Congress will adjourn without cutting taxes

WASHINGTON (AP) — Lame-duck Democrats in Congress, firing a parting shot at victorious Republicans, are blocking GOP efforts to enact a Ronald Reagan-style tax cut before the president-elect moves into the White House.

Democratic leaders decided to call it quits by Dec. 5 after sharply pruning the congressional agenda for the post-election session that began Wednesday.

Among the items jetisoned was a proposed \$39.8 billion tax reduction for 1981 backed by Reagan and congressional Republicans.

"We felt Mr. Reagan ought to have his time at bat," said Sen. Robert C. Byrd, D-W.Va., the outgoing majority leader.

The tax cut fashioned by the Senate Finance Committee differs from the 30 percent reduction over three years proposed by Reagan, but the president-elect has said it would be "fine" with him if Congress went ahead and passed it.

But the Senate plan had little support in the House, and Byrd said he changed his mind about seeking immediate action on it after conferring with Democratic colleagues and President Carter.

Carter told Byrd and House Speaker Thomas P. O'Neill Jr. he would veto the tax-cut bill if it reached him in his remaining nine weeks in office.

And at an impromptu White House news conference, Carter said, "To try to hammer out a major tax cut would be inappropriate and I would do everything I could to discourage it."

Senate Democrats decided earlier in the day against even considering the tax cut during the lame-duck session, leaving the issue for the Reagan administration and the new 97th Congress.

gress.

While Republicans were still expected to press for enactment of a tax cut this year, the action by Senate Democrats seemed to make their

quest a moot issue.

Byrd and O'Neill, meanwhile, met privately Wednesday and decided to make the lame-duck session as brief as possible, handling only essential money bills and some issues already

well on their way to passage.

O'Neill had predicted earlier that
the session might last until New
Year's Day

Year's Day.
Faced with near-certain GOP delaying tactics, Democratic leaders decided against using the lame-duck session to try to move pet projects

through Congress.

The major "must" bills all involve federal spending. This includes an overall federal budget for the fiscal year that began Oct. 1 and 10 separate

bility of moving Midland Air Park.

community and civic leaders.

south and east Midland.

open to the public.

appropriations bills to allow major federal agencies to keep meeting payrolls and paying bills.

Leaders said Congress also will try to pass several other major bills now pending — including an extension of revenue sharing and legislation setting up a multibillion-dollar fund to clean up toxic wastes. A measure protecting federal lands in Alaska from development was passed Wednesday and sent to the White House for Carter's expected signature.

Republicans were no more eager than Democrats for a prolonged ses-

"This is a dying Congress. Let's leave as soon as possible and let it rest in peace," said the House GOP whip, Rep. Bob Michel of Illinois.

And the Republican leader, Sen. Howard H. Baker Jr. of Tennessee, said: "We should do as little as possi-

ble to take care of the housekeeping details. We might pass some of the appropriations bills, but it's my hope we can finish our essential business and be out by Thanksgiving."

The lame-duck session is a last stand for 17 senators and 65 House members, many of them Democrats swept out of office in the Reagan landslide

Republicans will hold a 53-47 majority in the new Senate, reversing 25 years of Democratic rule. Democrats will retain control of the House, but by a sharply reduced 243-192 margin.

O'Neill will be his party's highestranking elected official once Carter leaves the White House, and he said he hopes to have a major role in picking a Democratic national chairman to rebuild the party.

"I don't intend to be speaker of the House and allow my party to go down the drain," the Massachusetts Democrat said

Air Force jet crash kills 13 Americans

CAIRO, Egypt (AP) — A U.S. Air Force jet transport ferrying equipment to Egypt in the first overseas test of the U.S. Rapid Deployment Force crashed and exploded in a "fireball that lit up the night sky" in the desert near Cairo West Airport, killing all 13 Americans aboard, a U.S. Embassy spokesman said

He said it was unclear whether the fireball was caused by exploding fuel or arms aboard the aircraft, a C-141 Starlifter. Associated Press photographer Bill Foley said the wreckage was spread over an area of less than a mile square. "It looked like it exploded on impact," he said. "There were no big pieces to be seen, but six sets of wheels were intact."

wheels were intact."

In Washington, defense officials said reports indicated the plane was carrying some unspecified explosives, liquid oxygen equipment, a fuel truck which they believed was empty, a pickup truck and some spare

It was the second fatal crash of a U.S. Air Force plane near Cairo in three months. An F-4 Phantom fighter went down southwest of the Egyptian capital on Aug. 16, killing both American crewman. They were taking part in maneuvers with the Egyptian air force.

The four-engine C-141 Starlifter was coming in on the final leg of its ap-

proach to the Egyptian military field 20 miles west of Cairo, when it crashed just before midnight Wednesday among barren dunes about four miles north of the runway, the embassy spokesman said.

"We don't know the cause," he added.

The plane carried six crewmen and seven passengers whose bodies were taken to Ramstein Air Force Base in West Germany today for transfer to the United States, Air Force officials there said.

The crewmen, from the 62nd Airlift Wing at McChord Air Force Base, near Tacoma, Wash., were identified by McChord base spokesman Master Sgt. Mike Pidding as Bradford B. Hirshi and Patrick A. Welch, both captains; Glenn R. Williams, David L. Harer and Gary T. Payne, all staff sergeants; and Tech Sgt. Ronnie G. Hoye. Their ages and hometowns

were not released.

The passengers were not immediately identified.

The spokesman at Ramstein, 75 miles southwest of Frankfurt, said the bodies were being prepared for transportation to an air base in the United States, probably Dover Air Force Base, Delaware, later in the day.

"It was carrying supplies for the rapid deployment exercise, and that's why there were so few on board," said the McChord spokesman. The Lock-

heed C-141 can carry 154 troops.

The spokesman said the transport had taken off from a base in Europe. But a Navy spokesman in Washington said the crew was from McChord and the plane was assigned to a unit stationed at Travis Air Force Base, outside San Francisco.

About 1,400 Army troops and airmen are to take part in a joint training exercise with Egyptian forces which begins Friday. Called Bright Star, it is the first foreign test of the new American Rapid Deployment Force being trained for use in the Persian Gulf if Western oil supplies from the Arabian peninsula are threatened.

The main body of the U.S. force consists of a battalion and supporting units from the Army's 101st Airborne Division based at Fort Campbell, Ky. The operation is designed to provide training in the harsh desert conditions that were a factor in the failure of the attempt in April to rescue the 52 American hostages in Iran.

'All of a sudden the roof fell in,' disaster survivor recalls

OTTUMWA, Iowa (AP) — A demolition worker who survived the collapse of a two-story brick building said crews were taking out floor joists "when all of a sudden the roof fell in," killing three men and seriously injuring another.

Authorities said the accident occurred about 9 a.m. Wednesday in this southeastern Iowacity when a steel beam collapsed. Some of the workmen were pinned beneath the rubble, and rescue crews worked for more than 80 minutes to find all the victims.

A crane was brought in to help shore up what remained of the building's second floor, officials said.

State Occupational Safety and Health Administration officials sent an investigator to look into the collapse.

The dead were identified as Steve Volt Morris, 25; Phillip Lee Houk, 24, and Dwight William Jones, 59, all from Ottumwa.

Jones' son, Ronald Gene Jones, 33, was critically injured in the collapse. He underwent surgery for a broken pelvis and leg injuries.

Three workmen walked away from the accident. Two of them,

Russ Pilcher and Paul Vandello, both of Ottumwa, were working on the second floor of the structure.

