New York City police officer Peter Mulligan points a gun at shooting suspect Bernard Proctor after unidentified youths grabbed the suspect on a Brooklyn street Tuesday, top photos. According to police, Proctor shot at Mulligan and a transit authority officer after causing a disbturbance on a

bus. The unidentified youths came to the aid of the officers pursuing Proctor and chased him down. Mulligan sustained a grazing bullet wound to the leg while chasing the suspect. The transit authority officer was shot in the neck and listed in guarded condition. (AP Laserphoto)

Carter, Reagan are big winners

CONCORD, N.H. (AP) - Sen. Ed- credibility and the finances to get ward Kennedy, now a three-time loser, is overhauling his presidential campaign in desperate quest of a comeback against President Carter. And Ronald Reagan, under new management, is back atop the Republican

Democrat Carter and Reagan were the big winners in Tuesday's New Hampshire presidential primary elections. Kennedy and former U.N. Ambassador George Bush were the

"This is the first and it sure is the best," said Reagan. In his first outing, last month in Iowa, Reagan was an upset loser to Bush.

Carter, in a victory statement of his own, said his triumph shows voters "support the policies that we've espoused" on foreign crises, inflation and energy.

Carter bested Kennedy by 11 percentage points, 49 percent to 38 per-cent. California Gov. Edmund Brown Jr. earned 10 percent.

Reagan fashioned a Republican landslide, capturing 50 percent of the vote in a seven-way race, and building a margin of better than 2-to-1 over Bush. Sen. Bob Dole ran dead last and said he would enter no more pri-

Meanwhile, at party caucuses in Minnesota Tuesday night, Carter was the easy winner in a Democratic straw vote, while Reagan held a 33-30 percent edge with about half the Republican balloting counted.

Kennedy didn't attempt a challenge to Carter in Minnesota, but the New England defeat pushed him closer to elimination as an effective opponent for the Democratic nomination.

Yet Kennedy conceded nothing. He said his campaign would take off later, in industrial states like Illinois, New York and Pennsylvania.

His task now is to maintain the

there. He meets Carter in his own Massachusetts next Tuesday, and ranks a heavy favorite.

White House Press Secretary Jody Powell said Carter would be satisfied with 20 percent of the vote in Massachusetts. He wouldn't, but Carter's strategy is to set targets — and thus expectations — as low as possible.

As for the New Hampshire results, Powell today called Carter's showing 'a nice victory" in a state that probably "except for Massachusetts is the toughest state in the nation for

The New Hampshire balloting ended a brief Bush reign as the leader among Republicans. But Bush said he had succeeded in making the GOP competition a two-man race with

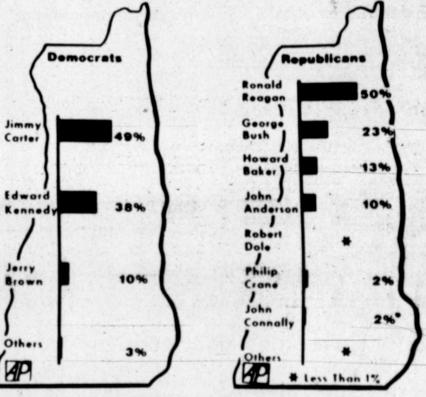

Bush said today his role in last Saturday's debate with Reagan, in which four other GOP candidates were excluded, "clearly ... had an adverse effect." As for Reagan, Bush vowed: "I'm going to wear him

Unlike Bush, Reagan said it will take several more primaries to shake down to a two-man race for the GOP nomination. Reagan said he was surprised by his margin of victory. "I don't know how to explain it," he said

Reagan's win came hours after the former California governor ousted campaign manager John P. Sears, his chief strategist in two presidential contests, and replaced him with William J. Casey, former head of the Securities and Exchange Commis-

Reagan said he did it because of differences over campaign spending priorities, and because he now wants to emphasize the "people to people type of campaigning I have been doing here in New Hampshire."

New Hampshire primary vote

Anti-Red rebels continue to fight

NEW DELHI, India (AP) - Afghanistan's government radio reported more attacks by foes of the communist regime, with food stocks destroyed and roads

Radio Kabul said Tuesday that the government's "enemies" were "looting the shops which are providing our daily necessities. They are destroying public

property and setting fire to the food depots. "They are destroying stores of wheat and other provisions and preventing their transportation ... detroying our roads, which are like our arteries, setting fire to vehicles which are crucial to our livelihood."

Meanwhile, reliable sources in Kabul reported that forces loyal to the communist government swept through the Afghan capital Tuesday and arrested a large number of Afghan Shiite Moslems, who make up about 10-20 percent of Afghanistan's overwhelmingly Sunni Moslem population of 16 million. The sources said the Shiites were seized on suspicion of involvement in last

week's anti-Soviet riots, which broke out after the first day of a protest strike against the Russian intervention. Some 300 civilians and an undetermined number of Afghan and Soviet troops were killed in the fighting, hospital sources

Kabul's shopkeepers and civil servants went on strike last Thursday to protest the two-month-old Soviet occupation of Afghanistan by an estimated 70,000 Russian troops who were sent in to put down the Moslem rebellion that broke out after the communist regime took power in April 1978.

The extent of the strike Tuesday was not clear. Kabul radio claimed most shopkeepers had returned to work. But it noted supplies were still short and promised protection for shopkeepers and government workers who would go back to their jobs.

A reliable report from Kabul said 85-90 percent of the capital's stores were shuttered Monday. There was no indication when the strike would end, but one underground leaflet said the protest had been set for six days, making Tuesday

President Carter has offered to help guarantee a neutral Afghanistan if that would produce a Soviet withdrawal, but Leonid Zamyatin, spokesman on international affairs for Soviet Communist Party Central Committee, said if the United States wants peace in the region that Carter should "command" an end

to U.S. interference in Afghanistan. Carter's offer was in a letter to critically-ill Yugoslav President Josip Broz Tito, who last week wrote to Carter and Soviet President Leonid I. Brezhnev urging a continuation of detente. Zamyatin's comments were carried by the Soviet news agency Tass.

Trustees OK \$3 million package

By DAVID CAMPBELL Staff Writer

Midland School board trustees an proved Tuesday by a 6-0-1 vote a \$3 million bond issue in April to be used for repair and renovation of existing school facilities.

Most of the \$3 million, about \$1,455,-000, will go toward repair and renovation projects at Midland High School.

Robert E. Lee High School will receive some \$597,000, while Lee Freshmen School and other schools would get the balance for repair and renovation work.

Board members noted these are critical items which need to be done and they will be done.

Should taxpayers defeat the bond issue in April, trustees said, these items will most likely show up in the

1980-81 school year budget which will represent a 10-cent increase in school taxes from \$1.13 to \$1.23 per \$100 valuation.

Also, trustees were discussing the possibility of holding another bond election as early as May to add items such as a new elementary school, athletic facilities for Midland High School and major renovation projects at Lee High School.

The original motion for the April 5 bond election presented by Trustee Edward Runyan asked for \$2.5 million. However, Trustee Johnny Warren amended Runyan's motion to ask for \$3 million from the voters.

The reason for the additional amount was to make certain no critical repair needs for the school district would be left unattended, Warren said afterward.

Parker Humes, the only trustee to

abstain, said he believed the bond election should be held in May so there could be adequate time to inform the public of the necessity for a bond election.

Humes also questioned the wisdom of presenting to the voters two school bond elections, one in April and another one possibly in May

Nevertheless, trustees said Midland school taxpayers will decide in April how they want to handle their tax increase. "They can take their tax increase in a big lump over a short period of time or we can amortize it through bond indebtedness over a long period of time," Trustee Joe Dominey said in the board's Feb. 12

In another action, the trustees approved an application for Title II federal funds for a basic skills improvement program for students in

Pease, Milam, Crockett, DeZavala, South, Travis and Washington elementary schools.

One part of the four-year program is directed toward the improvement of reading, math, oral language and writing skills of students in the primary grades, the application noted.

This program will start with the 1980-81 kindergarten students and continue until the third grade, according to the program's descrip-Kindergarten students who are af-

fected by the program, the applica-tion said, should obtain an average score equivalent to a first grader's level in math and reading skills as measured by the California Achievement Test (CAT).

