# 'Schnozzola' Jimmy Durante dies at age 86

HOLLYWOOD (AP) — Jimmy Durante, the brash, raspy-voiced comic who joked and sang his way to fame at the expense of a huge nose, died today. He was 86.

The death early this morning was confirmed by a nursing supervisor at St. John's Hospital in Santa Monica, where Durante was admitted Jan. 7 for treatment of pneumonitis, a form of pneumonia.

It was not known whether any members of the family were with Durante at the time.

The famed "Schnozzola" was one of show business' most beloved personalities.

Durante's fractured song-pianojoke routines, including his trademark "Inka Dinka Doo," were a show business staple for 64 years. A stroke in November 1972 left him partially paralyzed and forced him to retire from show business. Two years later, he was honored at a tearful appearance before the Banshees in New York.

Durante artfully combined wild clowning, outrageous characterizations and pathos. He was a leading star on radio and in early television. He made nearly 30 movies, but he was most successful in those involving his old routines. He ended his radio and television performances with "Good night, Mrs. Calabash, wherever you are." He once confided that he was referring to his first wife, who had died.

He remained active in show business, playing regular engagements in Las Vegas and making guest appearances on television until his stroke in 1972. He was left partially paralyzed in the left arm and left leg and was confined to a wheelchair.

After 64 years in show business, the comedian found retirement hard to accept. He remained at home with his wife, Marjorie, and their adopted daughter, Cece, rarely going out.

# Islamic nations ask withdrawal of Soviet troops

#### By MOHAMMED AFTAB Associated Press Writer

ISLAMABAD, Pakistan (AP) — Thirty-four of the world's 41 Islamic nations today demanded the immediate, unconditional withdrawal of all Soviet troops from Afghanistan and suspended Afghanistan's membership in their organization.

Foreign ministers of the 34 nations plus the Palestine Iliberation Organization also urged boycotting the Moscow Olympics, breaking relations with Afghanistan, solidarity with the Afghan Moslem rebels, aid to Afghan refugees and helping Afghanistan's Moslem neighbors withstand any threat to their security. Seven members of the Organization

Seven members of the Organization of the Islamic Conference boycotted the meeting in Islamabad: Afghanistan, Syria, South Yemen, Uganda, Upper Volta, Guinea Bissau and Egypt, which has been ostracized by most Islamic countries because of its peace treaty with Israel. But President Anwar Sadat of Egypt, militarily the most powerful of Islam's leaders, endorsed the Carter Doctrine and said Egypt's "full facilities" would be available to U.S. forces if they had to defend any of the Persian Gulf countries

Following adoption of the resolution condemning the Soviet action in Afghanistan, the foreign ministers took up an anti-American resolution dealing with "foreign pressure being exerted againyt Iran," a general resolution "on foreign pressures being exerted against the Moslem countries," another anti-Soviet resolution on "foreign interference in the Horn of Africa, and the status of Jerusalem propriate parties the non-participation in Olympic Games being held in Moscow in July 1980 until the Soviet Union, in compliance with the call of the U.N. General Assembly and the Islamic Conference, withdraws all its troops forthwith from Afghanistan."

Eleven countries expressed reservations on the boycott call. They were Algeria, Iraq, Iran, the United Arab Emirates, Kuwait, Jordan, Cameroon, Guinea, Gabon, Libya and Niger.

The Olympic boycott movement is being led by President Carter, who said in his State of the Union message that America would use military force if necessary to protect the West's oil supplies from the Persian Gulf.

Sadat, Carter's chief Arab ally, told the Egyptian Parliament in Cairo Monday that the United States is the source of security for Persian Gulf states, and declared:

"If any Arab country in the Gulf gets threatened by Iran or the Soviet Union, or any other foreign power, and the United States asks to reach that country to rescue it, Egypt will give full facilities without the United States asking or without those dwarfs asking."

Sadat, who expelled 15,000 Soviet military experts in 1972, also said he has ordered home all remaining Soviet specialists.

# Six U.S. diplomats escape from Iran

WASHINGTON (AP) — Six American diplomats who had been hiding in friendly embassies in Tehran since Nov. 4 have escaped with the help of the Canaian embassy there, State Department officials said today.

The diplomats were outside the embassy when it was seized and were able to hide until this past weekend, when Canada issued them false passports and got them out of Iran, said the officials, who declined use of their names.

They refused to say where all of the diplomats had hidden during their 12-week ordeal for fear that Iran would take reprisals against the embassies involved.

Canada closed its embassy in Tehran and evacuated its small staff Monday, citing security concerns for the decision. Some 50 American hostages remain in the hands of Iranian militants

who are demanding the return of the ousted Shah Mohammad Reza Pahlavi in exchange for the prisoners.

