# Midlanders 'tie a yellow ribbon' for the hostages

#### **By SUE FAHLGREN** Staff Writer

It's just a little more than two weeks before the American hostages in Iran will celebrate their first anniversary in DAY 351 captivity. But across America Saturday, the Jaycee-ettes made sure no one would forget the 52 scattered throughout Iran.

At Midland Park Mall, the Midland Jaycee-ettes distributed some five miles of yellow ribbon ties free to mall patrons and collected hundreds of signatures on sheets of yellow paper to be sent to "the government of Iran." By noon, more than 30 pages had been filled with

names. Most Midland shoppers accepted the tiny bows being pinned to their shirts. But, some others were obviously skeptical.

One elderly couple went by the stand eyeing "Freedom for the Hostages" sign suspiciously. They read the bows were free and watched several people get pinned. They turned and stared at one another and then back at the ribbon-wearers. Then they shook their heads sadly and walked away,

(See MIDLANDERS TIE, Page 2A)

It seemed like everyone was wearing yellow ribbons at Midland Park Mall Saturday. Even Yoda, a character from "Star Wars - The Empire Strikes Back," proudly displayed a ribbon for the hostages in Iran. Pinning Yoda is Jaycee-ette Karran Martin. (Staff Photo by Edward McCain)

UNITED NATIONS (AP) - Iranian Prime Minister Mohammad Ali Rajai, expressing sympathy with the families of the 52 American hostages, said Saturday a decision by the Iranian Parliament on the captives' fate is 'not far away."

Rajai also said he believed the United States "in practice" has apologized for its support of the late shah.

"All it needs is probably to put something on the paper," Rajai said in seeming to soften Iran's demand for an apology as a precondition for release of the hostages, who on Satur-day spent their 350th day as prisoners of Iranian militants.

He made his comment about a decision by the Majlis - Parliament -being not far away when he was asked at a news conference if the problem could be solved before the American presidential election on Nov. 4. That will be

VANCOUVER, Wash. (AP) -

Mount St. Helens confirmed scien-

tists' predictions Saturday with its

air, scientists said.

the first anniversary of the seizure of the hostages at the U.S. Embassy in Tehran

Hostage decision near,

Of their families, Rajai said, "I know how they feel and I know how they suffer ... I know this well because I myself was a prisoner .... I know also when a person is kept against his will in a foreign country, the grief is much harder.'

At one point, he put his bare right foot on a table to show reporters where he said he had been tortured by Shah Mohammad Reza Pahlavi's secret police.

Reporters seated near the table saw no visible scars on the sole of the foot. One of the prime minister's aides, Ali Shams Ardakani, told journalists Friday, "The man who comes here has no toenails," referring to Rajai being tortured while imprisoned by the Savak secret police.

Rajai seemed to set new conditions when he said the United States would greatly improve prospects for freeing the hostages by removing its radar planes from Saudi Arabia, its warships from the Persian Gulf and by ending military aid to Jordan, which is backing Iraq in its war with Iran.

Such American military measures created "obstacles to a solution of the

#### Related news, Page 6D

problem," the prime minister said. "When our people look at this, it would be very hard for them to become convinced to get ready to solve this problem, and it creates impasse and resistance in them," Rajai said a day after he went before the U.N. Security Council and accused the United States of using its radar planes

to feed information on Iranian troop movements to Iraq.

U.S. Ambassador Donald F. McHenry denied the charge as "unfounded and untrue."

When asked if Iran still insisted on an American apology as a precondi-tion for the release of the hostages, Rajai replied:

"The passage of time and what we have heard from the responsible people in the government and from other officials close to the American government, which has been relayed to us - for us it seems that this condition in practice already has been conveyed. All it needs is probably to put something on the paper."

The Iranian prime minister, re-garded as a Moslem hardliner, did not say whether this meant Iran would be content with a detailed report on U.S.-Iranian relations during the 37year rule of the shah that is being prepared by the Carter administration. The deposed monarch fled his country in January 1979 during the revolt and died of cancer last July in Cairo, Egypt.

Rajai left open the possibility that the Iranian Parliament still might insist on an apology. If so, he said, it would be the "easiest condition" to meet and would have "humanitarian and moral value" as well as "set a precedent for the prevention of interference in the future .

Iran has charged that the United States has interfered in its internal affairs since the CIA helped restore the shah to his throne through a 1953 coup against the leftist goverment of Mohammad Mossadegh.

There was no immediate comment on Rajai's statements from the U.S. State Department in Washington.

# Mount St. Helens continues to erupt

### Ash from five eruptions drifts toward Oregon

Management Agency, described as a three-minute "toot."

Later in the day, observers reported that a new lava dome or plug was quickly forming in the throat of the crater, but scientists repeated their warning that there was no indication the latest series of eruptions, which began late Thursday, had ended.

Light winds wafted the initial plume, carrying a "heavy" load of

ash, in a southeasterly direction toward northcentral Oregon, said Frank Menard, a U.S. Geological Survey geologist. Ash from Saturday's second brief eruption also moved in that direction, officials said.

Four minutes of harmonic tremors, rhythmic vibrations which scientists say signal the movement of molten rock within the volcano, preceded the day's first eruption, which came in two pulses, said FEMA spokesman Phil Cogan.

That eruption tapered off within a half hour, said Ken McGee, a U.S. Geological Survey geologist. Harmonic tremors lasted until 12: 51 p.m., McGee said, and were succeeded by small conventional earthquakes.

Scientists had warned that the volcano had given no indication it was ready to go back into dormancy.

"We are still in an eruption alert," Craig Weaver, spokesman for the University of Washington geophysics center in Seattle, had said Saturday just hours before the noon eruption.

Scientists said they were waiting for a "seismic signoff" from the mountain before declaring the eruptive phase ended.

# Free press battle

#### By WILLIAM RANDOLPH HEARST JR.

Editor-In-chief, The Hearst Newspay

SAN DIEGO -This past week has been an extraordi nary period in the continuing struggle for a free press.

Activity on this important battlefront spanned the world. While this charming California city played

host to those of us HEARST who belong to the Inter American.

Press Association (IAPA), the Yugoslav capital of Belgrade was the scene of the biennial meeting of the United Nations Educational, Scientific and Cultural Organization (UNE-SCO) seeking to establish a "New International Order" of news and information.

Although it will be some time be-

fore we can appraise fully what has been happening in Belgrade, some-thing truly significant did happen in Washington. The President signed an historic bill prohibiting unannounced searches of newsrooms except under unusual circumstances. Jimmy Carter deserves a vote of thanks for pushing this much-needed legislation, as do the House and Senate for pass-

ing it by wide margins. This unusual coincidence of journal-istic news in a single week does not

**Editor's Report** 

mean that a lot of problems have been solved overnight, or that the people's right to know has suddenly spurted in the right directions everywhere. More of our press problems have been iso-lated and clarified, though solutions are still not readily at hand.

Despite succeses like the one in Washington, there are miles to go before we can rejoice in free-press

#### (See EDITOR'S REPORT, Page 2A)

# 'The smell of raw sewage is overwhelming'

#### By KAY CRITES Staff Writer

and Wadley Avenue, the smell of raw sewage is almost overwhelming as it flows down the drainage channel parallel to Lamesa Road.

that runs alongside the drainage channel, and Lamesa and Wadley is not the only area affected. According to Fred Baker, director of Public Works, there are several leaks along the chan-

age channel," he said, "such as Dormard Ave-nue and the drainage channel."

to replace the pipes, but the contractor ran into financial difficulties and could not complete the project. The city approached the contrac-tor's bonding company to finish the project and ended up buying the remaining pipe. The project should be completed by next Sun-

day, Baker said, since it only lacks 60 feet. But that doesn't mean an end to the smell. The problem of the sewage already flowing in the channel will remain.

Baker said the city will pump the standing sewage out of the ditch, and then go in with moving equipment to remove any saturated soil and replace it to reduce odor and health problems caused by contamination.

However, when that will be done depends on the weather.

"I've no idea how long it would take. If it doesn't rain so we can get in there and do it, it won't take long. If it continues to rain, it will be

quite a problem," Baker said Residents in the smelly areas will be relieved, to say the least, upon completion of the project. Thomas Pride and his family live at 414 E. Wadley Ave., directly next to the drainage chan-

nel. The smell permeates the house. He said several of his neighbors had called the city to complain and even talked to Mayor Thane Akins about the problem, which began back in March. In fact, a petition is being discussed. "Some nights," Pride said, "you can drive through there and even see it (sewage) in the streets where it's backing up. Friends say, 'I can't come your way anymore because of the smell.

'We're really in a fix because we're right next to it. Sometimes I come home and the smell's all through my house. It just lingers in the house."

Pride took a moment then to muse on whether the smell had permeated the carpet and drapes, a continuing reminder even after the ditch is cleaned. "It's possible."

"I think sometimes I go to work and I smell my clothes. It seems I still smell that smell. It does get into our clothes.

"During the hot summer months, it created a really big problem with the mosquitoes and even the flies during the day."

Pride and several other residents to the south of Wadley said they had never seen the city spraying the south end of the drainage ditch. Dorothy Scott, 408 E. Wadley, said she had

called the city this summer to complain about the mosquitoes and flies. "We live so close to it it's really a nuisance to us. It's really a health problem.'

Mamie Williams lives on the corner of Shandon and Lamesa. The drainage ditch runs diagonally toward her house and is "just across the street" in two places.

She said she called the city, and they told her they would "get to it when they could." She said they did not explain the problem, but she added that the city had tried repea-tedly throughout the summer to remedy the situation.

"Under normal conditions," Baker said, "this would have been completed by May or June and we would not have encountered a problem."

### Test debris due over West Coast

WASHINGTON (AP) - Radioactive debris from a Chinese nuclear bomb exploded in the atmosphere last week was due to arrive on the West Coast Sunday morning, the Environmental Protection Agency said late Saturday.

Hi Le Pre Otlà 8 58 .29 cdy 3 27 clr 3 93 clr 6 0 cdy 6 0 cdy 6 7 .04 cdy 6 8 .13 TH 6 2 .22 TH 7 0 .48 cdy 2 9 .01 cdy 7 0 .48 cdy 2 9 .01 cdy 7 0 .48 cdy 2 9 .01 cdy 7 0 .45 cdy 3 1 clr 5 4 .28 cdy 7 0 .45 cdy 3 0 .03 cdy 5 4 .06 cdy 5 5 .03 cdy 5 5 .03 cdy 5 5 .03 cdy 5 5 .04 cdy 5 5 .04 cdy 5 5 .03 cdy 5 5 .04 cdy 5 5 .05 cdy 5 5 .04 cdy 5 5 .03 cdy 5 5 .04 cdy 5 5 .03 cdy 5 5 .03 cdy 5 5 .04 cdy 5 5 .05 cdy Martha Casey, a spokeswoman for the agency, said the latest information indicated the cloud would reach the West Coast at 6 a.m. EDT Sunday.

Authorities predict the invisible radioactive cloud "will straddle the Canadian-U.S. border for a while and...cross over the rest of the states in a couple of days," she said.

The air mass is about 500 miles wide and traveling at altitudes of about 40,000 to 60,000 feet, said Ms. Casey. .58 clr .01 cdy cdy .03 cdy .03 cdy .87 cdy .57 cdy

Behind the air mass is more debris, which is traveling at a lower altitude and which is not due to arrive in the United States for several more days, she said.

The EPA had said last week that it did not "anticipate any significant health risk" from the atmospheric explosion conducted at the Lop Nor nuclear test site in Northwest China. Thetsize of the explosion was put at 200,000 to 1 million tons of TNT, making it at least 10 times the size of the atomic bomb detonated in 1945 over Hiroshima, Japan.

The agency also said slight increases in radioactivity would be detected at ground level during the next few weeks that portions of the nuclear air mass were over the United

Ms. Casey said the agency had

# Hoover authored FBI's letter campaign to discredit Panthers

NEW YORK (AP) - J. Edgar Hoover, the late FBI director, ordered agents to write fictitious letters to sympathizers of the New York Chapter of the Black Panthers in the 1960s and early '70s in an effort to discredit the group, according to doc-

uments released by the agency. The documents also revealed that Hoover attempted to create discord among the Panthers and their sympathizers and ordered the FBI's New York bureau to cultivate black journalists for this purpose, according to reports in Sunday's editions of The New York Times and the Daily News.

On Aug. 25, 1967, Hoover set out on a self-described "counter-intelligence endeavor ... to expose, disrupt, misdirect, discredit or otherwise neutralize the actvities of black nationalist, hate-type organizations and groups, their leadership, spokesmen and supporters, and to counter their propensity for violence and civil disorder," according to the documents.

The papers said some of Hoover's

targets included Panther leader Huey, Newton and radical philosphy professor Angela Davis. Hoover, who died in 1972, instructed agents in New York to send letters critical of the group to guests at a 1970 Black Panther fundraiser at the home of composer-conductor Leonard Bernstein.

Hoover authorized that the letter, mailed Feb. 27, 1970, outline the "Black Panther Party's anti-Semitic posture" and that it be signed "with an anonymous name with additional phraseology such as 'a concerned and loyal Jew,' or other similar phraseology," the documents said.

The FBI documents were made available under the Freedom of Information Act to attorneys for Richard Moore, a former leader of the Black Panther's New York chapter. He was convicted in 1973 for the attempted murder of two police officers and is serving a 25-year prison term. Moore, now 36, has filed a civil suit

against the FBI, former President Richard Nixon, former Attorney General John Mitchell and other former

felt. It is like the old Legion of Decen-

federal officials, charging he was framed for the attempted murders of officers Thomas Curry and Nicholas Binetti.

The suit, filed in 1975, is being heard by U.S. District Judge Mary Johnson Lowe in Manhattan.

Among the New York black journalists listed in the bureau memorandum for possible use in Hoover's endeavor were Bill McCreary of WNEW-TV, Gil Noble of WABC-TV, Melba Tolliver of WABC-TV, Lester Carson of The Associated Press, Denton Watson of United Press International and Stanley Scott of WINS radio.

Noble said Saturday that he could not identify T.J. Harrington, author of the FBI memorandum. Scott. now a vice president of Philip Morris Corp., said the name Harrington "doesn't ring a bell," the Times said.

Carson and Watson, no longer with the news services, could not be reached. McCreary said he "had never heard of Harringon."

**Extended** forecast

## More fair weather forecast

The forecast for the end of the weekend and the beginning of the work week is fair weather.

The high for today and Monday should be near 70 degrees, with tonight's low dipping into the low 40s, according to the National Weather Service at Midland Regional Airport.

Winds should be light and variable in direction with an estimated wind speed of 5-10 mph.

Saturday's high of 73 degrees provided many Midlanders with a chance to break the ground on some fall gardens. However it did not break the 1936 record high of 90 degrees.

Saturday morning's low of 55 degrees alsomissed the 1966 record low of 35 degrees,

favorable comments about the ribbons.

help them is great.

bemoaning the ramifications of expressive politics.

The Weather Service recorded a trace of rainfall in its gauge early Saturday morning, but that small bit of precipitation did not change the yearly total which remains at 15.71 inches.

A tornado was reported near Houston Saturday as heavy rains deluged the southeastern portion of the state, flooding underpasses in Beaumont with surging water up to 20 feet

deep. The tornado did not touch down and no damages were reported, Deputy A.D. Jordan of the Harris County Sheriff's Department said.

A tornado watch encompassing parts of Southeast and South Central Texas warned residents to be alert for tornadoes.

#### alerted its nationwide air monitoring system and would begin taking milk samples for laboratory tests of radioactivity. Milk is particularly sensitive to radioactive fallout.

"State health officials are free to take any precautions they choose if the; feel it is necessary," she said. She said "there would be concern" with a "washout of clouds" - rain or snowfall - which could wash the radioactivity to the ground.

"But we've not experienced any such problems in the previous detonations .... The air mass that is going over now should be above our cloud cover so there shouldn't be as much of an opportunity for a washout," she said.

She said, however, the chance would be greater for snow or rain to wash the radioactivity from the debris following the main cloud at a lower altitude.

"We've never had any really serious problems. The readings have never been high enough to warrant any serious precautions," she said.

One partial solution might be for the IAPA to work more closely with most of our discussions here in San the State Department, which could Diego the last few days, provides mark passports in a manner to tell tourists the state of the press, free The IAPA is a noble organizaor censored, in nations they were to tion, having for 50 years been the visit. r Western Hemisphere's most vigilant

> Certainly there must be other ways to bring pressure on governments, but this might be worth a try. I have been urging such a move for some time, but the suspicious and adversary attitude the press feels towards governments everywhere keeps the IAPA from asking for help from even our own government.

> Over the years the IAPA has been led by some of the most respected and courageous editors and publishers in the Americas. This pattern bodes well for its future, their successors who will carry on from San Diego can affect the destiny of hemispheric journalism in our time.

A dramatic moment in last week's IAPA assembly was a telephone conversation between the convention in San Diego and collegues in Belgrade. Ideas and hopes were exchanged in a manner to bring the two groups together in a common cause.

One thing San Diego learned from Belgrade is that there is renewed hope for blunting efforts by the Third World and the Soviet Union to get governments involved in gathering and disseminating the news.

A report compiled by the previous UNESCO meeting in Paris two years ago has been significantly watered down. The revised document being discussed in Belgrade this month was prepared by UNESCO's **Commission on World Information** and Communications Problems headed by Ireland's former foreign minister, Sean MacBride. It states that UNESCO is against censorship, but to a lot of us that seems like a rather shallow statement. The fine print does not bear that out.

There is still talk about failure of four large news agencies to report the good news of development projects in Third World nations. A failure Third Worlders say can be corrected only by more "balance." That means more involvement by Third World governments.

UNESCO proposals in the past two years have included so-called protection of the press by licensing journalists, guidance of officials in determining the nature of news, and other forms of management. Much of thiscan lead to censorship, no matter by what name we call it.

One conspicuous characteristic of this past week was the presence of a lot of good soldiers manning the ramparts of a free press.

One who has been known and admired in the profession for a long time is George Beebe of the Miami Herald. He is a long-time leader of the IAPA as well as executive director and

.

former chairman of the World Press Freedom Committee, and has served with distinction as a coordinator of free-press efforts.

Another is Elie Abel, Stanford professor and veteran newspaper newsman who once served as dean of the Columbia School of Journalism. As one of our delegates to the UNESCO conference, he rose to object to the idea of "protecting" the press, or allowing governments to impose the wills of the news-gathering processes. He asked:

"Why, one may ask, does UNESCO persist in the role of international nanny, a role for which it is poorly equipped?"

No one can accuse Mr. Abel of being completely negative. He and the United States delegation support "a long list of recommendations that would give voice to the voiceless, including particularly women ... we favor the establishment of community presses in rural areas and small towns and the development of national and regional television production centers to reduce dependence upon foreign program sources."

This can be done, Elie Abel and lot of the rest of us believe by independent and free enterprise systems, and without any "nannies" looking over journalists' shoulders. Here again our government could help by earmarking taxpayers' money it contributes to the international monetary fund and the World Bank for specifics we wish to sup-

Back here in San Diego, listeners to those long-distance telephone reports were happy to hear that western delegates in Belgrade were hoping to work out a new spirit of cooperation with other UNESCO nations.

They expressed a desire to help less fortunate peoples in every feasible way, but one thing they will always resist is the tinkering with the content of news through governmental regulation.

This is the principle that needs to be defended at all costs, not for the benefit of the press, but for the benefit of the people. And their need and right to know all points of view. Thus informed, the citizens of the countries can decide the truth for themselves.

it could be a majority - a group of people - saying something," Mrs. McDonald said, things can be done.

Amy Eudy of Rusk Elementary, School said the ribbons were pretty. "I like She said she was wearing it to "free the hostages." 'em.'

Her friend, Kristie Adams, however, said she was wearing one for a simpler reason: "'Cause you don't have to pay for them." But, she added, "it might help.'

A third friend, Kendall Collins, said she thought the hostages might be returned soon, "if the President can do anything about it." She suggested he go

Rick Fresquez said, "I think it's great." He said he didn't think the ribbons or the petition would bring the hostages back. "It just makes people aware of the

His friend Judd Sturm agreed. "I don't think it's going to do anything," but he dded he would wear the ribbon and had signed his name.

James Swihart was a little more vocal about the situation in Iran. "They hould have blown Iran up a long time ago," he laughed. When asked why he vas wearing the ribbon and signed the petition, Swihart said, "I just done it!" Then, he added, "'Cause I'm a loyal American citizen and I think they should

dded that he expected the hostages to "come home in little boxes" when the ranians finally released them. But, Hernandez said he would wear the ribbon to show that we care. ... that people here support them (the hostages)."

'know that we still care about them."

Genie and Bob Coonce were serious about the ribbons. "I think it's a good

However, neither felt the hostages would be released any time soon. "I never nave felt like they (the hostages) were going to get out," Mrs. Coonce said.

getting the hostages released, but he said, "I think it's a good idea. It shows that people are still thinking about it (the situation)."

Barbara Blocker even took an extra ribbon for her husband. "I think it's a great idea," she said. She didn't think it would help get the hostages released, but she said, "it can't hurt anything. It's a way perhaps that we can show support in this area - in Midland." She added that if enough people signed the petitions, "maybe we can stir up a little something.""

Hilda Rodriguez and Sally Carrillo said they thought the ribbons were a "pretty good idea." Their friend Abby Zuniga said she "hopes it does" help get the hostages freed.

Sylvia Heredia, another friend, said she liked the idea. "I think they (Midlanders) should do something with the houses - like with ribbons or flags, you know," she added.

According to the Jaycee ettes, at least one Midlander did on Saturday. Pat Conway, of 4622 W. Cuthbert Ave., decorated her trees and bushes with 52 yellow bows.

et out."

### "I think it's great," Dee Hanks of Midland. "We hope they (hostages) get Joan Zimmermann, who was with Mrs. Hanks, said, "Anything we can do to there and shoot the captors. Gladys McDonald said she thought the petition was a good idea, too. "Anytime problem."

Midlanders 'tie a yellow ribbon' for hostages

His friend Chris Hernandez said, "I don't think they're going to get out." He

# \$2 billion in oil overcharges reported

WASHINGTON (AP) — American consumers have been the House Commerce subcommittee on oversight and investi-overcharged more than \$2 billion for oil products over the past gations. two years because middlemen fraudulently claimed their oil came from marginal stripper wells, according to a congressional report issued Saturday.

Stripper wells, defined as those that produce less than 10 barrels of oil a day, have been exempted since 1976 from price controls that apply to other forms of domestic oil. Prices for stripper oil are therefore near the higher world level.

Since January 1979, there has been a massive and continuing illegal switching of crude oil by resellers from price-con- had issued two notices of probable violations to oil resellers foreign oil increased dramatically in 1979 - and stripper oil

The report, entitled "the Case of the Billion Dollar Stripper," also criticized the a single crude oil reseller for violatig that it had not cited a single crude oil reseller for violating prt it had not cited a single crude oil reseller for violating pricing regulations, a single crude oil reseller for violating pricing regulations, the rgle crude oil reseller for violating pricing regulations, the report said.

Recently, however, the department opened new audits and trolled categories to the stripper category," said a report by who allegedly classified controlled oil as stripper oil, the rose along with it.

report added.

The subcommittee said that since the pattern of misclassification began to appear in 1979, consumers have been overcharged more than \$2 billion for oil products, with over \$1 billion coming in the first half of 1980.

"Our report describes a wholesale rip-off of American consumers," declared Rep, Bob Eckhardt, D-Texas, subcommittee chairman.

The report said the problem developed when the price for

Even the Afghan women and young girls participate in the resistance, he said. But many Afghans are being slaughtered. Already casualties have surpassed 500,000.

GOURIET ALSO pointed out the vulnerability of Somalia and said that if the Soviets reasserted influence there they could encircle oilfields in a pincer movement and prevent any oil from reaching the western world.

Though the outlook is bleak, Gouriet doesn't feel it's hopeless. "If we in the West can hold 'out long enough and stand firm, the whole Soviet communist edifice will eventually crumble from the inside." Poland is the latest example of the

desire of countries to break from underneath the Soviet umbrella, he said.

Gouriet obviously has great respect for the Afghan:s who continue fighting despite seemingly insurmountable

PAGE 4A

John Gouriet brought his message to Midland late last week. The message: On Nov. 4 Americans will have an opportunity to shape, the course of coming events by their selection of the next president. The man they choose, he says, should be one "who has the guts and who represents the native guts of your country.'

Gouriet, who formerly served on the operational planning staff in the Ministry of Defense in London, didn't specifically endorse any particular candidate seeking the American presidency; he said that for him to attempt to do so would be awfully presumptious.

But he admitted that he has not been impressed with President Jimmy Carter.

Gouriet said he has been "disappointed with Carter's failure after such initial promise in 1976" and that he is"deeply concerned that we should have the strongest possible leadership at this moment of great crisis in our history."

**SPEAKING** authoritatively with numerous references to current world events, Gouriet painted a scenario in which the Soviets could gain control of world oil supplies and then present the American president with an ultimatum. The choices, he says, are not pretty. But that's the final chapter and things can still be changed before that comes to pass. The problem is that scene is now being developed. The battlefield is Afghanistan, says Gouriet, and the next few years will be "critical." The United States is being presented a "God-given opportunity" to stop the Soviets and to rally worldwide support behind the cause of freedom. But to pull that off, the Afghans must get support from the United,

# Reagan claims Carter 'owes apology'

PAWNEE, Ill. (AP) — Ronald Reagan said Saturday the Carter administration owes an apology to the 52 American hostages in Iran for their nearly one year of captivity.

Campaigning in southern Illinois on a 240-mile bus tour, the Republican presidential candidate said he would support administration efforts to win the release of the hostages even if those efforts were politically motivated.

"I think we all hope and pray if something can bring them home, I'm for it," Reagan told reporters after emerging from a coal mine. "They've been there far too long and I think our government owes them an apology for letting them stay there that long.

"So if there's something that can get them home, I'm all for it," he added.

• Iranian Prime Minister Mohammad Ali Rajai told reporters at the United Nations that "the moment the Majlis (the Iranian Parliament) makes its decision...a moment that is not far away, the (hostage) question will be final and solved."

The remark came against a backdrop of speculation that the hostages would be released before Election Day — the first anniversary of the hostage seizure at the U.S. Embassy in Tehran last Nov. 4.

One source of that speculation, Reagan, said in Springfield, Ill., earlier Saturday that he knew no details of the latest developments.

Reagan went 360 feet deep into a southern Illinois coal and, standing at the bottom, told miners, "to say that we've got an energy shortage in this country is just ridiculous."

He said that with coal, oil and natural gas, "we haven't begun to use what we have or to find what we have."

Reagan, dressed in a brown pinstripe suit, white shirt and tie, donned a miner's lamplight and safety belt for the trip deep into the mine.

Standing in ground limestone dust, used to reduce the possibility of an explosion from coal dust, Reagan said the country already has the technology sufficient to permit the burning of American coal without violating clean air standards.

"So I think it's just going to take some common sense at the national level to start utilizing these (resources)," he said.

"The government is acting as if there is no more energy to be found," the former California governor said. "That's why we've got to be dependent on OPEC (Organization of Petroleum Exporting Countries).

# Akins joins Texas mayors in support for Reagan-Bush

Midland Mayor G. Thane Akins has joined more than 40 other Texas mayors in supporting Gov. Ronald Reagan and Ambassador George Bush, Gov. Bill Clements, chairman of the Reagan-Bush campaign in Texas, and Ernest Angelo, deputy chairman and campaign manager, announced today.

Serving as chairman of the committee is Mayor Bob Folsom of Dallas.

Gov. Glements and Angelo, who was mayor of Midland for eight years, said that as city officials, the mayors particularly feel the brunt of "the ever-increasing federal bureaucracy.

"The failure of Jimmy Carter to control the growth of the federal government is one of the great disappointments of his administration. Not only did he fail in his promise to streamline the bureaucracy, but he has also gone out of his way to create more bureaucracy." Clements said. ergy, which spends \$13 billion a year and employs 20,000 people.

"Overall, Jimmy Carter has added 400,000 new employees to the federal payroll since he took office, and he has increased federal spending by 60 percent. What's more, he has nearly doubled the budget of the White House staff over what it was when President Ford was in office," Clements added.

"During Jimmy Carter's administraion, we have seen a tremendous increase in federal intervention into purely local matters, literally tying the hands of state and local governer ments. Ronald Reagan is committed to reducing federal meddling in state and local matters. In addition, he has pledged to institute an immediate hiring freeze in the federal government, as well as initiating regulatory reform," he said.

Governor Clements stated, "The fact that these mayors from different

in his own political record.

York, Alleck Resnick, chairman of the group's national executive committee, reminded the audience before Mondale arrived that "you are his host and you are hosting the second most important personage in American political life right now."

Mondale's vice presidential rivals, Republican George Bush and independent candidate Patrick J. Lucey, were also on the agenda.

Lucey, speaking before the group Saturday night, chided Carter for trying to push a comprehensive peace settlement in the Middle East, saying such an effort could endanger the agreements already reached in the Camp David accords.

"Let us stand by whatever peace that can be achieved. Let us not endanger that peace in fruitless pursuit of a mythical settlement in which all live happily ever after,'9 said Lucey, running mate of independent presidential candidate John Anderson. Lucey told the convention that Anderson, if elect-

ed, would remain firm on keeping Jerusalem united, supporting the Camp David accords and opposing the creation of a Palestinian state between Israel

"Just about covers it for home or office"

684-7831

DEL RIO, Texas (AP) - Gov. Bill Clements told a Fiesta Amistad audience of 500 people from both sides of the border Saturday that the United States and Mexico must strengthen relations for the good of both countries.

Clements, interrupted by applause eight times, said leaders in the state capitols, in Washington and in Mexico City should heed the cooperation between border cities such as Del Rio and Ciudad Acuna, Mexico.

"The spirit of partnership and friendship and cooperation that is shared between Ciudad Acuna and Del Rio must also be shared by Austin and Saltillo, and most importantly, it must be shared between Washington and Mexico City," said the governor, who has traveled to Mexico seven times during his first two years in office

"The border is where it begins where our two nations are the closest. But our efforts must broaden and expand to bring together 'all of the people of the United States and Mexico and our national governments as two nations committed to each other's future well-being," Clements said.

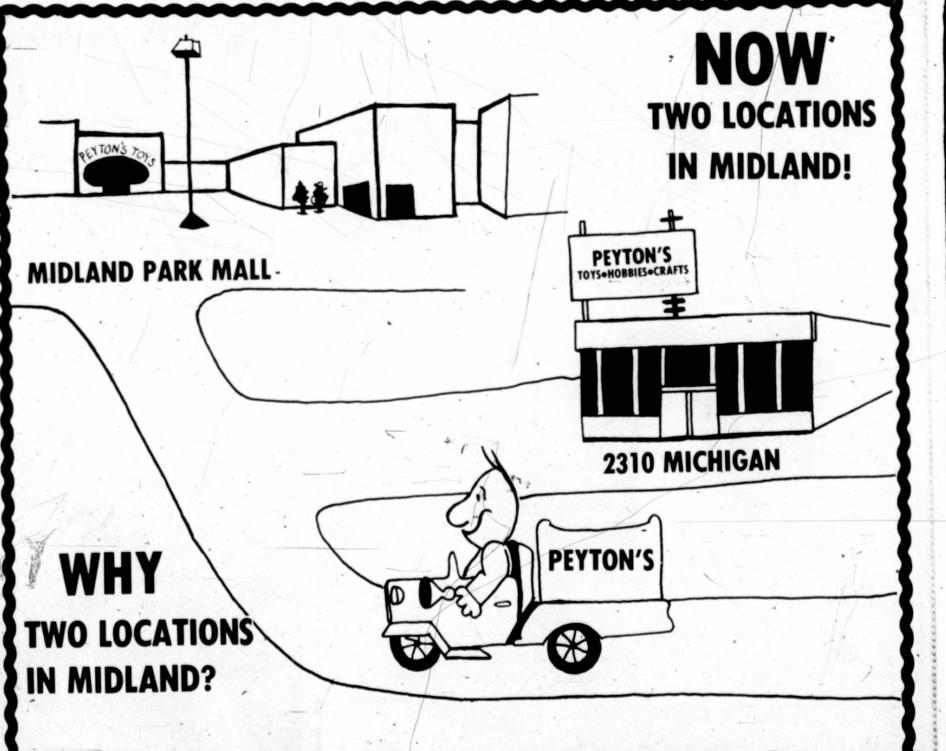

2400 W. MICHIGAN

Clements installed the new officers of the International Good Neighbor Council, chosen at the closing session of the organization's fall convention. They include Octavio Escalante of Monterey, Mexico, international president; Jose Luis Vasquez of Nuevo Laredo, Mexico vice president and Will Segura, of Lafayette, La., U.S. vice president.

The organization also presented Clements with an award for his efforts to open communications with Mexico officials, including an unprecedented meeting of the governors of the four U.S. border states and their six Mexican counterparts in Cuidad Juarez last June.

"He has single-handedly done more than any other individual in the state or the country in opening lines of communication and fostering goodwill between our two countries," said State Rep. Susan Gurley McBee, D-Del Rio. "Gov. Clements is sincerely 'muy simpatico.'

Del Rio Mayor Herb Whitis also paid tribute to Clements, backing a proposal to build a new railroad bridge to Ciudad Acuna. Whitis said the governor's efforts were "unparalleled in Texas history.

### **El Salvador**

SAN SALVADOR, El Salvador (AP) - Gov-ernment troops battled leftists in El Salvador's capital Saturday after at least a dozen powerful explosions rocked the city overnight, damaging stores and factories including the local headquarters of the U.S. firm Texas Instruments, Inc., authorities said. No casualties were re-

ported. They said bombs ex-

ploded within hours of each other at strategically placed locations Friday night, including the El Salvador headquarters of Dallas-based Texas Instruments.

One of the bombs damaged the Office of Census and Statistics and another hit the offices off ruling National Conciliation Party, police said.

They said a fourth bomb damaged a power station, blacking out most of the eastern sector of the capital. Another destroyed the ac-cess to the only road leading from the city to Soyapango, a neighbor-ing town. Other bombs caused no damage, police said.

Authorities said a number of other bombs were planted around the city but failed to explode.

Anonymous callers to several newspapers said the leftist guerrilla group Armed Forces for National Resistance was responsible for the bombs. Gunfights broke out after midnight between

three sectors of the city.

