarred by midsummer blazes.

Six men were injured fighting California fires; shifting winds spread an Oregon forest blaze several miles toward the California border; Arizona fires persisted out of control and autho, rities feared lighting would touch off a nore; and Idaho firefighters douse. one major fire just as another one bles v out of control.

Six me, mbers of a U.S. Forest Service crew were treated for burns and smoke inha lation Wednesday after they containe d two large brush fires straddling Interstate 5 in Southern California, Mon'e than 4,400 acres

were razed in the fire. Los Angeles Cou'fity Fire Department spokesman Ken Lavoie said one of the fires, which consumed 2,150 acres, at one point threa tened at least 25 homs and forced closur e of 21 miles of state highway. Most of the acreage burned was in the Halsey an d Chiquito canyons.

Rabies case confirme d in Crane County tox

CRANE - Officials have confirmed a case of rables in a fox killed here last week.

The Crane County Sheriff's Department received word Tuesday from health officials in Austin that the fox, killed last Thursday near the Gulf Oil Co. office, was infected with the dis-

Chief Deputy Wendell Taylor said it is the first confirmed case of rabies he knows of in the county.

He said no actions are being planned by either city or county officials as a result of the test outdome.

Nearby, another fire burned at least 2,270 acres near the Wayside Honor Rancho and San Francisquito Canyon before it was contained.

A 66,000-volt power transmission line was damaged as the flames neared Interstate 5, causing a blackout at industrial tracks and parts of the Six Flags Magic Mountain Amusement Park.

Lavoie said at one time the two fires came within a mile of each other about 40 miles northwest of downtown Los Angeles, as 300 to 500 firefighters

battled the flames in 25 mph winds. In southwest Oregon, deputies said a forest fire came within 300 yards of Klamath County ranch buildings, and shifting winds shoved flames toward an area of California burned in a

previous fire. About 365 men aided by heavy equipment and aircraft fought the fire that authorities estimate burned about 6,000 acres. Hundreds more men worked to contain five other forest and range fires in Oregon on Wednesday as hot, dry conditions caused authorities to impose logging and travel restrictions in the state.

In Idaho, just as firefighters were containing a fire that leveled 2,800 acres near Rexburg, another blew out of control 12 miles east of Grasmere and burned 1,500 by nightfall Wednesday. Later Wednesday evening, firefighters said winds had spread the blaze across a total of about 4,000 acres in an area where rocks and rough canyons hindered firefighters.

Five Arizona fires that have cha rred 9,000 acres of tinder-dry brus, h raged out of control early today, but no injuries were reported and no structures were damaged or threatened.

However, more thunderstorms swept the state and authorities feared lighting - blanned for several of the fires - would tou'ch off new blazes.

Subsidy of Chrysler requested

DETROIT (AP) - The United Auto Workers union is asking the federal government to buy a piece of struggling Chrysler Corp. to keep it in business as a full-line manufacturer.

In another unprecedented move, UAW President Douglas A. Fraser told Chrysler it would not be considered as a strike target when one is selected about two weeks before the Sept. 14 contract deadline

Fraser suggested the government action, unprecedented in peacetime, Wednesday at the opening of negotiations for a new contract covering 124,000 workers in the United States and Canada - 15,000 of them on indefinite layoff.

"Our game plan is to save jobs of Chrysler workers. If somebody has another way, be my guest, and we'll withdraw it," Fraser said after the

opening round of bargaining. He said the government's interest in the company should be big enough "to keep Chrysler Corp. a viable cor-

poration. Chrysler, meanwhile, announced it will delay 1980-model production and indefinitely lay off 4,200 more workers at Michigan plants, bringing the number of Chrysler workers idled to nearly 20,000.

Industry estimates put the unsold new car inventory at the nation's No. 3 carmaker at 98 days. An inventory in the 60-day range is considered desirable. There was no comment from

Chrysler on Fraser's government bailout suggestion, but a competitor and a financial analyst said it was not the best idea they'd heard. "It would be General Motors' opin-

ion that the government could best help Chrysler by reducing the exist-ing regulatory load," said GM spokesman Cliff Merriott.

"Chrysler is far more capable of saving itself than the United States government is," said Arvid Jouppi of John Muir & Co.

There was also no immediate reaction from the federal government. Fraser said he raised the idea with Treasury Secretary W. Michael Blumenthal at Camp David last week and thought he was "sympathetic."

Fraser said government loans or loan guarantees — for which there are precedents — should be ruled out, because "that would be piling burden upon burden. There's enough credit out there already." Chrysler's debt load is much heavier than that of

Ford or GM. Chrysler, the country's 10th largest industrial corporation, lost \$205 million on sales of \$13.6 billion last year, another \$54 million in the first three months of this year and expects to report another large loss for the second quarter. Top company officers have said they do not expect an upturn until 1981.

Midlander 'improved'

Billy L. Shepherd, 17, one of three Midlanders injured in an oilfield fire near Spraberry Tuesday afternoon, was in improved - from critical to serious - condition at Brooke Army Medical Center's Institute of Surgical Research-Burn Unit at San Antonio, a Brooke spokesman said this morning.

Shepherd, 1300 Cotton Flat Road, was flown by air ambulance from Midland to Brooke later Tuesday afternoon. He suffered second- and third-degree burns over 55 percent of

his body Also injured in the flash fire were William McGuffin, 56, 1004 S. Dallas St., in satisfactory condition in Midland Memorial Hospital, and Jerry Baugh, 37, 3409 Tanner Drive. who was treated at the Midland hospital for minor facial burns and was released.

McGuffin suffered second- and third-degree burns on his face and hands.

Not injured in the fire was the Billy Mac Shepherd, drill site operator and father of the younger Shepherd.

The men, working for L & L Well Service of Midland, were releasing gas pressure from the casing of the 8,000-foot well when the fire broke

out. The oilwell site is on the Walton

El Paso apparel firm honored

ABILENE - Sun Apparel, Inc., of El Paso has been chosen to receive the Governor's Industrial Expansion Award for 1978 from the West Texas area. Nominations from this area were coordinated through the West Texas Chamber of Commerce.

Nominated for the award by the El Paso Chamber of Commerce, Sun Apparel during 1978 experienced a 91.2 percent increase in employment and a 153.3 percent increase in payroll. The plant area increased by 95 percent and local expenditures for goods and services increased 159.3 percent over the previous year.

Three other West Texas firms are being recognized for expansion during 1978 by a citation from Gov. Bill Clements.

Weber Aircraft of Gainesville, a division of Walter Kidde Co., Inc., was nominated by the Gainesville Area Chamber of Commerce Inc. Wichita Clutch Co. of Wichita Falls

was placed in nomination by the Wichita Fails Board of Commerce and Industry. The Ross Co. of Brownwood was

'Body detail' allows 'no emotional involvement'

By SUSAN SMITH

CHICAGO (AP) - Frank Braun refuses to let it get to him. But he remembers well the day he waded through arms and legs and heads, pieces of 273 charred bodies scattered across a field beside O'Hare International Airport.

It was America's worst aviation disaster, and Braun and about 25 other men had the job of piecing together the bodies and putting them into black rubber bags.

The men were Cook County sheriff's police officers and evidence technicians. They drew the "body detail" simply because they were on duty that day. The grisly task became part of their routine.

Some of the officers assigned to the O'Hare body detail also had helped dig up 29 bodies under and around the suburban Chicago home of mass murder suspect John Wayne Gacy Jr.

But Braun says gruesome tasks don't depress him because he doesn't allow himself to be emotionally attached to the tragedies.

"You almost want to say, it bothers me. But it doesn't," he said. If the workers had been emotionally involved with

the people they were methodically piecing together or digging up, Braun said, they could be suicidal. "We'd be putting guns in our mouths," he said. American Airlines Flight 191 lost an engine and crashed shortly after leaving O'Hare on May 25. All 271

persons aboard and two persons on the ground were The crash was a holocaust. It blew the heads off at least 70 victims and burned all of them beyond recognition, police said.

Fire at least made their job easier.

"If we hadn't had a fire, it would have been hell," sheriff's police officer Phil Bettiker said. "With fire burning the connectig parts, you'd have

part of the torso here, pat of the torso there, but no blood," he said. "You couldn't recognize it as anything other than a piece of meat. "When you're cooking a chicken on the barbeque

grill, do you think of the white bird running around?"
Police said they got through the ordeal by thinking ahead to their break periods - and by making jokes on

"You have to have a sense of levity, so that you really don't start getting goofy," said sheriff's policeman Larry Troka. "Here you've got a pile of 30 or 40 bodies you're moving around. And I would sort of say, 'Excuse me'

and move a body," he said. But the sight of the burned bodies, strewn across an area the size of two football fields, did disturb some of

those involved in the crash aftermath. John Weliczko, a Glen Ellyn psychologist, said he has counseled nine persons who either worked on the cleanup or in a nearby airplane hangar where bodies

"Some people are more immune to the plight of death than the average person," Weliczko said. But for many, he said, working around such a tragedy makes them 'just as much victims of the crash as the relatives.

"They deal with a compounded tragedy, the constant onslaught of death. Death is more of a reality for them than it is for others," he said. "There is an attempt to try to look at it as a job, and

they become depressed with that.... Nobody wants to select a job that says, 'I enjoy piling up of remains of dead victims,' unless one has a sado-masochistic per-"There is a latency of images that re-occur every

time a tragedy happens. This is an anniversary reaction. There are dreams, sleeplessness and guilt.' The sheriff's police say they have learned to avoid

that sensitivity in order to keep their jobs and their "It's silly to involve yourself in somebody else's

heartache," said Chicago police officer Jerry "A psychologist would tell us the oppression is our

choice. If we get into the sadness of the persons who died, what can we do about it except destroy ourselves and destroy our jobs?"

