# Squeals of delight accompany amusement park opening

Enjoying the slippery slide down Mine Mountain River Ride at Wild River Canyon Wednesday, a youngster holds on tight as she approaches a hairpin curve after zooming through a tunnel on her way to a big splash at the bottom. (Staff Photo by Edward

Before the squeals of excitement, there was a brief moment of hushed silence Wednesday as the gates of the Wild River Canyon amusement park opened for the first time to the public. A short delay for the water to be turned on to the Mine Mountain River Ride left a period of anticipation for both the crowd and the park em-

"I've seen a live birth," Wild River spokeswoman Mary Kay Allman said in an analogy of the occasion. "And this morning as we were waiting for the water to be turned on was the same feeling. We have been in labor on this for some time and this morning it was finally born.

With only a few minor foul-ups, the first day began as a success. By the end of the day, slightly less than 2,000 persons had filed through the gates to have plastic bracelets clipped to their wrists for a full day of excitement at

The Mine Mountain flume was one of the more popular attractions on the first day. Children of all shapes and sizes climbed to the top of the water slide to choose one of three successively more difficult slides to manuever: Mine River, Snake River and (the scariest of all) Wild Fork.

"We just got here," one kid said as he ran by with a rubber mat in his hands. "It's pretty neat, though. It's better than what Oklahoma City has!" With that he was gone, whizzing head-first down the flume.

Ben Glenn, a lifeguard at the flume, said he expected the first day with kids at the park to be fun. "It'll be a blast!" he said. "The water's a little cold now, but you get numb after a while and don't notice," he laughed. Sixth-grader Kevin Witt said he had been at the park only 10 minutes, but he thought the flume was "good

sixth-grader David Martin corrected. They planned to stay all day.

The morning was somewhat gray with raindrops falling occasionally, but to see kids at Wild River, one would never know it.

"If it starts to rain," Ms. Allman said earlier that morning, "there is no real covering, but the park will stay open." There are, however, several awnings over picnic areas, an indoor game arcade, a covered snack bar

# Registration for the draft could start next month

long debate over and Senate approval practically a foregone conclusion, peacetime draft registration of men could resume as early as next

The Senate scheduled a vote on the plan today after opponents gave up their futile fight to derail it with a five-day filibuster and then an allnight session - the first in three years and the 14th this century.

Every indication was that the Senate would join the House in approving President Carter's request for \$13.3 million to register all 19- and 20-yearold men at post offices across the

'An attempt by Sen. Mark O. Hatfield, R-Ore., to kill the bill by tabling it was defeated 61-26 Wednesday - an indication of strong Senate support for registration.

If the House approves a minor amendment, the measure could go to Carter early next week. In that case, the Selective Service System has said it plans to begin registering about 4 million men over two weeks starting in mid-July — one week for those born in 1961 and the following week for those born in 1960.

Men now 18 would register next ? year and 18-year-olds would register each year after that. Failure to register could be punished by up to five years in prison and a \$10,000 fine.

In exchange for agreeing to stop talking after 32 hours, instead of the 100 allowed after the filibuster was broken, opponents were promised a vote today on one last Hatfield amendment. It would cut the funds to \$4.7 million, a point where registration would have to be delayed until the president orders renewal of the draft itself in a war or emergency.

Opponents conceded they expected the amendment to be defeated. The Senate invoked cloture Tuesday, limiting debate to 100 additional hours. When Hatfield vowed to try to

use them all, Senate Majority Leader Robert C. Byrd, D-W.Va., put the Senate in continuous session in an

attempt to wear down opponents. The difference between that and the all-night session in 1977 was that the last one was an out-and-out filibuster, with no end in sight, over deregulation of natural gas. This one was simply running out the cloture clock.

Hatfield forced senators to answer roll call after roll call and then his allies held the Senate floor with endto-end, hour-long speeches both for

and against registration. The talkathon played to an almostempty chamber

Some senators spent the night on cots set up in the cloakroom or on couches in their offices. Many simply went home, trusting an agreement that there would be no votes after 1

There seldom was even a single

Union message last January that he intended to renew draft registration

as one step to show U.S. resolve against Soviet military moves in He also asked Congress to authorize

Carter announced in his State of the

registration of women, but that was rejected by both the House and Senate. The American Civil Liberties Union has threatened to file suit challenging the constitutionality of the

Meanwhile, the House Armed Services Committee, assured by civilian and military leaders that the Army is in good shape despite a shortage of some key personnel, is calling on rank-and-file soldiers for their assess-

# Grand jury to act on Clayton today

HOUSTON (AP) ← Two months ago, Texas House Speaker Bill Clayton spent 10 hours before a grand jury investigating the FBI's undercover Brilab investigation and "answered every question.

That grand jury was expected to decide today whether to file any charges against the veteran lawmaker. The jury has been investigating an alleged insurance kickback scheme revealed after months of investigations by FBI agents and informants

"If I find out they are going to present it (an indictment), my partners and I are going to be at the courthouse to see what happens," said Clayton's attorney, Roy Minton. "If an indictment is returned, we will want to pick it up and bring

After his March appearance before the grand jury, Clayton said, "I answered every question. I did not hesitate in giving answers. I hope we were able to tell our story in such a way that they can see our innocence. The grand jury heard tapes of conversations involving Clayton, labor leader

L.G. Moore and Joseph Hauser, an FBI informant posing as an insurance company representative. Clayton has acknowledged he received \$5,000 from Moore last November at a

meeting in which there was conversation concerning the \$70-million state employees' insurance program. But he said he thought the money was a campaign contribution. Clayton said he put the money in a safe place and planned to return it to Moore, the regional

director of the Operating Engineers and International Union. A package containing \$5,000 was turned over to the grand jury by Minton. The grand jury has questioned at least 14 witnesses, including several labor leaders, two current Houston city councilmen and one former councilman.

The undercover operation began in Louisiana and spread to Texas and several other states. Documents filed in Los Angeles federal court indicate government agents posed for 10 months as insurance agents and paid thousands

# Midland man drowns in San Angelo lake

SAN ANGELO - A 25-year-old Midland man drowned early Tuesday in a San Angelo lake while fishing with his father-in-law and 14-year-old brother-

in-law, both of Midland. According to a spokesman for the Tom Green County Sheriff's Department, the three had been out fishing at Foster Park on Spring Creek in western Tom Green County when the boat "swamped." The father, John, was a good swimmer and Kevin Hayslip, 14, was wearing a ski-belt type of life preserver, the spokesman said. It is unknown what caused David Pringle's death.

John Hayslip told officers that, at one time, Pringle had hold of the

"I don't know whether he got a cramp or what happened to make him turn loose of the boat," Hayslip said.

"I turned around and he was gone. Officials said Pringle was a diabetic and could have had a seizure or panicked when he fell into the water. He apparently drowned while trying to swim to shore.

The boat capsized at 7:30 a.m. Pringle's body was recovered at 9: 20 a.m., only a few feet from where he was last seen. The body was in eight feet of water, about 15 feet from the south shore of the creek. Capt. Roy Jones and emergency medical technician Cal Henderson of the San Angelo Fire Department boat rescue squad

discovered Pringle's body. Peace Justice Ruth Nicholson pronounced Pringle dead at the scene by accidental drowning.