The other, Paul Johns II, said he was hauling away material from the site when he "heard

the building go down and saw the dust coming out."

Johns said workers buried in the floor's collapse were taking out floor joists from under the second story "when all of a sud-

den the roof fell in."
"I really don't know what happened. Something gave way is all I know," said Glen V. Dial, owner of the demolition compa-

Officials said about 200 spectators crowded into the downtown area, hindering rescue efforts.

The building formerly housed Spurgeon's Department Store.

A demolition worker, Ronnie Jones, is freed by rescue workers after being pinned by a steel beam when the second floor of a building in which he was working in Ottumwa, Iowa, collapsed. Three co-workers, including Jones' father, died in the mishap, and emergency workers said Jones' back and legs were broken. (AP Laserphoto)

Photos baffle scientists

Voyager speeds by Saturn

PASADENA, Calif. (AP) — Voyager 1, speeding away to the edge of the solar system after a dramatic rendezvous with Saturn, has radioed spectacular photographs of the encounter — including some showing narrow braided ringlets that have left scientists baffled.

As it began its encounter Wednesday, Voyager found two of the bizarre ringlets in the thin, outer ribbon called the F Ring. They appear to be almost entwined, looping around each other like crude braids, although scientists said they could offer no explanation for such a phenomenon. And in at least one spot, there is what looks like a kink or fold in the ringlets.

"We may have to develop a whole new breed of celestial machinations" to account for the newly revealed Saturnian mysteries, said Bradford Smith, head of Voyager's camera team.
"In this strange world of Saturn's rings, the bigs.

"In this strange world of Saturn's rings, the bizarre has become commonplace," he said. He said the "braided, kinky ring ... really has to be the

He said the "braided, kinky ring ... really has to be the strangest thing I've ever seen." With the rendezvous over, scientists looked forward to

the delightful "headache" of interpreting the mass of data.

'It all worked — it all worked beautifully," an exhausted Smith said Wednesday night. "I'm just ecstatic but I'm

Smith said Wednesday night. "I'm just ecstatic, but I'm too punchy to put it into words. It really is almost like being there."

President Carter congratulated the Jet Propulsion La-

President Carter congratulated the Jet Propulsion Laboratory by telephone for "a superb scientific achivement."

And Bruce Murray, the lab's director, said, "We have achieved something that earns the admiration of the world."

Today, the robot spaceshp was passing the moons Rhea and Hyperion. It will head for Iapetus on Friday and then leave Saturn's realm.

More than 1 billion miles from home, Voyager 1 passed just 77,000 miles from Saturn on Wednesday afternoon, soared past the moons Tethys, Dione, Mimas and Enceladus and then ducked behind the planet.

Voyager reached the climax of its 38-month journey as

it cruised beneath Saturn's rings for the closest look ever at the swirling yellow clouds that make up the gassy planet's surface.

Beneath a gauzy layer of haze, the clouds that layer layer of haze, the clouds that layer layer of haze, the clouds that layer layer of haze the clouds that layer layer of haze.

Beneath a gauzy layer of haze, the clouds show long, ribbony swirls, dark spots and halos where winds and storms buffet the atmosphere.

Closeups of the moons now show they consist mostly of

Closeups of the moons now show they consist mostly of water ice with very small rocky cores. Voyager found a canyon 50 miles wide and 500 miles long on Tethys and a gigantic crater covering nearly a fourth of Mimas' face. Earlier Voyager photographs astonished scientists with

Earlier Voyager photographs astonished scientists with a totally unexpected series of dozens of concentric ringlets spread through what had been considered broad brilliant rings. Photographs showed inexplicable dark spokes or fingers reaching across the brightest stretch of rings and even two ringlets that, unlike all the others, are out-of-round.

"The biggest headache that lies ahead is the dynamics of the ring system," Smith said. "We may have to develop some whole new breed of celestial machinations to explain these rings."

Younger 1 left Cape Consequed File

Voyager 1 left Cape Canaveral, Fla., on Sept. 5, 1977, soaring past Jupiter in March 1979 on its way to Saturn. After more exploration of Saturn's realm this week, it will head out of the solar system.

'He pointed the gun at me, and I ran....

By ED TODD Staff Writer

The 24-year-old aunt of a slain woman and her wounded sister testified in 238th State District Court on Wednesday that the accused slayer pointed a handgun at her moments following the shooting and after she had entered the house for a friendly visit on the afternoon June 30.

"I rang the door bell and went on in and heard a baby hollering and heard 'Blondie' (her first cousin, Mildred Jo Cornett) yelling, 'Stop, Richard' or something and heard the telephone off the hook," testified Shirley Jones."

"What y'all doing?" Ms. Jones said she yelled, as she entered the hallway of the 1715 E. Oak St. home of her cousin, Mrs. Cornett.

"I just heard the gun went off, that's all, and I said, 'Blondie, get out of there!'

Then, Ms. Jones testified, she saw

Mrs. Cornett's estranged husband, Richard Reni Cornett, the defendant in the trial, at the doorway leading to the den, where his dying sister-in-law, Norma Jean Loring, 31, lay sprawled on the floor. She had been shot twice apparently with a .38-caliber pistol. Cornett aimed the pistol at her, she

"He pointed the gun at me, and I ran under the table, and then I ran out of the back door" and to a neighbor's house, Ms. Jones said.

Ms. Jones testified before a jury in Judge Vann Culp's district court that

Judge Vann Culp's district court that she did not see Cornett fire any shots but did hear a shooting in the den. Cornett, 26, is being tried for the

attempted murder of his estranged wife, whom he married in 1977. The wife had filed a suit for divorce suit against him, but Cornett apparently wanted to reconcile.

Moments after Ms. Jones had hasti-

Moments after Ms. Jones had hastily exited the house, she said she saw her first cousin, Mrs. Cornett,

fleeing the house and ran across the street.

"When she was coming out of the house, she was running," Ms. Jones stated.

Ms. Jones said she had dropped by the Cornett house just to visit, as she was en route to a neighboring house to deliver flowers for Flowerland.

Testimony earlier in the week revealed that Mrs. Cornett, her 5-year-old daughter, Kim, and baby, Kevin, were sleeping on a couch in the den and that her sister was resting on a recliner when Cornett burst into the house and started firing.

Also testifying on Wednesday was Edna Fields, who had dropped by the house, which had been awarded to Mrs. Cornett by a divorce court, and helped her change the outside door locks on the house. But when she first stopped by, Ms. Fields said that Mrs. Cornett was out shopping for the door locks. And before she returned, Cornett drove up to the house in his

welding truck, and walked to the door.

There, Ms. Loring, a 200-pound woman, met Cornett at the door, and Ms. Fields stood behind her.

Ms. Fields testified that Cornett left word for his wife to get their son's clothes in order, because he wanted to be with him for an hour or so.

Cornett's defense attorney, Tom Hirsch of Odessa, suggested that the hefty Ms. Loring made for "a formidable character, an imposing" fig-

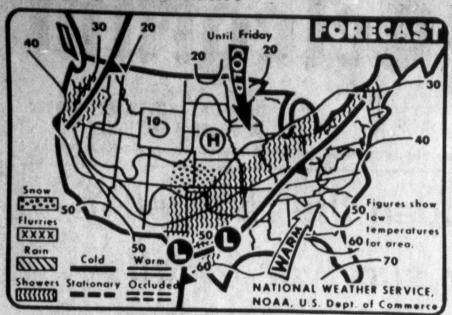

Ms. Fields took the defensive.
"All fat people's not violent," she

After changing the locks, Ms. Fields confirmed Hirsch's comment that she "sat around eating plums and watching TV."