Hispanic judgeships demanded

SAN ANTONIO, Texas (AP) - A top Hispanic leader says at least two Mexican-Americans must be among those named to fill four vacant federal judgeships in the huge Western District of Texas, which has 869,000 Hispanics but has never had a Mexican-American judge.

"We cannot take less than two. We'll be asking Senator (Lloyd) Bentsen to consider three, but certainly no less than two should be appointed," Ruben Bonilla, national director of the League of United Latin American Citizens, told reporters Wednesday.

"Never in the history of the Western District of Texas has a Hispanic served as a federal judge," added Bonilla, a Corpus Christi attorney. "We must put an end to the historical exclusion of Hispanics and Hispanic attorneys from federal judgeships." Three of the vacancies are in exist-

ing judgeships, while the other is in a newly created position.

U.S. District Judge John H. Wood Jr. of San Antonio was assassinated May 29 and Chief U.S. District Judge Adrian Spears and U.S. District Judge D.W. Suttle, both of San Antonio, have announced they will retire and take senior status.

State District Judge Ted Butler of San Antonio, recommended by Bentsen for the new judgeship, recently withdrew his name from considera-

Bentsen, who must recommend persons to fill the vacancies, has said he will recommend at least one Mexican-American in the Western District. James DeAnda in the Southern District was the only Mexican-American among those Bentsen recommended last year to fill the state's 10 new judgeships. He was appointed by President Carter.

Bonilla, appearing with representatives of other Mexican-American groups, declined to mention any names of Mexican-Americans being supported for judgeships. "We're supporting the concept of around," said Bonilla, adding that such public speculation by Mexican-Americans might lead to divisive squabbles that would harm their chances. Pete Torres, who heads an organi-

zation of Mexican-Americans within the State Bar of Texas, said the group has submitted a list of about 15 Mexican-American attorneys or judges qualified for a federal judgeship. State District Judge H.F. "Hippo"

Garcia and State Rep. Matt Garcia, both of San Antonio, and Carlos Cadena, chief justice of the 4th Court of Civil Appeals in San Antonio, have been most prominently mentioned as possible appointees.

Bonilla pointed out that the sprawling district includes San Antonio and El Paso, which have two of the nation's largest concentrations of Hispanics. Only New York and Los Angeles have larger concentrations of Hispanics, he said.

Thirty-three percent of the 2.7 million persons in the district are Spanish surnamed, said Bonilla.

Brownwood officer testifies in trial of city's police chief

BROWNWOOD, Texas (AP) -Brownwood Police Chief Vic Fowler heard one of his officers testify Wednesday that Fowler swung his leg at a prisoner lying on the floor just before the prisoner cried out. Fowler is on trial in Brown County

court on misdemeanor assault charges. Officer Robert Pacatte said that he saw Fowler swing his leg, but did not

actually see Fowler kick prisoner Ronald A. Harling. A county grand jury indictment returned May 30 charges Fowler kicked Harling in the groin as Harling lay on

the floor in front of the booking window on May 13. Pacatte said he and Officer Oliver Still had arrested Harling on for public intoxication and were booking him when the prisoner sagged against the officers and lay down on the floor.

Pacatte said he believed Harling was 'playing dead weight." County Judge James Bunnell overruled a motion by defense attorney Gordon Griffin to halt the testimony of Pacatte, Still and three other officers, who were scheduled to take the

stand Thursday. Harling was called to testify, but his attorney, Dana Smith, advised him

not to testify. Bunnell agreed with Smith's arguments that Harling would jeopordize his chances of a fair trial on federal charges of assault on a peace officer if he testified.

Fowler, who has been Brownwood chief since 1972, is a 30-year veteran. of the department.

Testimony before the two-man, four-woman jury was scheduled to resume today.

Conference works on fair access to sea's riches

UNITED NATIONS (AP) - It's Law-of-the-Sea time again as the sixyear-old conference to try to work out orderly, fair access to the world's undersea riches opens its ninth

More than 1,000 delegates resume negotiations today and hope to work out agreements on the last remaining issues by Aug. 24. They have met for a total of 57 weeks since negotiations

Hamilton Shirley Amerasinghe of Sri Lanka, the conference president, spoke of "grave consequences" if the text of a treaty is not agreed upon in "Everyone must have a sense of

urgency," he told a news conference. "Governments are getting tired of this protracted exercise. Ambassador Tommy T.B. Koh of

Singapore said six weeks of negotiations earlier this year in Geneva resulted in a "very major step ... nodules. The potato-shaped nodules,

"Given good will, it should be possible to find answers to all outstanding 'issues at this session," he said.

He told told reporters failure to work out an agreement "would be disastrous for the world community, ... resulting in chaos on the sea, with conflicts of jurisdiction and conflicts of resources.

The toughest problems to be solved involve seabed mining of mineral

scattered on the ocean floor at depths of 9,000 to 18,000 feet, contain commercially valuable quantities of manganese, nickel, copper, cobalt and other metals.

U.S. companies have already invested hundreds of millions of dollars in seabed mining research and are pressing to move into production. Legislation pending in Congress would authorize them to begin mining the nodules in the absence of an international treaty regulating such opera-

Koh said other industrialized nations - including the Soviet Union, Japan and members of the European Common Market - were also likely to act under national authority based on traditional policies of freedom of the

The conference has already agreed on the creation of an International Seabed Authority to regulate exploitation of the seabed for the benefit of all nations. The authority would include a separate international enterprise to undertake mining operations along with private and government companies.

Points still in dispute involve fees and taxes to be paid by the private and government companies, the authority's limitation on operations, how decisions are to be made by the regulating council and financial and technological arrangements for the international mining enterprise.

In addition to seabed mining questions, other issues still in dispute include sovereignty over the continen-

tal shelf where it reaches beyond the 200-mile limit, the boundaries between national sea zones and rights of scientific access to nationally controlled waters.

Among the difficult issues already settled by the conference was the setting of a 12-mile territorial limit with exclusive economic zones extending up to 200 miles from a nation's shores, and the granting of access to the seas to landlocked coun-

The complex agreements on these and other points include at least half the hard-core issues formally spelled

'There is a very widespread feeling that if we are able to dispose of plus-or-minus five out of nine hardcore issues, we ought to be able to resolve the remaining ones," said U.S. Ambassador Elliot L. Richard-

son, the chief of the U.S. delegation. "However, that confidence is tempered by the knowledge that the unresolved points are the really difficult ones," he added.

Sandinista junta prepares to move into Managua

MANAGUA, Nicaragua (AP) -The Sandinista junta prepared to move into Managua today or Friday after national guard resistance melted and President Francisco Urcuyo and other remnants of the Somoza dictatorship fled.

churches, surrender and leave their weapons there.

For the first time in many weeks no firing was heard in Managua Wednes-

"I expect we will be in Managua tomorrow or the next day," junta member Alfonso Robelo told reporters in Leon Wednesday after he and other junta members flew from Costa Rica and declared Nicaragua's second largest city the provisional capi-

Sergio Ramirez Mercado, another junta member, said municipal elections would be held within "a very short time after the junta took power," but the country would have to be stabilized first.

He said a new army would be formed of Sandinistas and any guard soldiers "not involved in crimes. against the people.

He also charged that during U.S. Ambassador William Bowdler's negotiations with the junta in Costa Rica before Somoza resigned, the United States made "indirect threats of sending arms to Somoza" if the Sandinistas did not agree to name more moderates to the government. But the 'pressures were worth nothing and sometimes they were only threats,"

Somoza resigned Tuésday and flew to his estate in Miami Beach after agreeing with the United States and Latin American governments that Urcuyo, his handpicked successor, would hold office only until the junta could take over. But once in office, Urcuyo said he would stay there for the 16 months remaining in Somoza's term and called on the rebels to lay down their arms.

The U.S. government expressed concern and recalled U.S. Ambassador Lawrence A. Pezzullo to Washington to demonstrate its anger. Troops began deserting. The Sandinistas said the national guard surrendered and rebel officers were on their way to take over guard command posts in the capital.

Urcuyo's men denied this, but 186 deserters grabbed 14 of the air force's 18 planes, fled to Honduras and asked for asylum. Other fleeing guardsmen took an American and a British Red Cross plane and escaped with their

Faced with the military collapse and the U.S. pressure, Urcuyo gave

Mexico joined Costa Rica, Panama, Ecuador, Peru, Grenada, Iran and Vietnam in recognizing the junta as the legitimate government of Nicaragua, which the Somoza family had ruled for 42 years.

Nothing was heard from the rightwing military regimes in neighboring Honduras, Guatemala and El Salvador, where the Sandinista success is certain to put new life into local guerrilla movements.

The Sandinistas, who take their name from a Nicaraguan rebel who battled the Marines in the 1930s, began their "final offensive" May 28, eight months after an unsuccessful, two-week uprising last September.

Another disaster

Iran has already fallen victim to one disaster in 1979 and there is ample reason to wonder if a second is not in the making.

The Ayatollah Ruhollah Khomeini proved adept at marshalling the Moslem faithful who overthrew the shah. But in the six months since then, the ayatollah has met with far less success in attempting to return his country to a semblance of order.

