Fighting rages _ for Iran oil port

BAGHDAD, Iraq (AP) — Iraqi and Iranian troops were reported locked in savage hand-to-hand combat today for Iran's oil port of Khorramshahr, and an Iraqi air attack was said to have heavily damaged a \$3 billion Persian Gulf petrochemical complex under construction to the east.

Meanwhile, Iran's Parliament unanimously rejected any direct or indirect negotiations with the United States on the 52 U.S. hostages captured 334 days ago. And in an offshoot of the 11-day-old war, the Iranian and Iraqi embassies in Beirut, Lebanon, were rocketed and seriously damaged

Western diplomats here said they believed Iraq's offer of a four-day cease-fire, which Iran immediately rejected, was a ploy to gain interna-tional prestige. The diplomats said they believed the Iraqis also were seeking a period of quiet so their troops could consolidate their gains

Senate adjourns; House expected to

WASHINGTON (AP) - Congress, after doling out enough money to keep the government going for about 21/2 months, is calling it quits until after the November elections, leaving behind a full agenda of unfinished business.

The Senate recessed early today and the House was to do the same later in the day, having broken a deadlock Wednesday on a stopgap government-wide financing bill.

The controversy, over financing abortions for poor women, had brought the government into the new fiscal year Wednesday without the legal authority to do business, meet payrolls or pay bills. But agreement on the spending bill came in time to avert any noticeable slowdown in gov-

Iraq's leading daily newspaper, Al-Thawra, charged the United States with war brinkmanship and playing with fire by continuing to interfere in the war. The paper offered no specifics to support the charge.

Iraq said its shock troops were battling diehards of Ayatollah Ruhollah Khomeini's revolutionary guards in a fresh assault to capture Khorramshahr.

"Savage battles are raging from house to house and street to street to complete the liberation of the city, the government-controlled Baghdad newspaper Al Gomhoria said in a report broadcast by Iraq's state radio. "They're fighting hand to hand.'

A communique carried today by Baghdad Radio claimed the Iranians had suffered "a large number of dead and wounded" Wednesday in the central and southern sectors of the warfront. It listed Iraqi losses as 16 dead,

Iraqis were "digging their own graves" in Khorramshar and nearby Abadan, major cities of Iran's oil-rich Khuzestan province, and told the inhabitants: "You should fight tooth and nail to destroy these blasphemous enemies and teach them such a lesson that they will never be able to get up again.

Some 100 miles east of Khorramshahr, facilities of the sprawling Japanese-Iranian petrochemical com-plex in Bandar Khomeini on the Persian Gulf were heavily damaged by an Iraqi air attack, Mitsui and Co., Iran's major partner in the project, said.

Mitsui officials told reporters in Tokyo said the attack by several Iraqi fighter-bombers hit the central part of the 85-percent complete project, heavily damaging three of the 13 plants at the complex Tuesday.

They said damage from the attack, the second on the petrochemical complex in a week, could seriously delay the project's completion, scheduled for the spring of 1982.

The 745 Japanese workers at the project were evacuated to a camp six miles from the construction site after the first bombing raid, and none was injured in the attack, the officials

The Iranian Embassy in the Lebanese capital was hit by rocket-propelled grenades about 4 a.m. today and the first four floors were wrecked by the exploding grenades, an embassy spokesman in Beirut said.

Both Japan and South Korea denied that they had been supplying Iran with spare airplane parts. A published report in Kuwait quoted the speaker of Iraq's parliament, Naeem Haddad, as making that claim.

Iraq's embassy was hit by four rockets about 11:45 p.m. Wednesday, causing damage to several offices. No injuries were reported in either attack.

In Iran, the government's first significant ground gain was announced

HOUSTON (AP) - Vice President Walter Mondale

tried to turn the tables on Republican presidential candi-

date Ronald Reagan while mmbly sidestepping questions

about President Carter refusal to debate the GOP nomi-

"The nation needs a debate between the two people who

have a chance of winning," Mondale told a news confer-

ence Wednesday night during a whirlwind campaign trip

Carter refused to participate in a Sept. 21 nationally-te-

levised debate in Baltimore. The president has agreed to

debate both Reagan and Anderson, but said the first

debate must be a one-on-one meeeting with the Republi-

Mondale was scheduled to address the United Food and

Commercial Workers International union conference

During his 15-minute news conference, the vice presi-

dent also discussed the importance of the Texas vote, the

Mondale said the presidential debates were "the best

possible way for the American people to see the candi-

dates in an environment where they really have to show

He also accused the former California governor of

'But Mr. Anderson has accepted. So that indicates Mr.

Reagan is left with one answer, that he refuses to do what

the American people want him to do," he said. Mondale told reporters he believed the race in Texas

Calls on Reagan to debate

would be tight but predicted the Democrats again would come out on top.

"Texas is very important," he said. "It is going to be closely contested. The Republicans are going to be spending so much money here, it is going to be good for the economy.

The Carter-Mondale ticket carried the state by a narrow margin in the 1976 election against then-President Gerald Ford

Mondale also joked about former Watergate prosecutor Leon Jaworski's endorsement of Reagan.

He said Jaworski "had left the party when (Calvin) Coolidge was president (in the 1920s) and we haven't had him back. I don't think it was too helpful to Mr. Reagan.

When asked about an "October surprise" concerning the hostages in Iran, Mondale noted that from the beginning the Carter administration has conducted a foreign policy that served the nation's interests.

If something were implied as far as the fate of the hostages, "it was the kind of speculation based on absolutely nothing."

Regarding the hostages, Mondale said he thought voters approved of the adminstration's handling of the crisis. 'Americans are wise and sensible," he said. "They

know we are doing everything that can be done."

The vice president also said he was thankful the way between Iran and Iraq had not disrupted the flow of oil through the Persian Gulf, and he encouraged both nations to "resolve their differences peacefully.

ernment activities.

The measure that kept Senators on Capitol Hill until the early morning hours was a proposed 10-week extension of jobless benefits - one of the elements in President Carter's economic revitalization program. The bill was passed, but not until five hours of negotiations between Democratic and Republican leaders had added language tightening eligibility requirements for unemployment compensation.

That sent the measure back to the House, which passed the benefits extension alone.

When lawmakers come back on Nov. 12, it will be to the first lameduck session in a presidential election year since 1948.

The major chores will be completion of the federal budget for fiscal 1981 and approval of the necessary approprations bills to allow government agencies to operate beyond the Dec. 15 cutoff in the stopgap bill passed Wednesday.

The outgoing 96th Congress seems certain to complete work on these "must" economic items before the 97th Congress convenes Jan. 3, 1981. But many other major bills were left hanging as members closed up shop until after the election - and how many of those bills would be revived in the lame-duck session remained an open question.

Among the key pending bills are measures to revive federal revenuesharing programs that expired Oct. 1, to protect Alaska park and wilderness lands, to revise the federal criminal code and to establish a billion-dollar fund to pay for oil spills and chemical waste site cleanups.

The abortion financing deadlock was broken when the Senate agreed to a softened House provision prohibiting Medicaid payment for abortions in cases of rape unless the victim reports the rape to authorities within 72 hours.

by President Abolhassan Bani-Sadr, who said Iranian forces recaptured the border town of Mehran, 100 miles east of Baghdad, the Iraqi capital, An Iragi communique denied the claim that the Iranians had retaken Mehran.

Banks continuing to hike prime rate

NEW YORK (AP) - Citibank raised its prime lending rate one percentage point to 14 percent today, eclipsing competitors who had increased their base lending rate for blue-chip corporations to 13.5 percent a day earlier.

Most commercial banks, led by Chase Manhattan Bank, raised their prime rates one-half percentage point Wednesday to 13.5 percent. That was the seventh increase in as many weeks

But Citibank, the nation's secondlargest bank, took a wait-and-see attitude Wednesday before raising its rate today to 14 percent from 13 percent.

Just last Friday the rate jumped from 12.5 percent to 13 percent at most banks.

The prime is the rate banks charge on short-term loans to their best-risk corporate customers. Smaller and less creditworthy businesses usually pay at least one percentage point above the prime for their loans.

✓ IN THE NEWS: Still another

study of Kennedy's assassina-

Consumer loan rates are not tied to the prime. But when the prime changes, other rates often follow in the same direction. For example, home mortgage rates have soared recently. Some lenders in California are now charging 14.5 percent - the highest since May.

Some bankers say those increases are scaring off potential homebuyers and have delayed a recovery from the housing industry's deepest slump since World War II.

"Some people are going to be hesitant in putting further burden on themselves," said Maria Fiorini-Ramirez, an economist at Merrill Lynch 'The consumer is going to start pulling back again."

Peter Gillette, president of Northwestern National Bank in Minneapolis, said the recent upturn in interest rates has become a "retardant" to a pickup in housing and auto sales and means the recession will not end quickly.

TODAY-

Midland Democrat achieves goal

By LANA CUNNINGHAM Staff Writer

Harris Kerr decided one day a few months ago he would "go for it." And after some light campaigning and nudging of people, he got what he wanted last Saturday — the Senatorial 25th District Seat on the state Democratic Executive Committee.

