# County GOP divided on abortion

### **By LANA CUNNINGHAM** Staff Writer

Differing personal beliefs caused a split in the Midland County Republican party Saturday on the emotional issue of abortion despite the pleadings of one side that endorsing a proposed resolution would mean more federal government interference in personal lives

More than 400 local Republicans jammed into the San Jacinto Junior High auditorium for the biennial county convention. This time, it took more than four hours for the GOP delegates from 28 precincts to wrangle through more than 25 resolutions. Of that number, about 23 were adopted; some with applause, some after lengthy discussion and some with laughter

Bill Shaner, county chairman, got the show going shortly after 10 a.m. With the selection of Ernest Angelo Jr., who recently gave up his eightyear reign as mayor of Midland, as H.J. "Doc" Blanchard, GOP candi- a classroom, the committee had to date for Railroad Commission who is challenging Democrat incumbent Jim Nugent

THE FIVE MOST important problems in the United States and Texas today are rampant inflation, loss of capability to protect ourselves, energy crisis, skyrocketing interest rates and "James Earl Carter, Hamilton Jordan, Jody Powell and those in Congress who take care of their interests first."

Along with firing up the local delegates, Blanchard did some campaigning in asking for votes and money

Saying that he feels people want someone for office that has "integrity, reasonableness and honesty" and criticizing his opponent, Blanchard asked for support of the people.

"I care about you having a better place to live," he said, then continued with "But I do need your help, your vote" and money.

move to the gymnasium to fit in the 200 delegates interested in what resolutions were to be presented.

THIS COUNTY convention - described as the grassroots beginning of politics - also served Saturday as a place for delegates to express their

gut feelings about me federal government.

One delegate told the resolutions committee he proposed calling for the Internal Revenue Service "to get off our backs and out of our pockets." That idea already was included in

the first resolution presented to the general assembly, but with a different wording. And, not surprisingly, it was adopted. der the leadership of Angelo, dis- that of supporting a constitutional amendment making abortion illegal except in cases of rape, incest or harm to the mother's life.

Gtoans and "Oh, no" rumbled through the audience. And a motion to table the resolution was stopped by Angelo who asked how many persons were interested in discussing the matter.

OUT OF THE crowd, about 10 persons raised their hands, and Angelo ruled that was sufficient to keep the issue on the floor.

Invoking rule 3, the Republican leader instructed the two sides to split into caucuses, discuss the matter for about 10 minutes and present the views before the crowd.

Those in favor of the resolution first recommended an amendment which wouldn't allow abortion even in cases of rape, incest or harm to the mother. "Exceptions look like we have a contradiction in our own philosophy,' said a right-to-lifer. That amendment, however, was rejected by the delegates. Continuing their argument, the proresolution people claimed life for the fetus begins at conception, abortion is

murder, and that approval of abortion means opening the door for euthanasia and mercy killings.

Opponents to the amendment countered that abortion is not a matter for a political party to adopt; abortion is a private matter for a woman to make and no one is forcing a woman to have an abortion.

Concluding their argument, those opposed to the resolution charged that abortion will divide the GOP during a year in which a Republican stands a good chance of being elected president.

ANGELO FIRST CALLED for a voice vote; but after hearing both sides yell equally loud, he asked for a count. By this time, at 2 p.m., numerous persons had left the convention and the count was 114 in favor of making abortion illegal, 92 against.

Another hitch in the convention came on the resolution federal revenue sharing and community block grant funds. Continuation of an issue which has split the Midland City Council for the past three

### hairman of the convention, the local Republicans got down to the meat of the convention - that of nitpicking the resolutions

A half-hour set aside for resolutions and nomination committees discussions stretched out into 45 minutes with the resolutions committee being Setting the mood for the session was the culprit. First scheduled to meet in

cussion on the resolutions moved along quickly, getting bogged down occasionally on wording.

But it was a different scene when the next to last resolution came up

(See REPUBLICAN, Page 1A)

### **By SUSAN TOTH** Staff Writer

Determination and careful maneuvering Saturday apparently allowed Carter forces to overcome a five-vote handicap and take 60 percent of Midland County's 15 delegates to the party's state convention later this month.

According to the report of the tabulation committee at the beginning of Saturday's Democratic Party County Convention held at Alamo Junior High School, uncommitted delegates outnumbered those committed to Carter, 54 to 53. Four voting delegates who signed in for Sen. Edward Kennedy caucused soon after the beginning of the meeting and switched their power to the uncommitted forces, giving the non-aligned bloc a 52 percent majority of the delegates

Despite the initial imbalance, when the smoke cleared and delegates were announced to the state convention, Carter forces had come up with nine of the 15 places allotted to Midland County

### **ONE DELEGATE WAS** chosen

from each of 12 precinct caucuses on the convention floor Saturday, and three were chosen at large by the convention's nominations committee

"I had people come up and tell me there were eight uncommitted delegates and only three Carter people in their precinct caucuses, but the Carter people were elected to be the delegate and alternate," party chairman Darrell Smith said after the convention. "When they asked what they could do about it. I told them I was not responsible for protecting the majority from the minority in an open vote.

Despite the quiet politicking in the caucuses, the convention generally did not indulge in the open bickering and disagreements often seen in state and national party gatherings.

In fact, any rancor in the convention was directed at the Republican opposition, generally in good-natured slaps.

Introducing Precinct 2 Commissioner Charlie Welch, Smith noted the Democratic commissioner "was nearly the casualty of a Republican's inability to count." The reference was to the 21-vote discrepency found in the vote tally in Welch's last election. The corrected vote changed the outcome of the election and returned Welch to office.

**DEFENDING PEACE** Justice John Biggs, Smith noted that Biggs, whose age has been an issue in his re-election campaign, "doesn't dye his hair orange.'

The comment, he noted, "is a pointed reference to the age of the Republican presidential frontrunner. But then, the Republicans have shown time and time again they don't believe much is required to be president by the men they have put in office."

Even given a chance to show a little intra-party friction, the Democrats kept everything fairly quiet.

A challenge to the credentials of Mr. and Mrs. Bob Corley, who were chosen as uncommitted delegates in their precinct conventions May 3, despite not having voted in the primary, went smoothly, and all sides accepted the decision of the committee to allow the two Carter delegates

elected at the precinct convention to have a total of three votes.

The eight-member resolutions committee culled "30 some-odd" resolutions recommended during the precinct conventions May 3 to 15 to be presented to the convention as a whole

**REJECTED AS** "too divisive" or 'controversial'' were resolutions urging the Legislature to repeal its ratification of the Equal Rights Amendment, limiting the use of public funds for abortion, asking a moratorium on the construction of nuclear power plants, continuing to welcome refugees from oppressive regimes, reinstating the military draft and electing federal judges.

The committee deemed "unneces-

# The homestretch BY WILLIAM RANDOLPH

# HEARST JR. Editor In Chief. The Hearst Newspapers

NEW YORK - For all practical purposes the interminable 1980 presidential selection process is down to the wire. Unless

either major candidate commits a serious gaffe - and both Carter and Reagan are capable of doing just that — the two will square off after the nominations in quest of the most demanding job in the world

President Carter has gained few friends for Ameri-HEARST ca; in fact he has

succeeded in alienating large portions of the world. He has raised skeptical eyebrows and even fears among our most trustworthy and durable allies. Reagan, on the other hand, must now come up with more than the rhetoric he has been spouting. He needs more of a solid program.

The Reagan camp has, domestically, been smart. Early on it spotted John Anderson as the more attractive and hence the man to beat.

Starting with the same amount of campaign funds, Reagan spent his early in the campaign, winning the votes of nominators. Anderson saved his until late, intending to wind up in a flourish. It was too late.

While Anderson scorned Reagan. the latter maintained calm and dignity, giving the impression of a man who would hold the party intact.

1

It was a big boost for Reagan of course, when Anderson decided to run as an independent, thus syphoning votes from Carter. He appears to the public to be more liberal than the president.

Voters of a generation ago never dreamed that they would see a "conservative" Republican candidate who was, in fact, more liberal than Democrat Carter

Though it is doubtful they will do it, the time has come for both Teddy Kennedy and George Bush to withdraw from the race as gracefully but as soon as possible and then support their party's leaders.

Then the candidates can debate our three most important issues: 1.Inflation.

2. Foreign affairs.

3. Unemployment and the economy.

Depending on what part of the world you're in, you give those problems different priorities. In Iran, for

## Editor's Report

example, because leaders are convinced we are intent on reinstating the ailing Shah, our conduct of our foreign affairs would rank first.

There are many Americans who feel that way, too. Surely our experiences in Iran have been embarrassing. Names like Entebbe and London keep haunting us.

We have failed miserably in maintaining good relationships in Central America and the Caribbean, as I have lamented before in this space.

The Marxist Communist guerrillas called M-19, whose numbers are said (See EDITOR'S REPORT, Page 4A)

# LEAA cuts may cost area agencies **By KAY HORD-CRITES**

Staff Writer

What do the Permian Basin Law Enforcement Academy, the Rape Crisis Center and a major crime task force in Big Spring have in common?

They all receive funds from the federal Law Enforcement Assistance Adminstration, and they're all threatened by the recommended elimination of those funds in an effort to balance the budget.

In the Midland area, at least 13 programs currently have LEAA grants totaling \$292,989. The Permian Basin Regional Planning Commission would be hardest hit if the federal government decides to cancel the LEAA program. The PBRPC currently has four grants, one for the Law Enforcement Academy for \$122,681; one for an identification and fingerprint project for \$6,452; one for the purchase of portable radios for \$62,801; and the last for a regional law enforcement advisory commission for \$44,637.

### OTHER GRANTS in this area include a jail improvement grant in Andrews for \$20,278; a major crime task force in Big Spring for \$32,483; technical equipment for the Coahoma police force, \$5,775; closed circuit jail TVs for Kermit, \$6,000; Midland Rape Crisis Center, \$39,638; a jail monitoring system for Upton County, \$975; a closed circuit TV system for the Upton County Sheriff's Office, \$11,250; to the Winkler County district attorney investigator, \$20,076; and to the Winkler County Juvénile Probation Department, \$19,943.

These funds and projects are jeapordized by the recent federal push to balance the budget.

If federal funding is removed, most agencies have said they will have to seek state and private support.

The LEAA funds have not been cut yet. However, March 30 the Budget Committee of the U.S. House of Representatives recommended a budget cut equal to the amount of the LEAA funds.

"The Appropriations Committee could still fund the LEAA," said a spokesman for Congressman Kent Hance's office, "but they would have to take that amount of funds from somewhere else, from some other program.'

PAULA CAMPBELL, also with Hance's office, said Hance was com-(See AREA PROGRAMS, Page 4A)

# California holdup saga ends as three captured

FONTANA, Calif. (AP) — A daring — Two of them were reportedly woundbank holdup followed by a Wild Weststyle chase marked by gunplay, explosions and three deaths, ended in -slow-motion Saturday as three tired, dirty and wounded men were taken into custody without a shot fired.

A fourth, armed fugitive was shot dead after disobeying an order not to move issued by police who surrounded him, authorities said.

The man, Manny Delgado, 21, was spotted by a helicopter equipped with a device used in the Vietnam War to detect human body heat, police said. Delgado, who was believed to be from Westminster, was found in a rugged area high in the San Gabriel Mountains

Authorities earlier said he was dead when they found him.

A tracking team that moved up the craggy, brush-covered slopes spotted one of the men Saturday morning. Within a half-hour they surrounded and captured him and then saw two others, who gave up without resistance

The three men each had a handgun, said sheriff's deputies. Two of the men, described as long-haired, with beards and mustaches and in their 30s and 40s, were wounded, authorities said

The three were identified as Christopher Harven, 29, of Mira Loma, who had a bullet wound in the back, his brother Russell, 26, of Cypress, who was not hurt; and Gregory Smith, 27, of Mira Loma, who had a bullet wound in the groin, deputies said.

ed, but it was not immediately known which ones

Five bandits in ski masks, believed to be members of the "Two-Minute Gang," burst into the Security Pacific National Bank in Norco on Friday just before closing time. They ordered bank workers and patrons to lie face down on the floor and scooped up \$19,000 from teller's cash drawers, stocked full to handle the cashing of end-of-week paychecks.

The gang acquired its nickname because it times its robberies with a stopwatch and leaves within two minutes. An FBI agent said the gang is believed to have made off with about \$80,000 in four San Diego robberies.

As the gunmen - armed with M-16 rifles - ran from the bank, they were met with a burst of gunfire from Riverside County sheriff's deputies. A small battle raged as the bandits piled into a waiting van.

The getaway driver, identified as Delgado's brother, Bill, in his early 20s, was shot to death a short distance from the bank and his companions abandoned the bullet-riddled vehicle and got into a pickup truck. Bill Delgado was also believed to be from Westminster.

The four remaining bandits then led pursuers on a wild chase through Riverside and San Bernardino counties.

The gang tossed homemade explosives at officers pursuing them up mountain roads in the San Bernardino National Forest.

# **Proper maintenance** great for mothers

EDITOR'S NOTE -- "God can't be always everywhere," wrote the poet Sir Edwin Arnold, "and, so, invented Mothers." This is the day we celebrate the invention.

### **By JO HARING**

TULSA, Okla. (AP) - Maybe mothers ought to come with a maintenance agreement.

Some kind of service arrangement that provides for a complete overhaul every five years, three kids or 300,000 miles, whichever comes first

If the Department of Labor or the Department of Consumer Affairs deides to put out a bulletin on keeping a mother running smoothly and at top efficiency, here are several points they ought to consider.

1. Fuel. While most mothers will run indefinitely on hot coffee, pizza burgers, an occasional gourmet meal for two in elegant surroundings will add immeasurably increased efficiency.

2 Motor. A mother's motor is probably one of the most dependable anywhere. A mother can start and reach top speed from a prone position at a single cry from a sleeping child. To keep that motor at peak efficiency. regular breaks are recommended. A leisurely bath and nap every 1,000 miles, a baby sitter every 10,000 miles and a two-week, live-in sitter every 100,000 miles.

3 Battery, Batteries should be recharged regularly. Roses and candy often do the trick

4 Carburetor. When a mother's carburetor floods, it should be treated immediately with Kleenex and a soft shoulder.

5 Spark plugs. When sparks begin to fly, avoid driving for a while.

6 Speed Do not drive at prolonged high speeds or breakdowns are likely, usually in the form of flooding carburctors or malfunctioning park plugs

7 Brakes. Use brakes often and slow to a full stop regularly

8. Steering: Use caution in any attempt to steer.

9. Chassis: A mother operates best when her chassis is properly main tained. Her wardrobe should be changed as needed every fall and spring. Regular exercise should be encouraged and provided for. Tuneups such as a change of hairdo and makeup should be a part of the regu-Lar maintenance. When the chassis begins to sag, there are a number of possible remedies, including racquet ball and Weight Watchers

10 Lubrication Mothers need regular lube jobs. Compliments are both the cheapest and most satisfying type

Just by following these simple instructions, the average mother should last a lifetime, providing efficient service

# Bus safety inspections scheduled this week

WASHINGTON (AP) - Inspectors for the U.S. Department of Transportation will conduct a nation wide safety inspection of tour buses and reguiarly scheduled passenger buses Tuesday, Wednesday and Thursday, officials said Friday

More than 70 inspectors from the Bureau of Motor Carrier Safety in the department's Federal Highway Administration will be checking the buses and their drivers for compliance with federal safety standards, officials said.

Buses found to be unsafe or operated by unquali-

# Energy dome grant refused

WINOOSKI, Vt. (AP) - The federal government has rejected Winooski's \$3.4 million grant application that would have financed an energy-saving dome over the city.

Although city officials learned Thursday night the funds will not be available, they say they hope to continue with plans for the dome. The government cited budget cutbacks in rejecting the city's application, which

would have provided for a number of energy projects.

> Winooski planners said they needed \$55,000 to study the feasibility of building a giant energy-saving bubble over their community.

A dome, it was said, would save energy and spare Winooski's citizens from the inconveniences of Vermont's harsh winters

MOUNT PLEASANT — "Useless" brown Texas coal, abundant but high in ash content and relatively low in heat per pound, now supplies about 50 percent of the electricity to a quarter of Texas' residents.

It's electricity supplied at less than half the average price of natural gas and less than one-third the cost of the fuel oil used.

In the 1950s, coal supplied a great deal of the energy, but gradually, natural gas took over as a cheaper, more efficient means of supplying electricity.

HOWEVER, BY THE of lignite coal. 1960s, it was apparent trouble was in the offing. Gas suppliers were unwilling to make long-

West Texas: Partly cloudy Sunday through M arm again Sunday afternoon. Cooler most s

# Clouds returning today

The clouds are expected to return today and stay at least through Monday, the weatherman said.

The weekend's summery temperatures also should slip just a little by Monday, according to the National Weather Service office at Midland Regional Airport.

A slight 20 percent chance of thunderstorms also is in the forecast for tonight and Monday.

High today should be in the low 90s with the overnight low expected to be in the upper 50s. Monday's high should be only in the low 80s.

Winds are expected to blow from the southwest at 15-20 mph today and tonight. Saturday was almost perfect early

summer, play outdoors weather, with a high of 90 degrees and an overnight low of 58.

Record temperatures, for comparison, are 99 set in 1963 and 42 set in 1946.

No rain was recorded in the last 24 hours, so the monthly rainfall total stayed at .92 inch and the 1980 moisture accumulation remained at 2.56 inches.

years, this resolution resulted in a split convention.

One side argued taking federal monies is the only way to get the tax money back into the community. The other group charged that taking money while the government has a deficit is "immoral.

Both sides fused together when the resolution was amended to state that no federal funds of any kind would be accepted.

Passed overwhelmingly were reso-

lutions to request the State Legislature repeal its ratification of the Equal Rights Amendment, keep the church and state separated, promote silent prayer and meditation in schools, limit the terms of office for elected officials in the federal government, continue the right to work law, repeal the gun control act of 1968, continue tax reduction and reform, and pass a constitutional amendment requiring a balanced budget. One resolution that drew a resound-

ing affirmative voice vote was one calling for the GOP party to fight legislation that would have a negative

effect on the petroleum industry. After calling for the vote, Angelo quipped, "Who would dare say no?" The group approved making welfare recipients, who are mentally and physically capable of working, accept jobs on threat of cutting off the benefits. They approved building up the military defenses, supporting Israel, opposing busing, and condemning the illegal takeover of the U.S. embassy in Iran and rescuing the American hostages

AND LAST ON THE list was a resolution to give Jimmy Carter

"back to Miss Lillian, who always thought Billy (Jimmy's brother) was the smarter of the two.'

"All in favor," instructed Angelo, 'laugh.'

The state convention will be held in June and 46 Midlanders were selected as delegates

Afterward, Shaner said the county convention turnout was at least double that of the past years and a num- . ber of the delegates were participating for the first time.

'Our next objective," he added, "is to elect the Republican candidates in the fall."

ple," accou

Area programs could

be hurt by end to LEAA

mitted to a balanced budget and that a public opinion poll in the 19th Con-

cressional District had shown that the pe pie wanted a balanced budget, even "if some of their favorite programs had to be cut."

She also said amendments had been formulated to reinstate funding for LEAA, but these amendments never reached the floor for a vote because the Rules Committee chose not to allow them to be offered.

Ms. Campbell explained that the LEAA funds had been recommended for cancellation because the Budget Committee felt this to be an area traditionally handled on the state and local level.

They felt the people are complaining that the federal government was interfering in the areas that have traditionally been the responsibility of the state and the local government and that this is one area where they could comply with the wishes of the people and stop interfering." The cancellation of the LEAA funds looks almost certain, according to

Ernie W. Crawford, executive director of the PBRPC. We're waiting to see what they do in the budget, and if they do take it

out, and it looks like there is a good chance they will, then we will have to concentrate on the state and see if we can get it (the Law Enforcement Academy) funded through our state resources.

THE ACADEMY seems to be the primary concern of the PBRPC, as well as area law enforcement officials.

Members of the criminal justice planning committee, consisting of area law enforcement officials, have been discussing contingency plans in the eventuality that the funds are cancelled.

Funds for the academy run out in September. State funds may help, but the state legislature doesn't meet until January.

We have discussed the possibility of charging tuition to officers (by assessing a charge to the participating cities and counties) and continuing the academy on a local basis," Crawford said. "And we are certainly looking at that if it proves economically feasible. We would like to keep the academy. It makes a hardship, especially on the smaller communito send officers off for training. (Universities provide training for officers, but tuition and living expenses are much higher).

"I have heard from rumors that Gov. Clements has said if they do away with the funds, the state of Texas is not going to turn its back on the local agencies. What he has in mind I don't know. We may also have to do something between September, when the funds run out, and when the Legislature meets in January."

FOR THE RAPE Crisis Center here in Midland, the financial crisis will begin in October, when its grant expires.

They have a five-year grant which decreases 20 percent each year. This year they received \$39,638.

'We are calling Austin," said Nan Gordon, director of the center. She added that they also have written to Washington but have received letters saying the congressmen are committed to a balanced budget. "So I don't know how much good that does.

"We're not really sure how drastic it will be if it goes through. It could be a total cut starting next October or it could be a gradual phase-out.

We are keeping our fingers crossed, and we've turned in our application for our grant for next year."

Ms. Gordon said if their LEAA funds are cancelled they will need financing from private individuals and sources.

What we are planning to do is have a fund drive campaign." She also said they were going to check into foundation grants and a letter campaign.

THE MIDLAND REPORTER-TELEGRAM, SUN., MAY 11, 1984

Midland census operating smoothly

### By BILL MODISETT **Staff Writer**

With no major problems reported in the enumeration of Midland's residents, the decennial census appears to be progressing on schedule.

It looked as though the census might be pretty rocky for awhile here due to a shortage of applicants for census positions, but the enumeration is operating smoothly so far.

'And, of course, we still need people," added Jerry Butler of Lubbock, field operation assistant for employment of the regional census office.

About 200 applicants for temporary census jobs were needed in the Mid-land-Odessa area, according to Ms. Butler, but few individuals responded to notices of openings. Later, then Midland Mayor Ernest Angelo Jr. issued a plea for Midlanders to help in the census this year.

Still, the necessary workers didn't come forward.

For the most part, Midland's low unemployment rate got the blame for the small number of applicants for the census positions locally.

The first follow-up operation, which began here April 16, is scheduled to conclude sometime this coming week. During this initial follow-up operation, Census Bureau workers primarily were contacting non-respondents those individuals who either did not receive a questionnaire or did not return their questionnaires to the bureau for some reason.

Now the regional office is getting geared up for the second follow-up, scheduled to begin here about May 22, and "we only have half enough people," according to Ms. Butler .-

During the second follow-up, census workers will be involved with ques-tionnaire assistance, Ms. Butler said, and will be checking residences from which questionnaires have been returned because the house or apartment is vacant. Census workers also will make contact with Midlanders who failed to answer some questions in the questionnaire.

Individuals who would be interested in helping with the census follow-up still are being urged to contact the Lubbock regional census office or the Midland office of the Texas Employment Commission.

Ms. Butler said the bureau is particularly in need of workers who can work part-time on the census follow-up, such as teachers. But, she added, anyone interested should contact one of the two offices to see if they qualify.

Census enumerators are paid \$4 per hour and crew leaders earn \$4.20 to \$4.50 per hour

The second follow-up is expected to take about three weeks, comparable to the time required for the first follow-up. It also will involve a population and housing count which will be used for local reviews, Ms. Butler said

Overall the census is progressing "fine" in the United States, according to Ms. Butler, with a shortage of census workers in some areas constituting one of the major problems encountered.

The decennial enumeration - Census Day - was conducted April 1.

# Missionary to present songs, curios and films

PAGE SA

The Rev. Warren Newberry, an Assemblies of God missionary to Ma-lawi, Central America, will be guest speaker today at 7 p.m. at the First Assembly of God Church, 100 W. Wadley Ave.

In 1966 Malawi, formerly called Nyasaland, gained its indepen and became the Republic of Malawi. Five-and-one-half million people live in this landlocked country where the Assemblies of God maintain a Bible school, printing presses and an International Correspondence Institute outreach.

Newberry and his wife, Annette, have been ministering there since 1968. Their ministry has included construction of church buildings and missionary residences.

When the Bible school is not in session, the Newberrys engage in general missionary work and tent crusades throughout the country.

Newberry, who is from Midland, has a bachelor of arts degree from Southern California College in Costa Mesa. He has also done graduate work at Fuller Theological Semifiary in Pasadena, Calif., and at the Assemblies of God Graduate School in Springfield, Mo.

