Cabinet vote delays Israeli settlements

JERUSALEM (AP) — Israeli Cabinet members opposed to the settling Affairs and Security Committee of the Knesset, or Parliament. of Jews in Palestinian cities on the occupied West Bank of the Jordan River are taking their case to Parliament after the Cabinet voted 8-6 against them. Three other members abstained

The Sunday vote, calling initially for the establishment of two live-in Jewish schools in the fiercely Arab West Bank city of Hebron, elicited an expression of "bitter dismay" from Egypt and is likely to bring more criticism from the Carter administration.

The vote provoked angry comments from West Bank Palestinians and from Israeli peace advocates. But it was hailed by Israeli ultra-nationalists who consider Hebron and the rest of the West Bank part of God's biblical land grant to the Jewish patriarchs.

Because more than half the Cabinet refused to approve the go-ahead, Prime Minister Menachem Begin agreed to delay implementation of the controversial settlement plan while the opponents appealed to the Foreign

The committee is not expected to take up the matter for several days. But political analysts of the government-run radio and television ser- can't let it go quietly. vices were predicting the panel might reject it. It was not clear what the next step would be if that happened.

The political implication of the decision was the main issue discussed" during the seven-hour debate, Cabinet spokesman Aryeh Naor told reporters. He said supporters of the plan wanted to make it "very clear and very direct" that Jews would not be barred from living on any West

Last month, after an Israeli religious student was shot and killed in the Hebron bazaar, the Cabinet declared that Jews have the right to negotiations on Palestinian autonomy beginning Wednesday in Alexandria, settle anywhere in the biblical confines of "Greater Israel," including Hebron, a city of 50,000 revered by both Moslems and Jews as the burial place of the Hebrew patriarchs Abraham, Issac and Jacob.

It is a "very sad day" for Hebron, said Fahad Qawasmeh, mayor of the West Bank's second largest Palestinian city. "We can't accept this and we

In Cairo, an Egyptian government spokesman voiced "bitter dismay" and called the plan "a new violation of the spirit" of the Camp David peace accords and the U.N. charter.

"I think the decision is an important and positive one," Begin told reporters. But Israeli peace advocates shouted: "Begin Resign, Begin Resign," as the prime minister spoke to correspondents after a meeting with U.S. envoy Sol Linowitz.

Linowitz arrived Sunday to prepare for a new round of Israeli-Egyptian

Begin said he discussed the Hebron decision with Linowitz and predicted it would not interfere with his meeting with President Carter next month,

Could shah's decision affect hostage efforts?

sion of the deposed Shah of Iran to leave Panama and go to Egypt for surgery is a "compassionate problem" that should have no effect on efforts to free the American hostages in Tehran, top Carter administration

Presidential press secretary Jody Powell and national security adviser Zbigniew Brzezinski said Sunday the deposed monarch, Mohammad Reza Pahlavi, made the decision on his own. He could have returned to the United States, they insisted.

However, The New York Times and The Washington Post reported today that administration officials feared that had the former Iranian leader been readmitted to the United States. a new wave of anti-American action in Iran would have resulted.

And the Times said that despite its public statements, the administration believes that the shah's latest move has presented a major setback in efforts to free the approximately 50 hostages.

The shah's admission to the United States for cancer treatment last October triggered the Nov. 4 takeover of the U.S. Embassy in Tehran by Iranian militants demanding that the shah be returned to stand trial for alleged

The 60-year-old shah ended three months of asylum in Panama on Sunday and left the country on a privately chartered plane for Egypt, where he had a long-standing invitation from President Anwar Sadat.

cluding Dr. Michael DeBakes of Houston and Dr. Benjamin H. Kean of New York Hospital Cornell Medical Center, announced Sunday night they will go to Egypt to perform the operation to remove the shah's enlarged and inflamed spleen

Powell said that despite President Carter's dispatch of two top aides. chief of staff Hamilton Jordan and White House counsel Lloyd Cutler, to Panama, "it was not possible to arrange surgery under circumstances satisfactory to all the parties in Pana

Iranian Foreign Minister Sadegh Ghotbzadeh had said that moving the shah from Panama before Sunday's deadline for Iran to present an extradition request to Panamanian officials would delay any possible release of the hostages, now in their 142nd day of captivity

However, both Brzezinski and Powell insisted the shah's departure for Egypt is expected to have no effect on the hostage situation

"I think one needs to look at it as a compassionate problem, not a political problem," Brzezinski said "I believe there would be no connection whatsoever between the illegal detention of the captives and the physical well-being of the shah. The shah is an ill man. He's going there (to Egypt) to get medical treatment. That's all that

Islamic world emphasize hospitality, emphasize compassion for the ill, and I would expect the Islamic world would deal with this problem in terms of these traditions

Powell said only that the administration is continuing efforts to free the

A senior White House official, who asked not to be named, said the shah never asked to return to the United

Need for maintenance explained

élection

EDITOR'S NOTE: This is the second of a three-part series examining the \$3 million school bond issue for repairs and maintenance in the April

> By DAVID CAMPBELL Staff Writer

Midland High School will get some immediate attention should voters pass the \$3 million repair and maintenance bond issue April 5.

However, Tall City citizens have questioned why the school district took so long to rejuvenate the high school - parts of which were built in 1928 - as well as other schools

During the Objectives for Midland meeting in San Antonio, one of the

suggestions stated "Improve, and provide in the annual budget for maintenance of all school facilities as they get older to ensure healthy and pleasant places for student learn-

A STATEMENT by Garland Chapman, assistant superintendent, explained why many classroom buildings constructed in the 1950s needed

During the 1970s, 70 percent of the classrooms reached maturity and were in need of major maintenance, Chapman said.

Unfortunately, inflation during the 70s coincided with the major maintenance demands of the schools, Chapman said, and the general public's attitude "called for holding the line on school budgets, and the administration was instructed to keep costs to approximately 10 percent.

Costs such as transportation, labor, utilities and materials were beyond the school district's control, the assistant superintendent said.

However, "maintenance was an area where conscious choices could control overall budgetary allocation," he said.

CHAPMAN NOTED the school district allocated about a quarter of a million dollars each year in the annual budget for maintenance.

However, "95 percent of our class-room facilities (are) more than 20 years old," Chapman said.

Each year from 1975 forward brought increasing major maintenance needs," he added.

And the quarter of a million dollars budgeted could not handle all of the major maintenance needs. Chapman

said. Therefore, only emergency maintenance could be done.