Kerr, a Midland attorney, knocked out his opponent, Tom Conner of Alpine, by a vote of 51.8 to 44.09. He replaces Ben Bock of New Braunfels who decided to give up his seat on the

state panel. The district Kerr represents is a 5-county area with Midłand as the orthernmost point, and is the single argest senatorial district in the U.S. 'It's bigger than half the states," he added. "But it's sparsely populated in some areas, like Loving, Ward and Brewster counties." Despite his recept increased activi-

ty in the Democratic Party, Kerr confessed it took some campaigning to get the job. And the more populated the area was, the more campaigning it required.

HIS FIRST PRIORITY as the new committeeman is "to let everyone in the district know what happens at the state meetings." To accomplish this he will be taking people as his guests to the sessions.

In addition, he and the 25th District **Committeewoman Pat Ivey of Robert** Lee are planning to send out a newsletter to all Democrats in the district, outlining what happened at the meet-ings and how decisions affect them. Another focus of his position will be

on the county chairmen, said Kerr. Explaining the county leaders "have a difficult job to do," he plans to provide more of a service to them. "I hope to push the executive committee to help out the county chairmen a lot +

more.

Woven through all his plans is the theme to rebuild the Democratic Party. And the reconstruction must start on the ground level with county chairmen.

DESPITE WHAT GOP leaders claim, voters throughout this western district aren't turning away from the Democratic Party to the Republican. 'They're just saying 'a pox on both your houses' and forgetting both parties," said Kerr. And he feels the Democrats will retain their majority in both houses of Congress after the November elections.

It's not the Democrats who are in trouble this time, Kerr said, but incumbents of both parties.

In rebuilding his party, Kerr said the Democrats will need to take some lessons from the Republicans.

"We are at the point today where the Republicans were 10 years ago.

They found they could work yearround and put together a strong party. They have done a remarkable job," he admitted.

While the Republicans were out soliciting help from any and all voters, Democrats apparently were relying on their voter base from many years ago. Now, said Kerr, the Democrats are adopting the Republicans' technique - computer mailing lists.

These lists will identify who's Republican, Democrat or in-between. political process on the ground roots level.

Midland Democrat gets statewide party post

(Continued from Page 1A) Texas has him and the committeewoman.

BUT ONE OF HIS immediate top priorities is to work for the local Democratic candidates and for President Carter. Kerr leads the county Carter campaign drive and in Rupublican-dominated Midland County, that's not an easy job.

As state committeeman, Kerr will travel to other counties in the district, speaking on behalf of Carter. In the Tall City, Kerr and about 30 other professed Democrats are doing their party's legwork: making telephone calls, knocking on doors and signing

candidate Ronald Reagan "has managed to shoot himself in the foot at every chance he gets." Because of this, said Kerr, people who would have switched to the Republican side this year will vote for Carter again.

Saturday's meeting also produceda new state chairman, Bob Slagle of Sherman, a man whom Kerr'described as "the best man to rebuild the Democratic Party.

Unlike previous state chairmen who are hand-picked by the Democratic governor, this one had to campaign for the spot, Kerr explained. The current governor, Bill Clements, is a Republican.

THE MIDLAND REPORTER-TELEGRAM, THURS., OCTOBER 2, 1980

Bowling alley slaying suspect former employee

BOSTON (AP) - A man accused of killing four bowling alley employees during a robbery two weeks ago reportedly had an argument with one of the victims over a job as janitor at the establishment, a Boston newspaper reported today.

The Boston Globe quoted an unidentified employee of Sammy White's Brighton Bowl as saying Brian Dyer recently came into the bowling alley and asked manager Donald Doroni for his old job back.

"They had a beef," the employee told the newspaper. Dyer, 41, had worked at the bowling alley on Soldier's Field Road seven years ago, but was fired because he played practical jokes on other employees, the newspaper said.

Dyer, described as a loner who likes to bet on races, was arraigned on four counts of murder Wednesday in **Brighton District Court.**

After an innocent plea was entered for the defendant, Judge Charles Artesani ordered Dyer held without bail for another hearing on Oct. 10.

Permian Airways guilty of violation

By SUE FAHLGREN Staff Writer

Permian Airways' recent shutdown is a violation of Texas Aeronautics Commission's 60-day notice regulation, the commission ruled Monday in Austin.

According to a statement released by TAC, Permian Airways violated a Texas Air Carrier Certificate of Operating Authority regulation stating the airlines must give the commission 60 days notice before it can discontinue service.

Because of the violation, TAC ordered the airlines to resume service to its cities immediately and continue servicing those cities until the 60 days from the original suspension date elapses.

Permian Airways president Chuck Ceppi had said earlier the Sept. 16 shutdown of the commuter service was temporary until finances could be found to expand the airline's service. Since then, however, the airline's business office has been closed.

its furniture removed to a hanger at the airport and its phones disconnected.

When contacted this morning, a spokesman for Ceppi refused comment.

The commuter airlines, which is based at Midland Regional Airport, had been one of the only airlines servicing West Texas cities. Since the shutdown, customers from cities, such as San Angelo, have had to fly through Dallas for connecting flights to other Texas cities.

TAC further asked that any objec-tions from the airlines be filed within 15 days, or by Oct. 13.

In its notice to TAC on Sept. 19, Permian said it intended "to close down our operation in an orderly and legal manner." It further stated, according to the TAC release, "We regret that we were unable to comply with the 60-day notice required by regulation prior to deletion of our

services," but its financial condition made it impossible to do so.

The commission said that violators

Dallas bus driver strike has commuters stranded

DALLAS (AP) - More than 40,000 stranded commuters have cranked up their cars and slipped on their walking shoes following a walkout by transit workers that has virtually shut down the city's only mass transportation system.

Transit Union has asked for an additional \$850,000, a figure Franklin said could only be met by a fare increase, tax hike or layoff.

"I want one thing, one thing, and that's to be treated like a man," said veteran driver walking a picket line outside the DTS office. The man, wh asked not to be identified, echoed the sentiments of other drivers, who complained of "split shifts" - working two four-hour blocks a day - and driving special buses to sporting events on their days off. One commuter, Charlotte Williams, 29, said she wanted DTS officials to grant the pay increase so things could get back to normal. "I think this is the biggest mess in

of the regulation shall be subject to a maximum fine of \$100 for each day of the violation. Further, it said, failure to comply with TAC's regulation could result in "suspension or revocation" of the airline's operating certificate.

TAC went on to say, "It is the Commission's duty, not the carrier's, to determine whether service may be suspended on less than 60-days notice. In this case, there is no justification for depriving the communities of the opportunity to seek alternate air service, inconveniencing those depending on the use of the Official Airline Guide, which lists Permian's service through Nov. 1.

In addition, TAC accused the airlines of not implementing all the service points it was authorized and expected to service.

When it suspended service Sept. 19, the Commission said, "Permian had

service at five points on its certificate, all within the last 51/2 months." Permian had been authorized to serve Dallas-Fort Worth, Abilene, Big

already suspended or never initiated

Spring, El Paso and Wichita Falls, in addition to five other cities: Amarillo, Lubbock, Midland, San Angelo and San Antonio.

The TAC continued, "While the Commission realizes that virtually all suspensions are the result of non-profitable operations which result in a carrier losing money, nowhere in its various reasons for not continuing service to the five communities referred to above did Permian indicate that it was in serious financial trouble or that it might have to completely suspend service throughout its entire system

TAC also ordered the airlines to show cause by Oct. 13 for its suspension.

acoustical findings.

DALLAS (AP) - The National Academy of Sciences will fund a new study of acoustical evidence that led investigators to conclude two gunmen fired on President John F. Kennedy nearly 17 years ago, the Dallas Morning News said today.

The newspaper said the study was requested by the Justice Department and quoted a department source as saying the study is the "first preliminary step" toward reopening the investigation.

The four-month study, financed by a \$23,360 National Science Foundation grant, will be announced Monday, the Morning News reported.

The study will review the validity of findings that a recording of police radio transmissions captured the sound of four shots fired at the motorcade carrying Kennedy on Nov. 22, 1963

The Warren Commission determined in 1964 that Lee Harvey Oswald, acting alone, fired three shots at the president from a sixth floor window in the Texas School Book Depository. Oswald himself was gunned down days later.

In 1978, the House Assassinations Committee concluded a conspiracy

Odessan held in woman's death

ODESSA - A 45-year-old Odessa man turned himself in to Odessa police today in connection with the shooting death early this morning of 38-year-old Ofliela Mendez Guerra.

No charges had been filed by 9 a.m., however, and the man was being held

for further questioning. Police said they were called to Los Gallitos Cafe at 1108 S. Dixie St. shortly before 1 a.m. today and found Ms. Guerra inside the building. She had been shot in the neck, left shoulder and stomach, officers said.

According to witnesses, the woman was chased inside the cafe by an assailant who then shot her.

Ms. Guerra was pronounced dead at the scene by Peace Justice Charles Gee Jr.

A police department spokesman said no motive for the shooting is knows at this time. +

In speaking of Clements, Kerr said

Looking ahead at the next two work.