Oil production has yet to attain pre-revolution levels and the ayatollah's hold on the oil fields and those who work them is tenuous. Unemployment and inflation remain critical problems, with both capable of undermining the ayatollah's rule.

Iran's minority populations in the provinces are agitating for a measure of autonomous rule. The Kurds, Turkomen, and Arabs have even taken up arms to underscore their demands. They may do so again, especially if the new constitution shortchanges their aspirations.

For the moment, no single group in Iran seems capable of challenging the ayatollah or his revolutionsry councils. The country's provisional prime minister, 73-year old Mehdi Bazargan, has only a limited constituency.

Moderates and pro-Western members of the middle and upper classes seem demoralized and frightened. The extreme left pro-Palestinian Marxists and Iran's Communist party -- are busily building their strength but they still are-too weak to take on the ayatollah's minions.

However, should some combination of economic, political and social turmoil cripple the authority of the ayatollah's revolutionary councils, or even unseat the ayatollah himself, Iran might be plunged into chaos beside which the anti-shah tumult would seem tame indeed.

At that point, the possibility of protracted civil war or a Marxist coup could not be ignored.

All this would be worrisome enough without the knowledge that the Carter administration's policymakers are deeply split over Iran's prospects and, at present, lack even a credible plan for rebuilding American influence in that country.

Chinese brain operations are something to behold

KUNMING, China - There are many ways to see China. If you are a tourist you get to go to museums, palaces and theaters. If you travel with the Secretary of HEW, Joe Califano, you get to see a lot of brain operations. The Chinese are very proud of performing brain operations with acupuncture. That and Peking Duck are their main specialties, and each hospital wanted to prove they could do it better than the one we had just visited.

In Kunming, the doctors permitted Califano to talk to a man while he was being worked on. It's hard to believe but the patient was wide awake and in control of all his faculties as he conversed with the secretary. As I watched, I couldn't help think-

ing what the man would say when he got back to his commune that evening for dinner, with his head in ban-

WASHINGTON MERRY-GO-ROUND

Soviets get refined machinery

By JACK ANDERSON

WASHINGTON - American businessmen, reluctant bureaucratic regulators and detente-smitten presidents have combined to provide the Soviet Union with sophisticated, militarily useful machinery from our technological arsenal.

by Larry Brady, who was then the acting director of the Commerce Department's export office.

Some years ago, remembering Pearl Harbor and the U.S. scrap iron that had helped to build the Japanese war machine, Congress passed a law designed to ban the sale of "sensitive" products that could be converted to military use by our communist adversaries. Several thousand items on the "Commodity Control List" can be exported supposedly only after careful review and approval by federal watchdogs.

But Brady told the House committee bluntly: "The export control system, as it is today, is a total shambles." The safeguards written into the regulations are "not worth the paper they're written on," he said.

For example, before the Russians can get permission to purchase certain products, they must sign a statement that they won't use the American-made hardware for military purposes. "Otherwise, we wouldn't approve it," Brady explain-

But sources told our associate Dale Van Atta that there is no effective way to make sure the Soviets live up to their promise. Instead, the Commerce Department relies on the fox to guard the henhouse; on-site inspections are made by representatives of

often non-Americans, but they have a strong motive for ignoring any Soviet violations. Explained Brady: "The company wants to sell more ... and he knows very well that if he reports a diversion (to military use), he's not going to be able to sell more.'

For the same selfish reason, American company executives are unlikely to squeal on their customers, another Commerce Department official told us. "Unless they're superpatriots, they have a very large stake in not informing," he said.

ed anything that can be used for military purposes will be put to such use by the Russians. Brady cited one example to the committee: the huge Soviet truck plant on the Kama River, largest of its kind in the world. It was built with some \$500 million worth of American designs, tools and com-

Brady testified that he had recently confirmed the use of the Kama River plant to make military vehicles and parts. "The file indicates that we knew at the time the license was made...at the White House in 1974...that they would manufacture more engines than trucks," he said.

reasonable individual knew then that the extra engines and other things would go to the military." Despite objections on this score, then-Secretary of State Henry Kissinger approved

Computers are the source of the most intense controversy. "For all practical purposes, when you export a computer, you lose control over it," Brady explained. There is, he said, no real way" it can be determined whether a computer has been diverted to military use. But last year President Carter approved the sale of large plant for producing oil drill bits, and the plant includes a com-

NICK THIMMESCH

President Carter's 'sermon' and speech discussed

WASHINGTON - President Carter really gave two speeches Sunday night. The first was a well-delivered sermon, one which could touch all but the most hedonistic or cynical American. The second offered a refurbished energy program, failed to resolve serious questions and, in several ways, contradicted the first. But the man deserved credit for trying.

Two-thirds of the President's address was devoted to the sermon. There was witness from the faithful. There was affirmation of the decency, strength and wisdom of the American people - as Mr. Carter put it. Indeed, he threw us off when he declared that he wanted to speak on a subject "even more serious than energy or inflation," namely, "a crisis of confi-

Oh, it's easy to spot the signs, as Mr. Carter did — pessimism, political apathy, disrespect for institutions, declining productivity by American workers. And it is easy to recite, as he did, the griefs of the past 18 years assassinations, Vietnam, Watergate, the shrinking dollar.

It is unusual for the leader of a party which has promised so many worldly goods for so many years to lament the worship of "self-indul-gence and consumption." It is also ironical for the Democratic President to fret over the condition of the family and community in America when activists in his Administration and his party work to undermine these two great mainstays.

Still, Mr. Carter's words - propelled directty and with earnest eye contact - could move people to think about doing with less, to live simpler and more meaningfully, and to strengthen family and personal rela-

But then, bam, we were suddenly in

Nick Thimmesch

an energy speech - the last third of Mr. Carter's address. Christian soldiers suddenly became warriors "on the battlefield of energy," as the President put it, ready to "seize control of our common destiny," presumably one fueled in part by energy.

The fact that the United States is the world's champion energy consumer also explains why we have such a high standard of living and have all those consumer goodies to indulge ourselves with. If this be war, is OPEC the enemy? I guess so. So our real test of spiritual strength is to vanquish OPEC by becoming energyindependent (Nixon's goal, too) and

live in American prosperity forever. But the President's fine words raised thorny questions. He boasted that the United States has more oil in oil shale than "several Saudi Arabias," thus playing on the antipathy toward that oil-rich nation. But didn't our government just express gratitude to the Saudis for keeping their oil prices below OPEC and also for increasing production so the gas-line motorists the President professed sympathy for won't be further incon-

And what if Congress and the public

say "Hell no, we won't go" to his call

to arms? If domestic production isn't sharply increased, and Carter sticks

to his pledge to forbid one drop of oil

to be imported above his stated goals, won't we have a depression and gas Sure, in World II when people really

thought our republic could be conquered, President Roosevelt had no trouble fashioning authoritarian powers and a synthetic rubber corporation. But I doubt that Congress will give Jimmy Carter an Energy Security Corporation. Congress and the public are already too upset with the Department of Energy to allow even more power to be invested in a federal entity.

It seems the more government gets into energy, the worse the situation gets. If billions of new tax dollars will be spent on energy, won't too many of them fall to Washington's "beltway bandits," that army of consultants and lawyers living in those affuent, outer-reach suburbs? They prosper from government contracts and generally do more harm than good.

How can the government order utilities to cut their use of oil by 50 percent when the alternative fuels coal and nuclear - are tied up in a thicket of controversy over safety and environmentalism? Ralph Nader is already howling. The Energy Mobilization Board the President says will cut thorugh roadblocks to energy projects will firmly be resisted in

There are other puzzlers. If \$10 billion will be spent to improve mass transportation, does Carter still want to cut Amtrak? Why didn't he mention nuclear power which now produces 13 percent of our electricity? And if Carter's energy war is truly a national effort, why did he fail to invite GOP congressional leaders Howard Baker and John Rh9des to Camp

Why did he invite only one Republi-

can governor? Indeed, where were Gerald Ford, Edward Kennedy and Jerry Brown, and what are we to think about the prevalence of liberal economists (not known to support energy development) and other hangers-on at the Camp David revival meeting? Or was this really a political gathering?

Surely, the President hopes to recover political strength from his remarkable address. His sermon bore truth. But Americans must make up their minds. If we are willing to consume less, so be it. If we want more domestic energy, the super-environmentalists and anti-nuclear crowd must be defeated. (Does Jerry Brown read by candlelight?) Nor does it serve our new-found spiritual purpose to denounce OPEC for the same materialism we wallow in. (One headline read: Carter Urged to Blame OPEC to Save Himself.)

By the way, that was the strangest buildup to a presidential address I've ever seen. Mr. Carter worked hard at Camp David. He did everything but

HEREFORD — Carlota Valdez, 66, of Hereford, mother of Armandina Sandoval of Midland, died Tuesday in an Amarillo Hospital after a brief

Services are pending with Smith & Co. Funeral Home in Hereford. Mrs. Valdez was born in Mexico. She was married to Sam Valdez Nov. 15, 1932, in Ballinger. She had lived in

Hereford 33 years. Other survivors include her husband, three sons, six daughters, five brothers, two sisters, 39 grandchildren and 10 great-grandchildren.

Hughie Woody

Hughie Woody, 79, 4305 Douglas St., died Tuesday in a Lubbock hospital following an illness.