# Cutter and tanker collide

# At least four dead, 21 still missing

ST. PETERSBURG, Fla. (AP) — Divers recovered four bodies from the broken hull of a sunken Coast Guard cutter and were searching this morning for 21 others possibly sealed inside after a collision with a tanker just outside Tampa Bay.

The body of one crewman was pulled from the water shortly after the collision Monday night. Coast Guard Lt. Phil Biedenbender said divers today found one body on the cutter's deck, one in the main passageway, and one in the engine room.

The 180-foot cutter Blackthorn sank Monday night minutes after the 605-foot oil tanker S.S. Capricorn ripped

Divers received no response earlier when they tapped the cutter's hull from the outside. "They're gone," said one shivering survivor. "The guys that are down there are gone."

into the ship's port side, Coast Guard spokesmen said. Twenty-seven of the cutter's 53 crewmen were rescued. Lt. David Baird, spokesman at the St. Petersburg Coast Guard station, said the murky, 50-foot deep water limited visibility to three to four feet, hampering the search.

Station duty officer Scott Hutchins identified the first body recovered as that of Chief Warrant Officer J.J. Roberts.

During the night, Coast Guard officials had not been sure of the exact number of men on the Blackthorn at the time of the accident. Spokesman Chuck Amzidel later confirmed that 53 were aboard.

The 27 men plucked from the water immediately after the accident were taken to Tampa Bay area hospitals. Six were soon released, 18 were being released at 9 a.m. and three were hospitalized — two in fair condition and one, fireman apprentice Donald M. Brooks, 21, was in intensive care with possible salt water in his lungs.

Divers received no response earlier when they tapped

ir the cutter's hull from the outside.

"They're gone," said one shivering survivor at a makeshift medical center on shore. "The guys that are down there are gone."

It was not known what caused the collision, which occurred in calm seas and under clear skies. None of the tanker's cargo spilled, but the fuel oil leaked from the cutter.

Authorities had varying opinions about the prospects for finding anyone alive trapped inside the cutter.

"All these people are under shock, and it would be hard for them to last very long," said Coast Guard spokesman Lance Jones.

"From what we understand, it went down real fast," Hutchins said of the Blackthorn, which was steaming for its homeport in Galveston, Texas, when it sank. "It could leave a good air pocket in there, so the chances could be good."

No injuries were reported to the 30 crewmen aboard the Capricorn, owned by Apex Marine of New York. Officials also said that none of the tanker's more than 150,000 barrels of fuel oil spilled after the collision which occurred at 8:20 p.m. EST.

The Blackthorn, in service as a buoy tender, had been in drydock in Tampa for 30 days, while the tanker was headed into Tampa Bay.

Skies were clear and seas were calm when the ships hit less than a mile west of the Sunshine Skyway Bridge connecting St. Petersburg and the Bradenton-Sarasota area.

"It rolled and straightened up," an unidentified survivor said. "Then it started rolling again and it started to go over. I could see the people sliding off. There was nothing to hold on to. I couldn't believe how cold it was in the water or the stink of the fuel."

Survivors said everything happened so fast they didn't have time to reach life rafts.

Crew member David Marik, 23, said a "standby by for collision" alarm sounded on the Blackthorn only five seconds before impact.

"It tore a hole in the port side of the ship," he said. "After four minutes, it sank."

Industrial development gets boost

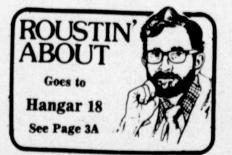

and Palestine.

The conference took no action on a proposal by President Mohammed Zia ul-Haq of Pakistan for joint defense action by the Islamic countries. Kassim Zahiri, the assistant secretary-general of the organization, said the suggestion needed detailed consideration before it could be debated.

The Afghanistan resolution condemned, denounced and deplored the "Soviet military aggression against the Afghan people...as a flagrant violation of international laws, covenants, and norms." It called on "all peoples and governments throughout the world to persist in condemning this aggression and denouncing it as an aggression against human rights and a violation of the freedoms of people, which cannot be ignored."

The resolution demanded the "immediate and unconditional withdrawal of all Soviet troops stationed on Afghan territories." It also said Soviet troops should "refrain from acts of oppression and tyranny against the Afghan people and their struggling sons, until the departure of the last Soviet soldier from Afghan territory," and urged "all countries and peoples to secure the Soviet withdrawal through all possible means."

The resolution called on the Islamic countries to "renvisage through ap-

# Chilly weather grips Midlanders

#### By LANA CUNNINGHAM Staff Writer

At least for today you can forget anything the Chamber of Commerce has ever said about Midland's "quality of life" enhanced by the mild weather conditions.

Transplanted northerners probably awoke to a familiar sight today with freezing drizzle and a slippery coating of ice on the roads.