Pringle, a Midland Sears and Roebuck employee, listed his address as Star Route, Box 12C of Midland.

# Japan's Ohira dead

TOKYO (AP) - Prime Minister Masayoshi Ohira, a staunch U.S. ally battling growing political unrest at home, died unexpectedly early today after suffering a heart attack. The death of the 70-year-old Ohira sent stocks plummeting on the Tokyo stock market and set the stage for a fierce political power struggle.

Ohira's death left the Liberal Democratic Party leaderless only 10 days before parliamentary elections. The balloting comes after Ohira's surprise loss of a confidence vote in Parliament on May 16, when 56 members of his own party abstained, giving the Socialist Party opposition the vic-

President Carter, U.N. Secretary-General Kurt Waldheim and Chinese officials were among the world leaders sending condolences on the death of Ohira, who headed the government since December 1978. Officials in Washington and Tokyo agreed his death was unlikely to affect U.S.-Japanese ties.

Doctors said Ohira succumbed to "complications of a myocardial infarction," or heart blockage, suffered

early today.

The prime minister had been hospitalized 12 days ago for fatigue and a mild heart attack suffered at the end of a marathon foreign tour that took him to the United States, Mexico. Canada and finally to Yugoslavia for the funeral last month of Yugoslav President Josip Broz Tito. According to aides. Ohira had spent 70 straight days either working or traveling before he entered the hospital on May

As late as Wednesday night, doctors had reported him in good condition. Most Japanese were stunned by the death of Ohira, the first Japanese prime minister to die in office since World War II.

Only last Sunday, Ohira held a brief news conference at his bedside and told reporters, "I feel quite all right and would like to get out of bed as soon as possible. All I have thought about lately are the elections." Funeral plans were not immedi-

ately announced. Under Japanese law, Chief Cabinet Secretary Masayoshi Ito became acting prime minister. He will serve in a caretaker capacity until the new Diet, or Parliament, is chosen in previously scheduled elections on June 22. The new members of the two-house legislature will then choose a new prime

Ito told reporters his caretaker government had tentatively decided to send Foreign Minister Saburo Okita, Finance Minister Noboru Takeshita and International Trade and Industry Minister Yoshitake Sasaki to the seven-nation summit of industrialized nations in Venice, Italy on June 22-23. Ohira hosted the last economic summit a year ago in Tokyo.

Ohira's death came as the ruling Liberal Democratic Party, a conservative coalition that has dominated Japan's post-war politics, was torn by internal dissent with numerous party members eyeing Ohira's party leadership post.

Political commentators have said recently that while the party is likely to retain power in the elections, Ohira himself stood little chance of continuing as its leader. A recent public opinion poll taken for the newspaper Asahi Simbum, indicated 50 percent of those questioned opposed Ohira's policies, while 20 percent supported

Ohira has been in trouble since his party lost ground in parliamentary elections last October. He had called the elections, expressing confidence of increasing the party's slim margin in the 511-seat lower house of Parliament. The plan backfired, leaving the party with 257 seats in the lower nouse, a one-seat majority.

Several party leaders, including Ohira's predecessor and arch political rival former Prime Minister Takeo Fukuda, had urged Ohira to step aside after the October ballot. Ohira, who unseated Fukuda in a bitter party leadership struggle in 1978, rejected the demands for his resignation. Fukuda was among those who abstained in last month's key no-confidence vote that brought down the Ohire government.

It was not immediately clear who would succeed Ohira as prime minister and party chief.

Among the leading candidates are Toshio Komoto, a 68-year-old shipping magnate turned politician who heads the "new generation" conservative wing of the party:

### Biggest recall of autos looms

WASHINGTON (AP) - The federal government appears on the verge of ordering the largest motor vehicle recall ever. Until it does, it is warning owners of 16 million Fords that the cars and light trucks, all with automatic transmissions, may suddenly lurch into reverse.

More than 98 deaths, 1,700 injuries and 6,000 accidents have been attributed to the transmissions, the National Highway Traffic Safety Administration said Wednesday in issuing its warning and in notifying Ford of its intention to proceed with steps leading to a recall.

Only a hearing the agency has scheduled for July 21 seems to stand in the way of the recall. If ordered, a recall could cost the automaker, already suffering from depressed sales. several hundred million dollars.

In Detroit, a Ford spokesman reiterated the company's position that there is nothing wrong with the trans-Subject to the recall would be vehi-

cles sold after August 1972 and made before October 1979 with automatic transmission types C3, C4, C6, FMX and JATCO. The safety agency said most of the accidents reported to it were caused by runaway vehicles that shifted by themselves from park to reverse after they were left unattended with their engines running.

# The windfall profits tax

What would you do if the federal government told you it was taking 30 percent of your paycheck as an "excise tax" - and that none of that money would ever be returned to

Scream, right? That's why Midland's independent oil producers are screaming. All their rage is directed at the windfall profits tax, approved by Congress in March and signed by President Jimmy

Carter in April. But what impact is the tax really having on the independent oil producers? How is it affecting drilling activity in the Permian Basin? What will be the tax's overall impact on the Midland economy? What can be done to change what the oilmen feel is a

discriminatory tax? These questions and more will be answered Sunday in The Reporter-Telegram in a story probing the tax and its impact on the Midland independent oilman. Local oil producers and officials, and a Midland banker provide an insight into the oil industry you may have never been afforded

As you read the story Sunday, the real impact of the tax may surprise

# Balanced budget doubts grow

WASHINGTON (AP) - House and Senate negotiatiors, after largely symbolic tinkering with the federal budget, are trying again to get a compromise 1981 spending plan through Congress amid growing doubts whether the budget can be kept in balance.

House and Senate conferees broke a 12-day stalemate over defense and social spending levels Wednesday and agreed to a \$613.6 billion budget for the fiscal year that starts Oct. 1.

The new compromise trimmed long-term defense increases but left untouched the \$153.7 billion in 1981 military outlays that had been part of the original compromise, which the House defeated by more than 100 votes two weeks ago.

The revised package also restored \$300 million for domestic programs that the earlier compromise had shaved from President Carter's bud-

The House was expected to vote on the new package late today. If passed, it would then go to the Senate for final

posed the first compromise as providing too much for the military but too little for social programs, were expected to support the new proposal.

Meanwhile, congressional leaders, in their frankest comments to date, said they fear the deepening recession will kill plans to have the first balanced budget in 12 years. · O'Neill said that while Congress still intends to approve a balanced target budget resolution, he "can't conceive...with unemployment jumping," of keeping the budget in balance when the second, binding resolution

Carter last March urged balancing the budget as part of his anti-inflation strategy. But, with the recession worsening, an increasing number of congressmen and White House aides believe it is no longer practical to wipe out the deficit. Government economists say each

rise of one percentage point in the jobless rate adds between \$20 billion and \$25 billion to the deficit by cutting federal revenues and driving up spending on uneraployment aid and

# Pryor's attorney claims it was rum

SHERMAN OAKS, Calif. (AP) -Richard Pryor's lawyer says the comedian was critically burned when a glass of rum ignited as he lit a cigarette, and his doctors deny Pryor ever told them he had been using a flammable drug mixture when he was engulfed in flames.