Another portion of the project, the

cautioning MidTran officials not to expand the bus system too fast.

MidTran is a public busing system that has been in operation since Feb. 4. Formerly a non-profit corporation, it was taken under the wing of City Hall as a new department shortly before it began operations.

The new demand-responsive service will run from 5 a.m. to 9 p.m.

p.m. Sunday, according to Joyce Fisher, director of MidTran.

> needing transportation to the air-"A lot of people travel on business and leave in the morning and come back that evening. They don't want to

said, adding that the same thinking applies to those who are gone several days or for a weekend. "If we offer service to the airport, we feel it should be for seven days,'

is working on a grant application for more MidTran buses. The demand for subscription service justifies the need, she claimed

'We have 160 subscription riders a day, and that means 300 trips. A majority of these have renewed for next month," she said. "There are 171 on a waiting list for subscription ser-

"The momentum is now. People want to ride the bus," Ms. Fisher

ed for the seven buses on the road, she said, citing the current situation of one bus that has engine problems and can't be used.

To continue that subscription route, Ms. Fisher said she has had to borrow vans from agencies until the bus can be repaired.

To meet the demand, Ms. Fisher

said seven new buses are needed, but

that she probably will apply for five Before approving the additional driver, Mayor Ernest Angelo Jr. cau-

tioned John Ingram, president of the board, and Ms. Fisher to operate the system "so it will be economically justified. You're adding things that may not be economically feasible. We need to be as judicious as we can in growing. Bids from Ford Motor Co. for 11

new police cars and two small cars for city staff were accepted by the council. Cost for each police car will be \$6,072.56 with the city to receive a \$300 rebate for each car from Ford.

MidTran's request for a car for administrative purposes was denied. Councilman Tom Sloan said that they 'could ride the bus.'

view of rapidly rising interest rates the council decided to "take out what we felt we could safely delay. We hope in the future the interest rates will go

Hall, Midland City Council approved City to try again to fix airport terminal's roof

By LANA CUNNINGHAM Staff Writer

Two years after Midland Regional Airport terminal building was reroofed during its major expansion program, the roof still leaks.

Midland City Council decided Tuesday to try again to fix the roof by instructing Harry Hill, an architectural firm based in Oklahoma City, to have a study conducted and plans and specifications drawn that would eliminate the leaks.

The need for repairs came up when Hill appeared at the council session in City Hall to discuss plans on relocating the Pliska plane in the airport building by suspending it from the

ceiling. The Pliska plane was constructed by John Valentine Pliska, an early Midlander.

Before the plane can be hung, Hill said the roof needs to be repaired and strengthened. After examining the roof after a recent snow, Hill said water was standing in pools and 'drainage should be done in some manner.

The roof's original design provided holes through beams to drain water. But the concrete beams "creep" over a period of 15 to 20 years and the holes

are no longer there. In seeking a solution to the problem, Hill said he recommends a topo-

graphical study of the roof be com-(See CITY TO TRY, Page 2A)

th Texas: Fair and warmer through Thursday.

Spring weather continues mild

More early spring weather is in store for the Permian Basin through

Fair with warm afternoons and mild nights is the forecast from the National Weather Service office at

Midland Regional Airport today.
High Thursday should be in the mid-70s with tonight's low expected to be in the low 40s, according to the

weatherman. South to southwest winds should decrease to 5-10 mph by tonight.

Texas thermometers

Tuesday's high was a pleasant 67 degrees, a far cry from the record high for the date of 82 degrees set in 1954. The overnight low of 31 was mild compared to the record 17 degrees set this date in 1934

No rain is mentioned in the forecast, so the annual total should remain at .78 inch with the monthly total a scant .29 inch

Oil well drilling within city limits approved

BIG SPRING - A city ordinance to repeal an older ordinance which outlawed the drilling of oil wells within the city limits and which would allow in-city drilling was passed Tuesday 4-0 in the first reading before the Big Spring City Council, City Manager Don Davis said this morning.

The second reading, if approved on March 11, will give the go-ahead on the drilling.

"We had an ordinance which prohibited...any drilling within the city limits," Davis said. That ordinance prohibiting in-city drilling was passed in 1956.

He said the city has some property on the remote far south side, where initial drilling will take place if the ordinance, a 25-page proposal drawn up by City Attorney Elliott Mitchell, is approved.

Every aspect of the drilling procedures is covered by the proposed ordi-nance, which Mitchell described as "one of the best...of its kind."

The ordinance would permit drill-ing within 1,000 feet of a building or a structure without permission of the owner and 300 feet with permission of the owner. In any case, drilling on any plot could not be pursued without property-owner permission.

Texas cities which have allowed in-city drilling including include Kilgore, Beaumont, Gladewater and Odessa. Wichita Falls is considering or already has passed a proposal similar to that of Big Spring's, Mitchell said.

Mitchell said in-city drilling should be allowed "as long as it is regulated and doesn't disrupt affairs" of the

city and residents Council approving the ordinance on its first reading were Ralph McLaughlin, Bill Henkel, Larry Miller and Jack Smith. Mayor Wade Choate was not present for the read-

MGF merger talks halted

DENVER (AP) - Less than a week after announcing that an agreement "in principle" had been reached in a \$54.5 million merger deal, Energy Minerals Corp. of Denver and MGF Oil Corp. have announced that merger talks have ended.

Spokesmen for MGF in Midland. Texas, said Tuesday that Energy Minerals was responsible for break ing off the talks.

'They had tax complications that caused them some concern," one official said. "MGF was amenable to trying to work it out. We didn't think the problems were insurmountable."

Energy Minerals officials referred all inquiries to Bob Sarvis of The Sarvis Group Inc., a Denver financial public relations company.

Sarvis said that a 1979 tax decision held that cash from the transaction would flow to shareholders as dividend income rather than as capital gains and would be taxed at a much

higher rate. 'This was unacceptable to Energy Minerals," he said.

MGF's concerns include oil and gas exploration and contract drilling. Energy Minerals also is involve in mineral development.

The proposed agreement called for merging Energy Minerals into MGF on the basis of \$6.35 in cash and .33 shares of MGF common stock for each share of the 3.8 million shares of Energy Minerals common stock out-

MGF has 6.5 million shares of common stock outstanding. An additional 1.2 million MGF shares would have been issued to Energy Minerals stockholders upon completion of the merg-

To The Editor: There appears to be an overabundance of material filtering through pressrooms across the country as of late on the subject of adopted children who for one reason or another are trying to find their natural parents. It has become tiresome reading about

The article "Ten Years of Patience Pays Off" in the Sunday edition of The Midland Reporter-Telegram of February 17, 1980, is another example of an individual spending much of her adult life in desperation and frustration in order to find her natural parents, succeeding and living happily

One thing about this article stands out. The only mention of the parents who adopted her in the beginning of her life was that she came from "a very loving home" in upper New York. These are the same people who clothed her, fed her, cared for her when she was sick, and comforted her when she had problems maturing into a responsible adult. These are the same people who are suddenly in the background somewhere in upper New

It is sometimes sad that we have progressed into a society where our own individual selfish motives have overcome responsible reason. Name Withheld

A prizewinner

To The Editor:

The purpose of this letter is twofold: to congratulate and nominate.

I would like to congratulate the present administration in Washington because through their efforts the federal budget will undoubtedly be balanced within the next four years, regardless of who wins the next election. The way the budget will be balanced will be through more taxation and not through reduced government spending. The tax for doing this is the excise tax already passed and in conference committee. This tax will be more familiar to you by its "popular" name in the media and bureaucratic circles, i.e., the windfall profits tax.

The oil companies are going to be the biggest government agency collecting the tax from the consumers and passing it on to the federal government, an unwitting partner in a reverse Robin Hood con game.

I would like to nominate the Carter administration for the Nobel prize in chemistry. They have successfully converted the dollar into horse ma-

In closing, I would like to ask the question: Where will responsible government leadership come from to lead this country through the 80s? All of the declared presidential candidates leave a lot to be desired and none appear to be capable of strong foreign policy and domestic leader-

gation is almost complete.