And Midlanders, unaccustomed to these weather conditions, tried to control their pirouetting vehicles which were dancing their way down the streets this morning. Traffic on Big Spring Street was jammed for

#### Related photo Page 2A

numerous blocks, vehicles skating down the street bumper to bumper. City sanding crews weren't called out on the job until this morning. Midland Police traffic division said 24 accidents had been reported by 9 a.m., most of them minor. Odessa police just said they had "a bunch."

The State Department of Highways and Transportation has had crews out since Monday night sanding interchanges and overpasses on Interstate

The weatherman has given West Texans no hope of relief before Thursday. According to the National Weather Service at Midland Regional Airport, a travelers' advisory will be in effect tonight and Wednesday.

Chance of precipitation tonight and Wednesday stands at 20 percent, he said. Continued cold with fog will combine for a chance of freezing drizzle for the next 24 hours at least.

According to the weatherman, we only missed the warm air by 1,000 feet. "This is an over-running condition," he said, explaining that cold air is coming in from the north while warm air from the Gulf is blowing in right on top of the frigid blast.

Precipitation is being created by the warm air, but by the time it falls through the cold air, that moisture becomes freezing drizzle, he said.

"If you want to feel some warm air, just go up 1,000 feet," the weatherman quipped.

Getting up there may be a problem. Airplanes at Midland Regional Airport have been grounded, nor can flights land, said a spokesman at the airport.

Southwest Airlines reported its first two morning flights have been canceled. And Continental Airlines said there was too much ice on the runways and its flights have passed over Midland. Continental's first two flights today also have been canceled.

High Wednesday should be in the low 30s, said the weatherman. High Monday was 46 degrees, a bit cooler than the record high of 79 set on that date in 1950. The mercury should dip down to almost 20 tonight. Overnight low today was 23 degrees, still warmer than the record 2 degrees set in 1948.

The freezing weather conditions extend on a line from the northern edge of Big Bend to Texarkana, said the weatherman.

Area towns reported ice and slippery driving conditions, although no area roads had been closed and few accidents reported.

Midland's industrial development potential got a shot in the arm Monday when Midland County Commissioners approved issuing tax-free bonds to fund new or expanding business in the area.

The bond money and potential users will be coordinated through the Midland Industrial Development Corporation, a non-profit organization that will screen potential applicants before a request for funding is presented to the county.

The bonds — which will be limited only to \$10 million per applicant with no ceiling on the number of possible businesses approved — will not affect the county tax rate, commissioners noted.

The bonds will be backed solely by the property of the companies which receive the funding, according to Precinct 1 Commissioner Durward Wright. The bonds also will not affect the county's total indebtedness or its bond rating, he said. The Midland Industrial Development Corporation will work closely with the

Chamber of Commerce, Midland Area Sales Team and other organizations to bring industry to the area, according to Grant Billingsley of the Midland chamber.

The industrial development bonds, which are used in 47 other states, were approved for the first time by the 66th Texas Legislature, Billingsley said. Use of the bonds will give Texas an additional advantage in attracting new business and allowing current industry to expand, he said.

While some 30 other areas in the state have already approved use of the bond funding, Midland is the first county in West Texas to do so, Billingsley said.

In other business, commissioners gave permission for Texas Electric Service Co. to use the County Exhibit Building as part of TESCO's disaster plan.

The permission was granted pending the approval the county's civil defense coordinator, since commissioners weren't sure the building did not have another use designated in the city-county disaster plan.

TESCO plans to use the building as a second operating center to house extra workers brought into the area in the aftermath of a major disaster such as a tornado.

Explaining the commissioners' position on the building use, Wright said they had no objection to TESCO's request. "But it could be of considerable embarrassment to everyone if we did have a disaster and they started putting people out there (as part of the city-county disaster plan) and you started rolling men in there too," he told the TESCO representative.

Commissioners also agreed to look into participating with the Texas Assocation of Counties for reciprocal liability insurance.

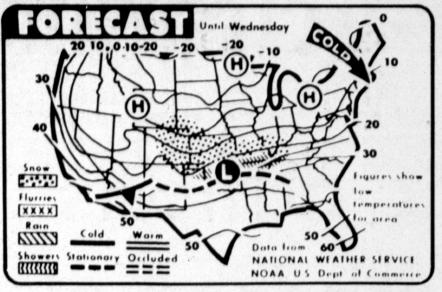

The new insurance plan could save the county 30 to 40 percent on its liability insurance costs, according to Commissioner Win Brown.

# Testimony resumes in theft trial

#### By DAVID CAMPBELL Staff Writer

Testimony was to resume this morning in 238th District Court of Judge Van Culp in the theft trial of **Billy Martin**.

Martin is on trial for allegedly selling some 10,000 feet of what he claimed was good drilling pipe to Mr. and Mrs. Neb Higgins for more than \$53,000

The Higginses and the district attorney are claiming Martin allegedly sold the couple junk pipe in which they invested more than \$65,000.