In this special missions rally, Newberry will present African songs, curios and an audiovisual presentation. The public is invited to attend.

# Kitty Hawk sailing along

30% to 50% off

**Summer Fabrics.** 

SIOUX FALLS, S.D. (AP) - The Kitty Hawk, attempting the first cross-country balloon flight, breezed across the cloudy skies of South Da-kota on Saturday after surviving turbulent weather over Wyoming. "They were at 22,000 to 24,000 feet,

going about 30 miles an hour," said Jim Mitchell, a spokesman for Weather Services Corp., of Bedford, Mass., which was tracking the balloon.

Maxie Anderson, 45, of Albuquer-que, N.M., a veteran of the first trans-Atlantic crossing in 1978, was making the flight with his son Kris,

Mitchell said the balloon crossed the South Dakota-Wyoming border Saturday morning and by 3 p.m. CDT had reached about the midway point of the state, some 190 miles westnorthwest of Sioux Falls.

Mitchell said the Andersons en-dured a "hectic day" Friday, when they hit snow and rainstorms in Wyoming.

The Andersons left San Francisco Thursday, hoping to reach Kitty Hawk, N.C., but were at the mercy of the winds.

# DEATHS 'Dub' Richardson

FORT STOCKTON - Ed Warren "Dub" Richardson, 80, of Fort Stockton, father of F.J. Richardson of Midland, died Thursday in an Odessa hospital following a brief illness.

Services were Saturday in the First United Methodist Church here with burial in the East Hill Cemetery directed by Fort Stockton Funeral Home.

Richardson was born March 31, 1900, in Eastland County. He moved to Fort Stockton from Eastland County in 1928. He was a retired wholesale dealer for Mobil Oil.

Other survivors include two sons, three daughters, three brothers, two sisters, 19 grandchildren and 18 great-grandchildren.

## **Adolph Swartz**

**BIG SPRING** — Services for Adolph Swartz, 74, of Big Spring were Saturday in Nalley-Pickle Funeral Home Rosewood Chapel with Royce Clay officiating. Burial was in Trinity Memorial Park.

Swartz died Friday in a Big Spring

# \$1.5 billion Chrysler loan approved

and an an in the second of the

WASHINGTON (AP) — The gov-ernment approved \$1.5 billion in loan guarantees Saturday for the moneyshort Chrysler Corp. after the auto-maker secured private financial backing in one of history's most complex fiscal arrangements.

Treasury Secretary G. William Miller said if the plan were not ap-proved, the nation's third largest automobile manufacturer would have exhausted its funds by the end of this month and "would have found itself

Stabbing puts Midland man in Odessa hospital

A 41-year-old Midland man was transferred to Odessa's Medical Center Hospital Saturday night after being stabbed seven times.

Walter Isaacs was taken to Odessa from the Midland Memorial Hospital emergency room after he received seven stab wounds in the back and four head lacerations in an incident reported to Midland police just after 6 p.m.

No report of his condition was available by late Friday.

Association.

charity.

No arrests had been made by late Saturday, and the investigation was continuing.

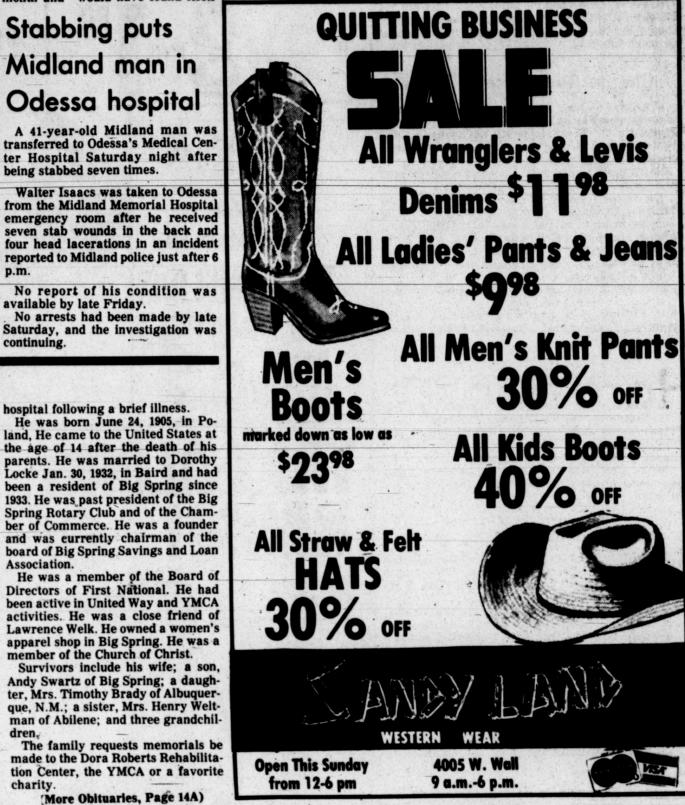

### unable to continue."

Under the plan, Chrysler will be able to draw up to \$500 million in loan guarantees beginning in 2½ weeks. Approval of the plan by the Chrysler Loan Guarantee Board followed an agreement earlier Saturday between Chrysler and the Canadian government on a separate loan support program.

That agreement - which includes

\$200 million in guarantees from Cana-da and \$10 million from Ontario prov-ince — allowed the company to put together a \$1.43 billion private financing package.

Miller, chairman of the federal loan board, said that despite the government assistance, Chrysler would probably lose about \$1 billion this year, about the same as it lost last year.

# **AREA REPORT Crane officer gets** special rabies duty

CRANE - Alana Murphy, Crane's animal control officer since 1975, is on emergency duty for the duration of the rabies epidemic in Crane County.

Her job, among other duties, is to ensure that stray and pet animals, particularly dogs and cats, are inoculated with the rabies vaccine.

However, as she pointed out, rabies shots are not 100 percent effective. Consequently, inoculated pets should be observed closely in case immunization does not take hold.

### Chapter first place in Texas

STANTON - The range-and-pasture judging team of the Stanton Future Farmers of America chapter is ranked No. 1 in Texas and fourth nationally. And the chapter's land-judging team is ranked No. 3 sta-tewide and 10th nationally.

Nolan Parker, vocational-agriculture instructor at

Stanton High School, is coach of the teams. The teams recently placed in the Top 10 at the National Range and Pasture Judging and Land Judging contests at Oklahoma City, Okla. Teams from 34 states competed in the contest.

The land-judging team is made up of Meg Vann, John Parker and Bobby Mims, all seniors, and Dini Smith, a freshman.

Stanton's Jimmy Leftwich placed third-high individual in the overall range-and-pasture-judging contest. Making up Stanton's range-pasture judging team are Louis Parker, David Mashburn, Jimmy Rich and Leftwich.

### Board to discuss import routes

LUBBOCK - The board of directors of Water Inc. will discuss four water importation routes to West Texas at its 1:30 p.m. May 16 meeting in the conference room of the Lubbock Chamber of Commerce at 14th Street and Avenue K

Heading up the discussion will be Dr. Herb Grubb, director of planning, Texas Department of Water Resources.

### Lamesa announces top grads

4

LAMESA - Alan Waldrop has earned valedictorian honors and Ardita Groat salutatorian honors in Lamesa High School's 1980 graduating class of 200 students.

Waldrop is a National Merit Scholarship finalist, dramatist and musician. Miss Groat hold a Presidential Scholarship to Texas A&M University and is a musician.

In Klondike, Debbie Glendening was named valedictorian, and Sharla O'Brien was selected salutatorian. Miss Glendening is editor of the school year-book and is president of the Beta Club and the Martin County 4-H Club Council. Miss O'Brien is president of the school's Future Homemakers of American.

To the north, at Dawson High School at Welch. Tillie Flores is valedictorian, and Javier Martinez is salutatorian.

SNYDER — Dr. Lauro F. Cavazos, the 10th presi dent of Texas Tech University, will be guest speaker at Western Texas College's commencement exercises on May 15.

Approximately 140 students are to be graduated in the exercise in WTC's Central Courtyard. Cavazos, 53, who holds the bachelor's and master's

degrees from Tech, is the first Tech alumnus to be named to the Tech presidency. He received the

doctorate from Iowa State University in 1954. Two of Cavazos' brothers, Lt. Gen. Richard E. Cavazos and Robert J. (Bobby) Cavazos also are Tech graduates. Gen. Cavazos is commandant of Fort Hood. Bobby Cavazos is a rancher at Breckenridge.

### Week-long Mexico trip planned

MARFA - The U.S. Highway 67 Association will sponsor a week-long trip June 7-14 into Mexico --from the desert city of Chihuahua City across the Sierra Madre Occidental mountain range via railroad to the coastal city of Los Mochis and to Topolobampo Bay. The trip's fare will include three night's lodging at

Hotel Victoria in Chihuahua City and tours of the inland state capital, two nights at Hotel Divisadero Barrancas at Copper Canyon and horseback trips into the giant canyon, two nights' lodging at Hotel Santa Anita at Los Mochis and tours of the coastal city. Many meals and all transportion are included in the trip.

Reservations, which must be made by May 21, are to be made with Ann McCallum's Ann's House of Travel, P.O. Box 206, Marfa, Texas 79843 or 915/729-4243.

The tour begins at Presidio on June 7 and concludes June 14.

Prices, based on group travel, are \$373.99 per person asking for single-room accommodations; \$323.44 per person if two are occupying the same room, and \$302.11 per person if three people staying in the same room.

Experienced guides, including Ms. McCallum and Fort Stockton's George Jordan, will be on the trip.

### SRSU has 12 positions open

ALPINE — Twelve student nurse positions are available in Sul Ross State University's 12-month vocational nursing program. Those wishing to apply for the schooling may telephone Big Bend Memorial Hospital at 915/837-3447, Extension 75. Instructor in the program will be Anne Smerke.

### Crane holds fly-in breakfast

CRANE - The Crane County Chamber of Commerce will sponsor a fly-in breakfast for pilots and their "crew members" flying to Crane for the annual Fly-In on May 18 at the Crane County Airport, according to Jim Fowler, airport manager.

Breakfast will be served at 7 and 10 a.m. Aviators from all around are invited to Crane for breakfast and "hangar talk."

### Lions to host joint civic luncheon

BIG SPRING — Under the auspices of the Trans-portation Committee of the Big Spring Area Cham-ber of Commerce, the Big Spring Downtown Lions Club will host a joint civic club luncheon at noon Wednesday at the Cactus Room of Howard College in

observance of National Transportation. Featured speaker will be A. Sam Waldrop, chair-man of the State Highway and Public Transportation Commission, the policy-making body for the State Department of Highways and Public Transportation of the state of Texas.

The program is being arranged by Joe Pickle, chairman, and other Transportation Committee members. Reservations may be made by calling the Chamber office at 263-7641. Tickets, priced at \$3.50 each, may be purchased at the door.

DIRT, SQUIRT, QUIRT Night-flying moths become area nuisance

the second second second a state of a second s

By CHARLES W. GREEN Midiand County Extension Agent — Agriculture

PAGE M

Rain showers during the past eight days brought some much-needed moisture to the Midland area. Generally the amounts were light, totaling one inch or less, and soil moisture is still on the marginal side for plowing. There were reports of some areas in the Greenwood community where heavier amounts of rainfall were received that may allow plowing. Some cotton was planted last week in the county by a few growers on irrigated acreage. Rangelands have greened up some, responding to the moisture, and some producers have discontinued supplemental feeding.

feeding.

NIGHT-FLYING MOTHS, primarily cutworm moths, have become a nuisance to homeowners in recent days, particularly for homes located in rural areas bordered by rangelands. The moths are at-tracted to light and are sometimes referred to as "candle moths."

"candle moths." Control of night-flying moths attracted to light is a very difficult matter and is not accomplished by following a simple set of rules. However, a number of plans can be taken, and any one of the steps, alone or in combination with others, may provide some relief. under favorable conditions.

These include reducing the attraction of the site, intercepting the moths before they reach the site, excluding the moths from the house and destroying the moths which gain entrance to the house.

**REDUCE ATTRACTION** of house or buildings through proper light management. This step often provides substantial relief. Indirect lighting should be used where practical so that the source of light is shielded from the areas from which the moths may come. Light fixtures inside building should be placed so that moths outside cannot see the light itself. There is little evidence that any light is repellant to insect, but wellow is the least attractive to most.

insects, but yellow is the least attractive to most. During periods of heavy moth flights, outside light-ing should be maintained at a minimum level. Interception of insects before they become a nui-

sance has some possibilities for success. Placement of light traps at least 100 feet away from house or buildings will aid by attracting and capturing moths.

Exclusion of insects from houses or buildings involves proper screening of windows and doors. Screens should fit tightly. Air vents and ventilating ducts require screening.

SOME DEGREE OF CONTROL can be obtained with sprays of household insecticides applied to places where the moths collect and rest outside, such as door frames, window sills, carports, porches and garages. Since the moths do not feed on anything where they are resting and are protected by a heavy coating of scales, sprays will not provide any imme-diate or spectacular results. Ready-to-use household spray formulations of Diazinon and Baygon may be applied to resting sites and cracks and crevices spray formulations of Diazinon and Baygon may be applied to resting sites and cracks and crevices where the moths may enter buildings. Follow label instructions for "nuisace pest" control on applying the sprays. Adding a commercial wetting agent or a teaspoon of liquid detergent per gallon of mixed spray will increase the effectiveness of the spray.

Charlie Bejcek, who started working on his bachelor's degree 31 years ago, and his 17-year-old son, James, get decked out in their graduation gowns and mortarboards. The son is graduating from Midland High School on May 30, and the father, who

PAGE 10A

started work on the bachelor's degree at Bowling Green State University in 1949, finally got the bachelor's degree in history at The University of Texas of the Permian Basin on Saturday. (Staff Photo)

# Now he's a meteorologist

### By ED TODD Staff Writer

Charlie "Chuck" Bejcek, for one, is realizing his American dream, which is not wholly traditional and is late in coming.

It's not a house and a plot of land to call his own; he's got that, but he's selling both house and lot and is looking for another haven.

His dream, long in coming, is getting - finally - a college degree and moving, farther and farther west.

"And we've liked the West ever since we were old enough to read Zane Gray," said Bejcek, a self-professed Bohemian and an ex-Easterner who now shuns the American East, mostly because of the humidity and lack of open space and who has been "fascinated" with orchids, his sweetheart of the flower world, even since he was a youngster in Parma, Ohio.

The go-westward phase of his dream is being realized in part because he's getting the basic bachelor's degree in 31 years instead of the stock four straight years and is moving on.

Beicek, 50, is a meteorological technician who, due to the "magic" key of academic papers, is being promoted to meteorologist. The promotion means more pay, higher status and a move about 430 miles west to Albuquerque, N.M.

There, he'll be advising Federal Aviation Administration air controllers on weather conditions. "I'll be a professional meteorologist instead of a sub-pro-fessional. It's nice to be called a 'meteorologist,' " he said.

Bejcek, who has been assigned to the National Weather Bureau at Midland Regional Airport since 1976, was sort of locked in a position by not having a college degree. Of the 18 slots at the weather bureau here, only one called for a meteorologist, and James Yates, the chief, claims that.

Bejcek, his family, 14-year-old Labrador, Tiger

**Taking Midland's newest** arrivals on a grocery shopping trip is one of Joanne Peterson's numerous tasks as coordinator of the Midland Resettlement Program. Mrs. Peterson, left, points out various fruits to Heang Dul and her daughter, Sok Keak Bun. (Staff Photo by Edward McCain)

# Rock and refuge to 'newcomers

### **By LANA CUNNINGHAM** Staff Writer

Joanne Peterson had to cancel her first interview for this story.

"A girl came off the plane with an ear infection and I had to get her to the doctor," she explained in her slightly British accent. The little girl Mrs. Peterson was referring to is a

5-year-old Cambodian refugee who, along with her 24-year-old widowed mother, makes 83 Indochinese who are starting new lives in Midland.

Mrs. Peterson's job, simply put, is shaping refu-gees into Midlanders. Her first priority, as in the case of the young girl, is the health and welfare of these newcomers.

Nine months ago, when the first group of 45 Cambodians arrived in Midland, Mrs. Peterson suddenly found herself thrust into the center of activity as coordinator of the Midland Resettlement Program

"By default, it landed on me," she said with a laugh. "I didn't start out planning to do it. But we needed a central committee to organize all the people and sponsors." That organization had to come quickly. Mid-

landers had only two weeks to get sponsors, food, clothing and housing for the first wave of refugees flying in Aug. 4, 1979, from camps in Thailand.

THIS ISN'T THE first time she's worked with refugees, however. Her first experience came in 1975 when she lived in Massachusetts and the U.S. became a refuge for Vietnamese fleeing their homeland that had fallen to the Communists. But her job then wasn't as involved. As a nurse,

she did the physical histories on the refugees.

Almost 10 months after their arrival, the first group of Cambodians are turning around and helping the new refugees. Some have learned enough English that they now go to the airport to translate for the new ones. And when housing is found, they all pitch in to clean it and resettle the somewhat bewildered newcomer.

These people, claimed Mrs. Peterson, "have done so much for the community.

Many of them worked on a house during the recent Christmas in April project, she cited as one exam-

Although many work for minimum wage only, they are pooling about \$100 a month to send halfway across the world to help other refugees.

To Mrs. Peterson's excitement, the first American Cambodian was born last December. Despite her suggestion for a Chinese name, the infant was named "Jonathan, because his parents want him to be American.

HER TIME WITH these people takes "26 hours a day," said the salt-and-pepper haired woman. Her Cambodian vocabulary is minimal; she converses with the refugees in "Cambodian charades."

Her facial expressions and hand gestures invade almost all her conversation now, even when she's not. talking with the Indochinese.

has to spend "only five or six hours a day" working out details and problems for the new Midlanders. "Other times, it's all day."

She still finds time to work one day a week in the delivery room at Midland Memorial Hospital, once a month at Casa de Amigos to conduct geriatic screening, as superintendent of Sunday School at her church and as leader of a Bible study once a week

On top of that comes time with her four children and husband each day. Her husband she credits as being "the biggest support for me. He tells me to slow down when I need to. I couldn't do this on my own without his help."

Working with these refugees "has been one of the most rewarding and most fulfiling experiences," she said

"I get to see the change of these people," Mrs. Peterson said enthusiastically. "It's like taking a dirty house and painting it and watching the change before your eyes.

"THESE PEOPLE GET off the plane with only a white plastic sack carrying their visa and health records. They're frightened, exhausted.

"Then, to see them become productive citizens, to see them help other people in the community in such a short time," she said rapidly. "To trace those changes in their lives to confidence and self-worth." She paused.

Gesturing widely with her hand, "This whole thing is a record of God's faithfulness.

Looking back on her life, her year as a nurse in the Appalachians and two years in England as a midwife while her husband studied at Cambridge - it all was preparation for her work now, she said.

"This is something I feel God has chosen for me to Her work goes in spurts, she said. Sometimes, she do," she explained, sitting on a couch and stroking one of her cats.

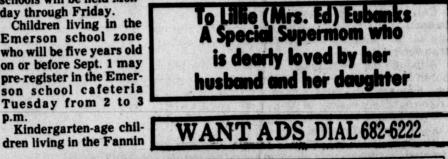

"They're not my refugees. They're His people. He's providing for their needs and for my needs.", Her work with the refugees will come to an end someday, she feels, but not for a long while.

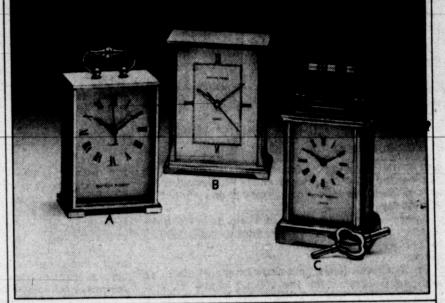

"I just try to live one day at a time.

Use one of Corrigan's conve Mail and Phone Inquiries In

our years ago, sne P.D. Peterson, came to Midland where he is headmaster of Trinity School. She kept herself busy in the Midland-Odessa Symphony Guild, as a "pro-fessional carpooler" and in her church, the Episcopal Church of the Holy Trinity.

Then, one day last summer, Mrs. Peterson's routine changed with a phone call from a friend in the Abilene diocese of the Episcopal Church. That was the first step toward bringing in the Cambodians.

The refugees are still coming to Midland as sponsors can be found, and the success of the Cambodians' readjustment to the American way of life can be traced to Mrs. Peterson. A veritable ball of energy, she denies that accolade; instead, she praises the work of sponsors.

FINDING JOBS HASN'T been difficult, and to date all refugees are employed - some at two jobs. Some have been more successful than others, she said, pointing out the case of two Cambodians who now are partners in a drafting firm here.

When they arrived, neither one knew drafting, she said. But they were quick to catch on and their meticulous work was noticed by the firm's owner.

Transportation for the refugees was a problem at first; the sponsors had to serve as chauffeurs. But with MidTran and bicycles, that problem has diminished.

The adults attend basic education classes at Midland College to learn English, and the children are doing well in their schools, said Mrs. Peterson.

Dear Midlanders,

I would like to take this opportunity to express my thanks for all of the nelp and support given me during the campaign and primary election. Also, I would like to thank you for support shown me during my term as County Commissioner.

Regardless of the outcome of the election in November, I urge you to be supportive, cooperative, and understanding toward your new Commissioner. He/She will work hard for you and Midland and your help will enable him/her to do a better job. Again, I want to say thank-you.

# A new companion to share your life

Oh, there is so much more I want to tell you, but you can't understand it now

When the Holy Spirit, who is Truth, comes, He shall guide you into all truth, for He will not be presenting His own ideas, but will be passing on to you what He has heard. He will tell you about the future.

He shall praise Me and bring Me great honor by showing you My glory.

All the Father's glory is Mine; this is what I mean when I say that He will show you My glory.

In just a little while I will be gone, and you will see Me no more; but just a little while after that, and you will see Me again!"

"Whatever is He saying?" some of His disciples asked. "What is this about 'going to the Father'? We don't know what He means.'

Jesus realized they wanted to ask Him so He said, "Are you asking yourselves what I mean?

The world will greatly rejoice over what is going to happen to Me, and you will weep. But your weeping shall suddenly be turned to wonderful joy when you see Me

It will be the same joy as that of a woman in labor when her child is born-her anguish gives place to rapturous joy and the pain is forgotten.

You have sorrow now, but I will see you again and then you will rejoice; and no one can rob you of that joy.

At that time you won't need to ask Me for anything, for you can go directly to the Father and ask Him, and He will give you what you ask for because you use My name.

You haven't tried this before, but begin now. Ask, using My name, and you will receive, and your cup of joy will overflow.

John 16:12-24

# Floridians hear Moscow radio, thanks to Castro

EDITOR'S NOTE -- It's not exactly sweeping the airwaves, but you can now tune in on Radio Moscow's American service on your car radio — if you happen to be in Florida. Thanks to an assist from Cuba, you'll get all the Soviet's latest, with a twist.

### **By DAVE GOLDBERG**

KEY WEST, Fla. (AP) - Picture a Floridian driving home from work, tuning the AM dial on his car radio to 600 and listening to this:

'At a news conference in Delhi, the Vietnamese prime minister ... said Vietnam regarded the so-called Afghan question as farfetched. It has arisen as a result of direct military interference by the United States, China and Pakistan in Afghanistan's affairs."

-"Fundamental human rights are trampled upon in the United States. Speaking at Columbia University, a prominent black American lawyer ... has reported that thousands of political prisoners are languishing in American jails and national minorities are the target of crude racial. discrimination.

-"The American administration's steps to augment the campaign of blackmail and pressure against Iran have been met with caution and disapproval in France.

Live, from Cuba, it's Radio Mo-SCOW

Each day from about 3 p.m. until midnight, people in most of Florida can pick it up on AM from Las Vegas, Cuba, at 150,000 watts of AM power, three times what the most powerful station in the continental United States puts out.

Radio Moscow's World Service has long been available on short wave receivers, but not to the casual listener with standard sets.

On Feb 26, Federal Communications Commission monitors in Tampa first picked up broadcasts. FCC officials decided they could do nothing about it and referred it to the State

Department. Officials there denounced the broadcasts as "standard Soviet propaganda" and predicted Americans would have no part of it. A typical day includes newscasts on the half-hour - a world news roundup liberally sprinkled with anti-Americanisms and glowing tidbits of Soviet

"President Brezhnev has left Moscow for the holidays. He was seen off by members and alternate members of the Politburo of the Soviet Communist Party's central committee, secretaries and officials of the commit-

"In Moscow, the Ministry of Trade has reported that in the last three months, retail trade grew by about 6 percent as compared to the same period last year:

"Over the past decade, 108 million Soviet people --- or 40 percent of the country's population - have improved their housing conditions.