Our agents, posing as Gallup pollsters, have found that many Americans still abide by such conventional expressions of wisdom as "a stitch in time saves nine," even though many such aphorisms are now inoperative and in several cases openly misrepre-

We recommend that steps be taken to modify said aphorisms to reflect current values. Meanwhile, their public use should be scrutinized for violations of truth-in-advertising laws. Examples, with proposed modifications, follow:

"A penny saved is a penny earned." - Economists demonstrate that a penny saved today probably will drop in value tomorrow. Therefore, pennies saved may not be pennies earned at all, but could constitute erosion of

On the other hand, copper prices

continue to rise. Experts predict that penny values soon will be fixed by the copper mar-

The sum of these effects on the penny cannot be foreseen. Therefore, Aphscam recommends: "A penny saved represents an incalculable

Though it is nt an aphorism, we all

recognize a problem with "money not being worth the paper it's printed on." Traditionally, this is harmless hyperbole. However, the prevailing fiscal policy and paper shortages could conspire to make such a state-

ment quite literally true.

Aphscam suggests a caveat appear on all paper bills: "Warning: The Treasurer Has Determined That This Money May Not Be Worth The Paper It's Printed On." The consumer thus assumes moral responsibility for using the money, and we are off the

"Politics make strange bedfellows." — The problem here is not one of content. However, we feel that a significant alteration is necessary: Politics make strange bedpersons. We further recommend distributing it in several languages.

'The wages of sin are death." -Not according to our investigation. We found that as a rule the wages of sin are disguised as secretaries' sa-

"Honesty is the best policy." - Too specific. Substitute "Honesty is a poli-

Aphscam also is concerned with the specificity of "Beware of Greeks bearing gifts," but doesn't know what to do about it.

"There's a sucker born every minute." — Change "minute" to read

"20 seconds." "All that glitters is not gold." -Perhaps not. But we feel this is incomplete. It should read: "All that glitters is not gold, but only a fool will neglect to have it assayed.'

Note of thanks

On behalf of everyone associated with Big Brothers/Big Sisters of Midland, we want to express to you our sincere thanks and appreciation for the excellent cooperation and assistance you and the many members of your staff gave to us concerning the announcements of the Big Brother/Big Sister Program during Appreciation Week. The response we received exceeded our expectations.

Programs such as Big Brothers/Big Sisters just could not exist and be successful if it were not for this type of assistance we receive from your paper, the local radio, and TV station, various businesses, groups, individuals and churches. We have, and continue to express this feeling, but we know this cannot be overemphasized and the public should continue to be aware and realize the amount of effort, time and concern that is given toward the well being of the members of our community.

Executive Director Sara Ellingson, MSW Caseworker Big Brothers/Big Sisters

Up the streets

To The Editor:

At long last, it appears that we are going to get some desperately needed street rebuilding, widening and straightening. All of the main streets have degenerated into the worst shape in the 25 years I've been a Midland resident.

Let's hope the city will expand this to include the many more heavily traveled streets not included or listed in Monday's announcement such as all of Illinois, Texas, Louisiana, Garfield and "A" (south of Louisiana) to rebuilding should take precedent over any other city construction project 'in the mill" or under consideration.

I can think of nothing more important for "the Objectives for Midland in the 1980s.

> N.R. Rousselot Midland

More names

To The Editor:

In a recent article concerning the Midland Committee on the White House Conference on Families, a few names of our committee members were left out.

I would like to add the following names: Sister Carmen Daunno, Garden Lane Outreach Center; Sister Eva, Our Lady of Guadalupe Catholic Church; Sara Ellingson and Karen Wickwire, Family Services. Thank

Barbie, 21 this year, known as collectible in doll circles

Copley News Service

This year marks the 21st birthday of America's most famous doll, Barbie. And the estimated 2,000 Barbie collectors are now paying big bucks for early models of their favorite

Barbie was introduced in 1959. She was named after the daughter of he dolls' cretor, Ruth Hanler. At the time, she was a new type of toy, a teen-age fashion doll. Barbie soon became the most popular doll in the country. By the mid 1970s, nine girls in 10, under the age of 11, owned at

The first Barbie came with either blonde or brunette hair. The darkhaired version was the least popular and so is rarest today. A mint copy of a 1959 Barbie doll was sold at acton in 1978 or \$501.59.

In 1961, Barbie got a boyfriend, Ken (named after the Handlers' son). Although desirable, he is not as valuable. A mint copy of the first Ken is worth around \$20. Perhaps one reason for his lesser popularity is his appearance. Barbie seemed worldly and so-phisticted, while Ken looked like an asparagus sorter from Milwaukee. Among collectors the first Ken is kown as "fuzz head."

He was sold naked, except for a pair of red swimming trunks and either brown or red sandals. From the expression on his face, one might assume he feared some broke little girl would take off his shorts to make yet another outfit for Barbie.