# Bomb scare curses witch confab

AMARILLO, Texas (AP) - Police evacuated a convention secretly left the motel after being told of Holiday Inn motel where a witches' convention was the bomb threat. being held Saturday, because of a "serious" bomb threat.

As officers searched the 251-room motel, about 300 "anti-witch" demonstrators gathered outside.

No bomb was found, the threatened noon detonation time passed without incident and the anti-witch threat.

'We carry Bibles, not bombs," said Judy Mamou, tians into an hour-long demonstration on a vacant other motel. lot. A nearby marquee read, "Take up your cross, not your broom."

About 60 witches attending the Church of Wicca tive.

urging fellow witches to improve their image "so we

don't have to have armed guards at our seminars like those two in the back of the room.' At that point, convention sponsor Skip Tarrant of

demonstrators disavowed any connection to the Newbern, N.C., apologized and cleared the room of all reporters, without saying why. The meeting room doors were locked and the witches sneaked out who organized the group of fundamentalist Chris- through the kitchen, leaving in their cars for an-

> "We didn't want to start a mass panic," explained Melinda Batchelor, a Holiday Inn sales representa-

Policé Col. Charles Hollis said the threat was taken seriously because "the caller was very cool, calm It came during a morning meeting as one witch, identified only as "Sabrina," of Danville, Calif., was serious." serious.'

The threat disrupted the church's eighth annual Samain Seminar, a gathering held on the date of the full moon nearest to Nov. 1, All Souls' Day.

The church's "lead branch," the Arianhu branch, initiated the yearly convention and is headquartered in nearby Dimmitt.

"This is why we consider the Amarillo area as home," Tarrant said.

The Wicca followers insist modern-day witches do not worship the devil or conjurce up evil spirits, as the protesting fundamentalists feared.

"I like being a witch," said Tarrant. "We are following traditions that have been around for centuries. We are not evil - whenever I swat a fly and spill his guts all over the kitchen countertop, I say, 'Go to God.'

"Being a witch makes one feel more alive." Another witch, Shara Stone, 25, said, "I like to stroke the grass. I hug trees regularly. I like to put my whole body on the grass and feel the flow of life forces.

Miss Stone is the daughter of Loy and Louise Stone of Dimmitt, directors of the Church of A rianhu. After a widely publicized trial last February in Plainview, Stone was acquitted in the Halloween 15'77 shooting death of a 15-year-old girl and several oth er charges from the same incident, against him and his wife, were then dropped.

The trial was moved from Dimmitt after defense attorneys claimed the Stones could not get a fair trial there because of local prejudice against their witchcraft activities.

# Skull found; Search continues

ATLANTA (AP) - Volunteers searching on Satur- Langford, brother of Councilman Arthur Langford, 7-year-old girl was kidnapped.

Abraham Murphy Jr., one of the search's group apparently those of a small child.

Late Saturday, Public Safety Commissioner Lee Brown said the remains were those of a small child, but "we do not know the age and there has been no determination of sex. We do believe the body had been there about three months.

expedite its analysis of the body. Officials won't twice before, said Sgt. Hill Jones. know until after the lab finishes its work whether the body is that of one of the five missing children, he said

skull, a backbone and more bones near a fence. It was definitely human," said Murphy

The skeleton was uncovered off Hightower Road near Interstate 20 by a young boy who noticed a foul odor, Murphy said.

Some 550 volunteers, both blacks and whites, combed wooded areas, abandoned houses and empty lots in the west Atlanta Dixie Hills neighborhood where Latonya Wilson, 7, was abducted last June. The search seemed to ease racial tensions caused by rumors in the black community that the crimes have been racially motivated, said Mike Langford, a search coordinator.

"I'm not going to say there aren't people who aren't mad and think it's a racial thing," said did it.'

day for one of 14 black children who have disap- whose United Youth Adult Conference coordinated peared or been found slain discovered a skull with a the search. "But this here today helped to alleviate patch of beaded hair in the neighorhood where a that. It showed white people were concerned with black children and children in general."

The Wilson girl is one of five black children still leaders, said the skull and other bones found were missing. The bodies of nine others have been recovered. All nine bodies were found near where the children lived, a fact the searchers hoped would lead them to Latonya.

Civic organizations planned weekend searches for the four other missing children.

Volunteers split into 12 groups to search the 11/2-Brown said the state crime lab had been asked to mile by half-mile area, which police had searched

Bits of clothing were found, most in or near garbage dumps. One group searching woods uncovered a pile of freshly turned earth marked like a "We found a skull, some teeth separated from the grave with plastic flowers. But police who dug up the spot found nothing.

Many volunteers expressed frustration with efforts by police to solve the killings and abductions.

"I think this is useful because people get frustrated when they can't do anything. This gives them something to do," said Randy Burcotte, who, like most of the searchers, is black. "I think this is a problem of our community, and we need to deal with it. When I say our community, I mean the black community." White volunteers expressed other reasons for joining the search.

"Mainly I felt this community needs to see white people are concerned," said Sheila McConnell. "Also, it will make an impression on the person who

SAN FRANCISCO (AP) - Passengers and crew were held aboard a Japan Air Lines 747 for nearly an hour after its arrival from Tokyo Saturday until an inspection determined the plane contained no radioactivity. The pilot had feared the plane was contaminated after he flew near debris from a Chinese atom bomb test.

Bob Mitchell of Hidden Acres Antiques holds an ivory statuette

symbolizing "The Beggar." The pattern behind is part of a 26-inch

blue and white imari charger, a dish used around 1800, A.D. for

stive occasions. Both pieces were on display Saturday as part of

an antique show which continues through today at Midland

Passengers, crew held while plane

inspected for radioactive debris

Center. (Staff Photo by Edward McCain)

Capt. David McCarroll of the San Francisco International Airport fire department said the plane, which landed with 350 passengers at 9:30 a.m. PDT, "has been given a clean bill of health." The passengers and crew were allowed to deplane at 10:25 a.m. PDT.

Airport officials said the captain, whose name was not immediately available, had radioed ahead requesting the inspection after the flight crew realized they may have flown near a radioactive cloud generated by the nuclear bomb test Thursday.

McCarroll said the passengers would be allowed to disembark as soon as the plane was towed to the international terminal.

# MC harmonizing with UTPB on 'two-plus-two program'

#### By DAVID CAMPBELL Staff Writer

The music department at Midland College is playing an interesting tune these days.

The department's program will attempt to bridge the gap between professional musicians and students who perform in the two-year institution, says Don Grant of the MC music de partment.

Known as the two-plus-two program, students spending two years in the music program at Midland College will be accepted at The University of Texas of the Permian Basin's music program, he explained

Although the two in stitutions are trying to coordinate their efforts to develop professional musical talent in "our own backyard," Grant added that MC's music program is good enough to "equip students for other senior colleges and universities."

This backyard concept has some historical basis. With many major orchestras, Grant explained that an organization will bring in talented musicians from outside of the community.

Once the orc'aestra is developed, educational institutions will try to develop local talent to fill the organization's needs and vacancies.

"If you were exceptionally good (in college), in most cases, the orchestra would invite the musician to perform with them.

Presently the Midland-Odessa Symphony has no preparatory concert organization to feed into the professional organization, he said.

Within two years, Grant's goal is to create a coaliti on between the college musician and the professional where students can be called upon to perform in a professional capacity.

"S tudents need to know why they are in music," he said of students seeking a professional outlet.

"It's tough, but there is room at the top if you are re ally good.

Music education in Midland, particularly with the public school's music program, adds another avenue to the college's program.

When a high school student finishes his education and participation with the band, choir or strings program, the student usually puts aside that talent and tries to find some way to sell his musical instrument, Grant said.

However, if there was an outlet where the student could continue to utilize his talent, his music abilities would not have to stop at high school graduation.

In a different program, many Midland students and citizens participate in the college's Jazz Ensemble each Wednesday night. This group plays selections from the big band era

to recent pop tunes. Although most of the performersare not profes-

sional musicians, involvement in the group provides an outlet for their creativity.

"Everyone needs a creative outlet," Grant said. "This outlet does not have to be at the same level as a professional musician.

"In Chicago, everyone brings their own vocal part and participates in the symphony's production of 'The Messiah' every December," he noted.

Each person is placed in the proper vocal section with the symphony orchestra. When the final performance is finished, "everyone has an elated experience," he explained.

Motivation to perform in the Jazz Ensemble comes from the satisfaction of performing and seeing a

growth in a person's creativity, Grant noted. "If one plays a bad note or a good one, the end

product is immediately produced. 'Music is the only art form where one can immedi-

ately realize the end product," he said.

# Judge reinstates fat jail matron

PITTSBURGH (AP) - Belle Luna, fired from her city jail job when she couldn't lose nearly 100 pounds, cried with joy when she learned a Common Pleas Court judge had ordered her reinstated.

"I'm so happy," she said as the tears began to flow. "If I could see the judge I would give him a kiss."

Judge Silvestri Silvestri of Allegheny County on Friday ordered the city to rehire Ms. Luna and Lorraine Goodman. The jail matrons were discharged last summer when they failed to meet the city Civil Service Commission's heightweight standards.

Silvestri also directed the city to give a physical examination to Ronald Miller, a trash truck driver applicant. Miller had passed the physical performance test but was refused the physical exam after he was weighed. All three are unemployed.

"It was the right thing for the judge to do," said Miller, who is 6-foot-1 and 254 pounds.

"The city is completly wrong about its weight standards. If I were obese and couldn't do the job, that's one thing. But I'm not fat. I'm in good health and I know I can do the work."

"As far as I'm concerned they can start work next Mon-"," said John Bingler, Civil Service Commission president. "If the judge says they are to be reinstated, then they will be.

Ms. Luna, who is 5-foot-1 and 245 pounds, and Ms. Goodwin, 5-foot-51/2 and 178 pounds, were hired for temporary jobs at the city jail under a federal program.

The city temporarily waived weight restrictions for their jobs, classified as arduous or non-sedentary, and hired them as permanent employees after the federal money lapsed. The women signed certificates agreeing to lose two pounds a week until they met the requirements.

"No matter what, I just can't lose weight," Ms. Luna said. "But I did pass the physical examination, and I did my job right.'

# Indiana State Prison escapee arrested in Michigan field

ANN ARBOR, Mich. (AP) - An Indiana State Prison escapee was arrested in a Michigan farm field Saturday, and sheriff's deputies said that ended a crime spree which included the abduction of one woman and the rape a 13-year-old girl.

Bertram Eubank, 24, was captured shortly before 2 a.m. by sheriff's deputies and state police who used a helicopter and tracking dogs in their search. The Kokomo, Ind., man gave up without struggle, said Washtenaw County sheriff's Sgt. Robert Mar-

Eubank was arraigned Saturday evening before District Judge Kenneth Bronson on charges of first degree criminal sexual conduct, abduction, armed robbery, vehicle theft, breaking and entering and escaping custody

Officials at the Washtenaw County sheriff's office said no bond was set, and the judge ordered Eubank, who had been serving time in Indiana for robbery, to stand trial here Oct. 23.

Marcum said Eubank escaped Thursday after overpowering a Howard County deputy who was taking him to Kokomo for trial. Authorities said Eubank had smuggled a key to his handcuffs from the prison.

Officials said Eubank took the deputy to a nearby home, where he handcuffed a woman and the deputy, took the deputy's .357-caliber Magnum revolver and commandeered the woman's car.

After stealing vehicles at Loganport and South Bend, Ind., Marcum said, Eubank arrived Friday night in Ypsilanti, where he abducted a 20year-old woman from her car. She later escaped, and Eubank fled to Lodi Township where he abducted a 13-year-old girl, said Marcum.

A statement from the sheriff's office said the girl was raped at gunpoint in a field.

If T.C. and Lucille Duke had known company was going to drop in, they might have been better prepared.

As it was, all they had time to do was get the yard mowed.

"I was outside here sweeping up the grass clippings when I saw him up there," said Mrs. Duke, who lives at 1108 W. Illinois Ave.

"Him" was Nick Saum, a hot-air balloon pilot from Golden, Colo., who was taking Midlander Dick Moore out for a sunset spin over town about 7 p.m. Saturdav

Trouble was, he never made it.

#### Adult fitness

#### class continues

The Alamo YMCA is continuing its adult fitness class which citizens may register for at any time. Classes meet Monday, Wednesday and Friday at 6 p.m. This is a coed class open to ages 16 and up.

Estimates are 600,000 to 900,000 annual deaths result from heart attacks. Dr. John Boyer of San Diego State College says one in five American males will have a major coronary episode before age 60 and women's ratios are close behind those. According to the Y, these tragic figures make getting the right type and amount of exercise important - not only to prevent heart attacks, but also to feel and look better.

With the fitness class, Y spokesmen say, participants will get the minimum amount of exercise. Trained instructors will lead participants in muscular strength and endurance, flexibility and relaxation exercise. During the aerobic work the heart rate is checked to be sure that each person is working at the proper level. For further informa-

tion on the class, call 694-2528, or come by 901 N. Midland Drive.

# **MHS Class of '58 shares** well preserved memories

#### **By DAVID CAMPBELL** Staff Writer

For 138 people in the Midland Hilton Ballroom Saturday night, it was 1958 all over again.

Under the light of dimly-lit chandeliers and the noise of a '50s band, the reunited class members of 1958 recalled their years at Midland High School and the many, dramatic changes in their hometown.

One impressive change occurred Friday night at Midland Memorial Stadium when the 1980 Bulldogs defeated the Abilene High School Eagles, 7-3, in their Homecoming game.

"We have never been able to beat Abilene," recalled Betty Kemp of Midland.

In those days, trips to play football at Abilene were taken by train, noted Norma Grimm who came from Saudia Arabia to be at the event.

One of the things Mrs. Grimm noted when she arrived in the Tall City was that "Main Street was gone."

She also noticed that Cowden Junior High School has disappeared, replaced by Midland National Bank. Familar stores, such as Grammar-Murphy, have moved from the downtown area to their present locations in west or north Midland.

Mrs. Grimm proudly pointed out that the class of '58 was the first to graduate from San Jacinto Junior High School, which was new at that time.

The first foreign exchange student at Midland High School made the trek

all the way from West Berlin to be with her former classmates.

Barbara Thiel Gelfert noted that when she lived with the W.R. Davis family, Midland was more like a large village. "Now the town is becoming to look

more like a city!" she exclaimed. The curriculum at Midland High School gave Mrs. Gelfert a choice of

subjects she wanted to study. In German schools, "we had to take 10 to 13 subjects each year and there was a lot of pressure in school."

Since she was the first foreign student in Midland, most of her social life was spent giving speeches to various local clubs and organizations. Another MHS graduate, who identified himself as DHA, recalled the time Elvis Presley made his first and only appearance in the Tall City in

1957. Presley walked out on the MHS auditorium stage, he recalled, and played a couple of songs, much to the delight of the students.

Following his brief performance, Presley stood outside on the high school parking lot beside his pink Cadillac and signed autographs while students sat on his car.

Most of the reunion participants are 40 years old, or quickly approaching that age. Mrs. Kemp quietly mentioned that she was amazed at how many of her classmates were "well preserved."

But, the thing that seemed to impress her the most was how well preserved her classmates' memories were of the class of 1958.

No one showed up in a T-bird with flames painted on the sides, but Betty Barrett Kemp of Midland finally got to kiss the captain of the football team, Gary Samford of Phoenix, as the Midland High class of 1958 got together for a reunion Saturday at the Midland Hilton. ### Bombings, shootings kill seven in Kampala

KAMPALA, Uganda (AP) - A night of bombings and shootings in Uganda's capital left seven people dead Saturday, police said. Eight bombs exploded overnight and a hotel

shooting left three civilians wounded, police said. Seven bodies were found lying near a bulletriddled car in the rundown Old Kampala section of the Ugandan capital, they added.

Residents of the area reported widespread shooting and looting in the area Friday night, concentrated near the Old Kampala police station.

In another incident, three civilians were wounded early Saturday morning when an army patrol searching for curfew violators entered the Imperial Hotel.

Gunfire is not uncommon in Kampala, which has been under a 10 p.m. to 6 a.m. curfew for the last year. But police said Friday night's incidents mark a strong increase in the state of instability in the city.

"I'm not saying these words lightly," Uganda's military leader Paulo Muwanga told a group of 80 city administrators Saturday.

'Anything can happen in Kampala, any day,

A presentation of gospel in song **Midland Christian Fellowship** 2301 W. Indiana Tuesday Oct. 21st 7:30 P.M. **One Service Only** 

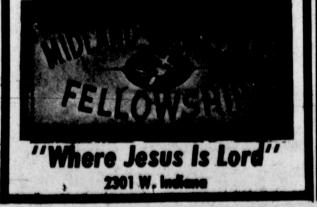

This unique presentation of the Christian gospel in song has been enthusiastically received in various churches and organizations since its inception in 1972.

Professional in quality, Charles and Paula Slagle present their message in a fresh and genuine manner that appeals to people of all ages and backgrounds. This musical presentation can be described as inspiritional and also different.

A great deal of Charles and Paula's singing consists of Scriptures set to music and keyed together with other recitation and quatations from the Bible. Their musical recitation and quotations from the blote. Their musical style ranges from contemporary to semi-classical and even country/gospel. Audience participation is also en-couraged. The impact is striking; setting an atmosphere of worship and praise throughout their presentation. Their goals are to lead people to a genuine commitment to Jesus Christ, to inspire sincere worship of God, and to demonstrate the public for a genuine the heuter demonstrate through singing and speaking the beauty and relevance of the Scriptures.

The Slagles travel to various countries of the world such as New Zealand, Australia, Germany, Mexico, Israel and Canada sharing their faith. They have recor-ded seven record albums including one in Spanish.

The Slagles make their home in San Antonio, Texas. They also have one son, Bryan, age 9 who travels with

# Cancer researcher shares knowledge with MMH staff

# New therapy center generates interest in treatment methods

#### **By SUE FAHLGREN** Staff Writer

Cancer has become a much-talked-about disease during the past four decades. Yet, cancer research and cancer therapy are still misunder-

With the addition of the Allison Permian Basin Cancer Therapy Center to the Midland skyline in early 1981, Midland's medical community is growing more interested in learning about every facet of the new work here.

Dr. John Mallams, professor of Radiation Oncology at New Jersey Medical School, recently addressed the medical staff at Midland Memorial Hospital on "Modern Trends in Cancer Therapy." He later discussed the field

Mallams is a cancer researcher, physician and professor. He is currently the chairman of the department of radiology at New Jersey Medical School and medical director for the Cancer Institute of New Jersey.

A SELF-PROCLAIMED "oddball" in the cancer science world, Mallams tends to be most concerned with patient welfare.

He frequently advocates doing things the way the patients like rather than the way the doctors like. And he doesn't mind saying so.

Mallams said in the 1950s and 1960s, the idea behind treating cancer victims was "to build high quality cancer centers to be everything to everybody." To some extent, he said, several people still believe the big centers can cure all cancer patients.

Mallams said the facilities were "not intended to be a single, solid

Mallams said the cancer world has begun "shifting gears" in its think-

ing. "The big center is very essential for many, many reasons," he said, One such use is as "a major central resource for information and referral.'

ANOTHER IS FOR the treatment of the "more exotic problems," he

# GM lung cancer deaths not smoking-related

DETROIT (AP) - A new study of lung cancer deaths among employees at the General Motors Corp. plant near Flint does not support the theory that the disease resulted from smoking, the United Auto Workers said Saturday.

The study found that the lung cancer death rate among workers at the Coldwater Road plant of GM's Fisher Body division was twice the national average.

But it said that illnesses associated with heavy smoking were not as proportionately high.

Three other studies earlier this year confirmed that more workers at the GM plant died of lung cancer than men in the genreral population. But the study released Saturday at a UAW occupational health seminar was the first to include other causes of death, said Dr. Michael Silverstein, one of the study's authors.

For smoking to have been the cause of deaths, the report said, "an increase in other smoking-related illness would also be expected. Workers in this (plant), however, did not have excess deaths from emphysema, coronary heart disease or cancer of the bladder, although there was a small but not significant excess of deaths from respiratory diseases." Historical studies of a deceased's smoking habits are frequently inaccurate because of faulty memory by

did not attempt to find out directly how much smoking the Coldwater Road workers did, officials said.

Some chrome and nickel compounds are known to cause cancer but studies of chrome plating operations

Much of the work at the plant involves die casting and electroplating small metal parts such as rear-view mirrors, officials said. The UAW investigators tried to determine if lung cancer deaths were associated with any particular part of the plant, but were unable to do so, with one excep-

A department where a major diecasting and plating operation was located prior to 1970 placed workers near furnaces that emitted smoke from remelting chrome-plated pieces. These employees showed an increased risk of dying from lung cancer if they had worked there for more than five years, the UAW study said. Silverstein cautioned that this finding had to be interpreted cautiously because no similar increase could be

said. The bigger centers usually have more money for research, he said. Therefore the centers become "basic research centers where new ideas are formulated and brought to us."

However, Mallams said the smaller centers deal more with people. "The big centers are not the major deliverers of services to the people,"

he said. He went on to say that, at M.D. Anderson in Houston, "the number of people served there is at or less than 9 percent of the cancer patients in Texas.

Mallams said people were "now more concerned with what happens to my Uncle Louie (who has cancer) in Midland than what happens at the Nobel Peace Prize for science (in cancer research).

"Research, per se, is not a big factor in the unit you have," he said. "Research is not a normal function of the average community hospital. Instead, it's delivering the most up-to-date acceptable medical care."

MALLAMS SUGGESTED the larger research institutions and the smaller treatment centers need to have more of a coalition than a competition so the patient will receive the best care.

'We need to be more patient-oriented," he said, "even if it's not in our (the doctors') own best interest. The patients have not had their day in court.'

Currently running what he calls a "consortium of hospitals," Mallams has helped organize eight hospitals in New Jersey for total patient care. He said the consortium allows the hospitals to trade-out their best functions and their information expertise - in increasing specialties.

"One place can't be everything to everybody," Mallams reiterated.

Further, the doctor believes cancer units should have the same working closeness, including specialty doctors who come see the patient rather than the patient going to the specialist.

"The cost of this cancer center is not the building and equipment," Mallams said making the APBCTC an example. "That's just the down payment."

HE WENT ON to say the center's effectiveness would depend on the physicians and the quality of patient care. "Pretty walls and machines don't take care of the people," he said.

Mallams said just because "they put the machinery in at Midland Memorial Hospital doesn't mean that every patient with cancer in the area is going to be treated at the hospital." He said the hospital would have to seek advice and help from other facilities - just as other facilities would seek their doctors'

expertise.

In addition, he said, MMH should seek "an agreement with all the other hospitals in that zone" for this coalition.

"I go to eight tumor conferences a week," he explained. "If I don't go to one, I may lose touch with that hospital. I have a responsibility that I must go there to their hospital to see their patient," he said, so that those physicians will come to see his patients if need be.

'Nobody's been the protagonist for the patient," Mallams said, adding the patient always has to change hospitals to see a specialist, rather than specialist coming to the patient. the

'We've got to get over that childishness," he said. "We have to stop

the nonsense and not be petty about it." He went on to explain, "We're still enamored with the building. You can buy all the computers you want," he added, "but the software is the big one." Software in medicine, he explained, means concerned medical professionals.

Mallams, a former 14-year Dallas resident, said the recent affiliation with Texas Tech medical school will have a positive effect on Midland health services.

"There's no question that the Texas Tech system is not in the league to deal with the cancer center," he said. But, he said, a more important function of the affiliation is to stimulate the more established physicians in their professional enhancement. With new interns and more stimulated older physicians, Mallams said, Midland should benefit significantly.

# Much campaign attention focused on military readiness

#### By H. JOSEF HEBERT

WASHINGTON (AP) - Public skirmishes between Defense Secretary Harold Brown and some of his top generals are focusing presidential campaign attention on military readiness and the Army's thirst for an ever-higher budget.

Aides to Brown made it clear this past week that the defense secretary is irritated by public and private comments and leaks by high-ranking Army officials questioning the military's readiness, the defense budget, and even Brown's veracity.

Pentagon spokesman Thomas Ross accused the unnamed Army officials of "unfair" sniping and added: "This is a budget tempest in a teapot, ob-viously part of the jousting to get a larger share of the defense pie."

The concern was highlighted again Friday when Ross acknowledged that Brown misspoke himself recently when, while listing examples to show the military is not standing still, he said an advanced attack helicopter would be in operation by next year. The example was only one of a number Brown gave, but defense officials concede the helicopter is not expected

to be delivered until 1983. "It is unfair to make accusations anonymously and on the basis of one minor mistake in a 5,000-word speech," Ross told reporters.

One reason for such sniping is that Pentagon planners are now putting together their fiscal 1982 budget proposals and it is not unusual for each of the services and advocates of particular projects to push their causes both privately and publicly.

But the Pentagon infighting has taken on added significance this year because it comes in the final stretch of a presidential campaign that increasingly has focused on military readiness and defense spending.

A week ago, defense advisers to Ronald Reagan accused Brown of trying to "hide the truth" about defense preparedness after a memorandum was leaked saying Brown wants more positive aspects of military readiness emphasized.

Brown angrily denied the charge and said the memorandum misinterpreted his desires on the matter and the person who leaked it should be disciplined.

Another Army draft document leaked to the recently press complained to senior defense officials that tenative budget allotments for the next five years would make it impossible to catch up to the Soviet Army. Unnamed Army sources were quot-

ed as challenging Brown's assertion that the Pentagon has invested \$8 billion to improve air defense for ground forces as well as the Navy's surface fleet. The report prompted Ross to break down the Pentagon's expenditures - \$7.9 billion - for air defenses during the last three years. The simmering feud over budget

and readiness also has come to the surface on more than one occasion in recent weeks.

Four days after Brown told an audience in El Paso, Texas, that the United States is prepared to go to war if necessary and is capable of sustaining its forces in combat, two Army generals presented a much less enthusiasic assessment.

"If we go to war tomorrow morning, we go with an obsolescent kind of army," Gen. Fredrick J. Kroesen, commander of the U.S. Army in Europe, told the Army Association convention last Tuesday.

Gen. Edward C. Meyer, the Army's chief of staff, told the same group that while strides have been made to improve the situation "we are still significantly short of our manpower needs in mobilization."

He also complaihed about money saying, "There are harsh facts of life today - the fact that the Army's share of the defense budget has shrunk to just a little over 24 percent, the lowest in more than 16 years." Defense officials later suggested

Meyer was being overly dramatic. Ross said while Meyer technically was correct, the difference in the Army's share this year as compared to the last five years is but 1 percent.

SUNDAY, OCTOBER 19, 1980

SPORTS

PAGE 1B

# **Royals even World Series**

KANSAS CITY, Mo. (AP) - Slugging Willie Aikens smashed his way into the World Series record book Saturday with a pair of tremendous home runs that led the Kansas City Royals to a 5-3 victory over Philadelphia in Saturday's fourth game of the battle for baseball's world championship.

Their second straight victory at home enabled the Royals to tie the best-of-seven series at 2-2, with Game 5 scheduled for today. The teams return to Philadelphia for the sixth game Tuesday night.

AIKENS EXPLODED HIS third and fourth homers of this series in the first two innings as the Royals rushed into a big early lead. Then Dennis Leonard, loser of the first game, made the bulge stand up with a gritty nine-hitter before being relieved in the eighth.

Aikens also had two homers in the opening game of the series and became the seventh man in history to hit four or more homers in a single series. Duke Snider did it twice, and the others to accomplish the feat were Lou Gehrig, Babe Ruth, Hank Bauer, Gene Tenace and Reggie Jackson, who owns the single-series record of five homers. Four players — Gehrig, Ruth, Snider and Mickey Mantle — all had

two-homer games twice in their careers, but Aikens became the first man to do it in a single series.

Aikens also became the fourth player in series history to hit homers in consecutive innings. The others were Ruth, who did it twice, Jackson and Ted Kluszewski

THE ROYALS CAME out swinging against Philadelphia starter Larry Christenson and it paid off.

Leadoff man Willie Wilson, battling a 1-for-13 series slump, opened with a single to left. Before Christenson threw a pitch to the next batter, Frank White, he threw over to first, hoping to keep the speedy Wilson close. But the pickoff attempt was in the dirt and skipped past Pete Rose into right field. Wilson raced around to third base on the error.

After White flied out, George Brett drilled a 1-1 pitch down the right-field line, scoring Wilson. It looked like a double, but Brett hustled it into three bases, sliding hard into third. He needn't have bothered, because Aikens was up next.

The strapping first baseman hit an 0-1 pitch on a line over the 385-foot sign in right field. The ball fell just short of the waterfalls that decorate the area beyond the outfield wall in this beautiful ballpark.

That made it 3-0 for Kansas City, but the Royals didn't stop there. Designated hitter Hal McRae drilled a base hit to center and hustled it into a double. When Amos Otis followed with another double for a 4-0 lead, it finished Christenson, with Dickie Noles reliving. Christenson had made 22 pitches in his brief stay and allowed 12 total bases.

A walk to Clint Hurdle and an infield single by U.L. Washington loaded the bases, but Noles retired Wilson to end the inning.

THE PHILLIES NICKED Leonard for a run in the second. Garry Maddox dropped a one-out single to right. Manny Trillo forced him at second, but when Washington's relay was wild for an error, Trillo advanced to second. Larry Bowa followed with an RBI single, making it

But the Royals got that back in their half with Aikens. This time he hit a monster of a homer, high and deep into the Royals' bullpen in right. The ball bounced once and then disappeared into the tunnel behind the warmup area

The crowd of 42,363 demanded a curtain call from the slugger, and Aikens came out of the dugout, waving his hat to acknowledge the cheers. The home run was the last of the Royals' scoring for the afternoon, but not the last of the cheering as the Kansas City crowd hailed the Royals through the closing innings of the game.

The two homers gave Aikens seven hits and eight runs batted in for the four games of the series. His batting average so far is a remarkable

In the fourth, Noles sent Brett sprawling with a pitch just under his chin. Kansas City Manager Jim Frey dashed from the dugout, gesturing and shouting at the Phillies' pitcher, and for a moment it seemed this series might have a beanball brawl on its hands.

But the umpires interceded and after calming Frey down, warned both managers that any more close pitchers would result in expulsion of the pilot and the pitcher involved. The threat worked, and peace prevailed the rest of the way.

Leonard had an early four-run lead in the opener but squandered that

The madcap third quarter pla which gave Houston a 10-3 lead it never lost started on a 20-yard run by Terald Clark who fumbled at the SMU 10. Wide receiver Eric Herring knocked the ball forward to the 3 where Phea tired tried to pick it up but knocked it into the end zone where he scored The defending SWC champion Cou-

gars also got field goals of 39 and 25 yards from David Humphreys in the defensive dominated game that was regionally televised.

After a scoreless first quarter, Humphreys kicked a 39-yard field goal late in the second quarter to give Houston a 3-0 halftime lead.

**EDDIE GARCIA'S 43-yard field** goal tied it before Phea made his alert play. Humphrey's second field goal put the Cougars up 13-3 before SMU came back in the fourth period.

SMU quarterback Mike Ford completed five passes on a 61-yard drive including 23 and 13 yarders to Anthony Smith to setup his one-yard sneak.

The Cougar defense led by linebacker Steve Bradham intercepted four Ford passes. Bradham had two including one at midfield late in the game

Bradham's final interception came after Jared Moore had recovered Clark's fumble at the Mustang one-

KNOXVILLE, Tenn. (AP) -

Peter Kim boomed four field

goals and Ken Coley and Major

Ogilvie scored touchdowns as

top-ranked Alabama turned to

an unyielding defense and

buried Tennessee 27-0 in a re-

gionally televised Southeastern

Conference football game Satur-

The Crimson Tide, reeling off

their 27th consecutive victory,

held Tennessee to minus 2 yards

on offense in the first half and

Houston held SMU to only three first downs, in the first half and the deepest Mustang penetration was to the Cougar 46.

Ford completed 18 of 34 passes for 195 yards but suffered the interceptions at critical times.

The Mustangs were held to a paltry 86 yards rushing.

Bradham's first interception set up Houston's first field goal as the Cougars worked the ball to the Mustang 24 before Humphrey drilled it from 39 vards out.

The victory kept alive Houston's SWC title hopes. No team has ever lost twice and won the league title. Houston now leads the brief rivalry between the two schools 4-2. SMU has

never beaten the Cougars in Dallas. World Series

Walter Abercrombie of Baylor, falls forward for a first down in second period of Southwest Conference game with Texas A&M in driving rain storm Saturday in College Station. Mike Little (55) and Leandrew Brown (35) make the stop on Abercrombie. (AP Laserphoto).

# **Baylor crushes Texas A&M**

### Abercrombie paces Bears over Aggies

COLLEGE STATION, Texas (AP) Halfback Walter Abercrombie broke three tackles in hauling a screen pass 15 yards for a touchdown and sprinted 71 yards with a pitchout for a score as No. 13 Baylor whipped Texas A&M 46-7 in a Southwest Conference clash Saturday:

Baylor, off to its best start in 27 years, marched to a first quarter field goal in a rain storm, then scored three second-quarter touchdowns on passes by quarterback Jay Jeffrey.

Abercrombie, a 6-foot 203-pound junior, hiked the score to 32-0 early in the third quarter, racing 71 yards with a quick pitch for the longest rushing touchdown in his three-year career.

**ABERCROMBIE FINISHED** with 138 yards on 23 carries. It was the fifth game this year he has gone over 100 yards.

Baylor, among the nation's leaders in offense and defense, set a school record by scoring its fourth safety of the season when freshman tackle Paul Mergenhagen blocked an A&M punt out of the end zone.

Geff Gandy partially blocked another A&M punt and Max McGeary partially blocke yet a third A&M punt. It was the 1. h time in his career that McGeary has blocked a punt or field goal try. The first quarter was played in a driving rain, under skies so dark that

lights were turned on an hour before kickoff. The paid attendance of 69,735 set an A&M home field record, but year their were vacant seats because of the weather.

# Crimson Tide blanks Tennessee, 27-0

turned aside three inird-quarter threats with two pass interceptions and a blocked field goal-

The outstanding defensive effort, led by Mike Pitts, Thomas Boyd and Jeremiah Castille, enabled Alabama to hand Coach Paul "Bear" Bryant his 302nd career victory in his chase of the all-time record of 314 held by

Amos Alonzo Stagg. It also was Alabama's 25th consecutive SEC victory and its 10th in a row over Tennessee in one of the top collegiate rivalries

in the South. It gave the Tide 33-23-7 series advantage.