"I'm a little inconvenienced, but I'm hard to make mad," said Virgil Moore, a country club employee who hitch-hiked to work Wednesday morning after about 600 transit workers walked off their jobs.

"Only 50 drivers showed up this morning (Wednesday)," said Dallas Transit System spokesman Jerry Johnson. "That's a drop in the bucket.'

Drivers, mechanics and bus cleaners walked off their jobs after DTS officials declined to grant a pay increase request that employees say would match an increase given to DTS supervisors.

Cliff Franklin, DTS general manager, called the strike an "illegal work stoppage," and said the company would consider "disciplinary action" against strikers. Although he set no deadline for the workers to return, he said DTS might seek an injunction ordering employees back to work if the strike continued.

He said the company would "stand firm" on the 7 percent raise that went into effect Wednesday - a \$1.23 million increase. The Amalgamated

Man jailed for intoxication

A 28-year-old Midland man was in City Jail this morning on charges of public intoxication and misdemeanor possession of marijuana

An employee of The Bar, 606 W. Missouri Ave., called police at 1:05 a.m. and reported a disturbance. When officers arrived, they arrested a man for public intoxication.

At the police station, while searching the man's pockets, Officer Jeff Marugg discovered a plastic bag containing what appeared to be marijuana, reports said.

A woman was in jail this morning after a reported assault early today at the Kent Station, 810 W. Florida

Forecast fair

More fair weather with cooler nights and mornings is in store for Midlanders as the week winds down. Friday's high should be in the upper 70's while tonight's low is expected to be near 50 degrees, the National Weather Service at Midland Regional Airport predicted.

Easterly winds changing from a northeasterly direction earlier today should be 5-10 mph tonight and Fri-

Comparatively speaking, last night's low of 58 degrees did not break the 1966 record low of 42 degrees. Wednesday's high of 85 was warm but the record high for that date remains at 98 degrees set in 1951.

In other cities surrounding Midland, weather conditions were cool and clear with morning temperatures ranging in upper 50's.

the world," she said, "especially when people depend on the buses." Tammy Watkins said she waited three hours for a bus to Parkland Hospital and another three hours for

the bus ride back home. "I think the whole thing is terrible," she said. "I've never seen anything like this in my life. They should have given some notice before they went on strike.'

While the strike worked a hardship on commuters, downtown parking lots enjoyed a booming business.

"I don't know exactly how many parking spaces we have," said Curtis Olson, a parking lot manager, "but there are not enough today (Wednesday)."

Ave. The station's clerk reported that a man and woman entered the store

about 2: 15 a.m. The woman picked up a six-pack of beer and attempted to leave the store, officers were told. When the clerk tried to stop the woman, the woman started scratching the clerk. According to police, the woman also took the clerk's glasses and broke the frames. At 2: 28 a.m., an officer checked the

Kent Station on the Rankin Highway and saw two people and a vehicle matching the description given by the previous clerk. The two were arrested for public

station, the officer stopped by the Kent Station where the assault had occurred, and the clerk identified the woman as the one who had assaulted her.

Congressman exposes fake medical treatment

WASHINGTON (AP) - Every year, America's elderly spend millions of dollars on bogus medical skeleton," she said. treatments that claim to cure everything from failing eyesight to cancer.

Some of these remedies are ridiculous and cause no harm," said Rep. Claude Pepper, D-Fla., at a hearing Wednesday. "Others are downright danger-ous and may result in injury or death." Pepper, chairman of the House Select Committee

on aging, posed for photographers in front of a contraption committee staff members said was called a "spectro-chrome." It emits colored light, and staffers said its makers claimed that when a sufferer stands before it naked, facing north, with a full the moon in the sky, the device will cure diseases ranging from arthritis to cancer. The device sold for \$250.

Outrageous as the "spectro-chrome" was, committee members found Lena Rosenberg's story even more compelling.

Rosenberg, 61, told how she spent \$2,000 for wheat grass, watermelon rind and other natural ingredients that an outfit named the Temple Beautiful in Philadelphia — where she lives — had said would cure her husband's cancer. In fact, she said, it shortened his life.

Arkansas phone rates to go up

LITTLE ROCK, Ark. (AP) - Texarkana residents will find themselves depositing quarters instead of dimes in pay telephones in that southwest Arkansas

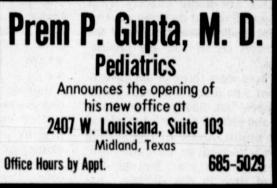

The state Public Service Commission approved Wednesday after floods inundated some 5,700 acres and Wednesday a request by General Telephone Co. of the Southwest to implement new rates in TexarHe died last year, undernourished, "a walking

"I was looking for magic," Mrs. Rosenberg told the committee.

A number of scams and phony theraputic devices were displayed for the panel by postal officials who investigate swindles involving the mails.

These included newspaper ads for a treatment that claimed to restore failing vision. Those who mailed away for instructions were told to stare directly at the sun. The promoter of that treatment fooled 66,000 people and collected \$726,000, officials said.

Assistant Chief Postal Inspector Fletcher F. Acord told of another promoter whose direct-mail ads claimed his concoction of seaweed extract, when injected into the bloodstream, would cure cancer. But Acord said the product was found to contain poisonous bacteria.

irlines to ts suspenFlood threatens water supply for Oakland, vast farm lands

STOCKTON, Calif. (AP) — Floodwaters are seep-ing through a railroad embankment in more than 25 spots and there is a 50 percent chance it could give way, threatening 45,000 acres of delta farm land as well as Oakland's drinking water supply, officials say

More than 260 conservation crew workers were sandbagging the flooded side of the railbed in the lower San Joaquin River Delta as rail cars dumped tons of crushed rock to shore up the earthen structure.

Floodwaters on Friday breached a nearby earthand-stone levee, inundating the 5,000-acre Lower Jones Tract and a ready-to-harvest vegetables.

Gov. Edmund G. Brown Jr. issued a state disaster proclamation Wednesday and asked President Carter to declare the area a disaster, making federal aid available for repairs.

If the railbed fails to hold back the waters, aqueducts serving 1.1 million Oakland area residents would be flooded and could be washed out, officials said. Reserve water supplies, however, would last five to six months, and pumping has been increased to further build up the reserve, they said. Chances of holding the flood at the Santa Fe Judy Devlin, a California Conservation Corps super-Railway bed "are about 50-50," Walter Anton, chief visor.

engineer for the water district, said Wednesday.

"There's quite a bit of seepage" in two to three dozen places, said David Vossbrink, a spokesman for the East Bay Municipal Utility District. "Having the water come through is not in itself a bad thing. But having mud come with it is another thing

Mud would indicate the embankment was eroding.

"A situation like this can change very fast," Vossbrink said.

A petroleum pipeline operated by Southern Pacific Railroad which runs alongside the aqueducts also could be in danger, officials said.

It will cost some \$5 million and take four or five months to repair the levee and pump floodwaters out of Lower Jones Tract, officials estimated.

Workers also were raising levees along Highway 4 to safeguard unflooded areas and filling the initial 300-foot breach in the levee on the north side of Lower Jones Tract.

Work on the railbed was proceeding quickly as high winds subsided.

High wind churning up the water could destroy all the work we have done in under 24 hours," said

Town closed down after eruption of volcano opened again, at last

COUGAR, Wash. (AP) - Four months after the first devastating blast of Mount St. Helens, the roadblocks isolating this tiny Washington town are down at last

The "liberation" comes too late for the summer tourist trade, but Cougar's few residents are delighted to see some faces from the outside world.

"We're liberated! You don't know how good it feels not to have that hassle about going through the roadblock," said Dot Elmire, owner of the Cougar Store

"At least we don't feel like we're locked up in a little part of the world," said Marilyn Platt, partowner of the Lone Fir Resort here.

Gov. Dixy Lee Ray on Wednesday signed the order bringing down the roadblocks on the road to Cougar, allowing the general public access to the town for the first time since the volcano's May 18 blast.

"We had a little flurry (of business) when they took the roadblock off at around 1 p.m.," Mrs. Elmire said. "They wanted to give us some business they said, bless their hearts. It was kind of fun to see some strange faces.

The "flurry" consisted of about nine people, and that's an important number in Cougar these days. The town, 12 miles southwest of the southwestern Washington volcano, had 150 to 200 residents before the eruption, Mrs. Elmire says. The blast, and the subsequent isolation, left Cougar with about 50 people, she says

The Cowlitz County sheriff's office puts the population at 20

Residents who stuck by their homes are angry at

the state for isolating the town and depriving them of summer trade from tourists, campers and fishermen. They wanted the town removed from the restricted-access "red zone" that rings the moun-

Mrs. Platt says she's lost \$45,000 since her motel closed May 18. She usually rents rooms to loggers during the winter, but logging is severely curtailed now and her trade probably won't pick up until next summer.

Mrs. Elmire said her business in July was 14 percent of normal.