But police were standing by their account that the 39-year-old Emmy and Grammy winner had told Dr. Jack Grossman he had been using a as "free base" Monday night and that the ether had exploded

Pryor, meanwhile, walked around a little on Wednesday, ate some food and made a few wisecracks. He still was listed in critical condition with third-degree burns from his waist up, including his arms and face. But doctors said he could be off the critical list in two weeks.

When Pryor was first admitted.

doctors rated his survical chances as less than even.

Dr. Jack Grossman, one of two physicians treating Pryor, dismissed the police account Wednesday, saying, "When there is as much excitement and chaos as there was when Richard came into the emergency room, some things that are said might

be heard inaccurately. Grossman said because there were ave confused some thing he thought he heard.

Grossman and his brother, Dr. Richard Grossman, who also is treating Pryor, denied they had any conversation with Pryor about cocaine, ether or the cause of the fire.

Richard Grossman also said he was not aware that Pryor was given any toxocological tests to see if there were drugs in his bloodstream.

Atlanta lawyer David Franklin,

reportedly folded up the level and

high rate of speed, witnesses said.

who is also Pryor's personal manager, said, "Pryor told me he had a glass of rum. He went to light a cigarette and there was an explosion. The police department did not substantiate the ether story."

Franklin said he had asked Pryor if he were lighting "a regular cigarette," and Pryor had replied,

Asked if he talked to Prvor about "many other" people in the room, someone could have confused somesion, Franklin replied, "No! The man is critically ill - I didn't ask him what happened. He told me about the rum

and that was it." Police Lt. Dan Cooke said Wednesday he is standing by his earlier statement that Pryor had told Jack Grossman the ether used to make 'free base," a cocaine derivative, exploded and set fire to Pryor's clothes Monday night at his Northridge home,

# Stolen equipment recovered

A \$1,800 level and tripod reportedly stolen from an HBF construction site at 501 W. Wall Avenue Wednesday afternoon was recovered when an HBF employee jerked the equipment out a car window.

W.P. Blackwell, general supervisor, told police that at 1: 45 p.m. a man

### Furr's loses in change-making

By the time the change-making was over, Furr's Store at Town and Coun-

try Shopping Center was out \$49.01. According to a store employee, two men entered the store and one of them purchased a 99-cent bottle of orange juice. He gave the clerk a \$50 bill. She gave him change of \$49.01. He then told her he gave her the \$50 by mistake, so she gave it back to him. He then gave her two \$20 bills, a \$5 bill and five \$1 bills. The clerk laid that money on the drawer to be counted.

The man then asked if she had a \$100 bill for the \$50 and the \$20s, \$5 and \$1s. She said yes and gave it to him. Not until he left did Furr's employees discover that somewhere during the transfers the man had made a profit of \$49.01.

store the previous night and had also been at a store in Odessa where he pulled the same trick.

### Firearms stolen from residence

apparently stolen from a northwest Midland residence sometime between Tuesday and Wednesday, according to police reports. Durwood Shaw of 3318 Windsor

Drive told officers that he returned home and found a screen missing off a southeast bedroom window. When he checked, he found a .30-30

Teddy Roosevelt Commemorative 1776 to 1976 shotgun, a Remington 30.06 pump-action shotgun, Remington semi-automatic 20-gauge shotgun. Remington 12-gauge shotgun, an unknown brand 12-gauge pump-action shotgun, .410-caliber bolt-action rifle and a .22-caliber pistol missing.

The weapons had been kept in a

Merritt was born in 1904 in Weatherford in Parker County and later lived in Snyder before he hitched some horses up to a covered wagon and moved to Midland County in

He farmed and ranched in the county and was a professional horse train-

In 1938, Merritt began his law enforcement career as a deputy constable under Raleigh "Big Lee" Lee. "He looked mean; he lived up to it," Merritt recalled in recounting his

years in law work. In 1941, when Midland was still in the transition from a small cattle town to a growing oil town, the city did away the marshal-enforcement of the law and adopted the police-force system. That year, Merritt joined the police force and served under L.P. "Mac" McCasland, the city's first police chief.

The silvery, .44-caliber six-shooter Merritt holstered but rarely pulled

and never fired in anger, and the handcuffs and blackjack he carried once belonged to Andy Norwood, who,

in 1941, was Midland's last marshal. In 1950, Merritt was elected constable for Midland County and held that position until 1960. Later, he "hired out" as a warrant officer for the city. And in 1969, he was appointed constable following the death of Constable

"I'm going to come to my office like I always have, if I live," Merritt said in an interview in 1976.

Over the years, the constable developed a reputation as a lawman who would rather - and did - lend a helping hand than pull a pistol and throw some poor fellow in jail. "The Lord was with me all the

way," Merritt said. "I've never had too much serious trouble with anybody. His approach to law enforcement was centered around common horse

sense, diplomacy and a whole lot of waiting. "I ask the Lord each day if I can

help someone big or small," he said almost two years ago. "I would rather help people than put them in jail.
"It's worth something just to be able to help your fellow man. That's

all I live for...just to help a friend." The death of Merritt, as Tom McGinnis, one of his deputy constables, said Merritt's death signals "the end of an era. Survivors include his wife, Hattie;

two daughters, Mrs. E.F. "Gene" (Doris) Jones and Daisy Merritt, both of Midland; three sons, Donald Merritt, Frank Merritt and Harold Merritt, all of Midland; and six granddaughters, 11 grandsons, 16 greatgrandchildren.

Huff died Sunday in a Big Spring, hospital.

Pallbearers were Lynn R. Huff. Mark W. Huff, Russell N. Huff, Larry D. Huff, Rodney H. Huff and Jeffery S. Copeland.

#### Egyptian, Israeli ministers bicker

By The Associated Press

While the White House announced plans for Egyptian and Israeli negotiators to meet in Washington in hopes of renewing the stalled Palestinian autonomy talks, the two partners in peace bickered publicly over which side was holding up progress.

In Cairo, an Egyptian Foreign Ministry spokesman read a prepared statement Wednesday accusing Israel of deliberately "creating more obstacles" to the peace process with its stated policy to build new settlements in the occupied West Bank of the Jordan River.

## Speaker's race over, says Lewis

AUSTIN Texas (AP) - The numbers game in the 183 House speaker's race grew more intense Wednesday, with Rep. Gib Lewis claiming victory and Rep. John Bryant accusing him of deception.

"The race to succeed Bill Clayton is over," said Lewis as he laid out a list of 92 House members and andidates he said had pledged their support to him

"I am confident I am going to be elected speaker," Bryant said a couple of hours later.

Lewis, D-Port Worth, is running only as a second choice to Speaker Bill Clayton, who might abandon his quest for an unprecedented fourth term. Bryunt, however, is running for speaker against

ill comers, including Clayton. Clayton said Wednesday he expected to be indicted in the PBI's Brilab investigation and was giving nimself until "early fail" or "before it gets too cold" in he acquitted. Without such vindication, he said, he

would quit the speaker's race. The House elects the speaker on the opening day of a regular legislative session - in this case, January 1986 - and it takes 76 votes to win if everybody is

Bryant said Lewis' list was full of soft spots and accused him of "deception" and a "less than honest manipulation of House members and facts and fig-

For one thing, Bryant said, Lewis included 15 Republicans whose chance of election is poor because they are running against Democrat incumients in traditionally Democratic districts.

Another 13 names are legislators or incumbents who have opponents in November, including seven Republican legislators targeted by the Democratic Party for defeat in November, he said.