It was the 94th career shutout for Bryant-coached teams, coming before a southern-record crowd of 96,748 who watched in a second-half driving rain.

Kim, a sophomore from Ha-waii, had field goals of 31, 47, 41 and 24 yards. Coley's touchdown came on an 8-yard run in the second guarter and the Tide added a two-point conversion on Don Jacobs' pass to Ogilvie. Ogilvie's score came from the

one with only 28 seconds remaining after Mike Clements returned an interception 2 yards to the Volunteers' 20.

The unbeaten machine, now 6-0 overall and 3-0 in the SEC, dusted off a couple of old plays in scoring drives - a 20-yard gain on a flea-flicker and a 23yard pass completion out of the shotgun formation.

Tennessee's record dropped to 3-3 for the year and 1-2 in the conference.

**BAYLOR RECOVERED** two of its own fumbles to keep control of the slippery ball in moving 64 yards on 14 plays to set up Robert Bledsoe's 43yard first-quarter field goal. It was Bledsoe's longest field goal of the

Jeffrey picked out three different receivers - Mike Fisher, Raymond Cockrell and Abercrombie - for second period touchdowns. Baylor's 6-0 record, including four conference victories, is its best since 1953 when the Bears finished 7-3. A&M fell to 2-4 and 1-2 in the SWC.

Fisher outjumped two A&M defenders in the end zone to catch a 32-yard touchdown pass. Tight end Cockrell pulled in a 2-yard scoring lob and Abercrombie carried a third-downand-eight screen pass into the end zone for Baylor's third touchdown passing.

A&M, missing starting quarterback David Beal with an injured wrist, managed only 34 yards total offense in the first half against Baylor. Ernest Jackson's fumble at the Baylor 31 which Tommy Tabor recovered for the Bears, halted A&M's deepest push in the first half.

THIRD-TEAM quarterback Gary Kubiak replaced Mike Mosley, who had lost his starting job to Beal, late in the third quarter and guided A&M to its only touchdown.

Kubiak scored on a three-yard run with only 20 seconds remaining in the game to avert what would have been a tie for A&M's second worst defeat in history.

Baylor defeated A&M 46-0 in 1901, and Texas pinned the Aggies with their worst defeat - 48-0 in 1898.

Kubiak, who was to have red-shirted this season, also took A&M to the Baylor five on two occasions in the second half. His fumble stopped one of those drives and a fourth-down pass fell incomplete in the end zone.

JEFFERY WAS shaken up by a tackle on Abercrombie's long scoring run in the third-quarter and sub-quarterbacks Mack Brannan and Robert Mangrum finished the game.

# Tulsa tops winless TCU with passes

FORT WORTH, Texas (AP) -Kenny Jackson rifled two touchdown passes Saturday to spur Tulsa to a comeback 23-17 non-conference football victory over winless Texas Christian.

The Golden Hurricane, down 10-0 at one point, also got three field goals from Stu Crum as the Missouri Valley club romped to its fourth triumph against two losses.,

For TCU, the loss was number six this year and extended its losing streak to eight dating back to 1979.

Jackson fired an 8-yard touchdown pass to Don Hicks in the second period and hurled a Hurricane ahead with a 46-yarder to Lee SImpson in the final quarter.

Crum, after missing on field goals of 27, 52 and 49 yards, booted three from 27, 39 and 41 yards and set a Tulsa career of 24.

TCU quarterback Steve Stamp winged an 18-yard touchdown pass to flanker Stanley Washington and Greg Porter kicked a 44-yard field goal to stake TCU to its wispy 10-0 first-half lead.

Stamp tried desperately to pitch TCU back into contention in the closing minutes, but Charles Caufield's interception in the end zone killed the first threat. With 1:05 remaining. Stamp capped a 68-yard drive with a 13-yard scoring pass to Bobby Stewart.

TCU's West Brooks recovered the ensuing kick-off at the Hurricane 45 but, for the second straight week, the Frogs could not shove across a touchdown in the clutch.

Stamp missed on four straight passes.

one. This time the Kansas City righty held the Phillies off, protecting the 5-1 bulge until the seventh. Then he surrendered a run when Trillo doubled, moved to third on Bowa's single and scored on Bob Boone's sacrifice fly?

IN THE EIGHTH, the Phillies picked up another run. Rose opened with a double and that brought in Dan Quisenberry, ace of the Kansas City bullpen. Rose advanced to third on an infield out and scored on Mike Schmidt's sacrifice fly: But it was the last gasp for the Phillies.

The come-from-behind style that has marked the club in its travels through the National League Championship Series and the first two games of this World Series wasn't there on Saturday.

But Quisenberry was, and he mowed down the last four batters in order.

The Kansas City crowd cheered wildly with each out of the last inning but took the victory almost in stride and filed calmly out of the stadium when it was over.

But they will be back Sunday for Game 5 of the Series, which has at least two more games to go.

# Spinks scores KO win over Lopez in 11th

ATLANTIC CITY, N.J. (AP) — Otympic gold medalist Michael Spinks came from behind Saturday to pet away veteran Alvaro "Yaqui" Lopez in the seventh round of a freefer-all light-heavyweight brawl. Spinks, 24, of St. Louis, extended his

streak to 15 victories by scoring his 11th knockout with powerful blows to Lopez's head 47 seconds into the se-venth round of their scheduled 10round fight.

Spinks said his victory earned him a shot at Eddie Mustafa Muhammad's World Boxing Association title.

"I want it all. I think I can do it

### **Ohio State trips** Indiana, 27-17

COLUMBUS, Ohio (AP) — Tail-back Calvin Murray's best day as a college football player - 35 rushes for 24 yards — led ninth-ranked Ohio State to a 27-17 victory over Indiana in Big Ten Conference play Saturday.

Murray, a senior from Woodbine, N.J., scored on runs of 3 and 37 yards, helping the Buckeyes remain undeleated in the conference. Ohio State is 5-1 overall and 3-0 in the Big Ten.

Indiana, 4-2 overall and 1-2 in the conference, lost for the 17th straight time to Ohio State before a crowd of 7,957, the 75th straight sellout at Ohio Stadium.

Murray, whose previous personal highs were 19 carries and 135 yards for a single game, had 149 yards by halftime., The Buckeyes led 17-10 at that point.

# Nebraska throttles Cowboys

LINCOLN, Neb. (AP) - Reserve I-back Craig Johnson rushed for three touchdowns and quarterback Jeff Quinn passed for two more as 10thranked Nebraska crushed winless Oklahoma State 48-7 in a Big Eight football clash Saturday.

Johnson, subbing for the injured Jarvis Redwine, scored on runs of 3, 17 and 1 yards as he rolled up 105 yards in 20 carries before a Nebraska homecoming crowd of 76,021.

Oklahoma State's Cowboys, 0-5. scored their lone touchdown following a Nebraska fumble on the Cornhusker 26 early in the second half when quarterback Houston Nutt hit Ron Ingram with a 14-yard scoring strike.

After grabbing a 14-0 lead before Oklahoma State's first snap of the ball, Nebraska, 5-1, struggled through the rest of the first half.

Quinn hit Jeff Finn with a 13-yard touchdown pass to cap an 80-yard drive on Nebraska's first possesion. **Oklahoma State's Ernest Anderson** fumbled the ensuing kickoff and Nebraska's Rodney Lewis recovered at the Oklahoma State 26.

Oklahoma State's Cliff Rockins deflected a Quinn aerial three plays later, but Cornhusker Anthony Steels caught it in the end zone. The extra point put Nebraska up 14-0 with 9:41 to play in the first quarter.

After losing two of three fumbles and having a punt blocked, the Cornhuskers scored again with 1:23 left in the half when Johnson powered over from the 3 yards.

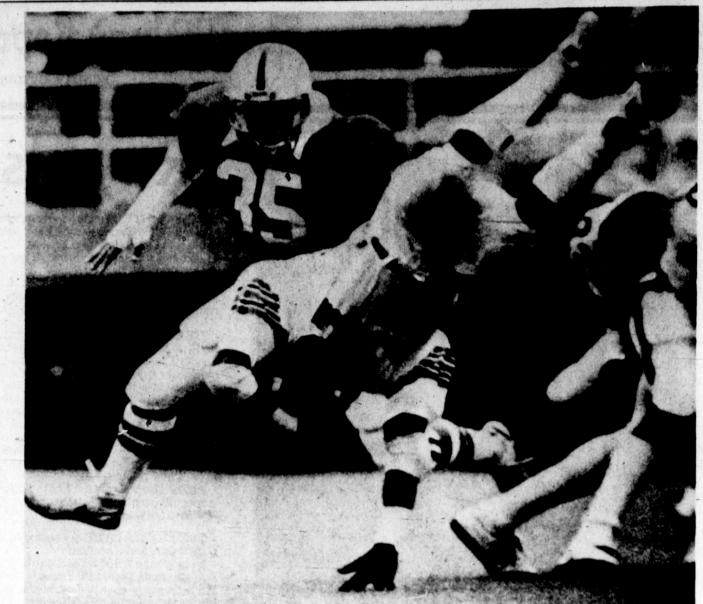

Johnson scored from 17 yards out, capping another 80-yard drive with 5:33 remaining in the third quarter. He added his third touchdown five minutes later on a 1-yard plunge.

Johnson's backup, sophomore "You hit me good with a left and a right, and boom," Lopez told Spinks Roger Craig, added fourth quarter tallies on runs of 10 and 17 yards.

# Williams runs wild as Pups stampede past Abilene

ABILENE - Wesley Williams, a 180-pound junior, went completely wild here Saturday afternoon as the Midland High Bullpups defeated the Abilene High JVs by a rousing 34-0 count.

Williams not only rushed for 303 yards, but he scored all five MHS touchdowns as the Bullpups raised their record to a perfect 5-0 mark for the year.

Williams dialed long distance four times with TD jaunts of 65, 51, 31 and 68 yards. He had another of three yards.

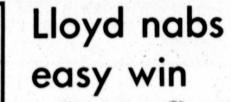

Victor Salas scored two extra points and missed two in the contest, but the Bullpups got one back when quarterback Scott Sears hit Doug Okruch with a two-point conversion pass play.

Defensively, the Bullpups were outstanding in the shutout. Teddy Terrazas intercepted two passes and James Day recovered two fumbles. Steve Mauldin also blocked a punt.

Abilene High is now 3-2 on the year as they suffered their second straight shutout. Permian turned the trick last week.

The Bullpups will travel to San Angelo with both the sophomore and JV teams next Saturday. The sophomores will tangle at 5 p.m. and the JVs will clash at 7 p.m.

during 48-7 loss to the Cornhuskers in Lincoln, Nebr. Satirday afternoon. (AP Laserphoto).

DEERFIELD BEACH, Fla. (AP) - Top-seeded Chris Evert Lloyd cruised by Czechoslovakian Regina Marsikova 6-1, 6-2 Saturday in the semifinals of the \$100,000 Lynda Carter-Maybelline Tennis Classic.

The 18-year-old Marsikova, seeded eighth, never was a serious threat to Lloyd, who will be looking for her 100th career tournament victory when she plays Andrea Jaeger in the finals today. Jaeger, the No. 3 seed, advanced by upsetting second-seeded Martina Navratilova 6-1, 1-6, 6-4.

"I knew I was going to lose," Marsikova said. "It's hard to go out there and play her. I just don't have the patience.

Lloyd, five-time U.S. Open champion, outclassed Marsikova, moving her opponent around the court with crisp ground strokes, then closing out the point by hitting a shot out of Marsikova's reach.

ble recovery by Robert Estes silenced the other.

In the second period, Tulsa linebacker Robert Tennon jarred Stamploose from the ball, Jim Maxwell recovered and Jackson took the Hurricane across the goal in three plays. He zipped a 13-yard pass to fullback Kenneth Sessions and then uncorked the eight-yard TD shot to Hicks, all but unattended in the end zone.

Crum got the first of his three field goals mid-way through the third period to tie the score and Simpson's 46-yard pass to Jackson lifted Tulsa into a 17-10 lead, a margin it never relinquished

Session, the Tulsa fullback, was a rushing leader with 94 yards on 23 trips and teammate Kenneth Lacy collected 69 yards on 7 carries.

Jackson wound up with seven completions on 16 passes for 150 yards. Stamp hit on 20 of 42 for 277 yards but his two touchdown passes were all but. offset with the two chilling intercep-

LAKE BUENA VISTA, Fla. (AP) -The Edwards brothers, Danny and Dave, combined for a better-ball, 7under-par 65 and retained a 1-stroke lead Saturday in the third round of the \$350,000 Walt Disney World National Team Golf Championship.

"We weren't quite as sharp as we were the first two days; kind of spotty," said Danny, 29, a veteran of six years of PGA Tour activity.

"But you're just not going to have four days when you shoot lights out. Let's just hope this was our bad round and we'll play good tomorrow.'

"I think it may have been partly psychological," said Dave, 24, who is completing two years on the Tour

### Highland tops Alamogordo, 28-20

155 29 14-0 3-15 7-4 4-32

ALBUQUERQUE (AP) - Albuquerque Highland, with quarterback Glen Russell leading its talented backfield, defeated powerful Alamogordo 28-20 Saturday in a crucial District 3AAAA high school football game.

The Hornets got touchdowns from four different players to offset a brilliant passing attack by Alamogordo's Floyd Zamora and Roger Black, who together passed for 243 yards.

FOR SALES ACTION IN A HURRY NOTHING WORKS LIKE A WANT AD FOR AN AD-VISOR

with this season-ending event. 'We thought all week that the Palm course would be the toughest, and maybe that worked against us.'

The leaders all the way, the Edwards had scores of 60 on the Buena Vista course and 63 on Magnolia before taking their 65 at the Palm. The unique format called for one round on each of the three courses before the final round Sunday at Magnolia.

Their 188 total was 28-under-par and a single stroke off the tournament record.

Rookies Doug Campbell and Mike Gove, 2 strokes back after 36 holes, moved to within a single shot of the

#### Black rallied Alamogordo in the second half with touchdown passes of 49 yards to Chris Rollerson and 7 yards to halfback Dago Gonzales. Gonzales also scored on a 2-yard run as the two top teams in District 3AAAA matched offenses.

Alamogordo finished with 331 total yards to Highland's 243, but five turnovers by the Tigers killed several scoring opportunities.

top spot at 189 after a 64 at Magno-

lia. Gary Koch and Curtis Strange bir-

died eight of their last nine holes for a 60 at Palm and moved into third at 191, three strokes off the pace.

Jim Dent and Artie McNickle were next at 192 after a 63 at Magnolia.

Defending champions George Burns and Ben Crenshaw headed a large group at 193 after shooting a 64 at Buena Vista

They were tied with Mac McLendon and Leonard Thompson, Lon Hinkle and Craig Stadler. Dan Halldorson and Dana Quigley, Dave Barr and Ed Fiori and Barry Harwell and Mike Harmon

McLendon-Thompson shot 65 at Buena Vista, Hinkle-Stadler 63 at Magnolia, Halldorson-Quigley 66 at Palm, Harmon-Harwell 66 at Palm, and Barr-Fiori 64 at Buena Vista.

The Edwards have yet to make a bogey in the tournament in which scoring is based on the better ball of each 2-player team. In the three days, Danny has scored 11 birdies and an eagle, Dave 13 birdies and an eagle. They had it 4-under-par at the turn Saturday, then Dave hit his approach shots close to the pin for birdies on

three consecutive holes, beginning on

"I think it's the best I've played all week," Lloyd said. "I wasn't tentative. I was hitting out. I thought I was serving well "

### Lee splits frosh tilts

The Lee freshmen and the Midland freshmen split two local rival battles Saturday in ninth grade football action.

The Lee White (2-4) won a narrow 7-0 victory over Midland Purple (1-3-1) while the Midland Gold (3-3) took an easy 34-13 decision over Lee Maroon (2-4).

In other ninth grade games in Odessa, Bonham won a 12-6 decision over Bowie, unbeaten Nimitz-ran over previously unbeaten Crockett, 27-0. Ector took Hood by a 19-8 count.

The locals won one of three games Saturday in the eighth grade contests. Goddard (3-1-1) ran over Odessa Blackshear (2-4) by a 22-0 count. San Jacinto (2-2-1) lost a narrow 22-21 decision to Odessa Hood (4-1). Alamo (4-1-1) lost its first game of the season in a 20-10 contest to unbeaten Odessa Nimitz.

In another eighth grade game, Bonham defeated Crockett, 18-6, and Bowie was open.

Marcus Allen (33), USC tailback, is stopped for short gain by Oregon's Mike Nolan as the Ducks upset the Trojans with a 7-7 tie in Eugene, Ore. Saturday to knock Southern Cal from the unbeaten ranks. (AP Laserphoto).

# Oregon stuns USC with tie

EUGENE, Ore. (AP) - Oregon football Coach Rich Brooks disdains tie games and won't even make an exception for his team's stunning 7-7 deadlock Saturday with secondranked Southern Cal.

"This tie is against a quality football team," Brooks said: "But it's disheartening to know that the players executed as well as they did and

many opportunities. The penalties seemed to be the rule of the day for us.

Southern Cal was penalized for 85 yards, including three costly holding calls.

Oregon, 2-2-2, would have won the game except for a fumble recovered on the Trojan 1-yard line. On the play, one official signaled that Oregon tailback Reggie Brown had crossed the goal line for a touchdown before the fumble but he was overruled by another offi7al. "The explanation the offi7al ge me was that the player crossed the goal line but the ball didn't," Brooks said. "It was just one of those calls that, controversy surrounds," Robinson said. "I don't think he was in the end zone. Southern Cal's drive was stopped on the Oregon 32 when Allen was belted for no gain on a fourth-and-one situation. Oregon had the last 'scoring opportunity, moving to the Trojan 42-yard line before Lonnie Lott intercepted an Ogburn pass with less than a minute to go

# Player attacks official during BYU's 70-46 win

LOGAN, Utah (AP) - Brigh-am Young's Jim McMahon, the nation's leading passer, threw for 485 yards and six touchdowns as BYU crushed Utah State 70-46 Saturday in a wild and bitter non-conference football game that was marred by a player's attack of an official.

McMahon tossed four scoring passes in the first half of the regionally televised contest and ran for another score, setting NCAA records of 342 yards passing and 358 yards total offense for a half.

The penalty-plagued game took an ugly turn midway through the fourth period when BYU defensive tackle Pulusila Filiaga, ejected from the game for a flagrant foul, attacked an official from behind and landed

Utes, 24-21 LARAMIE, Wyo. (AP) — Wyoming quarterback Phil Davis broke a school total offense record as the Cowboys overcame their own mistakes to beat Utah 24-21 in a Western Athletic Conference college football

Wyoming

overcomes

game Saturday. But it took a clutch interception by Wyoming cornerback Bruce Small and a 45-yard field goal by kicker Steve Tobin to give Wyoming enough points to withstand a comeback by the determined Utes.

Wyoming overcame three first quarter turnovers and 133 yards in penalties to beat the Utes, who also hurt themselves with turnovers and key penalties.

Utah cut Wyoming's lead to 21-13 midway through the fourth quarter and then held Wyoming to get the ball back. But just two plays later Small intercepted a Ricky Hardin pass and returned it 25 yards to the Utah 32 yard line. Four plays later Tobin kicked the field goal.

Wyoming's earlier scoring came on # two touchdown runs by fullback Mandel Robinson and a 35-yard pass from Davis to running back Doug Moore. Davis gained 142 yards to raise his #

career total offense record to 3,482 yards, breaking the school record of 3,427 yards set by Steve Cockreham in 1971-1973. Wyoming is now 4-2 for the season and 2-2 in the WAC, while Utah is 4-3 and 2-1 in the WAC.

Carolina's final touchdown came on

**Gervin sparks Spurs** 

as the San Antonio Spurs rolled to a easy 110-96 National Basketball Association victory over the expansion Dallas Mavericks here Saturday night

San Antonio never trailed after four first quarter ties as the Spurs registered their fourth straight victory.

Four other Spurs were in the double figures as Dave Corzine hit 12 fourth-quarter points to wind up with a 16-point night. James Silas added 15 points and John Shumate and rookie Reggie Johnson each tallied 10 points for the winners.

Tom LaGarde, with 16 points, led a group of five Mavericks in the twin digits.

Richard Washington, Jim Spanarkel and Winford Boynes each contributed 12 points and Geoff Huston added 10 points for the losers.

After a pair of free throws by LaGarde, created the game's fourth tie at 12-12, Silas hit a 12-foot jumper to put San Antonio ahead to stay in the opening quarter.

TRANSMISSIONS

AAMCO<sup>®</sup> For 2 Weeks Only!

#### Raiders for the first time since 1974, lost five fumbles and had two passes intercepted by the Raiders, who evened their record at 3-3. Rice dropped to 2-4.

Texas Tech had to drive only 36 yards for its first-quarter touchdown and it took quarterback Ron Reeves only nine plays to engineer the drive. Tyler went the final three yards with 5:05 left in the first quarter.

Rice struck back in the second quarter, capitalizing on a fumble by Reeves that was recovered by Rice's Freddy Johnson at the Raider 23. The recovery led to a 34-yard field goal by Kenneth Sam.

turned the ball over for a fourth time on a fumble by running back Tim Sanders. Linebacker Tom Baer recovered at the Owl 37, setting up a 37-yard field goal by John Greve.

Texas Tech missed two other scoring opportunities that kept them from

line in the second quarter, but Reeves was sacked for a loss on a fourthdown play and Rice took possession on downs.

back Clay Renfroe blocked a punt by Walters and Ricky Sanders recovered it at the Rice 17. Tech reached Rice's 1-yard line, but Reeves fumbled on fourth down and once again the Owls took over on downs.

costly turnover in the first quarter

#### SW Texas romps, 55-7

HUNTSVILLE, Texas (AP) -Quarterback Mike Miller scored two touchdowns on runs 12 and three yards and Terry Whitman booted two field goals as Southwest Texas State crushed Sam Houston State 55-7 in a Lone Star Conference football game Saturday night.

Southwest Texas is now 4-2 on the year and 2-0 in the LSC. Sam Houston fell to 1-4 on the season and 0-2 in conference play.

Tim Dixon ran two yards for Sam Houston's only score.

when starting quarterback Robert Hoffmann directed Rice 71 yards to the Tech 9-yard line before he fumbled and Midland's Jeff McCowan recovered at the Rice 10.

McCowan also stopped Rice's final touchdown attempt when he intercepted a pass by Randy Hertel with 46 seconds left in the game.

### Schooler takes 5th running title

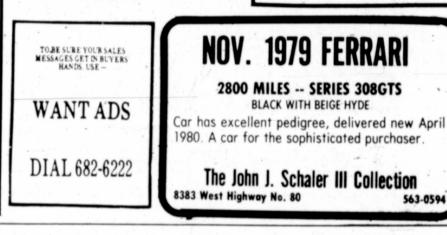

LUBBOCK - Robert Schooler of Midland Lee won his fifth cross-county title here Saturday afternoon in a mighty tough field of more than 110 runners. He was timed in 15:00 for his effort.

He was the only varsity runner for either Lee or Midland High with the rest of the athletes competing in the junior varsity meet.

Midland High's Mike Betterrdge wound up second with a time of 17:15 and Greg Sotello was fifth. Lee's Carl Piccolo was sixth and Velasquez of Lee 19th.

In the girls competition, Lois Hall of Lee finished fifth with Kathy Hamilton 33rd and Pat Hollums 37th.

Next week will be the Midland Cross-Country Meet at Hogan Park.

quarterback Nickie Hall passed for two touchdowns and ran for one Saturday night to lead Tulane to a 28-7 victory over Air Force in an intersectional college football game.

Mall completed 12 of 23 passing attempts for 178 yards, and ran the ball 11 times for another 63 yards.

second guarter and hit two touchdown passes in the fourth quarter.

Air Force is now 1-5-1 for the season. Tulane is 4-3.

### Pitt blisters West Virginia

PITTSBUR(GH (AP) - Backup quarterback Rick Trocano, summoned from defense after Dan Marino was hurt, led a 28-point surge in a five-minute span of the second quarter that gave 11th-ranked Pittsburgh a 42-14 college football victory over West Virginia Saturday.

Trocano, who started the game at safety, threw a pair of touchdown passes after Marino was sidelined late in the first quarter with a recurring knee injury. And Pitt, 5-1, rebounded from a loss the week before at Florida. State.

With the score 7 -7 in the second quarter, Trocano hit four of five passes on a 75-yard touchdo wn drive. Fullback Randy McMillan dove 1 yard for the touchdown with 9: 09 elapsed in the quarter, and Pitt added three more touchdowns in a sp an of 4: 49.

A series later, Trocano and freshman flanker Dwight Collins combined on a 53-yard touchdown pass. It was the fifth touchdown in three games for Collins, who cuaght a toss of about 20 yards and ran away from several defenders before run ning over a final Mountaineer player at the goal line.

Collins produced a nother touchdown in the fourth quarter, throwing a 50-yard scoring bomb on a flanker reverse pass.

### Penn State defeats Syracuse

STATE COLLEGE, Pa. (AP) - Tailback Curt Warner scored on touchdown runs of 3 and 6 yards while fullback Booker Moore slashed for 100 yards Saturday, extending 12th-ranked Penn State's winning streak over . Syracuse to 10' with a 24-7 victory

Freshman quarterback Todd Blackledge iced the victory, Penn State's fifth in six starts, with a 13-yard touchdown strike to freshman Kenny Jackson. Jackson set up the fourth period score with a 22-yard punt return to the Syracuse 25.

Penn State had breezed to a 10-0 halftime lead on Brian Franco's 26; yard field goal and Warner's 3-yard burst which capped a 67-yard, 10-play drive.

But Syracuse, 3-3, scored in the opening seconds of the third period when linebacker Mike Zunic intercepted a Blackledge pass and returned it 11 yards for a touchdown. Defensive linemen Ken Kollar and Herb Butzke hurried Blackledge into making an ill-timed throw.

But the Lions padded the margin two possessions later, using a waunted ground attack to march 80 yarels in nine plays to put the game away. Moore, who only had 11 carries, shredded the Syracuse defense with a 40-yard run as the big play in the drive.

Moore also was a workhorse in Penn State's second-period touchdown drive, ripping off 46 yards on four carries to set up Warner's score.

Warner finished with 76 yards on 24 carries. Overall, Penn State had 200 yards rushing while Blackledge completed eight of 13 passes for 108 yards and one interception.

Syracuse was held to 81 yards passing and 152 yards rushing.

Shark fishermen stole the spotlight as a late summer flurry of new state fish records were certified by the Texas Parks and Wildlife Department. Three tiger shark, each in excess 800 pounds, were submitted as potential new state records. All three exceeded the 815-pounder which had held the record since 1975.

Robert L. Derrick of Alta Loma is the new champ with the 837-pound tiger shark he caught July 4, about 35 miles off Galveston. The new record belonged to Greg Rilat of Texas City for only one day, as he caught 817-pound tiger shark on July 3, also off Galveston.

Another angler who just missed glory was Susan Kret of San Antonio, whose 832-pounder was caught three weeks after Derrick's new record fish. Her shark was caught about 15 miles off Port Aransas.

# Lake Fork provides action for East Texans

Bass fishermen are lized spots on Lake Fork, about 90 miles of east of Dallas, but many catches have to be put back in the water because they are slightly under the 14-inch length limit.

Good strings of crappie and some catfish also are being taken by fishermen, said Steve Smith, TPWD biologist.

The lake, recently opened to the public by the Sabine River Authority, stands at elevation 375 feet or about 7,200 acres, but recent rains have generally bypassed the lake. However, fall and winter rains should bring the lake up to 11,-000 acres and fishing should reach a peak next spring. When full, the lake should have more than 27,000 surface acres.

By next spring, the bass spawn of 1979 should exceed the 14-inch minimum. The bass limit is five per day and 10 in possession.

**VOLVO. FOR ALL YOUR REPAIR** 

One of the biggest vises fishermen to athaving good luck in loca- problems on the lake tach a yardstick or other now, Smith says, is limited access. Since the lake is low, fishermen are not able to use the temporary boat ramps. This problem should be eased when the water rises. Along with rods, reels, lures and boat, Smith ad-

measuring device to the boat's gunwales to measure catches. Many of the fish now caught are about a half inch short of the minimum and must be returned to the lake immediately, says Smith.

Why I can give you real value

Greg Davis, 14, shows off 22

inch brown trout caught in '76.

Each of the kids got a chance to take a

shot with the camera, thereby giving

Drought-breaking rains have improved the outlook for the deer hunting season which will open Nov. 15 in most Texas counties.

The deer situation which was approaching the critical state two months ago has improved enough to forecast a generally good hunting season

The late August and early September rains which fell on most of the state caused rapid growth of forbs and other plants for deer food.

Texas Parks and Wildlife biologist Fielding Harwell said the spring and summer drought caused poor fawn production over the western half of the state, which may be reflected in a fower buck harvest in 1981-82. Also, the dry range condition caused antler development of bucks to be below par in that area.

HOWEVER, the overall picture is much brighter than it was just a few weeks ago, Harwell believes. "Body weights of deer are increasing now, and hunters should find deer in good body shape by the opening of the season," said Harwell.

There are still problems in the state, Harwell noted, particularly in about eight counties west-southwest of San Antonio. "Kinney County and portions of the counties surrounding it had a sharp decline in population during the drought, coupled with a very poor or nonexistent fawn crop."

However, most of the state should have good hunting. The eastern onethird of Texas has a deep population equal to or slightly higher than last year at this time, along with fair fawn crops

In the Cross Timbers and Prairies area west of Fort Worth, populations are down somewhat and fawn production was poor. The same applies for the Edwards Plateau, but Harwell added that losses in that area were mostly in areas of chronic overpopulation.

South Texas has to be considered in separate parts; as the eastern half of the region has maintained deer population equal to last year, while the western half was hit hard by the drought and deer population are down. However, Webb County had fewer losses than other South Texas counties, and even produced a fair fawn crop.

IF MORE rainfall occurs it will continue to benefit deer herds, but rank vegetative growth and ample food will make hunting more difficult as the deer will move less.

Another plus for the deer situation is the acorn crop, which was expected to be disastrous because of the dry weather. "We have noticed a surprisingly good acorn crop in many areas. which will help maintain the deer body condition through the fall," Har-

WATERFOWL SEASO'NS SET-Who knows what this upcoming waterfowl season will be like. Water supplies are in the short, as well as grain crops-the two most vital factors in wintering a good population of ducks and geese

in Texas. The Texas Parks and Wildlife Commissioners have now set the seasons, those equal to last year's, but waterfowl populations could be in short supply in some regions of Texas.

The 1980-81 duck season will run from Oct. 28 to January 18, 1981 in the High Plains Mallard Management Unit (that area of the state lying west of a line from the International Toll Bridge at Del Rio, thence northward following U.S. Highway 277 through San Angelo to Abilene, thence along State Highway 351 from Abilene to Albany and U.S. Highway 283 from Alany to Vernon, thence easterly along U.S. Highway 183 to the point of intersection with the Texas-Oklahoma state line in Wilbarger County). Shooting hours will be from one-half hour before sunrise to sunset.

The remainder of the state's duck season will run from Nov. 8 through Nov. 30 and Dec. 13 through January 18, 1981.

Duck limits once again will be by the point system. One to 10 ducks in the aggregagate based on the following 100-plus point system.

100-point ducks-Canvasback; 70point ducks-Hooded mergansers, mottled ducks, Mexican-like ducks, mallard hens, red-heads and wood ducks; 10-point ducks-Gadwalls, mergansers (except hooded mergansers), pintails, scaups, shovelers, all species of teal (blue-winged, cinnamon and green-winged) and wigeon; 20-point ducks-All other duck species and sexes not listed above. Like the mallrd drake.

The daily coot bag limit is 15 with a possession limit of 30.

GEESE-The season west of U.S. Highway 81 will run from Oct. 28 through January 18, 1981. Shooting hours will be the same as for ducks and the bag limit will be five, not to include more than two Canada or white-fronted geese in the aggregate. Possession limit is ten, not to include more than four Canada or whitefronted geese in the aggregate.

Goose season east of U.S. Highway 81 will be from Nov.' 8 through January 18, 1981. The bag limit on light geese (Snow, Blue, Ross); five. Dark geese (Canada, White-fronted); one Canada or one White-fronted.

The season on little brown or sandhill cranes will be from Oct. 31 through January 31, 1981 in Zone A. Daily bag limit will be three with a possession limit of six. In Zone B, the sandhill crae season runs from Dec. 5. until January 31, 1981. Shooting hours for both zones will be the same as duck and goose shooting hours.

Hawaii defeats UNM by 31-14

ALBUQUERQUE (AP) - Linebacker Marcus Tarver returned a blocked field goal attempt 54 yards for a touchdown and Hawaii's defense converted three other New Mexico mistakes into touchdowns as the Rainbows defeated the Lobos 31-14 Saturday night in a Western Athletic Conference football game.

Hawaii broke the game open with three third quarter touchdowns, all of them resulting from New Mexico miscues

Rainbow halfback Gary Allen scampered into the end zone after recovering a teammate's fumble at the New Mexico 10-yard line. Fullback David Toloumu scored from two yards out after Tarver's return with the blocked field goal attempt by New Mexico.

SMU	coach	is fair	

DALLAS (AP) - Dudley Parker, associate athletic director for Southern Methodist University, underwent open heart surgery Thursday and was reported in fair condition at Presbyterian Hospital.

Parker underwent a 4-hour operation to correct a blood flow blockage and was expected to be under intensive care for at least two days.

Parker has been connected with SMU athletics for 20 years as a coach and administrator. He joined the SMU staff in 1960 from the University of Houston and served under SMU coach Bill Meek.

Parker was secondary coach for SMU from 1962 to 1972 under Hayden Fry. He was an assistant under Dave Smith, Fry's successor, for three years before becoming assistant athletic director in 1976.

## LSU downs Kentucky, 17-10 on touchdown in final seconds

LEXINGTON, Ky. (AP) -Alan Risher's 2-yard scoring run with 41 seconds to go capped an 80-yard drive that lifted Louisiana State to a 17-10 Southeastern Conference football victory over Kentucky Saturday night.

LSU, 5-2 overall and co-leaders with Alabama in the SEC at 3-0, mounted its clinching drive after Kentucky's Randy Jenkins plunged one yard for the score that pull the Cats into a 10-10 tie

with 6:50 remaining in the game. It was LSU's only significant offensive showing after the Tigers opened the game with a 69-yard drive that ended with Hokie Gajan's 1-yard scoring run with 11:21 to go in the first quarter.