"That's correct," she said. Also testifying was David Smith,

Killer seeks revenge, says psychiatrist

ATLANTA (AP) - One man, or perhaps one man and a "copycat killer," probably murdered all 11 children who have been found dead in Atlanta, says a psychiatrist familiar with violent crime.

The killer may be a man whose life was changed by the birth of a brother or sister, or a father whose child was killed by another youngster, said Dr. Alfred A. Messer, staff psychiatrist at Northside Hospital.

The 11 victims have been found in or near Atlanta in the last 16 months. They had been strangled, shot, stabbed or beaten to death. In addition, four other children are missing.

Messer, who has worked with police departments in several cities, said it could be that when the probable killer was a teen-ager, a sibling was born that "took away the attention of the family and some of the family's resources

"Then the older child had to go to work to help support the family and, indirectly, pay to support that sibling," Messer said in an interview Wednesday night.

He continued with his psychological profile of the probable killer: "Now 30 years old, he feels very bitter about his own lot in life, his own lack of success. He broods and broods about his position and more and more begins identifying the younger sibling as the cause of his troubles.

Huge rigs were brought from all

Omaha fire departments and sur-

rounding communities to quell the

fire, which shot into the air 200 feet

The fire was still considered uncon-

trolled three hours later, but officials

said shortly after midnight the fire-

The other possible killer, Messer

loneliness he gets the feeling of revenge. So he picks children at random. He is getting even for the hurt he feels has been dealt him.'

There's no apparent racial motive, Messer said. "If there were a Ku Kluxer or someone with a deep vengence against blacks, there would be some sign of that."

There probably is only one killer, although "it might be two people, one

copying another," said Messer, who deals with family violence.

Meanwhile, Atlanta police met Wednesday with investigators from Buffalo, N.Y., who are trying to solve the slayings of six black men there. 'We have not established any connection" between the two sets of killings, said Leo Donovan, chief of the Buffalo homicide squad.

Five detectives from other cities were working with the Atlanta police task force trying to solve the slay-

The killer, Messer said, "is a person who goes about his daily life and periodically the anger mounts in him and leads him to these terrible crimes. He's not a person who sends messages to the police or calls you at the bureau and says 'help me stop' or 'help me control myself.'

All the victims are from poor families and all but one are from the south side. The killer may live, work or have roots in that area, Messer said. Publication of a killer's psychologi-

cal profile will help authorities find the killer, Messer said. "Someone knows who is doing this.

They may not know it consciously,'

"They may not be directly aware of who commits these felonies, but they may be aware of a person who has talked for some years in a grotesque way of children, the awful nature of young children, for example, or someone who repeatedly curses children or who utters threats of violence or who has committed past acts of violence against children," Messer said.

MIAMI (AP) - A helicopter carrying a pilot and three technicians from ABC and NBC News crashed while returning from the Bahamas, and all four people aboard were killed, network officials said today.

The U.S. Coast Guard, which began an air-sea search after the aircraft was reported overdue late Wednesday, couldn't confirm other reports that the Bell Jet Ranger had

Network officials said the helicopter carried two NBC employees and an ABC employee. The pilot was tentatively identified as George Snow, an independent pilot from Miami.

The news crews were returning from assignments on the tiny island of Cayo Lobos, where on Wednesday 102 marooned Haitians were forcibly loaded onto a Bahamian boat taking them back to Haiti.

Maurice Johnson, operator of Crescent Charters in Miami, identified Snow as a veteran pilot who served as secretary-treasurer of the Helicopter Association of Florida

"The word we have from (other pilots) in the Bahamas is that they're all gone. They were all killed in the crash," Johnson said.

He said the helicopter reportedly crashed west of Andros Island, about 170 miles southeast of Miami.

Spokesman Greg Robinson said

Coast Guard aircraft and cutters were searching the Florida Straits, between Miami and the Bahamas,

her back (to examine her)," Smith testified, "I noticed she had a (butcher) knife in her hand. I took the knife out of her hand and pitched in over to a couch or a chair."

bile accident 25 miles southeast of Seminole. The Howard County native was a Baptist and a graduate of Lamesa

High School. Survivors include his parents, Bill and Marilyn Vaughn of Hobbs, N.M., and Lloyd and Sharon Eubanks of Fort Worth; his grandparents, Howard and Edna Chapman of Lamesa and Rubin and Eula Vaughn of Gail; three sisters, Shelly Clement of Lamesa, Tonya Kay Eubanks of Fort Worth and Cammie Lee Vaughn of Andrews; and a brother, Anthony Lee Keith of Hobbs, N.M.

Jack Weaver

Jack Weaver, 79, of rural Midland, died Tuesday at his home following a lengthy illness.

Services will be at 10 a.m. Friday in the Newnie W. Ellis Funeral Home chapel. Burial will be in Meyersdale,

Weaver was born June 14, 1901. He moved to Midland two and a half years ago from Kalkaske, Mich. He lived there for a number of years. He was a retired salesman.

Survivors include three daughters, Jackie Steffler of Los Angeles, Calif., Shirley Christiansen of Farmington, N.M. and Pat Johnson of Ventura, Calif.; three grandchildren and three great-grandchildren.

Manuela Rubio

Services for Manuela Rubio, 79, of 1206 W. Dakota Ave., were at 10 a.m. Wednesday in Our Lady of Guadalupe Catholic Church with the Rev. Jim Foelker officiating. Burial was in Resthaven Memorial Park.

Mrs. Rubio died Sunday in a Midland nursing home.

Pallbearers were Robert Sosa, Louis Sosa, George Sosa, Fred Sosa, Arturo Navarrette and Jerry Navar-

Edith Cotten

SAN ANGELO - Graveside services for Mrs. Roy (Edith) Cotten, 81, of San Angelo, sister of Howell M. Webb of Midland, will be at 10 a.m. Friday in Lawnhaven Memorial Gardens with the Rev. Luster Lockett of First United Methodist Church officiating and directed by Johnson's Funeral Home.

Mrs. Cotten died Wednesday in San Angelo following an illness.

She was born Oct. 7, 1899, in San Angelo. She was married to Roy Cotten Sept. 7, 1947, in San Angelo. He died Novemeber, 1969. Mrs. Cotten was a lifetime San Angelo resident and a member of First United Methodist Church where she was a Sunday

Other survivors include a son, a brother, four grandchildren, three great-grandchildren and numerous nephews and nieces.

M.H. Buchanan

MAY — Services for Malcolm Hardee Buchanan, 60, of May, brother of Jordan Buchanan of Midland, were to be at 10 a.m. today in McCoy Chapel of Memories in Sweetwater. Burial was to be in Slater's Chapel Cemetery in Nolan. Buchanan died Tuesday night in a

Fort Worth hospital after an illness. Born Dec. 20, 1919, in Yantis, Buchanan was married to Wanda June Ensminger Oct. 6, 1950, in Nolan. A Texas Tech University graduate, he had taught school at Divide and Highland schools. He was also superintendent of schools in May. He was a veteran of World War II and a member of the First Baptist Church in May. He lived in May 22 years.

Other survivors include his wife, three daughters, two sons, six sisters, another brother and two grand-

Bus runs into motel; No injuries reported

VALDOSTA, Ga. (AP) - A doubledecker tour bus from Ohio crashed into a Sheraton motel Wednesday night, pushing an automobile through a glass wall and into an empty room, witnesses said.

Nobody on or near the bus - owned by New Resources Group, Inc., of Hamilton, Ohio - was injured, a bus passenger told Archie McKay of The Valdosta Daily Times.