Bryant said five are "pledged to me or someone eise or uncommitted," including Rep. Dan Kubiak, Defociodale, who had been scheduled to endorse Bryant at a Wednesday murning news conference. Kuntak later issued a statement saying he was committed to Lewis. He said he signed pledge cards for both Lewis and Bryant because "I think the pledge card system is a farce.

Others who Bryant said were uncommitted or stedged to others are Regs. George Pierce, D-San Automo, and Charles Finnell, D-Holliday, and candiinter Earry Browder of Shepherd and Dave London of Leonard.

Bryant also charged that eight persons named by Lewis were "stampeded" into signing on by Lewis' claim to have 90 pledges.

They are; he said, Reps. Box Simpson, D-Amarilac Bo Crawford, D-Beaumont; Frank Gaston, R-Dailas: Al Edwards, D-Houston, and Frank Tejeda, D-Sam Antonio; and candidates Dee Miller, Amarilac John Gavin, Wichita Falls; and Bruce Gibson,

When only legislators and candidates who likely will be sitting in the 1901 House are counted, Bryant said, Lewis has about 62 solid pledges and Bryant this about 45.

He said it was "flat appailing" that Clayton was present for Lewis' news conference and called Lewis Clayton's "chosen successor." He said it was "very synteni" the Lewis to stage a "hiltz" on the eve of Clayton's expected indictment.

### Hospital settles malpractice suit

FRESNO, Caiff. (AP) - Two children whose paralysis allegedly was caused by the treatment they received at birth in a Fresno hospital will receive millions of dollars in the settlement of a naigraetice suit, court documents show

And the parents of a third child who allegedly received the same treatment and died a short time after birth have settled another suit out of court for an undetermined amount, the records show.

decisise the cases never came to trial, authorities regularized there was no determination as to wheth-

or the allegations in the suits are true. The three actions were filed against Valley Chil-

stress Hospital and Guidance Center of Fresno. How much money the children will receive from he complex settlement depends on how long they live because a portion of the settlement calls for annual compounded payments.

Dr. Anthony E. Labarre, chairman of the mathenatics department at Fresno State University, said the total value of that part of the settlement would be nore than \$2.8 million for each child after 50 years. Ine source close to the case estimated the hospital's payments could reach EX million if the youngsters ive a mermal lifespan.

Court documents filed here by the office of San Francisco attorney Meivin Beili alleged the hospital nserted a catheter in the infants' umbilical arteries to provide nutrition and needed medicines.

The treatment began a few days after the children sere bern in January, 1976. The children soon seveloped "chemical burns on (the) back and butdets:" further described in the documents as "blush-black skin discolorations.

On Jan. 28, 10-day-old Joseph D. Gallagher of Paimouth, Mass., was found to be paralyzed. One tour later, 18-day-old Brian M. Garcia of Fresno also vas paralyzed, the documents said.

The third baby, son of David and Edna Fleming, never was paralyzed. He died a few days later, records stated.

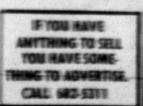

Judge Blaine Pettitt, who presided over the final we settlement conferences, said Tuesday the Flemng case apparently was settled out of court. He inscribed the settlement in the other two cases as the argest compromise he has ever participated in. Both Belli and the hospital's attorney, James

Barrum, declined to discuss the settlement. Hospital administrator Edward Glavis also declined com-

The agreement provides for cash payments of almost \$1.3 million in both cases to be divided among the families and the atturneys. Additionally, both Gaillagher and Garcia are to receive payments totalng \$750,000 on five anniversaries over the next 50

Finally, each child will receive annual payments of \$25,000, increasing and compounding annually at 4 percent for life

The plaintiffs dropped all allegations against the ospital in exhange for the settlement. Records show he cases were dismissed May 28.

# Policewoman fired for being coward returning

DETROIT (AP) — A Detroit policewoman fired on the grounds of cowardice will regain her job and full back pay after a meeting of the city's Board of

Police Commissioners, her attorney says.

Attorney Robert Cohn said Wednesday the commissioners had drafted a proposal to reinstate Officer Katherine Perkins and voted informally to approve her return to active duty.

However, a commission spokesman said the board had not yet voted on Ms. Perkins' appeal for reinstatement. David Smydra, executive secretary for the commission, said the board was scheduled to vote on the appeal at its regular weekly meeting

Smydra said a proposal to reinstate Ms. Perkins had been drafted for presentation to the seven-member board, but he called the action typical in all disciplinary matters. The police board will have the option to approve, reject or amend the proposal, Smydra said. A second policewoman dismissed in March with

Ms. Perkins did not appeal her firing to the commissioners. Glenda Rudolph appealed to an independent arbitrator who is to begin hearing her case June 18, said city attorney Geoffrey Taft.

The officers were found guilty of failing to aid Detroit Police Sgt. Paul Janness when he was attacked by a naked man last August. The officers denied the allegation. A police department trial board reaffirmed the dismissals last month follow-

ing a second round of hearings.

Cohn said he was informed of the board's alleged decision Monday, but declined to reveal who supplied the information. He said the board's official action would reinstate Ms. Perkins with full back pay and allow her to retain her three years' seniori-

Cohn said he felt "the community's attitude was reflected in the board's decision" and that the

general consensus was that she got a raw deal." The dismissals for cowardice were the first in department history. They eventually were opposed by Police Chief William Hart, who at first declined comment on the firings. But during Ms. Perkins' initial hearing before the commission last month, Hart said he thought the action was too harsh.

# Armstrong has emigration plan

TULSA, Okla. (AP) — A blueprint for mass emi-gration of Worldwide Church of God followers to a foreign land allegedly has been drawn up by controversial evangelist Herbert W. Armstrong, a former

employee said. The plan parallels the emigration of the Rev. Jim Jones and his People's Temple followers to Jones-

town, Guyana, Tulsan David Robinson alleged. But Robinson said it may be some time before full details of what, he knows about the plan on Armstrong's operation are revealed. He said he expects a court gag order soon will bar him from discussing the church or its founder.

Robinson, a 57-year-old former Worldwide minister, has written a book about Armstrong and the California-based evangelical group. The book has become the center of a \$2 million lawsuit involving conflict between freedom of speech and freedom of

Five thousand copies of "Herbert Armstrong's Tangled Web" are stored in a Kansas City, Mo., warehouse after a June 2 restraining order signed by Distrit Judge William Means preventing the book's

Means granted the temporary injunction after two Worldwide Church members filed the lawsuit against Robinson, claiming publication of the book interferes with their freedom of religion.

Means was to have presided over another hearing on the matter Tuesday, but legal maneuverings have put it in another judge's courtroom Friday for a decision on whether Means' restraining order should

Meanwhile, Robinson said he fears Worldwide Church members are being "led into cultism" by

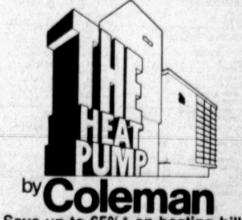

Robinson alleged the 87-year-old church leader has drawn up plans to evacuate his followers to Petra, a small community in Jordan, to "await the end of the

Robinson said Armstrong is looked upon by his followers as a God. He said followers are being taught Armstrong is infallible - and he said "they have gotten a lot of people ready to leave the country

Robinson said he has no quarrel with the membership of the Worldwide Church, but alleges "it is the eadership which has jumped the track into cultism,

Jones and his People's Temple followers died in a ritualistic mass suicide.