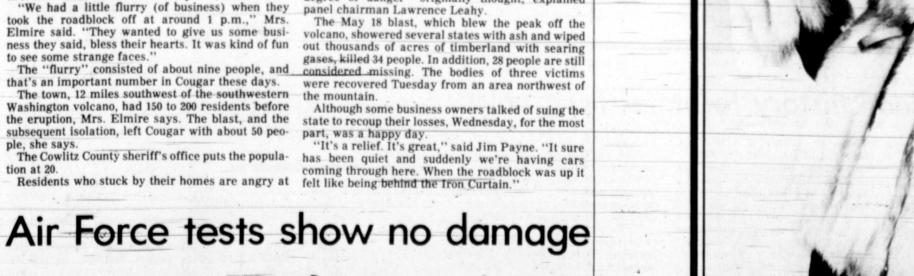

Finally, a three-member panel appointed by Miss Ray recommended Cougar's liberation, though the rest of the 20-mile-deep red zone remains intact.

"It was the opinion of every expert — geologists, the State Patrol, the sheriff and so forth — that the south side of the mountain did not carry with it the degree of danger" originally thought, explained panel chairman Lawrence Leahy.

The May 18 blast, which blew the peak off the volcano, showered several states with ash and wiped out thousands of acres of timberland with searing gases, killed 34 people. In addition, 28 people are still considered missing. The bodies of three victims were recovered Tuesday from an area northwest of the mountain.

state to recoup their losses, Wednesday, for the most part, was a happy day.

has been quiet and suddenly we're having cars coming through here. When the roadblock was up it felt like being behind the Iron Curtain."

to environment from explosion

JACKSONVILLE, Ark. (AP) - The explosion of a Titan II missile in a silo near Damascus produced "no significant environmental damage" detectable in 270 surface water, gound water, air and soil samples, an Air Force officer says.

Maj. Gary Fishburn, chief of the water quality branch of the Air Force's occupational and environmental health lab at Brooks Air Force Base in San Antonio, Texas, told of the samplings in a news conference at Little Rock Air Force Base.

State Health Department water well samples taken after the accident showed the presence of nitrates in wells around the silo.

Fishburn said the fuel in the missile at the time of the Sept. 19 explosion would have broken down in the environment to nitrates by now

But, he said Tuesday, there are other sources of nitrates in the environment as well, such as fertilizer, septic tanks and manure.

Fishburn said air samples taken between 9 p.m. Sept. 18 and 3 a.m. Sept. 19 did not show the presence of missile fuel vapor.

AGE

9:00-6:00

He said no water samples were taken at that time

Fishburn said the nearest well to the explosion site is an Air Force well about 1,500 feet to 2,000 feet south of the missile complex. Tests of that well did not show any unusual concentration of nitrates, he said.

However, he said the Air Force intends to drill eight wells around the silo to monitor any possible leakage

The federal Environmental Protection Agency has a standard of safeness of 10 milligrams of nitrates per liter, Fishburn said, but there have been documented cases of 50 milligrams per liter from natural cases such as the presence of septic tanks or fertiliz-

He said the low standard for nitrates was set by the EPA because nitrates particularly can be a problem for young children. He said the presence of nitrates is believed to be a factor in the "blue baby" syndrome because it affects the ability to breathe. Fishburn said he does not believe any problem like that could occur because of the silo explosion.

No time to rest

Energy producers in the United States are doing exactly what they said they'd do if the government would remove some of the controls on oil and gas production.

There were those in the government who didn't believe it would happen, but, finally, we got limited and phased decontrol of oil and gas profits. And what's happening now? "American oil output will increase this year for only the third time in this decade," according to U.S. Sen. John Tower of Texas. Furthermore, last year "we recorded the largest jump in natural gas reserves in more than a decade."

The result of this loosening of the shackles on the oil and gas industry has been a tremendous increase in the amount of activity in the nation's oil and gas fields. Sen. Tower notes that "after 25 years of steady decline in the number of wells drilled, producers this year are expected to complete a record number of new wells."

An oil "glut" has even developed in the United States. Things look better - from an energy standpoint - than they have in awhile. But it would be a mistake to rest on our laurels and to ignore the energy problem this nation faces. If we do, that energy problem will return to haunt us.

Sure our demand for imported oil has decreased. But the nation has been suffering from the ill effects of a recession. Sen. Tower appropriately notes, "When the economy begins to recover, use of oil and gas almost certainly will

Undoubtedly the Oil Producing and Exporting Countries' response to all this will be to cut back production to keep the price of oil from falling. Furthermore, we are assured of paying more for the oil we import in the future.

How do we further lessen our dependence on imported oil and buffer ourselves against the higher prices OPEC will be charging? By freeing the oil and gas industry to increase domestic production. That would mean the United States would have to import less oil and, consequently, would be less vulnerable to the whims and fancy of other nations.

One way to further increase domestic production would be to get rid of the so-called windfall profits tax and to open up federally protected lands to energy production. Sen. Tower has recommended both of these steps. The wisdom of that plan of action goes without saying.

According to the senator, the windfall profits tax is costing the United States up to two million barrels of oil per day in domestic production. That's two million barrels per day we now have to import. That very fact virtually negates the positive effects of decontrol, the senator says.

It's foolish to keep millions of acres of federal land tied up, refusing even to allow testing for oil reserves. We simply can't afford that luxuary at this point in time. It's time to get serious about the

energy situation before we are forced into action again. The federal government has taken a good first step. Now it should go

forward by encouraging, not dis-

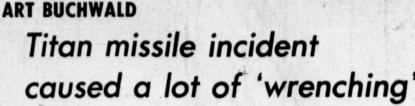

That's the only way to realisti-

cally approach energy self-suffi-

couraging, energy production.

THURSDAY, OCTOBER 2, 1980

DARKEST WASHINGTON

WASHINGTON - We almost lost Arkansas a few weeks ago. Some smart aleck threw a wrench into a Titan missile silo. It hit the fuel tank and set it off.

The only thing that saved the state was that the nuclear warhead, which was sitting on the top of it, didn't blow

The incident raised a lot of questions in the minds of the American people.

Q-Why Arkansas? A - When the first Titan missiles were built, the experts in charge of selecting sites for them chose Arkansas because they were quite sure the Soviets didn't know where it was.

Many people in the Pentagon didn't know where it was either, and that was the reason for the delay by the Air Force in doing anything about it when the accident occurred.

Q - Now that the Soviets know where Arkansas is, will we have to move the Titan silos to another state?

A - No. They are too fragile to move, and because of the adverse publicity it's doubtful that any other state would take them.

Q - What effect will this have on the University of Arkansas football team, which is usually in the top 10 at the end of each season?

A - It will be very difficult now to recruit out-of-state high school football stars, and the school may have to give up its entire athletic program. Q - What are we to make of the

Art Buchwald

EDITORIAL

accident in terms of all the fail-safe systems that were built into the Titan?

A - It depends on which side you're on. If you're on the military's side, you can claim that the system worked because the nuclear warhead didn't go off. If you live in the area, you may find it hard to sell your house.

seeing one of our Titans come flying out of the ground without prior warn-

- They are probably frightened silly. They always thought that we needed tremendous amounts of sophisticated electronic gear and computers to launch a Titan. But now they know we can set one off by just throwing a monkey wrench down into the hole, and they have no answer for this. If the SALT II talks ever start up again, the first order of business may be the banning of wrenches anywhere near a missile silo.

Q - Do the Soviets have anything comparable to the Titan II?

A - As far as we know they don't. We do know they've been dropping wrenches on their MIRV missiles for 20 years, but they've never been able to breach their fuel tanks with them. When it comes to wrench penetration capability, we're at least 10 years ahead of them.

Q - Then most American people can take pride in the fact that the Titan II missile is our greatest deterrent against the Soviets?

A-You could say that. But don't, if vou live in Arkansas.

Q-Did the accident breach any security secrets that might impair our defense posture?

A - Only one. As many people know, there is a man with a black box who follows the president everywhere he goes. The black box is at the president's disposal in case of a nuclear attack. Up until now no one but the president and his national security adviser knew what was in the box. Now the secret is out of the bag. Q - What is in the black box?

A - A three-pound monkey wrench.

WASHINGTON MERRY-GO-ROUND Aaron slip may have compromised 'Trigon

WASHINGTON - President Carter has rushed to clear his deputy national security adviser, David L. Aaron, of the charge that he inadvertently compromised a top U.S. spy in the Soviet Union.

The White House has called the accusation "completely unfounded" and "unsubstantiated rumor." Both the FBI and the CIA have dutifully confirmed that there's no substance to the allegation.

Certainly Aaron is a sterling fellow, high on the White House totem pole, who would never intentionally unmask an American agent. Indeed, he may be as innocent as the White House insists he is. But my own investigation indicates otherwise.

In the subterranean world of halflight where espionage is practiced, the truth is always difficult to discern. Yet my associate, Dale Van Atta, has questioned four intelligence sources who are familiar with the case. They have been scrupulously accurate in the past.

Some papers are stamped with code words, which themselves are classified. Even more guarded than these are documents with blue lines running down the pages.

appears in blue-line documents. Aaron allegedly mentioned to an East European diplomat some facts that had come from a blue-line document dealing with Warsaw Pact nuclear weapons happened to overhear Aaron's careless conversation with the East European. The eavesdropper reported the foreign office. The cable was intercepted and decoded by America's ultra-secret National Security Agency. The message was such an embarrassment to the White House that, under an executive order for the protection of private individuals, it was supposed to be destroyed. Yet I understand a copy was kept and might be ferreted out if the FBI looked hard enough. Shortly thereafter, the CIA canhad "rolled up one of our agents." that Aaron revealed, so the story

really compromised because he "lived too high" on the money the CIA paid him.