Should voters pass the \$3 million bond issue, repairs to Midland schools could start immediately and could be completed within two years, the assistant superintendent predicted.

But, if the bond election is defeated, a series of priority items would be established and included in school budgets for the next three years, said Don Furgeson, business manager for the school district.

And Midland taxpayers could expect a 10-cent increase in the school tax rate, he noted.

CLASSROOM RENOVATION at Midland High School represents \$425,-600, of the \$951,450 to be allocated in bonds for the high school according to the school district's list of major repair and renovation items.

And, of the \$425,600, \$220,000 will be assigned to window and wall renovation of classrooms, the list noted.

"A lot of the metal work on the windows is deteriorating and rusting," Chapman said, "and some can not be closed too securely or are

The metal parts are exposed to the sunlight and start generating heat in the classrooms which makes it uncomfortable for students and teach-

ers, he noted. Current incandescent lighting in Midland High School would be re-

placed by flourescent lights, the assistant superintendent said.
"The wall, window and lighting renovations will save energy and de

Midland man, 43, dies in accident near Tahoka

TAHOKA - A 43-year-old Midland man died in a one-car accident about 9:30 p.m. Saturday on U.S. Highway 87 near Tahoka, according to the Da-

partment of Public Safety. Dead is Robert Frank Donley of North D Street in Midland.

According to a DPS spokesman, Donley was driving north on U.S. 87 As he approached the intersection with FM 400 in Lynn County, his vehicle went off the road on the right side and hit a guardrail. The car turned onto its side and slid along the guardrail and under the overpass at the intersection, reported the DPS.

Donley's car then hit two concrete support pillars, continued to slide past the overpass and finally overturned onto its top. Donley was pronounced dead at the scene by Tahoka Justice of the Peace Ed Hamilton. The accident was investigated by Trooper Gerry Griffin.

may get their freedom today

Five hostages in Colombia

BOGOTA (olombia (AP) . Co bushing acv papers quoted govern ment source is saying five of the 32. histories held by guerrillas in the would be freed after negotiations for the guerrillas in the first five

The names of the five were not iver, and there was no confirmation of the sports, which appeared in the to wsp spers Sunday.

The hostages include U.S. Ambas sador Diego Asencio and 18 other foreign diplomats. The talks today will be the first direct negotiations between the government and the cuerrillas in 11 days. Like the other five rounds, they will be held in a van parked missie the embassy seized

major issue is the guerrilla demand that 2% political prisoners be released from Colombian jails. The secrement his taken the stand that

The participants were to be Deputy. Foreign Ministers CaMilo Jimenez and Ramiro Zambrano. The same ex of the Dominican Republic - masked woman who has negotiated rounds of talks was expected to bargain for her comrades, accompanied by Mexican Ambassador Ricardo Galan, who represents the hostages.

The government has publicly taken the stand that it will only offer the guerrillas safe conduct out of the country in exchange for the freedom of the hostages. It also has pledged not to resort to violence unless the lives of the hostages appear to be in immediate danger from their cap-

The last hostage to be freed by the guerrillas was Austrian Ambassador Edgar Selzer, who was released March 6 so he could be with his wife. who is seriously ill in Vienna.

Live non diplomatic hostages were there are no political prisoners in freed March 2, apparently because Colorables and the release of common the guerrillas thought they were of no dd by a violation of the bury ching value

Budgeting measures of 70s blamed for big repair need (Communed from Page 1A)

assolutions costs," he noted

RESERVOOM RENOVATION at viidland High will be allotted \$109, soo since most of those facilities are a part of the 1928 section of the school,

New restroom fixtures and lower ing the criting will be included in the remodeling, he noted

Wind as in the school's auditorium would be filled making a solid wall iside that portion of the building, Chapman said, in addition to replac ng faults furniture

de toofing the high school would cost the taxpavers \$112,000, the list noted However, most of the school building in the district would be in coded in the re-roofing process, he

Very little has changed in the high school's science laboratories, Chapman said, since most of the equipment is stationary and cannot be easily moved

A lot of the science equipment is 30 to 40 years old and needs to be replaced." he said

Renovation of the swimming pool would include an automatic chemical feeder and replacement of filter tanks and boiler, Chapman said, since the pool is a major investment and needs to be maintained

Cost of the pool renovation would be \$52,250, he added

Replacement of classroom furni ture would cost the taxpayer \$11,400. Chapman concluded

Life expectancy of the completed repairs and renovations is unknown. the assistant superintendent said, because environmental conditions such as weather and normal depreciation have varying effects

Tuesday: Other repair and maintenance items of the school district.

Chance of thundershowers in Midland weather forecast

Midlanders could see something other than sand in the sky Tuesday, the weatherman said.

Skies should become partly cloudy by tonight, and Tuesday has a 30 percent chance of thundershowers, according to the National Weather Service office at Midland Regional

Low tonight should be near 40 with Tuesday's high in the upper 60s.

The area also may get a respite from the winds, as the weatherman is predicting relatively gentle southerly breezes at 5-10 mph tonight.

Sunday's high was 65, well below the record high for the date of 85 set in 1972. The overnight low was recorded at 30, only slightly above the record low for today of 28 degrees set in

If the weatherman's 30 percent longshot pays off, the thundershowers could up the monthly total from a mere trace and increase the annual accumulation of .78 inch.

Patchy fog was reported in extreme Southeast Texas today, and drivers had to take it easy on snow-covered streets and highways on the opposite end of the state, in the Texas Panhan-

Early morning temperatures ranged from the 20s over the northern Panhandle to the 30s over West Texas, the 40s and 50s over North and Central Texas and the 60s and low 70s over south and southeastern portions of the state.

Variable high clouds, especially along the gulf coast, kept nighttime temperatures on the warm side.

No precipitation was in today's forecast. Temperatures headed toward expected afternoon highs in the 80s in extreme South Texas and in the 60s and 70s for all of the rest of the state except for the Panhandle.

Investigation under way in fire in paper mill that killed seven

COVINGTON, Va. (AP) — Federal and state authorities were to interview witnesses today as they began an investigation of a fire inside a bleach tower at the Westvaco paper

mill that killed seven persons. Investigators from the Virginia Department of Labor and Industry and the U.S. Department of Labor planned to talk to witnesses and company officials and inspect the mill in an effort to learn what happened early Saturday.

Inquiries also are planned by Westvaco; International Reinforced Plastics, a South Carolina-based company that employed the seven vicitms; and the safety committee of the United International Paperworkers Union Local 675, which represents many Westvaco workers.

