# Carter may propose cut income tax

NEW YORK (AP) - Senior Carter administration officials have begun discussing a possible 1981 tax cut that they say the president may propose this year, perhaps as part of the mid-year budget review in July, the New York Times reported today.

Several officials said Carter, under increasing economic and political pressure, was moving away from his previous stance of refusing to talk about tax cuts until the budget is balanced to fight inflation, the newspaper said.

Officials reportedly cited three forces behind the president's decision: The economy appears to be in a steep recession, price inflation slowed in April and May, and both Ronald Reagan and Rep. John Anderson, the Republican and independent presidential challengers, favor tax relief.

The major uncertainty, according to the Times, was whether Carter would ask Congress to pass legislation to cut taxes before it adjourns

Asked for comment on the story,

White House press secretary Jody Powell noted that Carter has said several times that he would consider a tax cut for 1981 if the new federal budget shows fiscal restraint. But, he said, "we haven't made a decision on what we want to do, much less how

we'll announce it." All of the president's senior economic officers favor a tax reduction next year for both individuals and businesses, the newspaper said.

Officials told the Times that a decision on whether to make tax proposals with the mid-year budget would have to come by late next week. One official, asked if the review might include a tax statement, was quoted as saying, "a lot of people think that it is an appropriate time.

The review is due out July 14 or 15 and is expected to project a 1981 budget deficit of \$12 billion to \$20 billion, said the Times.

It also said there was speculation that the president might outline his tax program in a major policy statement at the Democratic Convention in New York in August.

# False attack alert was triggered by 46-cent item

WASHINGTON (AP) - Pentagon weapons experts might be thinking today about the old adage that for want of a nail the horse was lost, for for want of a rider, the battle was

The Pentagon announced Tuesday that two recent false alarms that the United States was being attacked by Soviet missiles were caused by the failure of a dime-sized computer circuit costing 46 cents.

But the alarms didn't trigger anything because duty officers at command posts quickly determined that an attack had not begun, Assistant Defense Secretary Gerald Dinneen

"We are confident we will catch all false alerts. ... We did on June 3 and 6 when the error was caught within two to three minutes," he told a Pentagon news conference.

"I see no reason to change the procedures" for monitoring the system, said Dinneen

After the alarm was sounded, B-52 and FB-111 bomber crews ran to their planes and started the engines, but no planes took off. Also, men on duty with the 1,054 U.S. intercontinental ballistic missiles were alerted, but there were no moves to prepare the weapons for launch, Dinneen said.

Dinneen stressed that the bomber warm-ups and the higher readiness of missile crews were precautionary measures and that there was no danger of launching nuclear war by mis-

Despite the failure of the small part, said Dinneen, satellites and other warning censors worked "without error.'

The Pentagon investigation indicated the small part wore out, rather than failed because of poor maintenance, he said. "This particular problem can be corrected by replacing the faulty integrated circuit

But he said that "w have decided to improve the error detection and correction capabilities of the North American Air Defense Command communications system to ensure that a similar hardware failure does not again cause an undetected error." That improvement can be accomplished through a "minor modification." he said

The failed circuit was not in the NORAD computers, but in a device that sends information into the communications system, which is linked with Strategic Air Command headquarters and the National Military Command Center in the Pentagon.

He said there "have been other incidents of this type," but would not

#### tranqualized horse that had been stranded in a Los Angeles canyon Tuesday. The horse fell down a rocky wash about 150 yads after slipping on a narrow rocky trail. The horse's rider was not injured, and the steed suffered only minor cuts and abrasions in the fall. (AP Laserphoto) Hearing scheduled on PPG plant here

Equine rescue

Animal control officers watch as a rescue helicopter brings in a

A public hearing on the plans of the Pittsburgh Plate Glass Industries fiberglass plant to be constructed southwest of Midland is scheduled for 7 p.m. Thursday in City Hall Council Chambers.

Don Postell, attorney for the Texas Air Control Board (TABC), stressed that the event will not be a public meeting for decision-making, but rather an opportunity for citizens to hear details on the plant.

Representatives from the plant will explain the functions of the proposed plant and will hear public input.

TABC representatives from Odessa and Austin will answer questions on emissions expected to come from the plant, based on data they are acquiring from their yet-to-be-concluded study.

Interested persons will be able to express opinions at the hearing, but comments will not be taken into official record

Thursday also is the deadline for the month-long period for public comment on the plant.

The industry first announced its plans to locate a plant near Midland in November 1978. It purchased 420 acres between Highway 80 and Inter-

The event will be an opportunity for citizens to hear details on the plant and to express opinions.

state 20 directly across from Airline Mobil Home Park.

Initial plans call for a 750,000 square foot building and should employ 1,000 to 1,200 persons. Midland City Council recently approved extending water and sewer lines to the

At the time of the announcement, a PPG official said that preliminary planning suggested a final completed facility with a production capa. 'ty of about 250 million pounds of continuous filament fiberglass per year.

# Americans are saving more, spending less

WASHINGTON (AP) - Americans are saving more and spending less as the deepening recession staggers income and further decimates a reeling housing industry, government figures show.

The Commerce Department reported Tuesday that people saved 3.9 percent more of their income in May than in April and spent 0.1 percent less. At the same time, personal income - including wages, salaries, rents, stock dividends and interest, minus Social Security payments — actually increased a scant \$3.1 billion, or 0.1 percent. But that did no more than offset an April decline, the first since July 1975, and leave the annual rate the same as two

months ago at \$2.07 trillion. The figures represent a reversal over the last few months as Americans switch from bedging against inflation to cushioning against recession. Savings at an annual \$85.1 billion in May resulted in a savings rate of about 4.9

percent of after-tax income, compared with 4.5 percent in April and a recent low of 3.4 percent in December, the report showed. May was the second straight month of decrease in personal spending. The

purchase of long-lasting items such as appliances, furniture and cars, declined more than \$23 billion in April and May. Savings traditionally increase during a recession, as people try to prepare for

possible job layoffs or cuts in overtime pay, economists say. But while these savings provide mortgage money, they have done little to help the depressed housing industry. The fear of losing jobs or some income is keeping people from entering the home market, even as inflation is easing and interest rates are dropping, economists say.

The Commerce Department said housing starts plunged 11.5 percent last month, the fifth consecutive monthly decrease. May's seasonally adjusted, annual rate of 920,000 starts was the third lowest level in history, and was 49 percent below a year ago.

Not since February 1975 - during the depths of the last recession - have housing starts been so low. "I would not underplay the difficulties facing homebuilders. They are

critical," said Commerce Secretary Philip Klutznick. Michael Sumichrast, chief economist of the National Association of Homebuilders, estimates that unemployment in the housing industry has reached 926,000, and he anticipates little job relief until later this year.

At the current pace, it will take 12 months to sell off the inventory of homes, he

Sumichrast said the housing slump may be bottoming out, but the recovery will be slow and agonizing.

Klutznick also pointed to a slight increase in building permits in May as a sign that construction activity may be stabilizing. However, James Christian, a senior economist for the U.S. League of Savings

Associations, was more pessimistic. He predicted the housing slump will not end until late summer, partly due to the recession but also because mortgage rates will not soften much more.

# Anderson says he alone can save U.S. from Reagan

By The Associated Press

John B. Anderson says that he alone stands in the way of the election of Ronald Reagan, "the former leading player for 18th Century Fox," as the nation's next president.

Anderson wrote off President Carter's chances when he declared in Hartford, Conn., Tuesday that "If I am not in the race, then ... Reagan can be picking his Cabinet.

The Illinois congressman based his assessment on a selective interpretation of national polling data released earlier in the day. But the fact remained that both the Gallup and Roper polls showed Carter within narrow striking distance of Reagan while Anderson was still in the preferential cellar.

Anderson chose to point to Gallup's figures showing that the president's approval rating has fallen to 33 percent, compared with 61 percent last December. And that, said Anderson, means that unless he pursues his independent candidacy, Reagan 'won't have any opposition, he is so far ahead of Jimmy Carter.'

But despite the decline in Carter's approval rating, Gallup showed the president in a virtual dead heat with Reagan, whether or not Anderson is in the race. In a two-way race, Reagan led Carter 45 percent to 42 percent; in a three-way battle, it was Reagan 36, Carter 35 and Anderson 23 percent. Given the poll's margin of error, that makes it too close to call in either case.

The Roper survey gave Reagan 40 percent to Carter's 36 in a two-way campaign. Curiously, Roper found that throwing Anderson into the equation would hurt Carter a bit more than Reagan while the Gallup poll found the reverse. Roper's three-way figures were Reagan 34, Carter 29 and Anderson 20. In other developments:

-Reagan, in New York, met with a just-formed business advisory council of 40 top executives, including William M. Batten, chairman of the New York Stock Exchange. The prospective Republican nominee headed to Washington today, but planned no public appearances until an evening fundraiser in behalf of Citizens for the Republic, a conservative issues and lobbying group which he used as a political power base between presidential campaigns

-President Carter's backers easily outvoted Sen. Edward M. Kennedy's camp during the initial drafting session Tuesday for the 1980 Democratic platform. The 15-member drafting subcommittee, on which only five Kennedy supporters sit, met again today behind closed doors, but it was clear the document would differ markedly from the 1976 issues statement by espousing the more conservative economic policies now favored by Carter.

-The Carter-Mondale campaign invited all of the President's nearly 2,000 convention delegates to visit Washington next month for pep sessions which almost doubtlessly will include a drop-by at the White House. Two obvious purposes: to keep them in line against Kennedy attempts to raid their ranks and to collect intelligence which might be useful in the fall campaign.

-Senate Minority Leader Howard H. Baker Jr. of Tennessee predicted a landslide victory for Reagan which would bring with it GOP control of the House and Senate. "This is going to be the biggest Republican year since 1952," he said.

Anderson, who headed into Ohio today, said in Hartford Tuesday that Reagan threatens to lead the nation into "the biggest arms race we've ever seen.