The features vary and include Soviet folk music, a discussion of Siberian literature, a lecture on elementary Leninism by a Moscow Univerity professor, a commentary on the inequities of American capitalism. There are interludes of American popular music performed by a full orchestra, Muzak-style.

There's not much the United States can do about the broadcasts

Judging from the reaction of listeners, nothing will be needed. "Those broadcasts are dull, dull, dull," says a government official who occasionally tunes in on short wave.

# Simmons only 5-4A athlete to score in Austin

**David Simmons** ....5th in shot

AUSTIN - Midland High's David Simmons ended his high school track career here Saturday with a fifth place in the **Class AAAA state shot put** event.

Simmons managed a toss of 55-feet, 9%-inches for fifth, somewhat below his average distance. He had a best this year of 60-4, but even if he had

equaled that mark, he would have finished only fourth.

SIMMONS, however, won the AAAA state championship in the discus on Friday, and that being his major event, has to come away a happy man. His 12 points in the meet gave Midland High a share of 10th place in the team totals

But bad news came in the 800 meters where Midland Lee's Keevin Harper was trying to produce the run of his life. However, he didn't finish in the top six among eight runners, so didn't earn any points.

### (See track summaries, Page 2B)

Harper's time was not known since state officials clock only the first six places. As it turned out, Harper would have had to run the best time of his life to finish even sixth. John Sexton of Richardson Pearce had a 1:53.3 for sixth place. Harper's previous best was only 1:55.4, which is a Lee school record.

**PASADENA** Dobie's Gawain Guy won the 800 meters with a blazing 1:50.8, but was not a state record. Richardson Pearce's Rick Raymond was second with a 1:51.5. Daniel Rojas of El Paso Irvin, who defeated Harper in the Region I meet, placed fifth with a 1:53.1.

Tyler's Roderic Arterberry won the shot put event with a 62-3¼ while Ron Faurot of Hurst-Bell took second with a 61-8. El Paso Andress' Jerry Bullitt, who defeated Simmons in the Region I shot put, was third with a 60-10¾ and Spring's Greg Bomkamp was fourth with a 59-10 1/4.

Simmons was the only athlete from District 5-4A to score any points in the meet. Besides Harper, Permian's Mike Van Zandt didn't score in the pole vault, Big Spring's Joe Willie Jones didn't make the top six in the 400 meters and neither did San Angelo's Dennis Nolder in the 110 hurdles.

It wasn't a productive day for other area runners either. Stanton scored two points with a sixth in the 400 meter relay with a 43.5, but Ganado set the winning pace with a 41.8. No other area performers scored in Class

THE ONLY area performer in Class B to notch points was Klondike's James Martin, who had seconds in both the shot put and discus. He had a 53-0 in the shot and 163-3 in the discus. Dennis Brantley of Houston Worthing and Mark McNeil of San Antonio Houston used the wind Saturday to run the fastest times ever recorded by Texas schoolboys in two events at the state track and field championships

Brantley zipped to a time of 13.1 seconds in the 110-meter high hurdles, breaking his own state record of 13.5, which had been matched by two others. McNeil had a hand-timed 10.0

in the 100 meters, and an automatic clock caught McNeil in 10.21, which is the second fastest ever run by any high school runner in the nation.

McNeil, however, was pushed by wind of 2.8 meters per second. The national record time of 10.16 by Houston McTear of Baker, Fla., in 1976, was not wind-aided.

National records are based on automatic times with a wind allowable of two meters per second, or about four and one-half miles per hour.

The wind at Brantley's back was 4.08 meters per second. His and McNeil's times are state records because the wind is not considered.

IN TEAM competition, Killeen got strong performances from John Walker, Gerald McNeil and Harris Mouton, all headed to college on athletic scholarships, to win the Class AAAA championship for the third consecutive year. Killeen scored 69 points, more than double the total of runner-up Tyler's

Ganado won the final event the 1,600-meter relay — to take the Class A title with 42 points, four more than Falls City, which finished fourth in that race.

Snook defended its B title with the Kerr brothers - Larry and Jerry — winning all three sprints. The Kerrs are the younger brothers of Leslie Kerr, the premier 400-meter runner in the Southwest Conference from texas A&M. Snook piled up 80 points, and Amherst was a distance second with 30.

Killeen's third straight AAAA championship made it the first team since Abilene in 1960-61 to accomplish that feat.

Walker, a Texas Longhorn football recruit, anchored Killeen's winning 400 meter relay team and ran on the 1,600 relay. which finished second. Gerald McNeil, a Baylor football recruit, and Mouton, reportedly headed for Texas on a track scholarship, ran legs on both relays. Walker and Mouton also tied for second in the AAAA high jump with leaps of six feet six inches.

**BRANTLEY**, a lean speedster who will run track at Southern Methodist, became a double winner when he took the 300 meter hurdles in 36.8 seconds.

Mark McNeil followed his 100 meter triumph by winning the 200 meters in a relatively slow 21.7. McNeil's time in the 100 was a state record because the 100 meters is a new event here.

PAGE 1B

Larry Kerr, a senior, finished with 30 points by winning the 100 in 10.7, the 200 in 22.3, and running on Snook's two winning relay teams. Jerry, a sophomore, won the 400 in 49.0 and ran on both relays for 20 points. Hezekiah Carter of Snook matched that point total by winning the 300 hurdles in 38.5 and running on both relays as Snook athletes took first in every event in which they competed.

Snook's 1,600 relay team set a conference record of 3: 18.8. The old record of 3:21.1 was set by Rule in 1974.

**JOHN ROBINSON of Pasade**na Dobie, a Baylor track recruit, won the 4A 1,600 meters in 4:08.4, breaking the conference record of 4:11.0, set by Rodney Cromeans of Austin Lanier in 1972.

In Class A Mike Ledsome of Brownwood Early set a pole valut record of 14-7, four inches higher than the vault by Terry Dial of Sanger in 1978.

Kyle Beall of Anna tied the B record in the 800 at 1:55.1, which was set by J.B. Sonny Rollo of Lovelady in 1970.

# Watson leads Nelson Classic Blustery winds hinder field during tourney

DALLAS (AP) - Tom Watson, scrambling at times like a municipal course 10-handicapper, holed a 50-yard wedge for a birdie to shoot even par Saturday and his 6-under-par 134 total held up in the blustery 27 mph winds at the halfway mark of the \$300,000 Byron Nelson Golf Classic. Missing nine greens in the wind, but putting with his incomparable radar,

watson managed a

matched his opening round 72 and was tied with Nicklaus at 144, far back in the pack, but good enough to make the qualifying cut.

Watson, who holed an eight iron for an eagle duece on Friday, produced another minor miracle on the 445yard par 4 No: 14. He hit a poor driveand his second shot was half-a-football field short of the green. Watson . then knocked the ball into the no Curtis Strange, who bogied the last with a perfect wedge. two holes for a 1-under-par 69 and a "We've got 36 holes today and that will be tough physically if this wind keeps up," said Watson. "Psychologically, it helps if you have a real good first 18 holes. However, anybody in the field can come from behind easi-

Watson the lead after the morning round.

"I hate to play a good 16 holes then throw it away, but that's what I did," said Strange. "All I know is the wind was blowing like hell at 8 a.m. this morning and it never let up. Well, I got Trevino last week and it looks like I'll have to get Watson tomorrow."

Strange said "I don't feel 36 holes ill bother me if anything I ought to

Another big name, Lee Trevino, matched his opening-round 72 and was tied with Nicklaus at 144, far back in the pack, but good enough to make the qualifying cut.

Watson is seeking his third consecutive Byron Nelson title and his fourth victory in the tournament in six years.

Lon Hinkle who called a 2-sho

135 total. Three shots behind at 137 was George Burns, who shot 70.

144

The low round of the day, a 3-underpar 67, belonged to Bill Kratzert who joined Bill Rogers, a 69-shooter, at

Jack Nicklaus, who opened with a 70, shot a four-over-par 74. Another big name, Lee Trevino,

Strange, fresh off his victory in the Houston Open last week when he defeated Lee Trevino in a playoff, three-putted the final hole to give

last longer than some of the older fellows. I'm still confident and I'm not tird at all."

The 6,993-yard par 35-35 Preston Trail Golf Club dried out rapidly Saturday from Thursday's rains which forced a first-round postponement and today's 36 holes.

Strange said "It will be nice to be paired with Watson today because we haven't played together in two years. It would be nice to go head-tohead.

Watson is seeking his third consecutive Byron Nelson title and his fourth victory in the tournament in six years.

He came to the Nelson with backto-back wins in the Tournament of Champions and the New Orleans.

The low round of the day, a 3-underpar 67, belonged to Bill Kratzert who joined Bill Rogers, a 69-shooter, at

Jack Nicklaus, who opened with a 70, shot a 4-over-par 74.

penalty on Jerry Pate Friday, suffered the indignity Saturday of having to call on Pate for a ruling in the second round of the Byron Nelson Golf Classic.

HINKLE HOOKED his tee shot on the long 470-yard par 4 No. 10 and a spotter said he heard it hit a tree. 'I don't think it went out of

bounds," the spotter told Hinkle, wo had hit a provisional ball. After a five-minute search - all the

rules allow - Hinkle said to Pate: "Now, I don't know what to do. I don't know whether to count it as a lost ball or out-of-bounds."

Pate, who was infuriated Friday when Hinkle called a 2-stroke penalty on his playing partner for illegally straddling a tap-in putt, snapped: "The rule is the same, Lon, whether it's a lost ball or out of bounds."

Hinkle took a 2-shot penalty and played his provisional ball, making a double bogey 6 on the hole.

Tom Watson, Byron Nelson leader, blasts out of sand

# **Midland** hosting women's national tennis tournament

More than 100 of the finest collegiate tennis players in the nation gather in Midland Monday for the beginning of the National Junior College Athletic Association Women's Tennis Championships.

Midland College is host for the week-long tourney, which will be played on the MC courts, starting at 8:30 a.m. Monday. Chaparral coach Brian Gilley is serving as the tournament director while Dr. Raymond Yell is the tournament referee.

Not only will Gilley be running the tournament, but he also will be watching closely to see if his MC women's team can win the school's third national championship. Midland College took the title in 1975 and 1976.

ODESSA COLLEGE, FROM the same conference, took three consecutive crowns from 1977 to 1979, but will not qualify for the tournament this year. Defections wiped out the OC women's team at mid-term.

But another power has emerged from the strong Western Junior College Athletic Conference as New Mexico Military Institute captured the conference title and then won the Region V tournament last week in Gainesville. MC and McLennan County Community College from Waco tied for second. MC also finished second in the conference.

"So far, we have teams from 13 different states entered. We know that NMMI, Midland College and McLennan are about even. Navarro and Tyler are two other Texas schools that are going strong. And past experience has shown that the Florida teams are always tough," Gilley said. "The tournament should be well-balanced this year. At least in this area, there isn't anyone like Sandy Collins, who can dominate the field."

Collins, who won the NJCAA singles titles in 1977 and 1978 for Odessa College, never lost a set in two years of NJCAA tournament competition.

GILLEY'S OWN TEAM is made up of three freshman and one sophomore, so experience is lacking. But MC did take the Region V doubles title with freshmen Teresa Landry of Plainview and Brenda Burgess of Dallas paired. Sophomore letter winner Debbie Smith and freshman Linda Hankins of Balch Springs make up the remainder of the squad.

Coaches will meet at the Midland College tennis center this afternoon to make the seedings and draw. Singles will be in a 128-player bracket and the doubles in a 64-team bracket. Finals are slated for Friday morning. Monday will be devoted to singles play, with both singles and doubles being played the remainder of the days.

TEAM ENTRIES RECEIVED to date include NMMI, Roswell, N.M.; MC; McLennan, Waco; Navarro, Corsicana; Tyler JC; Lakewood Community College, White Bear Lake, Minn.; Jefferson State JC, Birmingham, Ala.; George C. Wallace State Community College, Dothan, Ala. College of DuPage, Glen Ellyn, Ill.; Palm Beach JC, Lake Worth, Fla.; Marshalltown Community College, Marshalltown, Iowa; Broward Community College, Fort Lauderdale, Fla.; Hutchinson Community JC, Hutchinson, Kan.; Barton County Community JC, Great Bend, Kan.

Mesa Community College, Mesa, Ariz.; Nassau Community College, Garden City, N.Y.; Oscar Rose JC, Midwest City, Okla.; Saint Gregory's College, Shawnee, Okla.; Muskegon Community College, Muskegon, Mich.; and Peace College, Raleigh, N.C.

# Lakers top 76ers, 111-101

PHILADELPHIA (AP) - "It was gang rebounding at its finest, a contagious thing," Coach Paul Westhead said Saturday after his Los Angeles Lakers whipped the Philadelphia 76ers 111-101 to take a 2-1 lead in their National Basketball Association championship series.

KAREEM ABDUL-JABBAR led the Lakers onslaught with 33 points, 14 rebounds and three assists, but Westhead refused to single out one individual for his team's comparitively easy triumph in the third game of the best-of-seven series.

"We played such an outstanding team game from the rebounding area that it's almost impossible to single out anyone," Westhead said.

In addition to Abdul-Jabbar, Jamaal Wilkes grabbed 12 and Earvin 'Magic" Johnson 11 off the backboards.

"It was like diamonds surrounded by rubies," said Westhead, adding, 'the whole set was there.

Philadelphia Coach Billy Cunningham said sadly, "I guess it's right that the home-court advantage doesn't mean a thing."

Cunningham said the No. 1 thing in his team's almost humiliating defeat was the way the Lakers beat the 76ers on the offensive boards.

"They had too many second and third opportunities," lamented Cunningham. "You can't afford to have someone do that."

### Los Angeles breezes

LOS ANGELES (111) Chones 4 3-3 11, Wilkes 8 3-5 19, Abdul-Jabber 13 7-9 33, Nixon 9, 4-5 22 Johnson 6 4-6 16, Cooper. 4 2-2 10, Landsberger 0.0-0, Holland 0.0-0. Totals 44 23-30 111. Cunningham said he felt his defense did its best job of the series thus far on Abdul-Jabbar.

"But when they (the Lakers) do that type of job on the boards, that hurt us

"And we also missed too many scoring opportunities," Cunningham said.

The victory was the first for the Lakers in Philadelphia after nine losses since 1975 and regained the home-court edge for the Western Division champions.

THE FOURTH game in the best-ofseven series will be played here this afternoon (2 p.m. CDT). The Lakers won the first game of the series but were beaten by the 76ers on Wednesday and came here seeking to regain their home-court advantage.

The Lakers turned this nationally televised game into a rout in the final 4:29 of the second quarter when they outscored Philadelphia 16-4 to assume a 58-44 halftime advantage.

In the third period, the closest the 76ers could get was 12, the last time at 60-48 with 9:32 remaining.

Los Angeles led by at least 15 points through the balance of the quarter and started the final period with an 84-65 lead.

In the final period, the 76ers started second quarter.

quick getaway.

come was 11 points at 94-83.

FRESNO, Calif. (AP) - Norway's Richard Olsen, throwing a borrowed hammer because he was "too lazy" to bring his own, broke his nation's record during the West Coast Relays Saturday.

Olsen, who already held the Norweigan mark at 236 feet 10 inches, felt. his 243-foot toss here was "pretty good" because it was his "first real competition this year."

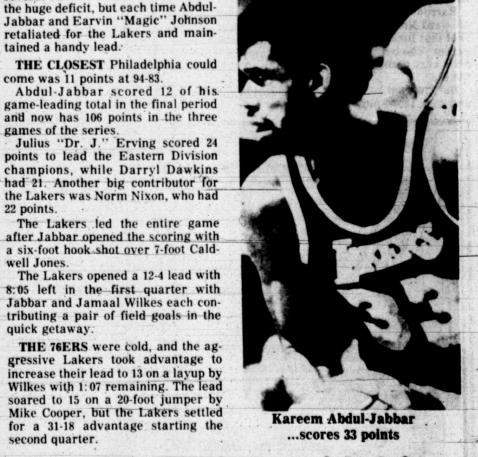

in said and represented to Barger down

Olsen said he had hoped to break the Scandanavian hammer mark of 244-2.

"On one foul I thought I had it," Olsen said. His belief was confirmed when a judge reported that the foul toss went 245-2.

Olsen, who also broke the meet record of 235-4, said his throws were 'good, but they could have been better. I messed up a little technically, so hopefully there is room for improvement.'

Four of Olsen's six throws broke his former Norweigan record and the meet mark, and were better than any hammer toss ever achieved by an American. His series went 227-11, the record, foul, 242-8, 239-10 and 238-5. Olsen was well below the world record of 263-6 set by Karl-Hans **Riehm of West Germany in 1978.**

### No-hitter BASEBALL **STANDINGS** stops Cooper in playoff

CARROLLTON - Righthander John Machin threw a nohitter here Saturday to pitch the R.L. Turner Lions to a 3-0 victory over the Abilene Cooper Cougars in a Class AAAA bi-district baseball playoff game.

The win gives Turner a 1-0 lead in the best-of-three series which moves to Abilene on Tuesday.

Machin, now 13-1 on the year, walked no Cougars and struck out 10. Cooper had only three base runners during the game, two who were awarded first when hit by a pitch and the other on an error.

Sophomore desginated hitter Randy Bass went three-forthree including a two-run homer in the sixth inning. It was a tape-measure job which went over the fence in center field, some 430 feet from home plate. He also had a single and double as Kyle Stuard threw a six-hitter for the Cougars which are now 18-6 on the year. Turner is 29-2 on the year.

Score by innings:

Abilene Cooper 000 000 0-0 0 3 R.L. Turner 000 102 x-3 6 1 Kyle Stuard and Scott Harris; John Machin and Mark Jewett. 2B-Randy Bass, Bobby Ott (Turner). HR-Bass (Turner). WP-Machin (13-1), LP-Stuard (6-2).

Pet. GB. 458 4% 458 4% INDIAN — If John decides to get out of auto Saturday, Richmond hit Gusty winds buffeted racing he could probably the wall, damaging his the fragile champ cars make a living as a fortune teller.

The day before the start of qualifications for the 1980 Indianapolis 500, Rutherford predicted the top speed needed to grab the pole postion would be 3% 192.4 mph. 6%

The two-time Indy winner was nearly right on the money. The top fourlap average speed on the first day of qualifications Saturday was 192.256. What the smiling Texan neglected to predict, however, was that the fastest car would be the yellow Chaparral

with Rutherford at the wheel. It wasn't a great surprise to many at the Indianapolis Motor Speedway. Until Friday, Rutherford had collected the fastest times in practice laps for the May 25 classic, topping out at 193.009 mph Friday. Then rookie Tim Richmond stunned everyone with a lap at 193.507 mph late Friday

himself out of the run-Indy 500 lineup INDIANAPOLIS (AP) — The tentative partial lineup for the May 25 Indianapolis 500-mile race, listing driver, hometown, car number, chassis-engine and Satur-day's four-lap qualifying average speed (additional qualifications today and May 17,18).

# Two sharing **LPGA** lead

ATLANTA (AP) - Amy Alcott, who has one victory and two second-place finishes in her last three starts, fired her second straight 4-under-par 69 Saturday and moved into a tie with first-round leader Pam Higgins after 36 holes of the \$100,000 Atlanta Ladies Professional Golf Association event.

Higgins, who had a one-shot lead entering the round, shot a 71 to match Alcott's 138 total, eight under par on the hilly 6,270-yard, par-73 Brookfield West Country Club course.

The two leaders had a four-stroke advantage over Barbara Barrow, who rallied from that deficit in the final round two weeks ago to capture the Birmingham Classic, her first tour victory.

"It was kind of a carbon copy round of yesterday," said Alcott, who lost in a playoff last week to Hollis Stacy in the Women's International.

"At times I was spectacular," said Alcott, who registered consecutive birdies with a 20-foot downhill putt on No. 6 and a 30-foot uphill putt on No. 7. She also birdied two of the last three holes to gain her share of the lead but missed a half-dozen putts in the 12- to 15-foot range.

Higgins, who has not won a tournament since 1977, said she was pleased with her play Saturday, al-though she did not putt as well as she had in firing her opening 67 Friday.

"Amy's playing the best golf of anybody right now," Higgins said. "I hope I get off to a fast start tomorrow because if she does, she might just leave us in the dust. She'll be tough.

Barrow made her move with an eagle-3 on the 485-yard No. 16, where she got away with a poor tee shot that turned into one of the longest drives of her career. The ball sailed through a clump of trees and hit a cart path, eventually stopping 300 yards from the tee.

Barrow then hit a five-iron to 20 feet behind the pin and sank that putt.

S

Rebels, Bulldogs please coaches in spring drills

### By TERRY WILLIAMSON **Sports Writer**

Week One of spring football training at Midland High and Midland Lee is over with neither of the new coaches predicting championships at this stage, but not disappointed with what they have seen.

Both schools held scrimmages Saturday and if technique is not a polished product at this time, enthusiasm at both schools is.

Midland High's Pat Culpepper used Saturday's scrimmage as a way to test some of the people he thinks can go both ways this fall, and he liked what he saw in that area.

"It was pretty warm out there Saturday, and we were pleased to see that some of our kids can play on both offense and defense without backing off," Culpepper said. "Jerry Zachery ran well at tailback and turned around and did a good job as a defensive back. I was also pleased to see that Joe Goebel and Wade Johnson responded both ways. They are both defensive tackles and Goebel is also playing offensive tackle while Johnson is playing tight end on offense. Johnson caught two passes and he is 240 pounds. That's quite a sight to see because he can ramble. Steve Willis looked good at linebacker and center also."

Star quarterback Michael Feldt was held out of the scrimmage, but he has responded to contact after knee surgery last fall, according to Cul-pepper. "Michael has a little swelling in the knee, but we think he is coming along fine. Doug McLean hurt his ankle during the scrimmage and we used sophomore Scott Sears in his place and he did a very good job at quarterback.'

McLean and Jim Gunnels are the only injured players thus far for MHS. Gunnels has a separated shoulder.

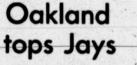

"We need to get a lot better. We didn't throw the ball as well as I would like and we need to work on pass protection. We worked the kids very hard this week and didn't try to make any friends, but the kids have really taken to it and that is a very good sign right now," Culpepper said.

Dykes sent his Rebels through six tough days of fundamentals and the Saturday scrimmage was the first real time the squad had been together as a unit. Dykes liked the hustle his Rebs have shown saying, "The kids worked hard for six days and I think we have a long way to go, but on the other hand, we have come a long way."

The Rebels worked for a while on offense and then a little on defense Saturday, but Dykes was not ready to discuss individuals at this stage. "You could say we had a balanced effort, but I think we could all improve on technique and productivity. I was real pleased with the first team defense. In fact, the defense looked good all day. That has to be the strongest thing I've seen so far."

Dykes reported that linebacker David Cornelius was held out of Saturday's scrimmage with a bruised shoulder, but he thought David would be back in the fold by Monday. That was the only Rebel injury thus far.

Week Two is ahead and improvement seems to be the key word at both schools. Maybe we can make our own opinion at the end of Week Three when the two teams hold their annual "Here's How We've Done" show at Memorial Stadium.

# Royals batter Bosox by 13-8

Washington drove in four runs and Darrell Porter three, including his first home run since returning to action a week ago, as the Kansas City Royals packed 12 runs in the first four innings for a 13-8 victory over the Boston Red Sox Saturday.

Washington drove in two runs with a basesloaded single in the first and then doubled home two more in the third. Porter, recently returned from several weeks of treatment at an alcohol and drug rehabilitation center, keyed a five-run first inning against Boston starter Dennis Eckersley, 1-5, with a two-run homer. He also singled home a HBP-by MacWhorter (McRae). T- way to earn his first save.