In his opening statement to the jury Monday after the state rested its case, defense attorney Don Williams said he would present evidence on the worth of the pipe and technicalities of

# Ice coats many state highways

#### **By The Associated Press**

Much of West and North Texas was buried beneath a thin but slippery coat of ice early today, making driving conditions hazardous and prompting the National Weather Service to issue travelers advisories.

An ice storm warning was in effect today and tonight for an area along and 75 miles north of a line from Texarkana to San Angelo. Forecasters warned of hazardous driving conditions and said an expected half-inch coating of ice on trees and power lines could cause serious problems.

Two persons were killed Monday near Lewisville in North Texas when a car skidded out of control on an ice-coated bridge when ice first started coating bridges and overpasses in the area.

A massive, chain reaction type accident was also reported in the Fort Worth area Monday. About 20 cars were eventually involved in the accident

Crews worked through the predawn hours in the Dallas-Fort Worth area to sand bridges and overpasses that were icing over rapidly as freezing rain and drizzle fell.

#### Road conditions listed

AUSTIN, Texas (AP) - Road conditions reported Tuesday by the State Department of Highway and Public Transportation, by districts, included:

Lubbock - Ice cover on roads. More freezing precipitation expected ne uay

pipe brokerage in the oil industry.

John Paul Darnell, a pipe broker who had business dealings with Martin, told the court Monday afternoon that manufacturers sold pipe to the drilling contractor and very rarely did they sell to major oil companies such as Gulf Oil.

Most pipe business, Darnell contends, usually is handled through a middle-man operation.

A pipe broker's job is to find and supply pipe to various persons, he said

Concerning his ability to judge quality of pipe he handled, Darnell noted that he used a copy of a pipe rating guide established by the American Petroleum Institute. He said that if the pipe has holes, pits or weak tool joints, the pipe

rating would go down.

"Once the pipe goes down the hole, it loses its rating," he said.

However, Darnell said, pipe that was used for drilling a well at 20,000 feet could possibly be used for drilling at 10,000 feet.

Relating to the actual purchasing rocedure of the pipe from Martin to Higgins, Darnell said he talked with Bill Thurman of MND Drilling of Bridgeport concerning the condition of the pipe.

He said Thurman told him the pipe did not have any holes in it. And they began to "dicker" about a price.

Darnell testified that during the dickering and the final transaction, he said the pipe which he had pur-chased did not belong to him — that it belonged to the Higginses and he merely represented them.

Darnell said Thurman wanted a higher price than he wanted to pay and Thurman reduced the price and concluded the deal.

He purchased a money order from National Bank of Odessa for \$27,500 and paid for the pipe.

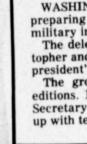

Ed Watts, the go-between man for the Higginses and Martin, said that Martin and he did not mislead the Higginses. He said the price Martin relayed to him represented a good buy and someone told him it could be used as drill pipe.

Watts said Martin quoted a price of \$53,000 for 10,000 feet of the pipe.

Defense attorney Williams requested a recess until today so that another witness from Louisiana could appear before the court. Testimony was expected to resume

at 9 a.m. today.

# **Conservative Democrats urged** to run as Republican candidates

**Midland** County Commissioner Win Brown is urging Republican county officials all over the state to convince conservative Democrats to withdraw from their party's primary and run as Republicans.

The suggestion was made in a letter sent to more than 250 Texas Republican officeholders late last week on the letterhead of the National Conference of Republican County Officials.

Prime drawing card to conservative Democrats, he noted, will be the Republican presidential preference primary which will decide how the Texas delegation will be committed at the Republican national convention.

A large number of conservative Democrats will vote in the Republi-

## Moore becomes candidate for County Attorney post

**Midland County Assistant District** Attorney Richard L. Moore announced Monday he will be a Republican candidate for Midland County attorney in this year's election.

Moore, 29, became the second person to announce intentions to seek the position being vacated by incumbent County Attorney Leslie Acker, who announced he will not seek reelection.

A native of Fort Worth who spent most of his life in Seminole, Moore

## Andrews County deputy resigns

ANDREWS — Andrews County Deputy Sheriff Thomas Harris has resigned his job here to become a criminal investigator for Gregg County Sheriff Michael B. Fetter.

Harris turned in his resignation about two weeks ago before moving to Longview.

He had worked for Andrews County Sheriff J.A. "Bud" Gregory for about a year.

has been with the district attorney's office since he received his license to practice law in May 1979.

Moore said that having worked for the district attorney's office in felony prosecution he sees a need for paying close attention to the "juvenile crime problem.

He also said that several merchants have expressed concern to him about the number of hot checks being written in Midland and the shoplifting problem -- "two things I think need to be concentrated on.

Moore received his bachelor of business administration degree from the University of Texas at Austin in May 1973, and his law degree from Texas Tech University at Lubbock in May 1979.

Formerly he was employed for three years as a property manage-ment supervisor for the city of Dallas.