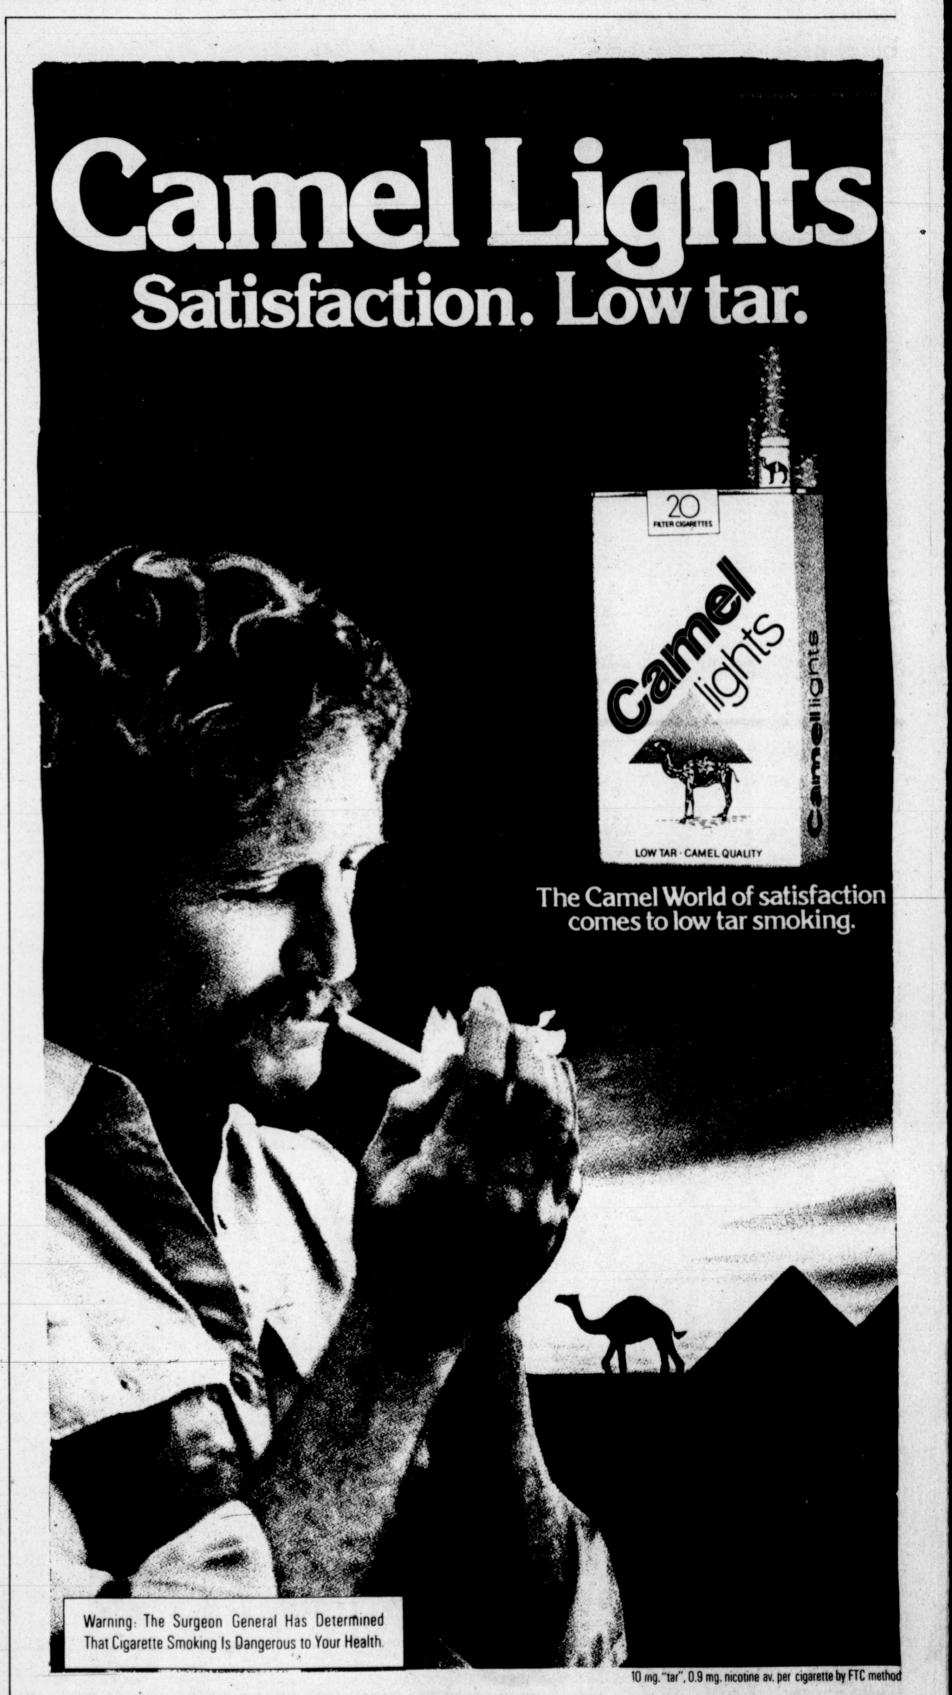

While additional clothing was available, apparently it didn't sell well at first. One clothes horse in the family was enough. So later in 1961, Ken was given a towel. At least he'd have something to put over him when he took Barbie out on the town.

The early '60s were a tough time to be a boy doll. Especially if your girlfriend was Barbie.

In 1963, Barbie got a new pal, Midge. This button-nosed, blue-eyed, freckle-faced doll was the same size as Barbie, but had an entirely diffrent image. With hr wide-eyed, friendly smile, she looked more like Ken's type than Barbie. The original Midge is now worth up to \$15.

That year also saw the introduction of a 3-inch baby doll for Barbie. Just whose baby it was supposed to be was not explained. Unfortunately, this was before talking Barbie. One can only speculate what the subject of conversation between Barbie, Midge, and Ken would have been if they could have spoken. With all standard accessories, the baby doll is currently valued at \$20.

As the years went by, Barbie got more and more friends - Skooter, Ricky, Skipper, Tutti and Francie, to name a few. She also got more accessories - cars, airplanes, houses, etc All of these are also sought after by

Mrs. Jatzewski said a passenger in the center of the plane shouted that it

was on fire. "We saw the plane was burning," she said, "but the crew were very good and they told everyone to be calm. They opened an exit, and

everybody went down the chutes.' "It looked like the pilot hit the ground too hard," said a Norwegian survivor, Thor Kobbenes, 39. "I understand one motor fell off. People panicked.

"The plane somehow came to a stop, and the fire also seemed to have eased, and the people calmed down. But suddenly there was an explosion and we ran out.'

Israeli bigot held in pushing

NEW YORK (AP) -An Israeli man was seized early today after he allegedly tried to push an Oriental man into the path of a subway train in Chinatown because he did not "like Chinese people," police said. Raziel Orkasi, 37,

jumped the turnstiles at a station in Chinatown around 1:10 a.m. and tried to push the man onto the tracks as a train roared in. The victim, who later refused to give his name to police, fought Orkasi off as the train pulled into the station and stopped, police said A witness to the as

sault told police about it when the train stopped at the next station and Orkasi was subdued aboard the train after it pulled into another station a few minutes later, police After he was arrested,

he told officer Joseph Tuff, "I pushed him because I don't like Chinese people," police said. The witness, who made

a formal complaint, asked that his name not be divulged. However, Tuff said he worked in production at NBC.

Orkasi is a registered alien, but would not tell what he was doing in this country, Tuff said.

"All he would say is he didn't like Chinese people," the officer said.

Police said Orkasi was taken to Bellevue Hospital for mental observa-

Ship hits oil platform

GALVESTON, Texas (AP) — U.S. Coast Guard officials said a ship that collided with an offshore oil drilling platform has anchored safely in Galveston Bay.

The ship, Sea Lift Indian Ocean, apparently rammed the platform about 100 miles southeast of Galveston Tuesday. Two crewmen were airlifted by Coast Guard helicopter from the ship to a Galveston hospital. They were not believed

to be seriously injured. The vessel, a cargo container, was damaged extensively but managed to get into anchorage, officials said.

The extent of damage to the platform is not know. A marine safety crew is investigating the collision, the seventh in the Galveston Bay area since Nov. 1.

Twin brothers leap to deaths

CRESPANO DEL GRAPPA, Italy (AP) — Twin 18-year-old brothers jumped to their deaths from a 165-foothigh bridge to avoid being put into a mental clinic, and their mother witnessed the suicide after vainly trying to prevent them from leaping, authorities reported today.

Andrea and David Camerini, both suffering from mental problems, ran to the bridge near their home Tuesday as an ambulance and two nurses showed up to take them to the clinic. The brothers stayed a few minutes on the edge of the bridge then jumped, police said.

Questions, answers about 'windfall tax'

By JIM LUTHER

WASHINGTON (AP) - Here are some questions and answers about the \$227.3 billion "windfall" tax on the oil industry agreed on by a House-Senate conference committee.

Q. Why do we need a new tax? A. The tax is designed to win political acceptance of President Carter's decision to end price controls on U.S. crude oil. The money will help finance Carter's energy program, which includes helping lower-income Americans cope with higher fuel costs.

Q. Won't decontrol mean higher prices for gasoline and heating oil? A. Yes, and for just about everything else produced in the United States, since the price of energy must be figured into the cost of most products. But economists say price controls have held down the price of petroleum in this country to unrealistic levels, fostering the notion that cheap energy will last forever.

Because U.S. oil production has been falling, more and more must be imported. And that takes billions of dollars out of this country annually, further weakening the dollar and worsening inflation at home.

Raising oil prices, the theory goes, will force people to use less energy. Opponents say it would be smarter to let the oil industry keep the \$227.3 billion for investment in energy.

Q. Who will pay the tax?

SECTION

Q. Will the tax prevent the oil industry from profiting unduly by removal of price controls?

A. That's the idea. Economists guess that decontrol will raise consumer energy costs by \$1 trillion in the 1980s. Existing state and federal taxes will take a big chunk of that. When the \$227.3 billion "windfall" tax is included, taxes of all kinds will drain off about 78 percent of the

Q. What's the government "windfall" that the oil industry talks about? Because decontrol will raise oil prices and oil industry income, the industry will pay an estimated \$355 billion more in income taxes in the 1980s - in addition to the \$227.3 billion "windfall" tax.

Q. What will the government do with all that money? A. The extra income taxes will go into the treasury for whatever pur-

A. No one can say for sure. Congress intends that oil producers and owners of oil-producing lands pay the tax when they sell their oil to refineries. However, opponents say the tax ultimately will be paid by consum-

Q. How will the tax work?

A. Although the tax often is referred to as a "windfall-profits" tax, it would not apply directly to profits. The tax would simply take for the federal government 30 percent to 70 percent of each crude oil price increase above 1979 levels. The tax rate depends on the age and location of the oil field pose Congress sees fit. The conferees want to set aside for individual and business income-tax cuts 60 percent of the \$227.3 billion from the "windfall" tax. But any tax cut would require further action by Congress.

The conferees want about 25 percent, or nearly \$57 billion, for helping families near the poverty level - about \$11,600 a year for a family of four - pay rising fuel costs. Again, details would be provided in subsequent legislation.

The rest of the money would be used as incentives for residential and business energy conservation, for subsidizing development of alternate energy sources and for improving the nation's transportation system.