Kentucky, 2-4 overall and 0-2 in the SEC, got on the board on Tommy Griggs' 24-yard field goal with 14:16 left before haltime.

# Florida State rips Boston College

TALLAHASSEE, Fla. (AP) - Linebacker Ron Hester blocked two punts, one for a touchdown, and reserve tailback Ricky Williams ran for 109 yards Saturday night as No.7 Florida State rolled to an error-filled 41-7 college football victory over Boston College.

Seminoles kicker Bill Capece kicked four field goals, running his season total to 18 and bettering the old school record of 14 in a single campaign.

Florida State ran its record to 6-1 with the homecoming triumph, while Boston fell to 2-4.

Florida State also got touchdowns from fullback Michael Whiting and quarterbacks Rick Stockstill 'and Kelly Lowrey. Defensive back Rich Dyer scored Boston College's only points when he intercepted a Stockstill pass and returned it 83 yards.

### SE Louisiana wins

HAMMOND, La. (AP) - Charlie Thomas ran for two touchdowns and joined two other Southeastern Louisiana teammates who rushed for 100 or more yards Saturday in leading the Lions to a 47-6 homecoming football victory over Texas Southern.

Thomas ran 9 and 21 yards for touchdowns and Wilson Alvarez kickd a 43-field goal in a 31-point first half that propelled Southeastern to a 5-1 record. Texas Southern is now 1-5.

Thomas finished with 100 yards and 15 carries as SLU backs ran for 386 yards on 61 attempts. Mac Boatner had, 11 yards on 14 carries and reserve running back Kendall Denmark also had 11 yards on 15 attempts.

Boatner also ran 27 yards and Denmark 34 yards for touchdowns, while Southeastern also scored on a Greg Domiano's 16-yard run, on a safety when Richard Woodward tackled TSU guarterback Jackie Hicks in the end zone and on a 20-yard pass from Scott Allen to David Patterson.

Allen, the Lions' punter, was the fourth quarterback used by SLU.

Texas Southern managed its only score in the fourth quarter on a 38-yard pass from Hicks to Carl Williams

### Drake overcomes surge to down WTSU, 27-21 three consecutive games in one sea DES MOINES, Iowa (AP) - Drake

son since 1972, and guarantees the quarterback Rick Casko threw for Bulldogs of their best season record three touchdowns as the Bulldogs since 1972. held off a second half surge by West Texas State for a 27-21 win in a Mis-

"I really believe this is the best football team we've played so far this year," Shelton said of West Texas.

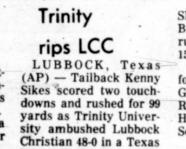

In the first half Casko threw scoring strikes to Tim McManus and Bob Graff and Henrik Mike-Mayer added a 42-yard field goal for a 17-0 Drake halftime lead. Drake came into the game 10th in the nation in total offense. West Texas State was held to no yards passing in the first half, as the Bulldogs intercepted all three of quarterback Matt Patterson's attempts.

In the seond half, after a 58-yard touchdown from Casko to Graff and a 43-yard Mike-Mayer field goal, the Buffaloes started to chip away at the Drake lead. In three consecutive drives, West Texas got touchdown runs from Danny Clark, Mark Tidwell and reserve quarterback Ricky Davis to cut Drake's lead to 27-21:

The Buffaloes' hopes vanished, however, after a late drive stalled on Drake's 29 yard line.

Casko ran out the remaining 58 seconds. Casko finished with 15 completions in 28 attempts for 265 yards.

Christian 48-0 in a Texas Intercollegiate Athletic Association game Saturdav

KANSAS CITY, Mo. (AP) - Lonnie Shelton tossed in a season-high 30 points to power the Seattle SuperSonics to a 127-122 National Basketball Association victory over the Kansas City Kings Saturday night.

SuperSonics down Kings

Forward John Johnson scored 26 points and guard Paul Westphal, who the Sonics acquired in an off-season trade with Phoenix, added 23. Fred Brown, of Seattle, added 21.

The Sonics had to stave off a Kansas City rally late in the fourth quarter to hang on to their second victory of the season.

Trailing by as many as 11 points late in the third quarter and early in the fourth quarter, the Kings trimmed the lead to six points and had a chance to get to within four, but Reggie King missed all three shots in a bonus free throw situation with 4:06 left in the game.

From that point on, the Sonics outscored the Kings 9-4 to get their lead back to 11 points. The Kings could get no closer than five points the rest of the way.

### Mean Green in 29-10 win

MEMPHIS, Ten. (AP.) - North Texas State's pony-sized workhorse, Malcolm. Jones, rushed for 188 yards Saturday night to lead the Mean Green to a 29-10 college football victory over Memphis State at Liberty **Bowl Memorial Stadium.** 

Jones, a 5-7, 155-pound senior, car-

ried 37 times during the night, gaining 100 yards in the second half as North Texas pulled away from a 10-7 halftime lead.

Mean Green running back Bobby Daniels scored on second half runs of four and six yards on the way to the visitors' fourth victory.

#### By ALAN SAYRE **Associated Press Writer**

The final gun saved top-ranked Temple from a shocking loss Friday night, but No. 2 Plano fell in an upset that stunned the Texas gridiron scene and promises a shakeup in The Associated Press schoolboy football poll. Temple barely survived a fourth-

# Dallas Green denies he ordered Noles to throw at KC's George Brett

KANSAS CITY, Mo. (AP) - Philadelphia Phillies Manager Dallas Green said he did not order reliever Dickie Noles to throw at George Brett Saturday, but the Kansas City All-Star said if he had gotten one more pitch under the chin, "I go out to the mound."

With the Royals leading 5-1 in the fifth inning of Game Four of the World Series. Noles threw two strikes to Brett, then tucked a slider right under his chin. Brett spun to avoid the pitch, just barely.

"I don't know if it was a knockdown pitch," Brett said. "He's the only one who knows."

BRETT SAID HE refrained from charging the mound because he didn't want to get thrown out of the game. "I want to stay in the game and hit and field ground balls," he said.

After the incident, Kansas City Manager Jim Frey charged angrily from the dugout. He argued first with home plate umpire Don Denkinger, then with Phils first baseman Pete Rose, who interceded in the argument.

"He (Rose) told me to get off the field," Frey said. "I don't remember my reaction. Then he told me he (Noles) wasn't throwing at George. Pete Rose doesn't know if he was throwing at Brett. I don't know if he was throwing at Brett. Dallas Green doesn't know if he was throwing at Brett."

Asked if he had seen a knockdown pitch, Green responded: "I didn't see a knockdown pitch. Was there one today? The only guy who got upset about it was Jim Frey. Brett didn't."

AFTER THE INCIDENT, Denkinger warned both benches that if there was another brushback, both pilots would be ejected along with their pitchers.

Asked if he planned to retaliate, Frey said: "I never, ever tell a player on a ballclub to throw at another player. All that stuff about saying he was just trying to throw high and tight, well, I've seen two or three players almost killed by brushback pitches."

Phils catcher Bob Boone said Noles; who could not be found in the clubhouse after the game, was not trying to knock Brett down. "He was trying to come inside and it sailed," Boone said. "A normal hitter backs off, but George drove in. That's what makes him a .390 hitter."

Brett added: "Boone told me he didn't know how I got outre be way." Dennis Leonard, the opposing Kansas City pitcher at the time said he did not consider retaliation because he didn't want to be ejected. Dan Quisenberry, who relieved Leonard in the eighth, had his own theory.

"I feel that with our World Series checks, we'll invest in nuclear arms," he said

### Sul Ross upsets Austin College

ALPINE, Texas (AP) - Sophomore guarterback Larry Hill threw for three touchdowns and 331 yards as Sul Ross State upset Austin College, 40-34, in a Texas Intercollegiate Athletic Association contest Saturday. Sul Ross' ground attack was led by running back Joey Caceras, who jaunted for 104 yards and one touchdown.

Kangaroos' quarterback Larry Shillings threw for two touchdowns and

Within moments, Ellison tallied two more times on two Springfield passes - a 19-yarder to Donahue Walker and a 33-yarder to split end Billy Wil-

liams, who had caught a 43-yard toss for the underdogs' initial score in the second quarter.

Following a Temple punt, Ellison got the ball back at its own 20 with 28 seconds left and moved it 13 yards with two quick pass completions. With one second left, Springfield threw to Williams for 33 yards, but the speedy receiver was tackled at the Wildcat 26 as time ran out.

Greenville kicker Ronnie Jackson booted a 26-yard field goal with 10 seconds left to seal Plano's first defeat of the year.

Jackson's kick capped an almost unbelievable defensive effort by Greenville, which sent hometown fans into hysterics with two successful goal-line stands that shut down Plano touchdown drives in the second half

Needless to say, the citizenry loved it.

"Nothing like this has ever happened in Greenville as long as I have been here and I have been here 18 years," said winning coach Pittman Keen after he was hoisted aloft by a swarm of happy fans following the stunning upset.

No. 3 Brazoswood also joined the ranks of formerly undefeated Friday night, falling 24-7 to unrated Stafford Dulles.

IN OTHER GAMES involving topranked Class 5A teams, No. 5 Conroe trounced Houston Jersey Village, 40-6: sixth-ranked Odessa Permian stomped Big Spring 42-0; seventh-rated Highland Park blitzed North Mesquite, 42-20; No. 8 Bryan whi-tewashed Killeen, 7-0; and ninthseeded Euless Trinity pounced on South Grand Prairie, 47-14.

son tangled with Beaumont Charlton-Pollard Saturday. No. 10 Lubbock Coronado had the

weekend off.

In Class 4A, No. 1 Bay City edged Wharton, 14-7; second-ranked Gre-gory-Portland outbattled Tuloso-Midway, 19-7; third-rated Navasota was upset by Huntsville, 19-14; Gainesville, No. 4, slipped by Keller, 19-14; and fifth-place Beaumont Hebert bombed Bridge City, 57-0.

Sixth-ranked Waco Connally fell to Gatesville, 7-6; No. 7 Andrews beat Monahans, 21-14; eighth-seeded Corsicana defeated Seagoville, 33-21; ninth-place Wichita Falls Hirschi rolled to a 22-6 win over Vernon; and No. 10 Paris overcame Rockwall, 21-

In Class 3A, No. 9 Stamford knocked off top-ranked Breckenridge, 28-23.

11.

No. 2 Childress trimmed Floydada, 14-3; third-rated Pittsburg blanked, North Lamar, 16-0; fourth-ranked Edna blistered Yoakum, 41-0; and Allen, No. 5, downed Lake Dallas, 23-13.

SIXTH-RANKED Cedar Hill trounced Red Oak, 56-8; No. 7 Slaton destroyed Frenship, 54-10; eighthrated Refugio ambushed George West, 38-7; and No. 10 Hallettsville outdueled Karnes City, 10-6.

Pilot Point, the No. 1 squad in Class 2A, embarrassed Aubrey, 58-0; second-ranked Waskom blasted Beckville, 35-0; third-rated Troup shut out Elkhart, 32-0; fourth-place Groveton beat New Waverly, 20-0; and No. 5 Shiner posted an easy 27-0 win over Schulenburg.

Sixth-ranked Panhandle downed Phillips, 27-7; No. 7 Tidehaven crushed Ganado, 29-0; eighth-rated Wheeler edged Wellington, 7-6; and Rotan, ranked ninth, bludgeoned Hawley, 48-0.

# top NFL contests

Cowboys, Eagles

#### By The Associated Press

It is being called Super Bowl XIV 1/2, a major stepping stone to the real National Football League champion-

ship next January in the Superdome. Today's game in Philadelphia be-tween the Eagles and the Dallas Cowboys matches two of the National Football Conference's top teams, statistically, record-wise and, most obviously, emotionally.

'We'll be just as emotional as they will be, I can tell you that, even if the whole city is talking Super Bowl," said Randy White, the Cowboys' sterling defensive tackle, as the teams gear up for the showdown over sole possession of first place in the NFC East.

THE WHOLE city, of course, wasn't just talking Super Bowl. It was talking World Series, too. There's a lot of championship talk being tossed around

"It will be a championship game for them," White said of the Eagles, who share the divison lead with Dallas at 5-1. "You have to respect that. It should be wild."

Today's other NFL games are New England at Baltimore, Buffalo at Miami, Atlanta at New Orleans, Detroit at Chicago, Green Bay at Cleveland, Minnesota at Cincinnati, St. Louis at Washington, Seattle at the New York Jets, Kansas City at Denver, Los Angeles at San Francisco, the New York Giants at San Diego and Tampa Bay at Houston. On Monday night, it's Oakland at Pittsburgh.

LAST SEASON, the Eagles and Cowboys split their two games, each losing at home. Philadelphia has some happy memories of its visit to Texas Stadium, besides a 31-21 victory. For one, Harold Carmichael caught two Ron Jaworski touchdown passes and, at the time, extended his NFL record of consecutive games with at least one reception to 107 - a number which has since risen to 118. For another, Tony Franklin kicked a 59-yard field goal, the second longest in NFL history.

With that victory secure, the Eagles were supremely confident that they could handle the Cowboys at home, in Veterans Stadium, too. "They were cocky when we walked in there last year," White recalled. "Just because they beat us in Dallas they thought they had it won before we went up there. They thought they were the division champions just because they had embarrassed us. It didn't turn out that way.'

What happened was that Robert Newhouse broke a 10-10 tie with a 17-yard TD run, then Butch Johnson caught a 17-yard Roger Staubach pass for what proved to be the winning score in a 24-17 Dallas triumph. Wilbert Montgomery, who rushed for 126 yards, 37 on a touchdown

sprint, in the teams' first meeting and scored both Eagles' TDs in the second, sat out last Sunday's 31-16 victory over the New York Giants, allowing a recurring groin injury to heal.

THE COWBOYS don't have Staubach now - but they don't seem to miss him much. Danny White, coming off a sensational performance against San Francisco (four TD passes, three to Drew Pearson, in a 59-14 rout of the 49ers), is the NFL's leading passer.

White, Terry Bradshaw of Pittsburgh and Dan Fouts share the league lead in TD tosses with 13 apiece. But while Fouts has been intercepted 11 times and Bradshaw eight, White has been intercepted only four times.

Jaworski, with 12 TD passes and six interceptions, is fourth in the league in passing.

The bashing of the 49ers "was a confidence builder," said Randy White. "We just couldn't do anything wrong. That was fun. But we know it's going to be different against the Eagles."

THE COLTS, riding the Bert Jonesled offense which is third overall in the American Football Conference behind only Pittsburgh and San Diego - takes on the high-powered Patriots with a shot at moving into a tie for first place in the AFC East. Baltimore is 4-2 compared to 5-1 for the Pats and the Buffalo Bills, the latter having knocked from the unbeaten ranks by the Colts a week ago.

**BALTIMORE'S PRIMARY** weakness appears to be on pass defense, the Colts ranking 13th in the conference. That defense will try and collar New England quarterback Steve Grogan, the conference's passing leader.

Elsewhere, New Orleans will be trying for the seventh consecutive week to chalk up its first victory of the season; Detroit, led by league rushing leader Billy Sims, will be out to solidify its hold on first place in the NFC Central Division; Los Angeles will try to do the same in the NFC West; San Diego the same in the AFC West, and Pittsburgh, embarrassed for the second time this season by Cincinnati, the same in the AFC Central.

#### McMurry wins, 28-0

STEPHENVILLE, Texas (AP) -**Dudley Woodward and Lester Lavalis** rushed for one touchdown each as McMurry rolled to an easy 28-0 win over Tarleton State in Texas Intercollegiate Athletic Association action Saturday.

McMurry converted two first-half fumbles by the Texans into touch-downs and buried Tarleton's outmanned defense with 244 yards rush-

ing. McMurry new stands at 6-1. Tarleton is 2-5.

completed 19 of 31 passes for 303 yards. Sul Ross is now 3-4, while Austin College-stands at 6-1.

# How top 10 prep elevens fared this past week

Here is how teams listed in The Associated Press schoolboy football poll fared:

#### CLASS AAAAA

1. Temple (6-0-0) defeated Killeen Ellison, 21-19.

2. Plano (5-1-0) lost to Greenville, 10-7.

3. Brazoswood (6-1-0) lost to Stafford Dulles, 24-7. 4. Port Arthur Jefferson (5-0-0) played Beaumont Charlton-Pollard Saturday.

5. Conroe (7-0-0) defeated Houston Jersey Village, 40-6.

6. Odessa Permian (6-0-0) defeated Big Spring, 42-0

7. Highland Park (6-0-0)) defeated North Mesquite, 42-20.

8. Bryan (6-0-0) defeated Killeen, 7-0.

9. Euless Trinity (6-0-0) defeated South Grand Prairie, 47-14.

10. Lubbock Coronado (6-0-0) did not play.

#### CLASS AAAA

1. Bay City (7-0-0) defeated Wharton, 7-0. 2. Gregory-Portland (6-0-0) defeated Tuloso-Mid-

way, 19-7.

3. Navasota (5-1-0) lost to Huntsville, 19-14.

4. Gainesville (7-0-0) defeated Keller, 19-14. 5. Beaumont Hebert (6-0-0) defeated Bridge City,

57-0.

6. Waco Connally (5-1-0) lost to Gatesville, 7-6.

Andrews (6-0-0) defeated Monahans, 21-14.

Corsicana (6-1-0) defeated Seagoville, 33-21. Wichita Falls Hirschi (6-0-0) defeated Vernon,

22-6.

10. Paris (5-1-0) defeated Rockwall, 21-11.

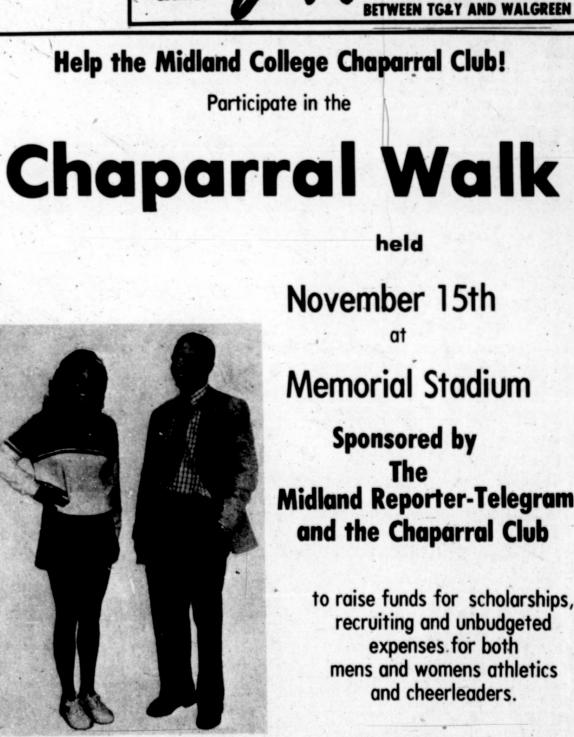

#### CLASS AAA

1. Breckenridge (6-1-0) lost to Stamford, 28-23. 2. Childress (6-0-0) defeated Floydada, 14-3. 3. Pittsburg (6-0-0) defeated North Lamar, 16-0. 4. Edna (7-0-0) defeated Yoakum, 41-0. 5. Allen (7-0-0) defeated Lake Dallas, 23-13. 6. Cedar Hill (7-0-0) defeated Red Oak, 56-8. Slaton (6-0-0) defeated Frenship, 54-10. Refugio (5-1-0) defeated George West, 38-7. 9. Stamford (7-0-0) defeated Breckenridge, 28-23. 10. Hallettsville (6-1-0) defeated Karnes City, 10-

#### CLASS AA

1. Pilot Point (6-0-0) defeated Aubrey, 58-0. 2. Waskom (6-0-0) defeated Beeville, 35-0. 3. Troup (6-0-0) defeated Elkhart, 33-0. 4. Groveton (6-0-0) defeated New Waverly, 20-0. Shiner (6-0-0) defeated Schulenburg, 27-0. 6. Panhandle (6-0-0) defeated Phillips, 27-0. 7. Tidehaven (5-0-1) defeated Ganado, 29-0. 8. Wheeler (5-0-0) defeated Wellington, 7-6. 9. Rotan (5-1-0) defeated Hawley, 48-0. 10. Baird (6-0-0) did not play.

•CAMEL

Teresa Landry, number one women's tennis player at Midland College, and Bank Executive Bill Malone have teamwork. They're a Celebrity Chaparral team and yes, it is work to get enough pledges to earn a jogging suit-but they're ambitious, their goals are high, and they plan to do it for the good of the Chaparral club.

**Memorial Stadium** Sponsored by The **Midland Reporter-Telegram** and the Chaparral Club

to raise funds for scholarships, recruiting and unbudgeted expenses for both mens and womens athletics and cheerleaders.

FLEX-ROUTE GREEN (EAST) **FLEX-ROUTE BROWN (SOUTH) FLEX-ROUTE YELLOW (NORTH)** 

#### THE MIDLAND REPORTER-TELEGRAM, SUN., OCTOBER 19, 1980

#### **MIDTRAN Transfer Point**

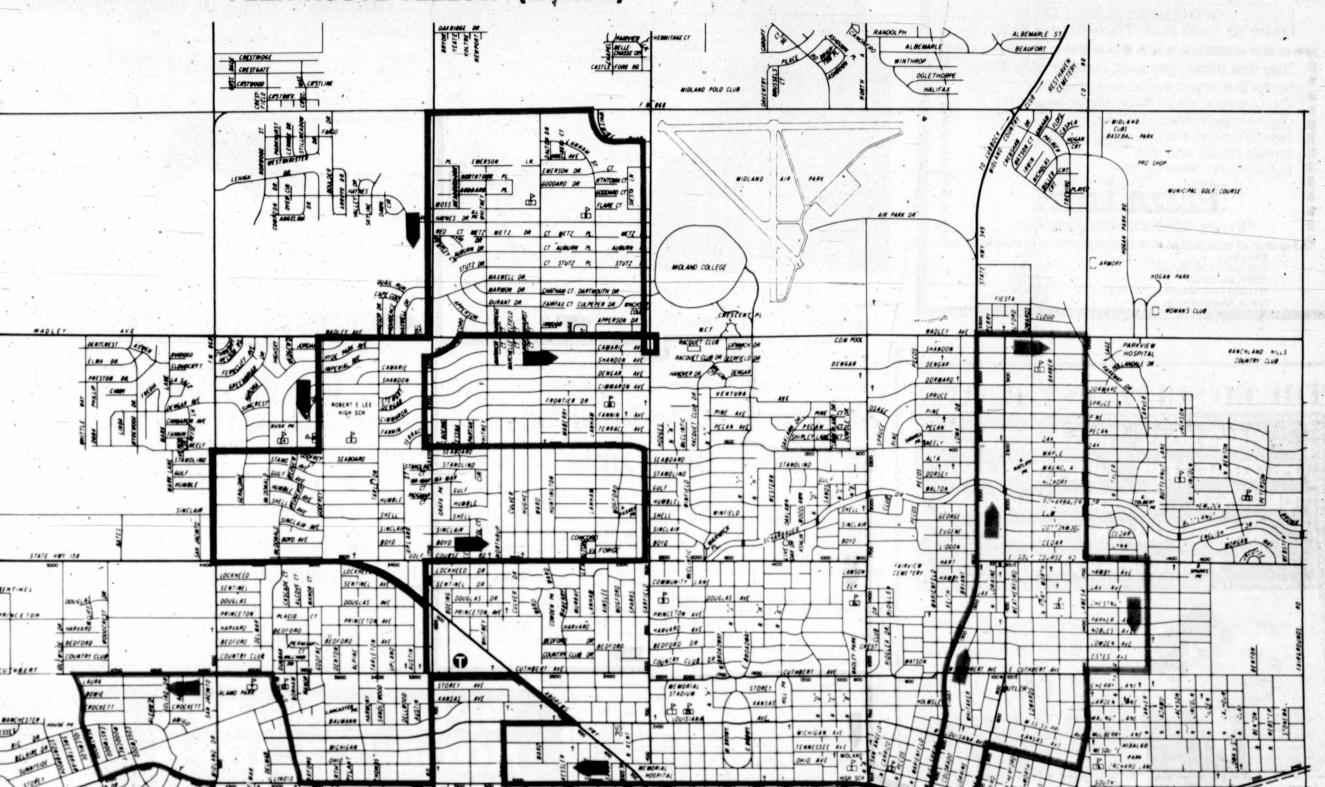

Passengers may transfer from one color route to any other color route to reach their destination at NO ADDITIONAL CHARGE! Transfer points are the Midland County Courthouse and the Town & Country Shopping Center. Transfer times are indicated on the Flex-Route schedules in bold print.

#### PUNTO DE TRASBORDO

Pasajeros pueden trasbordar de una ruta de colór a cualquiér otra ruta de colór para llegár a su destinación sin un PRECIO ADICIONAL. Puntos de trasbordo són en la Casa de Corte del Condado y el centro de compras, Town & Country. Horas para trasbordar son indicadas en el itinerario de Rutas Flexibles en letras negras mayúsculas.

Yellow and Green lines leave the Courthouse at 8:30 arri. The Green line bus returns to the Courthouse by 9:00 am and becomes the brown line bus which also completes its round in approximately 30 minutes. Therefore, there is a Green line bus every half past the hour and a Brown line bus on the hour. The Yellow line leaves the Town & Country Shopping Center at 8:45 am and arrives at the Midland Park Mall at 9:00 am. The Red line leaves the Town & Country Shopping Center at 9:15 am and arrives at the Mall at 9:30 am. Therefore, there is a Red line bus every half past the hour and a Yellow line bus on the hour.

At 6:00 pm (Red line) and 6:30 (Yellow line), busses will depart Midland Park Mall travelling south on Midkiff Street to Illinois Street. The Red bus will drop passengers at home anywhere in Midland West of Midkiff Street. The Yellow bus will drop passengers at home anywhere in Midland East of Midkiff Street. To get a ride on either bus, call MIDTRAN at 684-RIDE.

## Various performers get mixed reviews

pected to the disappointing, with a local group taking top honors.

mance at the Allison Fine Arts Recital Hall was almost a perfect evening. The "almost" does not come from the group's playing ability, but rather from its choice of material. It was an unexpected pleasure to hear a performance of this quality outside a major metropolitan area.

Midland Odessa Symphony, is composed of Eugene Purdue, violin; Teresa Fream, violin; Sally Chisholm, viola; and Jeffrey Levenson, violoncello. Their program included works by Haydn, Beethoven and Krenek

Beethoven is hearing the masterpieces unfold. It was an uplifting and life-giving experience which is the

It has been said that the meaning of a work of art is the work of art. Given this premise and the preceding one that music gives life rather than desecrating it, what is the meaning of Krenek's work?

assumed that this empty feeling was not the fault of the players since their performance of the other composers' works was outstanding:

Regardless of what others say about Krenek, the kindest comment this reviewer can make is that it was an experience in listening, or attempting to listen to unrelated sounds played together.

The Thouvenel String Quartet has a series of four concerts planned for Carnegie Hall where they will

perform all of Krenek's works. Certain of his selec-

tions will also be included in their Midland perfor-

Performances this week ranged from the unex- mances. Perhaps during the course of their concerts this reviewer will find some merit to the atonality and dissonance of Krenek's works.

From the Thouvenel's performance, the week moved to Gary Stewart's. Thursday concert at the Midland Stardust. It was a disappointing experi-

Stewart's April performance here was a success. The sound system was properly set and he and his band performed well together. The audience was responsive with most staying for both sets. That was

Thursday night was a different story. During the first several selections, the speakers were so loud that the sound was piercing. At that time, it was difficult to know whether that was all that was wrong or not. It wasn't.

Stewart's singing was off-key. Although he played two good length sets, many people didn't stay. Less people stood in front of the stage and more danced than at his previous concert.

He did not captivate the audience as he had before, with several hard-core Stewart fans admitting among themselves that "we all have bad days and this was obviously one of his.'

If Stewart was an example of how bad good country can sound when it is performed off-key, TomPall and the Glaser Brothers were at the opposite end of the spectrum.

Their Friday performance, along with T.G. Sheppard and Conway Twitty, at Chaparral Center was right on-key

The group's harmony was excellent which is interesting bécause as TomPall said after the performance, "I think I have bronchitis. My throat's been hurting for several days and it really hurts to sing." Perhaps it wasn't apparent because his singing voice normally has a husky quality.

### **Paramount Pictures plans** to make romance films

HOLLYWOOD (AP) - Paramount Pictures will make films based on the Silhouette Romances in nopes of attracting a new and heretofore unattainable movie-going audience.

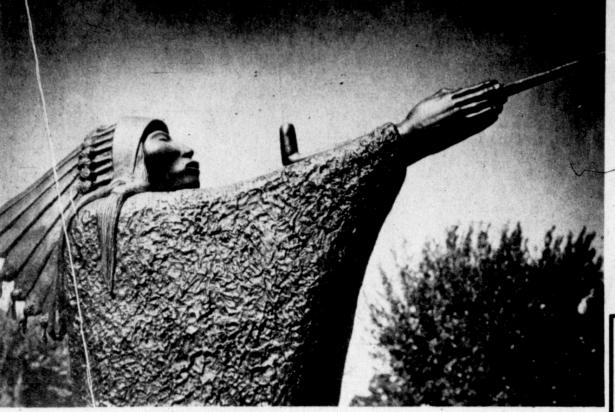

The best-selling books offer readers contemporary romantic fiction set in exotic locales. The Silhouette Romances debuted in May with nine titles and six new titles have been added each month since.

Silhouette Romances are published by Simon & Schuster and Pocket Books, which, like Paramount, are subsidiaries of Gulf & Western Industries.

## Burke planning new adventure

#### **Copley News Service**

HOLLYWOOD - James Burke had popped into town with encouraging words for those who were enthralled with his "Connections," which means a lot of television viewers. "Connections" was the BBC series that was taken

across the pond and shown here on PBS to a tremendous reaction and is, this season, being repeated.

Now, Burke has another venture in the planning stage. It's a series with a seminal idea and a working title of "The Day the Universe Changed," and it will no doubt grace the BBC before we see it. And Burke is over here beating the bushes for financing and, to borrow a phrase, the right connections.

'We're looking to a 1983 starting date," Burke was saying. "It took three years to do 'Connections.' You must get your funding way up front.'

"Is funding a BBC word?" I inquired.

"It is now," said Burke, who is a likable, zestful, fast-talking Irishman, a native of Londonderry, a graduate of Oxford, a onetime professor, an author who has written for Punch in Britain (and Harper's and Vogue in America), a journalist who anchored the coverage of the Apollo moon flights, and for the last 14 years a luminary on the BBC

About his forthcoming series, Burke says: "If Connections' was a history of teaching, which it wasn't really, this new program will be a a history of thinking, which it isn't really.

Specifically, Burke has been looking for assistance among the fraternity of cap and gown.

"I'm trying to get the academics interested at MIT and UCLA," he says, "without whose help the doors don't open. I am storming the fortresses of academe. I rang up a world-famous historian at MIT not long ago. 'Any possibility of seeing you?' I said in a most tentative way. He said, 'Of course.' He told me to pop around. Be glad to help me, he said.

'Now this would be unheard-of in Europe, this easy or comparatively easy access to such important ople. To reach a professor in a university

CRAZED WOMEN

HKK

"My appeal at home is to some middle class but mainly working class," Burke says. "I mean the people who left school permanently at 16. Which is fine with me. The people who went to college have had their chance, haven't they?'

Burke speaks swiftly but with great clarity. He likes to cite the framed quote from the philosopher Ludwig Wittgenstein that hangs in his office at the BBC: "If anything can be said at all, it can be said clearly." Following that credo, Burke with his "Connections" won 50 percent of England's viewing audience

"When the ratings came out," he says, "it chuffed me "It what?"

"Chuffed me. Pleased me. Old World War I slang, or thereabouts

## Headstones now sandblasted

MESA, Ariz: (AP) -- Headstone cutting is a real blast - literally.

Gone are the days of the old stonecutter in his worn leather apron chiseling names, dates and epitaphs into marble or granite.

The old methods have been replaced by sandblasting, which is easier, more efficient and faster, according to brothers Jon and Jeff Kitchel, operators of Mesa Monument.

Most families, say the Kitchels, generally choose unobtrusive headstones and subdued designs due to cost and local cemetery restrictions. 'Usually people are pretty conser-

vative in their requests," says Jon, 21, who received his accounting degree in May from Arizona State University.

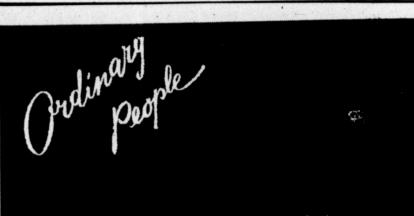

"When they come in and they think about it for a while, they stay pretty

conservative in designs. Even with the colors of granite, they don't want any bright colors. It's a very Republi-can atmosphere in this area."

Since most cemeteries in the Metropolitan Phoenix area are new in comparison to well-known cemeteries in the East, where large, expensively detailed grave markers are the rule, local owners usually restrict head-

stones to one basic style — flat. "Some of the cemeteries in the East are really unbelievable in what people have spent and the time and work that has gone 'into headstones," said Jeff, 25, who got into the business after working for a California ceme-

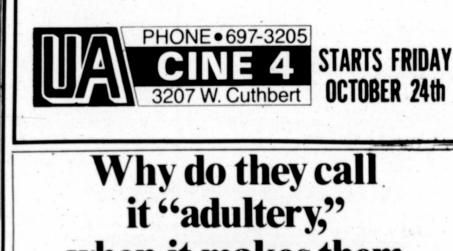

tery. The Kitchels say they can carve a headstone for as little as \$100, while bronze markers cost at least twice that much.

Some films you watch, others you feel

glance. Her husband was more appreciative. Stopping in front of the painting, Prince Philip chuckled: "That's magnificent.

POMPEII, Italy (AP) — Britain's Queen Elizabeth II toured the ancient

ruins of Pompeii on Saturday, including a house with erotic frescoes that

did not appear to faze her in the

The royal trip to Pompeii is part of the British monarch's week-long visit to Italy and the Vatican, her first since 1961.

Aniello Cioffi, one of the Pompeii guards in the House of Vetti, said museum' officials originally covered the painting of Priapus with paper to avoid offending the queen. But British officials insisted that

the artwork be uncovered and the paper came down before the visit began, Cioffi said. "The queen isn't fussed about any works of art," said Mark Pellew, a British Embassy spokesman in Rome.