Candidates not talking' about a lot

By The Associated Press

Ronald Reagan wasn't talking out parity, a key issue in the Midest. He didn't know enough about it, explained to farmers.

George Bush wasn't talking about inion potts, especially one unfavorole to him. The "new me" only scusses issues, he said.

John Anderson wasn't talking to at least not replying to — Gov. dmund G. Brown Jr.'s debate chal-

And Edward M. Kennedy was still t talking — despite the continued estions — about getting out of the ce for the Democratic presidential

mination. All that "not talking" did not make

silence in politics, of course. The candidates were headed into eir last day today before crucial imaries in New York and Connecti-

, and they had a busy weekend. Carter swamped Kennedy in anner round of caucuses, these in Virnia, and a new poll showed the esident and Reagan would be runng about neck and neck if they were nominated

BUSH WAS TO deliver a major address at Yale University today. Reagan was headed for New York, where Kennedy was already campaigning And Brown and Anderson were in Wisconsin, where Republican Anderson was not replying to the challenge the Democrat issued on the theory that both were appealing to the same

moderate voters Voters are not bound by party regis tration in Wisconsin, and Anderson has appealed openly for Democrats and independents to cross over and vote in the Republican primary

Brown said he wanted Anderson, who has participated in Republican debates, to defend his support of nuclear energy, the neutron bomb and his "negative tabor record."

Reagan's surprising remark about parity came at an "agricultural day" held in Wichita, Kan, right in the Midwest's farm heartland

Asked whether he favored 100 per cent of parity, Reagan replied: wish I could answer the question for you that I know is a technical question, 100 percent of parity. I have to confess to you that I am not as famil iar with some things as that

FARMERS FAVOR 100 percent of parity, which with federal subsidies would put their purchasing power at the same level they had after World War I. Reagan told the group in Wichits that he would seek farm leaders advice on the best way to end farm ers' cost price squeeze and Wit is 100 percent of parity, yes. I'd support

He later told reporters "maybe I know more about it than I indicated in there and that 100 percent of party "could create" an enormous govern ment subsidy

Asked why he hadn't said that to the farm audience, Reagan replied, "I said as much as I needed to say, that I didn't know enough about it to fully discuss it, and I'm saying that

As Reagan campaigned Sunday in Kansas and Oklahoma, Bush stumped Connecticut and was asked about a poll that showed him trailing the California governor in the state where Bush grew up and has family political

BUSH DIDN'T want to talk about the poil, which showed Reagan with 24 percent, Bush with 17 percent, Anderson with 12 percent, but by far the largest number of Connecticut

voters, 43 percent undecided. "I'm the now guy that's talking only about issues," he told reporters. "I don't care what it shows. I couldn't care less. It's the new me. I'm going to plug ahead in Connecticut, Wisconsin and Pennsylvania

Kennedy, meanwhile, also seemed to be looking the other way from recent polls showing him running far behind Carter in New York, which will award 282 Democratic convention delegates in its primary Tuesday

"I believe we're going to do well," Kennedy said Sunday. And asked what he'd do if he lost New York, he said: "I'm going to stay in the

CARTER CAPTURED 59 of Virginia's 62 convention delegates in caucuses Saturday. That gave the president 535.3 of the 1.666 he needs for the Democratic nomination, and Ken-

Reagan had 206 of the 998 needed for the Republican nod. Bush had 47 and Anderson 39.

Psychics favor Kennedy, 7-3

NEW YORK (AP) - Sen. Edward M. Kennedy pointed to a newspaper article that reported seven out of 10 psychics predicted he would win the Democratic presidential nomination and jokingly said: "And you want to know what keeps me going."

The question has been a continual one through a long string of losses to President Carter and seems even more important now that polls show him losing again in Tuesday's New York primary.

At least two of his top campaign aides are understood to be ready to tell him he should drop his candidacy if he loses by a wide margin in New

It took more than 50 firemen to control the blaze that engulfed the building "from top to bottom.

Carter's Israeli stumble doesn't appear to give New York to Teddy

administration's stumble over Israeli policy does not seem to be turning the tide for Sen. Edward M. Kennedy in heavily Jewish New York, with its high-stakes primary Tuesday. When on March 1 the administra-

tion voted for a United Nations resolution condeming Israeli settlements on occupied land, it seemed almost a heaven-sent gift to Kennedy's faltering campaign.

Jews make up one-third of the New York primary vote, and Kennedy partisans began dreaming that the gaffe could help them score an upset in the New York primary, with its 282 Democratic convention delegates.

There is evidence of anger about the U.N. vote by Jewish voters. Vice President Walter Mondale; campaigning for the president here Sunday night, faced angry shouts and boos when he addressed a crowd of 1,200 at a dinner sponsored by Young Israel, an Orthodox group.

'We will stand by Israel forever," Mondale said. 'We don't believe you!" shouted a voice from the crowd.

But despite the anger and the heavy campaign attention paid the U.N. vote, it appears Kennedy has not gained enough from the administration's flip-flop.

The only published poll on the subject suggests that even though most Jews are angry with Carter, the ma-

NEW YORK (AP) — The Carter jority will still vote for him. And some Jewish leaders agree that the anger over the vote will not turn into votes for Kennedy "To vote against Carter for that,

> you have to have somebody to turn to. But Kennedy just does not have credibility as president," says State Assemblyman Mark Siegel, a Manhattan Jew and a reform Democrat of the kind normally associated with Ken-

> A Lou Harris poll of 800 Democrats statewide done for the New York Daily News last week found that by a margin of 79 percent to 20 percent, Jews give Carter a negative job rating. And by a 60-27 margin, they do not believe his explanation for the

than the 61-34 Carter lead for the voters as a whole, but suggests that Kennedy had a long way to go in turning the Jewish vote into an

Why the lag between anger at Carter and support for Kennedy?

"People don't see Kennedy as the solution," says Malcolm Honlein, executive director of the Jewish Community Relations Council of New York. "You could say it is a matter of trust.'

The Massachusetts Democrat has nonetheless been trying to make the

He taped television commercials declaring that "never again" must a president make such a mistake. Never again" is the motto by which Jews condemn the Nazi holocaust.

most of the isssue

And Kennedy visited a Jewish neighborhood in Brooklyn and a synagogue in Manhattan on Sunday to hammer home the issue.

He declared that the U.N. resolution was "basically a broad-scale attack on the state of Israel. The U.S. should have no part of it."

not believe his explanation for the U.N. vote.