Moore and his wife, Sandy, reside at 3001 Midland Drive.

Assistant County Attorney Robert Rendall announced earlier that he also will be a Republican candidate for the office being vacated by Acker.

Brown is president of a five-state can primary this year "where their region of the organization. vote counts," Brown predicted, leaving conservatives running in Democratic primaries open to defeat from liberal opponents.

"If there is no Republican already filed for the position, we could see quite an influx of the liberal element" in local and state offices, he added.

'Depending upon who is holding an office and your local conditions," Brown's letter suggests, "it might be an excellent time to approach the conservative Democrat office holders and invite them to file in the Republican Party - a party more in line with their political philosophy.'

State party officials are expecting to double the turnout in the Republican primaries over the number four years ago when the first presidential preference primary was held, Brown said.

In Midland County, where voters in the Republican primary outnum-bered those in the Democratic primary for the first time four years ago, the commissioner said he expects the Republican turnout to be even better this year.

"The Republican Party is basically composed of ex-Democrats," he said. 'If they would like to come over, we would welcome them with open arms. We've faced their plight in the past."

The push to create more "ex-Democrats" will be centered in several "swing areas" around the state, primarily in East and Central Texas, Dallas and Houston, Brown said.

"Remember, should a conservative Democrat draw a liberal opponent in one of these swing areas," he urged in his letter, "don't hesitate to talk to him and get him to withdraw from the Democrat party and file with the Republican party. This can be done up to the filing deadline of February 4, 1980."

pounds overweight.

Lynchburg Police Chief John K. Swan presented Arthur with the department's most coveted trophy, the Medal of Honor, in December for attempting to save a man from the storm-swollen James River.

Swan said at the Dec. 7 award ceremony, "He realized the great personal danger to himself, but proceeded in spite of these dangers in an attempt to save a fellow human being.

According to police department standards, the 6-foot-11/2 Arthur's maximum weight is 230 pounds. He was fired two weeks ago because he tipped the scales at 234, he said Monday.

Swan was out of the city Monday, and Cmdr. C. Michael Glass would say only, "It has always been a policy of the department not to discuss personnel matters." Reached at his new place of em-

ployment - Sims Wholesale Co. Inc. - Arthur said, "I am extremely hurt. I had dedicated myself to the job. A lot of people on the street would talk to me when they wouldn't even look at another officer.

"I can't even run at 230," Arthur said. "I'm as weak as a kitten at that weight. I perform at my best when I weigh from 240 to 245 pounds - and I'm still physically fit at that weight."

Arthur said his weight situation with the Lynchburg Police Depart-

Thin also 'in in Connecticut

MIDDLETOWN, Conn. (AP) -Thin is in, and nearly a quarter of the 77-member police force in this city of 38,000 are out - temporarily suspended without pay for being overweight. Police Commission Chairman Sebastian W. Gallitto said Monday the police chief meted out 18 suspensions of one to four days without pay in a crackdown on departmental flab. He said the penalized officers ranged in rank from patrolman to lieutenant. Four-day suspensions went to officers who were 90 pounds or more

overweight, Gallitto said. Most were suspended for one day, the penalty for being about 20 pounds overweight. Gallitto called the situation "unfor-

tunate," but added it was fair because under the 1978 contract, the officers had had more than a year to meet the weight requirements.

"The chief had no alternative available to him," he said.

"I'm trying to get them motivated to lose weight," said Police Chief Eugene B. Rame. He said the department's weightlifting equipment and sauna had not been getting much

"They could have done something more constructive, like mandatory physical workouts," said Jeffrey Mefferd, president of the union. Arthur said he "had been told the

Deputy assessor-collector announces her candidacy

Elmo Linebarger, who has served as Midland County tax assessor-collector since 1965, said this morning he will not seek re-election this year and Linebarger's chief deputy, Frances M. Shuffield, has announced she will be a Republican candidate for the post

Linebarger was tax collector for the San Angelo Independent School District at San Angelo for 11 years prior to coming to Midland. Before that he was employed as a deputy in the Tom Green County tax office for three years.

In announcing her candidacy, Mrs. Shuffield said if elected she will continue to do the same quality of job she has done for the tax office the past 13 years.

Prior to serving as chief deputy in the tax office, Mrs. Shuffield served eight months in the city tax office here. She also served for 10 years in the Travis County tax assessor-collector's office.

"I pledge to serve the people of Midland County and to fulfill the duties of the office to the best of my ability," she said during her announcement.

"I further pledge that courtesy and efficiency will continue to be the practice and policy of this office," Mrs. Shuffield added.

Mrs. Shuffield holds certificates from the Texas Association of Assess-

## Pat Baskin files for judge's post

Pat Baskin Monday officially filed as a Democratic candidate in the May primary for the 142nd District Court position being vacated by Judge Perry Pickett.