### Reagan leads in new polls

NEW YORK (AP) - New Roper and Gallup presidential polls show Ronald Reagan edging President Carter alone or in a matchup including independent candidate Rep. John Anderson, R-Ill. Head-to-head, the Republican for-

mer governor of California was preferred over Democrat Carter 45 percent to 42 in the Gallup poll and 40 percent to 36 in Roper figures. In a three-way contest to include

Anderson, the Gallup results favored Reagan with 36 percent to 35 for Carter and 23 for Anderson. Roper results were Reagan 34 percent, Carter 29 and Anderson 20 The Roper survey of 2,000 voting-

age persons was taken June 5 to 12. In a poll five weeks earlier, Carter had a 14 point lead over Reagan.

Volatile may be an overworked cliche in this year's election," the Roper group said, "but there is no other word to describe the present state of the electorate — unless it is

Gallup pollers questioned 1,224 persons last weekend.

The Roper poll's margin of error was estimated at 3 percent, and the Gallup poll's at between 2 percent and

# Physician testifies he organized tax protests

By ED TODD

Dr. Austin B. Tibbetts, testifying in his own defense in a tax-evasion trial in federal court in Midland, said Tuesday that he has been organizing tax protest meetings since 1965 to "discuss the tax system and other acts of government which we felt were not consistent with good government. It's that simple.'

Tibbetts, a 59-year-old osteopathwho organized the United Tax Action Patriots in Midland in the mid-1970s, has been accused by the U.S. Internal Revenue Service with tax evasion and failure to file proper 1040 Forms for the years 1974, 1975 and 1976.

However, Tibbetts claims that he legally "avoids" payment of taxes rather than criminally evading and defeating the tax system.

"I use the word 'avoid' rather than 'evade," the tax protest leader was quoted in a 1978 videotaped film, which U.S. District Judge Lucius D. Bunton allowed to be played before the federal petit jury. "The courts make a special distinction between 'tax avoidance' and 'tax evasion,'"
Tibbettshad said.

UNDER QUESTIONING by Mark McClellan, his co-counsel, Tibbetts said the objective of the UTAP was "to get people to come to public meet-ings and to make a concerted effort to study the Constitution, especially the Bill of Rights,... (to become) aware of government functions and what their (the people's) rights are, to take an active participation (in political pro-

cesses), and to register to vote." But Tibbetts said UTAP's "main goal" was to repeal the U.S. Constitution's 16th Amendment, ratified in 1913 and which authorized the levying of the income tax.

While Tibbetts was testifying, about25 Tibbett sympathizers sat quietly in the courtroom. Just outside, two armed officers wearing uniforms of the General Services Administration's Federal Protective Service scrutinized visitors to the third-floor courtroom of the George Mahon Federal Building and checked for prohibited items, such as weapons, tape recorders and cameras.

Tibbetts operated Lee Optical as an eye doctor in Midland from 1965 to 1976, when he relocated to Amarillo to manage a more lucrative prac-

Even before that, Tibbetts said he was aware that he was under surveillance by the IRS.

IN EARLIER testimony by prosecution witnesses, IRS Special Agent Rex Stewart said he was assigned to surreptitiously attend a Tibbetts-led UTAP meeting in the Amarillo YMCA on June 22, 1978. He said he signed his name at the meeting as "Rex Stuart" to conceal his identity

'Dr. Tibbetts stated that he had not paid any income tax for the past six years," Stewart said under questioning by Assistant U.S. Attorney Wayne Speck of San Antonio

Stewart said Tibbetts told the tax protesters that they should use bank (See PHYSICIAN, Page 4A)

A thick column of steam belches from the crater of Mount St. Helens while Mount Hood, a dormant volcano across Oregon's Columbia River, remains white in contrast to the ash-blackened slopes of its neighbor. Mount St. Helens was quiet Tuesday, but geologists warned that the volcano remains explosive. (AP Laserphoto)

# Lava, more eruptions possible

VANCOUVER, Wash. (AP) - Geologists say that million due to reduced shipping activity because of lava could start oozing from a dome growing inside the Mount St. Helens crater and that as many as seven other volcanoes in the Cascade Range could start erupting at any time.

H. William Menard, director of the U.S. Geological Survey, said Tuesday the other Cascade volcanoes have erupted at about the same time in the past, and it could happen again.

Menard first mentioned the possibility of simultaneous eruptions over the next 10 or 15 years last week during testimony before the U.S. Senate Appropriations Committee

He mentioned the possibility again Tuesday in

"If the past is the best teacher, we'll have to expect eruptions from other volcanoes in the Cascades," he

Asked to explain Menard's position, Clem Shearer, USGS geologist, said:
"We could have half a dozen or more of these

things go off at one time. There is a distinct possibility of all these things going off at once."

Other volcanoes in the Cascades include Mount Rainier and Mount Baker in Washington and Mount Hood in Oregon.

Shearer said Menard meant that the other volcanoes could erupt "at approximately the same time. And by that we mean in say 10 to 15 years, although there may be some overlap. They could go off at once or over a period of time; it could be either one of those possibilities, but we can't say which.

Meanwhile, another USGS spokesman said a dome forming in the crater of Mount St. Helens could turn into a lava flow. "If that dome kept rising and was fluid enough, it

could begin moving out to the north...through that breach in the crater," Donal R. Mullineaux said Tuesday. He said further observation was needed to deter-

mine whether there had been any movement in the molten rock dome since it began forming after the volcano's last major eruption ended early Friday. At last report the dome measured about 660 feet in diameter and 132 feet in height.

Oregon Gov. Vic Atiyeh on Tuesday asked President Carter to declare his state a disaster area because of the volcano.

Atiyeh cited problems with ash from the volcano's last outburst - which Tuesday forced Portland officials to extend an air pollution warning - and "serious economic consequences" to the Port of Portland from mud that has made the Columbia

River impassible to large ships. Port officials estimate losses of as much as \$5

Halstead Harrison, associate professor of atomspheric sciences at the University of Washington in

top May 18, killing at least 24 persons.

"Our lousy June has nothing to do with the volcano," Harrison said. He said that although some of the ash from Mount St. Helens had spread through the stratosphere, which begins about 10 miles above the earth, the ash probably was blocking only one-tenth of 1 percent of the sunlight.

much of Oregon and Washington with volcanic ash.

The volcano has exercised a much more devastating influence on fish, said Lyle Burmeister of the U.S. Forest Service.

He told said Tuesday that volcanic ash had killed insects along lakes and streams, further diminishing the chances of survival for fish in heavy ashfall areas. Earlier tests showed fish were bleeding to death from gills scraped by the ash.

And USGS Director H. William Menard said his agency had gone \$1.5 million in the red from monitoring the volcano.

He said he asked Congress last week for another \$4 million to continue research but insisted that scientists "will stay here as long as there is a hazard."

#### No damage, injuries reported in quake

WATSONVILLE, Calif. (AP) - A moderate earthquake that shook residents of the South San Francisco Bay area Tuesday night was centered near this Santa Cruz County town, the University of California Seismographic Station said. There was no immediate report of damages or

injuries.

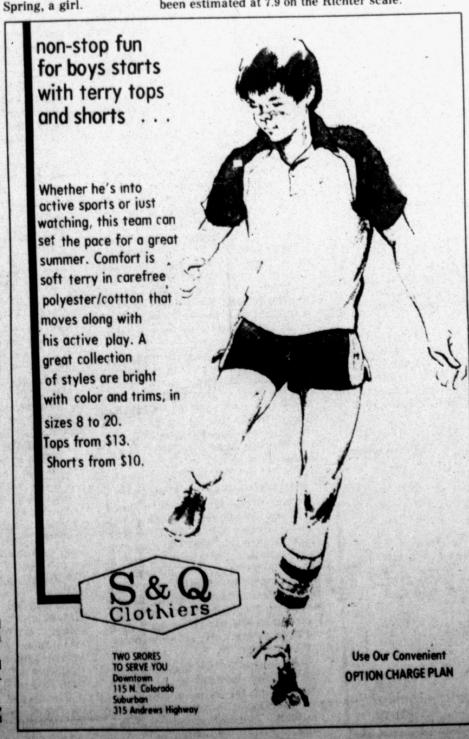

Patty Murtha, a research assistant at the Berkeley station, said the quake measured 4 on the Richter scale and was reported at 9:52 p.m. PDT.

The tremor was felt as far north as Fremont, 50 miles away. Wastsonville is a farming area in the Salinas Valley, located about 25 miles south of

The Richter scale is a measure of ground motion as recorded on seismographs. Every increase of one number means a tenfold increase in magnitude. Thus a reading of 7.5 reflects an earthquake 10 times stronger than one of 6.5.

An earthquake of 3.5 on the Richter scale can cause slight damage in the local area, 4 moderate damage, 5 considerable damage, 6 severe damage. A 7 reading is a "major" earthquake, capable of widespread heavy damage; 8 is a "great" quake, capable of tremendous damage.

The San Francisco earthquake of 1906, which occurred before the Richter scale was devised, has been estimated at 7.9 on the Richter scale.

# Container firm signs with Big Spring Industrial Park

BIG SPRING - A new industry which will manufacture two-litre plastic soft drink bottles has signed a lease with options extending for 99 years on a 92,000 square foot building at Big Spring Industrial Park.

The announcement was made Tuesday by Western Container Corp. President John Dunagan.

Western Container was organized by 20 Coca-Cola bottlers in the southwest. Big Spring was selected as the site for the new manufacturing operation because of the available building and because of the Cosden Oil and Chemical Co. research project on small plastic containers, also being conducted at Big

Western Container Corp. was financed by \$41/2 million in revenue bonds issued through the Howard County Industrial

Development Corp. The bonds were purchased by the First City National Bank of Houson.

The new industry initially will employ 45 people and operate 24 hours a day, seven days a week. Employees will work 12 hour shifts and will work four days with three off and then work

three days with four off. Employment will be handled through the Texas Employment Commission.

The plant is expected to produce 25 million to 30 million two-litre bottles per year. Plant manager will be Bob Jackson. Projections indicate the company will indirectly spawn an additional 80 jobs in the Big Spring community and the annual economic impact on the state of Texas should be about

# Turn tax dollars into savings with your own Survival Kit."

Taxes wreak havoc with traditional methods of saving. They can ruin your plans for your financial future, for your

Federal and state income taxes combine to take 35%, 50%, 70% and even more of the interest earned by your

But the Survival Kit provides longterm deferral of those taxes. The dollars that otherwise would go for taxes are left to compound and to earn interest on themselves. Depending on your tax bracket and the length of time you keep

your money working, your savings can grow twice as fast. Or more.