Footnote: Shortly after I first wrote about the Trigon case, two members of the Senate Intelligence Committee, Daniel Moynihan, D-N.Y., and Malcolm Wallop, R-Wyo., asked the staff to investigate. This could be awkward, since Aaron was a staff colleague before he moved to the White House

SECRET WARNING: Long before the Iraqi-Iranian outbreak, the Joint Chiefs laid before President Carter a top-secret warning that a crisis in the Persian Gulf area could erupt "at any time" and that it "could curtail aceess to the oil required by the United

States and its allies.

increase. Without an equivalent increase in domestic production, our import bills will increase also."

And we must not forget OPEC's role in the energy picture today.

TODAY IN HISTORY

Today is Thursday, Oct. 2 the 276th day of 1980. There are 90 days left in the year.

Today's highlight in history: On Oct. 2, 1919, President Woodrow Wilson suffered a stroke that paralyzed the left side of his body.

On this date:

In 1187, Jerusalem fell to Moslem forces led by Saladin - the sultan who was trying to drive Christians out of Palestine.

In 1889, the first Pan American conference was held in Washington, D.C.

In 1941, German armies launched an all-out drive against Moscow during World War II.

HEMISPHERE REPORT

ciency.

the first black to sit on the U.S. Supreme Court.

Nixon received an enthusiastic reception when he visited Madrid.

Five years ago, U.S. Treasury Secretary William Simon declared that another increase in world oil prices would seriously jeopardize global economic recovery.

delivered his most comprehensive statement on international affairs in an address to the United Nations General Assembly in New York.

Today's birthdays: film critic Rex Reed is 40 years old. Editor Clay Felker is 55.

In 1967, Thurgood Marshall became

Ten years ago, President Richard

One year ago, Pope John Paul II

They claim that Aaron let slip some ultra-secret information at a party, that an intercepted diplomatic dispatch proved he had talked out of turn and that the White House is more anxious to cover up the embarrassment than to uncover the truth.

Aaron's slip allegedly exposed the identity of Anatoly N. Filatov, a Soviet intelligence officer, who worked undercover as an American agent known to the CIA by the code name Trigon. The unfortunate spy disappeared into the Soviet prison system after a secret military trial in 1978.

The Soviet press reported he had been executed. Some CIA officials believe he committed suicide. His Moscow lawyer claims he is still alive, serving out a 15-year sentence. The information that Aaron spilled

at the party, sources say, came from 'blue line" documents so secret that only a trusted few insiders are allowed to see them. There are several

The military chiefs warned that the 'dramatic worsening of the military balance in the Middle East-Persian Gulf region" exposed the "oil-producing states in that area to much greater potential security threats."

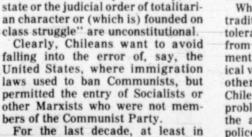

They foresaw the danger of Soviet intervention - not "a bolt-from-theblue nuclear attack on the United States" but limited military action, Afghanistan-style - in the early

"The Soviet intervention in Afghanistan, the first major Soviet-American incident of the 1980s, may well be a harbinger of the greater risks of military confrontation which can be foreseen in the decade to come." wrote the Joint Chiefs.

They warned that Soviet forces 'could intervene in regional political conflicts and become a threat to U.S. and allied access to oil supplies." And the United States doesn't have the military power to stop them, short of nuclear retaliation.

WATCH ON WASTE: Election-year promises of economy in government never seem to affect the money Congress is willing to spend on itself. Recently, for example, the House voted to lay out \$3.5 million of the hardpressed taxpayers' money to buy a whole city block on Capitol Hill for future office space. An official of the Capitol Architect's office explained that it was really a bargain - because it would cost a lot more if it were bought 50 or 75 years from now, when it will actually be needed.

BEN WICKS

Chile, and more recently in other Latin American countries, the "socialists" have come to be recognized as far more prone to violence than the Communists.

Chile has had long experience with Marxists. Marxists dominated the principal labor federation for decades. Communists, Socialists and others were elected to the Chilean Congress under their own party names, not as in the United States where an occasional Marxist slips in to Congress, under some other party label, and dares not disclose his ideological bent until after giving up or losing his seat.

That many Chileans are Marxist in sympathy is a secret only to those who ignored Chile's existence prior to 1970, when Allende, then a Socialist senator, became the first Marxist head of state in the world to win by democratic election

His congressional career started 23 years earlier, in 1937. It was his fourth consecutive try at the presidency

since 1952

While Chileans are proud of their tradition of political and ideological tolerance, what they most remember from the period of Allende's government are the food shortages, the political violence, the influence Cuban and other foreign Marxists gained in Chile, government-instigated labor problems, Marxist efforts to subvert the armed forces and the national police, and the economic and social

They do not want to repeat those unhappy experiences and so they voted in favor of a constitution that calls for continued military rule.

"Tell us what it was like makes sense, from the Chilean point before toxic waste, Gran-pa.

The Country Parson y Frank Clark

it deprives you of something more urgent to do when the leaves need raking."

Foreigners must know Chilean history to understand vote "violence or a concept of society, the

To understand Chile, foreigners should try to remember that the South American nation lived and suffered under Marxist rule for nearly three years

Only if you keep that in mind does the Sept. 11 plebiscite make sense. Otherwise, it might seem incredible that one of the more sophisticated of Latin American nations would have voted to "institutionalize dictatorship," as Marxist propagandists put

For Chileans voted, better than 2-to-1, in favor of a new constitution that provides for eight more years of authoritarian government under the presidency of Gen. Augusto Pino-

Of course, the 4,203,615 voters, 67.06 percent of the electorate, who balloted for the new constitution, did not do so to institutionalize dictatorship. Rather they were registering general approval of the seven years of governent that Pinochet and the military unta have given Chile.

Another 1,891,332 voters, 30.17 perent of the total, opposed the constituon and the continuation of Pinohet's rule. They were presumed to clude Christian Democrats and the Marxists — the communists, Sociaists and others who carried President Salvador Allende to power in 1970, in a pree-man race, with 36.3 percent of

Because most Chilean Marxist eaders se in exile, they waged their

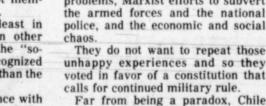

campaign against the plebiscite from abroad - from Moscow, Paris, Mexico City and Caracas.

The Christian Democrats, though, led the opposition in Chile. Former President Eduardo Frei, who governed Chile through the 1970 elections, and other Christian Democrat leaders called publicly for a "no" vote in the plebisicite.

Frei made one major speech against the Pinochet government, against the proposed constitution and against the plebisicite. Only the newspaper El Mercurio printed the full text of his speech. The consensus seemed to be that Frei did not come to grips with what two out of every three Chileans regard as the No. 1 threat to their peace and well-being - the possibility of another Marxist takeover. Chileans are painfully experienced in ideological matters.

Kenith D. Dennis

DENVER CITY — Services for Kenith D. Dennis, 54, of Denver City, father of Ronald Dennis of Midland, were to be at 4 p.m. today in First Baptist Church with the Rev. Bill Merritt, pastor, officiating.

Burial was to be in Denver City Memorial Park directed by Singleton **Funeral Home**

Dennis died Tuesday in his home from natural causes.

He was born Aug. 26, 1926, in Electra. Dennis was a 21-year resident of Denver City. He was a lease operator for Shell Oil Co. where he worked for 33 years. Dennis was a World War II veteran and a member of the First Baptist Church in Denver City. He married Leatrice Rice on Jan. 17, 1949, in Electra.

Other survivors include his wife, a daughter, two sisters, three brothers and a grandson.

Lula P. Price

Services for Lula P. Price, 87, of Midland were held 2 p.m. Wednesday in the Newnie W. Ellis Funeral Home chapel with the Rev. Allen Lowe of Memorial Christian Church officiating. Burial was in Resthaven Memorial Park.

Mrs. Price died Monday in a Midland nursing following an extended illness

Pallbearers were William Blackman, John Casey, George Degenfelder, Joe Feagan, Mark Guinan and Bo Harrison.

Vada Fryar

COLEMAN - Services for Mrs. Jesse (Vada) Fryar, 72, of Coleman, sister of Ruby Futrell of Midland, were to be at 2:30 p.m. today in Steven Memorial Chapel here with burial in Gouldbusk Cemetery. Mrs. Fryar died Tuesday in an Abilene hospital folowing a lengthy ill-

ness. She was born Nov. 30, 1907, in Coleman County. She was a member of the Church of Christ.

Other survivors include four brothers, a sister, and several nieces and nephews.

By ED TODD Staff Writer

Virgil Jones, the city of Midland's tax assessor-collector since February 1970, Wednesday was named the chief appraiser of the Midland County Tax Appraisal District in a 4-2 vote that following "considerable debate."