Q. Except for the chance of an income-tax cut, is there anything in all that for the average consumer? A. Not directly, unless you are planning to install a solar heating

system or a windmill for power generation. The tax credit for such purchases would be increased from the current maximum \$2,200 to \$4,000. However, a motorist who uses gasohol might'eventually find that fuel more available and at a slightly lower price than otherwise, because of in-

Attached to the tax bill is an unrelated provision allowing a couple to avoid income tax on up to \$400 a year worth of stock dividends or interest from savings. An individual would be allowed a \$200 exclusion.

The provision would apply only to interest or dividends earned in 1981 and 1982. It would replace a current law that allows a \$200 dividend exclusion for a couple and \$100 for a single person.

Culberson gains rank project

Tax would hit pre-1979 pools hardest

Lubbock County draws 5,900-foot wildcat project

By JIM LUTHER

WASHINGTON (AP) - The "windfall" oil tax on which congressional conferees have completed work would hit hardest at oil from fields discovered before 1979.

The conferees reasoned that a higher tax should apply to such "old" oil because the costs of finding these fields were considerably lower than those that will be associated with future discoveries.

Too, the panel approved generally lower taxes for independent producers - large and small operators that drill more than 90 percent of the nation's exploratory wells. Independents would get a lower rate on the first 1,000 barrels produced each day. All told, independents would pay slightly less than 10 percent of the \$227.3 billion the tax is expected to

produce in the 1980s

The tax would take effect March 1, begin phasing out no later than January 1991 and end 33 months later. The phase-out could start earlier, depending on how quickly oil prices

Here is how the tax would affect various types of oil:

OLD: This now accounts for twothirds of U.S. daily production of 8.6 million barrels, but old oil gradually will disappear as wells play out. The tax would take from the major oil companies 70 percent of price increases above 1979 levels, which averaged in the \$13-per-barrel

Independents would pay a 50 percent tax on the first 1,000 barrels

future. The tax would take 30 percent of price increases above about \$16.55 barrel; the same rate would apply to independent and major companies. although most of this oil will be owned

by the majors. The same tax would apply to "heavy" oil, a thick, hard-to-recover variety found mainly in California.

TERTIARY: When oil can't be pumped any other way, chemicals are injected into the well to facilitate production. These are called tertiary recovery techniques. Any increased production resulting from these expensive techniques would be taxed basically the same way as newly discovered oil.

STRIPPER: This oil, from wells averaging 10 barrels a day or less, accounts for 16 percent of current U.S. production. Major companies would pay a 60 percent tax on price

increases above about \$15.30 a barrel;

independents would pay 30 percent. Stripper oil already is free of federal price controls. Economists say the average price of stripper oil is around \$35 a barrel.

ALASKA: Any newly discovered oil from a well north of the Aleutian Range or more than 75 miles from the Trans-Alaska Pipeline would be exempt from the tax. Oil from the currently producing Sadlerochit Reservoir on the North Slope would be taxed at 70 percent.

In all cases, the base price to which the tax would apply would be adjusted regularly to offset inflation.

Any oil owned by a state or local government or an Indian tribe would be fully exempt from the tax. The exemption also would apply to most oil owned by charitable educational or medical facilities.

oil. Producers in major oil states are being asked to attend tax protest raland other politicians with misleading lies to hear how they can support a the American people. plan to defeat the tax. "They call the oil tax a 'windfall Bellmon will lead the Midland Proprofits tax' yet it is not a tax on profit test Rally and explain the Oil Tax

Roundup to be held later in Washington, D.C. Also attending the rally here will be Bud Stewart, coordinator of the Tax Roundup. He is executive director of the Energy Consumers and Pro-

ducers Association which is headquartered in Seminole, Okla. That organization and the Permian Basin Petroleum Association are co-

sponsoring the Midland rally. Stewart said the Oil Tax Roundup idea orginated when Senator Bellmon met with a group of Oklahoma oilmen and in effect told them they "could not let such a bad bill pass Congress

yet passed by Congress which has

without an all-out effort to stop it." "We didn't need Bellmon to tell us this would be the most disastrous bill

Midland Tax Protest Rally set Friday

some real losers to its credit. We

certainly needed Bellmon to convince

us that it isn't too late to defeat it.' Stewart said. Stewart said part of the plan to be outlined at the Midland Tax Protest Rally is to get the real facts about the tax before the American public. He charged the Carter Administration

but an automatic tax on each barrel of oil as it comes out of the ground. regardless of production costs. And they certainly don't tell people this tax will reduce domestic oil production and would raise the price of

gasoline," Stewart said. "Of gret importance to many royalty owners is that the tax will reduce their royalty checks by almost onehalf, he added. "Never before has Congress proposed taxing only one industry. The \$350-\$400 million tax is the largest tax ever proposed.

Stewart urges all persons interested in joining the effort to attend the rally here and hear Senator Bellmon. "I guarantee that after you hear Bellmon you will not only be convinced that we should defeat the tax, but that we can defeat the tax.

Henry Bellmon Tax protest rallies will be held today in Oklahoma City, Shreveport, La., and Tyler. Other rallies are scheduled Thursday in Dallas and Hous-

ton and at Lafayette, La. Corpus Christi and Roswell, N.M., also will hold protest rallies Friday. The Roswell event will be held at 4:30

RK spots pair of Dawson explorers

Stock market mixed NEW YORK (AP) - A

resurgence of buying in energy issues provided most of the excitement as the stock market turned in a mixed showing Tuesday. The Dow Jones average of

30 industrials, off more than 44 points from mid-February through Monday's close, rebounded 4.44 to 864.25. But the over-all tally on

the New York Stock Exchange showed about five losers for every four stocks that gained ground. Virtually all of the Dow

average's gain stemmed from the three oil stocks among its components -Standard Oil of California, up 3% at 80% as of the 4, p.m. close in New York; Texaco, up ½ at 40, and Exxon, up % at 66¼. Texaco led the active list on turnover of better than 1.5 million shares. There were even bigger

gainers elsewhere in the energy sector. Mobil climbed 81/8 to 83%; Patrick Petroleum 1% to 231/2, and Marathon Oil 31/2 to 691/2. Among Canadian oils list-

ed on the American Stock Exchange, Bow Valley In-dustries picked up 2% to 53; Gulf Canada 1% to 153; Dome Petroleum % to 681/4, and Imperial Oil 1% to 46%.

Their showing helped lift the Amex market value index 4.01 points to a record high of 297.83.

There were press reports in London that Marathon might have found a new oil field in the British sector of the North Sea. Marathon said it could neither confirm nor deny the reports until it had more data on an exploratory well there.

Big Board volume was an even 40 million shares, up just slightly from Monday's seven-week low of 39.14 million.

The NYSE's composite index rose .35 to 65.14.

Standard & Poor's index of 400 industrials was up .86 at 129.86, and S&P's 500-stock composite index gained .65 to 113.98.

Analysts said traders seemed to be waiting cautiously for some word of the government's possible response to the recent acceleration of the inflation rate.

The NASDAQ composite index for the over-the-counter market closed at 158.50, up .53.

BUSINESS MIRROR Inflation linked directly to U.S. productivity dip

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) - Americans have known for at least 15 years that they have been slipping behind other countries in the rate at which they improve their production efficiency.

They have known, but maybe haven't cared,

though the steady decline - from 3.2 percent in the years 1948-1965, to 2.3 in 1965-1973, to 0.9 in 1973-1978 and to a minus last year - has coincided with inflation

The relationship still may not be comprehended, even after Congress' Joint Economic Committee last year released to a people long accustomed to higher living standards a conclusion that was designed to

Said the committee: "The average American is likely to see his standard of living drastically decline in the 1980s unless the United States accelerates its rate of productivity growth.' For many Americans the process has begun;

hourly workers in 1979 earned about 6 percent or 7 percent more than in 1978 in terms of dollars, but with inflation of 13.4 percent their takehome pay was

Still, says C. Jackson Grayson Jr., chairman and founder of the American Productivity Center, whose mission is to raise the efficiency of American output, millions might still not comprehend the message.

"Not enough people are listening," said Grayson.
He conceded "There is a greater degree of aware-

ness among Congress, business and unions, but not among ordinary people."