Helsinki Conference may end Friday

MADRID, Spain (AP) — The European conference on human rights and detente may collapse Friday unless East and West can agree on an agenda limiting the time each gets to attack the other, conference sources say.

Western nations on Wednesday used their formal opening statements at the conference, scheduled to last for several months, to attack the Soviet Union's intervention in Afghanistan and accuse it of human rights violations at home.

The attacks resumed today with Britain accusing the Soviet Union of having "broken every one of the principles" of the Helsinki agreement, drafted to ease East-West tensions.

"The intervention by the Soviet Union in Afghanistan...has given a severe shock to international relations and international confidence," British Minister of State Peter Blaker said.

He accused the Soviets of carrying out a "greatly increased campaign of repression...against dissidents of all kinds in the last two years.

"THE CONTINUED suppression of human rights has stunted the growth of hope, and the invasion of Afghanistan has trampled on the first shoots of trust," Blaker said.

His attack, as well as those on Wednesday, were exactly the kind the Soviets hoped to avoid by trying to impose time limits on the agenda, which has yet to be established despite months of negotiations. The Soviets want to concentrate on European arms limitation, and Soviet President Leonid Brezhnev said in Moscow on Wednesday the West is trying to turn the meeting into a forum for "cheap progagan-

The West has been insisting that several weeks be set aside for a discussion of human rights and Afghanistan. It claims the Soviets have ruthlessly

Six aliens freed for lack of funds to detain them

CONWAY, Ark. (AP) - A Border Patrol agent says he released six illegal aliens in central Arkansas this week because there was not enough money to detain them or bus them back to Mexico.

The federal agency has been short of funds recently because of the expense incurred in the Cuban refugee relocation program at Fort Chaffee in western Arkansas, said Charles Dixon, a U.S. Border Patrol agent at North Little Rock.

"Due to the money situation, it's not going to be uncommon to see illegal aliens released around the state again," said Mark Kemp, another Border Patrol agent. "We have no choice but to document them and release them," he said.

After a 15-mile hike, a night in a shopping mall and some assistance from members of a church, the six men resumed their journey from Phoenix, Ariz., to Sarasota, Fla., to stay with relatives and find

The Mexicans, with no documentation that they were here legally and no drivers licenses, were arrested Tuesday near Morrilton, about 35 miles northwest of Little Rock, after their car ran out of

The car was impounded by the Conway County Sheriff's Department, which called the Border Pa-

Dixon issued the men papers allowing them to stay in the country until Dec. 10. After buying them lunch meat, bread, soft drinks

and cigarettes, he said he "turned them loose" on U.S. Highway 64.

Seven indicted on charges of smuggling illegal aliens

PHOENIX, Ariz. (AP) - Seven men have been indicted on charges of smuggling illegal aliens from Mexico and Central America to Florida, officials

After an 18-month investigation, the U.S. Attorney's office filed a 20-count indictment here Wednesday charging the men with conspiracy, transporting illegal aliens in violation of federal immigration statutes and aiding and abetting the transportation of illegal aliens.

Each count carries a maximum penalty of five years in prison and a fine of \$5,000.

Named in the indictment were Raul Saldivar Sr. and Raul Saldivar Jr., labor contractors from Bonita Springs, Fla.; Federico Villalon, Pedro Gonzales and Jose Luis Monroy, all of Phoenix, and David Rodriguez and Salvado Quintero of Idaho.

U.S. Attorney Mike Hawkins said the Saldivars had been sued earlier in U.S. District Court in Miami on charges of keeping at least 157 undocumented alien workers under subhuman conditions and billing them for transportation, housing and food while paying them \$5 a week.

for smuggling aliens.

suppressed internal political dissension and ignored provisions of the 1975 Helsinki agreements calling

for liberal emigration policies. The strongest rebuke to the Soviets at the opening session came from Canadian Foreign Secretary Mark MacGuigan, who said: "The deterioration in East-West relations, culminating last December in the Soviet intervention of Afghanistan, cannot be ignored in this forum. The international environment has been severely damaged, as has the confidence which so crucially underpins the policy of detente

"The shadow of Afghanistan will inevitably chill detente as long as Soviet troops remain there."

Speakers from Belgium, the Netherlands and Ireland echoed the Canadian's sentiments with direct or indirect references to Afghanistan, where an estimated 85,000 Soviet soldiers are fighting Moslem guerrillas opposed to the pro-Soviet regime there.

THE ORDER OF opening speeches was determined by lottery. No East bloc delegates were among the initial speakers. But they will have had their say by Friday, and some conference sources said the meeting may be adjourned after the East has rebutted the attacks - unless an agenda has

The 35-nation coference was convened to review

implementation of the Helsinki accords on European

security and cooperation. In Moscow, Brezhnev said at a dinner for visiting President Urho Kekkonen of Finland: "We do not

shut our eyes to the fact that someone would like to turn this (Madrid) meeting not into a businesslike conference but into a forum for cheap propaganda, for demagogical speeches," the official Soviet news agency Tass reported.

He vowed the Soviets would "oppose resolutely any such attempts" but did not say how Moscow would react if the agenda dispute cannot be resolved.

"Now it is very important to implement consistently the accords reached in Helsinki," Tass quoted Brezhnev as saying. "If a businesslike approach prevails at the Madrid meeting then it can be hoped that it will succeed in discussing and taking important decisions" toward a disarmament conference. "Europe should at last get an opportunity of living in conditions of a secure peace and tranquility."

Exiled Russian dissident Andrei Amalrik, 42, was killed when his car collided head-on with a truck 40 miles north of Madrid Tuesday night. Amalrik planned to speak out against the Soviet Union at the conference, but speculation he was killed to silence him were dismissed by Spanish police, who noted the collision occurred on a slippery road in a heavy

Israelis kill infiltrator

TEL AVIV, Israel (AP) - Israeli troops killed two Palestinian guerrillas early today as the Arabs tried to cross into Israel from southern Lebanon, the military command said.

A spokesman said a border patrol opened fire on the intruders as they tried to breach the frontier security fence and get into the northern border settlement of Misgav Am, scene of a terrorist attack last April in which three Israelis were

The guerrillas came to carry out "a terrorist act" and were armed with weapons and explosives, the spokesman said. He did not elabo-

The military said one of the Palestinians was killed outright while the second was wounded and died a short while later. No Israelis were wounded in the clash, the spokesman said.

'We heard the shots, but everything is back to normal here now," said a settler at Misgav Am,

In the occupied Gaza Strip, meanwhile, an Israeli military court sentenced two Palestinians to 20 years in prison for bombing an Israeli bank last year.

American libraries face wave

By LARRY GREEN The Los Angeles Times

CHICAGO — America's public libraries and schools are facing a massive new wave of censorship in the wake of last week's conservative election victories, the director of the American Library Association's office for intellectual freedom says.

An upswing in attempts to censor books began just prior to the Nov. 4 election and is continuing, said Judith F. Krug, whose office hereis a clearing house for censorship incidents involving libraries and school reading

programs.
"My phone has been ringing off the hook," Krug said. "It is the beginning of a major assault" on the ability of libraries and schools to maintain free

access to diverse materials representing all political, social and economic viewpoints covering the spectrum of social problems and lifes-

As evidence, Krug cited some of the cases that have crossed her desk in the last two weeks:

— In Statesville, N.C., a man claiming to represent the Moral Majority has complained to the North Carolina Department of Education about the use of "Brave New World" by Aldous Huxley in a high school course. The book, the man said in his written complaint, "continues the degradation of the moral character of our youth (by) advocating drug cul-ture and blaspheming God." The book, the complaint said, "would

make a good bonfire."
— In Wapakoneta, Ohio, the parents of one 10th grade student are seeking to have Ken Kesey's "One Flew Over the Cuckoo's Nest' banned from the high school curriculum because, as the parents told the local school board, "the book is filth.