Neither the queen nor Prince Philip went into a room where the Vettii brothers, merchants who built the house and lived in it, entertained their lovers almost 2,000 years ago. But about 40 reporters jammed into the 12-foot square room to see the erotic frescoes.

The queen wore a white raincoat and a khaki green scarf tied under her chin as she skirted puddles on the cobblestoned streets, trailed by a bouquet of black umbrellas hiding security agents and journalists.

ment said Walesa's trip was designed in large part to mend fences with union locals in the south who were at odds with the Gdansk-based leadership on various organizational issues

One of the issues in dispute was said to be the role of anti-government dissidents within the organization and the level of cooperation the union should seek with authorities.

Answering questions from the crowd, Walesa defended the role of dissidents and intellectuals in helping Solidarity with its legal battles. He said Jacek Kuron, Poland's leading dissident, was lending valuable help

PAP said Western attempts at interfering in Poland's affairs range from 'giving good advice" and showing concern for the good of the Poles" to detraction, instigation, fostering an atmosphere of antagonism and sti-

PAP said the government had recently protested to diplomats from some Western countries, including the United States, West Germany and Britain, saying such interference was "inadmissible.

KRAKOW, Poland (AP) - Independent union leader Lech Walesa warned thousands of workers at a rally Saturday to avoid further strikes against Poland's communist government.

He also reiterated that his free union movement recognized the leading role of the Communist Party in Poland, a statement incorporated into agreements signed by the government and workers that ended last summer's massive strike wave.

"If anyone wants to interfere (in Poland), we'd better warn them against it," he told an estimated 7,000 independent union members.

In Warsa, the official Polish news agency PAP accused Western media. political parties and trade unions of meddling in Poland's internal affairs and "disrupting Poland's ties with" her allies.

Walesa opened a five-day tour of southern Poland Saturday with the anti-strike warning, but said further instructions **xrom** his Gdansk-based union federation, "Solidarity," would depend on government approval of the federation's charter.

SOLIDARITY WAS formed during labor unrest that engulfed Poland and led to unprecedent government concessions, including the right to form unions independent of Communist Party control. The strikes began after the government sought to end meat subsidies.

Walesa said Solidarity leaders would meet Monday to discuss a Warsaw court's failure to approve the group's charter. The court has approved about a dozen charters submitted so far by local independent union groups.

A Solidarity lawyer said union ne gotiators had resolved most of the court's objections, but disputes emerged Friday during a meeting with Polish legislators drafting new labor laws involving many of the workers' strike demands.

The rally took place in Nowa Huta,

## Fraser claims victory in Australian election

SYDNEY, Australia (AP) - Prime with enough seats to wield the bal-

Minister Malcolm Fraser, declaring ance of power between Fraser's coalition and Labor. Pre-election public opinion polis indicated the Laborites would score a narrow victory. Incomplete returns showed the opposition with a higher percentage of the total vote. But the margin was not uniform across the country and Labor, excluded from government for five years, was denied important marginal seats. Fraser, 50-year-old millionaire farmer made his victory claim before a cheering crowd at Melbourne's Southern Cross Hotel. He said of the polls, "All through the campaign I never believed them.'

**HIS CAUTIONS** against further strikes were delivered in the wake of Solidarity's highly disciplined onehour nationwide warning strike Oct. 3 that idled thousands of workers. That nationwide walkout was called

to reinforce demands that the government implement in full all 21 demands made by strikers at the Baltic seacoast ports and elsewhere. Sources within the Solidarity move-

government says it will register a to the movement. **IN ITS SATURDAY** broadcast, ers were reluctant to create a strong to maintain the local branches auton-

mulating conflicts. All this, the agency said, "is ham-

pering the process of renewal ... sows distrust and is aimed at disrupting Poland's ties with her allies."

he never believed predictions that his government would fall to an advancing Labor Party, claimed .victory in Australia's national elections Saturday. He acknowledged, however, that his coalition lost ground.

Slightly more than half of the estimated 9 million ballots cast were counted by Saturday night, and computer projections supported Fraser's claim

Even so, Labor leader Bill Hayden refused to concede defeat. Speaking at a press conference in his home town of Ipswich in Queensland, he said, "We've still got a chance." The 47-year-old economist and former policeman said he hoped the ballots still to be counted would put Labor ahead

Bob Hawke, a former president of the Labor Party who won a seat in the elections, did not share Hayden's optimism

"You'd have to say the government has been re-elected," he said.

Computer estimates indicated Fraser's coalition of the Liberal Party and the National Country Party would be returned to power with a majority of between 15 and 18 seats in the House of Representatives. That compared with a 49 seat House majority the generally conservative coalition took into the election.

Officials said counting would continue through the weekend, and the final government majority probably would not be known for several day

All 125 House seats were at stake, as were half of the 64 seats in the Senate. The party that wins the majority in the House, which is seated for a term of three years, forms the government. The Senate's main legislative role stems from its ability to block House action

Early returns in the Senate race indicated that a splinter party, the Australian Democrats, could emerge

"It's been a very substantial victory, even though some seats have been lost," he said.

Fraser was swept into power in 1975 with a record parliamentary majority of 55 seats. His popularity declined recently, with observers citing as one reason his growing reputation as being aloof and arrogant.

The prospect of a Labor victory had jolted Australia's financial community and prompted a plunge on the stock exchange.

During the campaign, Fraser claimed a Labor victory would mean a capital gains and wealth tax. Hayden denied the allegations.

Hayden countercharged that Fraser was responsible for failing to bring down Australia's 11 percent inflation rate, 6 percent unemployment rate and taxes, and promised an across-the-board \$3 a week tax cut, job creation programs and a gasoline price freeze.

Hayden confined his remarks on foreign affairs to a speech in which he pledged continuing support for Australia's alliance with the United States. He said, "Australia is allied with the United States as a result of a Labor government's far-sighted attitudes 40 years ago."

He promised a resource rent tax onmultinational companies exploiting Australia's huge mineral reserves.

### Border advisory committee urged to concentrate on energy sources

AUSTIN, Texas (AP) - Texas Gov. Bill Clements proposed today that the new Southwest Border Regional Commission Energy Advisory Committee concentrate on the vast oil, natural gas; coal and uranium resources in California, Arizona and Texas.

Because the region is dependent on oil and gas for its agricultural economy, Clements said the four border states should try to increase their influence in shaping national energy policies as they affect the border re-

"We must also recognize the vast productive capacity in Mexico as a way to improve economic conditions on both sides of the border. Thus, it is important for us to have the very best

relations with Mexico," Clements said as keynote speaker for the first meeting of the committee which provides expert advice to the regional commission on border energy policies

The Southwest Border Regional Commission is a federal-state partnership designed to promote economic growth in the 59 adjacent border counties in the four states.

James W. Lauderback, deputy director of the Texas Energy and Natural Resources Advisory Council, said Texas is specifically recommending that the committee endorse infill drilling to optimize oil and gas production.

THE MIDLAND REPORTER-TELEGRAM, SUN., OCTOBER 19, 1980

## Iraq appears to be ready for long conflict with Iran

#### By STEVE K. HINDY ociated Press Writer

NEAR ABADAN, Iraqi-Occupied Iran (AP) - After launching the war with a series of quick thrusts into Iran, the Iraqi army appears to have geared down for a long conflict that now focuses on this oil refining city and the adjacent port of Khorramshahr.

Access to official Iragi opinion is limited. But Western military sources and other observers have noted the Iragis are moving steadily on these two fronts, while maintaining positions near Ahwaz, Dezful and central border areas to the north.

The sources have described Iraqi tactics as siege and attrition, but they note the Iraqis have been most aggressive along the disputed Shatt al-Arab estuary - the border between the two nations

Reporters who went to within a mile of the battlefront near Abadan on Thursday saw the Iraqis had moved about 12 miles toward the city a week after crossing the Karun River, which runs into the Shatt al-Arab at Khorramshahr.

If the precedent of Khorramshahr holds, the Iraqis likely will not "storm" Abadan, site of one of the world's biggest oil refineries. In

#### An Analysis

Khorramshahr, the Iraqis established firm positions in northwest neighborhoods of the port and then pounded the city with artillery.

One source, a retired Western general who works as a journalist, said it appeared the Iraqis did not want to take the casualties or attack the civilian population with a large-scale assault on the cities.

Other observers have been surprised at the limited use of the Iraqi air force.

The general, who has talked with Iraqi officers about river crossings and pontoon bridges, said he was unable to get a hint about Iraq's overall strategy

Iraqi Foreign Minister Saddoun Hammadi and others said in the first week of the war that they were ready to negotiate peace with Iran if Iran recognized Iraqi claims to the Shatt al-Arab and other disputed border territory

The Iranians refused, and many experts in the West have speculated the refusal spoiled Iraqi's hopes for a short war. Iraqi officials have said the Iranian position forced Iraq to continue taking more and more Iranian territory - far beyond the roughly 400 square miles they say they want.

Some observers believe Iraq needs a bargaining chip like Abadan or Khorramshahr to negotiate the kind of agreement they want with Iran.

The danger of a long war for Iraq is that it will be sucked deeper and deeper into Iran and face guerrilla attacks by supporters of Ayatollah Ruhollah Khomeini — a kind of Vietnam scenario in which public support for the Iraqi government might wane, diplomatic sources say.

There are already indications the Iraqis may be trying to prepare public opinion for an extended conflict. Iraqi officials have repeatedly noted their economy and military are stronger than Iran's, which has been crippled by a U.S. embargo and the war.

In a televised speech last week, the governor of Iraq's central bank assured Iraqis that public spending could continue at present levels for a year despite the war. Diplomats estimate Iraq has up to \$37 billion in reserves.

Yet Iraq's oil facilities have been damaged in the war and the Persian Gulf's second largest oil exporter depends on oil revenues to carry out ambitious development plans and purchase military hardware. Iraq had earned about \$30 billion a year from oil exports and that income has now been cut off.

## Iraq, Iran issue conflicting reports

BEIRUT, Lebanon (AP) - Iraq claimed it broke the back of Iranian resistance in fierce battles around Abadan and Khorramshahr on Saturday, but Iran said defenders of its vital oil cities were engaged in hand-to-hand fighting to break an Iraqi siege

At the major war front on the Shatt al-Arab waterway, Iraq said it had crushed "desperate attempts" by Iran to break the siege of the oil refining city of Abadan and the oil port of Khorramshahr, 10 miles away\_\_\_\_\_\_ Iraq claimed 70 Iranian troops were killed in the

fighting and 17 taken prisoner. It said 26 Iraqis were killed and that "remnants of the racist enemy forces have been breaking up on all fronts.'

Iran reported an early morning lull in the fighting at Khorramshahr, but a noon broadcast by Tehran Radio said hand-to-hand combat was raging and 'bombs and rockets are raining on the city.

Iranian communiques insisted, however, that Iranian forces had recaptured the main supply highways to the two beleagured cities and managed to keep the roads open.

He is the only The Iranians are predo Arab leader openly to minantly Persians, no back the Iragis. Arabs. Now, the source said

Diplomatic sources said opposition to Jordan's involvement comes from two main sources: The relatively small fundamentalist Moslem groups that draw inspiration from Ayatollah Ruhollah Khomeini's Islamic revolution in Iran and from the

Palestinians. The kingdom has more Palestinians than Jordapians, an estimated 1.4 million Palestinians compared to 800,000 Jordanians. That does not count Palestinians living in the Israeli-occupied West Bank of the Jordan River.

Of the Palestinians living east of the Jordan River, more than 876,000 are refugees or displaced persons from areas taken over by the Israelis in the 1967 Mideast war, according to U.S. estimates.

The problem of conflicting nationalisms has been'a constant source of problems for Jordan. Many Palestinians identify with Yasser Arafat's Palestine Liberation Organization - which has adopted a position of strict neutrality in the Persian Gulf war. PLO leaders have repeatedly said the war detracts from their struggle for a homeland.

Ten years ago, Palestinian commandos using Jordan as a base to launch attacks on Israel,

saw as muted criticism of the policy of support ans in the east will take the pressure off the Isfor Iraq from Islamic conservatives, Imam Ahmed Huleil spoke out Government officials in Amman's Hussein Mosque last week saying that Moslems should not be spilling their blood in a struggle against other Moslems, no matter hoir nationality

There's nothing the pet of the week likes better than a roll in the grass - except maybe a good place to call home. He's number 391, a black and white bulldog mix about 11/2 years old and he's available for adoption at the Midland Animal Con-

trol Center, 1601 E. Orchard Lane, from 9 a.m. to 4: 30 p.m. Monday through Friday and from noon to 2 p.m. Saturday. (Staff Photo by Edward McCain)

## Grand jury systems in several cities flawed, GAO report says

SEATTLE (AP) — The federal grand jury system in seven major American cities is so flawed that procedures have allowed witnesses to be threatened and prosecution targets to flee before being indicted, concludes a report from the federal General Accounting Office.

In addition, said the GAO report, haphazard security has brought some investigations to hasty ends and damaged some reputations.

The report dealt with grand jury operations in Seattle, Las Vegas, Nev., Kansas City, St. Louis, Newark, N.J., and the New York City boroughs of Manhattan and Brooklyn.

An article on the report was carried in Saturday editions of The Seattle Times. The article did not specify what

problems, or how many, surfaced in each city said the report concluded the problems were "only the tip of the iceberg," since only seven of 95 federal district courts were studied.

The GAO report found 492 "disclosures" of supposedly secret grand jury information between 1973 and

in the seven cities, "including five

alone

who were murdered, 10 who were intimidated and one who disappeared.

The report stressed that many of the disclosures were made legally, taking place in open court, but others came from administrative blunders such as leaving files on desks or in unlocked cabinets or failing to exercise even the simplest forms of securi-

In six of the seven districts, contract court reporters or typists worked out of their homes, keeping tapes, notes and transcripts in spare rooms or garages.

Six of the seven court districts had no procedures for storing grand jury material and in two instances, the court reporters' offices were burglarized.

In some cases, the GAO found, court reporters leaked grand jury information to prosecution targets. Two court reporters later were prosecut-

If reporters can penetrate grand jury security, so can criminals, the report said in essence. The grand jury has roots in English

#### posed to be secret, especially because much of it never produces charges and can damage reputations if released.

Response to the report varied. Federal judges generally agreed with the findings, but questioned whether courts have the space or funds to provide better security.

The Justice Department, representing U.S. attorneys' offices in the districts, noted that many examples of grand jury leaks came from witnesses themselves, who are allowed to discuss grand jury testimony if they choose.

### Sixteen teachers jailed in Ohio school strike

YOUNGSTOWN, Ohio (AP) — Sixteen teachers who violated a court order to return to work during a strike against the Boardman school district went to jail Saturday to begin serving 10-day sentences.

A crowd of nearly 150 people, most of them teachers, welcomed the group with applause as they arrived at the Mahoning County Jail.

# Real gangland drama shapes up in Hollywood

#### **By LINDA DEUTSCH**

LOS ANGELES (AP) - In the gray marble gloom of federal court, a few miles from the Hollywood film factories that produced "The Godfather," crowds line up for admittance to a real gangland drama.

On trial in the court of U.S. District Judge Terry Hatter are five reputed Mafia figures. A confessed hitman is on the witness stand. Last week, court watchers got what they came for - a glimpse into the underworld, replete with blood oaths, secret handshakes and vows of silence.

The defendants call it fantasy - a picture as fictional as "The Godfather." But the government's organized crime strike force, which fought for three years to bring the case to trial, says it's the real thing - an inside look at a West Coast branch of La Cosa Nostra.

The star of the government case is a silver-haired informer in hornrimmed glasses - Aladena "Jimmy the Weasel" Fratianno, 67, a confessed mob executioner.

Fratianno has been called the most important Mafia informer since Joseph Valachi spilled his story to the McClellan rackets committee in

"What is the name of the criminal organization to which you belonged?" asked James Henderson, attorney for the organized crime strike force.

starting his story of mob migration to

"How do you get out?" asked Henderson.

"There's no way out, sir," said Fratianno. "They tell you, 'You come in alive and you go out dead.""

Across the courtroom at two defense tables are the drama's co-stars five aging men whose cheerful demeanor contrasts sharply with the grim accusations made by Fratian-

They are charged with racketeering, extortion, obstruction of justice and conspiracy in a series of crimes which stem from the slaying of Frank "The Bomp" Bompensiero, a mobster who turned informer.

Here are glimpses of the key play-

-Louis Tom Dragna, 59, bald with a fringe of white hair, comes to court in casual attire, sweaters and jeans. He sometimes brings Milky Way candy bars for spectators or the deputy marshals manning the high security metal detector.

Dragna, nephew of onetime Mafia boss Jack Dragna, has been named

 The defendants call it fantasy — a picture as fictional as "The Godfather." But the government's organized crime strike force says it's the real thing -, an inside look at a West Coast branch of La Cosa Nostra.

by Fratianno as one of those who marked Bompensiero for death. The execution, Fratianno said, was planned at the California Mart, center of the Los Angeles garment industry, where Dragna has a dress manufacturing company.

-Dominic Phillip Brooklier,66, named by Fratianno as the boss or "capo" of the Los Angeles Mafia, is a. handsome, gray-haired man who watches with unabashed pride as his son, lawyer Anthony Brooklier, aids

## Would-be auto thief learns to leave Rolls Royce alone

DALLAS (AP) — Another potential auto thief learned a valuable lesson Friday — don't waste time stealing a **Rolls Rovce.** 

One of the British-made luxury autos was taken from a parking garage in downtown Dallas late Thursday. It was recovered Friday morning, parked behind a coffee shop just a few miles away.

Store owner Vicki McCraw spotted the Rolls when she drove to work Friday - it was in her parking spot, and the first thing she did was call police because she was sure it was stolen

"I knew nobody would drive up the alley here and then leave a car like that unlocked," she said, explaining her suspicions.

The \$87,000 car had been left in the parking garage by owner Jerry

McCutchin. The only thing missing was the 18-karat gold, diamond-studded ignition key, worth \$1,500.

"I'd give a \$500 reward to get it back and I wouldn't ask any questions," oilman McCutchin, 50, said.

His car was recovered undamaged except for a torn roof covering and a small dent on top. Police said that damage was inflicted when parking garage attendants saw the car being driven away and tried to stop the theft by shutting the metal garage door, but the driver scraped underneath and escaped.

The managing director of the local Rolls Royce dealership, British native Bill Ferris, said most professional car thieves have learned to steer clear of his product.

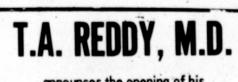

Common Pleas Judge Clyde Osborne sentenced the teachers to 10 days in jail and \$500 fines for violating his back-to-work order that was issued during a 26-day-old strike. Most of those found in contempt were members of the Boardman Education Association.

The teachers stayed in the lockup from 8 a.m. to 8 p.m. They were to report back to the jail for another 12-hour session on Sunday.

Capt. Anthony Noday of the sheriff's office said the teachers would be kept completely segregated from the jail's criminal population.

Osborne said the sentence is to continue for the next four weekends.

"I don't feel any bitterness towards the judge," said Robert Williams, president of the education association. "He was caught in the middle and did what he had to do to protect the integrity of the court.

## U.S. casino dazzles Chinese tourist officials

STATELINE, Nev. (AP) - The house band played "The Gambler" and waitresses in thigh-high togas dispensed drinks as a wide-eyed delegation of Chinese tourist agency officials got their first look at an American gambling casino.

They came, they saw and they were probably a bit overwhelmed by Caesar's Tahoe hotel-casino, a dazzling high-rise playground of green felt and red velvet perched on the edge of Lake Tahoe.

The delegation from the People's Republic of China is visiting American vacation spots to learn about Western methods of promoting tourism. The officials already have visited New York, Washington, D.C., Orlando, Fla., and New Orleans. They saw the casino Friday night and were to leave for San Francisco on Saturday.

The trip is being sponsored by the National Committee on United States-China Relations, a public, non-profit educational organization.

David Woo, a bilingual casino executive at the Tropicana Hotel in Las Vegas, led the delegation through the posh gambling area of Ceasar's.

"They are amazed," said Woo, leaning against a cashier's window as the Chinese gathered in a circle next to a row of blackjack tables. "This is something different

casinos, but they say they don't contemplate any such plans," he said.

Woo drew laughs from the group when he explained, in Chinese, that the nickname for slot machines is "one-armed bandits.

A moment later, delegates asked a question of Mike Liu, a State Department interpreter accompanying the tour. "They wonder whether anybody would win at all," Liu said, smiling. "Any kind of gambling is completely illegal in China, so they really have no idea.

Or, as one English-speaking member of the group, Chinese tour guide Li Dongwen, put it, "We don't know exactly what is going on here.'

Liu said one of the questions asked him was, "If a person wins, does the money go to the private individual?"

That was about as close as the dialogue came to politics. Asked their opinion of what they saw, group members invariably said politely that they hadn't had time to think about it and couldn't, in any case, compare it to China.

"Our system is different," said Li, echoing the words of other members of the delegation. Janet Cady of the National Committee on U.S.-

"I asked them if they are contemplating setting up China Relations said she included Tahoe on the group's itinerary because "it was developed specifically for tourism.

bit

The reef and 100 species of animals and plants are thriving in a 3,000-gallon tank system that lets the public view the wonders on one side and scientists do research on the other.

The exhibit-laboratory, which just opened at the Smithsonian's National Museum of Natural History, will give scientists and everyone else a close-up look at one of the most complicated biological systems in existence.

"This is not a fish tank in the sense that we are keeping a few organisms. It is a natural community," says Dr. Walter H. Adey, the scientist who masterminded the project.

'There is not much dif ference in this reef and a typical Carribean one that was hit by a hurricane a year ago and is building up again," Adey continued in an interview

Not much is known about the detailed workings of reefs, found in

WASHINGTON (AP) tropical seas throughout functioning systems that can be exhibits and still do research at little They build up gradualextra cost," he says.

SEC

To develop their system, funded by a National Science Foundation grant, Smithsonian scientists, built a 14-footlong, 6-foot-wide structure of limestone and covered it with tons of coral rubble.

They added simple algae and other plants, fish and other natural reef life to the coral structure, and equipped the tank system with a wave generator,

Sears

## Christian Democrat forms new broad-based Italian government

ROME (AP) - Christian Democrat Arnaldo Forlani formed a broadbased Italian government Saturday, but the Communists who spearheaded the fall of the previous regime declined to say whether they would try to prevent the four-party Cabinetfrom ruling effectively.

Forlani, 54, delivered his list of Cabinet ministers to President Sandro Pertini at the Quirinal Palace atop one of Rome's seven hills. The government is Italy's 40th since World War II and third in the last 14 months

The former defense and foreign minister ended a 21-day political crisis by putting together a coalition of Christian Democrats, Socialists, Social Democrats and Republicans.

The Christian Democrats, Italy's largest party with 38 percent of the popular vote in the June 1979 national election, received 13 of the 26 Cabinet seats. The Socialists got seven and the two smaller parties received three ministers apiece.

Together, the four parties control healthy majorities in both houses of Parliament, where Forlani will have to win votes of confidence. The alliance has 360 votes in the 630-seat Chamber of Deputies.

#### Air Control

#### **Board** to meet

**Austin Bureau** AUSTIN - The Texas Air Control Board will hold a public meeting at 7 p.m. Oct. 28 in Odessa to discuss air monitoring plans and activities and air quality issues.

'The meeting is one of several meetings being held across the state to receive public input to help indentify local air pollution problems and changing needs not effectively addressed by current local, state or national monitoring programs.

The TACB operates 24 continuous and 92 periodic air monitoring sites throughout the state.

The sites were set up to divided evenly between measure air contamievery man, woman and nants such as lead, particulates, ozone, sulfur dioxide and toxic heavy metals.

The hearing will be held in the Board of Directors' Meeting Room, Chamber of Commerce, 400 W. 4th St Odessa

But it was not clear if Forlani would be able to convince the Communists to cooperate. The Communists, who make up Italy's second-largest party, said they will oppose the new premier, but did not say to what de-

In an article written for Sunday's editions, the Christian Democrat Party daily Il Popolo urged the Communists to recognize "the necessity, when faced with the delicate and grave problems of today's emergency, to offer a different and more justifiable type of opposition."

The Communists stalled the previous government, led by Christian Democrat Francesco Cossiga, by blocking its economic program in Parliament with hundreds of amendments. Then, along with coalition defectors, they toppled Cossiga on Sept. 27, when Parliament repuffed the plan by a one-vote manufacture secret

Italy's Communists, largest Marxist party in the West, objected to .= Cossiga because they said he led a: coalition designed 'to exclude them. from any role in running the country.

## A doctor who makes house calls

#### By NANCY LORD Lifestyle Writer

Doctors who make house calls are a thing of the past. That's what many people think, but in Midland, those days are not gone - at least not for the animals.

Dr. Annette Jensen has been operating a mobile veterinary practice here in Midland for a little over a year. Her specialization is in both large and small animals.

Dr. Jensen grew up on a farm near Avoco located approximately 30 miles from Abilene. She says this rural background prompted her interest in working with animals; and working for a veterinarian while in high school further convinced her to pursue a career as a vet.

She graduated from Texas A&M, the only veterinarian school in Texas, in 1976. She said she studied general classes for two years and then began her three years of veterinarian classes.

After graduation, she worked with other vets in their practices in Abilene and Odessa. "I thought working in an office all day was too confining and decided to open a moblie unit in Midland last year," she said.

"There's a certain amount of freedom with this kind of practice," she continued. She says she can set her own hours, with her working hours depending on how her appointments go.

Persons needing her services call her at her home phone number for an appointment, and she goes to their home in her pickup truck to treat the animals.

Dr. Jensen doesn't have what you could call a typical day. She might start to work as early as 7 a.m., or might not begin until 10 or 11 a.m. She sometimes doesn't finish up until as late as midnight. Her busiest time is usually late afternoon and early

#### Staff photos by Brian Hendershot

Left: Kendal Rogers, 6, "supervises" as Dr. Jensen retapes Duke's ears after an ear trimming so they'll stand up properly. Bottom left: Lisa the evening after people get off work.

She also does minor surgeries, such as spays and neuters. She picks up the animals in the morning and takes them to a mobile building at her home to do the surgeries. She then returns them to their owners later in the day.

She is available for emergencies. "You can't work in this business without taking emergencies," she noted.

On Tuesdays, she helps out at the Southwest Livestock Auction getting cattle ready for sale by drawing blood samples to test for brucellosis. She also helps out with testing cows for pregnancy. This helps the seller by telling him whether the cow to be sold is pregnant and whether it might possibly bring a higher price.

Approximately 60 percent of the animals she treats are small animal such as dogs and cats, with the remaining 40 percent being larger animals like horses and cows.

It's no easy job. At the Livestock Auction, for example, she doesn't sit in a clean, sterile office daintily taking samples. She's right in there with the rest of the cowboys on the back lot, doing the dirty work that's required for any vet.

At 27, she likes to wear her hair bound in a pony tail, and prefers to wear jeans and western shirts.

She says that she has met with very little opposition, being a woman in a predominantly male profession. "It's opening up to women more and more," she explained. In the Midland/Odessa area alone, she said there are four or five women vets.

Among the most unusual animals she has treated are raccoons, bobcats and ferrets. She says she has no favorite species of animal, but thatthere are particular aspects of each species she thinks makes them special.

The drawbacks are few, she says, but they're still there. The long hours, for one thing. And the risk, always there, of working with animals.

According to the Texas Employment Commission, there are 17,121 working women in Midland. This figure represents 36 per cent of the total work force, eaxcluding women who are self-employed.

These working women will be honored and recognized during National Business Woman's Week, an annual event sponsored by the Uptown Chapter of Busness and Professional Women's Club.

While various programs are scheduled throughout the country, the local B&PW Chapter has slated events to commemorate the special week which begins today and continues through Saturday. Diane Newland is local chairman for the activities. "Woman of the Year" will be named during a

meeting which is set for noon Wednesday at the Midland Civic Center. Also, a coffee honoring area business women will be from 3:30 p.m. to 5:30 p.m. on th 24th floor of the First National Bank. All interested persons are invited and may obtain more information by calling 683-7718.

A membership drive gets underway during this week. Membership is open to all persons actively engaged in business or the professions. B&PW is the oldest and largest organization of working. women in this country. Currently, there are over 100 local members, 8,000 state members and over 165,000 nationalmembers.

The National Federation was founded as an outgrowth of the 1918 War Work Council Meeting of the Young Women's Christian Association, an international federation consisting of 63 countries. Mid-land's brach is located in District Eight, Texas' largest in terms of square miles and spanning from El Paso to Big Spring.

B&PW contributions to women's interests include the support of the 19th Amendment which gave women the vote. The orgaization bega the first move for uniform marriage and divorce laws in the United States in 1922. And, in 1941, the group supported and successfully saw the creatiion of the WAACs, WAVES and SPARS as women's military organizations

In 1961, the late Judge Sarah T. Hughes, a past B&PW president, was named by President John F. Kennedy as the first woman Federal Judge of Texas.

B&PW works to support legislation to eliminate

House of Large and Halt Sizes

**18 Village Circle** 

Facing Wall Street!

Locally, B&PW has contributed to the advancement of women in the community through such programs as scholarships, young career woman awards, an individual evelopment (public speaking) program, women's seminars and leadership training programs.

The chapter conducts noon luncheons every second and fourth Wednesdays of each month. Programs include topics such as "Women's Rights," "Money Manageent," "Stress Management," "How to Start Your Own Business," and subjects dealing with the oil industry and political affairs. Speakers have been U.S. Representative Kent Hance, Judge Barbara Culver, Sheriff Dallas Smith and many other. Karen Clark-Nickel is president. Other officers include Pam Fiest, first vice president; Karen Jones, second vice president; Dorothy Foster, recording secretary; Carla Laneri, treasurer and Barbara Luedecke, corresponding secretary.

#### Sweet tooth

NEW YORK (AP) -America's sweet tooth is getting sweeter.

The nation's awayfrom-home favorites are candy, cookies, sweet snacks and sugar-sweetened soft drinks, according to a trade publication.

In its 34th annual census of the automatic vending-machine industry, Vending Times magazine reported that in 1979 Americans deposited a record \$12,803,000 in the nation's five million vending machines in locations ranging from airports to zoos all over America.

Soft drinks — up 23-plus percent over 1978 — provide nearly 36 per-cent of all vending sales. Packaged candy bars and cookie snacks make up nearly 13 percent, for a total \$6.1 billion in

And, in a year that saw hot coffee vending sales fall off 7 percent, the growth leader in hot beverage sales was hot choc-olate with an 8 percent

## Fretting parents

By ERMA BOMBECK New parents worry about the dumbest things.

AT WIT'S END

I guess we all did. It' comes with the territory. I remember a nervous neighbor of mine who read somewhere that a child should have two "stools" a day. As compelling as it was for me to hang around and wait for the quota to be met, she finally devised a code to keep me informed. She'd simply put a cardboard sign in her window announcing, "One!" or "Two!"

Needless to say, she drove the bread man crazy. (Not to mention the kid growing up remembering his mother as a red-faced woman hanging over the crib making weird noises.) I always thought the No. 1 concern of new parents was the selection of a name until I heard a story from a grandmother this week whose daughter had just had a baby. Everything had gone well. The baby had a name everyone could live with, was in good health and schedules were being met. Then came the hitch. "What does the baby call Grandma?"

In keeping with modern attitudes, her first name was suggested. Samantha? The child would be old enough to drive before she could handle that.

How about Grandma Maiers? Too formal. Besides, to be consistent, she'd have

## Catholics to receive marriage guidelines

#### By RON DZWONKOWSKI

LANSING, Mich. (AP) - Sermons on the next two Sundays will spell out new pre-marital guidelines for Michigan's 2 million Roman Catholics, including a six-month wait between engagement and the wedding.

The pre-marital guidelines, already in effect in other parts of the country, are aimed at increasing the success of marriages, church officials said.

The new rules include a six-month wait between the time a priest is told of a couple's engagement and the date he will officiate at their wedding. And the guidelines do not make an exception in the case of pregnancy.

"The intent is not to make it more difficult to enter marriage," said Cardinal John Dearden, head of the Archdiocese of Detroit, who announced the guidelines at a news conference Monday.

The intent is to "strengthen those who are entering into the marriage state," he said, citing statistics indicating that one in four marriages ends in divorce, that 50 percent of marriages involving teenagers fail and that there is only a 10 percent success rate for teen-age marriages prompted by pregnancy.

The guidelines, effective Jan. 1, will be the subject of sermons in the state's 750 parishes on the next two Sundays, Dearden said.

What you'll be wearing this fall is the face that inspired art's most beautiful legends... LES BEAU-ARTS by LANCOME

The French should know: they started it all. The music, the art and architecture that continues to entrance and delight us today. Now LANCOME remembers LES BEAUX-ARTS' extraordinary elegance in colors with a grandeur and finesse all their own.

Artfully speaking, it begins with the yes and four fabulous new MAQUIRICH E Creme Powder Eye Colours: Pewter, Mahogny, Chamois and Woodviolet. Then follows with a stroke of LE CRAYON Creme Eye Colour in Golden Berry and new Blue Amethyste.

On the face...now "tres rafine"...with MAQUIBLUSH Powder Blush's ever-so-gentle Cedar Rose and Noisette. Plus MAQUIGLAS' Blushing Creme's Bronze and Magneta.

The mouth? Moist and memorable with MAQUIGLACE' Emollient-Rich Lip Colour in Fraise, Scarlet, Barbizon Bronze and Sugared Maple...just see how they complement every fashion look! And as if that weren't enough, there's LE CRAYON Lip Contour in Plum to outline and define everyword you whisper. To finish: A gleaming sweep of LE STYLO Shining Lip Colour in Fluo and Sucre'.

Of course the nails back in their own polished praise with NAIL LACQUER in Pomegranate, Praline, Porto and Imperial Scarlet.

The look then: a soft-spoken face ... warmed with poised plumtones ... brightened with bold berry huges and stately blues...finished with a touch tres farine.

LES BEAUX-ARTS...a timeless impression color. And the fashion to wear this fall.