Putting tax dollars to work for you can make all the difference in your planning for your future or your retirement years.

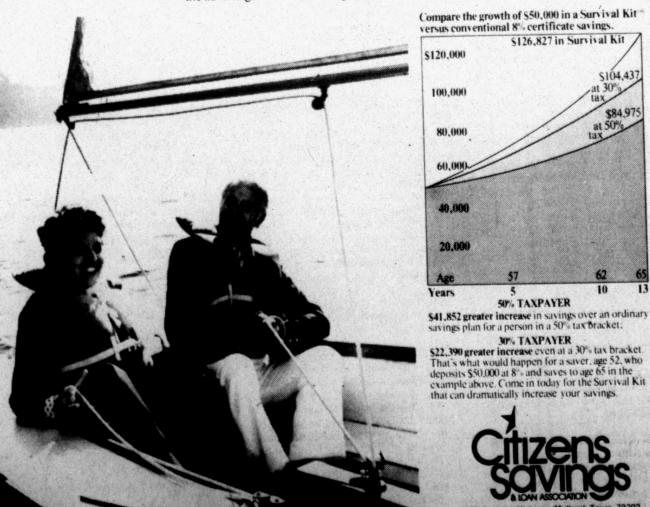

The Survival Kit can offer you this lifesaving advantage in growth because it is a group annuity plan underwritten by American Life and Casualty Insurance Company. But it is nothing like the traditional annuity which holds funds at a low, fixed rate of return.

Instead, the Survival Kit combines the advantages of a modern, high-return

certificate savings account with the . advantages made possible by this group annuity plan. In addition to the allimportant deferral of taxes, you gain surprising withdrawal privileges, a variety of estate-planning benefits, and the option of choosing between lifetime retirement income payments or any other form of withdrawal that meets your needs. You are the one who decides how

to withdraw your funds, and when. Call us today for full information on all the ways the Survival Kit can brighten your financial future.

# CETA jobs unfilled while jobless list grows

Carter administration pondering what to do for recession relief

WASHINGTON (AP) - The number of Americans out of work has swelled by more than 1.5 million this spring, yet 69,000 government-financed CETA public service jobs remain unfilled, the Labor Department

The department's problems in filling the Comprehensive Employment and Training Act job slots while unemployment is soaring underscores the debate within the Carter administration over what, if anything to do to counter a recession that threatens to send unemployment even higher.

Labor Department officials and leaders of organized labor have been urging President Carter to loosen his hold on the federal purse strings and propose expanded job-creating programs.

So far, Carter's top economic advisers have rejected those pleas. Instead, the administration is sticking to its current policy of fighting inflation through spending restraints rather than fighting a recession with increased government spending.

Carter has promised to reconsider anti-recessionary measures if the economy continues to deteriorate, and the administration has been reviewing steps it might take to lower unemployment, which has jumped from 6.2 percent in March to 7.8 percent in May - the steepest two-month rise in more than three decades.

But advocates of job-creating programs say the president's advisers have not tipped their hand as to what they may do or when they may do it. "There's no clear indication one way or the other, whether to do some

thing dramatic or to tough it out," said one Labor Department official,

who declined to be named. Another department official, also requesting anonymity, commented: We're all pretty cyttical about the chances of them (the White House) doing anything. If they do propose something, it would probably be a tax

The AFL-ClO wants Carter to move immediately against the recession with a variety of spending programs to stimulate employment, but the federation's leaders have doubts about whether a president who has been criticized for changing economic directions too often would risk another change of course

"I suspect they would love it if unemployment didn't get any worse, inflation comes down and interest rates come down so they won't have to do anything," said an AFL-C10 official.

But if the jubless rate keeps climbing to 9 percent or higher, as some economists now predict, the pressure will be building on Carter to propose public works projects and similar counter-recessionary programs One source of debate is over what measures the government should use

and whether they would work as intended. The Labor Department wants the CETA program expanded, yet it has been able to fill only 381,990 of the 450,000 job slots for which it has

money this fiscal year. As of the end of May, local CETA programs had filled 192,000 of the 250,000 positions available for the so-called "structurally unemployed"

poor, ill-educated youth chronically out of work. Of the 200,000 positions reserved for those who lose their jobs during recessions, 189,000 were

A budget-conscious Congress, meanwhile, has voted to eliminate 100,000 CETA jobs by the end of fiscal 1981. Ironically, all the cuts would affect those left jobless by recession - the section of the program that the government has been most successful in keeping nearly filled.

Assistant Labor Secretary Ernest Green said some of the job-creating money has not been used because of constant uncertainty over how much Congress would give CETA from year to year. He said local governments also have had trouble creating jobs that meet the average annual salary limit of \$7,800 set by Congress without violating union contracts or civil service rules.

Green said the department is taking "aggressive steps" to redistribute CETA money so that a maximum number of jobs can be created.

There is another paradox about the government's use of CETA to counter rising unemployment. Under a formula in an existing law, the number of CETA job slots rises as does the jobless rate, providing Congress agrees to spend the money. But most of those who lose their jobs in a recession may not be eligible for a CETA job, anyway.

Green estimated that 60 percent to 65 percent of the 1.7 million people who lost their jobs during April and May are skilled workers in the auto, steel and rubber industries who do not qualify for CETA jobs. In addition, anyone receiving unemployment compensation is not eligible.

# Turtle race moved

were grooming their animals for a heated race Thursday in Wadley-Barron Park will have to change plans. The city Parks and Recreation Department announced the race will be in Hill Park, located off Cuthbert Avenue between F and G streets.

The race will still start at 2 p.m. Prizes will be awarded to first, second and third place turtles. And two additional races have been added.

An entry fee of 10 cents will be charged for each turtle entered.

After the turtle race, the city is sponsoring the sixth annual Frisbee distance throw with top finishers winning prizes. It will be divided into three age groups: 6 to 8 years, 9 to 13 and 14 and up.

Free soft drinks will be available for all who participate or just want to

M.L.

## **Brothers** sentenced and fined

U.S. District Court Judge Lucius D. Bunton in federal court here Tuesday sentenced two Amarillo brothers each to a five-year term in the pentitentiary, fined them \$10,000 and then ordered them on special parole for 10 years following their prison terms.

The brothers, Jerry Wayne Deas, 35, and Ronny Mack Deas, 30, were arrested Jan. 24 in Odessa and indicted for possession with intent to distribute a quart of methamphetamine, a narcotic stimulant. They pleaded guilty May 23.

Bunton said that the men, who previously have served prison time, do not have "what I would call 'desireable records."

"It's pretty obvious to the court that you have not learned your lesson," he told the brothers who, Bunton said, were motivated by "economic reasons" to deal in criminal activity.

Neither brother offered strong arguments for light sentencing, although the older brother, Jerry Wayne, said he had a wife and two children to support and that he has "a good job." He

was self-employed.
"I know I've done
wrong on that," he said of the offense.

His brother said he only had "a good job," and no wife and no children. He was a cattle

"She deeply loves you," the judge told her father, and "... She recognizes that you need to be punished.' And the judge sentenced Lonnie M. Bartley, 39, to 10 years in prison for embezzling \$22,200 from banks in 1978 and 1979. His ex-wife cried. He had pleaded guilty to the four-count indictment on May 23. "I'm well aware of the fact that what I did was

## Wood jury completes first session

SAN ANTONIO, Texas (AP) - A special grand jury empaneled to investigate the unsolved assassination of a federal judge heard briefly from the brother of a reputed Mafia kingpin before ending its first session.

Joseph Marcello, a New Orleans restaurateur and brother of Carlos Marcello, spent about 10 minutes in the grand jury room late Tuesday. The jury, empaneled only hours before, then adjourned until today.

Meanwhile, Carlos Marcello, 70, the "Little Man" who has been fighting deportation to Italy since 1953, was indicted Tuesday by a grand jury in New Orleans on racketeering, mail fraud, wire fraud and conspiracy charges. The federal grand jury was looking into the FBI's undercover Brilab, or bribery-labor, investiga-

Chief U.S. District Judge William Sessions sealed all subpoena records when he empaneled the San Antonio grand jury in open court Tuesday. He also sealed records containing the

juror's identities. "I chose to seal them (the records) because it is a special grand jury,' Sessions said. "I would not comment on its purpose.

U.S. Attorney Jamie Boyd had said earlier the panel would look into the unsolved 1979 assassination of U.S. District Judge John H. Wood Jr. and a 1978 attack on then-Assistant U.S. Attorney James Kerr.

Boyd said he believes the attacks on Wood and Kerr were ordered by those with a multi-million dollar stake in illegal drug trafficking. The Kerr investigation has centered largely around a motorcycle gang

Marcello would not comment on his appearance.

Another New Orleans restaurateur, Cirro Callico Sr., also was subpoenaed and asked to return today. New Orleans attorney Bill Crull, who accompanied Callico, said, "He can't tell them anything about the assassination. They think he may have some after-the-act information from some guy who went into his restaurant in

The 12-year veteran of the alcohol-

ism counseling field said, "The idea of

decriminalizing alcoholism - the

idea of taking the drunk out of the

court - won't help them one iota. No

alcoholic will ever be motivated to

change his lifestyle until he can hurt

(Continued from Page 1A)

money orders and not bank checking accounts and should "operate strictly with cash and with bank money

The indictment charging Tibbetts with tax evasion alleges that he shunned a bank checking account and opted to carry out business transactions with cash and money orders to "defeat" the income tax system and to conceal his income. Tibbetts, however, maintained that he stopped using checking accounts, for he had a "bad experience" with a bank in Houston in the 1950s.

Stewart said Tibbetts asserted that "a person should not keep records" but "if they did keep records, (they) should not turn them over to the Internal Revenue Service." Furthermore, the agent reported Tibbetts said the tax protesters "should claim enough exemptions or allowances to decrease their withholding (tax) to

THE IRS AGENT said Tibbetts suggested the tax protesters should use the Fifth Amendment document, as well as the First Amemdment on basic rights, in filing their income tax forms, which would not list any money figures.