## Fischernew Cincy, Seaver down UCLA AD Philadelphia, 5-3

THE MIDLAND REPORTER-TELEGRAM, SUN., MAY 11, 198

LOS ANGELES (AP) - Robert A. Fischer has been appointed athletic director at UCLA, succeeding the retired J.D. Morgan, Chancellor Charles E. Young said

Saturday. Fischer, who has been acting athletic director since last October, will officially assume the position on July 1, the date of Morgan's retirement. Morgan announced his retirement last fall and took an extended leave at that time. Fischer has been UCLA's associate athletic director and the No. 1 assistant to Morgan

for the past 15 years. Fischer, a native of San Francisco, earned his bachelor's degree in business management, finance, marketing and accounting in 1945 at UCLA. He joined the school's business staff in 1946 and has been associated with UCLA in various capacities since that

# Soccer riot Weber captures AAAA Ledbetter rolls 758 series brings chaos tennis singles crown

### **By RANDY ISENBERG**

Jim Ledbetter, following on the heals of rolling three consecutive 700 series, was the pace setter among Tall City bowlers this past week as he jammed in games of 279, 242 and 237 for a 758 in the Petroleum National League.

Gary Stephens continued his fine rolling with a 744 series in the Oil Stars League on games of 225, 255 and 264. Stephens also rolled a series of 645 in the Petroleum American and 639 in the Industrial. Stephens has been the most consistent bowler, rolling big scores over the last 12 weeks. Patsy Wallin was the top scorer

among the women with a 599 series in the Ladies Scratch Trio.

The Permian Basin Mixed Handicap Association Singles Tournament will be at Air Park Lanes May 11 while the Midland Junior Bowling Association Tournament will be held. May 17-18 at both Super Bowl and Air Park. The Air Park Mixed Team Doubles and Singles tournament will be on weekends from May 25 through June 8.

# UCLA Invitational today

LOS ANGELES (AP) - Renaldo Nehemiah will attempt to rewrite the 110-meter hurdles world record he established a year ago, and Ireland's Eamonn Coghlan will run against the United States' best milers today in the UCLA Invitational Track Meet.

Nehemiah, coming back from an ankle injury suffered over the winter, faces a field that includes UCLA standout Greg Foster, Dedy Cooper and Rod Milburn. Last year at the meet on the Bruins' Drake Stadium track, Nehemiah shattered the world standard with a clocking of 13 seconds flat.

Foster has been suffering recently from a strained thigh muscle, but ran a 13.30 - fastest in the world this year - against Southern Cal eight days ago. Nehemiah made his first 1980 outdoor appearance on the same day, holding off Cooper and Milburn to win in 13.32 at the Houston Invitational.

Coghlan, the defending meet champion who also owns the world indoor best of 3:56.6, will battle Americans Steve Scott, Craig Masback and Steve Lacy in the nationally televised meet.

After spending the winter training in San Diego, Coghlan will be making his first outdoor appearance of the year. He confidently predicts agood time.

the indoor season and I should be able to run 3:54 on strength alone," he said. "Then we'll just have to see what happens on the final straightaway.

ly: "I don't think 3:54 is very fast. With the warm weather here it's possible someone will get down to the low 3: 50s."

Sebastian Coe last July in Oslo.

James Sanford heads an outstanding group that includes Houston McTear. Harvey Glacince and Eddie Hart. Sanford ran a wind-aided 9.88 in the 100 and also won the 200 in 20.26 in the duel meet loss to UA.

Mike Tully, who barely missed three attempts at a world record 18-8% in the pole vault and won at 18-4% in the recent Mt. San Antonio College Relays, is in a top-flight neld that of Sweden

Three noticeable absentees at the meet will be Olympic champion Edwin Moses, 400-meter hurdles world record-holder; sprinter Curtis Dickey, and miler Steve Ovett.

Moses has a bad ankle. Dickey, the Texas A&M football star who was drafted by Baltimore, must attend a Colts' camp. Ovett, according to meet chairman Al Franken, changed his mind after initially saying he would compete.

The featured women's events are the 100 and 400 meters, with Evelyn Aashford gunning for an American record in both, and the 100-meter hurdles which pits Deby LaPlante against Stephanie Hightower.

DIAL 682-6222

GLASGOW, Scotland (AP) - The Glasgow Celtic edged the Glasgow Rangers 1-0 in overtime in the finals of the Scottish Soccer Cup Saturday and sparked a riot at Hampden Park Stadium

Hundreds of rival fans swarmed on the playing area as the game ended and battled with the police.

Bottles and stones were thrown and the field was left littered with missiles after police on horseback had charged the fans and forced them back.

Nearly 200 people were arrested in the melee. Four policemen were hurt, one of them seriously.

Chief Inspector Iain McKie of the Strathclyde police said, "We have a lot of policemen running around with cuts on their hands. With all those bottles being thrown, it was a wonder there were not more serious injuries.

About 20 fans had been arrested in scuffles outside the stadium before the game started.

Extra police were on duty to deal with trouble, which has become traditional ever since the two rival Glasgow teams first met in the Scottish Cup final in 1894.

Celtic fans are put on the terraces at one end of the field, and Rangers fans at the other end. It has been like that for years.

The teams were tied 0-0 after the regulation 90 minutes. In the 16th minute of the half-hour's extra period, Danny McGrain shot for Celtic. and George McCluskey stuck out a foot and deflected the ball past goalie Peter McCloy for the winning goal. It was the 25th time Celtic had won the cup.

# South Korea

### in cage win

TAIPEI, Taiwan (AP) - South Korea edged Britain 85-84 in the opening game of the fourth William Jones Cup Basketball Tournament Saturday night.

Thirteen teams including the United States are taking part in the 14-day invitational tourney. Ten other teams will compete in the women's division scheduled May 26-June 7.

AUSTIN, Texas (AP) - Tom Weber of Clear Creek beat Don Tomasco of Houston Lamar 4-6, 6-4, 6-4 to take the Class AAAA state schoolboy tennis title here Saturday.

and the state of the state of the state

The AAAA doubles crown went to Hal Morrison and Dave Marks of Corpus Christi King, who beat Kevin Kavanagh and Don Mordecai of El Paso Coronado, 7-6, 6-3.

Steve Riza of Cleburne took the AAAsingles title over Terry Wilkins of Taylor, 7-5, 6-1. The Monahans doubles team of Oscar Villarreal and Gerry Lewis defeated Robert Beck and Doug Harrison of Wharton, 7-6, 4-6, 7-5, to take the AAA doubles title.

Pearsall's David Petty took the Class AA singles crown with a 6-0, 6-3 win over Daniel Cocanougher of De-catur. Scott Haggard and Tod Mitchell of Kermit beat Steve Moore and Eddie Chapin of Commerce, 6-2, 6 -3,

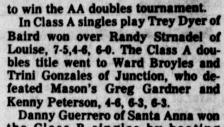

**Brooks** inks with Rockies

ST.PAUL (AP) - The **Colorado Rockies have** offered U.S. Olympics hockey Coach Herb Brooks a two-year, \$205,-000 contract to coach the National Hockey League club, according to the St.Paul Pioneer Press.

The newspaper quoted in today's edition an unnamed Denver source saying the Rockies planned to fire Don Cherry, former Boston coach, if the deal materializes.

month signed a two-year contract to coach the Davos team of Switzerland. It reportedly would pay him \$75,000 a year, tax free and plus expenses.

Brooks would not comment on the report of the Denver offer, but ,id admit he was in that city Thursday.

the Class B singles by beating DeWayne Beck of Miles, 7-6, 6-4. Nor-man Gerber and Perry Brockman of Nazareth won the B doubles by beat-ing Bobby Cain and Roger Seggern of Thrall, 6-4, 6-2.

# **UIL** will study transfer rules

AUSTIN, Texas (AP) - The University Interscholastic League has appointed a 21-member committee to study its rule that restricts schoolboy football and basketball players who transfer to different schools.

The committee, including state legislators, high school superintendents and directors of education associations, will hold its first meeting May 21 in Austin.

The transfer rule prohibits a student from playing varsity basketball or football for one year after transferring. It does not apply to seniors. "The transfer rule has been the subject of several

lawsuits as well as a few bills introduced in the Texas Legislature," said Bailey Marshall, UIL director, "We feel it is necessary to study all aspects of the rule and feasible alternatives to it.'

The 3rd Court of Civil Appeals in Austin upheld the transfer rule in March. The rule was challenged by John Sullivan of Austin, whose family moved here from Vermont in 1977.

He was not allowed to play during his junior year at Anderson High School because of the rule. His family filed suit, but lost in the appeals court ruling.

Marshall said all state high school associations, as well as the National Collegiate Athletic Association, have rules concerning transfers.

## Martin

### win's pole

RICHMOND, Va. (AP) - Mark Martin of North Liberty, Ind., turned in the fastest qualifying lap. in the history of the Fair-grounds Raceway as he won the pole position Saturday for today'sGrand American 200-lap stock car race.

Driving a Camaro, Martin turned in a fast lap of 102.479 mph on the .542-mile track, surpassing the previous record of 97.839 mph set in 1977 by Richie Evans of Rome, N.Y., for a Modified race.

\*The first six drivers qualified at speeds of better than 100 mph with Grand National circuit drivers winning three of the first seven spots for Sunday's race. All drove Camaros.

Neil Bonnett of Hueytown, Ala., was second at 102.361; Rick Wilson of Bartow, Fla., third at 102.125; Bob Strait of Flossmoore, Ill., fourth at 100.629; Butch Lindley of Greenville, S.C., fifth at 100.619; Jody Ridley of Chatsworth, Ga., sixth at 100.010: and David Pearson of Spartanburg, S.C., seventh at 99.744.

KENNY REDIN'S Fin & Feather

OSAGE BEACH, Mo.-The best bass fishing lake in the U.S.A.? At the moment for largemouth bass angling the ballot would weight heavily in favor of Lake of the Ozarks, a 66.000acre impoundment in central Missouri, until lately known more for waterski shows, cruiser rentals, restaurants and fun-filled lounges.

This resort center is ringed by 40 million folks, only an expensive tank of \$1.27 per gallon gasoline away from St. Louis, Kansas City and within weekend range of Chicago.

THE LAKE'S 1,372 miles of shoreline is ringed with resort homes.Construction of Bagnell Dam, a power generating facility of Union Electric. began in 1929. the lake's tourist guide explains that the "trees were cleared prior to flooding, making it ideal for all forms of water sports.

Doesn't really sound like a bass fishing lake, does it? As one bass angler frkom the south suggested after seeing the well-developed shoreline, "It looks like they just flooded Atlanta."

BUT PROOF of the fishing is found in the creel. And Lake of the Ozarks is for reel. Ask any of the 250 bass pros entered in the \$70,000 Missouri Invitational B.A.S.S. Tournament.

'This lake is a monument to bass fishing conservation," opined Ray Scott, president of the 346,000 member B.A.S.S. and founder of the cast for cash fishing.

Without a doubt the best bass fish lake I've ever fished, " said Bill O'Connor of Fort Walton Beach, Fla., and a noted trophy bass angler who specializes in 10-pound bass on artifi-cial lures in Florida. O'Connor, an operations officer for Republic Airlines, made that observation following the first day weigh-in. He had just cehcked in with five bass --- the tournament limit --- weighing 27 pounds, one once. O'Connor would continue to average five pounds per fish for the next two days!

And tu underline the claim as the "best bass lake" the combined 250 casters would weighin 1,037 bass totalling 3,377 pounds, 13 ounces for a remarkable per-bass average of 3,25 pounds per fish.

The fishing fanfare didn't surprise Guido Hibdon, Jr., of Versailles, Mo. "I fish the lake every day there isn't ice on it or I can't chop a hole in it, " remarked the bass fishing guise, who at the age of 12 got his first start on lke running the boat for carppie fish-ermen. "My dad was a guide, said the younger Hibdon, "and we put me out in a boat when all the other regular guides were booked."

Creek area. "We'd fish crawfish for bass for years there, " said Hibdon, who recently had sweetened the 20-yard hump with a brushpile to attract and hold bass.

At 1 p.m. on the final day of the Missouri B.A.S.S. Tournament, Hibdon was about "panic struck." After a second-place 23-pound 11-ounce open-ing day creel, he had slipped to fifth in the standings and with only two hours of fishing remianing, did not have a 15-inch keeper bass in his livewell. Then, he was back at "The Hump" and things happened fast.

The first cast with a homemade jig and black No. 11 Uncle Josh pork frog yielded a two-pound, eight-ounce bass for the underwater brushy tangles. Then, Hibdon pulled four more bass, a 6-15, 5-8 and a pair of 3-5 largemouths --- from the sweet spot. Three times, bigger bass broke his line. During the 30-minute flurry, 'Hibdon's fishing partner for the day --- Richard Stocks of Selms, Ala. --- put a trio of bass in the boat weighing 15 pounds 13 ounces!

Hibdon's late-in rally of the 20 pounds 10 ounces, pushed his three-day total to 14 bass amd 56 pounds, four ounces. And Ray Scott handed him a \$10,500 winner's share, including a \$5,000 Ranger bass boat rig. It was Hibdon's first venture on the **B.A.S.S.** Tournament trial.

**RUNNERUP O'CONNOR**, who appeared the winner with 11 bass and 55 pounds until Hibdon's charge, earned \$4,000. He had fished a Strike King Bootlegger jig. O'Connor's wife, Jeanett, had urged him to enter as a "vacation trip" to the Ozarks, and their first visit. "She even helped me find the fish in practice, " said O'Connor, who had trolling motor problems the final day, but still boated two bass

Lake of the Ozarks' quality bass fishing is the result of a special 15inch size limit imposed by the Missou-ri Department of Conservation. Only bass 15 inches and larger are eligible for creel. The state has also reduced the daily limit from 10 to six bass. The porgram developed a healthy population if bass under te "keeper size."

For the Missouri B.A.S.S. Tournament, officials odopted a five-bass per-day tournament limit. There was a combined 40 limits weighin. B.A.S.S. tourney director, Harold Sharp said, "Just about everyone would have been able to score at least one limit. Several contestants reported hooking and releasing 30 to 40 bass per day.'

**Editor's Note: Two-time Indianapolis** 500 winner Johnny Rutherford took a look at the buildup for the annual May auto racing classic in the Indianapolis News on the eve of this weekend's qualification sessions for the May 25 race. Here is that look:

**By JOHNNY RUTHERFORD** INDIANAPOLIS (AP) - There are

two events in the month of May in Indianapolis, qualifying and the race. They may be part of the same event on the calendar, but we have to think of them separately.

There is prestige, and I think a psychological advantage in being the

quickest in qualifying. Everybody talks about psychologi-cal advantage. There really is a psych factor, but I'm not sure the fans understand how it works. Right now, going into qualifications, if someone has the advantage, I gues we have with the Chaparral. We've run quicker every day up to now.

That's not conclusive. For instance, the Roger Penske teams gets closer all the time. All the other teams are doing their own thing, working their problems out. I'm sure they know every move we make, and I'd have to guess they're concerned with the fact that we're running a little quicker. But they may have some speed we don't know about yet.

It has happened many times. Everyone usually does have an ace in the hole.

Getting ready to qualify, you almost need a computer to keep track of all the variables. It's quite a mental exercise. So much so that you don't sit down, bury your head and psych yourself up for qualifying. You analyze what you've been doing, all the experiences you've been through during the week's practice.

You've had several days in the car to make adjustments to suit your style or the track or the tires or the engine, and you have to keep all these things catalogued in your mind.

And then on qualifying day, there are so many other variables to feed into your brain. Conditions change from one time of day to another. Temperatures change, barometric pressure changes. Humidity is a fac-tor. Then there is that Dr. Jekyll and

Mr. Hyde — your race car. It can be good to you one day. The next day, you can pull it out of the garage and run it like you did the day you went quick, and you'll lose two or three miles an hour for no known reason.

Nobody knows what set of circumstances to relate to until Saturday the first day, but it pulled the scales at morning's practice prior to qualify-

# Lloyd, Ruzici in net finals to take a 3-1 lead. Both and Mandlikova served

PERUGIA, Italy (AP) - Top-seeded Chris **Evert Lloyd eliminated** fourth-seeded Hana Mandlikova of Czechoslovakia 6-4, 3-6, 6-3 Saturday in the semifinals of the \$100,000 Italian Women's Tennis Championships.

Lloyd, who lost in the semifinals of this tournament last year to the eventual champion, Tracy Austin, will play Romania's Virginia Ru-zici in the finals today. Ruzici advanced by ousting Argentina's Ivanna Madruga 6-3, 6-2 in the other semifinal match. Ruzici was a finalist at the Italian Open in 1978. After trading service breaks in the opening set, Lloyd broke Mandli-

kova in the crucial ninth game to take a 5-4 lead and held her own serve in the 10th game to win the first set 6-4.

The only service break of the second set came in the fourth game when Mandlikova broke Lloyd

# Economic slump boosts recruiting

WASHINGTON (AP) - The armed services registered big gains in recruiting in the first three months of the year as the nation's economy slumped toward recession and unemployment climbed, Pentagon figures showed Friday.

The services signed up 94,100 men and women -102 percent of their overall goal - between January and the end of March. Only the Marine Corps fell short of its recruiting mark.

Included are first-time recruits and people with previous service who returned to uniform.

By contrast, the services signed up 74,100 persons in the same three-month period in 1979. That amounted to 92 percent of the volunteers sought by the Defense Department when enlistment goals were lower.

'We accept the fact that recruiting is influenced to a great extent by the economic conditions," said Pentagon spokesman Bill Caldwell. "As jobs are

scarce, recruiting improves.' The figures show that recruiters are having more

success as the economy drops. For the first six months of the fiscal year, from

October through March, the services enlisted 178,500 persons, or 99 percent of their recruiting goal. That figure includes the 102 percent success rate in the first three months of this year, which inflated the total.

The figures showed the services had more success recruiting women than men in the six-month period.

The services enrolled 24,780 women without prior service through March, 105 percent of their goal, compared with an 87 percent success rate in the same six months a year ago. The Army almost doubled the number of women it enrolled: 10,490 in the six months ending in March, compared with 5,980 in the same period a year ago.

By contrast, recruiters enlisted 139,200 men without prior service, or 96 percent of their goal, from October through March, compared with 91 percent in the same period a year earlier.

Only the Air Force exceeded its goal in the sixmonth period, signing up 102 percent of the men it sought.

However, the period between January and March showed an improvement, as the services achieved a 102 percent success rate for recruiting men without prior service.

The report showed a marked drop in the proportion of high school graduates entering the military. It

Overall, the Army enlisted 80,500 men and women

National Transportation Week opens today in area

ODESSA — National Transporta-tion Week will be observed today through Saturday. National Trans-portation Week is sponsored jointly by the American Association of State Highway and Transportation Offi-cials, Traffic Clubs International and other organizations.

PAGE SB

National Transportation Week affords an opportunity of reminding all citizens of the vital role that all modes of tranportation play in their lives and their economic well-being.

The Midland-Odessa District of the State Department of Highways and Public Transportation will observe this week by placing special emphasis on the cost of litter pickup and sign vandalism on the state highway system. It cost the taxpayers of Texas more than \$9 million in 1979 to pick up litter. This amount does not include any cost for removing rubbish from city streets or private parking lots. There are approximately 1.5 million square feet of signs along the highway system or almost 34.5 acres of sign face placed to provide infor-mation to the motorist and to provide for safe and orderly traffic move-ment. Approximately 18 percent of these signs must be replaced each year because of vandalism at a cost of more than \$900,000

The Odessa District is responsible for maintenance and construction of highways in 12 West Texas counties. These are Andrews, Crane, Ector, Loving, Martin, Midland, Pecos, Reeves, Terrell, Upton, Ward and Winkler

Maintenance costs are budgeted for \$6.2 million this year.

Construction amounting to more than \$58 million was under way as of April 1 within this West Texas area.

The Odessa District is also active in upgrading the traffic signal systems and some major city streets in Midland and Odessa.

# Advertise where buyers look first. WANT ADS. 682-6222 State board to ask \$60 million handicapped aid

AUSTIN, Texas (AP) — The State Board of Education agreed Saturday to ask the federal government for \$60 million a year to help educate handicapped students in Texas public schools

The three-year plan approved un-animously by the board extends to June 30, 1983. Currently about \$55 million has been spent for the year ending this June 30.

State support for education of the handicapped students during the same three-year period is expected to reach \$330 million.

'Our efforts are keyed to meeting the educational needs of all handi-capped students," said Don Partridge, Texas Education Agency asso-

ciate commissioner for special education. "For this reason we work closely with the school districts and the regional education service centers ... at the same time parent counseling and family involvement programs are continuing to play an increasing role.

Partridge said there are approximately 335,000 handicapped students now attending class either as parttime or full-time students.

The programs to receive help from the federal grants include instructional materials designed for handicapped students, continued stress on the need to locate and enroll handicapped students and training for both special education and regular classrom teachers.

The state board also approved 15 public schoolteachers and adminis-trators for the 1980 Textbook Commit-tee, which will begin selection of \$29.7 million in textbooks for the school

year beginning Sept. 1, 1981. The first meeting of the committee will be May 16. The final selection of the textbooks will be made Nov. 6 by the State Board of Education.

Copies of all textbook material submitted by publishers for consideration are available for public review now at the 20 regional service centers in the state.

Members of the new textbook committee include Jim Fowler of Carth-

age, Pamela Kaye Landrum of Gar-land, Dr. Wesley K. Summers of Bryan, Dr. Donald Collins of Klein, Christine White of Beaumont-South Park, Mary Joyce Kasting of Copperas Cove, Emerson Joyce Williams of Fort Worth, Lois L. Whitson of Wichita Falls, Jerome Samuelson of Corpus Christi, Amparo R. Quintanilla of Kingsville, Enrique Perez of El Paso, John W. Carroll Jr. of Houston, Clarence I. Thomas of Lubbock, Mary Ruth Howard of San Antonio and Diane L. Richardson of Cotulla.

# FBI plot reported on Vesco

CAMDEN, N.J. (AP) - FBI agents have been planning for more than a year to capture fugitive New Jersey financier Robert L. Vesco and bring him back to the United States for prosecution, a published report says.

The plan, code-named Operation Kingfish, called for agents to lure Vesco into an aircraft, fake engine trouble and make an emergency landing on U.S. soil where other agents would arrest him, the report said. A second plan reportedly called for drugging Vesco and fly-ing him to the U.S.

The FBI's charter forbids the organization from operating outside the United States.

The copyright report, written by reporter Bob Collins, was published in Saturday's editions of the Courier-Post of Camden. Much of the newspaper's report was based on acounts from FBI gents and

named sources. The Courier-Post con-

ducted a six-week investigation that included undercover meetings in the Bahamas and southern Florida with FBI agents. The newspaper said Collins managed to set himself up as an FBI informer to find out details of the alleged plan.

Vesco, 44, is wanted on charges he allegedly defrauded the Overseas Investors Service of \$224 million and attempted to make an illegal \$200,000 contribution to Richard Nixon's 1972 presidential campaign. Vesco has been living in exile in Central America, Costa Rica, and the Bahamas for 10 years.

In 1973 the U.S. government sought unsuccessfully to extradite Vesco from the Bahamas.

**Operation Kingfish** was planned in the FBI's Miami bureau, the newspaper said. Allegedly involved were about 11 agents in the Miami bureau.

FBI agents allegedly worked with Canadian intelligence agents to plant two pilots on Vesco's staff to fake engine trouble and land in Florida, the report said.

Tom Stewart. spokesman for the U.S. Justice Department, re-fused Friday to discuss the alleged operation with the newspaper. An FBI spokesman in Washington, who asked not to be identified, had no comment on the story Saturday.

The Bahamian govern-ment was not informed of the plan, the report said. American Ambassador to the Bahamas William B. Schwartz Jr. said by phone that he had never heard of Operation Kingfish.

Vesco, reached by telephone Friday, said he had "no knowledge of the plot," the newspaper said. Later Friday night, however, a man who identified himself as Vesco called the Courier-Post to say that he had since confirmed the existence of Operation King-

The newspaper alleged that much of the work on Operation Kingfish was done by two FBI undercover agents posing as

# Connecticut's Harriman quadruplets keep mother running

### **By ELAINE HOOKER**

EAST HARTFORD, Conn. (AP) -This mom is one in a million.

Actually, she's closer to one in a one-half to three-quarters million because those are the chances of having quadruplets. But who could quibble over numbers on Mother's Day after watching Diane Harriman run after toddlers Matthew, Peter, Craig and Daniel

"It's been a different life than I probably would have chosen, but I wouldn't change it for anything. I've grown a lot," Mrs. Harriman said.

Her day starts at 6 a.m., when the quadruplets and their older brother, 4-year-old Andrew, are awake but not yet out of their beds. She slips downstairs for breakfast and the few minutes of quiet she will have all day.