But the Jews counted in the poll nonetheless favored Carter over Kennedy by a 51-41 margin. That's closer

Swedes vote to back completion of ambitious nuclear energy plan

STOCKHOLM, Sweden (AP) — Nearly 60 percent of the Swedes voting in a referendum backed completio.. of the nation's ambitious nuclear energy program despite the Three Mile Island nuclear accident in the United States that prompted the na-

tional showdown vote. Final returns from Sunday's vote had 2.72 million Swedes, 58 percent of those voting, endorsing a 1975 government plan to put six more nuclear power plants into operation, while 1.8 million, or 38.6 percent, voted to shut down the six nuclear generators already in operation within 10 years. Another 3.3 percent of the voters cast blank ballots.

A total of 74.3 percent of the nation's 6.3 million eligible voters cast ballots, far below the 90 percent who voted in the 1979 general elections.

The future of nuclear energy became something of a national obsession following the nuclear accident at the TMI reactor in Harrisburg, Pa., a year ago this week. Center Party Prime Minister Thorbjorn Falldin won office last year on an anti-nuclear ticket and campaigned hard to scrap nuclear power through the ref-erendum. However, after the vote he promised he would abide by the na-

tional consensus "I don't think the other parties could ignore such a big opinion," he

The Communist Party and environmental groups, which joined Falldin's Centrists in a "peoples' campaign" against nuclear power, said they would continue to fight it despite the

Tough steel workers weep as plant closes for good

YOUNGSTOWN, Ohic (AP) - As 20 steam whistles blew and the last 7,-800-pound ingot turned into steel bars. steelworkers wept as they left their jobs at U.S. Steel Corp.'s Ohio Works.

"I was one of many men who had wet eyes during that last 15 minutes, said Ron Dillon, the plant's last working turn foreman. "Those who didn't shed tears had lumps in their

· "It was amazing. The whistles blew and years of great experiences passed through your thoughts. Only the good things passed by, none of the

Raymond Watkins pocketed three wooden control knobs as souvenirs to symbolize the years he and his father spent at the plant. 'My daddy, Dave, worked here 45

years, and when he retired in 1971, I got his job as transfer operator. These are the tools of our job." The last ingot was turned out Saturday at the 90-year-old Ohio Works, which is being shut down by U.S. Steel. The shutdown came a day after

U.S. District Judge Thomas D. Lambros rejected a bid by United Steelworkers union locals to block the closing of the mill and the company's nearby McDonald Works. At stake were 3,500 jobs.

Andy Berroteran, who helped roll the final ingot of steel, said, "I had a lump in my throat. It had to be the most emotional thing I have ever been through.

"I can remember 31 years ago when started here, the old-timers would tell me about this or that happening. Now I have something to tell."

Lambros said he could find no basis

in law for ordering the country's leading steelmaker to keep its Youngs-town-area mills running but he ordered the facilities be kept in operable condition for 60 days to give workers a chance to try to buy them.

The federal government has been asked to put up \$50 million in loan guarantees to back a worker-community takeover of the mills. Lambros withheld ruling on an antitrust com-plaint by steelworkers against U.S. Steel until after the 60-day period.

U.S. Steel Chairman David Roderick has said that he will not sell the plants to any federally subsidized competitor. "Since the plaintiffs (the Steelworkers) intend to obtain a federal subsidy ... Roderick's statements appear to be a refusal to deal," the judge said.

Hinting he, too, may not have given up the fight altogether, Falldin said he would continue to keep a close watch on nuclear plant safety, and raised doubts about the activation of two of the four additional reactors

that have been completed.
"They lack a waste processing contract," he said.

Falldin's coalition partners, the Liberal and Conservative Parties, supported nuclear power and their spokesmen expressed confidence the "yes" vote would put an end to politi-

cal wrangling over nuclear policy.

Sweden has put six nuclear reactors into operation since it began construction five years ago. Four other plants have been completed and are awaiting start up, while two more are

under construction. The six working reactors now provide 22 percent of the nation's electricity.

Voters in the referendum were faced with a complicated ballot that

left them no way to support unrestricted use of nuclear energy or an immediate shutdown of the nation's

Supporting Martin Allday's bid to be Mayor of Midland in the April 5th election are Debra Steele (center) and Mrs. Jack Steele (left). Debra said "This is my first election since I turned 18. I am excited that I will be able to vote for Mr. Allday for Mayor. I've known him a long time, and I know he knows Midland and has worked hard for it. He has good ideas to make Midland an even better place to live. While I am off at college he's the one I want to leave in charge. "Mrs. Steele added, "I'm staying here so what Debra said goes double for me. Martin Allday has the experience and certainly the enthusiasm for the office. He is a fair man so I know he will work for the best interest of all Midlanders."

Lake Elsinore residents hold their breath as water continues to recede

LAKE ELSINORE, Calif. (AP) - season again rolls around. While not letting down their guard, city officials and hundreds of homeowners are breathing a sigh of relief and looking toward restoring their water-logged community as Lake Elsinore continues to recede.

Nonetheless, the town's problems may be far from over. Because the lake is so swollen, federal emergency officials in the area already have warned residents that more flooding could occur next fall when the rainy

Lake Elsinore's waters finally began receding over the weekend. It had bulged to twice its normal width by runoff from this winter's storms including a nine-day series of storms

and rain in February.

Private property damage from the floods had reached \$25 million, Riverside County officials said.

Reaching a peak of 1,265.72 feet above sea level Friday, the lake dropped 0.04 of a foot Saturday and

three-quarters of an inch, Mayor Nap Harris said.

"We have crested, unless there is more rain or drastic snow," he said.
But, he added, "We're still a little
bit nervous. We haven't let our guard down yet. We've been happy and thought we'd licked this before and

been wrong.' Harris said that if snow in the San Jacinto Mountains melts too fast, the runoff could force opening of the

another 0.02 foot Sunday, or about Hemet Dam floodgates, sending three-quarters of an inch, Mayor Nap water into Lake Elsinore's 770-

square-mile watershed. Still, the two consecutive days of receding water was the first good news in six weeks for residents of this rustic resort community 65 miles southeast of Los Angeles. Since Feb. 13, they had stood by helplessly as waters crept relentlessly to some 20

feet above the pre-storm level. By last week lake waters were spread out over 7,000 acres, compared

with about 3,500 acres before the storms. Some 650 homes were either damaged or, in the case of about 300 mobile homes, relocated

More than 100 of the homes were inundated, including a number of residences along the pre-flood shoreline

that were completely covered.

It will take a while for things to return to normal. The Army Corps of Engineers estimates it will be April 12 before the water level drops to the 1,265-foot mark, the threshold point for major flood damage.