Services were to be at 2 p.m. today in the Newnie W. Ellis Funeral Home chapel in Midland with A.A. McInroe of the Easton Road Church of Christ in Dallas officiating, assisted by Royce Bell of Irving. Burial was to be in Resthaven Memorial Park.

Woody was born June 30, 1900, in Brady. He was raised on a ranch southeast of Midland.

He had been a barber in Midland since 1927. He served in the Army in World War I and served in the Pacific with the Sea Bees in World War II. After his discharge in 1945, he returned to Midland. He was a member of the Cuthbert

and Austin Street Church of Christ. Survivors include his wife, Minnie; three brothers, Norman Woody of Midland, Johnny Woody of Marble Falls and Maurice Woody of Stanton, and three sisters, Bertha Kenney of Midland and Stella Woody and Hope Woody, both of Stanton.

Pallbearers were to be Willie Wat-kins, Milton Craig, Phil King, Stan Willis, James Simmons and Wade

Joel Russom

MIDKIFF - Services for Joel Scott Russom, 17, of Midkiff were to be at 10 a.m. today in the First Baptist Church here with the Rev. Don Turner, pastor, officiating. Assisting was to be the Rev. Alan Speed of De Leon Baptist Church.

Burial was to be at 4 p.m. today in Rosehill Cemetery in Merkel with the Rev. Kenneth Jones officiating, directed by Newnie W. Ellis Funeral Home of Midland.

Russom died Tuesday from injuries received in an automobile accident north of Midland

He was born Dec. 22, 1961; in Eunice, N.M. He moved to Midkiff 15 years ago. He was a senior at Rankin High School, where he participated in athletic programs.

Russom was a member of the First Baptist Church of Midkiff. He was employed by Fitzgerald Weather

Survivors include his parents, Mr. and Mrs. T.H. Russom of Midkiff; a brother, Waylon Mark Russom of Rankin; a sister, Kristi Russom of Midkiff, and his grandparents, Aria Russom of Merkel and Mr. and Mrs. O.N. McLean of Merkel.

Pallbearers were to be Greg Nelson, Brent Wrinkle, David Adler, Carl Feuge, Lynn Parker and Brant

Lydia Wessels

WINTERS - Services for Lydia Wessels, 70, of Winters, mother of Wanda Howell of Midland, will be at 10:30 a.m. Friday in St. John's Lutheran Church here with burial in the Lutheran Cemetery directed by Winters Funeral Home.

She died Wednesday in a Winters hospital following a two-month ill-

Mrs. Wessels was born July 14, 1909, in Cheapside. She was married to Carl Wessels Dec. 25, 1933, in Westhoff. She had lived in Winters 46 years and was a Lutheran.

Other survivors include her husband, a daughter, a brother, a sister, five grandchildren and a great-

Rebel junta flag flies over Leon

LEON, Nicaragua (AP) - The red and black Sandinista flag flew over this northern city as the rebel junta set up shop for the first time on Nicaraguan soil and declared Leon its provisional capital.

Four members of the guerrillas' Government of National Reconstruc-

Related story, Page 3A

tion arrived Wednesday from San Jose, Costa Rica where they had been waiting out the fall of dictator Anastasio Somoza.

They told a news conference they planned to move on to Managua, 55 miles to the southeast, as soon as the national capital was safe, probably today or Friday.

The last apparent bar to the rebel takeover fell Wednesday when Francisco Urcuyo, the interim president named by Somoza before he quit and went into exile Tuesday, resigned and

The four junta members — Violeta Chamorro, Alfonso Robelo, Sergio Ramirez Mercado and Daniel Ortega Saavedra - said their main task in the months ahead is the reconstruction of Nicaragua, ravaged by seven weeks of bloody civil war that cost at least 20,000 lives.

They said Moises Hassan, their fifth comrade, was with Sandinista forces in Masaya, 20 miles southeast of the

Ramirez said municipal elections would be held within "a very short time after the junta took power" but the country would have to be stabilized before general elections were called

He said the new government would accept aid from any country as long as it does not "compromise our sovereignty or our right to self-determi-

Robelo warned against any attempts at intervention in Nicaragua by other Central American nations or the United States. 'If during the period of reconstruction any country tries to intervene they should be fully aware there is a whole people ready to take up arms," he said. Junta members said a new army would be formed primarily from 'the ranks of the Sandinista guerrillas, but would include members of the national guard, Somoza's army, "not in-

volved in crimes against the peo-After the news conference, they walked out into the streets of Leon and were cheered loudly by resi-

dents.

"Nicaragua Libre" - Free Nicaragua - shouted Mrs. Chamorro, raising her arms into the air. "Viva Nicaragua" - Long Live Nicaragua - the crowd replied.

The rebels claimed control of Leon on June 5 and held on despite repeated bombardments by Somoza's

Many buildings in the center of the

city around the national guard head-quarters were bombed out or scarred by bullets. But streets were clean and only a few barricades and large holes, dug as makeshift tank traps, re-

Residents lined up at food distribu-tion centers set up by the Sandinistas. Children played in the streets, where because of a fuel shortage, traffic was scarce and appeared to be limited to Sandinista vehicles.

About 1,000 persons took part in a funeral march Wednesday for five dead Sandinistas. The crowd chanted slogans, women cried and guerrillas fired their weapons into the air as the procession wound toward a cemetery in the San Felipe slums. One guerrilla lost control of his weapon while firing into the air and sprayed the crowd, wounding three persons.

Cullen offers alibi for night of killings

FORT WORTH, Texas (AP) - Millionaire Cullen Davis has offered an alibi for his whereabouts on the nightfour people were gunned down at his Fort Worth mansion in a deposition taken in a civil suit growing out of the shootings.

In the deposition, Davis said he went to a movie and a restaurant between 8 p.m. and 11 p.m. alone the night of Aug. 2, 1976. That night, a man dressed in black opened fire on four people at the \$6 million showplace mansion, killing two.

Davis was acquitted in 1977 of the murder of his 12-year-old stepdaughter, Andrea Wilborn, one of the shooting victims. He had been tried in Amarillo on a change of venue.

The deposition is Davis' first explanation of his whereabouts taken under oath, although he had told news reporters of his activities. Davis never took the stand at the Amarillo trial. Although excerpts from the deposi-

tion did not indicate the sequence of events, Davis' attorney Phil Burleson' said Wednesday his client went to the restaurant first, then to the movie. Parts of the sworn deposition were

filed in 17th District Court Wednesday by the attorney for Gus Gavrel, 24, who was left partially paralyzed by the shooting spree. Gavrel has filed a civil damage suit

seeking \$13 million in damges. Gavel's lawyer, Grover Swift, filed portions of the deposition attempting to force Davis to answer questions for the civil suit. The attorney has asked State District Judge Charles Murray to compel Davis to respond to guestions concerning his finances.

When questioned by Swift about the shootings, Davis said in his deposition he has not found anyone to corroborate his story.

'Between the hours of 8 p.m. and 11 p.m. on Aug. 2, 1976, did you speak to anyone either in person, by telephone, radio, or any other means of communication?" the lawyer asked.

'Yes," Davis answered, "but I don't know their names.

"Has anyone told you that they know someone who has knowledge of or claims to have seen you at Kip's (restaurant) that night, Aug. 2?" Swift asked.

"No one ... has claimed or told me that they know of anybody that has seen me there at Kip's," Davis, 45, replied.

Davis' ex-wife, Priscilla, 37, the other wounded survivor of the mansion shootings, also has a multi-million dollar suit pending against Davis. Her daughter, Andrea, and lover, Stan Farr, were killed by the gunman she maintains was Davis. Davis is scheduled to stand trial

July 30 for the second time on a solicitation of capital murder charge. He is accused of masterminding a scheme to kill the judge presiding over his lengthy divorce case. The first trial, held in Houston on a

change of venue, ended in mistrial. Jurors deadlocked 8-4 for conviction. Meanwhile, District Judge Gordon Gray said the climate for seating a jury to hear the murder solitication

retrial here seems favorable. But he indicated he will move the trial out of Fort Worth without hesitation if jury selection bogs down.

Queen starts four-nation tour of African countries

LONDON (AP) - Queen Elizabeth II flew from London today to start a four-nation African tour which will end in Zambia, on the front line of the escalating conflict in Zimbabwe Rho-

The 16-day tour went ahead as scheduled after the 53-year-old monarch expressed her "firm intention" to go despite fears for her safety expressed by British politicians and newspapers

But British security officials reported the queen would be in no more danger - probably less - than in strife-torn Northern Ireland, where Britain mounted what was probably its biggest peacetime security operation for the queen's last visit in 1977.

Prime Minister Margaret Thatcher gave the final go-ahead for the current tour Tuesday, when she told the House of Commons of Zambian assurances that every precaution has been taken for the queen's saety. oth Zambian-based guerrilla chief

Joshua Nkomo and Bishop Abel Muzorewa, black prime minister of the embattled Zimbabwe Rhodesia administration, have pledged to hold off border incursions and reprisals during the queen's week-long stay in Zambia, ending Aug. 4. The queen is due to open in Zambia

the biennial meeting of the prime ministers of the Commonwealth, an association of Britain and her former colonies, of which the queen is the

The queen, traveling with her husband Prince Philip and second son, Prince Andrew, headed first for Tanzania, whose President Julius Nyerere is one of the most ardent supporters of the Rhodesian Patriotic Front guerrilla movement.