Can people understand, he was asked? "If they're

afraid enough," he replied, "Now they're afraid of inflation and afraid of unemployment, and they should be afriad of what is happening to productivi-

But, said Grayson, who was President Nixon's price commissioner, an experience that convinced him that controls don't work, too seldom is the connection made between inflation and low produc-

The relationship is direct. If it costs less to turn out a product then everyone — shareholders, employees and purchasers benefit — without depriving the other of their share. The more it costs to produce a product the less competitive it is; the price is higher, he market is smaller, and that means less for shareholders and workers.

Productivity growth lags because of myriad rea-sons, all of which the center is examining at conferences and seminars, and then instituting remedies, working in-house with executives of specific com-

Government intervention in the marketplace, some of it necessary, is one cause, Grayson says. Tax disincentives to investments are another, he believes. Like cancer, there are probably scores of

He is disturbed, for one thing, by the tendency of business today to measure performance in terms of immediate return on equity, no matter what it does

o the company's long-range strength. Grayson would like to see annual reports include a productivity masurement along with the money

measures. High productivity, he feels, would show that management was looking to the future, building the company's strength rather than squeezing out He is distressed at how little business knows about

productivity. "I keep telling business people they don't know as much about it as they think they do, he says. If they challenge him, he asks:

1. How do you measure productivity in your com-

pany? Could you give me a number? "Only 10 to 20

percent can," he says. 2. What is the relationship between productivity and profitablility? 3. Do you have productivity

Generally the result is chagrin; the fact is, says Grayson, they do not know productivity in its specif-

ics. In fact, because many executive profit-sharing plans are based on immediate earnings, long-term strengh sometimes is sacrificed. A particular goal of Grayson's is to "restore the

ability of people to influence their own work and permit them a greater say and influence on their jobs." And, he adds, to share in the rewards as well.

"We urge employees and managers to sit down and seek ways to improve worker participation, worker contributions, and then to return to them rewards in proportion to their contribution."

Individual companies, mainly small and medium size, can call the Houston center and receive answers to their questions, and even have individual surveys made and their furture performance monitored. At the moment, the biggest project of all is an April

meeting at the Houston headquarters of producitivy experts from all over the country. The week-long conference will include academics, executives and labor officials, with Lane Kirkland, AFL-CIO head, a main speaker.

Dallas deputy indicted

DALLAS (AP) - A Dallas County grand jury has indicted a former deputy sheriff on charges of violating the civil rights of a jail inmate who was seriously burned when he allegedly was sprayed with scalding water.

The indictment was returned Monday against

Raleigh Dale Pallett, who is accused of spraying scalding hot water on Curtis Washington, who suffered second-degree burns over most of his body Sheriff Carl Thomas fired Pallett after charges

were filed against him.

Livestock auction report

The Southwestern Livestock Auction Co. ran through 732 head of cattle Tuesday in a market that was \$1 to \$3 lower on most classes of cattle. Breed cows were steady. The market was not strong enough to test cow-and-calf pairs. Here's a run-down on the sale:

Steers weighing 600 to 700 pounds were sold for \$70 to \$75 pounds per hundredweight; 500 to 600 pounds, \$78 to \$82.50; 400 to 500 pounds, \$83 to \$88; 300 to 400 pounds, \$92.50 to \$107; under 300 pounds, \$105 to \$110 per hundredweight.

Heifers weighing 600 to 700 pounds were auctioned for \$64 to \$68.50 per hundredweight; 500 to 600 pounds, \$69 to \$73; 400 to 500 pounds, \$78 to \$81; 300 to 400 pounds, \$84.50 to \$87.50; under 300 pounds,

\$91 to \$98.50. Cow utility were sold for \$51.50 to \$54 per hundred-Canners and cutters went for \$47.50 to \$49.

Bulls yield Grades 1 and 2 were sold for \$62.50 to \$65.50 per hundredweight. Bred cows were auctioned for \$600 to \$725 per

Cow-and-calf pairs were sold for \$660 to \$775 per

Austin defeats Kate Latham

HOUSTON (AP) - Second-seeded Tracy Austin led four seeded players who advanced with straight set wins

in the second day of the \$150,000 Women's Pro Tennis Tournament. Austin, the 17-year-old Californian dropped only one game Tuesday, dis-

posing of Kate Latham 6-1, 6-0. Earlier in the day fifth-seeded Dianne Fromholtz, a 23-year-old Australian, had little trouble with Marita Redondo, winning 6-3, 6-0.

Sixth-seeded Sue Barker of England also advanced Tuesday, defeating another Englishwoman, Glynis Coles, 6-2, 6-2, and eighth-seeded Greer Stevens of South Africa turned

back Bettina Burge 7-6, 6-3. The only match of the day involving unseeded contestants saw Zina Garrison defeat Christiane Jolissaint of

Switzerland 6-3, 6-4. McEnroe, Sears Connors

advance MEMPHIS, Tenn. (AP) - It took top-seeded John McEnroe 15 minutes and second-seeded Jimmy Connors nearly three hours to reach the same point — the third round of the \$250,000 U.S.

National Indoor Tennis Championships. Connors had to beat back a stern challenge from Australian Peter McNamara before claiming a 6-7, 7-6, 6-2 second-round victory Tuesday night at The

Racquet Club. It was much easier for McEnroe, who advanced after his opponent, South African Byron Bertram, withdrew because of an

injury. Bertram forfeited the match with McEnroe leading 2-1 in the first set after he sprained an arch in his foot:

Injury also forced No. 4 seed Gene Mayer out of the competition. Mayer was unable to take to the court because of a pulled groin.

McEnroe said later he was disappointed because he wasn't able to play a full set against Bertram. "I was hoping to get

Ivan Lendl of Czechoslovakia, who beat Russell Simpson of New Zealand 6-4, 6-1 Tuesday.

No. 3 seed Roscoe Tanner, a 6-4, 6-2 victor Tuesday over Billy Martin, was to play Erik van Dillen.

Connors, who has won the U.S. Indoor the past two years, labored for 2 hours and 25 minutes before he managed to shake off McNamara.

"I knew he was a tough player and he was a very, very, very tough player tonight," Connors said later.

Troctor hired to Ranger crew

ARLINGTON, Texas (AP) - The Texas Rangers Baseball Network announced Tuesday that Mel Troctor has been hired as its new play-byplay broadcaster. Troctor, 33, has been

the voice of the National Basketball Association Washington Bullets the past year. He replaces Jon Miller, who left the Rangers to join the Boston Red Sox network. Before moving to

Washington, Troctor spent four years as a broadcaster for the Hawaii Islanders of the Pacific Coast Baseball League. He joins Bill Merrill and Eric Nadel on the Ranger network.

Local schools play to 1-1 tie

Heritage Academy and Assembly in Christ Fellowship Christian Academy played to a 1-1 tie in a soccer match between the private schools Monday afternoon at Sidwell Shelley Williams, Kris

Spain and Reece Owens were cited as standouts for Heritage while Brady Richardson and Jim Bob Cooper were the stars for Assembly in Christ.

'Bullet' Bob to get release

HUNTSVILLE, Texas (AP) — "The first thing I want to do is grab my wife and hug and kiss her," he the paperwork to release "Bullet" Bob Hayes, the former record-breaking Dallas Cowboy receiver convicted

last year on narcotics charges. Hayes was convicted of delivering cocaine to an undercover police officer and sentenced to a maximum five years in prison last April. He became

eligible for parole this month. Hayes, once known as the "world's fastest human" has served 10 months

of his sentence. 'It's been tough" Haynes told an writer with the "Dallas Cowboy Weekly" last October, the only prison interview he has granted. "I miss my family, I miss my friends ... I miss freedom in general. But I paid my price and now I'm ready to get out of "The first thing I want to do is grab

said. Hayes won the 1964 Olympic gold medal in the 100-yard dash, a feat which earned him the "fastest human" nickname. Drafted by the Cowboys in 1965, he made All-Pro that year and later set several team receiving records before leaving the

Cowboys for private business. Little was heard of Hayes after he left football until his 1978 indictment

for alleged drug delivery. Hayes told the "Cowboy Weekly" he has considered writing a book, a television series or a movie based on

"I want the public to know what has happened to me, the pros and cons of

Bob Hayes." Hayes worked as a gym porter dur-

"Basically, you're living a real good life ... you've got a lot of money in your pocket, you're eating the best can't eat that food, you can't get on an

ing his stint at TDC's Ferguson unit.