Phil Cogan of the Federal Emergency Management Agency added that the lake is not expected to reach the 1,260-foot level until Sept. 12, when next year's rainy season will be on the

"So if we have a fourth wet year, it will be bad news for Lake Elsinore because it will already be at a significantly higher level," Cogan said.

Furr's Gold Bond Super Discount Specials program gives everyone a chance to buy the most popular foods at incredibly low prices each week! Here's how it works For every dollar you spend at a Furr's Supermarket you'll receive one Gold Bond Ten Stamp (Excluding liquor and tobacco purchases). Once you've gathered 30 Ten Stamps, paste them in your Super Saver Booklet, which is

available in each store. One filled booklet entitles you to one Gold Bond Super Special. There are five new ones to choose from each week:

Hugs, kisses and humor mark the end of strike of Kansas City firemen

KANSAS CITY, Mo. (AP) - "Welcome Home, Ex-Con," said one sign greeting the 71 firefighters pardoned by Gov. Joseph Teasdale and freed from jail as this Midwest city ended its second firefighters walkout in four months with hugs and kisses - and a touch of humor.

Cheering, singing songs and ap-plauding speakers, some 200 fire-fighters, wives and children gathered at a rally near the Municipal Corrections Institution on Sunday as they awaited the men who were jailed last week for defying a no-strike order.

"We're very proud of them," said Lee Donnici, as her husband Gary

was freed Sunday afternoon after the pardons paperwork was completed. The jailing was "like someone putus all in the twilight zone," she said.

"I was falling apart. When the six-day strike ended Saturday, she tied yellow ribbons around an oak tree in the family's yard and bought two bottles of champagne. "It's not a wedding -- but it's going to be a honeymoon," she said.

The pardon was part of a settlement between city officials and union leaders that also called for reinstating 42firefighters dismissed during a 12-day work slowdown in December.

The nearly 900 members of Fire-

fighters Local 42 walked off their jobs at 6 p.m. last Monday after City Manager Robert Kipp refused to reinstate the 42 men.

"I'd hate to go through another ing like this again" said firefighter Tom Chuning, after he emerged from jail. "But sure, I'd do it again, if it was a matter of getting the men

Firefighters began returning to work at the 11 p.m. shift Saturday after voting almost unanimously to approve the settlement worked out during day-long talks with the governor, mayor, city manager, city council and union leaders.

The council had asked the court to

reinstate the fired workers on the condition that firefighters returned to work. Immediately after the vote, Jackson County Circuit Judge Donald L. Masoon ordered the reinstate-

Kansas City firefighters, who had worked since May 1 without a contract, also agreed to a 15 percent salary increase over two years. Under the old contract, they were paid annual salaries of between \$12,-

132 and \$17,982.
As firefighters manned their stations, some 491 Missouri National Guardsmen and 128 Highway Patrol officers began phasing out their cov-

Life under cover often 'harrowing'

By MARGARET GENTRY

WASHINGTON (AP) - FBI agent Joe Yablonsky and his wife had rehearsed the scene they were to play at dinner with a crook. He was portraying a shady character named Bob, and she was to be his girlfriend.

But the cover was almost blown during the drive to the restaurant when Mrs. Yablonsky, startfed by an oncoming car, screamed, "Joe, watch out!"

Reacting quickly, Yablonsky yelled at her, "Don't you ever call me by your first husband's name again!"

The crook accepted the tiff as genuine, and Yablonsky's investigation was saved. Yablonsky, now in charge of the FBI's Las Vegas office, tells

the story as an illustration of the harrowing moments of life As the bureau moves into undercover work in a major way,

officials are discovering that the stress of leading a double life can exact a high toll on the agents and their families. Officials are especially concerned and puzzled about the high

rate of divorce and related family problems among undercover agents. 'The incidence of marital problems is higher with undercover

agents than with other agents, but we don't know whether the undercover assignment contributes to that or whether the problems preceded the undercover role," said Oscar Revell, deputy assistant director of the bureau's criminal investigations

In interviews, Revell, Yablonsky and Howard Teten, a criminologist at the bureau's training academy, discusssed efforts to measure and find ways of easing the stresses affecting undercover agents and their families. Of 7,800 agents, nearly 200 are working undercover, all volun-

teers who have been screened to determine whether they have the flexibility and the knack for fast thinking and glib talk the role may require. Though some agents have encountered family strife, others

"have found that their families became their greatest strength,"

The bureau moved into long-term undercover operations about two years ago, and officials as yet have no statistics on divorces. and other emotional difficulties experienced by agents. But Teten said he and others are trying to gather such information in order to prepare agents more fully for the stress of a double

The officials said many undercover men and women speak of emotional conflicts as they work deeper into their roles and get to know all manner of crooks as three-dimensional human beings.

'This criminal you're trying to put in jail can be the worst guy in the world, but he still loves his mother and takes care of sick kids. There is a conflict between what you're doing and the good things you like about him, and this results in the stress of the guilt you feel about deceiving him," Yablonsky observed.

When agents come out from under cover, stress shows up in still other ways, the officials said.

"There are psychological readjustment problems because they have been used to operating on their own, making snap decisions, living by their wits," Revell said. "When they come back into the office, they face deadlines, procedure to follow, reports to write, and all of that can be frustrating.

Agents who have worked in deep cover for periods of several months or longer are sent to the training academy at Quantico, Va., "for decompression," he added. The transition period may include sessions with a psychologist.

As another means of easing the stress, the bureau assigns a contact agent to each man or woman working undercover. Revell said the contact acts as "the lifeline to the organization," on hand to provide help in case of danger but also to relay office gossip and restore the undercover agent's sense of identity with

Yablonsky, an undercover pioneer who was carrying out such operations on a small scale even when J. Edgar Hoover was director and frowned on such tactics, estimates that no more than 1 percent of all law enforcement officials are capable of doing such work well.

It takes "a unique breed...with outstanding ability to think quickly and respond to shifting scenes and situations," he said.

Two die in offshore explosion

GAEVESTON, Texas (AP) - An offshore drilling platform exploded in flames early today in the Gulf of Mexico, killing at least two persons and leaving five others missing and feared dead, an oil company official said. He said nine men were injured.

All 42 crew members who had been aboard the platform were taken by boat to another drilling platform five miles away, where they were met by two helicopters carrying medical teams. One was sent by the Coast Guard, the other by Pennzoil, the company that operated the platform.

Authorities said the cause of the explosion was under investigation.