The lawsuit was filed by Washington, D.C. Worldwide minister Sherwin McMichael and Phoenix, Ariz., associate Henry Cornwall. The suit claims Robinson's allegations, both "true and false" against Armstrong, were intended to intrude on their private affairs and religious beliefs, jeopardizing church members' freedom of religion.

# Transportation Transition OK'd

By SUE FAHLGREN

The Board of Directors of the Permian Basin Regional Planning Commission approved a Transportation Transition Plan after a public hearing on the plan at Wednesday's monthly board meeting at the West Texas Education Agency building at Midland Regional Airport.

The plan, designed to improve accessibility of public transportation for handicapped people, received a unanimous vote for implementation from the directors.

In other matters, the board discussed and approved applications for a housing subdivision to be located in Odessa, an apartment complex to be located in Odessa, funds for a cotton warehouse in Seminole and funds for a personnel management system improvement for Big Spring.

They also reviewed plans for funding a summer youth program for Dawson, Martin and Upton counties, however no resolution was necessary.

The Henderson Heights Subdivision, slated to encompass some 271/2 acres in Odessa, is to be developed by Ramcon Develop-

#### Pilot suffers seizure

CHEYENNE, Wyo. (AP) — The captain of a twin-jet Frontier Airlines plane, with 72 passengers aboard, had to take the controls of his careening plane Wednesday night when his copilot apparently passed out during a landing attempt.

No passengers were injured, said Bob Schulman, Frontier spokesman Schulman said the co-pilot of Flight 326, Pete Generoux, was

landing the Boeing 737 "when he appeared to slump over. At this point it is believed he had some type of seizure of undetermined nature.

"Capt. Dan Whitman immediately took over, executed a missed approach procedure (regained altitude), then landed the plane without incident."

ment, Inc. of Odessa. The firm will develop 86 lots, initially building only 10 homes to be priced in the \$40,000-\$50,000 range. The PBRPC is requesting Federal Housing Administration approval of the area to provide accessibility to individual family financing. The start date for the project will be Aug. 1.

. The Housing America Mortgage Company, Inc., of Dallas won the board's recommendation for its Grandview Village apartment complex to be centered in Odessa. The company is seeking approval for mortgage insurance from the Department of Housing and Urban Development. The complex will include 160 units in one-, two-and three-bedroom sizes, five percent of which will be accessibile to the handicapped.

The board will recommend to the Department of Housing and Urban Development that the city of Seminole receive \$554,000, to be matched with private funds amounting to \$3,466,350, for a cotton compress/warehouse facility. The board previously recommended funds for this project last November. However, the city fell short of the matching funds before the deadline

The proposed warehouse, developed by Cotton Pool, Inc., will have a 50,000 bale capacity plus additional storage space for cotton in the compress building. Further, there will be a downtown office building for the Cotton Pool's offices, rental space for the U.S. Department of Argriculture and meeting rooms for other agricultural groups.

The city of Big Spring won the board's backing on its proposal to the Texas Department of Commmunity Affairs for funds for a personnel management system improvement. The city is requesting \$18,738 from TDCA, to be matched with private funds of ier policies, recruitment and selection and employee training sessions.

The board was briefed on plans for summer youth programs for underprivileged children in the Dawson, Martin and Upton County areas. The programs for approximately 1,000 children aged 8 to 13 will be run in neighborhood centers located in Lamesa, Stanton and McCamey through CETA. Omitted from the agenda until a later date was a proposal to

adopt a revised budget for the PBRPC Area Agency on Aging.

# University to study Love Canal effects

BUFFALO, N.Y. (AP) — The State University here will study 1,000 children from the Love Canal area in an effort to see if their growth is different from that of other youngsters.

The researchers said the medical and dental studies will be done on 600 children who were conceived there and who lived in the area and on 400

youngsters who moved to the Niagara Falls neighborhood, the site of an old chemical dump.

Several weeks ago, the federal government released a report that 11 cases of chromosome damage had been found among residents of the neighborhood. Chemical wastes were dumped in the area 25

# Strippers hold forth in annual convention

SAN PEDRO, Calif. (AP) — Miss Fourty Four is a sculptor. Eartha Quake took up hypnotism, and Eyeful Tower became a poet. But once a year they peel off their new identities and turn Jennie-Lee's museum and stripper's school into the bump and grind capital of the world.

It's the 23rd annual convention of the Exotic Dancers League and the place throbs to the rythmic boom-boom stripper's beat — a tired siren's

song of perhaps better days gone by. \* "I'm so glad Jennie got us together — she's the only one keeping bur-

lesque alive," said conventioneer Leta Paul, Miss Striptease of Los

But things just aren't like they used to be and the top award winner at last weekend's convention, Patsy Darling, doesn't even have a nick-What's worse, during her recent four-month tour of Japan she didn't

even get arrested once, Ms. Lee reported - another stripper tradition zipped away. Ms. Lee, who danced under the name Miss Fourty Four and Plenty

More, boasted of no fewer than 10 interruptions by the law during her dancing career. But these stars of the runway say legitimate stripping is a dying art

form thanks to topless waitresses, X-rated films, and "amateurs." Ms. Lee, president of the league, is trying to keep the tradition alive. She operates not only the museum, but also her School for Strippers while

And in her spare time, she markets a \$10 strip kit, complete with pasties, G-string, navel gem and instructions.

# Leadership members graduate

Tuesday was "gradua-tion night" of another kind in Midland. The 41 members of the 1979-80 Leadership Midland group-were presented with certificates mark- Legg said that Leadering completion of the nine-session program which began last October, and were extended congratulations by the advisory committee responsible for the sessions. The annual awards dinner was held in Midland Center.

"You are to be congratulated for your interest, for your dedication and for your commitment to making Midland a better place to live," Reagan H. Legg, chairman of the program, told the gra-duating participants.

Selected by a committee which spent many hours evaluating the 80 applicants for this year's program, the group spent one full day each month attending sessions which examined all facets of Midland's community life.

Speakers panels and motivational lectures were featured in order to present a comprehensive look at conditions and organizations throughout the city.

"SO OFTEN, THOSE involved in community service work in just one area really have very little understanding of what is going on in other volunteer areas," Legg said, "and we believe it

necessary that leaders in tween the present leada city like Midland be at least exposed to what others are doing."

Commenting that "seeing 4s believing," ship Midland officials have attempted to design a series of programs which identify the needs as well as extoll the virtues of volunteer organizations in the city.

Parker Humes, who has served as curriculum chairman of the organization since its beginning, said that the nine sessions have dealt with the following topics: October, "What is Leadership?" and "Midland Yesterday, Today and Tomorrow"; November, "Health Care in Midland''; December, "Housing and Poverty"; January, "Youth and Education"; Feburary,

"Culture and Recreation"; March, "City and County Government" and "Our Criminal Justice System": April, "Transportation and Communication" May, "Industry, Agriculture, Energy and the Economy"; and June, "Objectives For

Midland" and "Where

Do We Go From Here?' effort to bring the real experts and the real leaders of the community before the group," Humes said, "and to encourage as much interaction as possible beers and the participants."