The three members of the royal family will spend tonight in a lodge in the Tanzanian hill town of Arusha, which nestles at the foot of Africa's highest mountain, 19,600-foot Kili-

The tour starts formally Friday when the queen is due to arrive in the Tanzanian capital, Dar, es Salaam, to a traditional and vigorous welcome from tribal dancers and drummers. The queen is scheduled to spend

four days in Tanzania, then goes to tiny Malawi and Botswana before flying to Zambia. With Mozambique and Angola, Tanzania, Botswana and Gabarone com-

prise the so-called "frontline" states from which guerrillas mount their incursions against Zimbabwe Rhode-

The guerrillas no aim to topple the multiracial administration which the Patriotic Front guerrilla movement regards as a sellout to white-minority

Black and white Zimbabwe Rhodesian mothers have appealed to the queen to press for the release of thousands of children allegedly abducted by Patriotic Front guerrillas and held against their will in refugee and military camps in Zambia.

"In this International Year of the Child we wish to draw her majesty's attention to the thousands of our abducted children being held in Zambia and elsewhere," the telegram from most of the embattled territory's

women's organizations said. "As a much loved and respected exemplar of Christian family life we feel that her majesty would agree that these children should be returned to their homes.'

Policeman's face full of holes

FAYETTEVILLE, Ark. (AP) -Washington County Sheriff Herb Marshall has testified in the capital murder trial of James Ray Renton that a Springdale patrolman's face was "full of bullet holes" when officers found him.

Renton, 41, of Houston, Texas, is charged in the Dec. 21, 1975 slaying of patrolman John T. Hussey, 23.

Marshall testified Wednesday that Hussey's body was found in a wooded area off Arkansas 16, near a van that apparently had been set afire.

Marshall said Hussey's hands had been handcuffed behind his back.

"There was quite a bit of blood," he said. "I dug around and recovered four bullets from the ground. Apparently, he was shot when he was lying on the ground."

Paul McDonald of the state Crime Laboratory testified that the bullet's removed from the ground came from Hussey's pistol, which was found near his body.

Prosecutor Kim Smith said Renton had purchased the van in Dallas on FBI agent Dick O'Connell testified

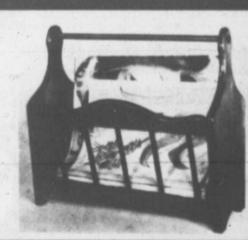

that he removed a number of items from the burned-out van, including three kinds of buttons.

BUDGET TERMS AVAILABLE-FREE DELIVERY

No, these planes are not headed for automobile gasoline pumps because of a shortage of aviation fuel. They are on their way to an exhibition at a suburban Albany, N.Y., motel. Nine planes in all took the two-mile jaunt. (AP Laserphoto)

Operators of Three Mile Island didn't have safety guidelines

Associated Press Writer WASHINGTON (AP) - Federal investigators are hoping to find out why

zuidelines discussed as early as 1977 that might have averted a serious nuclear accident this year at Three Mile Island were not provided the plant's operators.

Two engineers from Babcock & Wilcox, the engineering firm which designed the Three Mile Island nuclear power plant, disclosed Wednesday that they had warned in late 1977 and early 1978 that stricter guidelines were necessary to guard against plant procedures which, they said, could lead to a nuclear accident such as eventually occurred at the facility near Harrisburg, Pa.

More B&W officials were scheduled to appear today before the presidential commission investigating the March 28 nuclear accident.

John G. Kemeny, president of Dartmouth College and commission chairman, told reporters he hoped today's hearings would shed more light on why the warnings were not made known to B&W reactor operators.

Commission investigators Wednesday made public B&W documents which showed that two of the company's engineers raised questions more

Maine's

residents

than a year before the Three Mile Island accident about the adequacy of B&W guidelines as to the operation of the plants' emergency cooling sys-

The engineers, who also testified Wednesday, were concerned that operators at the B&W-designed plants were prematurely shutting off the emergency cooling pumps when they automatically kicked into place at the time of an accident.

In one memo dated February 1978, Bert M. Dunn, a B&W unit manager specializing in emergency cooling systems, urged that company guidelines be issued telling plant operators. not to turn off the emergency cooling pump except when the situation "has been stable for a period of time.'

The emergency cooling pumps automatically kick on when the normal flow of cooling water at a nuclear plant is interrunted. At Three Mile Island last M. h, the emergency system was to sed off manually when operators mistakenly thought the

and agriculture officials core was getting too much water. Dunn and another B&W engineer, Joseph J. Kelly, told the commission Wednesday the automatic emergency system also had been interrupted during an accident at the Davis-Besse contaminated by forest nuclear plant in Ohio in September

Weekend gas supplies increasing, especially in Texas' bigger cities

HOUSTON (AP) - Weekend gasoline supplies have increased significantly in Texas, especially in the big

city areas, since last week Seventeen percent of the filling stations in Houston, Dallas and Fort Worth will be open Sunday, a survey by the American Automobile Association shows. That's a 10 percent increase over last weekend.

The AAA survey of 418 service stations statewide also showed the number of stations out of at least one grade of gasoline fell from four percent to three percent this week.

Prices for gasoline continued to increase, the AAA says, at an average rate of about one cent per gallon for the week.

Here is the expected availability of gasoline, according to the survey: AMARILLO - 36 stations surveyed, about 62 percent closed by 8 p.m. weekdays and on Sunday, 38 percent closed by 6 p.m. Saturday.

AUSTIN - 15 stations, 93 percent closed by 8 p.m. weekdays and 86 percent closed by 6 p.m. Saturday and

on Sunday. **BEAUMONT-PORT ARTHUR** — 18 stations, 61 percent closed by 8 p.m.

weekdays, 27 percent closed by 6 p.m. Saturday and half closed Sunday. CORPUS CHRISTI — 20 stations, half closed by 8 p.m. weekdays, 40

Nuke plant has costly crane but it can't really use it

HOUSTON (AP) - Houston Lighting & Power Co. officials are trying to determine what to do with a \$500,000 gantry crane that is unacceptable for the \$2 billion nuclear power plant being built near Bay City.

A mixup in contract specifications is blamed for the crane not being tornado-proof. Federal regulations require that it be capable of withstanding winds of 360 miles per hour because of its location.

The mounted crame would be over a building housing intakes for essen-

Houston to vote on August 11

HOUSTON (AP) - Houston residents will be able to vote Aug. 11 on a referendum concerning a change in the make-up of their city council, but the Justice Department ruled several other items cannot appear on the

The federal agency said Wednesday that a proposal to retain the present council composition and two plans to limit city taxes would not be al-

The only plan it would approve was one in which the council would be expanded from eight members elected city-wide to 14 members, with nine elected from single-member districts and five city-wide. In a letter signed by Assistant At-

torney General Drew Days, the department said it would help the city schedule elections on the other charter changes.

The department stopped short of promising it would approve the ninefive plan if adopted by voters, but strongly indicated it would do so.

month that Houston 1977 and 1978 annexations would illegally dilute the minority vote unless a new council system was adopted with some members elected from single-member distial cooling water. If it were knocked down by a tornado, it could destroy pumps and valves designed to supply cooling water to two nuclear reac-

In a report to the Nuclear Regulatory Commission, the power company said it failed to include the tornadoproof specifications in bid requests and a supplement attached later failed to correct the situation.

Jim Parsons, a company spokesman, said Wednesday several corrective options now are being studied.

One option is possible extension of the crane's tracks so the 20-ton device could be moved away from the cooling water intake building during tornado conditions

In any event, Parsons said, there is every probability the crane will be used, either at the nuclear plant or at other company facilities.

percent closed by 6 p.m. Saturday and 55 percent closed Sunday.

DALLAS-FORT WORTH - 73 stations, 94 percent closed by 8 p.m. weekdays and 6 p.m. Saturday and 84 percent closed Sunday.

Adviser backing American position

AUSTIN, Texas (AP)—An adviser to the Texas Energy Advisory Council says the old debate between those who favor increased domestic oil production and those urging conservation is "irrevelant and outdated."

"Political partisanship and petty provincialism must come to an end,' Austin attorney Frank C. Cooksey told a news conference Wednesday. "We must cease to think in terms of the 'Texas' position and seek to embrace an 'American' position." Gov. Bill Clements has criticized

Hearing set in two deaths

AUSTIN, Texas (AP) - The Texas Railroad Commission ordered three men Wednesday to appear at a July 31 hearing in connection with a natural gas leak that apparently caused the deaths of two teen-age girls near

The commission order noted the bodies of Janet Blair, 14, and Doris Holman, 15, were found lying face down in a dry creek bed near Loop 436, north of Carthage, on June 28.

The commission said there appeared to be a leak in a neaby oneinch pipe that transporte natural gas from the Hudson Johnson No. 1 well operated by Pennzoil Corp.

The plastic gas line was connected to a steel line installed by Dick Anderson, extending from the heater unit adjacent to the well, the commission said. It added that the gas line had been installed by J.C. Mangham and terminated at a house owned by Herman Milstead.

Commission tests on June 29 indicated the gas did not have enough odor to meet commission requirePresident Carter and urged adoption

of the "Texas Position." Cooksey is a member of the advisory committee to the energy advisory council, which originally adopted a policy statement on Texas' position in the energy crisis. Under Attorney General John Hill, Cooksey was in charge of energy matters in that department.

