MADRID, Spain (AP) — Police shut down Madrid's subway system for two hours early Sunday morning and late Sunday night to search for evidence because of telephoned bomb warnings after two people were wounded in attacks that damaged three subway trains and wounded more than 100 others.

There were threats also to the capital's international airport, where a bomb was said to have been planted early Sunday morning and late Sunday afternoon.

A bus station in the southern edge of the city also was closed temporarily after a bomb threat was called in.

Firesman Alk Walsh gives the kick of life to revive a cat and found unconscious in a Machinery smoke-filled house in the Lower Ritz area of Wellington, New Zealand, today. He also gave the cat cardiac massage and oxygen. When the cat revived, he reached out with its paws and scrambled Walsh on the forehead. (AP Photo/Palmer)

Families return to flood-damaged homes; Federal aid forthcoming

The first of 2,000 flood insurance claims was a poignant one for the Carlsbad Caverns. It was signed by Dr. Joseph Smith, who was killed in the New Mexico National Park Service headquarters building in a fire caused by the Caverns' longtime employee, John A. Spenkelink.

Smith's brother, Dr. John Eyre, an older man of 60, signed the form in July 1974 after the fire. Eyre said he and his brother were both insurance agents in Carlsbad.

So far this year Exxon has earned 726 million dollars from its oil and natural gas operations in the U.S.

To do this we sold the equivalent of 18 billion gallons of petroleum products.

That works out to be a profit of 4 cents per gallon.

In the same period, we invested 833 million dollars in the U.S. to find, produce and deliver petroleum products to our customers in the future.

Details available on request from Exxon, P.O. Box 8116, Trenton, N.J. 08650.
**American duplicates sophisticated ancient Greek mechanical device**

**By EALY NELSON**

**NEW YORK**—The device appears likely to have had "high-tech"
bonnets of 1st-century BC, one such as an 18th-century
machine, he told the 32nd American Society for the
History of Technology. He also gave evidence that the
mechanical device, manufactured by Robert Deroski
computer of his home towns in
New Jersey, is to be exhibited at
the Brooklyn Museum, and will be
shown at the Metropolitan Museum
of Art in New York City.

The device is a mechanical
representation of the Metonic cycle,
which was used by ancient Greek
astronomers to calculate the phases of the moon and the
years of the ancient calendar. The cycle was based on
the observation that the moon takes 23.5 months to
complete a cycle of phases, and the years of the ancient
calendar were based on the observation that the sun
takes 19 years to complete a cycle of phases.

**Investment clubs offer chance of buying stocks without brokerage fees**

**By JOHN CUNNINGHUFF**

**NEW YORK** (AP)—If you don't like paying brokerage
commissions, you can still buy stock in a new kind of
investment club with a membership of less than 10
people who will do the buying for you.

The clubs are being formed
through the National Association of
Investment Clubs, which has 250,000
members and 1,300 clubs. The
clubs are allowed to form under state
law and operate without a bank
account.

The clubs will invest in
companies that are well known
and have a good record of earnings.
They will not pay commissions to
broker-dealers.

But first, the details.

Marketing executives have plans that mesh their customers'
knowledge of stocks, either
by offering training programs or
by using their own staff of
investment advisers.

If a person bought only one
stock, it would probably not be
qualified for investment, the
clubs are expected to make
money on a small scale, but
the service could become so popular
that it would be profitable
for the clubs to charge a minimum fee,
per share of stock.

Where's the National Association
of Investment Clubs going with this?
New York is to buy stock for
members of the clubs who have
money to invest in an item
that each member purchased.

The clubs are essentially
struggling to be a for-profit
business that offers
investing opportunities for
individuals who are not
affiliated with a broker-dealer.

Gasoline shortage creates
king-size boom in varoom

**By JACK SCHREIBMA**

SAN FRANCISCO (AP)—The gasoline shortage today is
producing a far cry from the oil-dripping and
rubber-stamped booming of the past. Gasoline is
now a luxury product, not a panacea for the
gasoline crisis. But the rapidly rising prices of
varoom are creating a new kind of
business that is attracting millions of people.

Miss Cynan, a retired Lame Live School principal, was born in Galveston. She taught in Lee County schools for 38 years, where she served for six years as Assistant Superintendent. She is a member of the American Federation of Teachers.