"I've recently taken up jogging. I do not intend to be a marathon run-ner" like Linda Schreiber of Greenwich, who began running nearly six years ago to get away from her 18-month-old quadruplets and who re-cently published a book on running. "It gets me out alone for 20 mi-

nutes," said 32-year-old Mrs. Harriman. Otherwise she frequently goes from Monday through Friday without getting out of the house. There are about 80 sets of quadru-

plets in the country, she said. By 8 a.m. the children are fed and in their playroom, and Mrs. Harriman begins her day-long chores of doing laundry, changing diapers, feeding,

mopping up and acting as referee to five boys who punch, kick, pull hair, scream and generally raise a ruckus.

"Everyone says the twos are terri-ble. I like this age," she said. The quads will be 2 years old June 12, and one of them already has begun having the tantrums that characterize "The Terrible Twos."

But compare it to months gone by and it might seem like fun. When the quads came home from the hospital one feeding was begun every 45 mi-nutes around the clock. They were about nine weeks' premature and needed frequent feedings.

Or in March when everyone, including Mother, had a 24-hour virus that caused vomiting. Or the day when the

dog made a mess in the playroom and four youngsters spread it all over themselves and the walls.

Or the time last year when they'd been in their new house for three days and everyone, including the teen-ager who came along to help unpack, came

down with strep throat. In Marshfield, Mass., where they had lived, volunteers from their church helped nearly all day. In East Hartford they haven't had time to go to church, because "10 a.m. is such a chaotic time around here."

Mrs. Harriman tried to take care of the house and the children by herself for about four months after they moved to East Hartford, but finally they "went into debt" to have the teen-ager live with them for a few

months. Now Mrs. Harriman man-ages with the help of a 14-year-old neighbor who stays from 4 p.m.: to 6 p.m. each day.

"I go on these kicks. I feel as though I'm not doing a good enough job as a mother. I think they should all get bedtime stories like Andrew did." But she said she realizes there's only so much one person can do.

The children eat supper at 5 p.m. and are into bed by 6: 30 or 7, about the time her husband, Bill, gets home from his job as a manager for National Semiconductor Corp. Then she fixes another dinner so the two of them can spend some time alone.

"There's no time for each other any more. There's not enough written on the emotional impact of multiple

births...the stress it puts on a mar-

riage," she said. Before the children, Mrs. Harriman was a nurse, a job which has helped her keep a routine of nearly military precision. She and her husband used to go away weekends and do a lot of camping. Now they don't even celebrate holi-

days.

But for Mother's Day she's hoping for a break. Her dream: "I'm hoping to get a cup of tea in bed."

your money promptly, courteously.

# 'This is a test,'. . but it could be doomsday

### By NORMAN BLACK

WASHINGTON (AP) — In 1971, a mistake activated the nationwide **Emergency Broadcast System for** the first and only time.

It was not a deliberate test; yet half the nation's broadcast stations ignored the EBS signal and continued

normal programming. Nearly everybody is familiar with the EBS test announcement: "This is only a test. For the next 60 seconds. this station will be conducting a test of the Emergency Broadcast System. In the event of an actual emergency

In the event of an actual emergency - meaning nuclear war - Americans would depend upon EBS for instruction as well as information.

Few realize, however, that: -The EBS is a totally voluntary

system among broadcasters. -It is not designed to provide the first warning of a nuclear attack or

other grave national emergency. -There is no guarantee a president would have the time or inclination to activate EBS, and only the president can activate the system nationally.

The EBS should not be confused with the National Warning System, a network of interconnected phone lines to public officials across the nation who would be responsible for setting off air raid sirens.

The National Warning System is controlled from the North American Air Defense Command (NORAD) headquarters at Chevenne N Colo. If Soviet missles are detected, the system is automatically activated even as the president is notified. Although there is no guarantee, most emergency planning officials think the president would then want to activate the EBS and speak directly to the public. "The EBS has one purpose: to allow the president of the United States to address the American people on very short notice," says Raymond W. Seddon, whose office at the Federal Communications Commission oversees technical arrangements for the system.

aide contacts a control center. The rest of the process, though, works like this:

At the control center, an employee of the Federal Emergency Management Agency (FEMA) activates a special teletype network connecting 27 points, including major networks and the Bell system, sending a message declaring an alert.

He then picks up a special phone connecting him with the two major wire services, The Associated Press and United Press International, providing verbal confirmation of the alert. The phone hookup stems from the false alert that went out over the wires in February 1971. Since then, broadcasters, the news networks and the AP and UPI have been provided with special red envelopes containing code words, known as "authenticators." If the networks and wire services receive an action alert without the right authenticators, the message is considered false. Likewise, if an alert hits the wires without the proper code words, individual broadcasters are supposed to ignore it.

Once an alert is authenticated, it is up to the networks and individual radio and TV stations to complete the hookup, broadcast the EBS two-tone alert signal and ask the public to stand by.

From this point on, the system's operation depends on "what cities are still around," says Seddon.

If Washington remains on the map, the FEMA officer feeds the presito a special switching center at WTOP-AM in Washington, which connects all the networks so they receive the broadcast simultaneously. If the facilities in Washington are not available, EBS falls back on a similar switching plant in Harrisburg, Pa. If that's not working, the "last resort" calls for the control center to use any one of Bell Tele-phone's major switching centers to reach the networks. The president's message then goes out over the networks to their sub-scribing stations, which must make sure it is goes directly onto the air. Seddon estimates 6,700 of the country's 8,700 radio stations would be reached simultaneously through the networks. Stations which are not affiliated with any network would have to listen to a special monitoring device required by the FCC. That device is tuned to a "primary" radio station. affiliated with a network, and the independent station must relay the president's message. The 3 percent of the stations which have refused to join EBS are required to go off the air. Most of the non-joiners are college stations or small operation s limited to day-time broadcast-The Emergency Broadcast System is tested at least every three months and most federal officials are convinced that for the forseeable future it is the fastest way to deliver emergency information directly to the public. That has been proven, the officials say, by the increasing use of the system by state and local officials during times of natural disaster more than 1,200 times last year.

It would take at least 8 minutes, and perhaps as long as 14 minutes, before the president has an open mike to the nation.

Television stations would display a special slide while broadcasting the president's emergency message.

There are four priorities for the use of EBS, and the second priority behind "presidential" is "local" - the broadcasting by local emergency officials of what to do and where to go. But how does it work nationally?

What has to happen for the public to hear the president?

Wherever the president goes, he is accompanied by a military aide carrying the "button" for the U.S. nuclear arsenal. With him is a communications specialist who would take the first crucial step of getting through to of two government control

points.

The primary control point is at a classified location outside Washington; the backup is at NORAD. Officials are understandably reluctant to discuss exactly how the president's

# Small Caribbean country reported busily selling U.S. visas to Iranians

LOS ANGELES (AP) - The tiny Caribbean country of Dominica reportedly has been warned by U.S. officials to stop selling \$10,000 citizenship-passport packages to Iranians in the United States trying to avoid deportation.

But the Los Angeles-based company that is the sales agent for the packages apparently has not heeded the week-old order, the Los Angeles Times reported in its Saturday editions.

Iranians are promised that they will not have to leave the United States as a result of severed diplomatic relations with Iran if they hold Dominica citizenship, which is vir-tually guaranteed with the package, the report said.

Dominica officials signed an agreement with Intercontinental Development Management in February for help in development and in effect gave the concern a franchise to sell Dominica citizenship and passports, a State Department spokesman said Saturday. The company also got the right to set up a secret Swiss-style bank account on the island, the spokesman said. The State Department said Saturday it was investigating the matter.

Prime Minister J. Oliver Seraphin was told personally last week by State Department officials in Washington that the U.S. government would no longer tolerate the practice, the newspaper said.

Oliver apparently was informed that such passports would not be hon-ored in this country, the Times said. Ronald A. Louden, identified as president of Intercontinental, refused to discuss the business with reporters, the Times said.

Louden reportedly met with Oliver when the prime minister flew to Los Angeles after the Washington meet-

A nonprofit watchdog agency, the Council of Hemispheric Affairs, told the newspaper that a staff member that asked the company about the visas Friday for a fictitious Iranian friend was told the passport could be obtained by mail if the applicant enclosed a photostat of his birth certificate, two photographs and the \$10,-000.

The Canadian rock group Triumph will perform in concert tonight at 8:30 at Chaparral Center. Tickets are \$8.50 at the door. The show includes special effects which have been magnified since the group's appearance last year in Midland. Also appearing will be UFO, a British rock group. Jackson Highway, in its first Texas concert, completes the evening's entertainment.

# Symphony season ends; Floyd Cramer opens new season

The Midland-Odessa Symphony and Chorale will draw the 1979-80 performing season to a close this Tuesday at 8 p.m. at Lee High with a preview of next season's offerings.

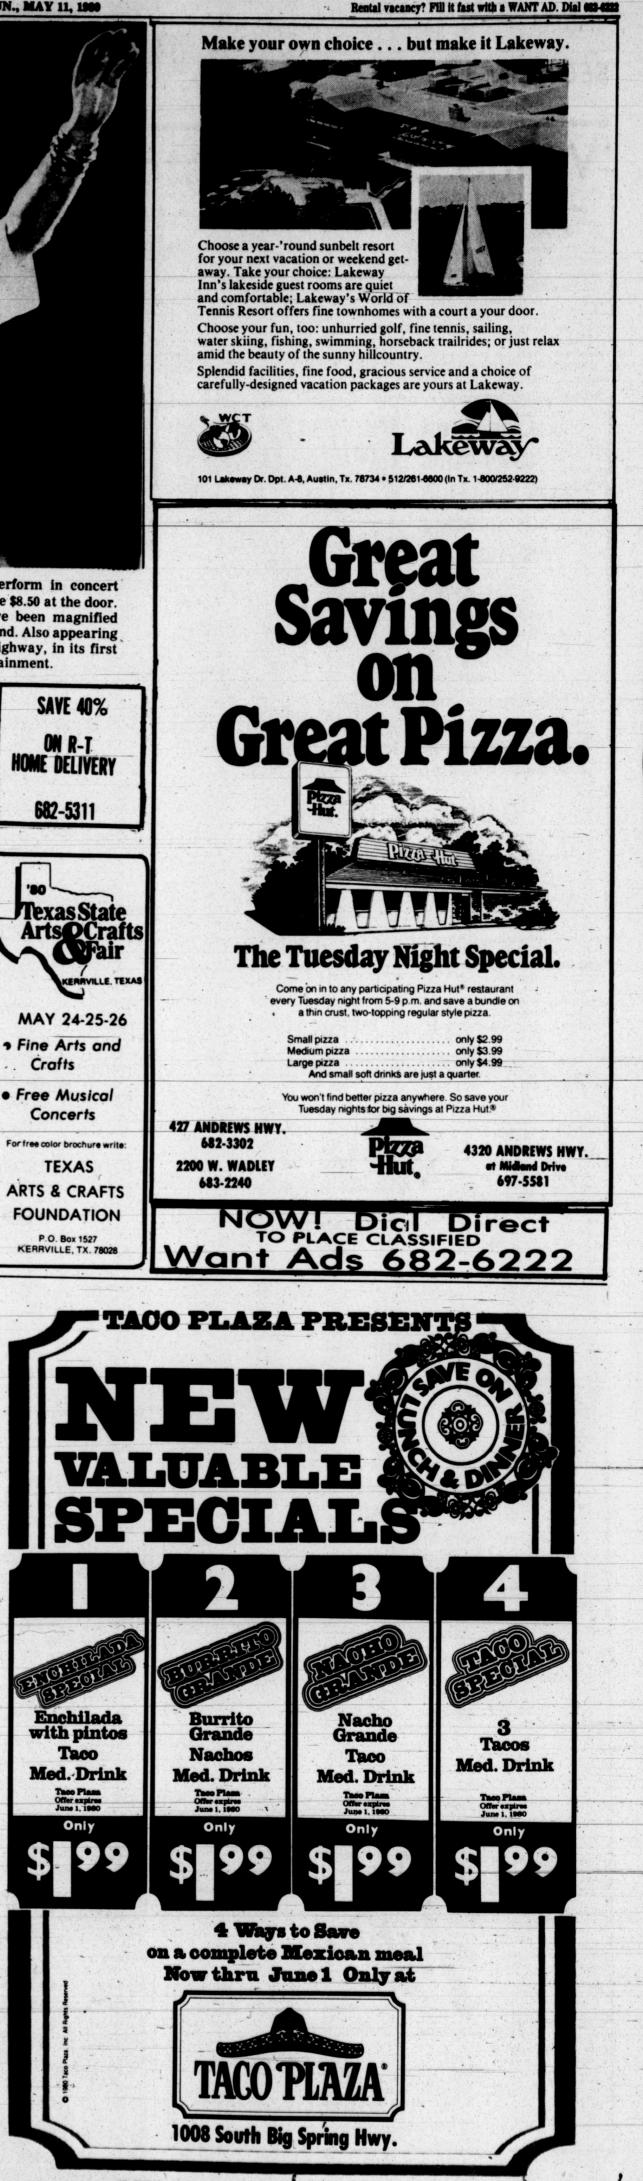

Ticket renewal notices have already gone out and special forms will be placed in the subscription concert programs. Midland Symphony Guild members will be standing by in a special "renewal" booth at the concert.

Opening the 1980-81 season will be "soft country" planist Floyd Cramer. Bringing over 40 gold record hits with him, Cramer launches the season Oct. 6-7 for subscription concert ticket holders only.

European pianist Marta Deyanova, in the midst of her second American tour, will perform the ever popular Rachmaninoff "Concerto No. 3." The Christmas concert will be a special concert

treat for the whole family. Continuing the season in February will be a special

performance by cellist Adolfo Odnoposoff. This will mark his first appearance with the Midland-Odessa-Symphony Orchestra.

fabulous ports-of-call. Dance in the moonlight. Swing in the discotheque. Try your luck in our casino. Lie bronzing by one of the pools. Or kiss your diet goodbye

and eat like there's no tomorrow—with eight delicious meals and snacks a day, it's easy to do. It's no wonder people love us. On the "Fun Ships". we'll give you the kind of vacation you've been dreaming about. And, enroute to Florida, you will experience a touch of class on Continental's roomy golden jets. All flights offer a choice of top-notch stereo entertainment.

### Weekly Miami Departures:

FESTIVALE departs Saturdays for St. Maarten and St. Thomas CARNIVALE departs Sundays for Samana, San Juan and St. Croix MARDI GRAS departs Sundays for Nassau, San Juan and St. Thomas

Season tickets can be purchased at the 8 p.m. concert or mailed in, using the form and envelope provided at the concert.

Individual tickets for the final concert may be purchased at the door Tuesday.

# Art department announces scholarships are available.

The Midland College Department of Dramatic Arts has announced the availability of two theatre scholarships for the 1980-81 academic year, plus a new play production course this summer designed particularly for high school drama coaches.

High school graduates, who declare as theatre majors, may apply for the two scholarships, starting with the 1980 fall semester. Each scholarship will pay for tuition, fees and books for two semesters and may be renewed for a second year at Midland College.

Students enrolled in the dramatic arts program must agree to spend at least 12 hours each week working at Theatre Midland. Additional college credit will be given for the theatre work. Students must also maintain an overall B average and receive a positive recommendation from theatre faculty in order to renew the scholarship for the second year.

Additional information may be obtained by writing Jerry Watson, Director of Academic Theatre, Midland College, 3600 N. Garfield St., Midland 79701.

### Big Spring sponsors symphony

BIG SPRING — The Big Spring Area Chamber of Commerce and the Texas Commission on the Arts are sponsoring the 7:30 p.m. Thursday appearance at Big Spring High School by the Midland-Odessa Symphony and Chorale.

The concert will feature the concert version of George Gershwin's opera, "Porgy and Bess." Guest artists Bessie Hunter and William Drake will sing the title roles.

# The Midland story: an exciting one

EDITOR'S NOTE: William H. "Bill" Collyns, editor emeritus of The Midland Reporter-Telegram, recently spoke to Friends of the Library on the subject "Midland Historical Highlights." The fol-lowing is from his address.

#### By WILLIAM H. "BILL" COLLYNS

"Midland Historical Highlights - Economical, Cultural and Otherwise.'

That's quite a subject to cover in a very few minutes, but I hope my observations will be of some interest to you. I know that several of you good people out there are quite familiar with Midland history, and I know also that when one writes on the history of any given area, he is bound to meet with some differences of opinion.

The late Col. John Perkins, years ago, after reading an article I had written on the history of "Men of the First Presbyterian Church," remarked: "Well, I see that you never let facts stand in the way of a good story." But he didn't change a single word. I hope that you historians out there will accept my story in the same spirit. The Midland story, looking back, is an exciting one.

First off, I would say that the creation and launching of this particular series of meetings by Friends of from 1910 to 1923, when the big drought of the 1920s the Library surely must be considered a historical highlight, and I commend the sponsors for taking the lead in this regard. Most of you undoubtedly have heard and read about one Lum Medlin, and in reviewing the historical highlights of Midland, Lum Medlin cannot be overlooked.

active in his day. He is said to have been the first settler in what is now the Tall City of Midland ... "The Oil, Livestock and Financial Center of the Permian Basin Empire of West Texas and Southeast New Mexico" and/or "The Most Am- Midland Livestock Reporter, which started publicabitious City Between the Oceans" as Midland was heralded back in the 1930s and early 1940s.

For a number of years prior to the 1880s, Lum begin Medlin roamed this part of the plains country, killing Midla antelope for jerkin, and gathering and stacking gram. buffalo bones for shipment by wagon to markets in the Chicago area. Lum didn't have too much company in those days, except for a wandering Indian now and then. But, in the early 1880s, Lum Medlin had company, which came to stay. A sheepman by the name of H.N. Garrett brought a

flock of sheep here from California, grazing them on what is now the Town Section - Midland, in the Land highlight. of the High Sky. He camped where the Oil & Gas Building now is located.

The paths of Lum Medlin and H.N. Garrett soon crossed...and then and there Midland's population the first and most important accomplishments of the was doubled for the first time. This has to be years when the automobile was coming into its own. the very first historical highlight. With the coming to That wasn't an easy assignment by any means -Midland of Garrett's family, the community soon competition was keen - both from the north and became too crowded for Lum, who possibly broa- south - Lamesa, Fort Stockton and San Angelo, for dened his area of operations. Anyway, the records example, but Midlanders met the challenge, another are very sketchy on him until this brief article real high point in the development of the city. concerning him appeared in the April 23, 1898, issue

through West Texas.

A RAILROAD BOXCAR was set off here, serving as a depot, post office and general store. This then prior to World War I, which operated until 1924 when

be something special.

More and more settlers - ranchers and farmers mainly - followed the initial pioneers, and it wasn't long until Midland was the recognized supply center and the ranching and financial headquarters for a wide area of West Texas and New Mexico. The organization of The First National Bank in

890 has to be considered as another historical highlight. The Midland National came a few years later. Deposits reached \$5 million.

Federal aid was unheard of in those early days, or if it was, Midlanders didn't seek it - much the same as Midlanders of today. Those early pioneers erected the city's first school building by voluntary subscription — and financed its operation in the same manner. They also provided other public facilities and a great city was in the making.

Although there is some controversy on this subject, it is believed that the Methodists were the first to organize a congregation and erect a church building here, in the latter part of 1885. Another historical highlight. The Presbyterians were second and the Baptists were third. The Christian Church soon followed.

**MIDLAND CHRISTIAN** College functioned here finally was responsible for its closing. It it could have lasted just another 10 years... It is noteworthy that schools and churches came

first insofar as the early settlers were concerned and this situation yet holds.

Although sheep came to the Midland region first, cattle soon followed, with John Scharbauer bringing LUM MEDLIN isn't fiction. He was real, alive and the first purebred Hereford cattle to Midland shortly before the turn of the century.

A number of weekly newspapers, such as the Eye-Opener, The Gazette, The Gusher nd others, were published here in the early years, but it was the tion in the early 1890s, which was the forerunner of The Midland Reporter-Telegram, which dates its beginning from March 1929, with the merger of The Midland Daily Reporter and The Midland Daily Tele-

Radio first came in the late 1930s and TV in the

THE FOUNDING of the Midland library in 1903 by interested women of the community is an excellent example - and another historical highlight. The erection of the adjacent library building is another

The routing of the old Bankhead Highway, State No. 1, U.S. 80 (the Broadway of America) through Midland in the late teens and early 1920s was one of

Midland had a trunkline railroad and a through of the Midland Reporter: under the heading, "The highway reaching from coast-to-coast — and then Grave." "Lum Medlin is no more. He died of airplanes began to fly overhead. Again Midland pneumonia yesterday and was buried in the city leadership exerted itself, and this city was one of the cemetery. He refused medical aid. His family and very first in this great region to boast an improved friends mour his loss. No particulars." airport — Sloan Field, established by the late Anyway, word of and about the new frontier town Sam Sloan in 1928. It occupied a small part of what is of Midland soon spread far and wide - and settlers today's Midland Regional Airport. Midland had began arriving here from all over, following the commercial airline service for a brief period in Texas & Pacific Railroad, which then was building 1929-30, but then was without such service until 1929-30, but then was without such service until Continental Airlines inaugurated its service here in 1944 — another highlight.

merce, the organization or which was another significant highlight. It can and should be pointed out that the chamber has taken the lead in practically every growth and development project here since that time.

OIL CAME to West Texas in commercial quantities in the early 1920s, and, as a result of the planning and effort of community leaders, Midland soon became the Business Headquarters City of the Permian Basin, a position which has been expanded and further cemented through the years. Office buildings were needed to house the oil companies locating here. Dr. John B. Thomas erected a six-story office building hospital, and Sen. T.S. Hogan erected the stately 12-story Petroleum Building, which observed the 50th anniversary of its formal opening last July 4. Clarence Scharbauer Sr. erected Hotel Scharbauer, West Texas' finest, to take the pressure off of the old Llano Hotel, an early day landmark. Gulf was the first oil company to establish a district office here, after the late M.C. Ulmer, president of The First National Bank, had agreed to build or have built a half-dozen houses for Gulf employees.

And, in 1935, following the depression years and the East Texas oil boom, came one of the greatest cooperative efforts ever. After inducing Humble Oil Refining Co. to move its West Texas division offices here from McCamey, Midland businessmen banded together to purchase and move houses from the Humble Camp at McCamey to Midland for company employees being transferred here. I happened to be one of the persons involved in the transfer - 45 years ago now.

This move definitely was a historic highlight.

home's age is that items like heating equipment, air This should give you the conditioning, and other date the house was built within one year. That is, of course, if the bathroom major items may need replacing as they age. has not been remodeled

Pete Ellis for his support over the years, and The Midland Reporter-Telegram

The new town first was known as Midway, but when it was discovered that Texas already had a Midway, the named was changed to Midland, named for its halfway distance between Fort Worth and El Paso.

Water was hauled from Monahans before commu-nity wells were dug and Midland water was made available to the public. The first well dug by hand was located near the instersection of Iowa (now Wall) and Baird Streets, where the Federal Courthouse now is located. This was the initial display of civic enterprise and citizen cooperation in Mid-land...a public water well...the first public utility. Another historical highlight. Other wells were dug at Main and Wall and Main and Texas streets.