Stewart claimed Tibbetts said that those who do so might face criminal charges and might end up in the federal prison.

"The federal penitentiary was more or less a country club atmosphere, where you could sharpen up your tennis game, golf game and go swimming," Stewart said the defendant had opined.

Dr. Tibbetts said he looked forward to taking his vacation in the federal prison," Stewart testified. In his testimony, Tibbetts said his impressions of federal prisons is that

they "look like country clubs." He said he recalled saying "The Watergate burglars had had a vaca-

## Revolutionary Communist Party members stage protest at Alamo

SAN ANTONIO, Texas (AP) -Against a backdrop of a hostile crowd singing "God Bless America," about 20 members of the Revolutionary Communist Party paraded peacefully in front of the Alamo to protest the trial of five party members.

Many of the 200 onlookers taunted the demonstrators who were chanting and waving red banners. Others engaged them in heated debate and at least one person spat at them, eyewit-

The five party members are on trial for disorderly conduct charges stemming from a March 20 protest on the roof of the historic mission-fortress.

Three Houston members of the Maoist party scaled the Alamo walls, replaced the Texas flag with a red banner and shouted revolutionary slogans for about 40 minutes before being arrested.

The misdemeanor charges were filed against Damian Garcia, 31; Abigail Bayer, 33; Hayden Steel Fisher,

31, and three supporters who remained on the ground.

Garcia was stabbed to death and Fisher was injured while distributing leaflets a month later in a Los Angeles housing project. Municipal Judge Benjamin Sam-

ples refused Tuesday morning to dismiss the charges. The trial was expected to begin today. The other three RCP members on

trial are William Grant Chavez, 33, of San Jose, Calif.; James Daniel Callahan, 22, of Oakland, Calif., and Patrick Clements, 22, of Westminster, Calif. Tuesday's noontime rally was to

protest the trial, Garcia's death and the Alamo itself, which the RCP members feel is a "hated symbol of

Outlaw.

the oppression of the Chicano peo-"The Alamo is a symbol of imperialist oppression. That's just as true today as it was back ... in the Mexican War," said spokeswoman Mary Jean

mining a pool of prosecution-approved jurors next week.

Judge James Long has told prospective jurors he does not plan to sequester the panel during the trial. Five sympathizers of the Communist Workers Party died when gunfire erupted from cars passing the Nov. 3 rally here.

The defendants, each charged with five counts of first-degree murder and one count of felonious riot, face life in prison or death if convicted. The defendants are Jack Fowler and Roland Wood, both of Winston-Salem; David Matthews of Newton; Lawrence Morgan and Coleman Pridmore, both of Lincolnton; and Jerry Smith of Maid-

The prosecution accepted eight jurors Tuesday, bringing their total to 13 - two white women, one black woman, three black men and seven white men. Prosecutors dismissed eight candidates who told the court they would not vote to impose the death penalty - North Carolina uses the gas chamber - under any circumstances.

The court proceedings moved placidly. Although two dozen CWP protestors demonstrated near the courtroom Monday, none furned up Tuesday. Most of the day, the courtroom was more than half empty, but sheriff's deputies continued to search all who entered.

Lloyd R. French, 75, 1408 Community Lane and longtime Permian Basin oil pioneer, died Tuesday morning at his residence following a lengthy ill-

Graveside services were to be at 11 a.m. today in the Greenleaf Cemetery in Brownwood with the Rev. Sam Hulsey, pastor of the Episcopal Church of the Holy Trinity in Midland, officiating. Services were to be directed by Morelock Funeral Home of Brownwood. Newnie W. Ellis Funeral Home handled local arrange-

French was born Aug. 14, 1904, in Brownwood, where he was reared and attended school. He moved to Odessa, and shortly afterwards founded French Tool and Supply of Odessa. He served as president for many years. He was actively involved in the oil business in Alaska. French moved to Midland in 1950. Recently he was honored by having the oil show dedicated to him. He was the first president of the Permian Basin Oil Show, and one of the co-organizers of the Midland Petroleum Club and of Odessa Country Club.

Survivors include his wife, Elizabeth Williams French; two sons, L.R. French and Kirk French, both of Midland; a daughter, Mrs. Alex (Julie) Patterson of San Antonio; a brother, Joe French of Odessa; eight grand-

children, and a great-grandchild. The family requests memorials be directed to the Allison Permian Basin

#### Antonio Fierro

Cancer Therapy Center.

BIG SPRING - Services for Antonio R. Fierro were to be at 10 a.m. today in the Sacred Heart Catholic Church. Burial, with military honors. will be in Mount Olive Memorial Park directed by Nalley-Pickle Funeral

Fierro, 68, died Monday in a Big Spring hospital after a long illness. Fierro was born May 10, 1912, at Big Spring. He was a lifetime resident of Big Spring and a member of Sacred Heart Catholic Church. He was a disabled army veteran, having served in the European Theatre during World War II and was awarded the Purple

Survivors include two brothers, Martin Fierro of Odessa and Aniceto Fierro of Big Spring; two sisters, Victoria Hernandez ad Stella Gonzales, both of Big Spring; and a number of nieces and nephews.

However, underground leaflets known as "night letters" have been warning of reprisals against Kabul residents supporting the country's Marxist government.

MUMS

Many colors to

# . missiles will be based in Britain

LONDON (AP) - Reaction was mixed today in the two English villages picked as bases for a total of 160 U.S.-made nuclear cruise missiles. Some residents vowed to fight the decision, as did anti-nuclear activitists who say it makes Britain a prime target for Soviet attack

The government of Prime Minister Margaret Thatcher announced Tuesday that it will place the mediumrange missiles in the villages of Molesworth and Greenham Common. about 60 miles north and west of London respectively.

The cruises, due to be installed in 1983 under the decision announced Tuesday by Defense Secretary Francis Pym, will be the first land-based U.S. nuclear missiles stationed in Britain, although the U.S. and British navies have had submarine-based missiles in Scotland for 20 years.

The cruises are among 572 new U.S. nuclear missiles - 464 cruises and 108 Pershing II rockets - being located in Western Europe as the North Atlantic Treaty Organization's response to the Soviet build-up of SS-20 mobile missiles aimed primarily at Western Europe.

The bulk of the rest of the 572 cruises and Pershings are to be stationed in West Germany and Italy although some are to be placed in Belgium and the Netherlands

The Kremlin has said installation of the U.S. missiles will disrupt the balance of power in Europe and warned that it will expand its own missiles program. According to the Londonbased Institute for Strategic Studies, the Soviets have about 690 mediumrange missiles, including 100 SS-20s.

A spokesman for Britain's Campaign for Nuclear Disarmament said the decision to station the missiles in Britain "makes our country, already hosts to the biggest single concentration of American nuclear fire power overseas, America's number one forward base, and consequently the Russians' number one target for a pre-emptive or retaliatory nuclear

Joan Ruddock, chairman of the Newbury local branch of the opposition Labor Party covering Greenham, said an opposition campaign would be launched immediately.

"The Cruise missiles are a deadly threat to us all and place this part of England in the front line of any future

nuclear exchange," she said. She added: "I believe it is our responsibility to see that the Cruise missiles do not come to Greenham, not just for the sake of those of us who live in the area but for the sake of

Lawmakers on the left wing of the Labor Party also attacked the decision. One of them, Bob Cryer, called it "a distinct escalation of the arms

race." At Greenham Common, where the Cruises are to be stationed on a U.S. Air Force standby base, Christopher Ayling, landlord of the Swan tavern, has pinned up a notice saying: "Any discussion of cruise missiles in this bar is absolutely forbidden."

Earlier this year the defense ministry ruled out U.S. proposals to base KC-135 aerial tankers at Greenham Common on grounds it was too near the Aldermaston atomic weapons research establishment and surrounded by residential areas. The tankers plan created massive local opposition, but not so the cruises.

#### made for cancer patients New marijuana pills may

WASHINGTON (AP) - The federal government, widely expanding the allowed medical uses of marijuana, may soon make pills containing a derivative of the drug available to cancer patients.

The prescription pills would be sold through hospital and cancer center pharmacies to help chemotherapy patients avoid the violent side effects of the treatment.

The National Institute on Drug Abuse is rushing to make a million pills containing the marijuana derivatute says they could be dispensed for therapeutic use by early fall.

Dr. John Macdonald, the institute's associate director for cancer therapy, said the pills could help up to 100,000 cancer patients avoid the often-violent nausea and vomiting that frequently accompany chemotherapy.

If the plan goes through, it will be the first time the government has made any form of marijuana available on a broad scale for medical use outside of tightly controlled experiments. Some patients with glaucoma

BEFORE RECHARGING.

Use of the pills still must be approved by the Food and Drug Administration, whose Oncology Advisory Committee plans to discuss it at a meeting June 26.

"They will almost certainly recommend its approval," Macdonald predicted.

A FDA spokesman, who asked not to be identified, noted the agency has been trying to encourage efforts to make marijuana more widely available for cancer patients.

Macdonald said the cancer institute

hospitals around the country, where 2,000 to 10,000 doctors would be authorized to write special prescriptions for the pills for their patients.

If there is no cancer center or medical school in a large area, he said, the institute may seek to dispense pills through a community hospital's pharmacy but not through commercial pharmacies.

Normally, only 2,000 to 3,000 oncologists, or cancer specialists, are authorized to prescribe experimental cancer drugs. But Macdonald said,

Twenty-three states have legalized the medical use of marijuana since 1978, but it still is legally available only through the federal govern-

About 800,000 Americans are struck by various forms of cancer each year, and 200,000 undergo chemotherapy. About half of them can use conventional drugs to avoid nausea and Macdonald said 21/2 years of controlled studies have shown that marijuana has a "good, beneficial effect"

Macdonald said five- to 10-milligram capsules generally are given to patients four to eight hours before chemotherapy starts and are continued every four hours until it stops.

The pills do make patients "high,"

Macdonald said.