- In Abington, Va., the Washington County Library is under pressure from a local fundamentalist minister to remove all books by Harold Robbins and Sydney Sheldon. The minister, who led a successful campaign to have the creationist theory added to local biology course curriculum along with the teaching of evolution, considers books by the two authors as pornographic. Originally he asked only that Sheldon's "Bloodline" and Rob-

bins' "Memories of Another Day" be removed from the shelves. The minister also wants lists of everybody who has checked out the two books. The local librarian, Kathy Russell, is resisting, Krug said.

While there has been a growing trend of censorship nationwide for several years - more than 300 cases were reported to the office for intellectual freedom last year alone Krug said she feared that the greatest challenge was just beginning.

"All of the pressures that were just below the surface are now coming out, pressures to remove those materials that people object to on moral grounds or because they believe the materials do not reflect 'traditional American values,' " Krug said.

WTA drops women's open after failure to gain support

OLDSMAR, Fla. (AP) - After failing to gain support from such top American stars as Chris Evert Lloyd and Tracy Austin, the Women's Tennis Association has dropped its pro-

Wilkes wins

Jackie Wilkes brought in a stringer weighing in at 8 pounds and 8 ounces at Oak Creek Lake. Nov. 8-9, to win the High Sky Bass Club's monthly bass tournament, a heavy stringer

John Kelly was second with a stringer weighing in at 4 pounds, 12 ounces, and Charles Erck was third with 3 pounds and 8

The Big Bass of the month was caught by Kelly, weighing 4 pounds, 12 ounces.

A live release program was in effect for the tournament and all bass were turned back into the posal to start a women-only U.S.

Players who supported the split consoled themselves Thursday by saying they were glad the women showed their muscle and made it plain they weren't happy with scheduling and television coverage of their matches at Flushing Meadows, N.Y., last fall.

"I think we scared them - they knew we were quite serious," said 11th-ranked Pam Shriver, who voted for the split. "I am happy in one way we didn't go through with it. If we'd failed, it would have been bad for women's tennis. But we got their at-

Player Diane Desfor, WTA's vice president, said she wasn't surprised,

"We made gains, exposed a lot of our complaints," she said. "I don't think we should go without a majority of the players with a strong commitment to move. When we didn't get enough of the top 20, I felt we shouldn't go, even though I wanted to

Hunters to match wits with big game

ers will be intensely waiting atop their favorite stand when deer season opens at sunrise Saturday.

Each year hunters match wits with one of nature's most elusive big game animals and many times fail to meet the challenge. The real key to a successful deer hunt this year may live in a better understanding of deer and their behavior. Also, deer hunting knowledge plays a vital role in a successful deer hunt.

Hunters have a reasonable chance of shooting their prey at close range even if they are seen first, provided the animal's highly sophisticated sense of smell hasn't detected dangeer and signaled it to flee.

HOWEVER, modern science can help neutralize the deer's tremendous olfactory system. Field tests have shown the most effective method of neutralizing human order is to bathe and rinse clothes in a bicarbonate of soda solution. Soda has the capacity to obsorb ordors, a fact long recognized by housewives, who for years have placed an open box of soda in their refrigerator for that purpose.

Masking scents can be beneficial, but like soda, they aren't a cure-all for overcoming the deer's keen sense of smell. These artificial orders flood the area with scents which dilute the human ordor to a point that it won't be easily recognized. Adding such scents won't dissipate human ordor but will serve as a dilutor. And it's not a wise bet the first day afield to use masking scents which have secondary ordors containing a disinfectant or insect repellent.

If deer have a weak sense, it's their eyesight. While well developed, this sense has some weak points a deer hunter can exploit.

DEER FAIL to recognize still objects, yet they're quick enough to pick up even the slightest movemets. By remaining motionless, even though in full view of the deer, a hunter stands a good chance of going undetected.

Another weakness in a deer's eyesight is due in part to the location of

the eyes within the head, a factor that limits peripheral vision. A hunter can take advantage of this fact by timing the number of seconds a deer feeds before raising its head to look around. The hunter can then move forward until the deer raises its head, being extremely careful to stop before the deer looks up again. By using this stop-and-go technique a hunter can usually get close enough for a good shot, even in an open field. Ordinarily, deer never seem to realize that the motionless object (hunter) they see

when looking up is closer each time. Because deer are not naturally conditioned to expect danger from above, they seldom look higher than ground level. Hunters can capitalize on this weakness in self-defense by hunting from elevated or tree stands which serve three purposes: the hunter's field of vision is greatly enhanced. hunters are less likely to be spotted by deer, and human scent may be above the animal.

KNOWING THE feeding habits and drinking times of deer also can help increase the success chances of any hunter. Locating fresh scraps (pawed-out patches of ground made by buck hooves during the breeding season) or feeding areas may prove a more consistent method of seeing deer since they can sometimes go for extended periods without water.

"Home Ranges" are another accurate indication of deer presence. Being creatures of habit, deer normally stay in an area less than 300 acres (unless food and water become scarce) and are apt to deviate little from a fixed time-movement schedule. Hence, ambush locations can be set around known paths of travel as determined by tracks, rubs, scraps or feeding areas.

By all that scouting, knowledge of deer behavior and extensive preparation and planning goes for naught if "the shot that couldn't miss" goes

THOUSANDS OF deer hunters will be out Saturday. The best thing to remember about deer hunting is safe-

KENNY REDIN'S

Fin & Feather

ty. More hunters are injured and fatally injured while deer hunting than any other type hunting sport. Many, many hunters have injuried or killed other hunters by mistaking them for game. It's wise to wear flourescent orange while afield. Deer are color blind, therefore the wise little White-

tail will not be alarmed by the human's bright colors. And rifle shots carry a long way. Point at the deer and that's all. Do not take shots in the darker, less visible hours of the day. Don't shoot at noises. Cattle and other hunters make noises in the field. Whitetail deer do not make noises.

Deer season is here again

Temple, Bryan face battle

By ALAN SAYRE **Associated Press Writer**

Temple and Bryan have shown up week after week as two of the state's best schoolboy football teams this year, but one faces the unwelcome prospect of turning in the pads after Friday night.

No. 1 Temple, the defending state champion in Class 5A, tangles with fifth-ranked Bryan Friday night in a head-on match. Both teams sport identical 9-0 records and the District 15-5A championship and a bi-district playoff berth are at stake.

Last year, the Wildcats knocked off Bryan 28-6 on the last night of the season to seize the district crown and start the march to the state champi-

ALTHOUGH TEMPLE sports a 49game winning streak in regular-season play, Wildcat Coach Bob McQueen doesn't think his squad has any particular advantage in the pending battle against Bryan.

"It was the same situation last year. They (Bryan) were undefeated (in district play) going into the last game last year," McQueen said. "They've got an awful lot of those kids back this year."

Bryan last won the district crown in

Temple's last regular-season loss cost the team a trip to the playoffs. The Wildcats lost to Killeen, 31-13, on the last night of the 1975 season and the Kangaroos advanced to the playoffs after winning a coin toss.

SEVERAL OTHER ranked 5A

teams in The Associated Press schoolboy football poll also face crucial games this weekend.