Cooksey urged Carter to consider a national policy based on federal law requiring production of American oil and gas at the maximum efficient

"Those found hoarding petroleum or petroleum products, whether at the production, refining or marketing stage, should face stiff penalties for failure to produce and market their product at maximum level," Cooksey

He said he had a feeling, but no proof, that some individual producers in Texas have been holding back oil production to get higher prices.

Cooksey urged the energy advisory council to recommend that Clements call a special legislative session to enact a mandatory statewide conservation plan, plus creation of a state agency to promote solar energy research. He said the conservation plan should include energy-saving requirements in private buildings as well as regulation of air conditioning thermo-

Meanwhile, Sen. Bill Patman, D-Ganado, issued a statement criticizing Clements for fuel allocation pro-

"Vital supplies of gasoline and diesel fuel are not coming to Texas farmers, and state government is responsible," Patman said. "Applications are stacking up at the State Fuel Allocation Office in Austin ... An entire year's crop can ruin if gasoline or diesel is not availble when it is time to harvest or to apply chemicals."

Carter to get authority

WASHINGTON (P) - Congessional energy leaders predict changed mood on Capitol Hill will give President Carter the standby gasoline rationing authority he wants.

Late this week or early next, the full House will take up a bill, approved Tuesday night by its Commerce Committee, that would give the president a variety of energy-conservation powers, including standby gasoline rationing.

The committee's approval marked the first action on any of the measures Carter outlined in his energy-policy addresses ear-

Under the bill, the president could impose rationing during a 20 percent oil shortage — with either chamber of Congress given the right to veto it during a 15-day review period.

He would also have the power to set state-by-state energy-conservation targets and to order motorists to leave their cars home one day a week in states not meeting the specified goals. These steps could be ordered whenever fuel shortages climbed above 10 percent.

Although the House rejected Carter's standby gasoline rationing plan by a bruising 246-159 margin May 10, leaders are extremely optimistic about the new plan - even though it contains powers beyond what was in the rejected bill.

xhouse Speaker Thomas P. O'Neill and other key energy legislators predict the rationing plan has enough support to

"The momentum is now going for the president. It's just a matter of seeing if it can be maintained," said Rep. Phil Sharp, D-Ind.

Russia eager to trade oil for cash, equipment

FORT WORTH, Texas (AP) — The Soviet Union is eager to trade some of its huge supply of crude oil for U.S. dollars and equipment, according to sources quoted in a copyright story in the Fort Worth Star-Telegram today.

Both American and Russian sources told the newspaper such an exchange would mean less uncertainty in the U.S. regarding oil availability and would permit Russia to develop segments ot its economy more quickly with U.S. help.

A side benefit of the exchange would be increased trust and reliance between the two nations and a relaxation of tensions raised by the Salt II debate, a source told the Star-Tele-

"I was told the U.S. could have as much oil as it wanted from the Russians," said an American oilman who works in Washington furthering the industry's interests. It could be "millions and millions of barrels a day,"

the source said. A Soviet official recently told a representative of the American Petroleum Institute to encourage American refiners to contact the Soviet Ebassy to discuss the possibility

of oil sales **BUT THE SOVIET** Union has never imported more than 30,000 barrels daily into the U.S., according to figures kept by the Central Intelligence Agency. That high point was reached in 1973 and probably won't be attained again if the sitcky industrial trade situation between the two countries doesn't improve, the source said.

According to the CIA, the Soviets have plenty of oil to trade. In 1978 they pumped 11.2 million

barrels daily while using only 8.4 million barrels. That compares with 8.7 million barrels daily being pumped in the U.S.-along side a U.S. consumption rate of 18.8 million bar-In 1977, the latest year for which

figures are available, the soviets exported 3.1 million barrels of oil daily. Their biggest customers were members of Eastern Europe's Communist bloc. Western Europe was the second busiest market for Russian oil and Cuba was third. One U.S. oilman said he was sur-

prised by the frankness with which a Soviet acquaintance told him recently that his country was more than willing to sell oil to the U.S "in exchange for hard cash."

SOURCES IN THE Russian diplomatic community here said there are two main reasons for publicizing their desire. First, the Soviets are becoming increasingly upset with the refusal of the U.S. government to sanction trade between Russia and U.S. firms--even when the U.S. firms want to

Secondly, oil and natural gas exploration and development is booming in eastern Russia, the Russians

The Soviets are in the middle of planning where this new oil go-either west toward Moscow or east to the Soviet coast, where it could be shipped by tanker to anywhere in the world, a source said.

"The more you're waiting-and I don't know for what-the more business the Russians will do for themselves and the more Russian oil and gas will be caught by Western Europe and Japan," a Russian official said. "Right now you're wasting important

is lost when it is sold to middlemenhas been coming into the U.S. for some time, he added.

"FIRST WE CONSIDER our needs," the Russian said when asked if his country had oil to sell, "Then we consider our trading partners." He said this means Eastern European

"It's up to our government to decide the priority," he said, adding that his government—the world's largest sources of oil-has plenty to sell. No numbers were mentioned, however.

"Our oil development can be done

Slick chart

CORPUS CHRISTI, Texas (AP) Coast Guard officials today plan to begin what will be the first comprehensive charting of a massive oil slick floating on the Gulf of Mexico as scientists continue to analyze ocean currents that may bring the body of

slime, said a Coast Guard spoke-

"We won't have any data which will. allow us to make any predictions until Tuesday," said Chief Petty Officer Richard Griggs. "That's as soon as we feel we can have an accurate forecast."

complete work on the map after three days in the plane.

The oil has been gushing into the Gulf at the rate of 30,000 barrels a day since June 3 from the Pemex-owned Iztoc I. There has been no significant movement of the slick reported in four or five days, when aerial photo-graphs placed it about 360 miles south-southeast of Brownsville.

on the basis of equality," the Soviet government official said. "But a lot of people in your country feel they must restore superiority," he added, bringing the military balance between the two superpowers into the conversation for the first time.

"We don't want to take the superi-ority over the U.S.," he said. "If your Senate rejects the (Salt II) treaty, my public will say for what purpose should we sell oil to the U.S.?"

Reaction in U.S. government circles to the Russians' apparent desire to sell oil was greeted with a healthy dose of skepticism.

"IT FLIES IN THE face of everything the CIA's latest intelligence reports showing the Soviet Union is in the middle of a mild energy crisis characterized with "brownouts" in the industrialized parts of their counAccording to the CIA, the Russian

oil supply is expected to peak this year and begin a long and slow decline, Department of Energy officials

The CIA has reported that by 1985 the Russians may even have to im-

A DOE official said the Russians could be looking for the new U.S. technology that has made drilling for oil on Alaska's North Slope feasible. Such conditions also exist where much of the newly reported Soviet oil

"Maybe we've got something they want," the DOE official said, meaning the U.S. technology being used to drill oil in Alaska. "Maybe that's what they are interested in," he

Texans criticize plan

DALLAS (AP) - President Carter's energy program came under bitter criticism from two Texans at the opening session of the 4th annual **Public Utilities Conference**

Texas Railroad Commission Chairman John Poerner said Carter's plan "is not what I call rational," contending government overregulation and "federally mandated artificially low prices" are at the root of the energy

"When we need oil ... we ought to talk to the oil men," he said. Poerner said the administration

has pushed for energy "at the lowest possible cost, no matter what the long-range result may be. "We are now experiencing a short-

supply we came to love and expect," Poerner said increased domestic oil production should be the "cornerstone" of an energy plan, and called for more federal lands for drilling and

age of the relatively cheap energy

increased nuclear energy produc-Poerner criticized the proposed

windfall profits tax, saying the \$142

billion "confiscation" is about five times as much as the gross value of

the U.S. crude oil production in 1978. Texas Power & Light President Robert K. Campbell called the national plan "a compromise mainly centered around regional interests" of the

A requirement that utilities inspect homes and arbitrate differences of opinion "will cost Texas Power & Light alone \$3 million per year," he

Campbell criticized proposals to set up interstate power networks, saying, "We bought the lifeboat, so how many people do we have to let on the life-

Campbell concluded that the program "shows a disregard for the facts of life in Texas." Hugh Lowet, deputy associate director for energy and science in the Office of Management and Budget, quoted Carter as saying "he will keep the pot stirred on this pro-

With a confusing overlap in responsibility among energy agencies, "the regulatory environment in Washington is very difficult for the president to deal with," he said.

Seven Permian Basin regions get locations for wildcat prospectors

Seven Permian Basin counties have feet where it was plugged.

gained wildcat operations. American Public Energy Co. of Dallas staked site for a 9,000-foot deeper zone wildcat in the Triple M (Wolfcamp, lower Wolfcamp) pool of Sterling County, 14 miles northwest of Sterling.

It is one location south of lower Wolfcamp production and one location east of Wolfcamp production. The drillsite is 660 feet from south and west lines of section 62, block 17, SPRR survey.

SUTTON WILDCAT

William Perlman of Houston No. 1 Lea Allison is a 6,000-foot wildcat in Sutton County, 14 miles east of Son-

The prospector is 660 feet from north and 1,980 feet from west lines of section 39, block B, HE&WT survey. Ground elevation is 2,262 feet.

The site is two and three-quarter miles southeast of the depleted Headquarters (6000 Strawn oil) pool.