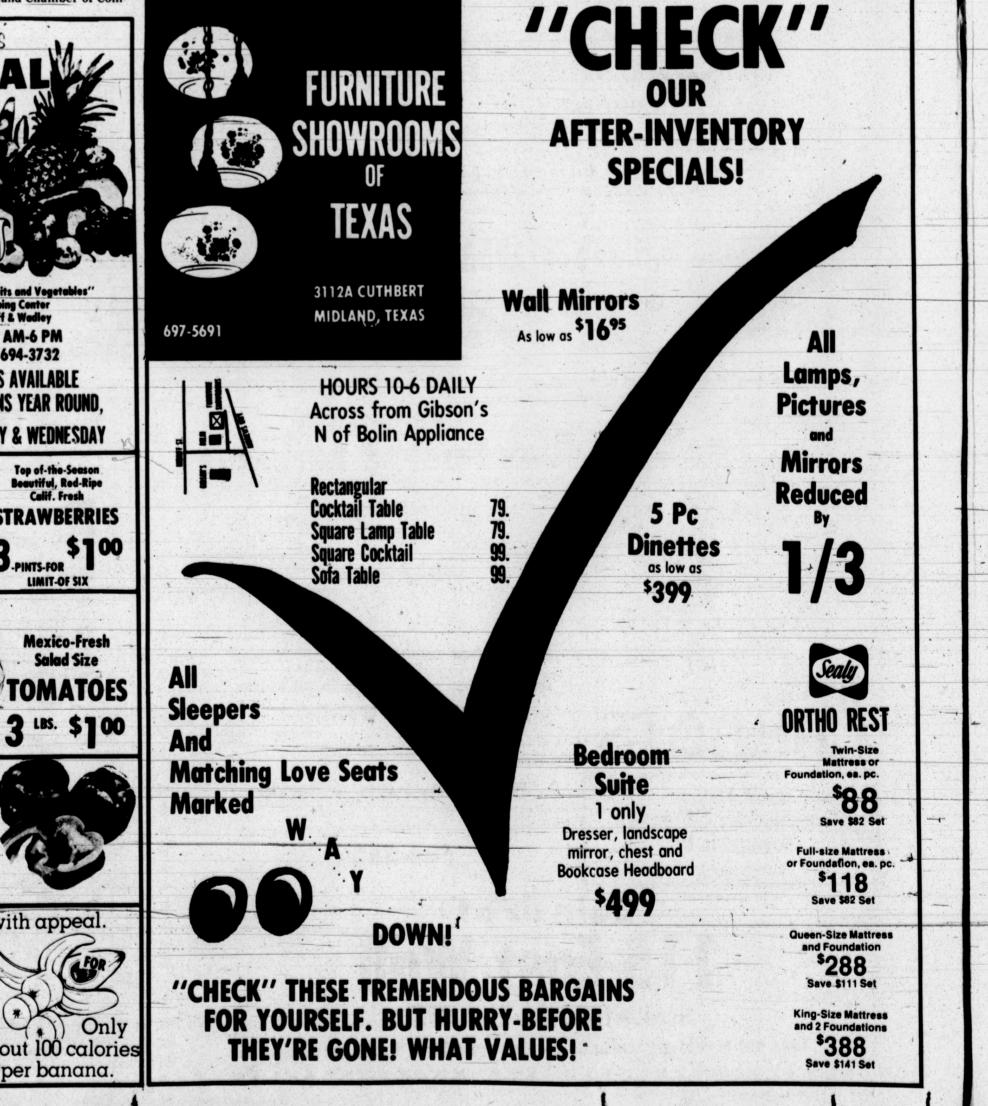

The area first was billed as a great farming region and the T&P Railroad brought trainloads of people here from other parts of the nation, hoping that some would stay. Some did...at least until the first extended drought.

It is interesting to note that a petition dated Feb. 2, 1885, and signed by 43 residents of Midland requested the state legislature to continue the frontier military force protecting the area, and to increase the num-ber, if possible. Remember, that was less than 100 years ago. The petition was presented just 26 days before Midland County was created, carved out of Tom Green County. The City of Midland came into being shortly after the county was organized. Two more historical highlights.

AND GREAT THINGS have been happening here since those 1885 occurrences. We are looking forward to the 1985 Centennial Observance. It really should

### **RINGING THE BELL**

# The black experience and police misconduct

An important price rollback

### THE MIDLAND REPORTER-TELEGRAM, SUN., MAY 11, 1980

#### With BOB TIEUEL

In a recent long distance telephone conversation with bellringer sources in Dallas, it was revealed that there has been a rash of police killings of blacks in the last several months. These same sources report that the. U.S. Commission on Civil Rights will be requested to investigate complaints of racial discrimination in police services, police conduct and unwarranted use of deadlu force by policemen. Ironically, some of the policemen charged in Dallas are blacks.

In the meantime, the U.S. Department of Justice recently signed an unprecedented agreement with Memphis, Tenn., under which the city's police department pledged thorough investigation of police misconduct

charges and strict adherence to a new policy limiting the use of firearms. U.S. Atty. Gen. Benjamin Civiletti said the agreement followed 12 months of investigation.

In the department's other investigation of citywide police brutality charges, Civiletti has said that the government decided to take no action against Houston's police force, which had charges of misconduct leveled by some black and brown leaders there. And in Philadelphia the Justice De-partment has filed an appeal with the U.S. 3rd Circuit Court of Appeals at Philadelphia after the police department there refused to negotiate when the Justice Depaetment filed a suit that was dismissed.

In Dallas a big effort has been launched to secure more black officers to cope with a rising tide of black

and brown crime, but some leaders say that efforts so far have not been very fruitful.

CHIMES: Midland, the Permian Basin and many other parts of the country will not soon forget the Alli-sons. Helon Allison, 75, recently passed following the death of her husband, James N. Allison, publisher of the Midland Reporter-Telegram until he died in 1975. Then James N. Allison Jr. took over until his recent death from cancer. Mrs. Allison donated \$2 million for the Allison Per-mian Basin Cancer Therapy Center, \$750,000 to Midland College for a chair of journalism, \$150,000 to the Midland Memorial Foundation and gifts to other charities. Long live the Allison

spirit! HAITI is the poorest nation in the

Western Hemisphere, the only one in the Americas on the U.N. list of un-derdeveloped countries. The average annual income for the country is about \$150 per household. Like the Cubans, they are crying to come in.

#### By PATSY GORDON Lifestyle Writer

He is sad as he tries to discriminate sizes to get them on a graduated peg correct.

His sadness quickly reverts to a smile as he succeeds at stacking his pegs.

Mitchell Brookshire is practicing hand-to-eye coordination in the Infant Stimulation Program held at the Opportunity Center and sponsored by the Permian Basin Community Centers for Mental Health-Mental Retardation. What is Infant Stimulation?

It is a special education program intended to cultivate and nurture little lives from their beginning. It serves both parents and their children in a training program designed to add to parental skills in teaching children within the home.

Early identification and intervention of all children having any of the following disabilities is provided: speech or language deficit, physical disability, hearing impairment, mental retardation, visual impairment, emotional disturbance, developmental delay and any other condition that may be considered high risk.

Who is eligible for infant stimulation?

SECTION

Children from birth to those whose third birthday falls after Sept. 1 of the school year and who show signs of developmental delay are eligible for the program.

Goals of the program also include making parents aware of the services offered by state and community agencies.

These babies might be those who are not walking at 18 months, not saying "mama" or "dada" at 10 months, unwilling to suck a bottle at 6 months, who never cry or do not recognize their parents voices.

A similar program in Odessa serves Ector County residents.

Elaine Hudson has been infant stimulation coordinator in Midland since January. The Odessa program is coordinated by Kathye Wallace.

"We work basically in the areas of cognitive development, social development, self-help skills — basic development skills," said Ms. Hudson, who has a bachelor's degree in psychology.

Ms. Hudson also has worked three-and-one-half years at a day care center with children ages birth to three years.

"We work with any children who have any kind of developmental delay, suspected of having a developmental delay, born in high risk area or have more than just one characteristic of high risk. You can generally look to see if there will be a delay somewhere along the line," said Ms. Wallace.

"If we get them early, it's easy to maximize their potential," she added.

Ms. Wallace came to Midland once a week to work with the kids in the program before Ms: Hudson arrived. She has a bachelors degree in

psychology and some hours toward a master's. "I worked years ago as a volunteer in Abilene with the West Texas Rehabilitation Center."

Ms. Wallace also has some practical experience with children with developmental disabilities. "I had a cousin who was severely brain damaged at age 2."

Neither Ms. Wallace nor Ms. Hudson have special education endorsement, and because they are not certified therapists, some of the children are being worked with at the Cerebral Palsy Center in its physical and occupational therapy departments.

Most of the children in the program also are in day care at the Opportunity Center.

The Infant Stimulation program is funded by the Texas Education Agency. "We receive \$28,000 a year from TEA to cover salaries. It is not set up to cover equipment needed. Most of the toys we use are donated by parents who have kids who have outgrown early development toys," explained Ms. Wallace.

Ms. Hudson, who has 11 children in her program and is thinking of adding more, works with the children in the home approximately 1 to 1½ hours a week to "see what they have accomplished so far and to determine where they need to be going," she revealed.

According to Mrs. Wallace, "We are basically parent-training-referral; more so than just infant stimulation. It's up to the parents to do the work. We're just there to help them. If they need services from any other agency then we try to know what services are available and who to direct them to so that they can get these needed services.

"Anyone that comes into our program that has a condition generally associated with being a genetic condition, we refer them to the genetic screening service in Lubbock. They can go there for no charge for screening and counseling."

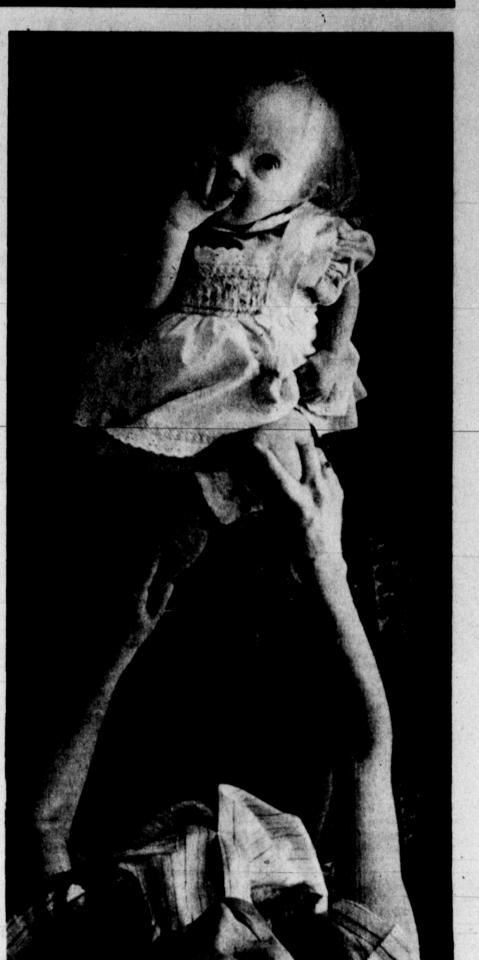

Ms. Wallace pointed out that an individualized program plan for each of the children is written every 90 days. "We also have to write short-term goals for them. It's these goals that setup what we do with the children. These goals are evaluated to see if the children progress and how much and go from that to new goals."

Kevin Wells' mother, Ann Wells, has much praise for the program. "I think it's really fantastic. It gives us ideas about what to do for our kids to help them gain their potentials that we'd never think of. They help us in other ways by referring us to other agencies. They care about the kids. That's the main thing.

"I started in this program when Kevin," a Down's Syndrome child with a congenital heart condition, "was about 9 or 10-months-old. He had to go over to Odessa at the time. There was no infant stimulation program here, but when they found out there was an interest in Midland, they tried to get one here and did a short time later."

She found out about that Kevin was a Down's Syndrome child when she went to Dallas for a checkup on his heart. "They referred me there to the Permian Basin Rehabilitation Center which referred me to Permian Basin Community Centers for Mental Health and Retardation.

"The earlier that anyone can get their child in to the Infant Stimulator program the better it is. The parents in this group can help them get over

# 'A prayer for mamma' a year-round voice

#### By ABIGAIL VAN BUREN

PAGE 2E

DEAR ABBY: I am a long-time reader but have never written before. I am enclosing a part of your column that I have kept in my Bible for years. As you can see, it is yellowed and shredded and half of it is missing. I don't know how many hundreds of times I have read it. It gave me such a feeling of peace and comfort. It was titled, "A Prayer for Mamma."

Will you please print it again? I would love to have another copy. Thank you. — DOROTHY L.

DEAR DOROTHY: With pleasure: DEAR ABBY: My beloved mother passed away recently, so I called the minister and asked him for the wording of a prayer I could say for my mother, and he said, "I'm too busy and a lot of good prayer will do her now!" You see, Mamma went to church long ago, but my father never liked to go, so Mamma finally quit going. Abby, I can't believe that heaven is open only to church members.

I've called all the bookstores in

town and they say there aren't any prayers for the dead in any of the prayerbooks they have. I've heard there are places where you send a few dollars and they pray for the dead. but I don't know their addresses. Abby, I'd be so grateful if you would print a short prayer I could say for my mother before I go to sleep. Any faith is acceptable. I can't let you send it to my home because my father looks over the mail first and I'm sure I'd never get it. Please don't turn down my odd request. It means the world to me. Thank you, and God bless you, Abby. Sign me - A PRAYER FOR MAMMA

DEAR PRAYER: I found this prayer in my Union Prayer Book. It is the one Jews recite on Yom Kippur (the Day of Atonement) to honor the memory of a deceased mother: In Memory of a Mother I remember thee in this solemn hour, my dear mother. I remember the days when thou didst dwell on earth, and thy tender love watched over me like a guardian angel. Thou hast gone from me, but the bond which unites Our souls can never be severed; thine image lives within my heart. May the merciful Father reward thee for the faithfulness and kindness thou has ever shown me; may He lift up the light of His countenance upon thee, and grant thee eternal peace! Amen.

DEAR ABBY: I can't believe it's Mother's Day again. With every passing year the holidays seem to come closer together.

Abby, I wish you'd find space in your column to remind young married women to remember their mothers-in-law — even if it's only a card. There were so many years when I should have remembered my motherin-law on Mother's Day, but I never did.

This year I sent her flowers — to the cemetery, bitterly regretting that I had never sent her flowers while she was able to enjoy them.

I should have been more attentive to her, written her more about her grandchildren whom she loved so much.

# New Leukemia therapy effective but costly

BOSTON (AP) — Large doses of drugs, radiation and bone marrow transplants can produce long-term remission of leukemia, an often-fatal form of cancer, a study shows.

and a second and the second and the second s

The researchers said the combination is the preferred way to "attempt to produce a cure in adults with all forms of acute leukemia."

The study, conducted at the City of Hope National Medical Center in Duarte, Calif., was published in today's New England Journal of Medicine. However, a second study in the same edition cautioned that the blood transfusions that are part of this and other leukemia therapies are extremely expensive.

"It is clear from current results that the potential to control one of the most malignant diseases exists." Dr. Emil Freireich of Anderson Hospital and Tumor Institute in Houston wrote in an accompanying editorial. "It is certain that the potential for benefit now approaches anyone's criteria for 'cure."

In the California study, 33 persons with acute leukemia received total body radiation, high doses of chemotherapy and bone marrow transplants.

Fifteen of the patients had acute lymphoblastic leukemia, a disease of children and young adults; 18 had acute myeloblastic leukemia, a cancer that strikes people of all ages. Of 10 people who were in complete

of 10 people who were in complete remission, seven were still alive without maintenance therapy at the end of the follow-up period eight to 35 months later. Another 11 were in partial remission during the transplants, and six of these people were still alive eight to 33 months later. But of 12 who had failed to respond to earlier drug treatment, only one survived for 10 months.

Ordinarily, leukemia victims live for about a year after they achieve initial remission, doctors say.

The California doctors noted the transplants alone cost an average of \$46,963, running up to \$60,086. The other study by doctors at the Puget Sound Blood Center in Seattle noted that transfusions eliminate between half and three-quarters of the deaths caused by infections in leukemia patients who have chemothera-

The doctors calculated the cost-effectiveness of the transfusions assuming that patients have standard treatment, but not marrow transplants. They determined the blood treatments add about a month to people's lives. Often the transfusions are given only after the patients develop infections, and the blood adds \$1,648 to their hospital bills. The patients usually die quickly,

and the doctors figured each extra year of life the transfusions provide costs \$14,982. Nationally, the blood would cost \$18 million a year, they estimated.

2

The second

The following article is the first of two on a visit to New York City.

### By CAROLYN FITZ-GERALD

Katie Heck and I were comparing tickets on a 9:30 a.m. flight to New York City. 'I've got the cheapest possible fare," I said, showing her my \$323 Braniff Super Saver. "Not so," we countered, producing her transfer-to-American-in-Dallas and on to La Guardia ticket.

As it turned out, she was the jealous one since I had only to change planes, not terminals, with the added bonus of arriving 45 minutes earlier than she. Was it worth the extra few dollars to fly one airline all the way? Yes. And I kind of liked the leisurely 1 1/2 hour layover at DFW which enabled me to buy a "New York Times" at the newsstand and look over the latest paperbacks (Reader's World, we miss you.)

It is possible, of course, to travel for

more. I have a well-traveled friend who goes as cheaply as posible inter-nationally when she is likely to arrive grubby anyway after a lengthy flight but she always buys a first-class ticket to New York. "That three hours of luxury that allows me to arrive feeling like a pampered lady is not ac-countable in dollers," she says.

Either way, if you schedule your flight into La Guardia you can hop a cab before 5 p.m. New York time and be in midtown Manhatten in time to make an 8 p.m. curtain at the theatre district. But don't plan on making a Sunday night performance. After the 3 p.m. Sunday matinees, that's it for most plays, often until Tuesday night.

Since I did arrive on a Sunday night, what to do on New York's deadest night? I had already thoroughly read all of those little notes on the Times amusement page, seaching for benefits or other onetime performances which often occur only on Sunday. I had narrowed my choice to a dance recital or a benefit by Marvin Hamlisch of "The Sting" and other movie themes fame. Not

much of a choice, really, as the Hamlisch concert at Carnegie Hall was sold out. But I didn't let that stop me from my first choice as there was a 30-minute time difference between the performances and I could always take second best within walking distance if Hamlisch didn't work out.

5m

Arriving just a few minutes before the conert, I was able to get the ticket from a hungry music student who only charged me double (\$12 in this case) for a 'balcony' seat, he said. And with that purchase I got my first lesson in the difference between balcony and mezzanine. In New York, balcony is at a height somewhere around the upper reaches of the Matterhorn, while mezzanine is that second overhanging the first floor. I could barely see Marvin Hamlisch, but he played the piano beautifully and the Carnegie sound system was perfect.

Hamlisch even composed some songs on stage from titles called out by the audience. Too bad, "Will You Marry Me", came from a girl who was even farther up above me. He wasn't able to hear her, loud and

sincere as she was.

After the concert, I moved with the crowd to the Russian Tea Room, a moderately expensive celebrity hangout famous for its borscht, super-fattening desserts and a wide array of Jewish and Russian food. The celebrities were there all right, but it had been so long since I had been in the presence of any, all I could do was recognize the faces. Newscaster Harry Reasoner was the only name I could come up with, though I did think I saw Marvin Hamlisch replete in evening coat followed by the "Will You Marry Me" girl, but how could I be sure since my previous look had been from 5,000 yards.

I was staying at the New York Sheraton on the corner of 56th and 7th and I felt safe and comfortable walking the few blocks back from Carnegie Hall alone. I can't say I recommend the hotel for anything but its proximity to Carnegie, shopping, and the theatre district as the elevators didn't work and it was incredibly crowded with airline personnel and conventioneers.

However, the Sheratons do offer special cut-rate rooms Thursday through Saturday for around \$50

nightly, and the symphony-sponsored group from Midland who stayed at the Sheraton Center at 52nd and 7th liked it fine. Call 1-800-325-3535 for details. If price is no problem, do stay at the Plaza at 5th and 59th from \$100. Call 1-800-228-3000 for Plaza Hotel information.

The next morning, I was out the revolving door in my jogging suit to Central Park, about three quarters of a mile away. A prettier place to run than our Memorial Stadium as the trees were in full bloom, but not nearly so friendly and a lot more crowded at 8 a.m.

As I ran, I noticed a lot of interesting people coming and going frm limousines at the Plaza Hotel across from the park, so after changing into what I considered appropriate dress,

I joined the group for breakfast at the Palm Court just off the lobby. Alas, the maitre d' said, "You're from Texas, Madame?" Translation: "Don't wear white even in late April; dark clothes are more dignified whatever the month."

I loved watching the crowd which sported one monacle, a gold-encrust-ed walking stick and a number of women of all ages in very tailored, very expensive, very dark suits. While the crowd watching was worth the \$7.50 plus tip, I wasn't impressed with the breakfast which consisted of overdone but cold eggs and a canned fruit compote. Even Sara Lee wouldn't have claimed the croissants.

Next Sunday: Shopping at Bergdorf Goodman's and "Evita".

# Mother's Day also celebrated by fashionably dressed mothers-to-be

Dressing for summer can be fun and comfortable. At left, Denise Weber is attractively styled in this dark sun dress. with bright prints and a cool white jacket to add the final touch for night or day wear. Below, a loose blouse and pant suit made of cotton-polyester adds the right touch for those not-so-hot summer nights. Denise is helping Jeremy Howard, three-yearold son of Mr. and Mrs.Tom Howard, 2613 Kessler, get a drink from the "lion's mouth" at the Dennisthe-Menace Park. (Staff Photos by Edward McCain)

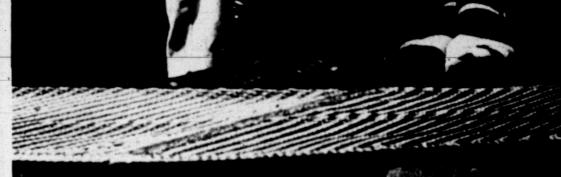

By SANDI BREEDEN Lifestyle Writer

It's Mother's Day of 1980 and many mothers-to-be are thinking to next year when they will rightfully be honored for their part in parenthood. But right now those mothers-to-be are worrying about now and they are articularly interested in how they can be fashionable during the last four or five months of their pregnancy. What's good for the goose is good for the gander and the same is true in maternity fashions. Styles in maternity clothes are the same as styles in other women's clothing. In fact, many non-pregnant women are wearing maternity sun dresses with slim-gold belts completing the outfit, which is a popular look. "We sell more jeans than anything else," said Katy Linehan owner of a local store which sells maternity fashions, enforcing the fact that maternity clothes are no longer drab dresses and dull pant suits. "Most of the women today grew up in jeans and when they get pregnant they want to continue to wear jeans. 'Maternity clothes are a lot better looking now and they are more comfortable," she added. "A lot of pregnant women work and they want pants to wear to work. Other popular maternity fashions are in satin, disco pants, the leather-look pants, attractive short suits and bathing suits are another item maternity fashions have included. "If a woman looks good in shorts before she gets pregnant," said Mrs. Linehan, "she will look good in them while she is pregnant."

### Club installs new officers

The Yucca Garden Club met at the Midland Woman's Club for its May luncheon meeting and installation of officers for the coming year.

Letters of appreciation were read from Trinity Towers for a centerpiece for their birthday party and from the Girl Scouts for a yucca plant and seven Indian Hawthorne bushes given to them for the landscaping of the new Girl Scout Center.

Following the business meeting, Mrs. R.O. Burkett. program chairman, introduced Mrs. Stanley Erskine who conducted the installation ceremony. She presented each new officer with a different rose corsage from her own garden.

Officers for the coming year are: Mrs. Fred McMann, president; Mrs. W.R. Cain Jr., vice president; Mrs. C.R. Jones, second vice president; Mrs. R.E. Hiller, recording secretary; Mrs. W.B. Johnston, corresponding secretary; Mrs. John Crosby, treasurer; Mrs. Billie Gilbert, director to the Woman's Club; Mrs. Raymond Barnett, director to the Midland Council of Garden Clubs, and Mrs. M.H. Davis Jr., historian.

Hostesses for the meeting were members of the hospitality committee: Mrs. Ernest Neill, Mrs. Billie Gilbert, Mrs. C.F. Kiser and Mrs. P.C. O'Quinn.

# Suggestions for hook rugs and needlepoint

By ERICA WILSON

Question: I have just finished a latch hook rug, a lovely "spring trees" scene. Should I put any back-ing on these rugs? Also, what is the best way to hang them on a wall - in a frame? Do they wear well if you use them as a rug? I am a little hesitant to put it on the floor after all my work! What do most people do with their rugs when finished? I am new to this, as you can probably tell, but I do love making them. — Mrs. C. Ford, Wantagh, N.Y. Answer: Latch hooked rugs are so sturdy and the pile so thick that they need no backing — just a narrow binding around the edges to hem back the canvas on all four sides. The whole idea is to leave the rugs "porous" so the dirt can't get trapped and cut the fibers. It should go right through and out the other side. There are many who, like you, prefer to hang their finished masterpieces on the wall. They do make great modern tapestries. In this case, stitch down a binding or tube of linen or cotton fabric along the upper edge on the reverse side, leaving it open at both ends. Then slide a brass rod through the binding, which will support the rug and at the same time allow you to hang it by invisible means.

bert, director to the Woman's Club, and Mrs. W.B. Johnston, corresponding secretary. Not shown are Mrs. W.R. Cain, first vice president, and Mrs. Raymond Barnett, director to the Midland Council of Garden Clubs. (Staff Photo)

Q: I purchased several needlepoint canvases with colorful designs typical of Central America while visiting those countries. I am anxious to get started on them, but have been told that the ink the designs were made from might run. How can I be sure if such is the case and what can I do to correct it? Also, what would be the pitfalls if I just went ahead and started working on them? - Mrs. Andrew Virga, Saddle Brook, N.J.