Sixth-rated Highland Park needs a win over Wilmer-Hutchins to nail down the District 10-5A crown, while No. 7 Plano is seeking victory over Carrollton Newman-Smith to sew up the 13-5A title. No. 3 Odessa Permian takes on Odessa High for the 5-5A

In far South Texas, No. 10 Harlingen and unranked, but tough, and McAllen meet for the 28-5A berth.

In Class 4A, three ranked teams that captured zone championships face playoffs for district crowns. No. 2 Gainesville meets Weatherford Friday night at Arlington Stadium for District 5-4A.

showing by International Business Machines stock, and an improving bond market aided by hopes for an early peak in interest rates, also lifted investors' spirits. The Dow Jones average of

30 industrials climbed 20.90 to 964.93, for its biggest gain since it took a 30.72 jump on April 22. **New York Stock Exchange** volume, bolstered by heavy

activity in the last hour, reached 58.50 million shares against 41.52 million Tuesday, when many investors were taking a Veterans Day holiday. International Business Machines soared 3% to 70%

on turnover of more than million shares as of the 4 p.m. close in New York. The company announced a new top-of-the-line computer system early in the day.

Once IBM shares took off, analyst Charles Jensen at MKI Securities noted, numerous other high-technology issues began rising sharply as well. Texas Instruments picked up 31/4 to 1341/4; Teledyne 41/4 to 2031/4; Control Data 3% to 70, and Comdisco 2 to 18%.

Another market leader was Boeing, which nosed out IBM at the top of the active list and rose 21/4 to 391/4. The company got a big order for jets from Delta Airlines.

Among other aerospace stocks, Northrop gained 4 to 561/4; General Dynamics 31/4 to 79%; Lockheed 1% to 351/2, and McDonnell Douglas 1 to

Since President-elect Reagan's landslide victory a week ago, a few stock groups such as the defense issues have been consistently strong. But the overall market was erratic until early this week, in part because of rising interest rates.

In the last day or two, however, hopes have risen that interest rates might soon peak. Prices in the bond market have climbed sharply on those hopes, prompting further optimism.

TODAY'S ANSWER

BUSINESS MIRROR

Energy 'key' to our economy

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) - The availability and moderate cost of energy, and the willingness and ability toinnovate are among the most basic requirements in restoring vitality to the United States economy.

Few knowledgeable critics dispute that assertion, but there exists great disagreement on how to bring: it about. The goal is clear, it seems, but the route: isn't. And maybe not even the starting line. Here are three observations on the situation that?

might bring the starting line into better focus.

—From an address by E.E. David, president of Exxon Research and Engineering Co., former science advisor to the president and former president of the American Association for the Advancement of:

Science: "The problems of innovation today are usually; documented by statistics on research and development budgets, particularly as a percent of gross-national product. The U.S. figure has been stagnant-

while others have been increasing. "Actually, there is a sense of vitality in industrial" research and development. Industry's R&D budgets have been rising steadily since 1972, and last year U.S. industry spent a record \$24 billion of its own funds on R&D for new technologies for the 80s and

beyond.... "The problem today is not with industrial support levels. The problem is with the declining demand for what R&D produces. The symptoms are clear, enough and most of you are familiar with them....

"One cause is a loss of spirit by the public. There are proliferating fears of risk-taking and unfamiliar technology. These are reinforced by volatile govern-ment regulation and by loss of confidence in institutions of all kinds.

"When we are not fearful and uncertain, we are; contentious. It is a fact that the United States has four times as many lawyers per capita as West Germany, and 20 times as many as Japan.'

-From an article by Prof. Walter D. Fackler, in "Issues & Ideas," a University of Chicago publica-"No one can peer ahead at the 1980s without seeing

energy problems. What can one say except that energy is a disaster area.... Witness what we have "For years we controlled the price (and under-

priced) natural gas, and thus encouraged overuse and misuse of this premium fuel while running down' our reserves. We even rebuffed the Mexicans when we could have enlarged our long-run supply at bargain prices.

"In response to OPEC we controlled domesticcrude oil prices below world levels and subsidized imports on a large scale through an entitlements

program. "We are now decontrolling domestic oil prices gradually, rather than instantaneously, and adding an excess profits tax on production of domestic oil.

Gradualism here is simply stupid because it creates large and certain financial incentives to delay pro-

"We have made the use of coal expensive and uncertain by environmental restrictions on its recovery and use. I do not say this is a bad thing, but coal suffers from uncertainty as to the future rules of the

"We have allowed 'Woodstock economics' to cripple the development of nuclear power. I realize there are legitimate differences of opinion here, but we have allowed ignorance and hysteria to crowd out rational resolution of the issues." -From an address to the annual meeting of

Deloitte Haskins Sells, an accounting firm, by Alan Greenspan, chairman of Townsend-Greenspan & Co., economic consultants, and former chairman of the President's Council of Economic Advisers.

"This year OPEC will be running something in the area of a \$100 billion surplus, which means that there's a \$100 billion deficit to be financed by some-

body....
"You get to the question, can these oil-related balance of payments deficits be financed, and the answer is: maybe not. If you can't finance the deficit, obviously it can't exist." It means, Greenspan suggested, that the OPEC

surplus has to be reduced, and that leaves two alternatives: Lower OPEC production or lower the

Closing could cause U.S. woes

WASHINGTON (AP) — The U.S. economy could be plunged into a recession if the critical oil supply route through the Strait of Hormuz is closed by the war between Iran and Iraq, the Congressional Budget

Alice Rivlin, the office's director, told the Senate Finance subcommittee on taxation Tuesday the economic output of the United States might by fall 10 percent if the strait were closed for a year. By contrast, with the strait open, the yearly rate of decline was 9.6 percent in the second quarter of this year, at the height of the 1980 recession.

Closing the strait, through which most Middle Eastern oil is transported, could cut U.S. oil imports by as much as 5 million barrels a day, Mrs. Rivlin said.

Economists appearing before the subcommittee disagreed on the role government should play in handling the supply of oil, but they agreed current federal price controls on oil have been counterproductive.

Henry S. Rowen of Stanford University said Congress should repeal some controls on oil and gas and parts of the new tax on domestic crude oil.

He said an emergency interruption in imported oil

might require a tariff on foreign oil, with the higher consumer prices being rebated through the tax sys-

George Eads, a member of President Carter's Council of Economic Advisers, predicted an effort to persuade other countries to impose similar tariffs to reduce oil consumption during an emergency would have little success. He said an emergency oil strategy therefore should be based on more than increased consumer prices.

Sen. Bill Bradley, D-N.J., who conducted the hearing, also questioned whether U.S. allies could be persuaded to impose such tariffs.

"I can just hear the finance ministers in Germany and France saying 'We'll go along when you get your gasoline tax up to \$2 a gallon," Bradley said.

William D. Nordhaus of Yale University said the government should encourage stockpiling of oil throughout the economy, perhaps by providing a tax incentive.

"We must encourage people to buy cheap and sell dear, for such behavior is price-stabilizing and in the economic interests of the nation," said Nordhaus, a former economic adviser to Carter.

Four West Texas counties get sites for wildcat tests

Wildcat operations have been announced in Winkler, Pecos, Reeves and Nolan counties.

WINKLER EXPLORER

William C. Hendon Jr. of Midland reported plans to re-enter a 10,275foot dry hole in Winkler County and cleanout to 8,800 feet for tests as a wildcat.

The project, No. 1 C. A. Mitchell, is 660 feet from north and 1,980 feet from east lines of section 15, block B-10, psl survey and eight miles southeast of Kermit.