#### And yours from LANCOME: this 50. plus retail value!

It's LE SHUTTLE...en gnis! A versatile, dynamic fashion duffle to tote from here to there and back. Part of Les Transports de Lancome travel accessory collection and much too good to miss. Comes ready-to-go with a generous sampling of these Lancome-only performers, protectors and beautifiners:

### X-rays indicate gout controllable if detected early to be a hereditary form of arthritis, can be controlled or reversed if diagnosed early and treated, according to results of a recently published long-term study. There has been much controversy about the effectiveness of early treatment because previous studies vere too small or covered too short a time. In the recently completed study, however, a medi-cal team at the Mount Sinai School of Medicine, City University of New York, followed 2,000 gout patients clinically for as long as 30 years. Fighting pollution

## Anniversary celebrated

Mr. and Mrs. John A. Miller of Midland will celebrate their 50th wedding anniversary at an afternoon tea today at the Parker Heights Christian Church in Odessa hosted by their children Sue Pittman and Mrs. Ray Newsom of Midland and John F. Miller of Odessa.

Mr. and Mrs. Miller were married Oct. 19, 1930 in Eastland, Texas. Mrs.

The couple lived in Dollarhide field and Andrews from 1948 until 1972, when they retired in Kingsland. They moved to Midland in February 1980.

Miller is the former Pauline Harris.

Mr. Miller was employed with Union Oil of California before retiring. They are members of Kelview Heights Baptist Church.

## Hammer safety: One strike and you're out

With more and more the safety guidelines re- tools, HTI cautions that persons joining the do-it- commended by the Hand one of the most common yourself ranks, either for work or the necessity of saving money, all it takes is one strike and pain if you run afoul of mote safe use of hand

Mangaret s-

Tools Institute (HTI), an the enjoyment of the association of the Ameritool manufacturers. In its campaign to preyou can be in serious vent accidents and pro-

safety abuses of the comman nail hammer is trycan and Canadian hand ing to make it do too many jobs for which it was not intended.

The common nail hammer is designed for driving common and finishing nails only and nail sets. The claws of the hammer are for pulling CLUB NEWS nails and ripping woodwork. The nail hammer should not be made to do jobs it was not made for,

such as, masonry nailing, striking chisels or other hard objects. And never strike one hammer with or against another hammer or a hatchet. HTI points out that misuse of the nail hammer could present a hazard to the user because of the danger of chipping

of the hammer head, causing eye or bodily injury.

To do those other hammer jobs, there are at least 15 different hammers to choose from. Be certain the correct hammer is selected to do the job. Here are some helpful hints:

A mash hammer or hand sledge should be used for striking cold chisels, star drills and other steel struck tools.

### Accessories after the With classic clothes, accessories add an element of fun and individuality to the total look. In fact, they're fall's

#### **ALTRUSA CLUB**

The Altrusa Club of Midland, Inc. met for its regular luncheon meeting at the Midland Hilton. Elizabeth Grimm, president, recently moved to Houston and had to resign. Carol Hastings, vice president, has assumed the position of president for the rest of this year. She is a realtor with Mary Ann Carr Realtors.

The program, presented by the club's information committee, honored the Midland Altrusa Club's birthday. It was chartered in October 1948. Caroline Keisling, charter member of the club, cut the birthday cake. As part of the program, Altrusa Bingo was played by members and guests, with winners receiving gifts donated by Pauline Simmons.

Beverly Dyer, chairman of the community service committee, reported that a dinner honoring the members of the new Astra Club was held Oct. 16 at Ranchland Hills Country Club.

Loleta Guffey, vocational services committee chairman, reported that plans for the Linen Basket and Gourmet Basket project for the year are almost complete. Tickets will be \$1 each, and proceeds from this project go to the Founders Fund Vocational Aid Program. Anyone interested in purchasing a ticket for these baskets which will be given away in December should contact any Altrusa Club member.

Thelma Gardner, co-chairman of the hospitality committee, reported that the annual Christmas party will be held on Dec. 11 at the Woman's Club Building.

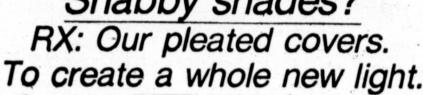

Jean Reid, community services committee member, reported that the benefit Mall Sale will be held Nov. 8 at Delwood Mall. Items to be sold include hammers, stainless steel knives. Christmas ornaments and miscellaneous gift items.

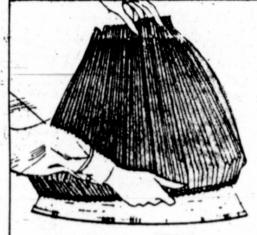

The Altrusa District Conference is set for this weekend in San Angelo at the Holidome. Carol Hastings will represent the club as voting delegate. Mary Alice Tidwell, past president of the Midland club, is a nominee for first vice governor. All

members are urged to attend this conference. Myrtlene Bearden reported that a generous contri-

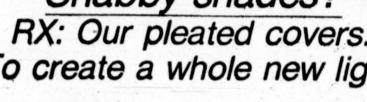

bution to the club has been received from honorary member Sue Powell. Guests attending the luncheon meeting were Marilyn Culp, Elena Phelps, Mary White and Mickey German. Also welcomed was member Christine Fea-

MUSICIANS CLUB

The October meeting of the Musicians Club, Texas Federation of Music Clubs, was held in the home of Mrs. Robert W. Pollard, 2310 Bluebird Lane

The members celebrated International Music Day by bringing their guests to hear a program of music written by composers from many nations. Vocalists were Mrs. Howard Parker, Mrs. Mark Berman, Jane Clancy Huddleston, Mrs. Richard Schmickrath, Mrs. Paul Hanssen and Mrs. John Hyde. Instrumentalists included Mrs. Dillard Anderson, Mrs. Harold Heckathorne, Bertha Johnson, Mrs. Keith McSorely, Mrs. Robert A. Steelman, Mrs. Donald Janssen and Mrs.

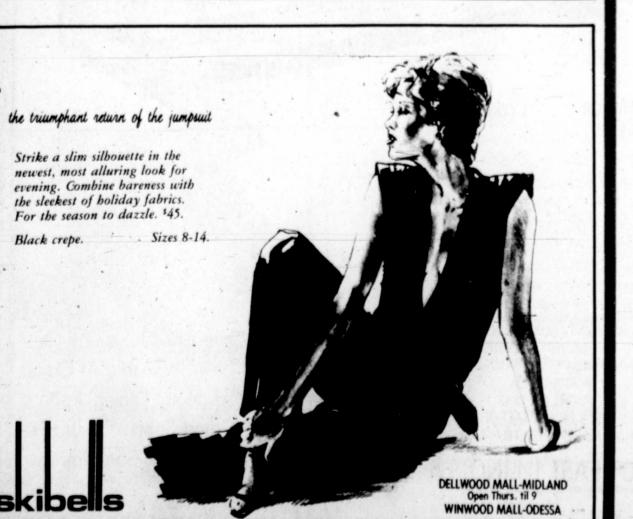

Hostesses were Mrs. Hans Roweck, Mrs. Jerome Codington and Mrs. Robert F. Ward.

If you've tried diet clubs, shots, pills, weight doctors, etc., only to achieve success for a short time going on to further failures, this fellowship of men and women has organized to offer strength and hope, and to share experiences.

Only requirement for membership is a desire to stop eating compulsively. There are no dues or fees. OA is self-supporting through contributions.

Weight losses of up to 200 pounds or more have been achieved and maintained on the OA program.

The program is not a diet club, but operates as a program of recovery based on 12 steps

In Midland, OA has scheduled three regular meeting times. They are Mondays at 7:30 p.m., Thursdays at 1:30 p.m. and Saturdays at 10:30 a.m. All meetings are at Trinity Presbyterian Church on the corner of Louisiana and Andrews Highway.

### mongolism Are you 35 or over and

thinking about having a baby? No doubt at some point you've probably read or heard about Down Syndrome or mongolism - and how the older a mother is, the greater the chance of giving birth to a baby with this problem.

To help you learn more about this important health issue, the National Institutes of Health (NIH) have a booklet that explains the problem, and ways to deal with it. For your free copy of "Facts About Down Syndrome for Women Over 35," write to Consumer Information Center, Dept. 661H, Pueblo, Colorado 81009. According to NIH, the risk of giving birth to a child with this genetic defect increases with the

mother's age. For example, a mother under the age of 30 has less than a 1 in 1,000 chance that her child will be born with Down Syndrome. But a mother at age 35 has a 1 in 400 chance of bearing a baby with this ge-

netic problem. Doctors are not sure exaclty why mothers seem to show this increased risk with age, but several theories exist. Some scientists believe that since a woman is born with all the eggs necessary for bearing children, by the time a woman is 35 or older, her eggs may have passed their prime. Also, since the eggs have been around for a long time, they are much more likely to have been exposed to radiation or other forces that might damage the genetic material in the egg.

What is the outlook for a child with Down Syndrome? The most serious problem for the child is mental retardation. A baby with Down Syndrome is often slow learning to sit up, crawl, walk and talk. The child almost never achieves near normal intelligence.

### **GENERAL NEWS**

PAGE 1

EDITOR'S NOTE: A short time ago, Coy Ray Arnold, a penitentiary inmate serving his third prison term for burglary, wrote The Reporter-Telegram and offered to give a "professional's" view of burglary and it's prevention. This is his story, as he wrote it, with only minor grammatical editing.

#### By COY RAY ARNOLD, No. 299321 Ellis Unit Huntsville.

I am a 32-year-old inmate in the maximum security unit of the Texas Department of Corrections. Maximum security prison life at Ellis Unit holds no secrets for me. This is my third prison term since 1965, which marked the beginning of my 15-year career in residential burglary.

At 17 years of age, I had already established myself as a known burglar with the Tulsa (Okla.) Police Department. Having been arrested twice for burglary of a business and questioned several times concerning break-ins, I became a rather firstname basis person.

I entered the Oklahoma State Penitentiary for the first time in 1966. I was 17 years old. My sentence was three years for three counts of forgery. I had cashed some personal checks that I had taken from a residential burglary. Even though I was obviously in possession of property stolen during a burglary, the charge of burglary was never considered for prosecution because of the difficulties involved with convicting a burglar.

In September 1968, I was released from prison. Within the next 10 years, until December 1978, I was arrested so many times for burglary, robbery and drug-related offenses, that it would be impossible to mention them all. With luck, skill, money and good legal counsel I was always released for one reason or another, with the exception of two short county jail terms.

By this time I was heavily into drugs (speed). Often I would inject speed costing as much as \$150. I would, at time, do this three times a day. I'm sorry to say that residential burglary was my main source of payment for this exceedingly expensive habit. For obvious reasons - not being prosecuted - I can only say I never had a legitimate job prior to this period. So without question I can say that I was deeply involved with criminal activities. Burglary became my preferred crime.

November 1975, I was arrested by the Dallas City Police for several house burglaries. I was released shortly thereafter for lack of evidence. The police knew I had the money involved from the sale of items stolen during the burglary, but proving it was another problem. I was told by the police not to leave Dallas. I left that same day and was free for another three years.

In December 1978, I was arrested for armed robbery, car theft, and armed intrusion of a private residence. At my first court hearing, these three charges were dropped. This was in Oklahoma City, Okla. When the district attorney dropped these charges, he filed two warrants that had been filed on me in October 1976. Finally, I was sent to the Oklahoma State Penitentiary for the second time, in March 1979. I received two years for car theft and assault with a deadly weapon. These two charges stemmed from a residential burglary, in which my victim caught me and tried to hold me for the police. In July 1979, Dallas County okayed a warrant against me while I was in the Oklahoma State Penitentiary. In August 1979, I plead guilty to three counts of residential burglary. I am now serving that sentence.

No one's home...

...except the

I pick my target by neighborhoods. The more recently established housing areas are the best. All new families usually do not know one another well enough to ask whether or not I am a member of that particular community. Also people who move to these new communities usually have more valu-ables. As often as possible I make sure that there are no children at this residence. Children may be at home anytime day or night.

#### DISPOSITION OF "HOT PROPERTY"

Certain items are my favorite because they are easily converted into cash. Small color televisions, expensive stereos, radios, reel to reel tape players, small appliances, collections of rare stamps, coins and paintings. Furs and some leather goods bring quick cash, along with hand guns. Cash money and jewelry are the most sought-after items.

#### / THE "FENCE"

Fences are not Hollywood's figment of the imagination. They are around and doing grand theft business. I would never use a fence or pawn broker myself. Both of them readily receive stolen property without questions. However, the reason I refuse to use their services is that they don't pay too highly on the full value of the stolen property.

I usually sell my merchandise to individuals. Often I will sell an item (purchased) to a person to test them. If he acts right I will continue to sell him the stolen property. If he turns me in for my first sale then they don't have me for anything but property that I had legally bought. Bars and taverns are good spots to sell hot items, along with second-hand dealers. The list of turning places is endless.

#### ENTRY

I'm sorry to say many people leave their doors open or a window unlocked. This is an open invitation to a burglar. People try to hide their windows from the street view, with trees and shrubs. This creates an ideal cover for the burglar as he opens a door or window. Apartments are usually the easiest to break into. Their construction is so weak that anyone could force the door. As I have already mentioned, the small door by the garage is the most tempting.

#### PRIME TIME

The hours between 7 a.m. and 5 p.m. weekdays and 7 a.m. to 10 p.m. Fridays and Saturdays are the best times to do residential burglaries. Never do I burglarize during the holidays for there is too much traffic and you can never be sure when the people will return.

#### DOGS

Animals seldom hinder me, for dogs are happy to see anyone. Most of the time dogs are left alone in the house and want someone to give them some attention.

#### REASONS

Almost every time I have been questioned by the police or others, they invariably ask the same questions. Why? What makes you commit crimes? Truthfully, I cannot answer that myself. I, more than anyone, would like to know. Usually I can answer that there are preachers, doctors, teachers and criminals. I am a burglar. That doesn't answer the question adequately, but it is the truth. Then too, I am generally doing drugs. As I have previously mentioned, my drug habit could and did

#### Photo-illustration by Bruce Partain

become financially consuming. Without some sort of illegal assistance, it would have been impossible to support.

#### TARGET

Criminally, I have been involved with many assorted crimes, but most often I prefer residential burglary. The reasons for this are simple. House burglaries are, money-wise, very profitable, and very easy to commit. And usually, if caught, you're not sent to prison.

Often my most difficult decision is to decide which home has the most money or goods. I always try to pick a corner house, one accessible from two streets. I also choose one that is as secluded as possible by bushes or trees or other things that block my view from the street. I prefer a home with a lot of glass, doors and windows.

The garage door is the door I most often use, not the one you drive through but the one to the side of the garage.

RECOMMENDATIONS There are a few, simple steps a person can follow to help reduce the chance of their house becoming a target for a burglar. One: No matter how long you plan to leave your house, be sure to lock all the doors and windows. Ask a neighbor to check on your house every now and then to see if anyone goes there. Two: Get a sticker saying your home has alarms and is patrolled, even if it is not. Three: Even though we are supposed to conserve energy, leave a light on in the house.

Most importantly, don't try to stop an intruder yourself. Call your local police. If you follow these simple ideas, you will increase your chances of never being robbed by 100 percent.

Make your home appear lived in as much as pos-

# Just plan on being robbed

#### By KAY CRITES Staff Writer

There's bad news in Midland concerning burglaries.

Not only are they up, but there's no way of keeping a burglar out, said Midland Crime Prevention Coordinator Lalo Camarillo.

"There's no way you can keep a burglar from going into your home."

However, there is hope.

Of all the houses surveyed since 1972 by the crime prevention unit as part of its security program, only six have been burglarized, and "these six homes didn't follow our recommendations 100 percent," Camarillo said.

The security survey is free of charge. Crime Prevention officers will survey any home or office and make recommendations to prevent burglaries and to prevent the burglar from making away with the "goods." Part of the program includes identifying property with the owner's driver's license number.

"The only thing we ask them," said Camarillo, "is not to wait until they become a victim to call.

"If you protect your home even a little bit, they (burglars) are going to leave you alone. They are going to go to the easy target."

Camarillo said the idea of cost prevents many people from asking for the security survey. "The first thing that comes to people's

mind is it's going to take \$200 to secure my home. But an ordinary home can be secured for \$100 to \$125, and if a man can install the locks, himself, they can get by with under \$75.

A major problem in Midland, Camarillo said, is people leaving doors open for their pets or having large holes - large enough for a man to crawl through - cut in garage doors as pet entrances.

"And when someone gets in the garage, they're going to get in the house unless it's protected.

One of the most common recommendations is the use of double bolt locks that lock from the inside and outside with keys. That way, if someone breaks into a house, they can't open doors to remove large items.

Dogs, Camarillo said, are good deterrents only while someone is at home to respond to the animal's barking. "At night, when the whole family's usually home, you can't beat it.'

When no one's at home, if the burglar wants in, he can get past the dog, Camarillo said. He quoted one instance of where burglars drugged the dogs with doped meat. "Or they can just open the gate or something. If they know someone has a lot of guns or something, they are going to do something to get rid of that dog."

## **Deadly weapons developed atop faults**

weapons on earth are developed at a secret laboratory in a valley crisscrossed with more than a dozen earthquake faults, just 40 miles from San Francisco.

Critics say quakes could damage Lawrence Livermore National Laboratory, a center for nuclear weapons research, and cause deadly plutonium to be released in an area where more than 5 million people live.

"The plant should be moved out. The earthquake hazards are too high," says Elyse Axell, spokeswoman for Friends of the Earth.

That's a "minority view," counters Jeff Garberson, a lab spokesman. Lab officials insist the facility can survive quakes without releasing radioactivity.

In January, a pair of earthquakes measuring 5.5 and 5.6 on the Richter scale caused "significant damage" to a wall in Building 322, where plutonium experiments are made.

But the lab's report of the incident said there was no damage in the part of the building that actually holds the plutonium and concluded there was no danger of a plutonium leak.

Lab scientists estimate that the strongest quake likely to hit the lab would have a magnitude of about 6.5, which would represent ground motion roughly 10 times that of the two January temblors.

If such a quake hits, said Frank Tokarz, a structural engineer and reactor safety expert at the lab, "There will be some hairline cracks in walls, but there will not be ultimate collapse."

But John Rutherford, a structural engineer who inspected Building 322 on behalf of the Friends of the Earth, said, "There could be release of plutonium" if a 6.5 quake hits the Livermore area.

Weapons research requires the lab to keep as much as several hundred pounds of plutonium on hand for experiments.

"If you wiped out a nuclear power plant,

LIVERMORE, Calif. (AP) — The deadliest the risk would be much, much greater than it embroiled in internal debates. would at one of our facilities," said Tokarz. But one lab scientist, who asked not to be identified, said "we got fried" in April 1979 at a public hearing on a draft environmental impact statement that "was flung together." Critics issued harsh challenges to claims that the lab was safe from earthquakes.

The scientist said the draft review got in trouble by using conflicting data from separate government reports.

Lab seismologist James Scheimer is preparing a new draft of the environmental impact statement for the lab, and lab officials say it should be ready for public hearings sometime next year.

The Livermore lab is a sister operation to the Los Alamos National Laboratory. Both are operated by the University of California, under contract to the U.S. Department of Energy

But Los Alamos, unlike Livermore, is located on a remote hilltop in sparsely populated New Mexico. Livermore — founded in 1952 on the site of a World War II Navy training base - has become a target for anti-nuclear protesters, peace activists and environmentalists because of its proximity to San Francisco.

Because of increased public concern, the lab has begun a detailed study of the geology of the Livermore Valley.

'There are two very different interpretations of the geology," said seismologist Scheimer. "That disparity is what we're trying to pin down.'

Last November, Scheimer and 11 other scientists and engineers began setting up 10 seismic stations in the Livermore Valley.

He said the data collected so far indicates that the plutonium building is safe. "I haven't found anything that makes me think the numbers used to evaluate that building are in error," he said.

The earthquake issue has been raised mostly by outsiders. But the lab is also

sible.

One concerns how much money should be spent on advanced weapons development, what the lab describes as "a nursery for sprouting the ideas of tomorrow.

Livermore gets almost all its funding from the DOE rather than the Department of Defense, despite the fact that most of its work is devoted to development of nuclear weapons.

The arrangement dates back to 1946, when Congress put atomic weapons under civilian control. Because nuclear weapons played a weighty role in foreign policy, it was felt they should not be left to military control.

The Atomic Energy Commission was later incorporated into the Energy Research and Development Administration, and then into the DOE.

More than half of Livermore's current \$420 million budget is devoted to development of nuclear weapons and other defense items, with most of the rest going to energy research.

During the 1970s, lab funding increased 41velop new weapons for the future.

If funding doesn't increase, "sooner or later you're stuck with obsolete technology,' said associate director Michael May in a recent report on the lab's future.

Livermore is also under fire from a 4-yearold group of University of California students and faculty who want the university to sever its ties with Livermore and the lab to switch from weapons development to exclusively energy research.

But, said UC Nuclear Weapons Labs Conversion Project spokesman Scott Ullman, 'We realistically see that there's little chance that the lab would be converted in the current (political) climate."

#### **RINGING THE BELL**

## Crime among youth one of biggest problems By BOB THEUEL

The Black Experience and Saturday Night Specials: One of the greatest problems facing Black leaders in the nation, including the Black church leadership, is that of increasing crime amongst their youth with Black upon Black crime taking an handsome lead in many of our major cities of the nation

Robbery and rape assault continue to forge ahead, too. There can be little doubt that overcrowding and unemployment which is nearly 50 percent with Black youth in many areas are contributing factors to the rising tide of Black crime in many parts of the nation. We can be thankful that these problems mentioned above are not prevalent in West Texas and Southern New Mexico as well as many sections of Oklahoma and Louisiana, where the Black population is not as heavy as other parts of the nation and there are jobs for those Black youth willing to work.

The Kansas City Call, a black-oriented and leading black newspaper of the nation, has repeatedly called for a registration of all hand guns, where Black crime has reached record rates, to say the least. In Atlanta, Dallas, Houston, Chicago, Detroit and other cities, Black leaders note increasing crime trends.

Here we would point out that some five years ago, word went out in Massachusetts that anyone convicted of carrying a gun without a state permit went to jail for one year. No exception. No probation. No suspension. No furlough.

Today, it is billed as one of the toughest gun control measures in the nation, but supporters say it has saved many lives. On June 13 of this year, Gov. Hugh Carey signed into law a similar measure and it mandates a one year prison term for anyone convicted of having a loaded, illegal handgun in public.

The new law has been most effective in curbing crime in New York and Massachusetts and one legislator said he would propose a similar required jail term for drug trafficking.

One thing is certain, we are all affected by the rising crime wave that is sweeping the nation and somewhere we must come to grip with the problem

The Mennonites are said to refuse to bear arms for the state and live a simple agrarian life. They came to this country from Mexico in late 1976 and 1977 to escape difficult economic conditions.

In West Texas, Oklahoma, near Boley, and other parts of the South-west, they bought thousands of acres of land with their cash savings, with the understanding they would be able to stay in the United States and avail themselves of underground water supplies to irrigate their crops, ac-cording to Delton Franz, Washington, D.C., director of the Mennonite Central Council.

Mennonites have always been noted for their honestry, hard work and thrift. About 200,000 people nationally are members of Mennonite churches and there are reported differences between the conservative and liberal wings of the church. It also is reported that bills granting Mennonites permanent residence have been passed by U.S. Congressmen from Texas and Oklahoma.

Whereas, Black colleges and universities have served an unique role in meeting the needs of thousands of their youth since the days of slavery.

And, whereas, the role of the Christian-related institution of higher learning bears directly to the spiritual, mental, economic and moral welfare of those attending such schools. thus enhancing theybest welfare of the entire community.

And, whereas, many of these institutions are not supported by the taxpayers, but must rely on the goodwill and support of those who care.

And, whereas, there are more than one hundred such in the United States today.

Be it therefore resolved that Sunday, Nov. 2, 1980, be observed as College Awareness Day and that during these season, we review and study the mission, programming and funding of these institutions, so that their future may be assured. — Signed—Mayors of the Permian Basin.

## consumer TIPS Investigate home improvement contractors

By LINDA TRUITT Better Business Bureau of the Permian Basin, Inc.

Many people were made aware of the poor condition of their roofs by the recent rains. For this reason; and encouragement by the cool autumn weather, home owners have been calling the bureau office requesting information on home improvement contractors.

Although home improvement usually involves spending large sums of money, few people take the time to investigate the background of the person contracted to do the job or his claims. You should be aware that a reputable contractor will not give an unrealistically low estimate for an expensive job, just to get your business. An unscrupulous contractor, though, will make questionable claims to get the job and your money. Many times he will ask for payment in advance only to disappear the next

day. The following precautions should be taken whenever you decide to hire someone to work on your home:

-Investigate the reputation of the contractor. Ask for references if you are not familiar with his work and then check them out. Also, if the person is selling door-to-door make sure he has a permit allowing him to solicit and determine if he has an established business address.

—Ask for a written estimate. It is wise to ask at least three contractors to give you an estimate. If one of the estimates varies dramatically, be wary. A reliable contractor will provide a free estimate in writing, complete with specifications for materials to be used.

-The guarantee, types of materials to be used and experience of the contractor should be deciding factors on who will do the job as well as the estimated cost.

-All promises and agreements should be written in a contract, including the total cost of the job, what kind of materials will be used, description of the job, starting and completion dates, guarantees and method of payment.

-It has been the experience of this Burcau that homeowners should be cautious when a contractor asks for a down payment in advance in order to buy materials. Although it is a common practice even with reputable builders, there may be some contractors who will take the money and never return to complete the work. Bemember only you can make it

Remember, only you can make it unprofitable for dishonest home improvement contractors to stay in business. For the free pamphlet "Tips on Home Improvements" write BBB/Permian Basin, Box 6006, Midland 79701.

## DR. NEIL SOLOMON Warming up before athletics could enhance performance

Dear Dr. Solomon: My husband finally convinced me to give up my sedentary life and join him as a tennis partner; now I'm paying the penalty. Although I felt comfortable while playing over the weekend, I'm stiff and sore now. What did I do wrong and how can I prepare for subsequent weekends of tennis so that I can avoid these aches and pains?

We belong to a club with indoor courts, so we will be playing yearround. — Gloria

Dear Gloria: I can only speculate that one of the things you did wrong was to fail to warm up properly before beginning to play. This is very important for all athletes who wish to avoid injury and enhance their performance, since warm tissues stretch, while cold tissues tear. Dr. Charles Steiner, chairman of

the Department of Osteopathic Science at the New Jersey School of Osteopathic Medicine, advises athletes to begin warming up with some gentle swaying motions. This consists of swinging the trunk from side to side, with the arms following around the body in ragdoll fashion. In this way, the wrists, elbows, neck, knees, back and legs are all prepared for the more strenuous action of the sport itself. Additional preparation can be geared to the specific activity in which the individual is to engage. A tennis player, for example, could repeat the swaying motion while holding a racket with one hand on the handle, the other on the throat of the racket. Later, the actual motions involved in playing the game -- such as the service, forehand and backhand -could be practiced, thus preparing the

body for the game.

This approach is adaptable to all sports. A golfer can swing a club, or a baseball player a bat, in the same fashion. Someone preparing for a sport which calls for throwing a ball should warm up by gradually increasing the throwing distance.

A similar method can be used prior to participation in sports such as soccer and basketball where quick starting and stopping are required. Going through these motions as part of a warm-up can prevent muscle pulls, ankle sprains and fractures. Preparing for the movements to be encountered in the activity adds flexibility to the joints, ligaments and muscles, and thus helps avoid injury.

The same technique is suitable for nonathletic activities. For example, persons who garden as a hobby can prepare by doing daily exercises such as knee bends.

Once fatigue sets in, it is advisable

much more common when a person is tired. Everyone who participates in physical activity should have some idea of his or her endurance, and not try to exceed the limit. If pain occurs despite these precautions, it is a sign that something is wrong. Continuing with an activity in the face or pronounced discomfort can only aggravate the condition, turning a minor injury into a major one.

Recreational sports, whether tennis, golf or any other, are supposed to be enjoyable; the morning-after aches and pains you describe can only detract from that. A few minutes of exercise each day, and a warm-up period before playing, should help increase your enjoyment of the sport and keep you fit all year long.

## Convicted former official hired as consulant

CHICAGO (AP) — Former state Attorney General William J. Scott, convicted of federal tax fraud last March, has been hired as a \$1,000-a-week consultant to multimillionaire insurance magnate W. Clement Stone.

Stone said Thursday he hired Scott, a friend for 30 years, "to help me in all my work," including his business, charitable and political activities.

Scott said he started work Sept. 29 and has solicited funds for Stone-supported charities, checked on the rental of some properties and has done some advising.

"This is not a full-time job," Scott said. " .... I'm perfectly free to handle other matters." Stone, a backer of Republican causes, said Scott would be helpful "in my efforts and those of others to build a Republicant party in Illinois."

Scott, 53, served as the state's chief legal officer from 1969 until last July when he was sentenced by U.S. District Judge John Powers Crowley to serve one year and a day in prison. A jury found Scott guilty of filing a false income tax return.

The conviction is being appealed.

## DIRT, SQUIRT, QUIRT Winterizing your yard must begin in the fall

#### **By CHARLES W. GREEN Midland County Extension Agent**

Winterizing your yard consists of several chores that need to be done in the fall.

In view of the damage caused by severe cold to some tender perennials last year, several suggestions can be made that will help lessen, or pre-vent, such damage this winter if temperatures again drop down and remain at the O degree level for several days.

The first step is to "harden off" shrubs, trees and turf by lenthening watering intervals and letting nitrogen levels decline.

In other words, avoid a flush of new, tender growth from this point on. Next, mulch these cold susceptible plants now while the soil is still warm. A 3 to 5 inch layer of mulch materials such as grass clippings, hay, saw dust, bark, cottonseed hulls, etc., will serve as insulation to protect the roots of such plants as pittosporium, ligustrum, oleander, eucalyptus and other plants that do not like temperatures below 10 degrees.

After dormancy be sure to water often enough to keep the soil moist in the root area. The roots of even deciduous plants remain active during the dormant months. It doesn't take much water, maybe once a month, depending on weather conditions, but it is important not to let the soil dry prior to severe cold.

Don't forget to water the lawn during the winter months, even if you have a warm season type such as Bermuda or St. Augustine, and especially if you have a cool season type suce as fescue. St. Augustine grass was heavily damaged by the cold in the Midland

area this past winter. This need not have happened if the grass had been taken into the winter in proper condition. This means, basically, two things: One, don't use much of any nitrogen fertlizer past Sept. 1. Onehalf pound of actual nitrogen per 1,000 square feet in early September is heavy enough. This would be the amount of nitrogen in only 21/2 pounds ammonium sulphate(21-0-0) per 1,000 square feet. Two, allow the grass to reach of a height of 3 to 5 inches before killing frost. This will provide a mulch that will protect the grass through severe cold.

I know some St. Augustine plantings that were allowed to grow tall last fall that did not suffer any freez-out.

If you have already mowed too late to get that kind of growth on St. Augustine this fall before freeze, then you can add mulch such as bark, leaves, straw, hulls, etc. A three to five-inch layer is needed.

With visions of a warm fire and a cozy fireplace, many homeowners begin to search for firewood this time of year. To help in this effort, here are some pointers in shopping for, and choosing, the right type of wood. Price comparisons may be difficult since firewood is sold in various

quantities - the standard cord, the face cord or the truck load.

A standard cord is 6 feet long, 4 feet high or 128 cubic feet. On the other hand, a face cord measures 8 by 4 feet on the face of the stack, with the wood cut into smaller pieces. The face cord measures about 1/3 to 1/2 of a standard cord and is often called a "short cord."

The best way to compare prices is to calculate the cubic feet of wood. Measure the stack and multiply the length by the width and by the height. Following this advice will also keep the unwary buyer from making a mistake out of what appears to be a bargain.

Also, use cubic feet measurements on truck loads of firewood. After the truck is unloaded and the wood stacked, multiply the length, width and height of the stack in feet and divide by 128 to obtain the portion of a cord you have.

For example, 6 feet x 2 feet x 4 feet = 48 feet; 48 divided by 128 = .38 or about 1/3 of a standard cord. A good rule of thumb is that a standard 1/2 ton pickup without heavy duty springs can carry about 1/3 cord. Each fireplace wood species offers something different in aroma and

heat value.

Softwoods, like pine, are easy to ignite because they are resinous. They burn rapidly with a hot flame. A softwood fire burns out quickly and requires frequent attention and replenishing.

## **Record European harvest** may be problem, USDA says

## Feds say IH tractors hazardous

WASHINGTON (AP) — International Harvester Co. sold about 1.6 million tractors between 1939 and 1975 that had a potential safety hazard, a federal agency is charging. He asked, "In what way, then, will the substantial consumers in this case?" The company agreed, saying, "This is clearly a

correcting any problem with an extensive program ceeding itself comes to an end." to notify owners and change an allegedly hazardous gas cap.

unnecessary because of what the company is doing use.

The FTC majority charged the company with "deceptive and unfair acts" in failing to adequately disclose the potential problem. It said the company knew by 1955 that the tractors' gas tank could build up in pressure because of heat from the engine.

"If the fuel cap is dislodged or removed when the tractor is hot or running, fuel vapors and liquid fuel can shoot or geyser up to 20 feet, spraying the operator or the tractor with gasoline which can, and has, spontaneously ignited," the commission said.

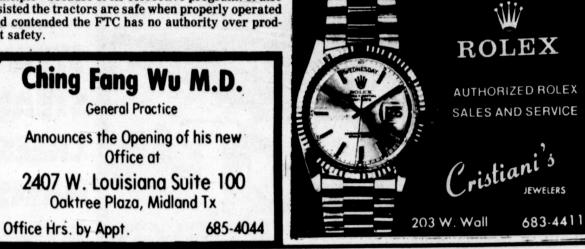

Commissioner Paul Rand Dixon, in dissent, cited the company's remedial program that was begun a year before the FTC began investigating Interna-tional Harvester and that was modified later to include suggestions of FTC staffers.

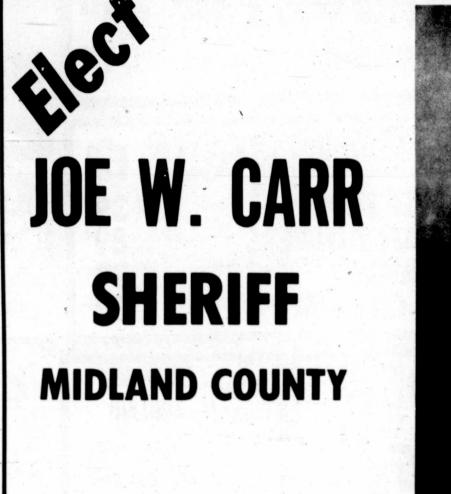

The Chicago-based manufacturer of farm equip- waste of taxpayers' money and company resources ment said after the Federal Trade Commission to achieve a goal which will be completely and announced the case Thursday that it already is effectively accomplished years before the legal pro-

IH said FTC staffers had asked the firm to sign a consent agreement, but it refused "as a matter of The senior member of the FTC called the case principle" because of its corrective program. It also insisted the tractors are safe when properly operated voluntarily. Up to 800,000 of the tractors are still in and contended the FTC has no authority over product safety.