Some older cancer patients who might not have used marijuana, alcohol or any other mind-altering drug may be uncomfortable with it and cannot take the pills, he said. Also, it is not recommended for heart patients because marijuana can speed

has been c

# ale co-ed working on bchelor's degree in Barbie

By MARTIN J. WATERS

NEW HAVEN, Conn. (AP) - One of Yale University's "scholars of the house" is studying a doll house.

When she's through, Ella King Torrey will have a bachelor's degree in the Barbie doll, which she views as a cultural artifact showing American society's "incredible consumerism, an obvious obsession with the more

beautiful self." Ms. Torrey is one of about a dozen seniors in Yale's Scholars of the House program, which frees students from formal course requirements so they can pursue approved research

not only with doll houses, but also with examples of the changing models of Barbie - the forever young, shapely and beautiful plastic figurine.

"She certainly is the icon of the 'me generation," said Ms. Torrey, "a denial of any sort of tradition."

No other doll before or since has approached Barbie's popularity.

Ms. Torrey, who admits having a Barbie doll as a child, figures that at least 120 million of the dolls — Barbie and her friends and relatives - have been sold since Mattel Inc. of Hawthorne, Calif., introduced the products in 1959.

Sales of the dolls and accessories have topped \$1 billion, Ms. Torrey

Ms. Torrey, a 23-year-old Philadel-phia native, jokes about her academic endeavor, which she expects to finish

next spring. "I don't have to go to any classes. I just play with my dolls," she said.

Ms. Torrey's research is due to culminate in an exhibition at Yale or in New York City — and eventually a book - on the history, development and meaning of the Barbie doll and its jumble of related dolls, doll costumes, houses, cars, recreational equipment and spin-off products.

What does this doll scholar think it all means?

'Barbie was designed to meet any little girl's fantasy. She's associated with the American Dream. Children notions of the American Dream from their parents and from the society at

"The doll changes each year. It's always bigger and better and more deluxe. Barbie is one of our heroes, and maybe that's because there are so few real heroes," Ms. Torrey

said. "A society needs something that personifies its dream of itself, and maybe she's it.

Ms. Torrey originally was majoring in art. Then along came Barbie.

"I was very drunk one night in December 1978 with a bunch of friends," Ms. Torrey said in her blunt style. "Someone just said, 'Wouldn't you love to see a book on the Barbie

"I sort of woke up and said, "That's it. That's it."

Ms. Torrey, drawing on her experience as a museum exhibition organizer in London and Boston during a year in which she took a break from college, decided to organize an exhibition on the Barbie doll - she calls it a 'socio-cultural examination of art -

and artifacts. She began studying the doll's evolution and collecting objects for the exhibition, with Yale paying some of

the costs. Barbie is surrounded by a changing array of several dozen other dolls, including her boyfriend, the Ken doll. Clothes and accessories range from a \$1 set of hangers to the latest model of

Barbie's world has evolved along with her appearance, Ms. Torrey said, explaining: "In 1964, she was sort of the big girl from the small town, going to college, really a rather practical dream. By 1977, she became a superstar, that's what they called it, putting her way out of reach of the average little girl, with no indication of how to achieve the dream.

Why do we want our idols to be so far away? Are our lives, this society. so unstable that we don't want them near? If the dream is beyond reach, then we don't really have to strive for

Mattel has been helping Ms. Tor-rey, although not financially.

999999999999999999999

DEADWOOD, S.D. (AP) - Deadwood's houses of prostitution have been in business since Wild Bill Hickok was shot to death in a nearby saloon. Now their doors have been padlocked, but some folks in this old gold mining town say they'll fight to keep alive a colorful remnant of the

More than a century of tradition ended Tuesday when a circuit judge signed an injunction allowing authorities to close the controversial brothels. The houses, which have operated since 1876 while city fathers looked the other way, will be closed at least through the summer. A hearing on a permanent injunction is expected sometime in Septem-

ber. In the meantime, debate over the issue will continue in the Black Hills tourist town of 2,500.

Supporters of the women who earn their living in the brothels collected more than 1,000 petition signatures in an effort to keep the houses

They contend the dozen-or-so houses attract business to the area, and they point out that local madams have always given generously to

But others say the town can do without the reputation it has earned through the brothels

"I don't want to take away from what has happened," said resident Thomas Blain of the role of prostitution in Deadwood's history. "But we don't have opium dens anymore, they don't shoot people on the streets anymore. Heritage is a thing of the past, we should leave it there." Some businessmen have warned that a permanent shutdown will hurt the town financially. One madam estimates her business at \$5,000 a week.

Annually, the figure approaches an estimated \$1 million. "During hunting season, a lot of guys don't even bring their rifles," said Gary Keehn, manager of the Old Style Saloon, where Hickok died in 1876. Keehn said it's not unsual to get 30 to 40 inquiries a night.

Blain is not swayed by those arguments. "If they're good for business, maybe we should franchise them like Colonel Sanders," he says.

Local law enforcement officers have been accused for years of ignoring the prostitution. Police Chief Robert Kelley said he is often chided for picking up drunks instead of "cleaning up the cat houses."

But authorities say there has never been a public outcry against the brothels. State officials had to take initial action without local help. Finally, Lawrence County States Attorney Craig Grotenhouse reversed an earlier stand and signed a complaint saying the brothels were a nuisance

to the community. The houses were closed after a May 21 raid. The injunction apparently has discouraged at least one brothel owner. Rapid City lawyer John Fitzgerald said he plans an auction on behalf of

"Everyone can now have a piece of historic Deadwood," he joked.

#### Preliminary autopsy report says blow instrumental in man's death

GREENVILLE, Texas (AP) - Authorities have ruled that Sherod Luther Hart died when an unknown assailant drove a sharp-pointed instrument into the back of his head as he knelt in the doorway of his lakeside

one of his clients.

A preliminary autopsy report stated that Hart, whose partially clothed body was found sprawled in the doorway of his isolated home, had been hit in the back of the head with a sharp instrument and had also been shot in the left arm.

Hart, 74, could have been killed by the blow or by a combination of the blow and a chronic heart condition from which he suffered, the report

Investigators said Tuesday they

had no leads in the case.

"We don't have anything," said Capt. W.T. Wallen of the Hunt County sheriff's department. "It's like trying to find a needle in a haystack. You know the needle's in there, you just have to find out where it is.

"We're working on every little thing we have, but we just don't have much right now," he said. Hart's body was discovered Mon-

day afternoon sprawled in the doorway of his isolated cabin by a sheriff's deputy on routine patrol. Hart was not wearing shoes, socks or pants.

From the position of the body, in estigators concluded that Hart had been forced to kneel on the front steps of the cabin and place his head on the floor inside the front door.

# Police board debating discipline

BALTIMORE (AP) — A police trial board that found Detective Stephen McCown guilty of breaking departmental rules when he shot an unarmed 17-year-old was deciding today on disciplinary action for the officer. The board was to consider mitigat-

ing and extenuating circumstances

before meeting privately to decide on a recommended punishment for the robbery detective, who shot Ja-Wan McGee thinking the youth and a companion were about to rob a pizza

McGee is paralyzed from the waist down and his family is suing the city

## Officer won't be suspended in fatal shooting of suspect

CANEY CITY, Texas (AP) - A police officer who fatally shot an unarmed burglary suspect in the back will not be suspended from active duty, police chief Richard Wilson

Wilson said the death of Jeffrey Luckado, 18, of Virginia, was being investigated by the Texas Rangers, who would report their findings to the

"It's all still under investigation at this time," Wilson said. "The officer is still with the department, and I have no plans to suspend him."

Patrolman Ron Loman fired his 9mm automatic pistol at the suspect without discharging a warning shot or yelling for Luckado to halt, Wil-

son said. Luckado died at the scene from a wound to the middle of his

Wilson said Loman answered all about 2 a.m. from a lounge customer who said someone was breaking into his car. Loman chased the intruder across the parking lot in his patrol car, Wilson said, and then jumped out and began grappling with the suspect

'The officer got hit in the chest and the lower part of his body," the chief said. "Then the guy got free and started to run into some woods there.

Loman fired the single shot as the suspect ran, officers said. They later learned Luckado was wanted for auto theft in Virginia.

and McCown for \$15 million. McCown, 33, has been reassigned to administrative duty since the March 20 inci-

The 10-year veteran could be dismissed from the police force or the trial board could recommend a lesser penalty

A final ruling on the board's recommendations must be made by Police Commissioner Donald Pomerleau. State's Attorney William Swisher declined to prosecute the detective on criminal charges.

After two days of testimony, the board met privately for one hour Tuesday before finding McCown guilty of four violations of departmental rules.

In his closing arguments, prosecutor Millard Rubenstein stressed that McCown was responsible for his ac-

"I think what we have here is a case where a police officer acted too quickly," he said. "Mr. McGee did not have a weapon and therefore there was not imminent danger.

But Thomas Bollinger, McCown's lawyer, argued that his client had to make a split-second decision.

"We can sit here and have the luxury of time...he didn't have that luxury," Bollinger told the trial board. "An officer is taught to act in a certain way. He is taught to be suspicious."

Earlier, McCown testified he was still not certain a robbery was not about to take place the night of the

pizza parlor shooting. He said he watched as Robinson "burst into the store" while McGee stood in the doorway and pulled a metal object from his pants. "At the moment I shot...I was convinced he was drawing a weapon," said McCown.

The object turned out to be a cigarette lighter.

The shooting has triggered considerable racial tension because McCown is white and McGee is black. Black leaders have said McGee would not have been shot if he were white.

"I just hope the commissioner acts as quickly as possible in a manner to satisfy not only the black community but good and honest citizens in the city," Kweisi Mfume, a black city councilman said after the verdict."

Other black leaders said they hoped the trial board's finding would ease tension.

"It's to be hoped that the verdict will increase the amount of confidence that should be in the judicial system and the police department,' said Enolia P. McMillan, president of the local chapter of the National Association for the Advancement of Colored People.

"The sad thing is that McGee won't walk any more," added Mfume.

#### Family kills boyfriend

SACRAMENTO, Calif. (AP) - A 14-year-old Sacramento boy who was visiting his girlfriend in her bedroom was shot 15 times and killed, apparently by members of her family, police say.