CROCKETT PROJECTS

A new wildcat and a wildcat reentry have been reported in Crockett County

The new test is Dameron Petroleum Corp. of Midland No. 1-13 Laura Hoover Estate, 30 miles southwest of Ozona. Drillsite for the 7,600-foot opera-

trion is 3,144 feet from north and 554 feet from east lines of section 3, block NNN, Vance Vickory survey (some maps show W. P. Hoover survey). Ground elevation is 2,093 feet. The test is a wildcat above 4,000 feet

and a 3/4-mile northwest stepout to the Canyon gas pay in the American multipay pool. The wildcat re-entry is Vega Petroleum Corp. of Midland No. 1-74 New-

mont Friend five miles northeast of The project, the former Southland Royalty Co. No. 1-74 Newmont Friend, will be deepened to 9,500 feet from 8,440 feet where it was plugged

as a wildcat failure. The location is 1,915 feet from north and 1,320 feet from west lines of section 74, block GH, GC&SF survey. It is 3.5 miles south of the Parker-Harrell (Ellenburger gas) field and one and five-eighths miles northeast of the Ozona (Canyon gas) production.

NOLAN EXPLORER

Frost Oil Co., San Antonio, No. 1-246 White Hat Ranch is a new 7,000-foot wildcat in Nolan County, five miles west of Blackwell.

Ground elevation is 2,467 feet.

The drillsite is 660 feet from south and west lines of section 246, block 1-A, H&TC survey, abstract 1252. It is two miles southwest of the Sweet (Cisco 4035 oil) pool and three and seven eighths miles southwest of the depleted Blackwell, West (Ellenburger)

FISHER RE-ENTRY The Townsend Co. of Abilene will re-enter the former R. L. Foree of Dallas No. 1 R. R. Ragan in Fisher

County and deepen it to 5,100 feet as a wildcat. Force drilled the project to 5,032

Location is 467 feet from south and 1.931 feet from west lines of section 21. block 2, H&TC survey and one location west of the depleted Kemp (Canyon 4400 and Canyon) pool, four miles west of Roby.

STONEWALL TESTS A wildcat and two field area

projects have been spotted in Stonewall County The wildcat is Westland Oil Devel-

opment Corp. of Houston, 10 miles northeast of Aspermont. Scheduled for a 6,200-foot bottom, it is 1,980 feet from south and 660 feet from east lines of section 40, block D, H&TC survey and 2.5 miles northwest of the Old Glory, Northwest (Bend

but separated by Tannehill failures. Texas Pacific Oil Co., Inc., will drill two projects in the Frankirk, East (Canyon sand oil) area of Stonewall

from the Palo Pinto and Ellen-

TRAVIS SCHKADE

YOAKUM COUNTY

Will consider taking working interest in ap-

drill 162 oil and gas projects in the Permian Basin of West Texas and southeast New Mexico.

Forty-nine of the operations were scheduled in District 8 of the Railroad Commission of Texas. The district's Midland headquarters staff processed applications for seven wildcats and 42 field operations.

Mitchell County gained three of the wildcats, while Howard, Loving, Pecos and Reeves counties each gained one.

Ten of the field opera- 4,700. ions were spotted in ecos County, and Mit-aell gained three.

GARDEN CITY - In his youth,

Bennie Thomason "rode the range

from daylight to dark" for the W.L.

airplanes for a liying - he was a

the U.S. Army's 82nd Airborne Divi-

In his prime, he managed clubs for the Army, ran hotels and mingled

with hordes of people in over-crowded places from New York to Tokyo.

Now that he's retired, he's still

working. But he's in an unhurried

pace at Garden City — the hub of

of a sparsely-populated ranching

in the road" - Carterville, which is

THOMASON has been here since

about 1970, when he bailed out of his

30-year military career. He likes the

"Oh, I love it," he said and showed

He was casually donned in his cow-

hat, boots and jumpsuit and had

driven into town to close his City

Grocery store for the day. The clerk,

19-year-old Donna Lister, was looking

after it. Helping her was 13-year-old

Jim Lee, whose job of filling the

soda-pop boxes and sweeping out

the store had been pre-empted by

sitting, chatting and shuffling playing

cards. Anyway, it was almost closing

Their boss, Thomason, had just

driven into town with his visiting

grandson, Randy Smith, 13, of Ten-

this rural community.

Storekeeper prefers simple life,

SO, ABOUT 10 years ago, he shed his master sergeant's chevrons and

He bought some land and eventually got hold of a cafe, filling station and the grocery store. He sold the first two and kept the store, which his wife normally minds. His mother, Stella Gray, runs the swap shop next

His little ol' store has some of that old-timey trusting, country aura to it: charge accounts. Debts are recorded on those old pulp-paper charge pads. Cash 'n' carry is okay and preferred, but if the folks are short of cash, the pad usually consumates the sale.

"As long as I can afford to carry them (charges) for 30 days, they're just as good as gold," Thomason Most of his trusting has panned

"In the eight years I've been here, I think I've lost \$113, and you can't beat

The grocery store carries staple goods, but it doesn't pretend to be a supermarket. Major shopping usually is done over at Big Spring, which which is 27 miles to the north, or at Midland, which is 37 miles to the

The town's City Grocery store, though, carries "pretty much everything," said Miss Lister.

"We don't sell beer. A lot of people come in here wanting it. We're pretty far from everywhere.

"They (customers) just come in here and buy bread, milk and such stuff," she said.

NIGHT LIFE in Garden City is virtually nil - at least outside of the home, church and school.

But about 15 miles to the south, there's something to do sometimes. "You know that German communi-

ty down there?" Miss Lister asked. 'We go dancing there." Down south is St. Lawrence, a

eye, 4,900.

"When they get married, they have dances," she allowed.

"They have dances about every weekend," threw in Jim Lee. "I don't go to dances; my parents won't let me, anyway.

Miss Lister said she figured that there were about "20 kegs of beer" at each wedding party at the Catholic Church's Parish Hall.

That seemed okay with Jim Lee. 'I'd rather drink beer than dance," he said, in jest or not. "I don't get laughed at then.

And they all like Garden City, because good small-town living, and people from the larger places seem to view this community out in "no

where" as a novelty. Miss Lister came here from "up North" - Cleveland, Ohio.

"Yeah," she volunteered, "that's where I was born; I'm not a Yankee, though. I was just born there. Then we moved to Texas.

"I really like this town. A lot of people make fun of it, but I like it like it better than a big town.'

Jim Lee wasn't sure he agreed. "I don't know," he said. "There's certain benefits."

Bundy prosecutors finishing

MIAMI (AP) - The prosecution prepares to finish its murder case against Theodore R. Bundy today following a dentist's testimony that the former law student's crooked teeth match bite marks on the body of a

The case against Bundy, who is charged with killing two sorority sisters at Florida State University 18 months ago, is likely to be in the jury's hands by late next week.

As the final link in the state's chain of circumstantial evidence, prosecutors hope to show that Bundy left a telltale bite mark on a dying Lisa

Dentists Homer R. Campbell of Albuquerque, N.M., and Lowell J. Levine of Huntington Station, N.Y., were to take the stand today as the last prosecution witnesses.
On Wednesday, Dr. Richard Sou-

viron of Coral Gables, Fla., told jurors that Bundy's teeth match the double bite mark found on Miss Levy's buttocks.

Bundy's lawyers say they plan to call dentists to claim that at least five other sets of teeth could have made the marks.

Presiding Judge Edward Cowart said he expects the defense to finish by the middle of next week and hopes to send the case to the jury near the

end of the week. The trial is in its

photographs — one of the mark on Miss Levy, another of Bundy's unusually crooked, twisted teeth and another of a wax mold from the teeth. "Can you tell us with a reasonable

Souviron showed jurors large color

degree of dental certainty whether those teeth made the marks on those photographs?" asked prosecutor

"Yes sir," Souviron said. "They made the marks."

Souviron, a forensic odontologist who specializes in dental evidence, testified that he traveled to Tallahassee, Fla., a week after Miss Levy, 20, and Margaret Bowman, 21, were murdered at the Chi Omega house on Jan. 15, 1978.

He said he examined a section of flesh from Miss Levy's buttocks and a section of nipple from her breast. He said he took photographs of a double bite mark on the buttocks.

At that time, Bundy was a fugitive who escaped from a county jail in Colorado while awaiting trial in the 1975 murder of Caryn Campbell, 23, a Dearborn, Mich., nurse who was slain while on a ski vacation at Aspen,

Bundy has been convicted of kidnapping a young woman in Utah. And 12-year-old Kimberly Leach of Lake City, Fla., on Feb. 9, 1978. He was after Miss Leach disappeared. He also is being tried in Miami on three counts of attempted murder.

arrested in Pensacola, Fla. six days

Two other Chi Omega residents and a woman living in a nearby apartment were savagely beaten the same night the Levy and Bowman women were strangled and clubbed.

Prosecutors used a search warrant

to force Bundy to submit to dental impressions. Souviron said he made photographs and models of Bundy's teeth, then compared them to the mark on Miss Levy. Souviron admitted under cross-ex-

amination that it might be possible to find another set of teeth to fit the mark but said, "The odds of that are

Hooded witness begins testimony in Wood case

SAN ANTONIO, Texas (AP) - A hooded witness testified before a federal grand jury Wednesday in one of the first sessions devoted to the assassination of U.S. District Judge John Wood two months ago

Federal sources told the San Antonio Express the grand jury meeting was one of the most important since the 63-year-old judge was gunned down near his car May 29. The grand jury also has been looking into the attempted slaying of a federal prose-

After his appearance, the secret witness was spirited away by FBI agents through a secondary exit from the U.S. Courthouse. The panel heard from one other unidentified witness before adjourning.