Pickett, who has held the post since 1954, has said he will not run for re-election.

Baskin, the only announced candidate for the post so far, paid his filing fee to County Democratic Party Chairman Darrell Smith Monday morning.

The Reporter-Telegram reported incorrectly Sunday that Baskin had announced as a Republican candidate for the office.

Filing period for all county offices extends through 6 p.m. Monday.

# WORLD BRIEFS Sakharov demands right to speak out

MOSCOW (AP) - Banished human rights activist Andrei Sakharov once again defied the Kremlin's efforts to silence him, charging the Soviet government with violating his "basic right to receive and disseminate information" and challenging it to put him on trial before the world.

"I am prepared to stand before a public and open court. I do not need a gilded cage. I need the right to do my civic duty as my conscience dictates," the 58-year-old nuclear physicist said in a statement relayed to reporters Monday by his wife.

Sakharov, who won the 1975 Nobel Peace Prize for his fight for human rights in the Soviet Union, was taken from his Moscow apartment last week and exiled to Gorky, an industrial city of 1.3 million people 250 miles east of Moscow that is off limits to foreigners because military equipment is manufactured there.

## Three killers to hang

NASSAU, Bahamas (AP) - A chaplain, a doctor and several police and prison officials were to be the only witnesses for three convicted killers condemned to die at the gallows in Her Majesty's Fox Hill Prison.

The men were condemned to die one after the other this morning. They were to be manacled, hooded and led into the death chamber, fitted with a noose and placed over a trap door sprung by an anonymous execution-

Late Monday, the Advisory Committee for the Perogative of Mercy rejected last-minute pleas to spare Charles Dickenson, 21, Winsette Hart, 23, and Vernal Storr, 26.

"There has been no change in arrangements for the hangings," a committee spokesman said.

Dickenson was convicted of the October 1977 rape-murder of 19-yearold Desiree Dalville of Freeport, Bahamas. Hart and Storr were sentenced to death for the 1977 murder of Cedric Cleare, 60

The last person hanged here was an American, Michiah Shobek, who was executed in October 1976 for the slaying of New York accountant Irwin Bernstein in January 1974.

### Bomb rips Syrian Embassy

PARIS (AP) - A bomb ripped through the ground floor of the Syrian Embassy in Paris this morning, killing one person and injuring eight, three of them seriously, French police said.

One of the seriously injured was a pregnant woman, the officals said. The identity of the person killed was not immediately revealed, but seven of the injured were embassy personnel and the eighth was a woman passerby.

The blast occurred about two hours before the arrival from Damascus of Foreign Minister Abdel Halim Khaddam. He is to meet President Valery Giscard d'Estaing Wednesday before going to Strasbourg to address a meeting of the Parliamentary Assembly of the 21-nation Council of Europe.

### Delegation to go to Pakistan

WASHINGTON (AP) - A high-level delegation of U.S. officials is preparing to fly to Pakistan for security talks in the wake of the Soviet military intervention in neighboring Afghanistan.

The delegation will include Deputy Secretary of State Warren Christopher and, according to The Washington Post, Zbigniew Brzezinski, the president's national security adviser.

The group will leave Thursday, The Post reported in Tuesday's editions. It also reported that a military delegation, led by Assistant Secretary of Defense David E. McGiffert, would leave this week to follow up with technical discussions.

**Troops** alerted

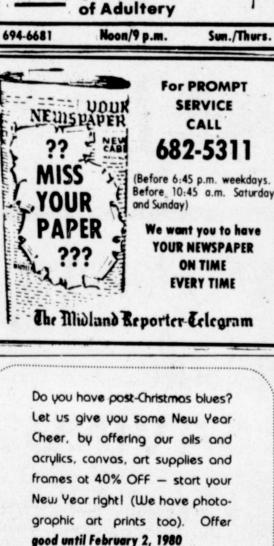

to repel stars from border

BANGKOK, Thailand (AP) - Cambodian troops will be on the alert to repel a group of Western celebrities, including folk singer Joan Baez, who plan to cross the border next week to deliver

supplies to the starving, Phnom Penh Radio said today. Ms. Baez, a one-time

anti-war protester, will be among more than 150 entertainers, politicians and others who plan to deliver 20 truckloads of supplies across the Thai border into Cambodia beginning Feb.5. She also plans to give a bene-fit concert in Bangkok.

FRAME-TEX ARTIST CO-OP #10 Meta Midland, Texas

"IN THE VILLAGE"

If we can maintain the balance, America should have an adequate supply of fuel for 1980. Motorists should have enough gasoline, if used = carefully, truckers enough diesel fuel, and homeowners enough heating oil.

But we could lose our balance. Continuing political unrest in the Middle East could cause a reduction in our nation's oil supply. Considering our heavy dependence on foreign oil, this could cause

shortages here at home.