Officers said they found Marvin Keola, clad in a jogging suit, dead about 3 a.m. Tuesday at the South Sacramento home of 15-yearold Nurah Yahya, who bolted the house to stay with relatives at an undisclosed location.

Booked for investigation of murder were her father, Hazaam Yahya. 47, a factory machine operator who came to this country 21 years ago from Yemen; his wife Marie Elasa, 46, a California-born former teacher's aide; and the couple's son, Abdul, 14.

They were being held without bail pending arraignment today.

# WT wildcat projects announced

Discovery operating. Inc., of Midland and Sanchez-O'Brien Minerals Corp. of Laredo each announced location for a wildcat in Andrews County.

Discovery Operating No. 1-11-A University is to be dug as a 9,500-foot explorer 16 miles southwest of Andrews, 660 feet from north and 1,780 feet from east lines of section 10, block 11, University Lands survey.

It is 1 1/4 miles north of the Block 11 (lower Wolfcamp oil) discovery which produces at 7,506 feet, and 1 1/2 miles northwest of the discovery well of the Block 11 Fusselman oil) discovery which produces at 7,956 feet. It also is one mile east of the Three Bar (Devonian) pool which yields oil at 8,385 feet.

Sanchez-Obrien Minerals No. 1-A F. M. Allbright is to be dug as a 10,600-foot wildcat in the Wemac multipay area of Andrews County, 3.4 miles southeast of An-

Location is 1,980 feet from south and 467 feet from east lines of section 11, block A-44, psl survey

The drillsite is 5/8 mile southeast of 8,708-foot Wolfcamp production.

Amoco Production Co. No. 23 H. Foster is to be drilled as an 11,400-foot wildcat in Ector County, six miles west of Odessa.

It also will be drilled as a project in the Cowden, South (8,790 Canyon) field. The location is surrounded

section 18, block 42, T-2-S, T&P survey.

McCann Corp. of Big Spring No. 1 Stewart is a re-entry wildcat in Howard County, four miles southeast of Vincent. It originally was drilled by Texas as No. 1 Wasson

and abandoned at 8,670 feet.

of section 4, block 29, T-1-N, T&P survey. McCann will clean out to 4,600 feet for the wildcat

feet and 3 1/2 miles northeast of the depleted O'Daniel field which produced from the Canyon at 8,160 feet and the Wolfcamp at 6,172 feet.

# Amoco stakes locations for four tests in Post, West (Strawn) pool

Amoco Production Co., operating from Levelland, announced locations for four offsets or stepout to the Post, West (Strawn and Mississippian) field of Garza County, eight miles west of Post

The field has one Strawn producer and one Mississippian well.

Each of the new projects are contracted to 9,200 feet which will allow for tests of the Mississippian.

No. 1 Dillard Morris is 990 feet fromnorth and 1,319 fet from west lines of section 1318, block 1, H&OB survey. It is 3/4 mile northeast of the Mississippian well and the same distance northeast of the Strawn well.

Amoco No. 2 Elmo Bush is 660 feet from south and 467 feet from west lines of section 1318, block 1, H&OB survey. It is an east offset to Strawn production and 1/2 mile southeast of the Mississippian oiler.

Amoco No. 2 Sylvia Winder, an east offset to the Mississippian well and a north offset to the Strawn well, is 2,439 feet from south and 467 feet from east lines of section 1320, block 1, H&OB.

\*\*\*\* Amoco No. 1 H. D. Veavers will be drilled 467 feet from north and 2,253 feet from west lines of section 1318, block 1, H&OB survey. It is one mile northeast of the Mississippian and Strawn wells.

LUBBOCK OFFSET

New Reserves Group of Midland no.3 Texas Tech is to be dug as a 5,900-foot project one location east of the discovery well of the Idalou, NOrth field of Lubbock County.

The drillsite is five miles northwest of Idalou and 2,466 feet from south and 990 feet from west lines of section 44, block D-7, EL&RR survey.

DAWSON PROJECT

The two-well Ackerly, North (Spraberry) pool of Dawson County gained a new sproject with the staking of Conoco, Inc., No. 1 Leroy Holladay

and others. It is a northeast offset to production and 1,667 feet from south and 1,320 feet from east lines of section 11, block 34, T-4-N, T&P survey.

By WILLIAM SEXTON

PEKING - As a bank robbery, the

case didn't amount to much. The two

culprits' homemade guns weren't

powerful enough to kill at close range

and the loot added up to less than

But their trial Tuesday made his-

tory of sorts - the first major crimi-

nal proceeding opened to foreign ob-

servers here since the Cultural Revo-

China's new Western-style criminal

code went into effect Jan. 1. The trial

of petty criminals Chang Wenming

and Li Guosheng, both 23 years old.

seemed designed to prove to Chinese

as well as foreigners that the govern-

ment means business about applying

it. The case was front page news in

HOUSTON - Moran Bros., Inc. an-

nounced that it has acquired a 50

percent working interest in 7,480

acres of oil and gas leases near El

Reno in the central portion of Canadi-

As operator, Moran plans to invest

\$15,000,000 to drill approximately 50

wells within the next two years to

evaluate and develop the leases. The

lution's beginnings 15 years ago.

SCHLEICHER TESTS

Tucker Drilling Co., Inc. of San Angelo staked two projects in the three-well REG (5900 lime oil) pool of Schoeicher County, 13 miles northeast of Eldorado.

Each is contracted to 6,050 feet. No. 1 Reichert is 1,200 feet south of production and 467 feet from north and 1,500 feet from east lines of section 47, block M, GH&SA survey. Ground elevation is 2,309 feet.

Tucker No. 4-50 Glass is 1,200 feet north of production and 700 feet from north and 1,400 feet from east lines of section 50, block M, GH&SA survey. Ground elevation is 2,306 feet.

Sun Oil will drill No. 1 Argo as a 7/8-mile north stepout to the sevenwell Martin (Tubb oil) pool of Martin County, 14 miles southwest of

Locarion is 660 feet from south and east lines of section 14, block A-41, psl

Contract depth is 6,560 feet.

CRANE PROJECTS

Gulf Oil Corp. spotted two projects in the six-well Lea (Tubb oil) pool of Crane County, 10.5 miles west of

Each of the tests will be drilled to 5,000 feet for tests of the Tubb. No. 109 P. J. Lea and others is 2,105 feet from south and 2,030 feet from east lines of section 39, block 32, psl

Gulf No. 110 P.J.Lea and others is 1,420 feet from north and 1,370 feet from east lines of section 39, block 32, psl survey

ECTOR OFFSET

Exxon Corp. No. 89 Yarbrough & Allen will be drilled as a northwest offset to the Pennsylvanian discovery of the Yarbrough & Allen, West multipay field of Ector County

Location for the 8,050-foot project is 760 feet from south and 1,980 feet from east lines of section 25, block 14, psl survey. The field has one Pennsylvanian

Late last week roughly 80 diplo-

mats, foreign correspondents and a

delegation from the Chicago Bar As-

sociation received invitations to

Tuesday 2-hour, 15-minute trial in an

air-conditioned 450-seat auditorium at

the Peking Intermediate People's

Court. Except for the foreigners'

presence — and simultaneous trans-

lation into English via headphones

temporarily wired into seven rows of

the auditorium - the trial appeared

to be a routine procedure. Frequently

Chinese spectators responded to testi-

mony with subdued chatter, occasion-

ally open laughter. There was no TV,

as at several previous trials of capital

This could hardly be described as a

traditional Communist show trial be-

cause the crime was so unspectacu-

lar, even pathetic, and the police

work evidently less than brilliant. The

Chinese authorities had in any case

been deluged with requests from cor-

respondents and visitors to attend a

court proceeding. Although the crimi-

nal code calls for public trials, indi-

viduals must have permission to at-

tend. Those at Tuesday's trial re-

ceived reserved seat tickets marked

But at the end all present were left

in suspense. The presiding judge, Xin

Yuliang, announced that she and her

two male colleagues on the bench

would consider the evidence and re-

veal their verdict and sentence some

other time. Unlike an American trial.

all the evidence was heard even

though the defendants pleaded guilty

to bank robbery and attempted mur-der. They could be sentenced to the

Chang and Li were accused in the

indictment of plotting for more than a

year to rob a bank, making their ou

guns out of metal furniture tubing and

firing squad for either crime.

just like theater tickets.

KENT TEST

Wallace is to be dug as a 6,900-foot project in Kent County, 11 miles south of Clairemont The prospector is one location south

of one of the four wells in the Elam (Stran) field. Location is 2,173 feet from south and east lines of secton 60, block 4,

H&GN survey. CROCKETT TRY

Anderson Petroleum, Inc., of Midland staked its No. 1-3 Mayme Daniel and others as a long northwest outpost to troduction in the Ozona multipay field of Crockett County, 25 miles southwest of Ozona.

It is four miles from production and 1,375 feet from south and 1,500 feet from east lines of section 3, block NNN, W. P. Hoover survey.

Contrct depth is 7,900 feet. The drillsite is surrounded by Canyon production in the American multipay field.

SUTTON LOCATIONS

HNG Oil Co. of Midland spotted two projects in the four-well Sawyer (Leonard) feld of Sutton County, seven miles west of Sonora. Each will be drilled to 8,300 feet

No. 2-138 Richardson is 3/8 mile north of production and 933 feet from south and west lines of section 138, block B.d HE&WT survey. Ground elevation is 2,278 feet.

HNG No. 3-138 Richardson is 5/8 mile north of production and 2,600 feet from nrth and 933 feet from west lines of section 138, block B, HE&WT survey. Ground elevation is 2,291 feet

REAGAN WELL

Devon Corp. of Oklahoma City No. 2 Owens and others has been finaled from the Grayburg 5/8 mile east of the Barnhart (Grayburg) field of Reagan County, nine miles southeast of Big Lake.

The operator reported a 24-hour pumping potential of 70 barrels of 28-gravity oil, no water, through perforations from 2,043 to 2,259 feet after 3,000 gallons of acid and 40,000 gallons of fracture solution. The gas-oil ratio is 285-1.