The Coast Guard helicopter trying to transport the most seriously injured to John Sealy Hospital in Galveston had to be tied to the platform to keep from being blown overboard into the Gulf.

About 7: 15 a.m., seven hours after the explosion, the helicopter risked the turbulence and safely got off the

"We're moving the four most seriously injured first, and we're leaving five more that we'll go back after," a Coast Guard official in Galveston said.

The drilling platform was operated by Pennzoil for a

group of several owners and was about 100 miles southeast of Galveston.

Of the 42 aboard the platform at the time of the explosion, only one was a Pennzoil employee. The others were contract workers from Pool Offshore Co., headquartered in Harvey, La., said Bob Harper, a public information officer for Pennzoil who reported the deaths and injuries.

"We really have no idea what caused the blowout," Harper said. "There were 42 on the platform at the time of the blowout.'

The dead, the injured and the 26 who escaped injury got off the platform via two "evacuation capsules," which Harper said "look a lot like flying saucers."

"Our boats picked them out of the capsules," he said. "We had a 185-foot-long work boat and a 90-foot-long standby boat at the rig. That's standard procedure."

The capsules, which Harper said can hold 28 persons each, are completely sealed and have a small power unit aboard that allow persons inside to lower the unit into the water and then to move at relatively slow speeds through the water.

Harper said the drilling bits were about 2,500 feet deep when the blowout occurred, he said.

Field operations reported in Basin

Field operations have been reported in several West Texas counties. Energy Resources Oil & Gas Corp., Dallas, No. 2 E. W. Williams is a 3,350-foot project in the A.F.G. (Clear

Fork) pool 16 miles north of Post. The drillsite is 7/8 mile northwest of one of the pool's three wells and 467 feet from north and west lines of section 112, TRRR survey, abstract 1,009. Ground elevation is 2,489 feet.

COULTER PRODUCERS

Three wells, the third, fourth and fifth, have been potentialed in the Coulter (Spraberry) field of Garza County. All were completed by the Wil-Mc Oil Corp. of Dallas. They are 12 miles southwest of Post.

No. 2-A J. F. Lott, one location north of other Spraberry production, finaled on the pump for 28 barrels of 39.8-gravity oil, plus 107 barrels of water, through perforations from 5,-286 to 5,306 feet.

The pay was acidized with 1,000 gallons and fractured woth 30,000 gal-

Location is 733 feet from north and 467 feet from east lines of section 13, block 1, Jasper Hays survey, abstract

No. 3-A J. F. Lott, one locaton northwest of production, completed for a daily pumping potential of 25 barrels of 40.1-gravity oil and 56 barrels of water, through perforations from 5,284 to 5,328 feet.

The pay was acidized with 1,500 gallons and fractured with 30,000

Wellsite is 733 feet from north and 1,667 feet from east lines of section 13, block 1, Jasper Hays survey, abstract

Wil-Mc No. 6-A Lott, 5/8 mile north of other Spraberry production, potentialed on the pump for 65 barrels of 39.8-gravity oil and 100 barrels of water, through perforations from 5,-268 to 5,286 feet. The zone was acidized with 6,000 galons and fractured with 30,000 gallons.

Location is 467 feet from south and east lines of section 17, block 30, T-7-N, J.V. Massey survey, abstract

DICKENS COUNTY

Moran Exploration Inc., Midland, No. 1 Edwards is a new 4,700-foot test in the Duck Creek (Tannehill) field of Dickens County, 4.5 miles southeast

The location is 467 feet from south and 1,980 feet from east lines of section 230, block 1, H&GN survey, ab-

The site is one and one-eight miles northeast of the two-well field.

ANDREWS OFFSET

Exxon Corp., operating from Midland, will dig No. 7 Georgia B. King as a north offset to one of the seven-wells in the Deep Rock (Devonian) field of Andrews County.

It is six miles west of Andrews and 2,100 feet from north and 1,850 feet from east lines of section 11, block A-46, psl survey, abstract 1962. Contract depth is 10,800 feet.

BORDEN AREA

Amerada Hess Corp. No. 11-RA W. Ed Murphy has been spotted as a 6,100-foot project in the five-well Von Roeder (Wolfcamp) pool of of Borden County, 13 miles west of Ira.

The location is 660 feet from south and west lines of section 93, block 25, H&TC survey.

TERRY PROJECT

S. E. Cone Jr. of Lubbock No. 1 D. L. Neal is a new 3,600-foot project 7/8 mile east of production in the Becker (Yates) field of Terry County, 3.5 miles southeast of Wellman.

It is 330 feet from north and 933 feet from west lines of section 65, block DD, J. H. Gibson survey, abstract

Ground elevation is 3,290 feet.

CRANE STEPOUT

Bruce A. Wilbanks of Midland No. 2 Jax is to be drilled 1/2 mile southwest of the lone producer in the Tucker (lower Clear Fork) field of Crane County, five miles northeast of Impe-

It is 1,982 feet from northwest and 360 feet from southwest lines of section 20, block 3, H&TC survey. Contract depth is 4,500 feet.

COKE RE-ENTRY

Hulen H. Lemon of Midland will re-enter and clean out to 6,000 feet for completion as the second well in the Weaver Ranch (Strawn) field of Coke County, six miles southwest of Robert

The project, No. 1 Storey Creek, is 660 feet from north and west lines of sectin 11, GWT&P survey.

It is one and seven-eighths miles

northwest of the pool's only pro-

The project was abandoned in 1956. It will be cleaned out to 6,000 feet.

CROCKETT RE-ENTRY

J. Cleo Thompson, Dailas, will dreenter and deepen to 10,000 feet the former Texas Oil & Gas Corp. No. 1-H Williams, wildcat failure six miles notheast of Oona in Crockett County.

ABandoned in 1977 at 9,200 feet, it is 1,980 feet from south and east lines of secton 78, block GH, GC&SF survey and 5/8 mile north and slightly west of the only well in the Parker-Harrell (Ellenburger) field.

CROCKETT OUTPOSTS

WSW Operating, Inc., Dallas, will drill two projects in the Simpson (Seven Rivers) field area of Crockett County, and Golden Petroleum Corp., Dallas, will drill another project in the area.

WSW No. 1-3-C Scull is 1.5 miles southwest of production and 1,667 feet from soth and 2,330 feet from west lines of sedtion 3, block 1, GC&SF survey. Contrct depth is 3,500 feet and ground elevation is 2,276 feet. It is 29 miles northwest of Ozona.