Jones, 50, will take over the \$40,-000-a-year job of organizing and setting up the chief appraiser's office next year, but his jurisdiction will not take effect until Jan. 1, 1982.

The district will be doing the property appraisal work for the six taxing entities in the county: the city of Midland, Midland Independent School District, Midland College, Midland Memorial Hospital District, Greenwood Independent School District and Midland County.

Currently, Jones and his City Hall staffers carry out the appraisal work for the city, MISD, the college and hospital.

Casting dissenting votes in protesting Jones' appointment were Charles Welch, who represents the Midland County Commissioners' Court, and Bud Lea, who represents the Greenwood ISD.

Welch, who is concerned about giving ranchers and farmers just and fair appraisals, moved that Frances Shuffield, the chief deputy in the county's tax office since 1967 and the unopposed candidate for county tax assessor-collector, be named to the slot. Lea seconded the motion, but it went no further.

In another vote, Jones got the nod in a marginal 4-2 vote.

"I feel like it would be better the other way," Lea said of the motion to appoint Mrs. Shuffield. "We just got

Viets rescued

MANILA, Philippines

(AP) - A U.S. Navy de2 stroyer has rescued 103 Vietnamese refugees, including a woman four months pregnant, from a small boat in the South China Sea, a Navy spokesman said today.

> The refugees had almost no food and only 15 gallons of fuel, the spokesman said. He said they were taken aboard the destroyer and given food and blankets.

out-voted.

Lea said many "people in my (Greenwood) community" have voi-cedopposition to Jones. He said they had dealt with Jones and didn't appreciate his way of doing business. "I was representing them," Lea said.

"It's done," he said. "He's hired, and there's nothing we can do about it. There are four of them and two of us....We couldn't convince them that they were wrong, and they couldn't convince us that we were wrong. I can live with it."

Voting for Jones's appointment were Fred Wright, the Midland College representative who initiated the motion for Jones's appointment; Walt Holton, the hospital's spokesman who seconded the measure; Joe Nuessle, city attorney who represents Midland, and Gil Tompson, board chairman who represents MISD.

Tompson said he was pleased with Jones selection.

"... The majority of us felt that after considerable debate and talking with people in Midland, outside the city and over the state, that Virgil had all the qualifications for chief apprais-Tompson said. er,'

"He has a reputation of being a first-class tax assessor-collector not only among the local folks but statewide

"If we had brought in somebody, a new man would have to get familiar with the property and all of its values," Tompson said. Jones, who was named the city tax

assessor-collector on Feb. 25, 1970, has been working for the city since 1966. His present salary is \$32,080.

He is to report to the board at 9 a.m. Oct. 28, in the Midland County Commissioners' Courtroom to suggest the space requirements needed for the chief appraiser's office, staff strength, and requirements for assistant appraisers. Tompson said he hopes that eventually the appraiser's office and the assessment and collections functions of the six taxing bodies will be in the same building.

The functions will not be in separate locations "if we can help it," he said.

Some county officials who are displeased with the new appraisal system have indicated that the county may eject itself from the one-for-all appraisal district if Amendment No. 3 on the Nov. 4 general election ballot

election on the date of the presidential election.

The environmental board's order charged that the Navy was going ahead with construction of a camp near the town of Juana Diaz, on the south coast, without first having cleared its plans with local environmental officials.

The board also said that the camp was being built to hold 800 people at the most and no more could be housed there without overloading the facilities and creating water and sanitation problems. Along with the board's order, the governor's press office made public a telegram from presidential assistant Eugene Eidenberg in which he said between 3,000 and 5,000 refugees would be sent to Puerto Rico

Iran-Iraq conflict is Persian Gulf's biggest blowup

BEIRUT, Lebanon (AP) - The Middle East has seen many wars over boundaries and ideologies in the 20th century, but the conflict between Iran and Iraq is the biggest blowup between two Persian Gulf nations.

The four Arab-Israeli wars triggered the heaviest fighting among the most clearly defined foes, but the Arabs have also warred among themselves between and even during their common offensives against Israel.

Sometimes the inter-Arab fighting grew out of personal and political animosities between leaders, such as the four-day border skirmish in July 1977 between Col. Moammar Khadafy's Libyan troops and the forces of Egyptian President Anwar Sadat.

IN OTHER CASES, civil wars such as the 1960s conflict in Yemen and the 1975-76 war in Lebanon became proxy battlegrounds for other Mideast nations

But never in this century has there been such full-scale warfare between two Persian Gulf nations as the war now being waged by the Iranian and Iraqi oil giants. Nor has the Western world's access to critical Persian Gulf oil been so directly threatened.

During the 1973 Arab-Israeli war, the Arab oil producers temporarily

cut supplies to the United States and other nations seen as Israel's allies, but the oil fields themselves were not battlefields.

Here, listed by region, is a sum-mary of recent Middle East wars and other military actions:

THE PERSIAN GULF:

The Iranian-Iraqi frontier has been a trouble spot for decades, with periodic skirmishes erupting over Iraqi efforts to control the Shatt-al-Arab waterway at the head of the Persian Gulf, the key oil gateway to both nations

In addition, both Iran and Iraq have

Forlani to form new government

ROME (AP) - Arnaldo Forlani, president of the dominant Christian Democratic Party, today was named to try to form Italy's 40th postwar government. He reiterated the party's position that the Communists would be excluded from the Cabinet of this NATO nation.

Forlani was named by President Sandro Pertini to form a new government to succeed fellow party member Francesco Cossiga's coalition, which fell Saturday when its economic package was defeated in Parliament by a single vote.

Forlani, 54, has served as foreign minister in three governments. A native of Pesaro on the Adriatic coast,

Death toll 13

MUNICH, West Germany (AP) -The death toll from the Oktoberfest bombing has risen to 13 with the death of 17-year-old Robert Gmeinwiesert, police reported.

Authorities said 97 persons injured in the explosion at the Munich beer festival last Friday were still hospitalized, and 18 of them were in critical condition

Officials have said they believe the bomb was planted by a young member of a banned neo-Nazi organization who was killed in the explosion. They said they found no evidence that any other members of the organization were involved.

Forlani has been secretary of the Christian Democratic Party and was first elected to Parliament in 1958. Emerging from Pertini's office, Forlani admitted in a written statement it will not be an easy task governing.

"But I hope that my good will be reciprocated by that of the political

Girl, 3, shot by cousin, 4

ANTIOCH, Texas (AP) - A threeyear-old girl died after being accidentally shot with a pistol found by her 4-year-old cousin, a Henderson County Sheriff's department spokeswoman said

Lagura Moore was pronounced dead on arrival at Henderson County Memorial Hospital shortly after the shooting, which occurred about 3:30 p.m. Wednesday.

The spokeswoman said the girl was shot in the head after her cousin found a .38 caliber pistol under the mattress in a room where the two children were playing. The pistol apparently discharged as the child was pulling it out from under the mattress. Justice of the Peace Bill Richards

ruled the death an accident.

forces in view of the gravity of the problems Italy is facing," he said.

"A government must have a large base of consensus in Parliament to face the serious domestic and international situation.

Forlani said he would seek to enlarge the former coalition of Christian Democrats, Socialists and Republicans but exclude the Communists.

"Evidently, I refer to the parties which can collaborate in a common programatic task in the government," Forlani said.

Political observers said Forlani's goal was to enlarge the previous coalition with the small Democratic Socialist and Liberal parties.

Forlani said he planned to consult leaders of the parties, including his own, after a "short period of reflection.

frequently sent troops against their Kurdish minorities who have waged almost continual battles for autonomy or independence

Iraq has also had border disputes with its southern neighbor Kuwait, primarily over oil exploration rights in the northern tip of the Persian Gulf. In 1967, Iraq occupied the easternmost tip of Kuwait for four days before withdrawing, and in 1973 Kuwait claimed Iraq was firing artillery across the border. Arab mediators tried to patch up the dispute between the two Moslem neighbors, but sporadic fighting simmered through the late 1970s.

Further south, the handful of tiny Persian Gulf sheikhdoms between Qatar and Oman ended their sporadic feuds and raids and joined forces as the United Arab Emirates after oil replaced trade and piracy as their coin of the realm.

OMAN, AT THE GATEWAY to the gulf, was the scene of numerous clashes between the government troops and tribesmen from the interior until the mid-1970s when the Shah of Iran helped the Omani government crush an uprising in Dhufar Province by rebels receiving aid from South Yemen and China.

The Yemens: Egypt, whose late President Gamal Abdel Nasser was the secular leader of the Arab world, and Saudi Arabia, the spiritual leader of the Moslem world, fought a proxy power struggle by backing opposing sides in North Yemen's 1962-67 civil war. The war started when Yemeni army officers revolted against a new imam, or Moslem religious leader, who fled into the mountains with royalist troops. Egypt

poured as many as 70,000 men into North Yemen to fight on the republican side, while Saudi Arabia sent cash and arms to the royalists. Egypt and Saudi Arabia agreed to pull out in 1967, but the Yemenis fought on until 1970 when the Saudis recognized the republican government.