Location (amended) is 1,817 feet from north and 3,740 feet from east lines of section 6, HE&WT survey.

seven bullets from screws and a piece

of iron poker, and agreeing that each

would kill one bank clerk. They chose

January for the crime, they said,

because it would be easier to disguise

themselves in winter garb and the

gun shots might be mistaken for Chi-

nese New Year's firecrackers. The

two set out on Jan. 30 but were fright-

ened away from several banks. They

tried again the next day, and suc-

ceeded. Chang said he shot one clerk;

Li said he fired at another but missed.

They escaped on their bicycles with a

bag of Chinese money and eventually

spent it on a Japanese tape recorder,

At the end, the prosecutor asked for

a stiff sentence, noting that the Peo-

ple's Savings Bank is vital to China's

economic growth and that deposits at

the Nan Men Chang branch had

dropped from about \$80,000 to only

\$25,000 after the robbery. Each of the

defenders, as the defense attorneys

were called, cited various provisions

of the criminal code to justify clemen-

cy for his client, but conceded his

To one observer, the most fascinat-

ing aspect of the trail was the revela-

tion how the crime was resolved. "I

felt a lot of pressure from the out-

side," Chang testified. "There was

much talk about the crime at work, in

all walks of life...people looked at me.

I avoided their eyes. I was thinking,

they suspect me....I couldn't sleep.

The robbery was discussed at meet-

ings where he worked and he conclud-

Chang said he attempted suicide by

wiring himself to an electric socket,

but failed. "I couldn't die and I

couldn't live like this," he said. "So

the only thing to do was confess." Chang turned himself in on March 22,

not to the police but to his employer.

ed he was under suspicion.

clothes and high living.

# Mobil Producing schedules two Loving County wildcats

Mobil Producing Texas & New Mexico Inc. spotted locatons for a pair of wildcats in Loving County, six miles northeast of Mentone

Each of the projects will be drilled

No. 1-E W. D. Johnson and others is 660 feet from north and 1,980 feet from east lines of section 40, block 53, T-2, T&P survey and two miles northwest of the one-well Wheat (Cherry Canyon) field which produces at 6,610

Mobil Producing No. 1-F W. D. Johnson, 1 5/8-mile northwest of the Cherry Canyon well, is 1,980 feet from south and west lines of section 40, block 53, T-2, T&P survey.

VAL VERDE TEST

The McCoun Co., Inc., of Tyler spotted a 2,500-foot wildcat in Val Verde County, four miles southeast of

It is No. 1 Marshall, 1,100 feet from north and 600 feet from east lines of section 20, block 3, I&GN survey, abstract 1026 and 5,800 feet southeast of a 1,000-foot dry hole.

FISHER EXPLORER

H&TC survey.

Stringer Oil & Gas of San Antonio No. 1 L. L. Stuart has been staked as a 6,600-foot wildcat two miles east of Claytonville in Fisher County. Location is 660 feet from south and west lines of-section 205, block 3,

The drillsite is 5/8 mile southeast of the Claytonville multipay field which produces from the Canyon lime at 5,695 feet and from the 5,200 and 5,400 Canyon sand zones.

NOLAN WILDCATS

Stringer Oil & Gas also will drill No. 1 J. Hogue as a 6,600-foot wildcat in Nolan County, 3 1/2 miles southwest of Sweetwater.

Drillsite is 750 feet from south and 1,980 feet from west lines of section 57. block 22, T&P survey.

## Leasing plan gets approval

WASHINGTON (AP) - Interior Secretary Cecil Andrus, declaring offshore oil and gas leases one of the "most environmentally benign" energy sources available to the country, has given final approval to an accelerated leasing program covering the next five years. 'Andrus' action came despite strong

objections from environmental groups that had sought to delete sales off Alaska and Northern California. The program announced Tuesday

provides for 36 offshore lease sales through 1985, a 20 percent increase over what Andrus had recommended one year ago, before President Carter unveiled his latest program to increase domestic energy supplies. "It would be a crime to prevent us

as a nation from realizing the immense benefits of this unique asset," Andrus said in announcing his decision. "I have worked hard to make certain that the program provides to the public the financial return and the environmental protection it requires and deserves. Frances Beinecke, an attorney with

the Natural Resources Defense Council, said her group was disappointed in Andrus' decision and termed some minor changes made in the final schedule "meaningless." She said the group was considering court action to block some sales.

The council had argued that oil drilling in Alaska's North Aleutian shelf should not be permitted because the area contains the world's largest salmon fishing grounds. The group also contended that the technology does not yet exist to contain oil spills in icy seas and thus the other Alaska sales should be delayed until after

The schedule Andrus unveiled includes 11 sales in the Gulf of Mexico, six in the Atlantic, four off California, 10 off Alaska and five sales that will reoffer areas on which no bids were received in earlier sales. Seven of the sales would be in frontier areas off Alaska where leasing has not previously taken place. The final lease schedule includes:

1980: Three sales, two in the Gulf of Mexico and one in the Gulf of Alas-1981: Seven sales, two in the Gulf of

Mexico, one off California, one in the

South Atlantic, one in Alaska's Cook Inlet, one in the Mid-Atlantic and one reoffering. 1982: Seven sales, two in the Gulf of Mexico, one in Alaska's Norton Basin, one in Alaska's St. George Basin, one off Southern California, one in the

North Atlantic and one reoffering. 1983: Eight sales, two in the Gulf of Mexico, three in Alaska in the Beaufort Sea, in the North Aleutian Shelf and off Kodiak Island, one off California, one in the Mid-Atlantic and one reoffering.

1984: Seven sales, two in the Gulf of Mexico, one each off California, in Alaska's Navarin Basin, in the South Atlantic and the North Atlantic and one reoffering

1985: Four sales, two off Alaska in the Chuckchi Sea and the Hope Basin and one in the Gulf of Mexico plus one

The location is one mile east of the Estaban multipay field and separated from it by a 6,816-foot dry hole.

Asora Inc. of Abilene No. 1 Sneed is a 5,700-foot wildcat in Nolan County, two miles north of Hylton and 5/8 mile southeast of the Arriba Libra (Jennings gas) field. Location for the new test is 990 feet

lines of section 182, block 64, H&TC It also is 3/4 mile southeast of the

Caddo oil discovery in the Arriba Libra pool

COKE PROSPECTOR

Kenai Oil & Gas Inc. of Midland No. 1 Price is a new 5,900-foot wildcat four miles southwest of Robert Lee in Coke

The drillsite is one location west of Kenai No. 2 Price, an active wildcat, and 660 feet from south and west lines

of section 286, block 2, H&TC survey. The No. 2 Price, originally staked as No. 1 Byrne, was making hole below 236 feet on a 5,900-foot con-

The new wildcat also is 1 1/4 miles northeast of the depleted Robert Lee (Palo Pinto) field.

It also is 5/8 mile northeast of a a 6,800-foot wildcat, Enrich Oil Corp. No. 1 Bobby Baker, and 3/4 mile northeast of Enrich No. 1 M. O. Baker, another 6,800-foot test.

RUNNELS TEST

Crown Exploration Co. of Abilene will dig No. 1 H. White as a 4,400-feet wildcat three miles east of Winters in Runnels County

It is 2,008 feet from north and 467 feet from east lines of W. M. Baggs survey No. 326.

It is 2,310 feet northeast of the lone well in the Cecile (Gardner) pool which produces gas at 4,195 feet.

## NRM finals Strawn opener

NRM Petroleum Corp. of Midland No. 1 Hettye has been completed as a Strawn oil discovery in Nolan County, 15 miles west of Maryneal.

Operator reported a 24-hour pumping potential of 35 barrels of 42gravity oil, no water, through perforations from 7,025 to 7,028 feet.

The gas-oil ratio is 2,200-1. Stimulation, if any, was not reported. Total depth is 7,086 feet and the Strawn was topped at 7,022 feet on ground elevation of 2,297 feet Other tops include the Tubb, 1,968

feet; Vale, 2,328 feet; Coleman Junc-

tion, 3,986 feet; Dothan, 4,182 feet, and

Noodle Creek, 4,260 feet. The strike is one mile northwest of Strawn reef production and 1,980 feet from south and west lines of section 35, block 12, H&TC survey

IRION PROJECTS

Indian Wells-Oil Co. of Ozona will dig two projects in the two-well Irion, West (Canyon oil) area of Irion County, 5.2 miles southwest of Mertzon.

Each will be drilled to 6,900 feet. No. 1-4 Phillips is to be drilled one location northeast of production and 467 feet from south and west lines of section 4, Gonzales County School Ground elevation is 2,341 feet.

No. 1-1 Phillips, one location north of production, is 467 feet from south and 1,341 feet from east lines of section 1, Gonzales County School Land

survey. Ground elevation is 2,388 feet.

COKE LOCATION

WES-TEX Drilling Co. of Abilene staked a 6,100-foot project one location northeast of the lone producer in the Green Mountain (Canyon reef) field of Coke County, 10 miles west of Robert Lee.

It is No. 1 Finnell Smith, 1,667 feet from north and 2,182 feet from east lines of section 233, block 2, H&TC survey.

**CULBERSON TEST** 

Orla Petco, Inc., of Midland, No. Hawkins-Grubb, is to be drilled 1/4 miles southwest of production inthe Ford, West (4100) field of Culberson County, 12 miles northwest of

Drillsite is 660 feet from north and 3,045 feet from west lines of section 28, block 58, T-1, T&P survey.

Contract depth is 4,100 feet. This project was announced earlier. with the well number and fee name

Stock market gains

> By CHET CURRIER **AP Business Writer**

YORK (AP) - The stock market struggled to its third straight gain Tuesday, nudging the Dow Jones industrial average up to its highest level in almost four months

The widely recognized average of 30 industrials picked up 1.54 to 879.27, its highest close since it finished at 886.86

The average's closing high for the year was 903.84 on Feb. 13: In late March and April it got as low as the mid-700s

New York Stock Exchange volume totaled 41.99 million shares for the day, up from 36.19 million Thursday. The news background continued to be dominated by signs of a deepening

recession and falling interest rates. The Commerce Department reported only a 0.1 percent rise in personal income during May, and an 11.5 percent drop in housing starts for the same month. Meanwhile, UMB Bank & Trust Co.

the New York subsidiary of an Israeli bank, cut its prime rate to 11.5 percent. Major banks are still posting a 12 or 12.5 percent basic fee on bluechip loans, but analysts expect the rate to decline further soon. The day's biggest gainer was

Southland Royalty, which jumped 191/4 to 941/4 as of the 4 p.m. close in New York. The company, which explores for and produces oil and gas, proposed the creation of two independent trusts, with units of those trusts to be distributed to shareholders.