And in 1980, we can't expect increased domestic oil production or alternate energy development to tip the balance in our favor. But we are optimistic that continuing large investments will result in new sources of domestic energy for the future.

Consumption levels could also tip the balance. An increase in oil consumption would have a very negative effect. So, strong conservation efforts, which proved effective in 1979, will be more necessary than ever this year.

Therefore, we must accelerate our efforts to find new sources of domestic energy, and continue to conserve the energy we have.

Thank you for listening.

Israel today rejected Egypt's pro-

posals for Palestinian autonomy, say-

ing they were not acceptable as a basis for negotiation. U.S. officials

admitted the two countries' positions

were "diametrically opposed" and

said America was starting to play a

Special Mideast envoy Sol Linowitz was to arrive in Israel later today for talks with Prime Minister Mena-

chem Begin after meeting with Egyp-

tian President Anwar Sadat in Cairo.

There, Linowitz said he was optimis-

tic the two countries could agree to

an autonomy plan by the May deadline set under theih peace treaty.

A U.S. official travelling with Lin-

owitz cautioned that in the next few

months "I predict sharp exchanges,

moments when it looks like the nego-

tiations are stuck at dead center,

moments of apparent deadlock when

no progress seems possible. All this is part of the game," added the offi-cial, who declined use of his name.

He said Linowitz will try to estab-

lish contact with Palestinians in the

occupied territories, but had received

no direct encouragement that they

will agree to meet him. Linowitz had heard indirectly "that if we move forward enough, the Palestinians are

going to find it hard not to become involved" in the autonomy

talks, he said, but would not give de-

tails. The Palestinians have so far

By MIKE SHANAHAN

WASHINGTON (AP) - The Carter

administration's standby gasoline ra-

tioning plan would take seven to 21

months to put into effect and even

then, would not guarantee adequate

gas all over the country, Energy De-

Providing an advance look at the

rationing plan that will be submitted

to Congress next month, Adminstra-

tor Hazel Rollins of the Energy Regu-

latory Administration said Monday

ENERGY

OIL & GAS

that rationing wouldn't necessarily

And she told a Senate Energy subcommittee that, if a rationing system becomes necessary, much of the gas

purchased by motorists will double in

price when the cost of so-called "white market" rationing coupons is

committee, noting the fragility of the

oil supply line to the Middle East, said

now," said Sen. Howard Metzen-

baum, D-Ohio. Similar comments

were made by Sen. Dale Bumpers,

D-Ark., and Lowell Weicker, R-

Ms. Rollins said her department is

working on a "quickie" rationing plan

intended to meet a sudden disruption

That would be in addition to a much

more complex and expensive ration-

ing plan which requires approval of

Congress. Ms. Rollins said President

Carter will likely send the long-term

# **Reckless homicide case** being built against Ford

WINAMAC, Ind. (AP) - Prosecutors, building a reckless homicide case against Ford Motor Co. "inch-by-inch," offered expert testimony that the design of the fuel tank in the subcompact Pinto made it vulnerable to punctures.

The trial entered its fourth week Monday in Pulaski Circuit Court with prosecutors offering as evidence car parts identical to those used in a civil case which resulted in record damages against Ford.

Both the civil case and the criminal trial here, in which Ford is charged with three counts of reckless homicide in the burning deaths of three teen-agers, stem from fiery, rear-end Pinto crashes.

"This is an inch-by-inch case, and today we gained a few inches," chief prosecutor Michael A. Cosentino said. He referred to the ruling by Pulaski Circuit Judge Harold R. Staffeldt that allowed him to enter as evidence the right rear and left rear quadrants of a 1973 Pinto, the same model that exploded in flames when hit from behind near Goshen, Ind., in August 1978.

Cosentino won the ruling despite Ford attorney James F. Neal's argument that the evidence did not represent the "reality" of an entire Pinto

The state is trying to apply the same reasoning in the criminal trial as in the civil case to prove that Ford recklessly designed Pinto fuel tanks, knowing they were likely to explode in rear-end collisions, then sold the cars anyway

Byron Bloch, an auto safety consultant, said the exhibits show that the Pinto fuel tank was vulnerable in rear-impact crashes because it was surrounded by objects that might cause punctures, tears or rips

Bloch also presented several slides he had taken of the Pinto that was rear-ended in Indiana.

Among them was one showing the fuel tank with two holes. One hole was made when the filler tube pulled away from the tank and the other was where the fuel tank split open, apparently on impact, Bloch said.

## COMMODITY TRADING SEMINAR **"Basic Training** for Commodity Traders" TIME: Thursday January 31, 7:30 p.m. PLACE: New Holiday Inn Country Villa 4300 W. Highway 80 Midland, Texas ADMISSION IS FREE...Call for Reservation and information.... TOLL FREE 1-800/692-4415 CONTI COMMODITY Subsidiary of Continental Grain Co. 1215 Ave. K Lubbock, Texas

Productivity measures production by assessing how many goods and services can be turned out in one hour of paid working time. It measures the combined contributions of machines, managerial and worker skills, and other factors affecting production.