A: Don't start yet! Run down to the art store and buy some fixative spray in a can (one good kind is call Krylon, but almost any will do if you explain why vou need it).

vince their instructors that what they've created is, in fact, art. "We turned the person

in front of the camera into the artist, and viceversa." said Janet Mullen, one of the artists. Ms. Mullen, 22, teamed with Wendy Sanborn, 21, and Susan Crawshaw, 22, to create "Meanwhile Back at the Farm," a show that is both a stunning exhibition of "new wave" art and an attempt to prove there's culture in the wheat-

lands. "On the coasts, cows and wheat are all people know of Kansas," said Ms. Sanborn, a silversmithing major at the University of Kansas. "They know what they've seen in 'The Wiz-ard of Oz' and that's about it.

"We're trying to show them what's really going on 'down on the farm.' There are not just farmers down here."

Several hundred people dropped by to see the artists' show here recently, and the women said they plan to take it to Washington, D.C., and New York this summer.

Covering the walls of the Wichita State University gallery were 11,088 frames of photocopied photostrips the artists hand-colored with pencils, spray paint and florescent crayons.

The exhibit includes

### GOODSON-MILLS

AMARILLO - Cynthia DaLee Goodson of Midland and Stewart Jon Mills of Amarillo exchanged wedding vows at 4 p.m. Saturday in Para-mount Baptist Church here.

The bride is the daughter of Mr. and Mrs. Harold Goodson, 2505 Fannin Ave., Midland. Parents of the bridegroom are Mr. and Mrs. Edgar F. Mills of Amarillo.

The Rev. Bill Hays officiated the ceremony.

Best man was Bruce Thatcher of Gardena, Calif. Maid of honor was Jane Wright of Levelland.

Serving as bridesmaids were Marsha Goodson of Midland, sister of the bride, and Karla Neeley of Amarillo: Groomsmen were Mark Goodson of Midland, brother of the bride, and Todd Mills of Amarillo, brother of the bridegroom. Ushers were John FarJ. B. Butts of Fort worth, the bride s grandfather.

The couple took a wedding trip to San Antonio They will reside at 2416 Fifth Ave.,

Apt. No. 1 in Canyon until mid-August.

### MULLIN-McCLAINE

LUBBOCK - Jena Lhea Mullin and Stephen James McClaine, both of Lubbock, were married at 6 p.m. Saturday at the Quaker Ave. Church of Christ here with Dr. Thomas Lang officiating.

The bride is the daughter of Mr. and Mrs. Ottis Mullin of Turkey and the bridegroom is the son of Mr. and Mrs. James D. McClaine of Midland.

Maid of honor was Clair Holland of Lubbock. Bridesmaid was Brenda K. McClaine, sister of the bridegroom of Midland. Lora Mullin and Connie Mullin, sister-in-laws of the bride of Turkey were bridesmatrons. Dana Jack and DiGi Jack, both of Lubbock, were flower girls.

Best man was Brian K. McClaine, brother of the bridegroom of Midland. Ushers were Curtis Langford and Stewart Smith, both of Lubbock. Marvin C. Simpson of Robert Lee, Brent Mullin and Norman Mullin, brothers

# Women wearing men's clothing still look feminine

The SPRING CARPET SALE!

### By PADDY CALISTRO The Los Angeles Times

To honor the leap-year tradition that makes turnabout fair play, it is proposed that women can wear men's clothes and still be convincingly female.

Since many of the trendiest preppy looks for women started in the men's department anyway, we went right to the source for the leap-year looks pictured here.

If your initial reaction is that mens-

wear isn't made to fit women, keep in mind that most department stores and men's specialty shops offer alterations services (many at no extra charge). The quality fabrics and classic tailoring that bespeak menswear add that necessary polish preppy de-mands, making a few alterations worth waiting for.

But beyond practicality, there's something terribly sexy about women in men's clothes. Think Marlene Dietrich in top hat and tails. Katharine Hepburn in blazer and pleated trousers. Or Marilyn Monroe in a man's silky robe. What could be more femi-

Ralph Lauren's designs for Polo are the classic case for girls in boy's clothing. The looks from Polo pictured here work just as well for the Lauren woman as they do for the Lauren man. This year's man-tailored chic is a fitted step away from the oversized Annie Hall look he started three years ago.

Now a Madras button-down shirt and chino shorts with knee socks show off the figure, not hide it. A 1960 blazer defines the shoulder and waist, rather than looking like it belonged to dad.

PAGE S

Dressing in men's clothing doesn't mean just buying at Polo price points. The Western look was put together at J.C. Penney and no one piece cost more than \$35. It's a leap-year switch that doesn't take lots of money - just lots of imagination and a little altera

As part of a seven-week training program, Johnston-Macco field engineers receive "hands on" experience on a training rig located at Johnston-Macco headquarters in Sugar Land. The program

is designed to provide the engineers with a working knowledge of the field techniques Johnston-Macco's services and products supplement.

# Reserves additions highest since 1967

WASHINGTON, D.C. - The American Gas Association reported additions to proved natural gas reserves in 1979 from the "lower 48" states were the highest since 1967.

SUN., MAY 11,

AGA President George H. Lawrence said "the reserves data for 1979 shows that the natural gas industry is now turning the supply corner and is finding and developing more U.S. gas for American consumers. We have every reason to be optimistic about future gas supplies."

The AGA natural gas reserves report reveals that total additions to reserves in 1979 were 14.3 trillion cubic feet, an increase of 35 percent over the 10.6 Tcf additions in 1978. Total additions to reserves in the "lower 48" were 13.7 Tcf, a 12-year high. Total proved reserves as of December 31, 1979 were estimated at 194.9 Tcf, as compared to 200.3 Tcf a year earlier.

"Not only did the 1979 additions to reserves significantly increase from the 7 to 12 Tcf levels experienced throughout the 1970s," Lawrence that additions were widely distributed throughout all regions of the country indicates the pricing incentives in the Natural Gas Policy Act, passed in 1978, are beginning to pay off. "The increase in gas production to 19.9 Tcf is also highly important to the nation," Lawrence continued "because it reverses a downward trend since 1972. Since 1973, the U.S. has achieved record levels of gas well completions each year. These new gas wells are stabilizing natural gas production and in 1979 contributed to the production increase of 3.1 percent," he said. "Last year's reserve additions of 14.3 Tcf constituted close to threequarters of last year's 19.9 Tef gas production, signaling a clear slowdown in the rate of decline of U.S.

natural gas reserves. The incentives of the NGPA, which deregulated gas produced below 15,000 feet and certain other high cost gas supplies, together with the ending of controls on new gas by 1985, justify optimism that this more stable replacement level can be maintained for some years,' Lawrence said.

He stressed that the reserve statistics underline the need for careful application of a national energy policy that encourages producers not only to find and develop traditional gas sources, but also to develop supplemental supplies from Alaska, Mexico, Canada, from liquefied natural gas (LNG), synthetic gas, coal gasification and other unconventional gas sources.

"The nation's energy policies should consistently promote exploration and development of all natural gas supplies," Lawrence continued. "That is why it is so important that the government re-think its decision to incrementally price sales of industrial gas. Such a policy in the long-run dustrial customers for gas use and, thereby, ultimately dampen incentives for production of new gas supplies

and Senior Vice President of El Paso Natural Gas Company, explained that proved reserves are those reserves of natural gas known to exist which are presently economically feasible to produce. Derrick stressed that these reserves are only part of the nation's estimated 35-60-year supply of conventional natural gas resources.

## GPA group sets program

**ODESSA - The GPA Permian Basin** Regional meeting will be held Thursday at the Inn of the Golden West. The keynote speaker for the technical ses-sion wil be Michel T. Halbouty, consultant, Houston.

Opening the technical session will be GPA vice president, Bruce Withers, Mitchell Energy Corp., The Woodlands.

Technical presentations for the morning session are:

# New gas field discoveries bright spot in U.S. reserves

#### By MAX B. SKELTON **AP Oil Writer**

HOUSTON (AP) - The brightest spot in the latest report on domestic natural gas reserves involves new field discoveries.

New field discoveries added to the just released 1979 report were esti-mated to hold 2.57 trillion cubic feet of recoverable reserves.

With one exception, that is the highest level for such discoveries in 13 years.

Excluding the prolific reserves in Alaska's Prudhoe Bay Field, the 2.57 trillion estimate is the highest since new fields added to the 1967 report were tagged at 3.17 trillion cubic feet.

The still shut-in Prudhoe Bay reserves initially discovered in 1968 were not added to the American Gas Association's annual report on domestic reserves until 1970.

The initial estimate of 26 trillion cubic feet placed on Prudhoe Bay boosted the new fields segment of the 1970 report to 27.77 trillion. Without the Alaskan gas, however, the 1970 new fields additions amounted to only 1.77 trillion.

Last year's 2.57 trillion estimate compares with 1.71 trillion in 1978, 2.11 in 1977, 1.42 in 1976, 2.42 in 1975, 2.01 in 1974, 2.15 in 1973, 1.46 in 1972, and 1.31 in 1971.

It was in 1971 that the industry reached its lowest point in a 15-year slump in drilling operations that began after a record 58,000 oil and gas wells had been completed in 1956. Rotary drilling rigs making hole in 1971 averaged only 975 compared with 2,641 in 1956.

The active rig average rebounded by 1978 to 2,259, the highest level since 1957, but dropped back to 2,177 in 1979. The current boom in activity, howev-er, has pushed the 1980 average above 2,625.

Continuing declines dominated other segments of the year-end 1979 reserves report:

- Domestic reserves of 194.91 trillion cubic feet have declined 33.5 percent since peaking at 292.90 trillion at the end of 1967.

Texas reserves of 51.61 trillion have declined 59.2 percent since peaking at 125.41 trillion in 1967.

-- Louisiana reserves of 45.55 trillion have declined 48.8 percent since peaking at 88.001 trillion in 1968. - Gulf of Mexico reserves of 34.40

trillion cubic feet compared with its record high of 8.45 set in 1973. Texas production of 6.81 trillion compared with its all-time high of 8.26 trillion in 1972.

ment of the shut-in Prudhoe Bay gas to market outlets. Compared with the 1970 estimate of 26 trillion, however,

the 1979 report estimates Alaska's

Louisiana continues to lead gas pro-

ducing states with a 1979 output of 7.22

reserves at 31.94 trillion cubic feet.

There are only two other trillionplus producing states, Oklahoma at 1.65 trillion and New Mexico at 1.11 trillion

Texas, Louisiana, and Oklahoma were the exceptions as 10 of the top 15 reserves states posted increases in gas reserves last year as opposed to only five in 1978.

The only change in rankings among natural gas reserves states saw Arkansas drop from No. 13 to No. 15

# Illinois coal to Texas

BAYTOWN — The first coal run through Exxon USA's pilot liquefication plant here will be mined in southern Illinois by Monterey Coal Company, a division of Exxon Coal USA,

The pilot plant, which will process 250 tons of coal per dy to produce synthetic fuel products for testing,

will receive approximately 70,000 tons of Monterey coal during its operation. The plant will be undergoing startup operations during the next two months.

It is estimated that about 5 million tons per year of Illinois-type coal would be required to support one commercial-sized coal liquefication plant.

The synthetic fuels produced at the pilot plant can be refined into heating oil, gasoline and diesel fuel. Exxon estimates that synthetic fuels could comprise about 20 to 30 prcent of U.S. oil supply by the year 2000.

The project is being funded under a cooperative agreement between the U.S. Department of Energy, Exxon

Midland School of Gymnastics advanced student Gena Stumpff was among the fortunate 71 advanced girls who made it to the state meet. Gena has been offered a scholarship in gymnastics to Odessa College.

All the Class II Intermediate gymnasts finished in the top 50 percent of the 200 state competitors in their division. Almost unbelievable, is none of these girls ever competed before in state tournament.

Midland School of Gymnastics, Inc., offers Midland the best Olympic gymnastics instruction in this area. Gilmore Williams, owner, invites anyone to vist the school at 2817 Industrial and view the lessons and compare the quality of teaching, instructor-student ratio, and the program in general.

New programs for all ages are starting for May and June. Class enrollment is limited, so please call for information. The school will be happy to send you a free brochure and West Texas Gymnasts Parents' Newsletter. Call 682-7980.

Petro Jet, a company going places, offers executives and professionals an opportunity to increase the length of a business day by reducing the time invested in travel. Petro Jet offers an alternative to the commercial airline flight schedules. A telephone call to 563-4496 enables Petro Jet's passengers to design their OWN schedule. The Learjet, made available for charter by Petro Jet, has been described as the fastest-moving office in the world!

Pictured above are the West Texas gymnasts. Top row: Kim Young, Gena Stumpff, Tricia Fuller, Elizabeth Langley. Botton row: Kelli Nicks, Shannon Edwards, April Sturdivant, Jennifer Piette, Erin Allen. Not pictured are Kim Spruill and Cheryl Limmer.

Tucker Drilling Co., Inc., of San Angelo announced several promotions in the company's contract drilling organization.

J. M. "Dude" Burkett has been promoted from drilling superintendent to contract representative. He has been with the firm 29 years.

James Crimm was promoted from assistant drilling superintendent to drilling superintendent,. He also has been with Tucker 29 years.

Raymond Gesch, a 24-year Tucker veteran, replaces Crimm as assistant drilling superintendent.

Tucker also promoted Dick Crimm to assistant production superintendent. He has been with the company 28 years.

Shell official sees softening

HOUSTON (AP) - A marketing executive says the gasoline price coin seems to have two sides at present.

gasoline business center, sees a possible softening of gasoline prices because of the recession. But, he said, the other side of the coin holds President Carter's oil im-

port fee that is scheduled to be translated next Thursday into a 10-cent per gallon price hike at retail outlets.

53 discoveries logged

AUSTIN, Tx. - Texas operators reported 33 gas and 20 oil discoveries during the April 16-30, 1980, period, the Railroad Commission's Oil and Gas Division announced. In the year-earlier period, 38 gas and 19 oil discoveries were filed with

the state's energy regulatory agency.

Through the first four months of 1980, operators have reported 440 gas and 247 oil discoveries, against 462 gas and 151 oil discoveries in the year-earlier period.

Successful exploratory and field completions in the four months of 1980 total 3,866 oil and 1,783 gas, against 2,482 oil and 1,849 gas completions in the same period last year.

Gas discoveries in the last half of April included eight in East Texas, seven in the Refugio area, six in southeast Texas, three in deep South Texas, two each in the San Antonio and San Angelo areas and West Central Texas, and one each in East Central Texas, North Texas and the Panhandle area

Oil discoveries included six in West Central TExas, three each in deep South Texas and North Texas, two each in the San Angelo and Lubbock areas and Southeast Texas and one each in East Central Texas and the Panhandle area.

In the April 16-30 period, operators reported 209 exploratory and field tests wound up as dry holes.

New applications for permits to drill oil and gas tests totaled 1,272 in the last half of April, compared with 825 in the same period of 1979.

Applications to drill, deepen, plugback and for service wells in the April 16-30 period amounted to 1,414 against 940 a year earlier. Operators filed 312 amended applications to drill. A year earlier they submitted 193 amended requests.

There have been 9,914 applications to drill new oil and gas tests this year, against 5,987 in the same period of 1979. Applications to drill, deepen, plugback and for service wells so far this year total 10,951 against 7.064 in the four months of 1979.

# Yale E. Key assets sold

Sparkman Energy Corp.of Corpus Christi announced it has acquired the assets of Yale E. Key, Inc., of Midland, an oilfield service company with annual revenues of approximately \$8 million.

Wallace C. Sparkman, president of Sparkman Energy, said total consideration, valued at approximately \$5.5 million, consisted of cash and 25,000 shares of Sparkman Energy stock.

The acquisition was affected through a newly-formed Sparkman Energy subsidiary, Sparkman-Key, whose name subsequently was changed to Yale E. Key, Inc., to provide name continuity to the newlyacquired operations.

Sparkman said Max Emmert has been named president of the whollyowned subsidiary and will continue in operations management. Sparkman said no changes are contemplated in either personnel or operating proce-

I hope you don't get your hand stuck in that sticky stuff that we use because if you do you might have to get someone to go get you a hacksaw to get loose. We call it Colorado Smear because it comes from Pueblo, and we smear it along pit liner seams to seal them watertight and windfree, so the wind

won't split the seams. I tried to get them to call it Alligator Jaws; because it grabs and latches on so fast and holds so tight. The plastic will split in the sheet before it does at the seam. They wouldn't name it Alligator Jaws. I don't know why. I guess the boss's secretary must be from Pueblo too, and wanted to get Colorado into the act. Besides, she told me to not be trying to think up names because if I got to trying to think I might get a headache. I'm not really fond of her. I hope the boss gets tired of her. If I had some pits to line and if I had some pucker knots and some Colorado Smear I'd have a good deal. But, after that last good deal I had, I don't know whether I can finance another good deal.

Why do we do all this? To save the operator a few loads of

#### THE MIDLAND REPORTER-TELEGRAM, SUN., MAY 11, 1980

# Accepted: Recession now here

#### **By CHET CURRIER AP Business Writer**

NEW YORK (AP) - It's generally accepted as fact on Wall Street that the 1980 recession has arrived. But some analysts are worried that the stock market hasn't recognized it yet.

Stock prices have been climbing for most of the spring, responding to declining interest rates and shrugging off most signs of a developing economic slowdown.

The recession is deepening rapidly," analysts at the Value Line Investment Survey observed.

"Corporate profits soon will be turning down in the aggregate, despite the enormous earnings gains being recorded in the energy sector. Nonetheless, investors are not bailing out of stocks."

In the past week, the Dow Jones average of 30 industrials posted a modest 5.12 loss to 805.80, but still closed Friday more than 45 points above where it stood a little more than seven weeks ago.

Other readings for the week showed the New York Stock Exchange composite index off .26 at 59.79 and the American Stock Exchange market value index down 8.50 at 246.31.

Big Board volume averaged 37.28 million shares a day, against 29.98 million the week before.

A good many analysts look at the market's recent strength with considerable skepticism. "The character of this rally is not entirely comforting," Lee Idleman, director of research at Dean Witter Reynolds, observed in a recent commentary.

Despite their general ability to withstand adverse political news, stocks have been vulnerable to individual disappointments (and we expect more as recession unfolds).

One of those disappointments came last Monday, when General Motors cut its second-quarter dividend by more than 60 percent, to 60 cents a share. The next

day the stock fell more than 3 points. As the week drew to a close, economists of the

Council, a prestigious group of about 100 corporate officials, held its semi-

annual meeting at a Virginia resort.

vinced the time is right.

cession

Business Council, a prominent organization of corporate leaders, issued a forecast of a fairly deep recession. The economists predicted a slowdown "about as severe as any in the post-War period except 1974-75."

Lawrence Kudlow, chief economist at Bear, Stearns & Co., issued a "stock market warning" to clients a few days back.

"Lately the stock market has reacted positively to the major decline in both short and long rates, but the market thus far has not focused on the fundamental monetary-income-output decline associated with the steep dropoff in market interest rates," Kudlow wrote.

"After the euphoria of the rate decline begins to wear off, and as short rates settle in for a while near prevailing levels, it seems reasonable to expect that stock market participants will concentrate more intensely on the expected profits crunch."

Analysts at Value Line acknowledged: "The unanswered question is the magnitude of the profit decline the current recession will bring.

'Stock prices are some 20 percent below their level at the start of 1978 (as measured by the Dow) so it can be argued that the discountine g of a sizable profit decline already has taken place."

The advisory firm said it believes the drop from peak to bottom icorporate profits will be perhaps 15 to 20 percent. "Admittedly the steepness of the economy's slide has been greater in late March and April than we anticipated. But the evidence to date is too limited to cause us to modify our forecast.

'Already the drop in interest rates has brought a flock of companies into the bond market, suggesting that the credit squeeze is easing rapidly. Drops in the money supply have given the Federal Reserve more freedom of action to loosen credit should it decide such action would be beneficial.

"In sum, the news is already so bad that it may be 'good' in the sense of bringing the economy to a low point quickly, while accomplishing its objective of slowing inflation."

# 'No Sale' being rung up at many registers these days

#### **By KRISTIN GOFF AP Business Writer**

NEW YORK (AP) - High inflation, credit controls and worries about the slumping economy are resulting in a "No Sale" being rung up at many cash registers these days.

Surveys show that consumers are feeling very pessimistic about the economy. And with income gains being outpaced by inflation, consumers are pulling back on big and small purchases alike.

Auto sales took an unexpectedly large drop last month. Industry reports showed sales tumbled 27 percent to 740,000 new cars, rivaling the industry slump in the 1974-75 recess-

Sales of new single-family houses fell to 446,000, the lowest figure since February 1975, during the last recession. The government's report covering sales for March showed sales had plunged 17 percent from the previous month, the second-biggest monthly drop ever.

Reports by major retailers this past week also showed sales weakening across the board.

Sears Roebuck & Co., the nation's largest retailer, reported a drop of more than 4 percent in its April sales, compared to those a year earlier. It was the first time since August that it reported a year-to-year sales decline. J.C. Penney, another of the country's largest retailers, reported its first year-to-year decline in five years. Its April sales were off 5 percent:

For many other retailers sales rose by the smallest amount in months and failed to keep pace with sales increases that would solely reflect higher prices. The government estimates that price inflation on general merchandise averages about 7 per-

Overall, the government reported, retail sales in April fell 1.2 percent to a seasonally adjusted \$75.33 billion. Sales of autos and building materials and hardware goods showed the biggest drops. The April decline followed a 2.3 percent drop the previous month

While slumping retail sales had been widely anticipated, credit restrictions imposed by the government March 14 in some cases added an

#### extra pinch to the consumer buying squeeze.

Those broad restrictions included requirements that lenders tighten up on new credit sales. The steps taken to comply with the Federal Reserve's order varied from lender to lender, but at the retail level they generally involved lower limits on how much could be charged or higher costs for using or having a charge card or account.

J.C. Penney cited a decline in credit

•

BUSINESS

sales as a significant reason for its "disappointing performance" last month. It said "consumer confusion and apprehension" followed the Federal Reserve's March 14 move.

Some other retailers said economic problems, including high unemployment in the industrialized Midwest, also hurt sales in April.

**Consumers** have for some time been backing off from purchasing big items, but they appear to have grown wary on all fronts now.

The Conference Board, a businessfunded research group, reported this past week that its index of consumer confidence is now at its lowest level since the depths of the 1974-75 recess-

The index tumbled 18 points from March to April when it stood at 53.2. That was the sixth consecutive drop in the monthly index and brought it to its lowest reading since late 1974 when it was at 40. The index is measured against a base of 100 in 1969-70.

Fabian Linden, the Conference Board's director of consumer economics, blames the tighter credit environment for at least a part of the large drop in consumers' confidence in the economy.

"While it is difficult to pinpoint the exact reasons for the precipitous drop in consumer confidence, the administration's credit-restraining measures in mid-March would certainly appear to be a major factor," he wrote in a report this past week.

"For almost a year now, consumer

spending has been increasing faster than earnings with the consumer making up the difference in borrow-ing. Now, the contraction in the avail-ability of credit, accompanied by the sharp rise in the cost of money, has made for a crucial change in the economic enviroment," according to

PAGE SG

In other business developments this past week:

-Interest rates continued to fall from peaks reached several weeks ago. The government's weekly auc-tion of Treasury bills showed the average return on six-month bills at 9.49 percent, down from 10.79 percent the month before. That six-month rate is used to set the maximum banks can pay on six-month money market cer-tificates. That's down sharply from a peak 15.7 percent rate set at the March 24 auction.

-Inflation at the wholesale level slowed in April, posting its smallest increase in 11 months. The 0.5 percent increase in producer prices represented an annual wholesale inflation rate of 6.2 percent, or about one-third the rate of recent months. The slower price rise was largely due to a drop in wholesale prices of food.

### Purchase

### announced

Southern Union Financial Corp. of Dallas, a wholly-owned subsidiary of Southern Union Co., said it closed the previously announced purchase of 154,727 shares (approximately 88%) of the capital stock of First Savings and Loan Association of Midland.

The purchase was from 33 shareholders of First Savings and Loan at a price of \$50.37 per share for a total purchase price of approximately \$7,-800,000.

Southern Union Financial also announced it will proceed to make a cash tender offer at \$50.37 per share to acquire the remaining outstanding

Subject to legal requirements, the tender offer is expected to commence in mid-May.