Meanwhile, starting in 1967, pro-Western North Yemen and South Yemen's pro-Soviet regime began a guerrilla warfare across their mountainous border. The fighting was interspersed with negotiations to unite the countries under one government. The last major flareup was in February 1979 after the North Yemeni president was assassinated by a bomb brought into his office by a South Yemeni envoy.

THE ARAB-ISRAELI Wars:

In 1948, when Britain withdrew from Palestine, Egypt, Syria, Jordan, Lebanon and Iraq invaded the partitioned Jewish enclave in an abortive bid to prevent the establishment of the state of Israel. Outnumbered and outgunned, Israel survived the invasion and became a reality. An armistice in 1949 ended its war of independence.

The next major explosion came in 1956 when Egypt nationalized the Suez Canal, Europe's most direct link to the Persian Gulf and the Far East. Israel, operating in league with the Britain and France, attacked Egypt in the Sinai Peninsula while British and French troops attacked the canal zone in an effort to regain control of the waterway

In 1967, after Egypt closed Israel's southern lifeline through the Gulf of Aqaba and massed its armies in the Sinai, the Jewish state attacked again and in a lightning six-day war wrest-ed the Sinai and Gaza Strip from Egypt, Arab East Jerusalem and the West Bank of the Jordan River from Jordan, and the Golan Heights from Syria.

Buyer?...or s

In 1969 and 1970 Israel and Egypt waged an undecisive 1,000-day War of Attrition across the Suez Canal.

In October 1973, Egypt and Syria surprised the Israelis with a twopronged invasion launched on Yom Kippur, the Jewish Day of A tonement. While Syria attacked across the Golan Heights, Egyptian troops slammed across the Suez Canall and regained a foothold in Sinai. Six y/ears later Egypt and Israel signed a peace treaty and Israel began a phased withdrawal from Sinai.

LEBANON:

After centuries of Ottoman rulle and 2½ decades under a French mandate. Lebanon emerged as an independent nation during World War II. Its delicate balance of Christians and Moslems came unglued in the 1975-7'6 civil war. Syrian peacekeeping troops quelled the conflict, but their continued presence in Lebanon repriesents one of the flashpoints in a nation wracked by continued fighting between three dozen private militias.

Israel, Libya, Iraq and Syntia are among the foreign powers tacitly backing or openly supporting one or more of the militias, while Palestinian guerrillas, evicted frorn their main anti-Israeli staging base in Jordan in 1970, set up bases along the Israeli border in southern Lebanon. Israel periodically mounts mir, sea and land attacks across the border which it claims are aimed at heading off Palestinian raids on Israel.

Poland legalizes first six unions WARSAW, Poland to the plan argue that (AP) - A Warsaw court ending Saturday work-

gave legal approval to Poland's first six independent trade unions. Applications from 15 others are pending.

The court on Wednesday approved independent union charters for the pilots and staff of the Polish national airline, LOT, transport workers in Warsaw, forestry workers in Wichorwo, tire plant employees in Olsztyn, a Warsaw regional group and Polish physicians, the official PAP news agency said.

WASHINGTON (AP) - The Senate confirmed the following Foreign Service officers as ambassadors

The court action stemmed from demands by tens of thousands of workers who paralyzed Poland with strikes in August. The government agreed as part of the strike settlement to allow unions independent of Communist Party control, a move unprecedented in the Soviet bloc

The Warsaw court has yet to decide on 15 pending independent union charters, including one for Solidarity, a labor confederation representing 5.5 million workers headed by Lech Walesa, who spearheaded the strikes in the Baltic port of Gdansk.

Meanwhile, Poland's Communist government announced that higher wages had been put into effect for 8 million workers. Officials said the government was honoring the labor agreements but charged union leaders with reneging on their side of the bargain by calling a nationwide one-hour strike Friday. The strike is to press wage demands and obtain better access to the news media by labor groups

Deputy Premier Kazimierz Barcikowski said the agreements stipulated that the workers could only strike as a last resort, and said some workers' wage demands "exceeded greatly" the sums outlined in the strike settlement.

Leaders of the Solidarity federation said they would go ahead with the strike anyway

Officials said the government, in an effort to avert further strikes, was considering giving workers extra disability benefits and abolishing the practice of making them work three Saturdays a month. Opponents

BUSINESS MIRROR

NEW YORK (AP) — The shooting star of industry, the person who rises early and swiftly to a position of high responsibility, often flames out or is shot down by the flak of events, enemies and competitors.

"There is no problem trickier and filled with perversity than that of the supermobile man or woman," said Professor Eugene Jennings, an adviser to top executives on personal, corporate and personnel matters. "It is amazing to me how many

corporate officials sponsor a very rapid rising man or woman and don't fully realize the safeguards that must be taken to protect that person," said the professor.

Jenning's comments followed news reports of the predicament faced by Mary Cunningham, 29, vice president of strategic planning for the Bendix Corp., a Southfield, Mich. manufacturer of industrial equipment.

Amid controversy about her rapid promotions and association with William M. Agee, chairman and president, Miss Cunningham had sought a leave of absence but was convinced to remain by the Bendix board.

"The best way to to burn out a talented individual is to let him or her go as high as possible as fast as possible," Jennings commented, adding that bosses who allow it to happen share much of the blame.

Shooting stars, or young, upwardly mobile executives, were common in the economic expansion of the 1960s, he said. Rarer now, and more often women, Jennings feels they are less tolerated and more criticized.

Most often, he said, they are found in planning, public relations, consumer and government relations, and sometimes in personnel, all areas in which it is difficult to apply tangible performance criteria

The same lack of success measures, however, make it equally difficult for the individual, no matter how talented, to prove he or she belongs in the position. "The record is not demonstrable," he said.

If criticized, Jennings suggested, neither the sponsor (the person mainly responsible for the promotions) or the star can offer a strong defense.

And if they do, he said, they only make matters worse.

'In most cases the sponsor and star should remain quiet and let the controversy die down," he said. If the star has the competency, he suggested, it will in time begin to manifest itself.

How, he was asked, can a sponsor protect a young but highly competent person who, because of youth, cannot prove his or her right to a job in the conventional manner, i.e., by demonstrating a string of successes?

"When you see an exceptional talent you must view it as a perishable asset," said Jennings, graduate professor of management at Michigan State University, who has helped executives handle many shooting stars.

Typically, he said, you patiently expose the star to a broad base of people who will gradually begin to acknowledge the star's competency and finally support him or her. "You build a constituency," he said. The star must be afforded the

chance to build a foundation. "There is no substitute for experience, and the judgment and maturity that comes with experience. You season the person," he said.

Finally, he said, "when the person does move to the top he or she has had the last weakness removed that typifies most shooting stars, the lack of judgment with regard to people problems.

Criticism of the star has to be expected, and sponsors should be aware of it when they put the star into an exposed situation, Jennings said. The fall to earth is too easy, he said.

To slow a star doesn't mean to diminish it. In fact, said Jennings, it might polish it up. Most people who reach the very top begin slowly, seldom moving fast until they are well into their 30s, he said.

'Most of the great movers and shakers of the world never went up fast," he said. "Late bloomers are much more common than early arrivals, and they are much better accepted at the top.'

On the other hand, "those who moved up fast before their 30s to a reporting relationship with the chief executive often fail to sustain the pace," he said. "They will tell you, 'I wasn't ready for it.'

HNG Oil completes prolific Atoka discovery in Loving

feet.

ENERGY

OIL & GAS

HNG Oil Co. has completed a prolific Atoka gas discovery in Loving County, 10¼ miles northeast of Mentone.

The Midland Reporter-Telegram

THURSDAY, OCTOBER 2, 1980

The strike, No. 1-6 Ludeman, completed for a calculated absolute open flow potential of 44.6 million cubic feet of dry gas per day.

The potential was taken on the zone behind casing perforations from 15,-702 to 15,731 feet after an 8,000-gallon acid treatment

The wildcat was drilled to 17,170 feet. Operator set 4½-inch casing on bottom and plugged the hole back to 16,581 feet.

The Atoka lime was topped at 15,503 feet on ground elevation of 3,204 feet. Other tops include the Delaware, 5,260 feet; Bone Spring, 9,224 feet; Wolfcamp, 12,250 feet; Strawn, 14,900 feet, and Morrow, 16,360 feet.

Wellsite is 1% miles southeast of of Getty No. 1-12-26 Brunson, recently completed Morrow discovery and 1,-320 feet from north and 1,980 feet from west lines of section 6, block C-26, psl survey.

It also is 1.2 miles southeast of Getty Oil Co. No. 1 Brunson, discovery well of the Brunson (Ellenburger gas) field.

DEEP WARD WILDCAT

Florida Exploration Co., operating from Midland, announced location for a 125,500-foot wildcat in Ward County, five miles southeast of Wickett. It is 2,850 feet from the most south-

erly northwest line and 2,500 feet from the most easterly northeast line of section 16, block 16, University Lands survey

The drillsite is 1% miles east of dual Ellenburger and Devonian production in the Beal field.

WARD FIELD WORK

Adobe Oil Co. of Midland No. 1-32 Barstow is to be dug as a 1¼-mile west outpost to production in the northwest side of the Scott (Delaware oil) pool of Ward County.