Humes noted that leaders of the volunteer organizations and city and county officials have been most cooperative in appearing before and working with the group. Following completion

of the course, the graduates become members of the Leadership Midland Alumni, an organization which provides continuing contact between those who have completed the program. That group holds regular meetings, discusses events of current interest, and assists in designing the next Leadership Midland series of

"We try to help place our graduates in various areas of volunteer work, and to maintain their enthusiasm for working to meet the challenges and solve the problems in our city," Bradford said. .

At the final session June 5, each participant indicated his or her pref-"Design of the erence concerning future volunteer service and those have been tabulated by the follow-up committee, which will endeavor to place the different organizations in ouch with the particular person who has expressed an interest in

> URGE organizations in need of capable, committed volunteers to get in

touch with us through the Chamber of Commerce office or by contacting Harry Clark at The First National Bank," Legg said. Clark is chairman of the follow-up committee for Leadership Mid-

Greg Oehler, Walter "Unless these people do Saldana, Bill Sanders, are put to work, Midland Dan D. Smith, Chuch is losing a very valuable Snure, Pat Swindle, Burresource of trained and gess Wade, Danny dedicated citizens," Watts, and Steve Legg added. Widner.

1979 graduates who were honored Tuesday night were: G.B. Bailey, Woodrow Bailey Jr., Fran Billingsley, James Borron, Ann Bradford. Doug Burleson, Mike Butler, Johnny Cappadonna, Jim Chapman, ages who want to give David Childress, Cyn back to this community Choate, Billy Cook, some of what it has given "Jumper" Davis, Marti to and meant to them, Garza, Kathleen Gilluly, he said. # THE MIDLAND REPORTER-TELEGRAM, THURS., JUNE 12, 1980 Stock market gains

NEW YORK (AP) - Energy issues held the spotlight for the second straight session Wednesday as the stock market climbed to another 31/2month high.

The Dow Jones average of 30 industrials gained 8.71 to 872.70, its highest close since it finished at 886.86 on Feb.

New York Stock Exchange volume reached 43.80 million shares, against 42.03 million Tuesday.

On the Big Board, Mobil gained 3% to 80½; Texaco ½ to 37%; Phillips Petroleum 2 to 51¼; Standard Oil of Indiana 11/8 to 591/8; Gulf Oil 11/4 to 44%; Amerada Hess 1/4 to 56; Mesa Petroleum 11/2 to 37%, and Exxon 11/2

At the Amex, McCulloch Oil was the volume leader and climbed 11/2 to 12%. Gulf Canada rose % to 30; Houston Oil & Minerals % to 26%; Imperial Oil 1% to 37%, and Dome Petroleum % to 701/2

The daily tally on the NYSE showed about nine gainers for every five stocks that lost ground, and the exchange's composite index rose .74 to-Standard & Poor's index of 400 in-

dustrials gained 1.68 to 130.68, and S&P's 500-stock composite index added 1.36 to 116.02. The Amex market value index

tacked on 3.18 to 288.92. In the overthe-counter market, the NASDAQ composite index closed at 155.22, up

# TI may fly into Love, after all

DALLAS (AP) - Texas International Airlines may be on the verge of switching, at least a little bit, instead of fighting.

An airline official said Wednesday the airline is considering switching at least some flights from Dallas-Fort Worth Airport to Love Field. tles in a vain attempt to stop South-

west Airlines, one of their main competitors for Texas airline passengers' dollars, from flying out of Love tion bill President Carter The spokesman said Texas International is "looking very seriously" into bill" in a decade is head-

The airline did not indicate whether viving - by the margin

the flights moved to Love Field would of a single last-minute be strictly to cities in Texas. Federal legislation passed earlier to kill its main provithis year allows Southwest Airlines to sion. fly out-of-state only to states joining

Texas, thwarting attempts by the re- duled final action on the gional airline to fly to such cities as bill today St. Louis and Chicago. Howard D. Putnam, president of Southwest Airlines, was neutral when when Rep. Joseph

AMARILLO, Texas (AP) — Texas Panhandle and western Oklahoma feedlot roundup. Confirmed: 8700.

Trade moderate in the Panhandle area Wednesday. Slaughter steers and helfers fully steady. Feedlots reported fair interest and inquiry from most buying sources. Sales on 5,900 slaughter steers. and 2,800 helfers, 47,300 head sold for the week to date. Note: All live cattle prices based on het weights fob the feedlot after Phyrink. Slaughter steers. Over 200 head choice 2-3 1,100 h. 69,00. Good and mostly choice 2-3, 170.80 choice, 1,000-1,190 lb. 67,50-68,00. Mixed good and choice 2-3 1,050-1,200 lb. 55,50-67,50. Load good and choice 2-3 1,050 h. Holsteins 63.75.

Slaughter helfers: Load choice 2-3 900-1,006 lb. 65,00-63,05. Mixed good and choice 2-3 900-225 lb. 64,00-64,50. Good anad choice 2-4 1,000-1,025 lb. helferettes 60.50-62.50. asked the how the airline felt about Gaydos, D-Pa., switched TIA moving some flights to Love his vote from "no" to "Southwest was founded on free enterprise and we spent a lot of years had expired.

fighting for it, and if somebody wants to come back to Love Field and com- had not formally closed pete with us, we'd love to have them," Putnam said.

### Youngsters exempted from sales tax

ALBANY, N.Y. (AP) — The state Legislature has decided to throw small fry like 13-year-old worm salesman Jody Gerard back and go after only big ones when it fishes for sales

The state Assembly on Wednesday gave final approval to a bill exemptng "young entrepreneurs" under 18 from having to collect sales taxes on the first \$600 they make a year.

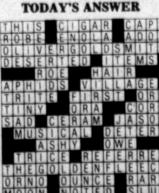

The bill, passed several weeks ago by the state Senate, is expected to be signed by Gov. Hugh Carey. The "Jody bill" got its start last

July when two Department of Taxation and Finance agents were sent to Jody's Ulster County home to audit his pencil written records and make sure the boy paid up 64 cents worth of tax from his sale of worms to local fishermen. Jody, who digs the wigglers up from

his backyard and sells them for 35 cents a dozen, said he was a victim of 'taxation without representation." He argued his case in March to lawmakers who had invited him to the

state house, and they promised to get him off the hook. But politics - Democrats and Republicans vying to get credit for helping Jody — interfered, and it was

more than two months into trout season before the bill finally was passed "This legislation is more important than it may seem," said Assembly-man Maurice Hinchey, D-Kingston.

### **BUSINESS MIRROR** Americans secretly like having inflation

By JOHN CUNNIFF **AP Business Analyst** 

LOS ANGELES (AP) - After listening to the chitchat at social and sometimes business gatherings, Robert Parry wonders if Americans are really prepared to deal with inflation.

Two questions predominate, he said.

The first is posed dutifully: "What are we going to do about inflation?"
The second question follows almost before the questioner has finished wringing his hands. "Do you know," he asks in a more animated tone, "how much my house is worth now?" Parry, senior vice president and chief economist of Security Pacific National

Bank, believes that many Americans secretly like inflation, at least that inflation which pushes up the market value of homes. When he delivers addresses on the economy, one of his chores as president of

the National Association of Business Economist he sometimes conducts a revealing little test. Many people don't pass it.
"If I gave you a little black box that contained a button, and all you had to do

was push the button to end all inflation immediately," he asks his audience, "would you push the button?"