Assistant U.S. Attorney Wayne Speck refused to identify the booded witness — who wore a mask fashioned from a grocery sack - but the grand jury session came just two days after FBI agents put Donald Ray Elliott under protection.

Elliott, 28, was arrested in Salt Lake City on May 31 and reportedly told police officials there he had information about Wood's assassination two days earlier.

FBI sources said Elliott was placed

under protection after his name and

became public. The grand jury has been looking into the Nov. 21 attempted assassination of Assistant U.S. Attorney James Kerr since February. Kerr escaped with only minor glass cuts after an assailant opened fire on his car as he drove to work.

the possible link the Wood killing

Wood and Kerr had both been involved in massive investigations into huge drug smuggling rings centered in El Paso. No arrests have been made in either case. A federal grand jury in El Paso has

been investigating narcotics trafficking and also has reportedly heard testimony on the Kerr shooting. Wood's stiff sentences in drug cases

had earned him the nickname "Maximum John." He was killed by a single .243-caliber bullet to the spine as he left his San Antonio townhouse for work.

Federal agents had operated with few leads in the Wood case until Elliott's possible link was reported Saturday in Salt Lake City's Deseret News. Federal prosecutors had earlier asked the news media to withhold the story to "preserve the integrity of

Boy's homecoming from hospital includes a visit to McDonald's

WILLIAMSTON, Mich. (AP) - A stop at McDonald's was the first item on the homecoming agenda for 3-year-old Sammy Perkins, the boy whose feet were severed in a late-June hay-mowing accident. Then, a quiet welcome and a house full of gifts

greeted Sammy Wednesday, on his return from Sparrow Hospital, where he had been staying since the June 23 accident. "The bedroom's kind of crowded with stuffed SOMEBODY CAN.

animals and toys," said Sammy's mother, Gloria. We're just trying to get organized.' Mrs. Perkins said the boy will return to Sparrow

Hospital in Lansing, Mich., for therapy three times a week. When his leg wounds heal - in about four to six weeks - she said the casts above his artificial feet will be removed.

The day of the accident, the boy was playing in a hayfield near his home when a passing haymower severed his feet above the ankles. His parents raced Sammy and the severed feet to the hospital, about 15 miles from their Williamston home.

Surgeons spent 61/2 hours trying to re-attach the feet. It was the first time two feet had been re-attached in one surgical procedure, hospital public relations spokeswoman Ann Heglin said. But when blood circulation could not be restored,

doctors had to remove the feet. At the time, hospital officials said the surgeons were "cautiously optimistic" but pointed out that the

Stock market rallies

NEW YORK (AP) - The stock market staged a finalhour rally Wednesday, wiping out most of the losses it had suffered early in the session amid consternation over the resignations of President Carter's cabinet and senior aides.

The Dow Jones industrial average, down by more than 5 points for most of the session, ended with a scanty gain of .08 to 828.58. Most stock prices and other indexes finished the day on the down side, however.

Experts attributed the late rally to recovery of the dollar and fall of gold prices from record highs in late foreign exchange trading.

The day opened with a massive drop in stock prices as traders reacted to the announcement late Tuesday that the members of the cabinet and senior White House aides had tendered their resignations, although it was unlikely that Carter would accept more than a handful of them.

Currency markets also reacted violently to the resignation offers, with the dollar dropping sharply and and the price of gold closing at a record \$301.125 in Zurich. But massive intervention by central banks calmed the curency markets late in the day, signaling to many analysts that the dollar's decline and gold's rise were not very solid and touching off the stock market's rally.

Declines outnumbered advances by a 2-1 spread on the New York Stock Exchange, where the composite common-stock index fell .12 to

NYSE volume was 35.95 million shares against 34.27 million Tuesday.

Southern Co. topped the most active list, falling 1/4 to 13% in a flurry of activity in the final hour of trading. Several gambling issues also made the active list: Caesars World rose 1% to 26, Bally rose 1% to 40% and Ramada Inn lost ¼ to 10%. The Standard & Poor's

index of 400 industrial issues fell .10 to 112.40, while the S&P 500-stock composite index lost .14 to 101.69.

At the American Stock Exchange, the market value index dropped 1.19 to 194.27. The NASDAQ index of overthe-counter issues lost .60 to 137.26.

AMARILLO, Texas (AP) — Trade slow throughout the Panhandle area Wednesday afternoon. Slaughter steers and heifers 25-50 lower. Feedlots reported limited inquiry from most buying sources. BUSINESS MIRROR

Economists expect recession worse than predictions

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) - With both the man in the White House and the chairman of the Federal Reserve Board conceding that recession is already here or about to arrive, the question of degree now becomes the debate. Many forecasters expect ecnomic prolems over

the next year to be worse than foreseen by the White House, and that apparently includes G. William Miller, a Carter appointee who heads the Fed.

Miller told the House Banking Committee this

week that he foresees a "moderate" recession, with the 1979 economy shrinking 0.5 percent to 2 per-His forecast also anticipates price increases of as much as 11 percent this year and 8.5 percent to 10.5

percent next year, and unemployment hitting 6.25 percent to 7 percent by late this year and 6.9 percent The White House forecast is for a 1979 decline in

output of 0.5 percent, a rise in unemployment to 6.6 percent by the final quarter, and inflation of 9.8 percent this year and 8.1 percent in 1980. Compared with the experience over the past decade, both reports describe a dismal picture, a deeply

damaged economy, particularly since inflation is seen as persisting at an unacceptably high rate. It wasn't more than a few years ago, you'll recall, that recession was viewed as a remedy - a painful one - for inflation. It was said that they opposed

each other, countered each other. Or so it was Other beliefs also have been trampled in recent weeks, notably the administration's view that the economy would luck through, despite the near-con-

sensus among private forecasters that a recession Many economists still challenge the White House estimates as being too optimistic. Citibank's newsletter, Economic Week, comments this week that is has become more pessimistic than many forecast-

While "the White House is telling the country that this recession will be mild," it states, "slow moving cash registers are telling a very different story.'

Since December, it observes, retail sales have dropped roughly 6.5 percent, or more deeply than in many full recessions.

'And if we hit a streak of bad luck," it concludes, 'this recession could vie with the last one (1973-1975) for the dubious distinction of being the deepest since World War Two.'

Merrill Lynch Economics has just warned executive clients: "Caution is the watchword. This is a time when orders are likely to be canceled, and when credit difficulties may well begin to surface.'

It's recession forecast, to which it assigns a 70 percent probability, "calls for three consecutive quarters of negative real GNP (gross national product) ... beginning with the second quarter of 1979."

Such forecasts have become typical in the past month or so, but there remain exceptions. Economists at Goldman, Sachs & Co., the investment house, have just issued a report questioning the recession forecasts

Gary Wenglowski, chief economist, suggests that the economic condition might better be described as 'stagflation," suggesting a stagnant economy and a very slow decline in the rate of inflation.

Wenglowski predicts a rise in output of 1.8 percent for the year, and another gain of just under 1 percent in 1980. He foresees consumer prices rising 10.3

percent this year and 9 percent in 1980.

Regardless of the definition, that and other forecasts describe a condition that the nation has seldom experienced and which, in fact, was thought by some to be beyond the realm of economic possibli-

Gas supply rising along with prices

HOUSTON (AP) - The price of gasoline is still rising in Texas, but more is available, a survey by the American Automobile Association shows.

AAA said in its weekly report of 418 service stations that gasoline supplies are much improved in the Houston and Dallas-Fort Worth areas. Average statewide prices rose from 0.9 to 1.5 cents

per gallon over last week's prices. The average price of diesel was unchanged at 89.7 cents a gallon. The AAA said 17 percent of stations surveyed in

Houston and D-FW will pump gas on Sunday, compared to only 7 percent last week. The governor's program - supplying more gas to stations in odd-even counties that agree to stay open weekends - apparently caused the improvement in

Sunday gasoline supplies. Fuel availability throughout the state improved for nights and weekends, according to the survey.

Last week 25 percent of stations surveyed were open Sunday, 23 percent pumped gas after 8 p.m. weekdays and 39 percent stayed open after 6 p.m. Saturday. Corresponding percentages this week are 30, 26 and 43.

The number of stations out of at least one grade of fuel declined from 4 percent last week to 3 percent

Only 2 percent of the stations reported limiting customers' purchases.

Gasoline availability improved dramatically in San Antonio, with 35 percent of the stations surveyed open after 8 p.m. weekdays and 25 percent open Sunday, compared to 18 percent weekday night and 20 percent Sunday openings last week.

Weekend fuel availability also improved in Austin; 14 percent of the stations reported open Saturday night and Sunday compared to only 7 percent last Sharp improvement in night and weekend fuel

supplies was reported in Beaumont-Port Arthur, while supplies remained stable and relatively abundant in Corpus Christi, El Paso, Waco and Midland-

AAA reported stations along Interstate highways in small towns and rural areas have good supplies of fuel. Evening and Sunday drivers, it said, have few problems finding fuel along the Interstate except near big cities.

Prices continued to increase this week, slightly more than last week's top increase of 1.1 cents per

Current average full-service prices (last week's average in parentheses) are: Regular 86.2 cents per gallon (85); unleaded 89.9 cents (89); and premium 91.7 (90.4).

Average self-service prices are: Regular 83.9 (82.4); unleaded 87.6 (86.3); and premium 88.9 (87.4).