It originally was drilled by Joe N. Champlin as No. 1 Mitchell in 1966 and abandoned.

The test site is 11/4 miles northwest of an 8,800-foot dry hole and 1% miles northeast of the Haley, East (Strawn) field discovery.

PECOS PROJECTS

Three wildcats were announced in Pecos County.

N. D. McIntyre of Midland will re-enter a 9,872-foot dry hole six miles southeast of Bakersfield and cleanout to 8,000 feet for tests as a wildcat.

The project, No. 1 White Estate, is 1,980 feet from north and west lines of section 97, block 194, GC&SF survey. It originally was Texas Oil & Gas Corp. No. 2 White Estate "A" which was abandoned in 1974.

John H. Hendrix Corp. of Midland No. 2 J. N. Thigpin "A" is to be drilled as a 1,500-foot wildcat four miles northwest of Sheffield in Pecos Coun-

Location is 2,080 feet from south and 1,450 feet from east lines of section 1, block C-3, EL&RR survey. It is a northwest offset to the Devonian discovery of the Thigpin field.

Gulf Oil Corp. announced location for a 1,500-foot wildcat 12½ miles southwest of Fort Stockton in Pecos County. It is No. 1 D. L. Von Schauster and

others, 330 feet from the most northerly north line and 330 feet from the most easterly west line of section 30, block 3, T&P survey.

It is 1% miles southwest of a 2,700foot dry hole.

REEVES WILDCAT

American Public Energy Co. of Dallas No. 1 J. B. Southern Heirs and others is to be dug as a 5,500-foot wildcat in Reeves County, 25 miles southwest of Pecos.

Location is 2,000 feet from south and 660 feet from east lines of section 38, block 50, T-7, T&P survey.

It is 1/2 mile west of Delaware production in the Cable field which produces at 5,250 feet.

NOLAN EXPLORER

Chalmers Operting Co., Inc., of Abilene No. 1-72 Brooks is to be drilled as a 7,100-foot wildcat 51/2 miles northeast of Maryneal in Nolan Coun-

Drillsite is 1,500 feet from north and 2,800 feet from east lines of section 72, block X, T&P survey.

It is one location southeast of a 7,110-foot dry hole and 7/8 mile southeast of the two-well Harp (Strawn oil) pool which produces at 6,183 feet.

Rig Up '80 scheduled

BIG SPRING - More than 1,000 persons from the oil and gas industry from throughout the Southwest are expected to be in Big Spring Saturday

for "O.I.L. Rig Up '80. The event is being sponsored by Oilfield Industrial Lines, Inc. Jack Donaldson, president of the firm, said the oil equipment manufacturer is hosting the event to introduce O.I.L. to the petroleum industry.

The event will begin at 1 p. m. with a luncheon, including shrimp and barbecue, with special entertainment by Ray Wylie Hubbard, singer-song writer. He will be backed by the Texas Tryelers.

Ribbin-cutting ceremonies for O.I.L. new facility will be at 3 p.m., followed by music by Johnny Duncan. An air show also is on the 3 p.m. Program.

Festivities will end with a special rig lighting. Throughout the event, complte rigs,

pumps and other equipment will be on display. O.I.L. has chartered four 737 jets and one DC-9 to provide transporta-

tion from Oklahoma City, Houston, Dallas and Wichita Falls. In August, O.I.L. opened for busi-

ness in the Big Spring Industrial Complex, formerly Webb Air Force Base. By the end of the year, the company will have delivered 12 rigs to the drilling industry. The company is scheduled to prod-

uce six rigs per month in 1981.

No. 720 Fort Stockt Unit is 2,340 feet Foy Boyd Management Corp. of from south and 2,223 feet from west Midland staked its No. 4 Pitzer as a line of section 17, block 119, GC&SF 6,900-foot project in the Pitzer, North survey. Contract depth is 3,400 feet. (Cherry Canyon) field of Ward Coun-

ty, eight miles southwest of Pyote. Exxon No. 1224 Fort Stockton Unit It is 1,980 feet from northeast and is 2,580 feet from north and 125 feet northwest lines of section 114, block from east lines of section 3, block 114, GC&SF survey. Contract depth is 3,-450 feet.

> Exxon No. 1318 Fort Stockton Unit is 1,207 feet from north and 1,433 feet from east lines of section 3, block 114, GC&SF survey. Contract depth is 3,-

Enrich finals oil discovery in Nolan

Enrich Oil Corp. of Abilene has recompleted its No. 1 Callie Mae Cargile as a Caddo oil discovery in theCMC field of Nolan County.

The well, originally completed as the opener of the field's Cook gas pay, finaled from the Caddo for a daily pumping potential of 35 barrels of 43-gravity oil and 10 barrels of water, with a gas-oil ratio of 1,285-1.

Completion was natural through perforations from 7,042 to 7,047 feet. Total depth is 7,106 feet and 41/2-inch casing is set on bottom.

Location is six miles northeast of Silver and 2,173 feet from north and 510 feet from west lines of section 236, block 1-A, H&TC survey.

FISHER TESTS

GMW Crop. of Midland will drill three projects in an undesignaged Noodle Creek field of Fisher County, four miles northeast of Rotan. The projects are scheduled to 3,600 feet.

The undesignated area was opened by the firm's No. 1 Black Hawk.

The complexities of the recently enacted "Windfall Profits" Tax and how to deal with them will be the subject of "1980 Energy Seminar" presented by Peat, Marwick, Mitchell & Co. Thursday at the Midland Hil-

The seminar will address three areas vital to today's oil producer: increasing profits and cash flow under the Windfall Profits Tax; current developments in oil and gas industry taxation and governmental regulation; and the current outlook for oil and gas accounting.

The seminar will begin at 3 p.m. and continue to 5 p.m. A reception is

No. 1 Keokuk is one loation west of Tax seminar scheduled

scheduled from 5 p.m. to 7 p.m. For many years, Peat, Marwick, Mitchell & Co. has taken an active role in the energy industry and the accounting practices unique to the industry.

As government regulation began to be an increasingly important factor in the operations of the inudstry, the firm formed its Energy and Natural Resources Pracice headed by Frank

Burke Jr.

Since 1977, the department has conducted 25 energy seminars each year to advixe the public and the energy industry of eregulatory, tax and accounting developments facint them.

MGF reports oil flow

MGF Oil Corp.'s No. 1 Urbanczyk Unit, a wildcat operation in Wilson County, flowed 385 barrels of 32-gravity oil, two barrels of water and 110,000 cubic feet of gas on a 24-hour test in the Austin Chalk zone, reports R. O. "Jack" Major, president and chief executive officer of the Midland-

The flow was through perforations from 7,859 to 8,102 feet after a 7,000gallon acid treatment. Flowing tubing pressure was 525 pounds. The flow was gauged through a 14/64-inch

This is the first exploratory well in planned 10-well drilling program being conducted by MGF as general partner for the MGF 1980 Limited Partnership. The projects are being drilled on leases which lie in southeast

Wilson and north Karnes counties. The 1980 Limited Partnership owns a 27.8 percent working interest and a 20.08 percent net revenue interest in No. 1 Urbanczyk Unit. Through the partnership, MGF Oil Corp. owns a 7

based company.

percent net revenue interest. Moran reports discovery

HOUSTON - Moran Energy Inc. announced a second Williston Basin wildcat oil discovery in Golden Valley

tests of the Red River "C" and "D" zones, produced at calculated rates of 320 barrels of oil per day and no water from 11,740 to 11,800 feet, and 172

in the process of being completed.