It is his opinion that many of them would not, an opinion verified by the stunning silence that often precedes any response. Many of those who pause before answering are owners of homes whose value has soared.

This is especially true in the Los Angeles and San Francisco areas, where median prices jumped last year to \$83,000 and \$90,000, respectively, far above the \$67,000 national median for large cities.

But housing isn't the only vested interest people have in inflation. Some day, says Parry, the nation must come to grips with many of its spending

programs, including those for Social Security payments.

If people are living longer, he asks, shouldn't we at least consider restricting benefits until a person is older? "Perhaps to 67?" he asks provocatively. "It

would dramatically lower the costs. And isn't it absurd, he asks, for Social Security to be indexed to inflation in a

manner that permits a 14 percent increase July 1, while wage incrases are restricted to single digits by executive guidelines? He concedes it is unpleasant to think of cutting Social Security. Almost

everyone, he recognizes, has a relative, friend or acquaintance receiving it.
"But indexing just perpetutes inflation," he says.

He extends the reasoning to state and local pensions that sometimes permit

retirement in early middle age. "The costs are prohibitive," he says. "Someone has to say no. We just can't afford them." He paused. "I suppose I can say this as an economist, but I'm not running for

office," he said, fingering what he sees as a prime cause. Politicians seeking office, he feels, often are inflation perpetuaters. "Long term," he said, "the nation has to make tough decisions. We have to

increase spending more slowly. We have to consider tax changes to stimulate saving and investing, and maybe to restrain spending."

But, it seems, people like to borrow and pay back in cheaper dollars, politicians like to win votes, retirees like their pensions, and homeowners are overjoyed at soaring market values, even if they might be unable immediately

to convert those values to cash. "Too many people have learned to live with rising prices," said Parry, "They

## have made decisions that require continued inflation. Housing bill barely east some flights from Dallas-Fort Worth Airport to Love Field. TIA had fought lengthy court bat-

WASHINGTON (AP) - A housing discriminacalls "perhaps the most important civil rights resuming at least some service out of ed for an uncertain fate in the House after survote switch - an attempt

House leaders sche-

The measure passed a major test Wednesday 'yes" after the time given members to vote

House leaders, who the voting, did so immediately, keeping alive by a 205-204 margin a key section that creates a new procedure for enforcing provisions of the 1968 fair housing act.

If there had not been an apparent breakdown in the House's electronic voting system, the vote could have ended in a tie, allowing House Speaker Thomas P. O'Neill to cast the tiebreaking

The tie apparently would have resulted if the electronic voting system had recorded the "no" vote of Rep. Steven Symms, R-Idaho, whose vote was not recorded although he was on the floor at the time. Symms said afterward he had opposed the crucial enforcement provision.

The key vote came after some parliamentary maneuvering de-signed to give each side the advantage. Opponents of the mea-

sure had offered an amendment that would have removed most of the enforcement provi sions. But Rep. Michael

Synar, D-Okla., coun- an administrative law tered with an amend- judge who would have ment to the opponents' power to settle comamendment. This meant plaints, order approprithe first vote would be on ate remedies and impose Synar's proposal, which a maximum \$10,000 fine would keep enforcement if discrimination was intact with some minor found.

Synar's amendment - Unlike the original bill.

the one that passed 205- however, Synar's 204 — allows the Depart- amendment ment of Housing and the law judges selected Urban Development to by the Department of file housing discrimina- Justice rather than by tion complaints before HUD.

# Council suggests savings plan

By JACK KEEVER

AUSTIN, Texas (AP) An energy advisory council touted nuclear energy and suggested a way the federal government could save electric customers in the Southwest \$29 billion over the next decade.

The Texas Energy and Natural Resources Advisory Council adopted a committee resolution Wednesday emphasizing "the need to fully exploit" nuclear energy a "proven domestic energy resource."

Another committee recommended re-examining national policy to determine if licensing and constructing nuclear power plants could be speeded up. It said a House proposal prohibiting funds for nuclear projects should be removed.

The second committee's recommendation, which also was adopted by the council, stated:

"Any project that has the effect of decreasing the dependence on foreign oil should be considered as being desirable from a public policy perspective because of the national security problems of higher oil imports."

The electric utility resolution was directed at the 1978 federal Powerplant and Industrial Fuel Use Act, which prohibits the use of natural gas as the fuel for electric power plants after 1989.

R.H. "Dick" Cory, a member of the council's Advisory Committee on Industrial and Electric Utility Fuel Use, told the council natural gas accounts for 75 percent of electric generation in Texas.

He said Texas' electric utilities are voluntarily converting from gas to coal-fired boilers, but to comply with the federal law would cost the Southwest \$29 billion - including \$17 billion in Texas - by the year

The Northeast and western regions would only have to spend \$6 billion to \$9 billion to convert to coal, Cory said, and federal funds would pay about one-half the

He said the average cost of electric utility service would increase by 10 percent in Texas by 1995 but would decrease by 5 percent in the Mid-Atlantic region and by 15 percent in the Northeast.

Also, Cory said, the federal law could result in the use of an additional 300,000 barrels of oil a day in the Southwest, rather than less oil as was the intent of the

The council's resolution says the Fuel Use Act should be amended so that "utility boilers that are not coalcapable without modification be allowed to burn natural gas or oil for the remainder of their useful lives or until a scarcity of natural gas can be demonstrated."

Council member Michel Halbouty of Houston, an independent oilman, said, "Washington doesn't know what in the hell it's doing" on energy, and Speaker Bill Clayton, another council member, added, "Can I sec-

Halbouty said the Department of Energy proposes the conversion to coal, yet regulations of the Environmental Protection Agency prevent that conversion. "The only way to convert to coal is to clean up the

Clean Air Act," said Halbouty. General Counsel Lynn Coleman of the DOE predicted the next Congress would review the act.

'Our room to wiggle has just about run out," said Chairman John Blair of the Texas Air Control Board, also a council member. "In some places it is impossible to live with the act."

Council member Ed Vetter, energy adviser to Gov. Bill Clements, said predictions that solar energy will provide 25 percent of the nation's energy needs by 2000 are "highly unrealistic."

Such forecasts, Vetter added, "give American people the luxury of sitting back and saying, 'I don't have to do anything about the Clean Air Act.'

Clements told Coleman he would like to hear more "strong statements" from DOE that the American people cannot count on solar energy as an important energy source any time soon.

"Our perception is we say it almost every day," said Coleman

"If you're saying it, you're whispering it," replied Clements. "They (American people) are hearing what they want to hear and think as opposed to putting their nose to the grindstone.'

Other recommendations of the Cory committee, which the council adopted, included the "timely" development of synthetic fuels and federal reimbursement for plant conversions or shut-downs that occur as a result of federal mandates.

The council also adopted the committee's recommendation to permit automatic fuel adjustments after

The nuclear resolution proposed assessments for nuclear power customers to cover the costs of waste

The resolution, presented by Dr. William Fisher, director of the University of Texas Bureau of Economic Geology, also offered these recommendations, which were adopted by the council:

- Making the governor solely responsible for concurring with the federal government on any high-level nuclear waste disposal in Texas.

- State legislation enabling Texas to manage lowlevel waste disposal sites in Texas.