600,000 letters in August that adopted FTC staff suggestions, Dixon said.

The commission said that after hearings it could order the company to notify owners and prospective purchasers of the problem and of how to minimize the chance of injury.

## THIS I BELIEVE

summer's drought reduced crop production in the United States, there has been a record grain barvest in Europe and the overabundance is causing problems in the Common Market countries, the Department of Agriculture says.

The department said Thursday the extra supplies are depressing prices and prompting the European community to look for ways of removing the surplus from the market.

The harvest of 67 million tons is forcing the European nations to consider storing the excess or exporting more grain, the department said.

In its weekly roundup of world production and trade, the department's Foreign Agricultural Service said at least 2.5 million tons have been taken off domestic European markets.

The Common Market countries also reportedly decided to provide storage payments for privately stored wheat in areas burdened by over supply, the roundup said.

The first payments are expected to go this month to Schleswig-Holstein, the wheat-producing area in Germany.

The report added that European grain exports are likely to reach a record high in the 1980-81 marketing season

Extra exports are being earmarked for Eastern Europe, the Agriculture Department said. The quota has been doubled to 1 million tons.

The department also reported that total meat production is expected to increase about 3 percent this year in the major meat-importing countries.

Now...Advance techniques and chemical deselopments make possible superior re-

sults right in your bome-and at a price yo

can afford. Now you can have your carp leaned professionally as often as you like

LIVING BOOM

NOT DELIGHTED?

lamb and pork production.

Beef and veal output is up marginally in the United States, the Common Market and Japan and down slightly in Canada, the department reported. For the 50 countries surveyed by the department, beef and veal imports are expected to decline 12 percent this year from 1979. Beef and veal production in the major exporting countries is expected to decline about 7 percent with exports down 25 percent.

The department predicted that the global trade in beef and veal for 1980 will drop from last year. It said increased beef and veal purchases by Japan, the Soviet Union and Egypt have not offset reduced imports for the United States, the European community, Canada, Brazil, Korea, Israel and others.

The conflict between Iraq and Iran may disrupt some shipments of lamb and mutton through the Persian Gulf, the department added. But it said the war is not expected to have a major impact on world meat trade.

In the first half of 1980, the United States imported a record level of red meat and poultry, with Americans consuming 122.6 pounds per person on the average. That's a 4 percent jump over the first six months of 1979. But the imports have dropped in the last three months. The United States has imported a total of 1.02 billion

pounds for the first nine months of 1980, compared with 1.17 billion pounds for the same period last vear.

THE MIDLAND REPORTER-TELEGRAM, SUN., OCTOBER 19, 1980

WASHINGTON -- A Pentagon spokesman has scoffed at a reported warning by an Iranian naval commander that Iran might mine the Strait of Hormuz, key to the Western world's oil lifeline, and the Persian Gulf.

He said Iran's capability to mine even the strait alone was "extremely low" and strongly suggested it was virtually non-existent as far as the 650-mile long was concerned.

The strait, through which tankers loaded with oil for Europe, Japan and the United States must pass, is 26 miles wide at its narrowest point and 700 feet at its deepest

The spokesman had no information on what kinds or quantities of mines the Iranian navy might have acquired since the revolution, but he was certain that no mines were included in the billions of dollars

#### Rockefeller heiress sued

CAMBRIDGE, Mass. (AP) - A Harvard professor has gone to court to seek \$12,000 a month in support for him and his children from his estranged wife, a granddaughter of the late John D. Rockefeller.

According to documents filed in Middlesex Probate Court 14 months ago, Neva Rockefeller Kaiser, 36, promised to make the payments to her husband, Walter J. Kaiser, 49, after he agreed to move out of their Cambridge home, and whenever their two children were staving with him.

In exchange, he had to turn over his \$37,000-a-year Harvard salary plus \$2,000 in other income.

the last decade.

"We have never sold them any mines or mining equipment," he said.

Pentagon official scoffs at Iran mining Strait

What about the Russians -- have they provided any such weapons to Iran? he was asked.

'We have no indication they have any Soviet mines whatsoever," he replied.

The Pentagon officer emphasized that the Iranian navy was not in the best of shape today.

They have major combatants that can't get under way because of spare parts and mechanical problems and because of a shortage of skilled personnel," he said. "We have seen some ships stop dead in the water and break down.'

He suggested that for the Iranians to try to mine the strait would be a case of shooting themselves in the foot

"The first rule of mine warfare is to be sure you have the capability of sweeping the mines you sew,' he said. "Another thing, one of the surest ways of bringing other Arab states into the war on the side of Iraq would be to block oil shipments."

He said that U.S. shippers "are not that concerned" about the possibility of an Iranian attempt to mine Hormuz. But he added that the United States could not ignore the warning.

'If the warning came from the Ayatollah Khomeini and not from an unnamed naval commander, it would be much more significant," he said. "The Iranians could then just announce that they were closing the strait and declaring it a war zone and say it was mined. Then Lloyds of London (ship insurers) would, in effect, close it (with higher rates)."

The U.S. Navy's minesweeping capabilities have deteriorated over the years and the loss of seven

worth of arms the United States sold to the shah in minesweeping helicopters on the abortive attempt to rescue the American hostages in Tehran earlier this year was a heavy blow.

The U.S. Navy had no minesweeping ships in the Indian Ocean at the present time.

#### **Many Hearing Problems** Can Be Helped

Chicago, Ill.-A free offer of special interest to those who hear but do not understand words has been announced by Beltone. A non-operating model of the smallest Beltone aid of its kind will be given absolutely free to anyone requesting it.

True, all hearing problems are not alike . . . and some cannot be helped by a hearing aid. But audiologists report that many can. So, send for this free model now, and wear it in the privacy of your own home. It is not a real hearing aid, but it will show you how tiny hearing help can be. It's yours to keep, free. The actual aid weighs less than a third of an ounce, and it's all at ear level, in one unit.

These models are free, so we suggest you write for yours now. Again, we repeat, there is no cost, and certainly no obligation. Thousands have already been mailed, so write today to Dept. 52930 Beltone Electronics, 4201 W. Victoria, Chicago, Ill. 60646.

SECTION G

York, a former Midlander and a member of the board of directors of Mobil Corp., lauded residents of the Permian Basin for their part in the national oil picture in his address for the formal opening Friday of the Permian Basin Oil Show.

The show, which ended Saturday, had a two-day pre-run, Wednesday and Thursday, for personnel associated with the petroleum and allied industries.

The show was open to the public Friday and Saturday.

Massad, the honoree for the the 1980 show, said the Permian Basin oil Show is one of the major oil expositions in the nation because of its purpose and its contribution to the energy industry of the nation.

"The Petroleum Industry should be looked upon for the contributions it has made to this nation," he said, "and not be a whipping boy for those who reside in Washington.

Show honoree lauds Basin residents

Massad urged the showgoers to get out and cast their vote with conviction in November and bring the industry to the forefront.

"I am convinced the petroleum industry has a great future," Massad said, "and I, as I am sure all of you are, am proud to be a part of it."

THE OIL SHOW honoree, who was accorded that honor because of his many contributions to the petroleum industy, was introduced to the thousands of persons in the audience by Joe Womack of Midland, president of the 1980 oil show.

In a press conference prior to his opening-day speech, Masad said "with the implementation of the

some progress in the field of synthetic fuels, but to make even more progress, we are going to have to get some legislation that will weaken the environmentalists' control in this area.

honoree for the show. He was recognized by the oil

show's executive committee for his outstanding

contributions to the petroleum industry. (Staff

"We need an energy policy that will optimise the natural resources that we have. We have a good crude oil base, but that source of energy should be used for transportation and feed stocks for the synthetic products and not under boilers.

"This country has a tremendous amount of coal that could be used as boiler fuel, but some environmental restrictions must be lifted before we can make use of our coal. My company has tried uncessfully for four years to get permission to open a coal mine in Wyoming.

The former Midlander said the nation should turn to nuclear energy for the generation o save our hydrodcarbons for transportation and feed stocks.

## **Duncan says United States'** crude situation manageable

#### **By MAX B. SKELTON AP Oil Writer**

HOUSTON (AP) - Energy Secretary Charles Duncan left the joint news conference with Senator Lloyd Bentsen early. He had to catch a plane.

But Duncan was back within three minutes, saying he wanted to clarify one remark he had made.

When asked if emergency standby procedures were being considered because of oil supply disruptions caused by the war between Iran and Iraq, Duncan had said he believes the United States has a manageable situation "for a period of weeks."

Upon his return, Duncan said his press aide had expressed concern about his use of the word "weeks,"

thinking it might be misleading. "Actually, I think we would be in good shape for a much longer period of time and I'm talking about a period of many weeks, not just a few weeks," Duncan said.

"Or being more specific, if we were to lose half of our inventories, half of our imports for a period of three months I think we would be in good shape.

Duncan then stood up again, saying "I just didn't want to leave anyone under an inaccurate impression and I still must catch that plane."

Duncan and Bentsen had called the news conference the announce the Carter administration's support of the Texas Democrat's proposal to. allow small royalty owners a \$1,000 a year tax credit against payments under the so-called windfall profits tax.

But, for Duncan, the questions quickly turned from windfall inequities to the current Middle East oil disruptions.

Duncan said the nation is in the fortunate position of having extremely high inventories.

We have just under 1.4 billion barrels of petroleum products that are in the hands of American companies," he said.

"We are also in the fortunate position of our need for imported oil being dramatically less than it was even one year ago. For the four-week period just ended we are down 30 percent, just under 30 percent on oil imports. So we are in the position of needing less oil but, of course, we would have to institute, if we have a complete interruption, me sort of emergency

able time frame, of course that is a debatable question," Duncan said. "But, I think, certainly for a period

of weeks, I think we have a very good position. It is very, very good that we have the very substantial inventories that we have in this country today.' Duncan said crude oil once again is

being added to the Strategic Petroleum Reserve at salt dome locations in Texas and Louisiana after being halted after the Iranian revolution.

"Oil is going in the reserve today, oil is being added and has been added into the resérve for some several weeks time," he said.

And he emphasized, "When you take a six months' time frame, for example, the inventory buildup now

in the hands of American companies has increased over the last six months, or, more specifically since April, in a rate of 840,000 barrels per day," he said.

PAGE 1G

"Now that is a rate of inventory increase that far exceeds any con-templation of what might be added to the Strategic Petroleum Reserve."

Duncan said the overall objective is to build up inventories.

"Whether they are in the hands of an oil company or whether they are in some cavern in Louisiana or Texas, I don't think it as as important as having the oil," he said.

'And the fact is we have built the highest inventory level in the history of America.'

## **Exploration continues** at record pace, says Pl

ENERGY OIL & GAS

SDITORIAL/BUSINESS/MARKETS/

DENVER, Colo. - Drilling for oil and gas in the U.S. continued through the bird quarter of the year at record levels with 45,595 well completions recorded, Petroleum Informantion

Corp. said. The nine-month total was up 37.7 percent from the 33,105 completions recorded at the end of Sept. 1979. The 1980 figures include 21,26 oil wells, 11,002 gas wells and 12,667 dry holes, PI said.

Completion figures and other ap parent trends indicate that 1980 will set a new all-time record for oil and gas drilling in a single year. The existing record of 57,111 well completions was established in 1956.

Corresponding to the record level of well completions is an all-time high number of rotary rigs at work. According to Hughes Tool Co. figures. 3,138 rigs were drilling for oil or gas as of Sept. 29. That number exceeds by one the previous high established in 1955 and is 809 higher than the active rig count at the same time in 1979.

One of the most dramatic increases continues to be the number of oil well completions. The 21,926 oil wells to date compares with 12,595 for the same period last year, an increase of 74.1 percent. Gas well completions climbed by 15.4 percent, up from 9,530 completions for the first three quarup to 208.3 million feet from 164 million feet for the same period in 1979. New field wildcat footage climbed from 29.6 million feet to 31.8 million feet and other exploratory drilling footage was up from 18.2 million feet to 20.5 million feet for the comparable period.

The third quarter figures show increases in each of the ten most active drilling states. Again, Texas leads all states with 14,027 well completions, compared with 11,846 for the same period last year.

Other states among the top ten and the number of wells completed through the third quarter are: Oklahoma, 6,103 completions; Ohio, 4,121; Kansas, 3,786; Louisiana, 3,312; Pennsylvania, 2,229; California, 1,-621; New Mexico, 1,391; West Virginia, 1,376; and Illionis, 976.

The Midland Reporter-Telegram

SUNDAY, OCTOBER 19, 1980

Since I have spent some time in this area I know what the Permian Basin means to the enegy industry of this nation. It produces 20 percent of the its crude and it has 18 percent of its reserves.

**HE ATTRIBUTED** the success of the oil industry in the Permian Basin to the outstanding accomplishments of its citizens.

"You have all come together and worked together here in the Permian Basin to produce the technoligy for the national petroleum industry and for the world. You are the ones who have made the contributions which made it all possible.

The honoree said those in the petroleum industry must stand together in the future because many are trying to split the industry apart becasue of political motivations.

The Permian Basin Graduate Cen-

windfall profits tax, about 85 cents of every oil dollar ends up in Washingtion. We need this money in the oil industry in order to continue a speedy exploration program.

He added that environmental controls have led to high unemployment in many parts of the country.

He said that because of high taxes and environmental restrictions, oil companies are not generating enough revenue to make big investments in exploration programs and big secondary recovery operations.

"The cost of oil companies have gone up three and four times in the past 10 years," he said, "and our present difficulties can only be solved by the removal of some environmental controls and the lifting of some of the tax burden."

MASSAD SAID "we are making

SEPM spokesman said.

Hilton.

In the field of exploration and drilling, Massad said the biggest improvement would come when the drilling industry could find ways to reduce the time it takes to make trips in and out of the hole.

"I think we are going to have to find higher strength metals for drillbits so they can stay on the bottom of the hole longer," he said: "We must also find ways we can evaluate the formations while the string is in the hole. In other words, if we can find ways to reduce the number of trips on these deep wells, that will go a long way toward speeding up the time it takes to drill a well and cut cost at the same time.

"With the dollars saved in this area, the industry can drill more holes." he said.

procedures." But he then cited several reasons

why he thinks the nation has a "manageable situation for a reasonable time frame"

-"The responsible actions of other producing countries;

-"The fact we do have significant inventories;

-"The fact the oil companies are showing very good restraint on the actions they take not to run up the spot market;

-"And because of the degree of coordination and cooperation we are getting from other consuming countries as well as producing countries.'

"Now, if you say what is a reason-

Rotary rig drilling activity in the Permian Basin Empire of West Texas and Southeast New Mexico reached a 1980 high last week, with 342 units making hole, according to Reed Rock Bit Co.'s weekly survey.

The previous high was reported July 25th when Reed counted 339 active rotaries.

Two weeks ago, the company's tally in the two-state area listed 321 rigs. Lea County, N.M., the leader, since

April 20, 1979, last week continued on top with 45 rigs, going, and increase of eight units over the previous count.

area, held on to second place with 30 rigs, the same as the previous count. Pecos County, in District 8 and the West Texas leader had 19 rotary rigs

Crockett County, in District 7-C, was in forth place with 15 rigs going, an increase of one, over the 14 units reported last week.

Andrews and Loving counties each reported 14 rigs making hole.

corded 11, while Hockly has 10 active rigs turning to the right.

#### The instructors will be provided from the Prentice & Records Enterprises, Inc., faculty. The course is designed for anyone who needs a thorough understanding of well control techniques. Fee for the course is \$500. The PBGC will offer "Introduction

to Oil Well Drilling and Completions for Non-Engineers" Tuesday. Classes will meet from 7 to 10 p.m.

at the center's headquarters. The instructors will be Don Redifer

of Hughes Tool Co., and Wayne Shinn, with Dresser Security.

## World not suffering

0

NEW YORK (AP) - The world is not suffering an oil shortage despite the cutoff of 5 million barrels of petroleum production a day from Iran and Iraq during the Persian Gulf countries' war, Exxon Corp. officials said Friday.

Oil inventories in the non-Communist world are at a "record high level" of 5.5 billion 42-gallon barrels, Terry Kirkley, president of Exxon International Co., said at a meeting of securities analysts and reporters.

The estimate was similar to several others made in the past several weeks by trade publications, oil industry officials and petroleum analysts. Exxon International is a major oilsupply and transportation division of the world's largest oil company.

## Meeting day changed

University of Texas.

The Permian Basin Landmen's Association will meet-at 6:30 p.m. Wednesday at Ranchland Hill Country Club.

The meeting previously was scheduled for Tuesday

The program will include the introduction of the new officers and directors and the showing of the film "The Landman."

## Amoco plan reported

HOUSTON - Amoco Production Co. announced a \$20-million, multi-rig drilling program that will be the first major step toward full development of carbon dioxid reserves in the Bravo Dome area of northeast New Mexi-

Drilling began this week on the first f 131 wells in a program that will be completed by about May 1, 1981, according to Earl E. Morris, Amoco's West Texas-Eastern New Mexico Division production manager. Amoco, the U.S. exploration and production subsidiary of Standard Oil Co. (Indiana), holds about 70 percent of the CO2 leases in the area.

The New Mexico Oil Conservation Commission, the New Mexico Commissioner of Public Lands and the United States Geoloical Survey recently approved unitization of the approximately 1.2 million acres in Bravo Dome. An application for rehearing on the unit has been granted.

"The unit plan is the best method to assure the orderly and efficient development of this important resource." Morris said. "To protect Amoco's interest in the potential CO2 supply, we must begin initial development now on certain Amoco leases with 1981 expiration dates."

Morris emphasized that the current drilling program is only the first step in an orderly development program contemplated under unit operations. Several hundred wells ultimately will be required to produce the estimated eight trillion cubic feet of reserves in **Bravo** Dome

Morris said that the company's proposal to develop New Mexico's CO2 reserves for use in enhanced oil recovery represents one of the best near-term contributions to solving the nation's energy shortage.

"This is a pioneering effort that will require huge initial investments with extremely high operating costs over the life of the project," he said.

The speaker will be Erich F. Kle-

All who use forklifts in the conduct of their businesses are urged to go to Fields-Newton to see the electric Komatsu demonstrated. Fields-Newton International, 708 North Lamesa Highway, Stanton; phone 756-3372.

## Komatsu, forklift of the future, at Fields-Newton

The Komatsu electric forklift trucks are engineered for comfort, safety, ruggedness, ease of service, and economy.

The operator's compartment is built for his comfort and safety, which is an exonomic asset to the employer. The overhead guard has longitudinal grill which gives good visibility of the forks and attachments for high stacking operations. The seat is altogether adjustable, and is built for comfort throughout a total work shift. The controls are positioned for natural arm movement, and are marked with universal symbols. The floor is spacious and uncluttered, with a pendant-type brake pedal, leaving the floor area clear.

The Komatsu masts, which come in a wide choice of types, are built for design for maximum visibility, and free the frame from stress. Tilting stability is provided by dual tilt cylinders fitted with greasable bronze bushings.

The hydraulic system of the komatsu is designed for higher performance and longer working life.

Dual voltage elctrical system ensures versatility. The 36 volt battery is normally used, but the 48-volt is sometimes used for increased speed of travel or lifting.

A one-piece drive axle housing assures part alignment. The transmission has helical gears for smooth operation

Maximum up-time is provided by full, quick access to daily service

secretary of the Midland Downtown Lions Club and is

a past president of that organization, 1975-1976.

Horn

He now is a member of the Midland **Board of Realtors.** 

Cities Service Co. has announced, two promotions in its Midland office. Sally Meader has been elevated to staff geologist. She has been with Cities Service in Midland since 1977, after having completed an explortion training program in Tulsa in 1976.

She received a B.S/B.A. degree in Geology from the University of

Meador Northern Colorado in 1973 and an M.S. degree in Geology from the University of Arizona in 1976.

Ms. Meader holds memberships in the American Association of Petroleum Geologists, the Society of Economic Paleontologists and Mineralogists, the West Texas Geologicial Society and the New Mexico Geological Society.

Earl Sebring has been promoted by Cities Service to staff geologist. He received a B.S. degree in Geology from The University of Texas in 1976. Since graduation. he worked as a log analyst for Cities Service in Tulsa and Midland before being assigned as

an explortion geologist here in 1979. He is a member of the American Association of Petroleum Geologists, the New Mexico Geological Society, the West Texas Geological Society and the SPWLA.

Sebring

Dean C. Boundy now is associated with Uriah Exploration, Inc., a new Midland-based oil company. As a vice president, he is in charge of the companies exploration activities. Uriah is located in Suite 322 in the

**Building of the Southwest.** Boundy previously was associated

with Belco Petroleum Corp. Steven R. Cravey has been promot-

ed to piping design coordinator for the **Midland Division of** The Ortloff Corp., réports H. M. Foer-

ster, vice president of the division's Engineering Group. Cravy is responsible for coordinating piping design

activities, including supervising design technicians. Cravey has 15 years of piping and

mechanical design experience for minerals processing plants, petrochemical and chemical facilities, and natural gas plants, both onshore and offshore.

14

Cravey

Prior to joining Ortloff's Midland Division, he was piping coordinator for Ortloff Minerals Services Corp. in Golden, Colo. He also performed piping design on a contract basis for a variety of clients. \*\*\*\*

J. W. Turner has been named marketing representative and branch

manager for the Oklahoma City office of Seismic Reflections, Inc., a Midland-based seis-35 mic data brokerage company

Turner previous-ALC: N ly was employed by Exxon 24 years, with his most recent assignment being systems analyst for the Geophy-Turner

sical Department in Midland. Assignments prior to that included seismic interpreter, surveyor on seismic crew and processor of seismic data.

Turner is a graduate of Oklahoma State University Technical Institute, with a degree in Instrumentation and Process Controls Technology. He is a member of the Society of Ex-

ploration Geophysicists and the Permian Basin and Oklahoma City Geophysical societies.

Texas Oil & Gas Corp. of Dallas has announced the addition of two geologists to its West Texas District staff in Midland.

They are Thomas Smith and Steven Zemkoski.

Smith previously was with Cities Service in Midland as an exploration geologist. He earned his B.A. degree in Earth Sciences/Chemistry at Western Connecticut State College and his M.S. degree in Geology from West Virginia University.

Zemboski previously was with Core Laboratories, Inc., in Dallas as a reservoir geologist. He earned his B.S. degree in Geology from Texas Christian University, and his M.S. degree in Geology at The University of Texas at Arlington.

## News Briefs From The Nation's Petroleum Industry

DALLAS - Continental Emsco, a subsidiary of the LTV Corp., has an-nounced the promotion of Robert S. Schrader to senior vice president -Drilling Equipment Manufacturing Group. He previously was vice president and general manager of the firm's Houston Division.

Continental Emsco formed the Drilling Equipment Manufacturing Group following the completion of LTV's acquisition of Skagit Corp. last month

Continental Emsco also announce that Thomas A. Glozer has been named vice president and general manger of the Houston Division, and that Richard A. Snyder has joined the company as manager of its Houston plant.

Glozer was the Houston plant manager.

Prior to joining the firm, Snyder was production manager for Gardner-Denver Corp.'s petroleum exploration group.

DALLAS - Edwin L. Cox of Dallas was re-elected president of the Texas Mid-Continent Oil & Gas Association at its recent 61st Annual Meeting in Houston.

Cox operates an independent oil and gas production company with properties in Texas, Louisiana, Oklahoma and Kansas.

The executive committee of the 3,700-member organization also reelected William H. Abington as executive vice president and general counsel and Leo Patterson Jr. as treasurer. Both are from Dallas.

The Dallas-based trade association re-elected all nine of its vice presidents.

There are C. W. Alcorn Jr., Victoria, the Lower Gulf Coast; E. L. Ames Jr., San Antonio, Southwest Texas; Richard C. Hudson, Houston, the Upper Gulf Coast; C. E. Jacobs, Albany, West Central Texas; W. D. Kennedy, Midland, The Permian Basin

#### W. M. Thacker Jr., Wichita Falls, North Texas, and Keating V. Zeppa, Tyler, East Texas. The association will hold its 1981

convention next October in Dallas.

**HOUSTON** — Transco Explroation Co., a subsidiary of Transco Companies, Inc., is extending its onshore ex-plortion program to the Rocky Mountain region.

The firm has acquired more than 90,000 net acres of oil and gas leases in the Paradox Basin in Utah and Colorado and in the Powder River and the Denver-Julesburg Basins in Wyoming.

\*\*\*\*

HOUSTON - J. Hugh Liedtke, chairman and chief executive officer of Pennzoil Company has announced the election of Charles William Flint Jr. to the company's board of directors.

He succeeds Admiral Allen "M. Shinn (USN Retired) who has retired from the board.

Flint is a resident of Tulsa, Okla., and is chairman of the board of Flint Industries, Inc. He also serves on the boards of Atlas Life Insurance Co., Helmerich and Payne, Inc., and the First National Bank and Trust Co. of Tulsa.

\*\*\*\*

OKLAHOMA CITY - Two oil country supply stores have been opened by Republic Supply Co. in Giddings, and Evanston, Wyo.

The Giddings store is halfway between Houston and Austin and will service the petroleum industry in the Austin-Chalk trend.

The Evanston store will service the Overthrust Belt area in southwest Wyoming.

WINTER PARK, Fla. - The Continental Group's Florida Exploration Co. announced the establishment of a new operating unit - Frontier Division - and the appointment of Calvin A. Chimene as vice president of the division. The division will operte oil and gas

exploration and development pro-

grams on the East and West coasts of the United States and in the Mid-Continent states.

BARTLESVILLE, Okla. - Phillips Petroleum Co. will build a natural gas liquids and gas-conditioning plant five miles west of Okarche in Kingfisher County, Oklahoma.

The plant's processing capacity will be 150 million cubic feet per day of raw natural gas delivered from gathering systems serving Blaine, Canadian, Kingfisher and other adjacent counties.

In order to provide service at the earliest possible date, offsite construction of a Phase 1 temdporary processing plant for the Okarche site already is underway.

SALT LAKE CITY, Utah - Phillips Petroleum Co. has become a member of the Design and Engineering Board for the Alaska portion of the Alaska Highway Pipeline Project, reports John G. McMillian, chairman and chief executive officer of Northwest Alaskan Pipeline Co.

The board was established last summer by pipeline sponsors of the Alaskan Natural Gas Transportation System and Alaskan North Slope oil and gas producers to finance continued design and engineering activities of the Alaskan gas pipeline and the conditioning plant necessary to process Prudhoe Bay gas for transportation.

NORMAN, Okla. - The fifth annual sale of duplicate books, maps and journals from the University of Oklahoma's geology library and the Oklahoma Geological Survey is set for October 31-Nov. 1.

The Geoscience Book and Map Sale will be held in 204 Gould Hall from 10 a.m. to 3 p.m. Oct. 31, and from 10 a.m. to 5 p.m. Nov. 1.

For sale are duplicates of publications held by the geology library. These include works by the U.S. Geological Survey, numerous state geological surveys and the U.S. Bureau Mines; textbooks, and issues of such journals as Geophysics (SEG), the AAPG Bulletin, Journal of Geophysical Research, Geotimes, Bulletin of Canadian Pwetroleum Gelogy and Shale Shaker.

Also, various thematic maps covering the world geographically will be on sale.

CHICAGO, ILL. - Standard Oil Co. (Indiana) announced the appointment of Robert T. Crosby as manager of public affairs operations, replacing James M. Patterson, who is retiring after 35 years of service with the company.

Crosby has been the Atlanta-based, area director of public and government affairs. He will be replaced by Richard J. Fox, currently a government affairs representative in Standard's Wachington, D.C., office.

DALLAS - Recognition certificates will be awarded oil industry equipment manufacturers, service and supply companies for the most innovative technology, new and improved equipment for finding and producing more oil and gas from existing reserves, and the development of new reserves.

The certificates will be presented at the World Oil & Gas Show in Dallas in December 1981.

Rules and regulations now are being formulated for these awards and will be distributed by the committee to the oil industry manufacturersd, supply and service companies who have signed up for exhibit space no later than Feb. 1, 1981. \*\*\*\*

Link Systems Inc., a gas pipeline gathering company, has been established as a wholly-owned subsidiary of Jackson Exploration, Inc. W. A. Upson has been elected president of Link.

Midland, was elected executive vice president and chief operating officer of Link.

DALLAS - Robert M. Brackbill, president and chief executive officer of Texas Pacific Oil Co., Inc., a wholly-owned subsidiary of Joseph E. Seagram & Sons, New York, has announced the appointment of his senior management staff.

**Texas Pacific reports** 

appointments to staff

Named to leadership positions were: Joe R. Clark, executive vice presdent-production and exploration. Claude W. Dodgen, Jr., executive vice president-administration, Vice presidents are: Ed A. Keegan, exploration; J. L. Vernor, production; and Ray Brown, controller.

H. Clayton May has been appointed general counsel. Named to the management staff were: J. L. Trombla, manager of engineering; MikeWalker, operations manager; Clay H. Miller Jr., manager of geology; C. G. Dahm, manager of geophysics; George A. McCoy, land manager;

degree from Texas A&M University, joined TP in 1965 as chief reservoir engineer, and earlier was with Stanolind Oil & Gas Co. (now Amoco Production Co.).

served as controller, vice president, senior vice president, executive vice president, treasurer and director. He holds the BS degree in accounting from Louisiana State University.

Keegan, prior to joining TP in 1974, held various land department and executive positions wth Conoco Inc. He is a graduate of the University of Oklahoma. A former director of the American Assocation of Petroleum Landmen, his experience includes exposure to most exploratory basins in the U.S.

Vernor's career covers 20 years in the petroleum industry, most recently directing all drilling and production activities internationally for TP. He holds the BS degree in general engineering from Texas A&I and has done graduate work at the University of Southwest Louisiana.

Brown, who holds a BAA degree in accounting from North Texas State University, has held various positions with TP since joining the firm, includng tax supervisor, assistant controller and controller.

May, prior to joing TP 18 years ago was with Gulf Oil Corp. and in private practice. Most recently he has served as associate general counsel and corporate secretary.

He holds the BS degree in Commerce from Texas Christian University and the Bachelor of Law degree from Southern Methodist University.

## **Midland's Prestigious Executive Office Park**

Downtown covered parking (on Big Spring across from the Petroleum Club) also available at a nominal rate. Attractive precompletion lease rates and personalized architectural office planning service is available. Ask for Mary Ann Merrick at Henry Blanton's office at

18.4 MBD, with 45 percent of it imported. The decline in consumption and imports is credited to rising foreign prices and greater energy efficiency and conservation in the United States.

Report says no increase due over next 20 years

The OTA predicts that U.S. oil production will decline from the 1979 level of 10.2 MBD to between 4 and 7 MBD by the year 2000. The forecast for non-Communist

world oil supply, which was 52 MBD in 1979, is for a production range of 40-60 MBD by 2000.

During the same period, the OTA study concluded, production by nations belonging to the Organization of Petroleum Exporting Countries (OPEC) will remain at its current level of 31 MBD. "If the OTA's projections prove correct, the United States, as well as the rest of the world, will have to fuel its future industrial and economic growth without the seemingly limitless supply of oil we have had in the past," said Dr. John H. Gibbons, director of the OTA. The OTA pointed out that while oil-producing nations technically could increase production as much as 33 percent over the next decade, such an increase is unlikely because of financial and political considerations pany said. influencing those countries.

reserves of 31 billion barrels, according to Mexican government estimates. Outside studies suggest that Mexico has the potential to produce at least 70 billion barrels, possibly as many as 120 billion.

Although the United States would like to see Mexico become a producer of an assured petroleum supply that would move through a relatively secure pipeline instead of fleets of vulnerable tankers, Mexico's level of production will be far below its capac-

would permit exports in the .5-2.5 MBD range, the OTA suggests.

The OTA predicted that major increases in the world's known oil supplies will come from additional recovery in known fields rather than

## Panel wants insurance formulas reviewed

#### **By BILL KIDD Austin Bureau**

AUSTIN - House Insurance Committee members have recommended that the 1981 legislature require the State Board of Insurance to examine rate-making formulas, and to consider whether companies are being allowed too much — or too little — for profits.

In its interim study report, the committee says SBI should consider current formulas "to determine whether the factors used are appropriate and whether current percentages allowed for expenses and return on investment are realistic.'

"With regard to the allowed percentages for fees, licenses and other operating expenses," the report says, 'the board should determine whether companies are actually paying out these monies for the designated expenses.

"If it is determined that companies can operate below these percentages,

consideration should be given to lowering these allowances to reflect the reduced level of expenditures."

Also proposed is that the SBI staff from time to time examine the factors used in the formulas, to keep them current.

The report also recommends that the SBI consider ways to eliminate any reporting of information which is 'superfluous and may be deleted," to cut down on expense to both the state and the insurance industry

Other proposals include allowing a "substantial upward revision" of the limitation on group life insurance which an individual may obtain, and a review of the present driver classification system for auto insurance " with an eye to creating different classifications based on age."

At present, "the only rate differential exists in the under 25 age bracket," the report notes, adding, "Statistics presented to the committee indicated that perhaps this was not the only age group that should be rated

differently.

Also called for is a concerted effort to strengthen the building codes in the coastal area, in unincorporated as well as corporated areas," to reduce damage from storms.

Existing codes are called inadequate, and it's recommended that the SBI, or the Teexas Catastrophe Property Insurance Association, be given the authority and funds to monitor and enforce building standards, with penalties for non-compliance and exemptions for municipalities with satisfactory standards and enforcement.

The report notes that "an increase in the voluntary writing of windstorm insurance (on the coast) results in a reduction in the liability of the Texas Catastrophe Pool" (which was created due to problems in coastal residents obtaining coverage) and that "further inducements" be given companies - for example, as an offset against premium taxes - to encourage further voluntary writing.

Another House committee, Employment Practices, continues working on its interim recommendations on worker's compensation insurance, compensation of crime victims and unemployment insurance.