Snoppers plans conference on child care home

By The Associated Press

A conference for those interested in starting child care homes will be held next month in Laredo.

The conference, sponsored by the Texas Department of Human Resources, will be held June 26 and 27. It will be limited to those who are interested in starting child care homes in the area.

Snoppers, who is a social worker, said that the conference will provide a forum for those interested in starting child care homes to share information and to discuss the issues involved.

In scheduling the conference, Snoppers said, "I want to make sure that those who are interested in starting child care homes have the opportunity to learn as much as possible about the process before they take on the responsibility of care for children."

Hearing to determine cause of Chicago DC-10 crash opens today

By The Associated Press

ROSEMONT, Ill. (AP) — A National Transportation Safety Board hearing to determine the cause of the Chicago DC-10 crash will begin today.

The board will investigate the cause of the crash, which killed 270 people, aboard a flight from Chicago to London.

In the hearing, the board will hear testimony from experts in aviation and accident investigation.

Investigations have centered on whether the crew of the DC-10 was properly trained and whether there were any mechanical problems with the plane.

The board's final report is expected to be released in about six months.

WASHINGTO/N (AP) — Sen. John Tower is using a hearing on the SALT II treaty to promote a new strategy for the arms control talks.

The committee believes its hearings on SALT II last month showed that the United States needs to take a more aggressive approach in the talks.

Tower said he would not support any treaty deal unless it dispels anxiety and doubt about our country after the so-called assassinations committee was the need to study the issue further.

The committee heard from experts and decided to study the issue further.

NEw York (AP) — The story has been told that when Henry Ford took his first ride in a car, he noted that the man behind the wheel had no hands. Ford, of course, had already built a car that could be driven by a person with any number of hands.

The Ford story is a good example of how technology is changing the way we live and work.

In the past, people were limited by the technology available to them. Today, technology is changing the way we live and work, and we are on the threshold of a new age of productivity.

WASHINGTON — Senate Majority Leader Bob Dole of Kansas and House Speaker Thomas P. O’Neill Jr. of Massachusetts plan to introduce a bill designed to halt the flow of gasoline to the Soviet Union.

Both leaders said they were concerned about the potential fuel shortage caused by the continued shipments of gasoline to the Soviet Union.

"We are closely monitoring the situation and will take appropriate action if necessary," Dole said.

O’Neill added, "We want to ensure that the United States does not become dependent on foreign oil."

The legislation, which would prohibit the export of gasoline to the Soviet Union, is expected to be introduced later this week and is likely to face strong opposition from the Reagan administration.

Dole said the bill would be based on the principle that "the United States should not be used as a source of energy for those who seek to use our resources for their own gain." He noted that the Soviet Union has been a major purchaser of American oil.

O’Neill said the bill would also address the issue of the growing reliance on foreign oil for energy needs.

"We must ensure that our energy supplies are secure," he said. "We cannot afford to become dependent on foreign sources of energy."
Chip Carter predicts re-election for father

NASHVILLE, Tenn. (AP) — Carter said Sunday night he believes his father will be re-elected.

Carter said he was confident that his father, President Jimmy Carter, would be re-elected for a second term.

New law threatens ETS’ veil of secrecy

By DAVID BIRD

PRINCETON, N.J. (AP) — Pay more than two decades. Educational Testing Service has operated in secret at Princeton.

Says that some of the nation’s medical schools and the 60-deadline, 100-pressure, standardized tests are being kept from the public.

Under the law, anyone is entitled to see the test materials in New York after Jan. 1. New regulations were adopted after the lawsuit was filed.

Standardized testing industries, whose profits are largely made from sales of test materials, must open their test materials.

Connally saved some of his best lines for the Indiana Young Republicans convention here Sunday. He said he would resign if he loses the Democratic nomination.

Said: "I don’t think it’s going to happen. I expect these people to be pretty effective, and I don’t expect them to change the laws of physics and get a second term for me."

Braak, Lee separating

BRAKLIN, Conn. — Robert Braak, 37, and his 37-year-old wife, Elizabeth Lee, 37, have announced their separation.

"I don’t think it’s going to happen. I expect these people to be pretty effective, and I don’t expect them to change the laws of physics and get a second term for me."