The project, 1/2 mile southeast of Barstow, is to be drilled 660 feet from northeast and northwest lines of section 39, block 33, H&TC survey. Contract depth is 5,800 feet.

Exxon Corp., operating from Mid-land, announced location for an 18,-

1,320 feet from southeast and south-

200-foot project to test the Fusselman 7/8 mile northwest of the Quibar (Fusselman gas) field of Ward County, 21/2 miles north of Barstow.

Garrett No. 1 Miriam, a 1,850-foot wilcat, will be drilled 467 feet from north and 3,416 feet from west lines of section 61, block 1, I&NG survey. Ground elevaion is 2,209 feet. The site is 5/8 mile south of the Haflaw field. ****

The location is 1% miles south of the

two-well Haflaw (Queen oil) pool and

separated from it by two dry holes,

one bottomed at 1,786 feet and the

other at 7,776 feet.

Garrett No. 1 Carrie will be drilled to 1,900 feet one mile east of the Millard field and one mile south of the Haflaw field.

It is separated from the Haflaw field by a 1,786-foot dry hole. Drillsite is 467 feet from north

and965 feet from west lines of seciton 60, block 1, I&GN survey. Ground elevation is 2,142 feet.

By R. GREGORY NOKES WASHINGTON (AP) - Treasury Secretary G. William Miller said today a prolonged interruption of oil exports from Iraq and Iran could 'greatly exacerbate"the world's economic problems and suggested other oil exporters not follow through on plans to curtail production

"We cannot ignore the fact than an extended interruption of supply could lead to substantial difficulties, the possibility of price increases that would slow economic progress ... and greatly exacerbate the problems that are so difficult already."

That is one reason "we seek an early end to the conflict," Miller told reporters.

Miller also said the U.S. government ended fiscal year 1980, which came to a close Tuesday, with a budget deficit of \$60 billion. He said the deficit for 1981 would be between \$40 billion to \$50 billion, about \$10 billion higher than previous Carter administration estimates.

But a Miller spokesman, Robert Nipp, said later that Miller had misspoken. He said the projected fiscal 1981 deficit remains at \$30 billion to \$40 billion.

Miller said the oil-importing nations are in a good position to absorb a limited disruption to world oil supplies resulting from the Iran-Iraq conflict because world inventories of oil were at an all time high when the fighting broke out.

But he urged that oil exporters rethink a decision, made prior to the outbreak of the conflict, to temporarily curtail production.

He said postponing the curtailment plans could ease the impact "of a longer disruption" resulting from the Iran-Iraq conflict, were that to occur. Officials of the Organization of Petroleum Exporting Countries already have indicated they will suspend their plans for production cutbacks in view of the conflict.

Miller made his remarks at a news conference prior to delivering the U.S. speech at the annual joint meeting here of the International Monetary Fund and the World Bank.

Miller said the U.S. dollar is strong and should remain strong and said this is the first IMF meeting he has attended where the other nations haven't made an issue of a weak dollar. "Now I have the feeling they would like for it to go down." In the speech, Miller said the world

economy is now suffering the consequences of the 1979 increase in world oil prices."The new shock compounds the problems for a world economy already beset by strong underlying filationary pressures and laboring under heavy external debt burdens accumulated during the 1970s," Miller said

Miller says oil interruption would hurt

"There is no prospect of avoiding repeated oil shocks unless the oil-importing world recognizes and adjusts deliberately to a radically altered global economic and energy balance," he said.

Miller also appealed to oil exporting nations for cooperation, saying,"We look to the oil-exporting nations to follow responsible price and production policies." Miller said the United States favors

"a careful examination" by the IMF of the possibity of borrowing funds from private sorces, incuding captal markets, to supplment the contributions from its 141 member nations.

But Miller said the United States opposes a concept, advanced by poor nations, to link the allocation of future

Oil stockpile way cleared

WASHINGTON (AP) - The way has been cleared for the Department of Energy to triple the rate at which strategic oil supplies will be stockpiled in Louisiana and Texas.

Sen. J. Bennett Johnston, D-La., said enough money for the increase is included in the continuing resolution bill that will finance government agencies until Congress returns next month.

Johnston said he had received a letter from Charles Duncan, the secretary of the Department of Energy, in which he agreed to try filling the salt dome storage areas at three times the planned rate of 100,000 barrels a day. However, Johnston said Duncan noted enough oil must be acquired to meet the new rate. Congress created the reserve in 1975 after the Arab oil embargo. Efforts to fill the caverns were stopped in 1979 when the Iranian revolution disrupted world oil supplies.

The whole project was clouded by pressure from Saudi Arabia, which warned it would cut off supplies to the Unithe reserves were filled. Nevertheless, Congress ordered a resumption when it passed the syntehtic fuels legislation last year.

Pumping resumed last week, ahead of schedule and there has been no complaint from Saudi Arabia. The caverns contain only about 92 million barrels now - an estimated two-week supply at current U.S. oil import rates.

auction.

Record high sale reported

NEW ORLEANS (AP) - Oil companies have offered a record high bid total of \$2.8 billion for oil leases in the Gulf of Mexico, federal officials say. The previous high, \$2.09 billion, was offered in March 1974 for Gulf tracts.

"We're offering tracts more in line with what industry wants," said Harold Sieverding, assistant manager of the Interior Department's Bureau of Land Managment, after Tuesday's sale.

It will be two weeks or so before the department completes its analysis and decides which bids to accept. All the 192 tracts offered were off IMF assets, known as special drawing rights, to the financial needs of its members.

"Our view remains that the establishment of the proposed link would be harmful to what we regard as the fundamental objective - to develop the SDR's role as an important monetary instrument and promote orderly evolution of the interational monetary system.

Miller said the United States agrees with Third World nations that the IMF and World Bank must adapt to changing circumstances in the world, but said it has already done this to a considerable degree, especially in increasing the membership of Third World members on its executive board to 11 out of 22 seats.

"I hope they will not fail to look at what has already taken place," he said.

THE MIDLAND REPORTER-TELEGRAM, THURS., OCTOBER 2, 1980

Wasson infield program accounts for 21 Basin locations

Locations have been announced for 183 new oil and gas tests in the Permian Basin counties of West Texas and New Mexico. Of these tests, 46 are wildcats and 137 are field operations.

Leading the districts in number of projects is District 8, headquartered in Midland, with 8 wildcat sites and 50 field tests.

An infield program by one operator in the Was-son field of Gaines and Yoakum counties in District 8-A of the Railroad **Commission of Texas ac**counted for 21 of the total 36 field locations in that district.

New Mexico counties accounted for 6 wildcat locations and 13 field projects.

By LEE JONES

AUSTIN, Texas (AP) - The president of the National Council on Crime and Delinquency says solutions to a rising crime rates are being bogged down by "law and order" political rhetoric

Prison reformers have a "great opportunity" for passing new laws in Texas, but prison and police officials are withholding information that citizens could use in making those decisions, Milton Rector said at a recent news conference.

"Your people of Texas are as humane and concerned about other people as people anywhere in the United States," he said.

Reducing the amount of crime and dealing intelliently with criminals are issues that do not lend themselves to political solutions, Rector said.

"We've got to stop the political rhetoric and stop looking at the issue as conservative or liberal. It is rational or irrational," Rector said.

In some states, he said, businessmen, industrialists and political conservatives are taking the lead by providing such alternatives to prison as probation, work-release and job training. The alternatives are in use, he said, because those people have learned imprisonment is costly and often leads to still more crime.

Rector criticized the Texas Department of Corrections' plan to build a 3,000-bed prison farm, saying it would offer little of the job training that inmates from urban areas need.

Texas has more than 28,000 prison inmates, some of whom sleep on floors.

'You are the last state in the United States to pretend you have a self-supporting prison system,' he said of the TDC's agricultural orientation.

Meanwhile, he said, "the more cells that are available, the more people who are incarcerated."

A non-violent criminal "could be on probation, paying restitution to his victims instead of running up \$40 to \$50-a-day board bills in prison," Rector said.

Many Texas inmates don't have enough to do with their time, he said, and this was part of the problem that led to the New Mexico State Prison riot last year.

Rector also said Texas cities need high-ranked officials with authority to find ways to make police more efficient and the power to put those methods into action.

In Seattle, he said, a deputy mayor was able to reduce the jail population by 50 percent by implementing a program to send drunks to detoxification centers and mental cases to the hospital.

A county executive in St. Louis caused a 60 percent increase in the number of police man-hours available for patrol by opening detoxification centers in various parts of the city, he said.

Optimists honor New York mayor

NEW YORK (AP) - Mayor Edward I. Koch's 'practical optimism'' earned him an award Wednesday from the Optimist Club of New York, a group whose aim is "to look at the sunny side of everything.

"I am an optimist...but I do not look at life through rose-colored glasses," Koch declared in accepting the award. "The optimist has more fun. I look at life as an adventure.'

"Your practical optimism is larely responsible for the rebirth of New York, New York," read a plaque presented to Koch by club president Jules B. Singer, at a City Hall ceremony.

Past award winners included the Rev. Norman Vincent Peale, author of "The Power of Positive Thinking."