But it certainly didn't compare to his

life before prison.

of food, and then all of a sudden, you airplane and ride first-class around the country. "Now everything that I do there's

supervision over me, folks that are looking at me. It's a complete turnaround from the top of the free world I was in, to a point now that I'm just locked up inside a penitentiary and I just don't have that freedom, that

spirit, that I once did."

Hayes said adjusting to prison was difficult at first, because of his notori-

Finley, Martin explosive mixture

By WILL GRIMSLEY **AP Special Correspondent**

Charles Finley and Billy Martin the most explosive mixture since some fiendish scientist found a way to blow up everything around him with an oily compound known as nitroglyc-

"It's almost colorless when pure and has a sweet taste," says Webster's Third International Dictionary on Page 1531, "that is obtained by nitrating glycerol.

"It burns quietly in the open air but explodes on heating in a closed vessel or especially on percussion with formation of about 10,000 times its own volume of gas.

Now baseball fans can only see the clear liquid and appreciate the sweet taste. All is serene. But the Oakland Coliseum is a pretty closed vessel for two such volatile components and the question is who will create the first percussion that will wreck baseball's latest and most bizarre marriage.

Will it be Charlie O himself, who makes a career of keeping his managers on a conveyer belt - one managing, one going, one coming? Or will it be Billy the Kid, Charlie O's new skipper of the Oakland A's, who might provide the required shock by landing a right on somebody's jaw - maybe Finley's.

HOLD YOUR breath. It could happen as quickly as the snap on Nolan Ryan's fastball.

They are two mavericks - both proud, headstrong, uncompromising, predictable only in that either can be counted on to do the unpredictable.

There is a bit of irony in Finley's selection of Martin as the man needed to lead the cellar-prone A's out of their dingy dungeon. He had the idea once before, back in 1970, and, after considering all the possible consequences, changed his mind.

That was when Martin called Finley a liar and vowed never to work for

had 34 home runs.

The development came

Martin was between jobs at the time. In his first major league managerial assignment, he had taken the Minnesota Twins into the 1969 American League playoffs only to lose three straight to the Baltimore Orioles.

While driving to the home of his in-laws in Nebraska, Martin heard the news on the radio. He had been fired by Twins owner Calvin Griffith. Billy got a job with a brewery and a radio station.

But the fiery ex-Yankee was restless to return to the game. About this time Jim Campbell, general manager of the Detroit Tigers, was becoming disenchanted with his manager, Mayo Smith, and was looking around for a possible replacement. Meanwhile, at Oakland, Finley was preparing to give walking papers to John

IN HIS BOOK, Allen relates that Finley was so interested in signing Martin that he called Griffith on the

"Don't do it," Griffith advised. "You'll be taking an awful chance.

Finley ultimately replaced McNamara in 1971 with Dick Williams, who led the A's to three straight World Series victories. Martin went to Detroit where he managed for three years before moving to Texas in 1973 and later to the New York Yankees.

Finley said-be changed his mind after he thought of Billy's track record," Allen discloses. "His (Billy's) fight with Jim Brewer, his fight with Dave Boswell, his fight with Howard

"That's Billy Martin," Finley is quoted as saying. 'He suckered Brewer, he beat up a club executive and he took advantage of one of his own players who was intoxicated."

Martin, apprised of Finley's statements, reportedly blew his stack. "He's a liar," Billy blurted. "When

the A's started winning again I never heard from him. Then I just sat down and wrote Finley a letter. "I told him to forget it. I don't like

I-State Sycamores ache without Bird

By The Associated Press

What a difference a year - and the absence of a 6-foot-9 superstar named Larry Bird - made for Indiana State University

Last winter, the Sycamores were unbeaten and rolling toward a berth in the finals of the National Collegiate Athletic Association Basketball Tournament against eventual champion Michigan State.

But Bird, college basketball's Player of the Year in 1979, now plies his trade for the Boston Celtics and Tuesday night his former teammates couldn't even make it past the opening round of the Missouri Valley Conference postseason tournament. Freshman Cliff Levingston scored

14 of his 24 points in the second half to pace Wichita State over Indiana State 82-70, ending the Sycamores' season with a 16-11 mark, compared to last year's glittering 33-1 log. An 8-0 burst put Wichita on top to stay 50-43 with 13:24 left.

It was 67-62 with 2:35 remaining when Carl Nicks, Indiana State's leading scorer with 22 points, fouled out. Wichita promptly ran off the next The Shockers moved into the semi-

finals against regular-season champ Bradley, which trounced Tulsa 97-76 as reserve Hasan Houston scored 27 points and David Thirdkill added 20.

"I think this team is peaking at the right time," said Bradley Coach Dick Versace. "Some of it was by design, some of it by happenstance. But I don't want people to think I'm some sort of Machiavellian genius or anything. It's just that I've got a group of young guys who want to listen and work and play as they're capable of

The other MVC semifinal will pit Creighton, an 86-80 winner over Drake, against West Texas State,

points but was unable to overcome a balanced Creighton attack. Eddie Harris came off the bench to lead West Texas with 20.

It's tournament time these days on several fronts. The only member of The Associated Press Top Twenty in action Tuesday night was No.11 Missouri, which defeated Oklahoma State 82-69 in the opening round of the Big Eight Tournament. Larry Drew led

shooting and added seven assists. Missouri led 40-38 at halftime but outscored the Cowboys 19-5 in the first seven minutes of the second half.

the Tigers with 20 points on 9-of-12

Supersub Mark Dressler, who replaced the injured Curtis Berry for the third straight game, added 19

"Mark changes our ballclub quite a bit," said Coach Norm Stewart. "He gives us more outside shooting.'

Dressler set a Big Eight record during the regular season by hitting 69.9 percent from the field. "Missouri is the best team in the

Big Eight," said O-State Coach Paul Hansen. "In the second half they blew us out. It was like playing the American hockey team out there. Oklahoma State shot 73 percent in

the first half but Missouri, the nation's top shooting team, hit 60 percent for the game. The Tigers are averaging 57.7 for the season and seem destined to shatter the NCAA record of 55.5 percent set last year by UCLA.

In the Big Eight semis, Missouri will meet Kansas, which jumped to an early lead and whipped Colorado 75-65. Tony Guy led the winners with 20 points. The other semifinal will send Kansas State, a 101-87 victor over Iowa State as Rolando Blackman celebrated his 21st birthday with 22 points, against Nebraska, which eliminated Oklahoma 75-68 behind Jack

Baseball negotiations are at standstill

NEW YORK (AP) - Negotiations for a new creating a pay scale with no real negotiation. contract between major league players and the club owners are in their 16th week. The disagreements decrease in the money paid last year.' extend even to whether or not there has been progress in the talks.

ciation Executive Director Marvin Miller after Tuesday's session. "There's been no movement in 16

Things have been pretty much at a standstill as we go over the same points more times than I can tell you," added Miller, who spent nearly six hours in meetings with Ray Grebey, the owner's chief nego-

Frohman. "You tell me how that Grebey, whose title is Director, Player Relations, said: "the last 16 weeks have been very productive makes any sense. I guarantee you, if Dave becomes a free agent, he will get a dozen offers for over \$1 million

He said there has been more "open discussion and exchange of ideas" than was the case in previous We are sitting down and talking to each other

about the issues," he said, "and we have identified the areas where there is agreement and where there is disagreement. Citing another example of what he felt was progress, Grebey said the owners had made "a very

DEATHS

Garage sale? WANT ADS assure success. Dial 682-6222

Thornton Hardie Jr., 62, 1908 N. L. St., died early Monday morning in Marble Falls

Services were to be at 11 a.m. today in First Presbyterian Church with Dr. Robert Boynton Smith, pastor, officiating. Burial was to follow in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home.

Hardie was born Dec. 2, 1917, in El Paso. He spent his early life in El Paso, attending schools there and graduating from El Paso High School. He attended the University of Texas until World War II when he entered the U.S. Navy. He served as a line officer aboard the destroyer U.S.S. Craven. Upon his discharge as a lieutenant, he returned to the University of Texas where he received his law degree in 1947.

Hardie was married to Mary Elizabeth Whitaker of El Paso in 1942. In 1947 they moved to Midland, where he was associated with the law firm of Whitaker, Turpin, Kerr, Smith & Brooks. He practiced with them for 25 years before opening his own law office.