# Vaccination can't hurt

Dear Dr. Solomon: This may sound silly, but I can't recall if my oldest child (I have three) has been vaccinated against measles. He once had German measles, but I don't think he ever had measles. Should he be vaccinated? - Mrs. J.N.

Dear Mrs. N.: Your son should be vaccinated. Even if he has already had the measles vaccine or has had the disease, the vaccination will not do any harm. Failure to immunize, on the other hand, could have serious consequences.

Dear Dr. Solomon: My husband has become something of a jogging nut. He started off slowly enough, gradu-ally working up to longer distances. Now he has decided to train for marathon running, and I'm afraid the guy will kill himself in the effort. During some of the hot, humid weather we

had last summer, although he came close to collapse at times, he insisted on going out every day. He claims that even though he sometimes finds it painful, the exercise is strengthening his heart. I wonder if anything that puts that great a strain on his body can actually be healthy. - Mrs. K.C.

Dear Mrs. C: It was assumed for a long time that long-distance running provided almost certain protection against heart attacks, but experience has modified this view. Even in a trained person with normal coronary vessels, running under conditions of excessive heat and humidity can cause the heart to be damaged.

Joggers who find themselves straining to complete the course every time they go out should check with their physicians to make certain they are not doing themselves more harm than good. Since heatstroke has been known to cause extensive cardiovascular damage, your husband may not be doing his heart a favor by insisting on ignoring the way he feels when weather conditions are extreme.

Dear Dr. Solomon: The list of ingredients on packaged foods often includes "artificial flavoring." What does this mean for the consumer? - Mrs. H.L.

Dear Mrs. L.: Flavors constitute the largest single category of food additives with 1,700 substances, both natural and artificial. Most flavors are synthetic because they are cheaper and are able to supplement scarcer natural flavors. They are generally manufactured after and analysis of the chemicals present in a natural favor, which are then synthesized in a laboratory.

Any food product that contains flavorings must list them on the label. If they are artificial, that must be stated. too.

Although not as controversial a subject as color additives, some flavors have been prohibited because of their threat to health. The Food and Drug Administration banned safrole, which was once widely used in root beer, because it caused liver cancer in rats. Similarly, coumarin, an anticoagulant drug, previously was used in a number of flavorings including imitation vanilla, but was banned because large amounts could cause hemorrhaging.

When Earthmen decide to colonize the planet Mars, it is not long before they confront a real Martian (Derek Lamden) in "The Martian Chronicles," a miniseries based on the Ray Bradbury novel, to be colorcast on NBC's The Sunday Night Big Event, Jan. 27, NBC Monday Night at the Movies, Jan. 28, and NBC Tuesday Night at the Movies, Jan 29.

# **INCREDIBLE?**

Isn't it incredible that the U.S. oil industry-the richest and most profitable industry in the world-won't provide the full cost of adequate health care benefits for its wage earning employees?

This is a principal reason that we-approximately 55,000 members of the Oil, Chemical and Atomic Workers International Union, AFL-CIO-are on strike against 100 oil. petrochemical and pipeline companies in this country.

We work in oil refineries, petrochemical plants, marketing terminals, oil fields and on pipelines throughout our nation.

The reason we are on strike is simple: we are seeking a much-needed wage increase; a fully paid, adequate health care benefits plan with dental and prescription drug coverage: and additional vacation time.

Oil and petrochemical workers are highly skilled. Much of our work requires constantly changing hours and exposure to dangerous substances. Our shifts rotate from days to evenings to the midnight shift.

Oil workers are usually on the job while other people are sleeping or enjoying weekends and holidays. Our social life schedule is totally out of tune with our neighbors. Family relationships must accommodate to our irregular working hours.

As employees in this highly profitable oil industry, who must work under these special conditions and in this hazardous work environment, we feel we are entitled to good medical coverage for ourselves and our families.

Companies in other industries far less profitable than the U.S. oil industry already are providing fully paid health care benefits for their employees. Workers in the auto industry, the rubber industry, the pharmaceutical industry and the steel industry have fully paid health care plans. So do telephone company employees and retail clerks ... and many, many others.

Yet the U.S. oil companies refuse to agree to this widely accepted principle of paying the full cost of health care.

Each of us has experienced the constant increases in the price of gasoline and heating oil. Oil company profits as a result have soared, in most cases into the triple digit range in 1979. Isn't it incredible that the U.S. oil companies are still denying their American wage earning employees an adequate, fully paid level of benefits?

We solicit your support of our strike and appreciate your understanding.

And remember: because of high levels of worker productivity, any strike settlement we make will not be responsible for any perceptible increases in the price of petroleum products.