WSW No. 1-6E Big State Ranch, is 1/2 mile southwest of producton and 1,015 feetfrom south and 2,210 feet from east lines of section 6, block 1, GC&SF survey. Contract depth is 2,-500 feet and ground elevation is 2,210

Golden Petroleum No. 1-3-B Scull is 3/4 mile south of Simpson production and 33 feet from north and 1,665 feet from east lines of section 3, block 1, GC&SF survey. Ground elevation is 2,560 feet.

FISHER PROJECT

No. 1 J. O. Hudnell is to be drilled Rotan (Flippen sand) field of Fisher reports final Drillsite for the 4,100-foot project is

950 feet from noth and 2,150 feet from east lines of section 124, block 2, H&TC survey.

IRION PROJECT

W. R. Hughey Operating Co. of Tyler will drill No. 1 Gertrude Farrington as a 1/2-mile south stepout to the Christ (Canyon 6800) field of Irion County, 3.8 miles southwest of Mert-

The 7,200-foot test is 3,110 feet from north and 467 feet from west lines of section 80, block 1, H&TC survey. Ground elevation is 2,320feet.

FORTUNE PROJECT

Fortune Production Co. of San Angelo staked No. 4-D Winterbotham as a north offset to Cany D oil production in the Irion County portion of the Dove Creek multipay field of Irion County.

It is nine miles southeast of Mertzon and 1,980 feet from north and 660 feet from east lines of section 31, block 21, H&TC survey.

Contract depth is 6,800 feet and ground elevaion is 2,406 feet.

MITCHELL WELL

The Jameson, North (Ellenburger) field of Mitchell County gained its fifth producer with completion of Sun Oil Co. No. 13-C V. T. McCabe, four miles north f Silver. On 24-hour potential test it pumped

224 barrels of 50-gravity oil and 101 barrels of water, through perfora-tions from 7,064 to 7,126 feet after a 5,000-gallon acid treatment.

Wellsite is 1,160 feet from south and 2,590 feet from east lines of section 4, block 1-A, H&TC survey. It will be dually compelted from the

TOM GREEN WELL

Indian Wells Oil Co., Ozona, No. 2-58 Probandy has been completed in the Probandt (Canyon oil) pool of Tom Green County, 23 miles northwest of

It completed for a 24-hour flowing potential of 146 barrels of 42.9-gravity oil and two barrels of water, through a 1/4-inch choke and perforations from 7,112 to 7,150 feet. The gas-oil ratio is 774-1.

The pay was treated with 3,500 gallons of acid and fractured with 60,000

Location is 660 feet from nothand 853 feet from west lines of section 58, block 7, H&TC survey.

MIDLAND RE-ENTRY

Enserch Exploration of Midland will re-enter a former Azalea (Devonian) field producer 10 miles east of Midland in Midland County and attempt completion from the Spraberry Trend area (Dean-Wolfcamp) field

The project is No. 1-C Ida Mae Oldham, 660 feet from south and 1,980

feet from east lines of section 46 block 37, T-1-S, T&P survey. Total depth is 11,360 feet. It will be tested above 9,178 feet.

Gas savings may be near

WASHINGTON (AP) - About 43 million American households will save an average of \$25 per year on their natural gas bills, thanks to the Federal Energy Regulatory Commis-

The commission approved a proposal Thursday to soften the impact of rising natural gas prices by making industry soak up most of the in-

FERC Chairman Charles Curtis said most homeowners won't actuallyget lower bills. Instead, he said, What we are actually talking about is a limitation on the increases.' The new rate structure, including a

\$750 million series of price hikes for industry, takes effect in April, unless either house of Congress objects. The action arises from the 1978 decontrol of natural gas prices and a congressional mandate that industry,

not private customers, absorb most of By putting the price hikes on industry, FERC officials said, the 43 million home customers who get their gas from interstate pipelines would save about 15 cents per thousand

cubic feet: That means an annual savings of \$25 for the average homeowner, who uses about 170,000 cubic feet of gas

Chalmers Operating Inc. of Abilene Hidalgo test

FORT WORTH - American Quasar Petroleum Co.'s Raymond Gee Gas Unit No. 1 on the West Edinburg prospect in Hidalgo County, has been tested as a gas-condensate discovery in the Frio sand.

On a six-hour production test, the well flowed gas at the rate of 1.45 million cubic feet, plus 148 barrels of 58-gravity condensate per day at an interval from 8,802-8,816 feet.

The test was on a choke opening of 8/64-inch, at a flowing tubing pressure of 3,480 pounds per square inch and a shut-in tubing pressure of 4,150 pounds — for a calculated absolute open flow of 5 million cubic feet of gas per day.

American Quasar, along with its Can-Am 1979-2 limited partnership, has a working interest in the well of 58.3 percent, GS Oil & GasCo. has 25 percent, Moore McCormack 11.1 percent and Hamilton Exploration Co. approximately 5.6 percent.

There are about 950 gross undeveloped acres inthe prospect area.

Oklamoma strike made

DALLAS - Natural Resource Management Corp. announced it has completed a natural gas discovery well in Beaver County, Okla.

The strike No. 1 Lula, flowed at rates in excess of 2 million cubic feet per day from upper and lower Morrow sands.

It made 2,123,000 cubic feet per day from perforations from 7,215 to 7,222 feet in the upper Morrow and perforations from 7,583 to 7,591 feet in the lower Morrow. A 50 percent working interest in this

well is owned by Natural Resources Management and its NRM 79-2 Drilling Program. Certain other independent oil and gas operators own the remaining 50 percent interest in the

Testimony

TAMPA, Fla. (AP) — The Marine Board of Inquiry turns its attention next to 8,500 pages of testimony and 250 exhibits as it tries to piece together what happened the night of Jan. 28, when the Coast Guard Cutter Blackthorn and the oil tanker Capricorn collided in Tampa Bay.

Six weeks of hearings have produced conflicting testimony from offi-cers and crew of the two vessels and even differing positions among experts and consultants summoned by the board to help shed light on the crash that killed 23 Coast Guardsmen.

gain sites for wildcat tests one location south of production and 467 feet from south and 2,173 feet from

Wildcat operations have been spotted in Borden, Hockley, Kent, Garza, Crockett, Sutton and Runnels coun-

BUSINESS MIRROR

Consumers get message on borrowing, spending

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) — We consumers have received the message: We have been borrowing and spending excessively, buying everything in sight, and now Uncle Sam, our rent-free boarder, will teach us some disci-

No, we haven't managed well. That's obvious. Otherwise, the woman of the house wouldn't have had to take that part-time job. And look at how we've depleted our savings accounts. And gone into debt

"It has got to stop," says Sam. "The way you've been squandering makes me worry about the very roof over my head. You're endangering my lifestyle, to which I have grown accustomed to and comfortable

Is it too much for consumers to understand, he asks, that they must learn to live within their incomes? "I've tried to enforce discipline by raising taxes and lowering real takehome pay. But you don't learn.'