City Investing topped the active list, up 3/4 at 273/4 The daily tally on the NYSE showed about five losers for every four stocks that gained ground, but the ex-

change's composite index slipped .01 Standard & Poor's index of 400 industrials eased .08 to 130.43, and S&P's 500-stock composite index was

off .06 at 116.03 Oil issues generally advanced on the American Stock Exchange, paced by Houston Oil & Minerals, up 11/4 at 27%, and Dome Petroleum, up 2% at

The Amex market value index rose 1.69 to 288.90

In the over-the-counter market, the NASDAQ composite index closed at 156.98, up .19.

### Senators say Israel's image hurt in U.S.

WASHINGTON (AP) - Sen. Henry M. Jackson, D-Wash., and other key senators are telling Israel it is seriously hurting its image in the United States by insisting on building new settlements in occupied Arab territories.

The message comes despite the Senate's 85-7 vote Tuesday to kill an amendment that would have deprived Prime Minister Menachem Begin's government of \$150 million in U.S. aid if it continued to start new settlements or expand old ones.

The Senate later voted 58-32 to pass the \$4.8 billion foreign aid bill for fiscal 1981, starting Oct. 1, and send it to a conference committee to find a compromise with a \$5.2 billion version

## Governor wounded in clash

LA PAZ, Bolivia (AP) - Ultra-conservative peasants demanding military rule in Bolivia and the expulsion of the U.S. ambassador shot their way into the office of Santa Cruz Gov. Walter Pereira, wounding him seriously, and staged coordinated disorders throughout the city, a government spokesman

Similar disorders in Santa Cruz culminated in a military coup nine years ago and Tuesday's attack sparked fears among authorities in the capital that the military may try to seize control of the government and prevent general elections scheduled for June

We are extremely worried about what has happened in Santa Cruz and we appeal for tranquility," a government minister said after an emergency meeting of the cabinet

Bolivia has been in a state of flux since a military coup last November. Coup leader Col. Alberto Ntusch Busch reluctantly turned the government over to the national congress after violent street fighting protesting military rule left 200 dead.

President Lidia Gueiler, named interim president by the congress, on June 12 rejected a proposal by the military to delay the elections for at least a year. Commanders of Bolivia's army, navy and air force, who are widely believed anxious to seize the government, said they proposed the delay to allow a reorganization of the nation before elec-

tions are held. The shooting and subsequent disorders in Santa Cruz, located bout 400 miles southeast of here, appeared to be the work of members of the ultra-conservative Bolivian Socialist Falange Party, which observers say is trying to promote

a military takeover. Pereira, an aide and two local journalists were wounded in the attack. Hospital officials said Pereira was in serious condition, but that the other three victims were not seriously injured

### Nobel winner is tined

LONDON (AP) -Nobel Peace Prize-winner Betty Williams, cofounder of Northern Ireland's Peace People movement, was fined 25 pounds-\$60-today after pleading guilty to disorderly behavior at London's Heathrow Air-

Uxbridge Magistrates' Court in west London heard that Mrs. Williams cursed and banged a ticket desk with her fists after missing a flight home to Belfast on May

Mrs. Williams, a 37year-old Roman Catholic, shared the 1976 Nobel Peace Prize with Mairead Corrigan for founding the peace movement aimed at bringing Catholics and Protestants together to try to halt sectarian violence in the British prov-The court heard that

Mrs. Williams was arrested after using abusive language and trying to push past a policeman to board a Belfast plane which was just leaving. Departure gates had already been shut for the flight. Prosecutor Clive

Moore said: 'Mrs. Williams be-

came extremely agitated and upset and started banging her fist on the desk," shouting four-letter words. **TODAY'S ANSWER** 

## BUSINESS MIRROR Joe's easy way to become rich

By JOHN CUNNIFF **AP Business Analyst** 

SUNSET BEACH, Calif. (AP) - From an easy chair beside a fireplace in the beachfront house he uses as an office, Joe Karbo looks across the dazzling sand and sea to Catalina.

He has just driven over in a Rolls Royce from his house at nearby Huntington Beach, where he lives with his wife, Betty, and a 12-year-old daughter, the last of eight children still at home.

Home is where his heart is, says Joe, a heavyset fellow with a ruddy, relaxed face enclosed in beard and mustache. It's where he also moors his two sailboats at a backyard dock from which he swims

That is, when he resides there.

Next week, said Joe, he hopes to get away "and hole up and write" at his condominium in Mexico. He has another condo in Hawaii, and a "cabin" up north in Washington. Downstairs the clerical help is busy attending to

business. Joe Karbo grossed \$2.5 million last year, he says, but now he guesses he has already surpassed that figure. He is, of course, a multimillionaire. "I am content to live as I am for the rest of my

life," says Joe. "Money no longer can enrich me. He likes writing, acting, poker. Some might recognize Joe Karbo as the man who runs countless ads in newspapers and magazines about people being "too busy working to make any

money." Life for such people, Joe says, is a prison "Don't take as long as I did to find out," he admonishes readers. Take charge of your life. Don't let it dictate to you; tell it what you want; make it do

your bidding. "You can have anything you want." Joe doesn't ask you to believe him. Just order his material. "If I'm wrong, all you've lost is a stamp," he reminds you. 'But what if I'm right?" The

question is provocative. People order. In return for their \$10, respondents receive a copy of "The Lazy Man's Way to Riches," a 159-page book that tells them how to define their goals, visualize

them, declare them every day, and achieve them. The book tells them much about the background of Joe Karbo, of his being \$50,000 in debt and without a job in 1962 and how, through the use of Dyna-Psyc, he and Betty soon were on the way to wealth.

Dyna-Psyc's principles are simple. You define and isualize your goals as if they were accommplishments. You declare them, live them, become them. No mystery, says Joe Karbo. "The power is within all of us.'

Dyna-Psyc is autosuggestive. It seems essentially to be common sense, though often unrecognized. It is suggestive of religion, and Karbo concedes the Bible said it long ago: You are what you think.

But what people think, he says, is negative. Most people, he contends, are programmed for failure by the time they are six years of age. "We rehearse failure instead of rehearsing success," he

The principles of Dyna-Psyc may not be new, but Joe Karbo's presentation is. Sitting in his easy chair, alternating an unsmoked pipe and an unlit cigar, Joe

describes its success. Since 1973, he says, it has sold 1 million copies in the United States and perhaps 400,0 gland, Canada, Australia, New Zealand, and Germany. It has been translated into Spanish, German and French. A gentleman recently aproached him,

he says, about a Japanese edition. In the book Joe doesn't let the reader dangle with big ambitions and no outlet. While Dyna-Psyc may be applied to any goals, he says, he went ahead and showed them how to use it for profit in the direct response business, the same business through which

he sold the book. How and what do you sell through direct response? You do what Joe Karbo did. You ask "what need is there I can fill, what knowledge can I share, what

service can I offer, what product can I develop? After people read the book, testimonials often follow in short order, he says, some of them from people now fairly well known. Howard Ruff, proponent of the coming monetary collapse, consulted guru Karbo. So did Mark Haroldsen, whose ads stress the real estate way to wealth.

Many people have used Dyna-Psyc to greater advantage than he has, and good luck to them, says Karbo. He reflects, he says, on how satisfying it is to have done something so momentous as changing anyone's life.

Right now, as you might imagine, he is planning more ad campaigns. Fifty percent of his gross goes into one well-known ad, and a \$10,000 insertion, he says, might generate 2,000 or 3,000 orders for the book.

Pretty good response for one book, written seven years ago and never changed, and promoted through an ad that has been edited but once in that time. Lazy indeed.

### Three prized African art pieces going home

LONDON (AP) — Three prized pieces of Benin art - a bronze head of a king, a bronze plaque showing a warrior and retainers and an ivory bell - are returning to their Nigerian homeland after being purchased by an unnamed bidder from the West African country for over \$1.2 million.

Saleroom correspondents who attended the Sotheby's auction said they were purchased on behalf of the Nigerian state museums.

The 14th century bronze head of a Benin oba, or king, fetched a world auction record for a Benin bronze of \$468,000. It was sold at Sotheby's in 1954 for about \$900. The plaque, from about 1600, went for \$421,200 and the carved bell, from the first half of the 16th century, for \$374,400.

#### Livestock auction report

The Southwestern Livestock Auction Co. ran through 1,004 head of cattle Tuesday in a market that was steady to \$2 higher on all classes of cattle. Cow-and-calf pairs were \$25 to \$50 higher. Bred cows were \$3 to \$4 higher per hundredweight.

Here's a rundown on the sale: Steers weighing 600 to 700 pounds were auctioned for \$66 to \$68.50 per hundredweight; 500 to 600 pounds, \$72.50 to \$74; 400 to 500 pounds, \$76 to

\$82.50; 300 to 400 pounds, \$83.50 to \$90; under 300 pounds, \$90 to \$115 per hundredweight. Heifers weighing 600 to 700 pounds were sold for \$63 to \$65 per hundredweight; 500 to 600 pounds, \$67.50 to

\$74.50; 400 to 500 pounds, \$71 to \$75; 300 to 400 pounds, \$74 to \$80; under 300 pounds, \$80 to \$90 per hundredweight. Cows utility were sold for \$45.50 to \$49.75 per hundredweight.

Canners and cutters went for \$42.50 to \$44 per hundredweight.

Bulls yield Grades 1 and 2 were sold for \$56.50 to \$57.50 per hundredweight.

Breed cows were auctioned for \$450 to \$525 per Southwestern Livestock Auction Co. will hold its

special cow-calf sale at noon Saturday.

I called The Reporter-Telegram to start home delivery, and I'll pay for it! I'm saving not only 40°, but dollars more with all those coupons every week Gratefully.