Research to turn nuclear wastes into a less

The use of state and federal funds to reclaim abandoned uranium mines.

Studies on whether a severance tax on uranium can be imposed "without damaging the economic viability of the uranium mining industry in Texas."

- Developing emergency plans to cope with radiation transportation accidents.

# Big Texas oil drop expected by 2000

expert predicted Wednesday Texas · pounds to 6.4 million pounds in 1990 crude oil production will total 577 million barrels in the year 2000, a decrease of 31 percent from 1980.

Dr. Milton Holloway, executive director of the Texas Energy and Natural Resources Advisory Council, forecast natural gas production in 20 years at 3.8 trillion cubic feet, a decrease of 38 percent from this year.

Holloway's report to the council on Texas' energy outlook also stated: Lignite production will increase dramatically from 27 millions tons per year to 224 million tons by the

vear 2000. - Uranium production is expected

AUSTIN, Texas (AP) — An energy to decline slightly from 6.8 million 2000. and remain stable

- Alternate energy sources, such as solar, wind and synthetic fuels, could provide up to 15 percent of Texas' energy needs. "Our projections indicate that

Texas energy consumption will grow at 3.4 percent in the 1980s and 3.2 percent in the 1990s," said Holloway. 'Gross state product is expected to grow at 5.6 percent per year during the 1980s and 3 percent per year during the 1990s."

He said lignite and coal "made near zero contribution" to the energy supply in 1970 but will supply 31 percent of the state's energy consumption by

He also said Texas import levels for foreign crude oil will continue to rise as a result of the "growth of energy intensive industries, the attractiveness of the Gulf (of Mexico) for new refinery and petrochemical capacity, and the increase in oil use in Texas electric utilities...'

He predicted oil imports would stabilize at 2.9 million barrels per day or 26 percent above 1980 levels through the year 2000.

"Coal imports from the west will increase rapidly as the conversion of gas-fired boilers to coal occurs," Holloway said. "These quantities may rise from 23 million tons in 1980 to 178 million tons in 2000."

# OPEC says it wants to end chaos in petroleum-pricing

By ROBERT McCARTNEY

ALGIERS, Algeria (AP) - The next five months will test whether OPEC can regain control of world oil prices, leapfrogging wildly since Iran's revolution. Chances are slim, however, since Iraq, Kuwait, Qatar and Venezuela just raised prices, and giant Saudi Arabia wants a piece of

The average price of the oil cartel has risen from roughly \$13 a barrel to \$32 since early last year, and the price explosion is the largest since the 1973-

1974 world oil crisis. Militants in the Organization of Petroleum Exporting Countries took advantage of a tight world oil market following the Iranian revolution 16 months ago to raise prices sharply and pulled up price doves behind

But now OPEC says it wants to end the pricing chaos, which threatens to force American consumers to pay as much as 3 cents more for a gallon of gasoline and home heating fuel.

OPEC heads of state will meet in Baghdad, Iraq on Nov. 4-6 to celebrate OPEC's 20th anniversary. They would like to cap the festivities by introducing a new system to raise oil prices by small amounts every three

The proposed mechanism, which would link price hikes to several factors including world inflation rates

and currency values, is not designed to push up oil prices sharply.

We could cut production by 5 million barrels a day and prices would go to \$50 or \$60 a barrel, but you can readily imagine the effect on the world economy," the Saudi oil minister, Sheik Ahmed Zaki Yamani, said after the two-day OPEC conference ended here Wednesday.

Instead, oil ministers said they favored more gradual and predictable price increases, while protecting themselves against inflation and declines in value of the dollar.

Before the system can be launched, however, OPEC must put existing prices in order. Current prices are said to be "disunified," meaning different countries charge widely varying prices for similar qualities of

For instance, there are three prices for light Persian Gulf crude. Saudi Arabia charges \$28 a barrel, Iraq \$30 and Iran \$35. Iraq will raise its price to \$32 on July 1 under the OPEC agreement reached Wednesday. So will Qatar and Kuwait. Venezuela will hike its price between \$1 and \$2.

This multi-tiered price system causes problems for several reasons. Yamani complained that oil companies with access to Saudi crude make excess profits because of the

relatively low price. Industry analysts say the disunity tends to encourage leapfrogging, in which a price increase by one country leads immediately to hikes by all others regardless of whether their crude's quality merits higher prices in the market.

The accord here, which sets a \$32' benchmark price and a \$37 ceiling, will help to limit leapfrogging, but is only a first step toward reuniting OPEC prices.

"Now if a given country raises its price, it does not follow that the others increase immediately," Kuwait Oil Minister Ali Khalifah Al-Sabah said.

His statement was significant because Kuwait stymied two efforts by Saudi Arabia to reunify prices early this year. Kuwait raised its price by \$2 a barrel to match Saudi increases and triggered a round of hikes by other producers in January and

Yamani's previous predictions that prices could fall have been proved wrong on several occasions. For instance, at the last OPEC conference in Caracas, Venezuela, he said prices could fall because of declining demand, but prices have jumped twice

And OPEC's latest moves, which would permit the Saudis, the world's largest oil exporter, to jump their price \$4 - from \$28 to \$32 a barrel + have been attacked by high government officials in the West.

U.S. Energy Secretary Charles W. Duncan called the OPEC decisions "irresponsible" and "unjustified."

A U.S. oil industry source who asked not to be identified said the Saudis failed at OPEC's meeting in Venezuela last December to restore price unity and "I don't think the Saudis really closed the gap" at the meeting in Algiers.

"They just stopped the upward mo-tion for a while," he said.
"I don't think there's any question

we'll see prices moving up again,' said a U.S. oil company executive, who also asked anonymity.

### Profits high in Japan

TOKYO (AP) - Japan's nine major oil companies posted profits of \$689.5 million in the fiscal year that ended in March, the largest in the nation's history

Nippon Oil, Japan's biggest refiner and distributor of oil, had profits of \$179.1 million, and a spokesman said

He said the profit-to-sales margin for the company was only 1.5 percent, less than most Japanese industries.

three new short courses

Three short courses are scheduled to begin at Midland College during the week of June 16. A six-week study of the practical and commercial pplication of photography will be taught by John McConkey. Titled Camera-An-Eye-On-Tommorrow, the course covers black and white and color photography, lighting, film selection, film processing and

Each class is limited to 20 students meeting 7-10 p.m. Tuesdays and Thursdays for three weeks. Students should bring their cameras. The first class will be held June 17 and the fee for

he course is \$22. For those wishing to improve their typing skill, Maxine Jarnagin will conduct a three-week course in Typing Brush-Up.

Students should have prior typing experience as this course is geared toward improving speed, accuracy and typing techniques.

Classes are limited to 20 students meeting 7-9 p.m. Mondays, Tuesdays and Thursdays. Course fee is \$20 and the first class will be Tuesday June 17. Dan McAngus gives an Introduction to the Stock Market for those wishing to know the meaning of

The course book may be purchased at the MC

investments, types of stocks, risks and the methods of investing. Classes meet 7-9 p.m. Tuesdays and Thursdays for

three weeks and the course fee is \$15. More information may be obtained by calling 584-7851, extension 147 or 216. Those wishing to pre-register may do so in room 156 of the MC Administration Building from 7 a.m. to noon and from 12:30 to 5:30 p.m. Monday through Thursday.