County, N.D. The No. 1 Stecker, on two drillstem

orperato and has a 37.5 percent working interest in the project.

barrels of oil per day and no water from 11,795 to 11,860 feet. The well is In the vicinity of No. 1 Stecker, Moran and its partners have leases on

4,150 acres and have the right to earn an additional 1,368 acres. Moran is the

Robert L. McCamey of Fort Worth No. 1 Don Smith is a new well, the seventh, in the Akali Creek, Southwest (Flippen) field of Fisher County, six miles east of Roby. On 24-hour potential test it flowed 156 barrels of 41-gravity oil and no

water, natural, through a 14/64-inch choke and perforations from 3,364 to 3,434 feet. Gas-oil ratio is 300-1. Total depth is 3,630 feet, and 41/2-

inch casing is set at 3,543 feet. Location is 7,950 feet from south and 1,175 feet from west lines of G. W. Lawrence survey No. 330, abstract

Waggoner Carr explains TEXAS 13

Texans face the appalling prospect of a \$5 billion increase in state taxes when the legislature meets in January, Waggoner Carr, president of TEXAS 13, warned in a speech Tues-day night in Midland at the Permian Basin Landmen's Association at Ranchland Hill Country Club.

Carr, former attorney general of Texas and speaker of the House of Representatives, heads the nonprofit, statewide organization of citizens and taxpayers concerned with the increasing cost of government.

Carr said TEXAS 13 is dedicated to opposing unwarranted tax hikes at all levels of government, reduction of government spending, elimination of legislative and bureaucratic waste of taxpayers' money and, through initiative and referendum, giving the people a voice in controlling tax in-

In his talk, Carr noted that the state budget has grown 235 percent in the last 10 years, and welfare costs have skyrocketed 370 percent.

"In the same 10-year period, the state's population growth was only 17 percent," Carr pointed out.

The speaker reported that Texas. with present record state budget of \$22 billion, now spends \$30 million a day to operate the government. "This is an increase of about 50 percent imposed by the last two sessions of the legislature. The legislature has increased its own cost of operation by 156 percent in the last 10 years." Carr said it was conceded that the next legislature, meeting in January, will be a major tax session. "Already demands for new spending from state agencies and special interest power groups exceed \$5 billion."
"The ultimate answer to our spend-

g problems, the speaker said, is etting concerned citizens and tax-

payers across the state aroused and involved, and that is what TEXAS 13 is striving to do. "There is not a person in this room who doesn't think our government is

too big, too wasteful, too expensive and our taxes are too high. Most, if not all of you, have experienced the sinking realization that the American Dream is slowly slipping beyond our grasp, Carr said. "Just how bad is our situation? Well, recently the Federal Department of Commerce revealed that the

average American now pays 45 cents out of ever \$1 he or she earns to the tax collectors at the federal, state, and local levels of government.
"We tax payers keep only 55 cents at present. If the situation continues to worsen at the same rate as the last 10 years, we taxpayers will keep only 36 cents out of every \$1 earned in 1988

- just eight years from now - while the tax collectors will be taking 63 cents. Twenty years from now we will be keeping 20 cents and the tax collectors take will be 80 cents," Carr warned. The speaker said "Let's zero in on our own state government. We can do

something about our state situation

very quickly if we want to." "First, you must realize that big, bureaucratic government responds only to organized groups. The larger the group, the quicker responce. Big modern government pays little attento to the wishes of an individual when the alternative is to say 'no' to an organized group. Those who want something from the government always organize to get it. The taxpayers must learn that lesson," Carr said, that is why we have created TEXAS

He pointed out that in the 1½ tyears of the organization's existence it has

Waggemer Carr

been able to coordinate and unify the efforts of 28 local tax relief organizations into a starewide unified effort. "We now have in excess of 55,000 members.

Conflict brews on coal project

By TOM REDBURN The Los Angeles Times

Environmentalists are challenging the impartiality of a key government official involved in a crucial decision over whether to go forward with a controversial western coal project that is intended to supply electricity to California.

They are basing the challenge in large part on an internal corporate memo that has been made available to the Los Angeles Times. The leaked memo, which probably will intensify the already raging political struggle over the fate of the Allen-Warner Valley Energy System, surfaces as

the federal government is nearing a decision on the extensive proposal to develop a strip mine near Utah's Bryce Canyon National Park, and move the coal through a slurry pipeline to two major coal-fired power plants in Utah and Nevada. The project has become a crucial battleground in the war between environmental groups and energy

companies over the proper development of the West's resources. It would supply about 85 percent of its lectricity to California utilities. The memo was written in March by an official of Utah International Inc., a General Electric Co. subsidary, that holds many of the coal leases which are proposed for strip mining. It describes a meeting earlier this year with Joseph Browder, the Department of the Interior official responsible for coordinating the recommendations of various federal agen-

cies on the project. In the memo, Browder was quoted as saying he feels that he has a mandate from the secretary of Interior Department 'to make the Allen-Warner

Valley Energy System work.' " It further describes Browder — a former head of the Washington-based Environmental Policy Center - as urging the company "not to take too seriously" a petition from environmental groups seeking to bar mining in Utah International's Alton coal field because of the environmental damage to Bryce Can-

"His desire," the memo said, "is for the petition 'to just drift through the schedule' and to be rejected. He feels the more UII makes the petition a life or death issue, the harder it becomes for the Department of Interior to casually put it to bed." Browder, asked about the memo, denied the impli

memo misinterpreted his goal of simply ensuring that the decision moved through the bureaucracy on schedule. He also denied that he intended that the environmental petition be ignored. The decision whether to permit strip mining of the

cation that he favored the project, contending the

coal field is expected to be announced later this month. The memo, environentalists charge, shows a predisposition on the part of at least one top Department of the Interior official to uncritically push the project. Thus, they contend, the government is open to a possible legal challenge on the grounds it had

made up its mind before considering all the evidence. That is true, they argue, even though there are mounting indications that the government may pre-

vent Utah International's part of the project from going forward. The Department is about to relese its final environemental impact statement on the project. According to a draft of the report obtained by The Times it recommends against building the 500-megawatt Warner Valley power plant because of air pollution that the report contends would be created at nearby Zion National Park in Utah. But it favors construction of the proposed 2,000-megawatt Harry Allen power plant near Las Vegas, Nev., with the

additional energy to be supplied from alternative The effect of the report, if its recommendations are followed by Secretary of the Interior, Cecil Andrus, would be to prevent mining of the ! Iton coal field, and instead to use coal from other sources to

fuel the Allen power plant.

To some opponents of the project, however, the report does not go far enough in scaling it back. They charge that the Interior Department's Bureau of Land Management's own analysis supports a series of small-scale renewable energy facilities instead of the hugh Allen-Warner Valley system. The opponents contend that officials in Washington overruled those conclusions in order to 3n ure that at least some of the project would survive.

'DOI's own analysis shows that a combination of

alternatives, including geothermal, solar, wind, co-

generation, biomass and conservation, is economic-

ally and environmentally preferable to any part of the Allen-Warner Valley project," said Tom Grff, West Coast regional counsel for the Environmental Defens3 Fund. He charged tht the "Departmet of Interior's decision to endorse much of the project reflects not its judgment on the merits of the project but a political

deal cut with project sponsors as long ago as Febru-'Southern California Edison's recent endorsement of alternatives," he said, "is being ignored as Carter administration officials seek to deliver on their promise to push big coal, no matter what it cost." Andrus is scheduled to rule on the right to use federal land for the power plants, related facilities only days before leaving office in January, 1981. He