To aid you in correcting your ways you might like to score yourself on this test.

Q. Have consumers been overspending? A. It's hard to give a concrete an-

Most economists think that the percentage of take-home pay that must be used to repay installment loans has grown too high. It is now around 22 percent, compared with 15 percent or

so a decade ago. In addition, many families have run up huge mortgage loans, topped in some instances by second mortgages.

It's dangerous But that isn't to say that consumers are overspending in the sense that they choose to buy items they could do without. There is a real question of whether that high percentage is being

forced on them. That is, some of the debt might result from necessity rather than choice. It might be the only way some families can maintain their lifestyles, and maintenance of a style, remem-

ber, is very, very American. Q. Is there support for this conten-

A. Some. Inflation and higher taxes, the latter a consequence of higher Social Security costs and bigger tax brackets, have eaten into the amount

of income available for personal use. Personal taxes as a percent of personal income rose to 11.3 percent last year and continues at that rate in 1980, compared with 9.5 percent in 1976. That's one point below the high-

est level in World War Two. Official and well publicized tax cuts in the 1970s returned to the typical family only about one-half of what was lost to rising prices. The rest went to support Uncle Sam's spendng. And Sam's a big spender.

Last year, all government expenditures as a percentage of private sector Gross National Product rose to 47 percent, or nearly double that of 1948. To manage that, the old boy went deeper and deeper into debt.

In just the decade of the 1970s his debt rose by \$400 billion or so, and it continues to rise today. The federal budget has been balanced only once in a dozen years, and never under Presi-

Q. If the federal government can't live within its income, what does it

A: It does what it doesn't want you to do - it borrows. Uncle Sam has a cozy relationship with bankers; he gets first call on the money. Frankly, he doesn't like your competetiion in that market.

Right now he's borrowing as he never has before. Between March 13 and April 2 he'll raise \$41.1 billion, almost \$20 billion of that in new funds. The rest will be to redeem debts made previously

What it amounts to is this: Uncle Sam is crowding out other borrowers, you and banks and corporations and educational institutions and on down

Q. With so many borrowers dependent on borrowing, won't this make times very difficult for them?

A. Undoubtedly. Some families are going to really learn what it means to cut to the bone. Some small businesses might go bankrupt. There could be failures among savings banks, and crises at others.

Q. It looks like tough times. A. For you, yes. But for the old

59% of Used Harnitare Buyers Are you in the market for some new or used furniture? Or do you simply want to sell what you presently have? In either case, discover the huge marketplace found in the Classified section of this. Statistics reveal that thou sands of Classified readers shop the general merchandise columns daily. Archaeologists hope to raise Henry VIII's sunken flagship

hope to hoist Henry VIII's long-buried flagship, the Mary Rose, from the silt of Portsmouth harbor by June 1982, according to an excavation team.

The Mary Rose keeled over and sank while engaging the French in 1545 and Henry VIII is said to have heard cries from the drowning mariners as he watched from shore.

The wreck was discovered by amateur divers in 1967. The Mary Rose Trust was set up last year with Prince Charles, heir to the British throne, as its active president. He has already made one dive down to the remains.

Marine archaelogists consider the vessel both a "time capsule" of Tudor life and historically important because it may reveal the missing link in the development of naval warfare from the Vikings to Nelson's "Vic-

Its keel was laid in 1509, when ships were little more than traveling fortresses that enjoined one another with grappling hooks before hand-to-hand combat. The Mary Rose, however, may have been the first ship fitted with heavy cannon which characterized later naval warfare. It could also be carrying Tudor longbows and

It is not clear why the Mary Rose

was heeling badly and just keeled LONDON (AP) - Archaeologists over. The French claim they sank it with cannon shot. Evidently Henry believed the former, but before the accident, Vice-Admiral Sir George Carew shouted: "I have the sort of knaves I cannot rule.'

> Margaret Rule, archaeological director of the project, told a news conference in London recently: 'There were perhaps 700 men on board when that ship went down, and in those days before standard issues every man brought everything he needed to survive. We shall find boxes of their personal possessions as well as weapons and all the equipment and spares needed to work a ship.'

> More than 200 divers shortly will begin five months' work probing the silt around the wreck in search of artifacts before any attempt to hoist

> Recovery director John Reid said he expects novel problems in the hoisting operation because one side of the vessel is badly decayed and it lies at a 60-degree angle.

> Reid said it could be lifted by lowering a portable support section to which the hull could be attached after internal strengthening, but he appealed to experts for other suggestions. If raised, the ship is destined to become a museum piece.

Texas Supreme Court reverses trial, appellate courts in Howard will case

Austin Bureau

AUSTIN - The Supreme Court has reversed trial court and appeals court rulings in a Howard County suit contesting the will of Jessie Marie Tate.

Mrs. Tate and her husband had executed a joint will in 1968 leaving their entire estate to each other, or to Mrs. Tate's granddaughter, Rhonda Ray Stevens.

FYIA.

Mrs. Tate inherited the estate upon her husband's death, but changed her will in 1976 to leave the estate to her sister, Octavia Novak.

Stevens sued, but the trial court denied probate of the 1968 will, admitted the 1976 will, ruled the 1968 will non-contractual and refused to im-

press a constructive trust, sought by Stevens, on the estate.

"The appeals court reformed that judgment, holding the trial court lacked jurisdiction to construe the The appeals court assumed, howev-

er, that if the trial court did have jurisdiction, it should not have issued a summary judgment denying the contractual nature of the 1968 will.

The Supreme Court reversed both judgments and ruled that the 1968 will was contractual, that the trial court correctly admitted the 1976 will and that a constructive trust should have been impressed on the estate.

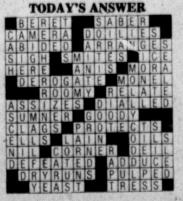

The case was remanded to the trial court with instructions it render a judgment consistent with the Supreme Court opinion

Eggs, poultry increase seen

WASHINGTON (AP) - The Department of Agriculture reports that production of eggs and poultry is expected to increase this year.

Thanks to the large supply, plus large competing supplies of pork, poultry and egg prices are expected to be well below levels of last year.

Turkey prices are expected to re-main well below 1979 levels through-