Those recommendations are expected to be voted on next month.

However, a report on the unemployment insurance area has been drafted, with its "major recommendation" being that Texas do what may need to be done to prevent additional federal controls over state unemployment programs.

Basically, the committee's draft indicates, the Texas system is performing well, and should remain as independent as possible.

Gross premium tax collections for fiscal 1979 exceeded \$159 million, SBI reports, an increase of 5.84 percent

## Peyton's opens new store at mall

The new Peyton's Toy Store at Midland Park Mall held its grand opening last week.

Besides the usual dignitaries who helped officially open the store, familiar masked creatures roamed freely throughout the store much to the delight of the younger set and their mothers.

Bob Peyton, owner of the two Midland stores, noted that the growth of the Tall City was the reason for adding another toy store in the mall.

Orginally, Peyton's toy store started

over 1978, but-under the projected increase of 15-16 percent made earlier.

The difference was the result of court decisions against SBI's method of calculating "Texas" investments by companies — with Allstate Insurance Co. and American Automobile Insurance Co. winning cases against SBI.

Efforts were made in last year's legislative session to change the law to support the board's interpretation, which had been in effect for many years, but the bill failed to pass, and so far there have been no firm indications of any attempt to pass such a measure in 1981.

Texas Bankers Association directors are to meet in Austin Friday (Oct. 24) to consider areas of possible legislative action.

President Sam D. Young, Jr., reports revision of usury statutes to allow a "floating" cap on rates, changing provisions for taxation of bank capital stock, adoption of 2,000 feet as the maximum distance from a main bank facility for a drive-in or other detached facility and changes in the Homestead Law to permit borrowing against a homestead are among the items expected to be proposed or supported by TBA.

Those areas were discussed at "a meeting in July by representatives of TBA, Independent Bankers Association of Texas and the Association of

## Midlanders buy Woodhill

PAGE 5G

The Garfield Partnership, comprised of Toby Hilliard, Pomeroy Smith, Joseph I. O'Neill, Jr., and Darol K. Ramey, purchased the Woodhill Office Building from the Clark Brothers Developers of Dallas. The Woodhill, one of Midland's most

prestigious new office buildings, is located at 3000 North Garfield. HBF will be the prime contractor used to finish the building according to the plans and specifications of the new tenants. It is anticipated the building will be completed by the first of the year.

Woodhill Office Park offers the convenience of shopping, restaurants, and residential areas nearby, with the additional asset of both covered and surface on-site parking.

One of the most unique features of the building is the health club provided for the tenants. The club is complete with gym, racquetball court, showers, sauna and whirlpool.

The new owners, all prominent members of the oil community, are looking forward to the development of the facility as an asset to the office needs of the petroleum industry.

Joan Ramey, associate of the Carriage Company will act as leasing agent for the new owners.

## NFC agrees to acquisition by MGF Oil firm

Martin E. Kantor, president and chief executive officer of NFC Corporation, and R.O. Major, president and chief executive officer of MGF Oil Corporation, jointly announced that NFC has accepted in principle a proposal by MGF for the acquisition of NFC and its oil and gas business.

In the proposed transaction, a newly-formed subsidiary of MGF would merge with NFC, with stockholders of NFC receiving cash and shares of stock of NFC's wholly owned subsidiary, National Foundation Life Insurance Company.

Pursuant to the agreement in principle, MGF would pay to stockholders of NFC an aggregate of \$55 million plus an amount equal to 104.57 percent of, plus accrued interest on, the principal amount of any of NFC's eight percent convertible subordinated debentures due 1992 which are converted prior to the redemption date thereof.

The consummation of the proposed transaction is subject to the finalization and execution of a definitive agreement of merger satisfactory to the boards of directors of NFC and MGF, the approval of the stockholders of NFC, and certain regulatory

Happy the Clown, left, and Yoda, a character from "Star Wars - The Empire Strikes Back," join store owner Bob Peyton partnership with his brother R.E. Peyton in 1952 when it opened on 310 E. Texas Ave.

Toytown, as it was known in 1953, had moved from the downtown area to 415 Andrews Highway. Then in 1961, Peyton's Toys moved to 2310 Michigan Ave. where the other Midland operation remains.

In 1970, Bob Peyton became the sole owner of the stores when he purchased his brother's interest in the partnership.

Gordon Young was named vice-president of operations and general manager in 1976.

Besides the Midland stores, the business has operations in Odessa, Corpus Christi and Victoria, according to Peyton.

The mall store will specialize in the more unusual toy lines which are "things you don't find in other toy stores."

**Bank Holding Companies** Love Shop

### in new mall A unique new gift shop,

The Love Shop, has opened in Midland Park Mall.

Gift selections range from hand-crafted wooden plaques and shadow boxes to posters, pottery, THERIOT GROUP parchments, jewelry, books, Gospel records and a variety of other items, all reasonably priced. Presently The Love Shop in Midland Park Mall is owned by the

home office in Fort Worth, but a prospective

franchise buyer is being

sought, according to Mr.

Louis Jackson, executive

vice president.

## Keeping the baby

Midland is an affluent city. Earlier this year, in fact, the **Commerce** Department reported that the per capita income of Midlanders ranked fourth in the United States. That's a pretty impressive statistic.

The city is riding the crest of the current energy boom. Industries and businesses are expanding. New ones are being started. Retail sales remain high and the city seemingly hasn't suffered the adverse effects of the 1980 record recession.

But not all is well here. Amid Midland's affluence there is poverty. For some residents, life is a struggle, a hand-to-mouth existence.

Housing has been a problem for a number of years. There simply isn't enough to go around and when a dwelling is located it's expensive. That's because the old supply and demand principle is having a heyday here.

Chamber of Commerce statistics show that through September Midland was experiencing a net gain of 87 new families each month. That's a bunch of new people, but the trend isn't new; it's been this way for the past several years. In fact, back in 1977 the city was experiencing an average net gain of 94 families per month.

That's great and most Midlanders are pleased to see the growth. But it really puts a strain on the city's housing market. New construction helps fill the gap. But houses take time to build today's economy new construction is costly. For poor Midlanders the search for adequate, affordable housing probably seems futile. Up until now it probably has been.

ment Block Grant funds because of the Section 8 rental subsidy clause.

Those council members have held the belief that rental subsidy kills the incentive for the poor to strive to better themselves and, ultimately, helps to create slum pockets within cities. That welfare-state nightmare, unfortunately, was proven to be the case in some instances.

But by rejecting CD funds on principle because of the Section 8 clause, Midland appears to be throwing the baby out along with the bath water, so to speak. The city has been rejecting funds that could help all Midlanders, affluent and poor alike, and provide housing for those less fortunate like the invalid and the elderly. The question of principle could even become moot in the future if CD funding becomes a casualty of the war in the Congress to balance the federal budget.

Even so, the entire issue of CD funds was turned around by 180 degrees last Tuesday when the City Council, by a vote of 4-2, approved submitting an application seeking the funding. Of course there still are council members who have reservations about CD funds and don't mind saying so.

But those Midlanders who appeared before the council prior to the vote illustrated the need for the CD funding. The council made the right decision. That decision was important from a humanitarlan standpoint. The council's decision, however, brings a responsibility to bear on all Midlanders. Every citizen in this community must endeavor to prevent Midland from suffering the ill effects of Section 8 rental subsidy housing if such a program is approved and inaugurated here. That is the big responsibility that goes along with keeping the baby.

## WASHINGTON-MERRY-GO-ROUND 'Re-election fever' plaguing Capitol Hill

WASHINGTON - Re-election fever broke out on Capitol Hill again last month with its usual biennial virulence. It's as if a powerful drug had been dumped into the Capitol's water supply, bringing out the crass, cowardly and cynical tendencies that are only barely suppressed by our elected officials in the best of times. Members of Congress who have had

nearly two years to make a legislative record to run on - nearly six years, in the case of senators up for re-election - suddenly get desperate in the last days before the voters pass judgment on them. Last-minute maneuvers are injected into the campaign game plan in the hope of pleasing important blocs of constituents - or at least not antagonizing them.

- A blatant example of the strategic stall is the mass-transit bill with an amendment that would limit accessibility to the handicapped. The controversial vote was conveniently put off until the lame-duck session. "No one wants their campaign headquarters being picketed by people in wheelchairs," Rep. James Howard, D-N.J., the bill's sponsor, explained. But he insisted that the rights of the handicapped will not be compromised in the post-election session. - Sen. Bob Dole, R-Kan., attempted a bit of legislative blackmail to score points with veterans groups in his home state. They want to rename the veterans hospital in Topeka after two national commanders of the American Legion. So Dole obligingly attached the name change as an amendment to a \$1 billion veterans compensation bill, and threatened to hold up the bill unless the House accepted the hospital name change. At the last minute, though, the House refused to be blackmailed; if Dole made good in his threat, all the Kansas veterans would be deprived of increased payments. So the senator, concluding politics was the better part of valor, quietly withdrew his amendment.

election fight of his life. - On the other side of the coin, the Democratic leadership is turning a relatively cold shoulder to members who have been less than true-blue in matters of party regularity over the years. "We're putting money with the people who have helped us," said one top party official. To the renegades, he added, "that old-time religion is looking better than it used to.

- Congressmen hungry for last-minute attention from the voters use all the perks and power at their disposal. Rep. John LaFalce, D-N.Y., for example, has called an oversight hearing for his small business subcommittee just eight days before the election - giving him a good chance to speak out against government procurement abuses. - Similarly, House Majority Leader Jim Wright, D-Texas, was quick to respond when the Energy Department was considering the termination of a solar energy project in his home district. Wright whipped off a letter to Energy Secretary Charles Duncan, pleading: "Charlie, I sincerely hope that this represents a mere contingency plan. If the DOE budget must be reduced, surely there must be other. less visible ways to do it." Congressional staffers are no less cynical and pragmatic than their employers. As Election Day approaches, aides of representatives and senators in tough re-election contests quietly but assiduously scout around Capitol Hill for new jobs - preferably ones not tied exclusively to a particular member of Congress. - The party affiliation of the clandestine job seekers offers a barometer of sorts on the election outcome. According to one permanent House official, a few months ago he was getting dozens of frantic calls from nervous aides to Democratic members. Now, he said, the tide seems to be turning: Democratic calls are tapering off. - Nominees to federal judgeships and other posts requiring Senate confirmation are traditionally innocent victims of re-election fever. The Republicans seemed determined this year to stall every White House appointment they could until after the election. But they surprised their Democratic opponents by a last-minute decision to let 11 federal judgeships be voted on. The makeup of the nominees explains this apparent act of charity: Seven of the 11 were either black, female or Mexican-American. The Republicans weren't about to give the Democrats ammunition by blocking the appointments. - Each member of Congress is entitled to 6,000 copies of the government's infant and child care books to give constituents. The House Doorkeeper's Office, which handles distribution, reported a high demand for the books before the recess.

NICK THIMMISCH

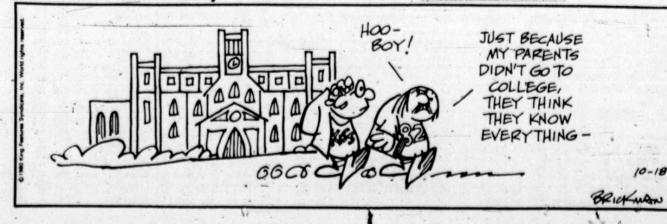

Here are some of the more flagrant symptoms of this election year's congressional fever:

- The prize for high-level cynicism goes to the Democratic leadership, which called a lame-duck session to consider the budget - thereby avoiding a pre-election vote on what could be a \$50 billion deficit. The leaders had no desire to let the Republicans remind voters of the Democrats' well-publicized promise last spring that they would produce a balanced budget.

- The budget was supposed to be the only matter taken up in the lameduck session. Acting on that assumption, House Speaker Tip O'Neill promised - with uncharacteristic naivete - that everyone would be home for Thanksgiving. But the leadership's fabian tactic was infectious - sponsors of controversial bills found the temptation to avoid a showdown before Election Day to be irresistible. "The lame-duck session has become a dumping ground for controversial legislation," moaned one congressman to my associate Peter Grant. "We'll be here till Christmas."

- Despite the trauma of the Carter-Kennedy primary battle, the Democratic Party leadership has had no

don't talk about oil slicks again ... We'll send you new cue cards so you won't have to deal with the clean air issue at all.

.. Of course, you're your own man, Ronnie, and you have a right to say anything that comes to your mind. But stay away from trees unless you know the difference between nitric oxide and nitrous oxide.

"Are you still trying to land? You're going to in spite of the smog? Okay, Ronnie, good luck. But for heaven's sake, stay indoors while you're there. We don't want you to get sick from the pollution ... Do I have any good lines for you as you get off the plane? ... How about this: You come off smiling, not coughing, and you say, "I think that I shall never see a poem lovely as a tree ..." No, don't memorize it. Write it down, Ronnie, write it down."

#### MARK RUSSELL SAYS

President Carter says he will soften his rhetoric about Ronald Reagan and that he hopes the demented mad bomber will do the same.

What is Carter's October surprise which will once again bring him victory at the polls? Maybe he'll debate Gerry Ford.

Carter has only several weeks to bring back the spirit of '76. How about an interview in Playboy?

A Camp David summit conference - that's the answer. Just like old times with Begin and Sadat watching the returns together on election night.

"Pray for me, Menachem," says Jimmy. "I would," says Begin, "but what's all this garbage about your God not listening to me?'

#### **BIBLE VERSE**

#### Anderson still hoping for a miracle as campaign's ending **NEW YORK CITY - "That seems** so long ago," John B. Anderson said, trying to recollect the beginning of his campaign many months ago. "I was praying for a miracle then, and I'm Nick praying for one now." Faced with a Thimmesch fading effort, Anderson was a subdued crusader when I talked with him

He hits Carter harder than Reagan. can primaries, losing them all, and Perhaps it's his old Republican inbecoming a Don Quixote independent. stinct. At the Liberal Party dinner. "People would have felt more comfortable with a new party," Anderson Anderson called Carter "an opportunist" whose "tawdry tactics disgusted" Americans and "disgraced Anderson keeps going. He tries to rouse shrinking crowds with the fahis office.

Later, he told me that while he won't accuse Carter "of starting a war, he might opt for some dramatic event in the last weeks" because "his judgment could be clouded by his intense desire to win.'

Anderson says the clue to Carter's last-minute behavior is the way the president came down from the mountain (Camp David) in 1979 and "conceded that he was managing, not leading, the country," and would now take bold action (wholesale firings.)

But Anderson thinks this strategy won't work now because "people are very skeptical about politicians ... Why shouldn't they be? They read that this one is being convicted and that one arrested. The Chicago Cubs look like winners this year compared to politicians.'

Anderson looked pretty good to the press for most of the 1980 political

season, but such interest wanes now. The support he enjoyed from disaffected liberals, Jews, and famous names - Milton Eisenhower, Normal Lear, David Rockefeller and Paul Newman - leveled off.

He still hopes for a shift to him from the softly committed majority, but says, "I've got to have a heavy turnout to get it." His claim to strength in Illinois is valid, but his optimism about New York, Wisconsin and Oregon isn't.

There's been plenty of dumping on Anderson in recent weeks. The Americans for Democratic Action, self-described leader of liberals, repeats its litany of complaints against Anderson - a Vietnam hawk; enemy of unions, social programs, CETA and food stamps for strikers; and onetime supporter of nuclear power and big defense spending.

His earlier assaults on estimable folk accused of public perfidy for leftist politics; advocacy of a constitutional amendment recognizing "the authority and law of Jesus Christ, Savior and Ruler of Nations"; and kind words for J. Edgar Hoover and Richard Nixon are widely advertised

The Rev. Robert F. Drinan, Society of Jesus, was not charitable when he recently recounted most of the aforementioned sins, and in righteous condescension remarked that he "would rather have him as a swimming partner than as president." Anderson quickly replied that it was hard to believe his "good friend" could write such misleading stuff, but would still

invite him for a swim in the White House pool one day. Ah, John B. Anderson, 1980s political meteor, has other regrets. He told

me he should have written his own letter on abortion, instead of allowing the National Abortion Rights League to distribute a harsh missive over his signature. Anderson also wishes he could have met Arab mayors on the West Bank instead of just touring by Israeli helicopter. "It would have been better to create the impression we were genuinely trying to talk to both sides rather than just with the military conqueror," Anderson told

After the election, Anderson said, he doesn't intend to retire to a house by the side of the road and philosophize about man's fate. "I want to be in a role - speaking or writing or doing something - where I felt I was having an effect on public policy," he mused

#### **USTIN NOTEBOOK**

## 'exas' teachers prepared to educate state with 'political presence

#### **By BILL KIDD Austin Bureau**

AUSTIN - One of the most popular uttons during the Democratic state onvention in San Antonio this past ummer was sported by teachers and neir sympathizers — showing a ouilding with the motto, "Best Little oorhouse in Texas."

And one Lubbock teacher-delegate vas urging reporters to "be sure and tell everybody how many teachers we nave here.

Teachers were much in evidence at that San Antonio session - 400 of

them among the 3,900 convention delegates, apparantly the largest single occupation group.

That showing was part of a deliberate effort by the Texas State Teachers Association to get its members more and more into the mainstream of political power in the state, an effort which is drawing some mixed responses from those already in the mainstream.

Part of that new attitude is shown by the fact that TSTA, which celebrated its centennial this year, has made its first-ever endorsement of a presidential candidate - declaring for Jimmy Carter through its political action committee.

That decision didn't sit too well with Gov. Bill Clements, whose relations with TSTA already were about on a par of those between Iran and Iraq.

Clements already had promised, on several occasions, to veto any attempt by teachers to gain collective bargaining rights - and relations have been plunging downward again as Clements has accused teachers of concentrating on paychecks instead of quality in education, and being 'stupid" in their priorities.

"If we had come out for Reagan-Bush, would Clements have called us 'stupid' then?" asks TSTA President Dora Scott — and answers herself, "Not likely...."

Scott, and other TSTA workers, cites the different stands by the two major party candidates as the reason for the TSTA choice - particularly Reagan's opposition to the newly created Department of Education established by Carter, federal aid to education and tax credits or government aid to private and parochial schools (the last issue backed by Reagan and opposed by Carter.)

Other issues cited by teachers include increasing support for bilingual education and special education programs - and the ability of teachers to

'Auto' be blamed

transfer retirement programs across state lines, all areas where Carter is perceived as being more favorable to teachers' interests

But the fact that Bill Clements is an ardent Reagan backer probably didn't hurt the decision either.

Clements has endorsed the idea of increasing teachers' salaries - although not to the extent TSTA would like - but he also is pushing the idea of competency testing for teachers, something which many teachers find irritating.

That issue, along with pay raises, increasing state aid to public schools and a host of other matters tied to education, will be up again in January - just as they have been, in the honored legislative phrase, "since time immemorial."

TSTA has been active at the Capitol for about that long, as well - but the degree and nature of TSTA's political involvement has been changing over the last six years.

In 1974, TSTA affiliated with the National Education Association, which also had been largely a professional organization, but then began, during the last decade or so, to become more politically active and increasingly union-like.

#### LETTERS TO THE EDITOR Car care...for kids Who's helping...

#### ou pronything or you?

To The Editor: If parents only knew that trick or reating and also selling Christmas cards for UNICEF is not in any way a penefit for the underprivileged hroughout the world.

The communists are our enemies. Their aim is to conquer the world and they use every means to do just that. And UNICEF (United Nations International Children's Emergency Fund) is one of those means.

Communists have controlled UNI-CEF from its beginning. They give most of the UNICEF funds to communist and socialist governments to use to control their people. And about 80 percent comes from the U.S. So our own money is used to strengthen communist countries whose aim is to destroy us.

As reported in June 4, 1975, Congressional Record, UNICEF collected and dispersed a total of \$13,649,433 for its Indochina children's programs. \$8,975,587 went to communist recipients; \$6,313,130 went to Hanoi and \$1,975,587 more went to the Viet Cong. While communists were getting 61 percent of UNICEF's money, South Vietnam (our ally) got only \$5,360,707 or 39 percent.

The history of UNICEF has been and is to aid the enemy. All UNICEF gifts are given to the governments receiving such aid.

Last year in July we heard that the guerrillas infiltrating Zimbabwe-Rhodesia were being equipped with combat medical kits provided by UN-ICEF. And in their report UNICEF admitted that funds raised to support children were being used to help Southern African terrorist move-

cards during the Christmas season.

To The Editor:

I continue to be amazed at the parents who would never speed in a school zone or run a stop sign, that allow their small children to stand in the front or rear seat of the car while driving

Don't they realize that any sudden stop or swerve would catapult the child violently into the dash or side window, and to transport a child like this should be a crime. Likewise, it should be a crime to sell or use some of the "mickey mouse" car-seats for infants. Many of these seats are more dangerous than standing up in the seat.

There are several approved seats that work in conjunction with the automobile seat belts that can be used, but the good ones are not cheap. Let's use our heads...not our kids. John R. Ellis Midland

## Plea for pets

To The Editor:

I was driving north on Big Spring Street Saturday, Oct. 11, at 45 mph and had the unfortunate experience of having a dog run in front of me. For those of you who have had this happen, you know the terrifying feeling. Luckily, with good brakes, I stopped 10 feet short of hitting the cocker spaniel and it proceeded to cross the street. In essence, this letter is a plea to pet owners. If you have a dog or cat, or any type of roaming animal, please keep them on a leash. If you own such a pet and can afford to feed it, surely you can afford a leash and a collar.

The next step

To The Editor:

Brace yourselves for the new, "nonmandatory" nine-digit ZIP code! To be implemented in 1981, the 9-ZIP will have a capability of 1 billion places, exactly the same number as the Social Security number system has for people

Boy, that'll sure be nice, a separate number for each person in the country, AND a separate number for each person's location in the country. Notice the next "logical" step? Sooner or later each person will be assigned to a given place. That'll do away with one of the two number systems, a simplification every bureaucrat will cheer! Just one little problem, though. Since the numbers are only for a given spot, people won't be allowed to move without a reassigned number. That will take governmental permission, but we all know how easy and fast that'll be to obtain.

Yes sir! Big Brother will be taking care of us and our mail in no time! But somehow it looks to me as though they've already got our number! Hugh G. White Midland

### Good occasion

To The Editor:

We have noted that October 12 through October 18 has been designated National Newspaper Week. We believe this would be an appropriate occasion to compliment you on the services you provide to this area

and to the community. Obviously, the need to disseminate information to the populace is more important now than ever before. We also wish to thank you for the cooperdepartment and you during the years.

#### To The Editor: Well, big business is doing it again.

Thursday, October 9, 1980, you published an article entitled "Imports Blamed for Auto Woes;" it should have been entitled "Management Re-sponsible for Auto Woes." The auto industry (big business) wants Congress (big government) to limit imports of small, gasoline efficient automobiles. Management says it will not be able to re-tool from large cars to small cars for at least five years. Chrysler's ads for the luxury. Imperial on television this last weekend would lead one to believe it does not intend to abandon the big car.

Does free enterprise only work when big business is making a buck? Does free enterprise not extend beyond the borders of the U.S.? Are the UAW workers to have their jobs salvaged at the expense of the employees of foreign car dealerships in the U.S.?

Big business screams about government regulations and intervention but it never hesitates to scream for help when its own incompetence gets it into trouble

Management of the auto industry, if worth the exorbitant salaries it demands, should have demanded quality workmanship in the product it produced; it should not have taken the American consumer for granted. The consumer should not be forced to buy an inferior product simply because it was built in Detroit. The solution to Detroit's problems is not limiting imports, it is making a quality, fuel efficient American auto now.

As usual, Congress will respond to big business and then when we are all driving junk from Detroit because we cannot afford quality from abroad, big business will yell its head off t government regulations.

• Readers are invited to submit letters on any subject although slanderous, defamatory or unsigned letters will not be considered for publication.

For valid reasons, at the discretion of the editor, the name will be withheld but must be

included in the original letter. Writers should be as concise as possible and the right to condense letters of more than 200 words is reserved.

Letters must be received by noon Thursday for Sunday publication. If necessary, the latest received may be held for publication the following Wednesday or Sunday.

They should be addressed to: Letters to the Editor, The Midland Reporter-Telegram, P.O. Box 1650, Midland, Texas 79702.

#### It's no wonder

To The Editor:

I would like to respond to the letter of Mr. C. Davis in the Sunday paper on October 4, 1980.

Mr. Davis, in your letter regarding the city of Midland water department did you ever stop to think that the people who work for the city of Midland and county of Midland are probably the lowest paid people in our great city. Have you ever tried to support a family on \$600 to \$800 per month, which is what they pay (average) to the meter readers. It is no wonder that they cannot keep people working for this wage.

I feel some of the people of Midland. do not understand that they are the ones that keep the wages down and feel that the city employees work for them. They do "but" they are also human and make mistakes just as you and I, and I would personally like to see some of the public work for a public facility for one week and see just how much of the gripes they could take and how many cussings they would tolerate before losing all composure. I am writing this letter because I used to work for the city and I know the situation there. The city of Midland is a good place to work, the people are great and the city fathers are doing the best they can for their people. The City Council is made up of business people, attorneys and politi-cal contacts. They themselves do not realize the impact that the salaries have for the employees of our great city. It would be hard for them to live on what most city employees make. Maybe this will make them set up and take notice.

### Where were you?

To The Editor:

On Thursday, Oct. 2, a workshop, conducted by two well qualified Ph.D's from North Texas State University on "Automobile Safety for Children" was held at the Midland Hilton. This workshop was very informative and had a strong impact on those in attendance on the vital importance of using car seats for infants and small children (and seat belts for the rest of us.)

The only problem with the workshop, however, was that no one besides those in attendance benefitted from the information because the news media failed to arrive! The newspaper reporter, who had been contacted several weeks prior to Oct. 2 and who had agreed to cover the workshop herself or send someone in her place, never appeared. The same 'story" occurred with the local TV reporter.

We might add that there was a small piece about this workshop in the Sunday Oct. 12 newspaper under "Club News." Thank you for that, but this topic goes beyond club news.

Since the news media failed us all (thank goodness for the editorial page) we will give you some facts: Motor vehicle crashes are the leading cause of death for children over age one. In 1977 alone, 900 children under age five riding in cars were killed and 60,000 were injured. It takes only a few minutes to buckle your baby or toddler into a car seat, and those few minutes might very well save your child's life — that child we all say we would do anything for.

J.E. Mendez, M.D. Mrs. Connie Wagner Mendez Midland

## The key is caring for others

#### By NORMAN VINCENT PEALE

A young minister I know once took over a New England church. He found that a woman who lived right next door to the church thought she ran it and kept the key at her house. If the minister wanted to get in, he had to go to her for the key because it was the only one they had.

When he called on her the first time, she looked at him and asked, "Who are you?"

"I'm the new minister," he said. "Oh, no, you couldn't be," she exclaimed, and later made a point of telling all her friends that he didn't look as though he had sense enough to come in out of the rain.

cure. Of course, the minister realized

that her attitude indicated some deep

He told an older minister about his

problem. "Son," the other man said,

'you've got to learn to get along with

people who annoy you because a lot of

them are going to do it as long as you

live. Also, you must analyze people to

inner unhappiness or frustration.

reach. He took another cookie and still Well, she continued to annoy him. another. "You know," he said, "I'm She told him that no one would come just 22. I understand you lost a boy of to hear him preach. She criticized his sermons. She did everything she that age. could to make him unhappy and inse-

"Yes," and her lips were thin, "God took him from me when he was only 22.

"I'll bet he liked your cookies, didn't he?"

"I still make them just because he liked them," she said.

"I like them, too," he told her. And they sat silently for a while.

Then she spoke. "No one has men-

On pain: Permanence is a pity

tioned my son to me for years."

That started off their friendship. "I guess," the minister explained to me, 'she sort of put me in her son's place. She used to get me into her kitchen, lecture me, advise me and then feed me. She helped me make of that congregation a harmonious and happy people, and I love her memory to this day."

There is always a place of entry into the heart of anyone who annoys you. When you row around an island looking for a place to land, you may not find it at first, but one is there if you keep looking for it.

Learn to understand people's reactions. Always treat them with respect and love and patience. Always keep in the background of your mind the realization that no one who is normal acts contentious, antagonistic or hostile. People like that are sick; something is eating at them; there is some kind of pressure; there is inner pain. By love, understanding and sympathy, you may be able to find the cause and change them. Don't give up too easily. And above all, don't get mad.

There are two points to keep in mind: first, learn to take people as they are and; second, use God's love within you to help them.

Whatever the cause of your anguish

and do the best thereafter: Simply,

you start anew and selfishly strive to

do what ultimately is best for you and

your well being. To be selfish, as Ayn

Rand wrote in the "Virtue of Selfish-

ness," can be a noble thing if you

know what is really best for yourself.

Ultimately, what is best and right for

you, her philosophy bears out, will be

best for those whom you care about. It

is a law.

## competent from management. Mary M. Kniffen

Vote Red? To The Editor:

General Trujillo, president of Pan-

ama, to whom Peanuts Carter gave the Panama Canal, is a communist. The Sandinistas, who overthrew Anastasio Somoza, and now have control of Nicaragua, are Marxists. Marxists are communists. Yet Peanuts Carter aided them in the overthrow of Somoza who was anti-communist and very pro-United States. Now Peanuts wants to give the Sandanistas \$73 million in aid.

Robert Mugabee is a terrorist. He is also a Moscow-backed Marxist, that is, a communist. Yet Peanuts Carter honored him on his recent visit to the United Nations and told him we would follow his line for years to come. We? Indeed! Mugame is, of course, head mogul of Zimbabwee, nee Rhodesia, against whom Peanuts imposed sanctions.

Communists are masters of deceit, liars and cheats. They cannot be trusted. Communism is a cancer on the skin of civilization. Yet, Carter, if elected warts to pursue ratification of SALT II. That would be fine, if it were observed. Russia will not observe it. Their idea of peace is non-violent capitulation to their armed aggres-

sion. You want to vote Red? Then vote Carter!

Lowell E. Branum Midland

### Teacher talk

To The Editor:

I for one believe our teachers are the most dedicated and best trained professionals in our society. I believe that before competency testing, there should be a change in the method in which they are select-

Many members on the school boards of trustees are school dropouts and few have college degrees, yet they sit in judgment on the teachers who have passed all the existing criteria to teach.

Many teachers are let out (or fired) for failure to give social grades or promotions or athletic grades.

I would like to ask Gov. Clements this question. How can you endorse and campaign for a candidate for president who doesn't have a college degree, yet demand such rigid tests for state school teachers?

**Buddy McQueen** Ballinger

Since I would not like to embarrass my old co-workers, just sign me 'proud to be part of Midland.

Name Withheld Midland

## None of the above

To The Editor:

If the American people ever needed the freedom to select "none of the above," it is "now, more than ever" - to coin an old phrase. I am completely underwhelmed with the low rhetoric of the current presidential campaign. Once again I find myself contemplating the lesser of two, or three...maybe even four evils in our choice for the chief executive officer of the United States of America.

One candidate means well but treats his domestic political rivals more harshly than he does international political terrorists. The other actor in the mellow-drama is determined to snatch defeat from the jaws of victory by ad-libing lines not in the script. John Anderson just looks too much like the man from Glad while serving us some lukewarm left-over liberalism. There's also this guy Ed Clark who suffers because by definition if Libertarians (or anarchists) ever did get themselves organized they wouldn't be Libertarians anymore. I suppose the Socialist or

Marxist party has a candidate but their supporters want to blow up ballot boxes instead of stuffing them, so they don't win too many elections.

The dependable mediocrity of our elected officials is an indictment of an electoral process that rewards the bland and insipid. It seems to be that the candidate who is the least offensive and frightening or the one who will hurt us least emerges victori-

I want the ability to vote NO! on every ballot, for every position, we should have the chance to select as an alternative, "none of the above." If we can't, in all good conscience, vote for somebody then we should have the power to vote against them all. Gary D. Askins

Midland

To The Editor:

The Oct. 3 Charley Reese column was true to form, that is - untrue to fact

He seems to forget that the Arab states have been and still are at war with Ersatz Israel. They are employing exactly the same tactics world Jewry used against Germany beginning in 1933.

That shooting started but stopped at times does not mean they need to "go to war." The ache seems to be that they have used a Jewish cannon, namely the cash register. Fortunately for Americans, the Arabs have never yet used it full power.

Most Arabs desperately want American friendship. What Communism exists among them was there because Americans forced the Zionist state on them and used their own oil to make napalm with which Israelis burn Arab women and children to death. No wonder they take Russian guns to defend themselves!

Mr. Reese passes us the figure that Jordan was established on four-fifths of the mandate land but must think none know that the vast part is volcanic wastes and desert. He calls Jordan the "Palestinian Homeland" and then says other Arabs hate them and that Hussein killed 18,000 of them. So much for Reese's version of Home Sweet Home!

Don't other people wish they had the monopoly on truth and morality **Reese grants Israel?** 

Gordon S. Clark Eastland

### Note of thanks

To The Editor:

We, as parents and members of the Lee High Bandolier Club, would like to thank all the members of the Chuck Wagon Gang of Odessa for being generous enough to treat our band students to lunch Tuesday, October 7, 1980, at the George Bush luncheon.

Their generous offer was greatly appreciated by the students, band directors and parents. We can certainly see why the Chuck Wagon Gang is admired by everyone.

Nancy Irving June Grigsby Mary Scroggin Midland

### Great asset

To The Editor:

This is a letter of appreciation to two retired M.D.s in this town: Dr. Henri Mast and Dr. John Mast. We know that many people feel as my wife and I do that they have been a great asset to the medical profession of Midland. We feel that out of gratitude we should write this note and hope that The Midland Reporter-Telegram will print it.

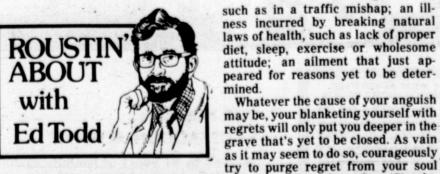

We pray that Dr. John Mast's operation will soon have him back in good shape.

Mr. and Mrs. E. V. Mitchell Midland

**ROUSTIN**' ABOUT with Ed Todd

Permanent pain that cannot be expunged or mitigated except by drugs is unfortunate. But even those who suffer the throes and trauma of pains bear hope for a day when suffering will end.

Pain. You reflect on how and why it was brought about. Perhaps, you see the error or mere happenstance that effected the pain. It may have been an iniury brought about by an accident,