He was a member and past president of the Midland County Bar Association, a member of the Texas and American Bar Associations, a member of the International Academy of Trial Lawyers and a charter member and life fellow of the Texas Bar Foun-

Hardie served on the Midland Independent School District board, the Midland City Council and was a Democratic county chairman. He served as a deacon and an elder of the First Presbyterian Church and was serving as a trustee of Tres Rios Presbytery.

He was on the original board of Objectives for Midland in 1968. He was a past president of the American Red Cross, a past president of the Midland Chamber of Commerce from 1967-1968, a life member of the University of Texas Ex-Students Association and the Texas Letterman's Association, a founding board member of Western State Bank and past president of the Exchange Club.

Hardie also served as past president of the Toastmasters Club, past president of the Petroleum Club and a member of Sigma Alpha Epsilon fra-

Federal judge refuses to order deportation of accused war criminal Karlis Detlavs

BALTIMORE (AP) — A federal immigration judge says prosecutors failed to make a case for deporting Karlis Detlavs, accused of participating in Nazi war crimes in Latvia during the early 1940s

Immigration Judge Emil M. Bobek ruled Tuesday that Detlavs had not been clearly identified by witnesses who have testified in a series of hearings over

During those hearings, prosecution witnesses gave emotional testimony that Detlays participated in the slayings of Jews and other civilians as a member of the Latvian Legion working under the Nazis.

Detlavs of Govans, Md., denied the charges, but did admit to lying to immigration officials about other matters when he entered the United States in In his ruling, Bobek said, "None of the witnesses identified (Detlavs) at

this hearing in court. None of the witnesses knew the name Detlavs until told so by the Israeli police. None knew his given name and that (he) had a brother

"Could there be then a possibility that it was the brother?" the judge

Justice Department officials were reviewing the opinion Tuesday, and said

they did not know yet whether they would appeal the case to the five-member Board of Immigration Appeals in Washington.

Detlays said from his home Tuesday, "I'm going to think I'm lucky. Very lucky." He added that there would be no celebration and no hard feelings.

The government filed charges against the 69-year-old retired General Electric Co. worker in 1976, charging that he lied when he entered the United States in 1950 when he denied any war crimes and said he had been a forestry worker from 1936 to 1944. The witnesses accounts were presented during intermittent hearings before

Bobek in 1978 and 1979. Some witnesses testified in 1977 hearings, which were interrupted by the murder of the first immigration judge while he was on vacation in the Virgin Islands

Last January, Detlavs admitted he had lied to immigration officials. He said he had been a member of the Latvian Legion, but he had been forced into the army as an unemployed woodsman, rather than being sent to Germany as a

But he denied having any part in atrocities. In his ruling, Bobek said the admitted lie alone was not enough to warrant

DR. NEIL SOLOMON Rules of thumb on weight, diet

Dear Dr. Solomon: Do women have stronger willpower than men? About a year ago, my wife and I both went on diets, and we both lost weight. Today, however, I'm back where I started, while she continues to look trim. Is this true of most men and women? - Tom.

Dear Tom: Actually you and your wife are the exceptions. The Medical University of South Carolina studied 22 men and 18 women for a period of 12 weeks and then retested them a year later. It was concluded that generally men did a better job than women of losing weight and of keep-

Dear Dr. Solomon: With all of the emphasis on low-cholesterol diets, I wonder if my husband and I should be drinking milk any more. Is milk good for grown-ups, or is it only for children? — Mrs. G.H.

Dear Mrs. H.: Milk is an important food product for adults and for children. Many adults are not getting a sufficient supply of calcium as a result of their low intake of milk or milk equivalents. Women should have two or three servings of milk or milk products daily; men require an additional serving. Pregnant women, who need calcium to nourish the developing baby, should have at least four servings daily.

Milk products that can be substituted for milk in your diet include cheese, yogurt and ice cream. One ounce of cheese is the equivalent of a cup (eight ounces) of milk. If you have a weight or cholesterol problem, skim milk and 'low-fat cheeses are more advisable.

Dear Dr. Solomon: Is there any rule of thumb for determining the ideal weight and the amount of calories that a person needs daily? — Ms.

Dear Ms. H.: One method of calculating a woman's ideal weight is to allow 100 pounds for the first five feet of height and an additional five pounds for each inch over five feet. If the person has a small frame, the total is decreased by 10 percent; for a person with a large frame, 10 percent is added. A woman of average build, five feet, three inches in height, should therefore weigh 115 pounds.

For a man, 106 pounds is allowed for the first five feet of height, and six pounds for each additional inch. A five foot, 10 inch man of average build should weight about 166 pounds.

To compute the amount of calories' you need at complete rest (your basic caloric requirement), simply add a zero to your ideal weight. The total daily caloric requirement for a sedentary person is computed by increasing the basal caloric requirement by one-third. Persons who are moderately active should add one-half to obtain their daily caloric requirement.

Physically active people, such as athletes, who burn up more calories, can double their basal caloric requirement and still maintain their ideal weight.

Preparedness sessions under way at Orange

AUSTIN, Texas (AP) - John Macy, director of the new Federal Emergency Management Agency, was a featured speaker for the 19th annual Preparedness Conference for state and local officials opening

The meeting was expected to attract about 500 county judges, mayors and emergency management Macy heads the federal disaster agency that plans

the nation's response to major natural and manmade emergencies and operates relief programs for victims of catastrophes.

Other speakers will discuss news media responsibility during disasters, hazardous materials transportation, nuclear civil protection and severe weath-

throughout the night.

Indicted CETA official suspended without pay

DALLAS (AP) - The Dallas County Commissioners Court has suspended without pay a county official indicted last week for fraud and corruption in connection with his management of the federal CETA program.

Under CETA, the Comprehensive Employment Training Act administered by the Labor Department, large amounts of money are routinely fun-neled into a myriad of agencies for training the unskilled. It has come under close scrutiny across the country because many local programs were found to be riddled with corruption.

A nine-count indictment was returned last week against Curtis Vaughan, manager of the Dallas County programs. The indictment charges Vaughan with soliciting bribes in return for awarding CETA contracts and jobs to recipients who, in many cases, were ineligible for the assistance.

The commissioners court, acting Monday, also learned federal investigators were questioning the roles of certain other county officials influential in the management of the \$6 million a year CETA

Jim Cooksey, Vaughan's immediate superior a head of the county's Planning, Research and Grants Department, acknowledged that federal investigators have talked to him more than once and asked that he turn over records of CETA participants and contracts. He said he has complied.

Federal agents would not talk, saying the investi-

It is improper to hesitate in an attempt to fool an opponent. However, there is nothing wrong in trying to read an opponent's hesitation, although you do so at your own risk. To hesitate at the wrong time against an expert declarer is often the equivalent of exposing your cards! Watch Martin Hoffman, one of Britain's finest card players, at work on this hand from the Caransa Philip. Morris International Team

Tournament in Amsterdam. North-South were overly ambitious in climbing to three no trump. At the other no trump, but that contract was defeated when declarer tried the heart finesse in the hope of collecting either four heart tricks or three hearts

and four clubs. Against Hoffman, West led the king of diamonds and continued with the queen, declarer holding up both times. Now West thought for a while before playing a third

diamond to declarer's ace. Hoffman needed no other clue to the winning line. If West held either the ace or king of spades, he would have had no problem - he would have cleared diamonds because he had a sure entry. So declarer gave up all thoughts of relying on hearts and clubs for the fulfilling tricks and adopted what seemed to be a better line.

He crossed to dummy with the king of clubs and led a low spade. East played low and the jack won. Now Hoffman exited with a low spade, and East was end played. After cashing his remaining spade, he would have to lead a heart or a club, and in either case declarer would have clear sailing after playing low from his hand.

East could have made life more difficult for declarer by rising with an honor on the first spade lead, cashing the other honor and then exiting with a spade. Now declarer would have to take a backward finesse in hearts (leading the jack from his hand and, if covered, finessing against the ten on the way back) to land his con-

Your play to the first trick could decide the fate of the remarked: "There's no such thing as a blind opening lead, only deaf opening leaders!"