# **Aladdin House features** 18th Century furniture

Aladdin House Furniture of Midland has introduced a new complete collection of bedroom, dining room and occasional pieces which reflects the best design elements of 18th century England.

Furniture historians regard the

mahogany woods and gives the appearance of a well-cared-for antique. Polished solid brass is used for the bail handles, escutcheons and other hardware pieces.

Many believe taxes should be slashed

In other economic developments

-Inflation at the wholesale level

slowed down in April as prices rose 0.5

percent, the smallest amount in 11

months and far less than March's 1.4

percent surge. Until April, wholesale

prices were accelerating at an 18

percent annual rate. If last month's

pace continued, prices would rise only

6.2 percent a year, although a contin-

uation of this trend is considered un-

-Sales at the nation's retail stores

continued their slump in April, falling

Eighteenth Century as the golden age of cabinet-making. During this period, skilled craftsmen and designers created items of great style that continue to be cherished.

English motifs which appear throughout the collection are numerous. Queen Anne styling is illustrated with the cyma curve leg, scalloped shells on the knees of lega and the variety of foot designs. Chippendale designs include fretwork and interlaced splat treatments on chairs. The prolific use of inlay is seen in the pieces which reflect the classical lines of Adam, Hepplewhite and Sheraton.

Many of the antique originals were crafted of mahogany. Thommasville crafisment have specified the same veneers and solids. Hamdsome banding on selected items feature quartered elm veneer.

Inlays of mahogany and maple offer the color variation for true authenticity. The custom finish highlights the reddish-brown tone of the The dining room pieces reflect a true summary of all fine Georgian designs throughout the 18th century.

Aladdin House also features the occasional collection. The names of many of the pieces - butler's tray, pembroke, tea table, bow front chest, pie crust, lowboy and nest of tables indicate the faithful attention to detail in reproducing them for today's homes. The secretary and desk offer important extra decorating options for libraries or studies.

Thomasville's mahagany collection brings the best of the 18th century designs, skilled craftmanship and fine imported mahogany woods in a furniture fashion that is as exciting today as it was two hundred years ago.

The Bureau compiled reports of 78 new manufacturing plants, with 34 expansions, for the first three months.

That represents an increase of 152 percent in reported new plants compared to 13 in 1980 - making an 85 percent increase.

Non-metropolitan areas reported 24 new and expanded plants, compared to 13 in 1980 - making an 85 percent increase.

The 25 standard metropolitan statistical areas (SMSAs) in kTexas continued to lead in new locations and expansions, with 56 percent of the total.

Dallas-Fort Worth, Houston, Longview-Marshall and Austin SNSAs accounted for 72 percent, and were the only areas reporting more than four new or expanded plants for the period.

Of the non-SMSA areas, Lufkin reported three, and Hillsboro two.

Most often involved in reports of new plants and expansions were fabricated metal products, non-electrical machinery, rubber and miscellaneous plastics products, chemical and allied products, and stone, clay, glass and concrete products.

Employment data released by the Texas Employment Commission shows fourth-quarter manufacturing employment increased three percent

The Texas Credit Union Commission has approved revised regulations to allow the Texas Share Guaranty Crecdit Union to increase coverage of accounts to \$100,000.

TSGCU is a "super credit union" created to provide insurance of accounts for State-chartered credit unions

The State Board of Insurance has set the 1980 auto insurance rules and rate hearings for July 23 and 24, at a location to be announced. July 23 will concentrate on proposed

rules changes, with rates to be considered afterwards - probaably on the following day.

Proposed rule changes are to be filed with the SBI by June 17.

In another insurance matter, the 10-member advisory committee appointed to revise and reorganize proposed advertising rules consdiered by the SBI last month is to meet May 20 and 21 to continue its efforts.

If the wrk isn't completed at that session, another meeting will be held in June, since the panel aims at presenting its recommendations to the boardd by July 1.

The proposals presented at the SBI's April meeting were attacked by several insurance industry representatives as being overly broad and inconsistent with regulations recommended by the National Association of Insurance Commissioners.

Savings and Loan Co,, issioner Alvis Vandygriff is promoting the idea of a

### MEMBER OF THE ASSOCIATED PRESS

The Associated Press is entitled exclusively to the use for republication of all the local news printed in this newspaper, as well as all AP news dispatches. Rights of publication of all other matters herein also reserved.

JAMES N. ALLISON (1902-1975)

WILLIAM C. THOMAS, PRESIDENT & PUBLISHER

### JAMES SERVATIUS, EDITOR

#### WILLIAM H. COLLYNS, EDITOR EMERITUS

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may occur in the columns of The Reporter-Telegram will be gladly corrected upon being brought to the attention of the editor.

The publisher is not responsible for copy omissions or typographical errors which may occur other than to correct them in the next issue after it is brought to his attention and in no case does the publisher hold himself liable for damages further than the amount received by him for actual space covering the error. The right is reserved to reject or edit all advertising copy. Advertising orders are accepted on this basis only.

# Living without fear

"How lucky you are to live in a city like Midland!"

That's how the person, who identified himself or herself as "A transferred Texan," concluded the brief letter to the editor.

Inside the envelope with the letter were several clippings from the New Orleans, La. States-Item. The headlines almost told the entire story: "5 youths held in visitor's slaying," "Beware, visitor: Danger lurks near cemeteries."

The newspaper stories - and the letter - further explained the situation: 86 murders in New Orleans in only three months' time. many of the victims tourists visiting the famed St. Louis cemeteries near the Vieux Carre.

The letter stated: "A group of us are sending these articles to newspapers in our hometowns. We want the people to know how bad the crime is before they decide to vacation here.

"The Mafia still has a great influence over a large number of state and city officials. By the end of March 86 murders had been committed in the New Orleans area.

"We want to warn people to stay away as the life they save could be their own."

It's tragic to think that crime can be such a controlling influence in any community that it

### guides the decisions of prospective tourists.

JAMES N. ALLISON JR. (1931-1978)

New Orleans is a beautiful, quaint seaport city with the interesting mixture of heritage which traditionally attracts tourists. That tourists would become victims of crime is one of the harshest realities to accept.

Yet it's true. Crime - major crime - has become one of the most frightening and sobering influences of American society today.

New Orleans is by no means a unique example. Look at the crime rates for Houston, Los Angeles, New York, Cincinnati, Denver.

True, Midland is considerably smaller than any of those cities. Size seems to breed criminality. But a crime rate can be reduced through the efforts of the citizenry and law enforcement agencies.

Apparently, Midland is blessed with competent, caring law enforcement agencies which contribute vastly to the security and well-being of the citizens of the Tall City.

We are proud of that - and proud that visitors to our fair city don't have to live in fear for their lives while they're visiting us. Darn right we're lucky to live in a city like Midland. And we recognize that fact.

(c) 1980, The Los Angeles Times KINGSTON, Jamaica - This is one those times when, as Americans

LOUGRANT

look at the world around them, everything seems to be going wrong. Somehow, the United States always seems to be on the short end of the stick. Thus it comes as a pleasant surprise to discover that in one crucial area of our own backyard - the Caribbean - things just may be on

the verge of going our way. largest of the English-speaking islands, has only 2 million people. All the independent mini-states in the no secret of their admiration for Fidel Castro - or of their desire to help build an "anti-imperialist" bloc in the

All this had led to a spate of maga-Cuban orbit. And it could happen.

Due to technical difficulties, Jack

Fortunately, however, there is growing reason to believe that it won't.

## CHARLEY REESE **United States facing** an emergency situation

Let's suppose you had an acquaintance. Let's suppose this person was bright, well-educated, and successful. Let's suppose he has done you many favors and on every occasion acted in the most sincere and friendly manner

Let's say in an act of gross negligence he kills your family. What would you do? How would you feel about him?

1 would kill him. I order my life by setting priorities, by recognizing that some things are more important than others. I also believe deeply that some mistakes are unforgivable. Like Andrew Jackson, I pray in these cases that God will have mercy on them because I won't

This admittedly extreme hypothesis has been invented to get you to think about your Congressmen and senators. Some of them are bright and well-educated. Some of them are kind and well-intentioned. But some of them have been so negligent in the matter of defense that they have placed the lives of you and your family in jeopardy.

I am not suggesting that you hike off to Washington with your deer rifle. I am suggesting that you put an end to their political careers. I am suggesting that you hold accountable grown men and women who volunteered to do a job and didn't do it, who swore an oath and then broke it.

Let's get down to basics. The most fundamental government service any government owes its citizens is protection of their lives. The Constitution in Section 8 lays on the Congress the following responsibility: (1) to provide for the common defense; (2) to

But Prime Minister Michael Man-

ley made things worse than they had

to be by launching ambitious social

programs and trying to pay for them with borrowed money, and by taking

radical, Eastern-bloc positions that

frightened foreign investors as well

The country is now virtually bank-

rupt. Unemployment is rampant.

Such staples as bread, flour, rice, chicken backs and soap are all but unattainable except in the black mar-

ket. A substantial proportion of Ja-

maica's managerial and professional

class has already left the island.

along with thousands of skilled work-

ers.

as Jamaica's own middle class.

ESIGNATION

# Charley Reese

raise and support armies; (3) to provide and maintain a navy; and (4) to provide for organizing, arming and disciplining the militia.

The present state of our armed forces: short of equipment, short of weapons, short of trained men, short of the ships, planes, and missiles required to keep the peace proves that some members of the Congress have failed to live up to their responsibili-

I am talking about those senators and congressmen who have consistently voted against an effective defense budget.

They, together with those in the executive branch who have supported or even initiated anti-defense measures, are directly responsible for the fact that today the Soviet Union is militarily superior to the U.S. The Soviet Union could not have achieved its position of superiority had we not disarmed.

This imbalance of power is a direct threat to the lives of your children. It has increased the danger of nuclear war tremendously. It has threatened the existence of this nation.

Justice demands that those who are responsible be identified and held accountable. In my opinion, they have committed the unforgivable mistake. Ignorance is no excuse. Good intentions are meaningless. It's too late to be sorry.

We share some of the fault. We have not gotten our priorities in rational order. Too often we have voted for someone because he was a nice guy or a Republican or a Democrat or pro-ERA or anti-ERA or pro-this or antithat.

Well, we must recognize what is important and what is not. For the next two years at least, the single most important issue is regaining American military power.

We are like a patient who comes to an emergency room with a broken foot, a skinned knee and a severed artery. The foot and the knee can wait. Unless the artery is repaired, we'll die.

Right now nothing is more critical than rebuilding our defenses and electing a tough president who can deal with the Soviet threat. If we lose to nuclear blackmail or a nuclear first strike, it won't matter what the law is on abortions, women's rights, labor matters or the environment. Everything will have become irrelevant.

The skeptic may ask what difference it makes. Jamaica, by far the

TODAY IN HISTORY

On May 12, 1774, the Boston Committee of Correspondence proposed that the American colonies suspend trade with Britain.

On this date:

the year.

In 1536, Sir Francis Weston, Mark Smeaton and other alleged paramours of Queen Anne Boleyn went on trial for treason.

In 1820, Florence Nightingale, the English Woman who founded modern nursing, was born in Florence, Italy. In 1932, the body of the kidnapped

baby son of Charles Lindbergh was found in the woods in Hopewell, N.J.

In 1949, the Soviets lifted the Berlin blockade, re-opening East German land routes that had been closed for 328 days in a vain attempt to isolate the city.

'Ten years ago, the Senate confirmed the appointment of Harry Andrew Blackmun as the 99th justice of the United States Supreme Court, to succeed the resigning Abe Fortas.

"Mayaguez" had been seized by Cambodia in international waters 60 miles off the Cambodian coast.

Five years ago, the United States

announced that its merchant ship

Last year, Joshua Nkomo and Robert Mugabe patched up their longstanding split and agreed to unify their guerrilla effort to bring down Rhodesia's government.

Today's birthdays: New York Yankee Baseball Coach Yogi Berra is 55. Composer Burt Bacharach is 51. Comedian George Carlin is 42. Broadcaster Howard K. Smith is 66.

Thought for today: Goodness is the only investment that never fails. -Henry David Thoreau (1817-1862)

**BIBLE VERSE** 

For the transgression of a land many are the princes thereof: but by a man of understanding and knowledge the state thereof shall be prolonged. - Prov. 28: 1,2.

Caribbean put together would fit comfortably into Connecticut.

One answer is that the Caribbean Sea is of obvious strategic importance to the United States and the Western world in general because of the oil and other shipping lanes that pass through its waters.

Beyond that, even the smallest of the Caribbean states has a full vote in the United Nations and the Organization of American States. With more of the Caribbean islands achieving independence with each passing year, they will soon have a full third of the votes in the OAS, and will constitute a sizable bloc in the U.N. General Assembly.

The United States already has had a taste of what could lie in the future. At the conference of so-called "nonaligned" nations in Havana last September, some of the harshest attacks on the United States came from leaders of three English-speaking Caribbean nations: Jamaica, Guyana and the tiny island-state of Grenada.

One encouraging sign is that, aside from Cuba, little Grenada was the only Caribbean nation to vote against the U.S.-sponsored resolution in the United Nations calling for a Soviet withdrawal from Afghanistan. Castro's deep embarrassment over the

new outflow of Cuban refugees is another plus. Meanwhile, earlier concern over the so-called "revolution" in Grenada seems to have been excessive. Prime Minister Maurice Bishop still seems hell-bent on making Grenada a Cuban satellite. But it looks increasingly unlikely that his example will set off a chain reaction in the area.

The political future of the Caribbean is likely to be affected far more directly by what is happening in Jamaica, which is teetering on the brink of economic and political chaos.

To a degree, Jamaica is merely suffering from the common ailments of Third World countries - high imported-oil costs and unfavorable

As one diplomat put it, "The only thing holding this country together is the prospect of early elections and a change in government."

Elections are not legally mandatory before January, 1982, but may come as early as August. Public opinion polls indicate that the opposition Jamaican Labor Party should win in a landslide.

Many Jamaicans fear, however, that there will be no elections.

Most political observers in Kingston believe that Manley, although an ardent and uncritical admirer of Castro, is willing to accept the verdict of the people. There is strong suspicion, however, that the extreme leftwingers within his People's Nationalist Party will try to generate enough violence to justify a state of emergency and a "postponement" of the elections.

Just a few nights ago dozens of gunmen clad in military-type black uniforms burst into a dance sponsored by the opposition party and began shooting. Five people died, and 10 were injured.

There is a tradition of violence in Jamaican politics, and the opposition party does not have entirely clean hands. But many Jamaicans are convinced that this time the future of constitutional government is at stake.

Edward Seaga, the opposition leader, threatens to "close down" the island in order to force elections if the present government declares a state of emergency. Resident diplomats tend to share his confidence that the Communists could not prevail in such a showdown because the great mass of Jamaicans would be against them, and direct Cuban intervention is unlikely.

In short, there is an excellent chance that the government of Jamaica will soon pass into the hands of Seaga's Jamaican Labor Party.

Seaga would be no American stooge, nor would he be a pushover for the multinational corporations. But, as prime minister, he would end the special relationship with Cuba, strive for closer economic relationships with the United States and Western Europe, and move Jamaica away from the radical bloc with the Third World.

Jamaica, as the largest of the English-speaking Caribbean islands, is also the most influential. And Seaga is convinced that, just as Manley's Castro-leaning posture contributed to a leftward tilt throughout the area, his own election would create a healthy momentum toward more moderate policies.

Washington has adopted a stance of studious neutrality toward the elections - and properly so. But who is kidding whom? A Seaga victory would clearly be good for Jamaica. It would, that is, if he proved successful in getting the Jamaican economy moving again.

If elections are held and Seaga's Jamaican Labor Party wins, U.S. self-interest will lie, in doing everything reasonable to help him succeed.

We are in an emergency situation and politics as usual will prove fatal. We simply have to support those who will make the tough decisions and oppose those who refuse to support a strong national defense.

Now every politician claims to support a strong national defense, but some of them lie. If you write to the American Security Council, Boston, Va. 22713, they will send you the voting records of the members of the Senate and House on defense issues. You can look at the issues and how they voted and decide for yourself if your congressman or senator has done the job you pay him to do.

### MARK RUSSELL SAYS

I suppose it's just as well that Pope John Paul II ordered Catholic priests not to hold elective office. Now, if we could only do something about lawyers holding elective office.

Do you think Teddy Kennedy will ask the Pope to extend his ruling to include Baptist Sunday school teachers?

The Pope's orders that priests get out of politics was heartily endorsed by the National Assn. of Republican Nuns, Rabbis United for John Anderson and the Lutheran League for Puerto Rican Statehood.

It is very difficult to completely separate politics from religion. One reasonsis that our lawmakers have always felt that they could improve upon the Ten Commandments.

American politics is a religion in itself. We have a preacher in the White House, a bunch of envangelists running against him, we worship the dollar, and when the IRS takes up a collection - they take up a collection!

Tito may have been as frightened as his subjects were to Djilas, who by that time had gained

### **By OSGOOD CARUTHERS** Special to The Los Angeles Times

The face and figure of Josip Broz Tito dominated my life, my career, for three rough memorable years when I was in Belgrade as correspondent for the Associated Press from 1946 to 1949.

His tough, grim-faced partisan bodyguards were a fact of life that cast a pemanent chill over all our waking activities. At times they even disrupted our privatge lives with a crude pounding at the great double doors of our suite in the Hotel Mostkva. demanding at the points of ugly little burp guns that we get out before dawn because Marshal Tito would be standing beneath our window in a few hours to take the salutes of an endless parade through Belgrade's main square, the Terrazia.

On national holidays - the occasion for such parades — the streets and buildings of the old Yugoslav capital were awash with red bunting. And where there was not red bunting or Yugoslav flags, there were pictures of Tito masking whole facades of buildings and peering out, stern, nattily uniformed, from every unobstructed window

Truckloads of gray-clad soldiers rumbled by in the pre-dawn light. Standing jammed in the open trucks. they would sing in remarkable Slavic harmony their favorite marching song: "Tito Is Our Little Violet."

On the streetcars that didn't have the ubiquitous slogan, "Death to Facism," was the other ubiquitous slo-"We Are Tito's and Tito Is gan, Ours."

And on those festive occasions our long day would be capped with the privilege of shaking Marshal Tito's hand in the reception line preceding a dizzling buffet and ball in one of the two palaces - the White Palace or the Old Palace, - that stood on the hill

overtlooking the capital and the confluence of the Danube and the Sava rivers

At one of the first of those glittering affairs, I remember Homer Bigart, then a correspondent for the New York Herald Tribune, remarking with awed wonder: "I've counted 200 generals and 500 lobsters."

Tito, resplendent in beautifully tailored gray uniform encrusted with medals, was, of course, the central figure of those galas, outglittering all his guests, the bemedaled diplomats and even the British ambassador in all his gold embroidery.

He was an expert and graceful dancer, a shy wife, Rosemarie, often attested after a turn with him on the ballroom floor - light and agile despite his short, stocky figure and despite the obvious bulk of the bulletproof vest under his tunic. But he carried his vanity to the extreme, his hair carefully waved and neatly coifed, his nails manicured and his face masked by heavy pancake make-

I recall how this vanity once offered a handsome photographic scoop to my sidekick, Jim Pringle of the Associated Press, and then very nearly got him into deep trouble. It was during the first stages of one of those parades during which Tito was standing high above his marching idolators on the flag-bedecked revieweing stand.

Jim had, with his notirious Irish Charm, somehow persuaded the rival United Press photographer to hold a ladder for him in front of Tito. Burdened down with his bulky Speed Graphic camera and several extra plates, Jim mounted the ladder and began to shoot, no more than three feet in front of Tito's face. At first, the marshal appeared amused and, indeed, flattered by this attention. But then he became annoyed as he had constantly to duck to one side of Pringle or the other to take the salute

of yet another passing brigade of marchers.

Finally Tito's annoyance we; somehow telegraphed to burly secret policemen below who ordered the photographer down immediately.

His crestfallen rival, who of course had understood that once Pringle was finished shooting the ladder would in return be held for him in to get some closeups, had to relinquish the leadder to the plainclothesmen.

In those early post-war days before President Tito's regime became almost a model of benign dictatorship to all but a few unlucky dissidents, fear - naked and undisguised - was rarely far beneath the surface of our lives. It could be seen in the faces of men crouched conspiratorially around coffee tables in the great cafe of the greast Moskva Hotel and huddled at sidewalk cafes throughout the city. Tito's secret police were in evidence everywhere

At one of the balls, I recall that Rosemarie and I were seated at a large round table with a group of the top singers of the Belgrade Opera. We were all having a jolly time, talking mostly about how the singers longed to get out of Belgrade and strive for singing careers in the West.

Suddenly a heavy pall fell over us and our carefree talk camedo a halt. Approaching us with piercing black eyes and a grimly set jaw was Milovan Djilas, who before he fell out of favor was one of Tito's closest confidants.

"I suppose," Djilas said in English with a biting sarcasm that cut through our defenses, "that you are talking about how much you would like to go to America.'

The singers looked at each other in consternation and tried feebly to stammer out some denial to the effect that they were only discussing fashion and exchanging recipes.

Years later I recalled the incident

world note as an outspoken critic of Tito and unrelenting foe of communism "Yes," he said with a warm, nos-

talgic twinkle in his eyes, "in those early days we used to enjoy throwing a scare into the hearts of those poor geese - watch them squirm."

Atlthough I was to be able to shake Tito's hand a number of times at various later occasions, I recall particularly my last closeup view of the doughty marshal before I left my assignment in Belgrade.

It was at one of the last balls I was to attend in the White Palace. It was bitter winter and the ball had drawn to a close, leaving only a handful of diehards to finish up the lobster, the Danube caviar and the slivovitz.

I had slipped alone into a large cloackroom when I was suddenly startled to the sound of heavy boots. The door burst open, nearly knocking me back among the overcoats, and in marched Tito with about six of his bodyguards. They did not speak to me or even bother to cast more than a cursor glance in my direction. They had come to help the marshal on with his great, cumbersome military over-

coat. I stood watching, transfixed, noting that he was having some difficulty

getting the coat on - partly, I con-cluded, because of the heavy armor under his tunic. But I was even more astonished to note how extremely nervous he seemed as he puffed furiously on the curious little pipeshaped cigarette holder that held his

cigarette upright. He was agitated and pale and sweat was oozing through his pancake makeup.

It was then that I realized that Marshal Josip Broz Tito may have been as frightened of his role as we were - as were his subjects.

### A terse threat

To The Editor:

**OP-ED** 

The Iranian militants' latest statement is that "unless Carter stops his savage acts, the hostages will be dispatched to hell."

This nation, this administration, this government and the American people should not put up with these insults and threats any longer. This is not to mean that we should take any military action at this time as may put the hostages in further jeopardy. But this administration can and should inform the militants and that fanatical madman, who poses as a man of God, that this nation has the capacity, through air power, without deployment of a single ground troop, to reduce their country to rubble

should any harm come to our people. Furthermore, they should be informed that upon most grevious prov-ocation, the United States government has the aerial weaponary to rain such destruction upon their lands as to make them uninhabitable for cen-

### Lowell Branum Midland **Profit ratings**

To The Editor:

It would seem that the liberal news media is after the big oil companies because they have recently shown some good profits.

It seems that the news on TV has led Americans to believe that the oil companies are their enemy.

But the oil companies are not the only ones making any profits. Here are some comparisons of four larger oil companies on net income as a percent of stockholders equity in 1979

DON'T WORRY,

HE'S JUST A

FIGMENT

with four big news media compan-

Exxon, 13.7% ..... CBS, 21% Texaco, 9.% ..... NBC, 18.4% Mobil, 12% ..... ABC, 21.6% Standard, 13.4% . Washington Post, 28% The news media is quick to publicize the oil companies profits but they don't want to get around to comparing the new income on stockholders equity that they make with what the oil companies make.

What many Americans don't understand is that most of the oil company profits in question were made from foreign earnings, not by gasoline sales in America.

Here is something that really ought to bother Americans and again the news media has little to say about this. Take all the profits from the top four oil companies, and they wouldn't pay for the annual budget of the feder-al Department of Energy which is \$12.3 billion. And with the 23,000 employees it represents \$500,000 a year per employee. That's a lot of tax money!

R. Neumann Midland

### Note of thanks

To The Editor:

On behalf of the citizens of Midland I am most appreciative of all our local media - Reporter-Telegram, radio and television - for the excellent coverage of and participation in OB-JECTIVES FOR THE EIGHTIES. Although we have now set our OB-JECTIVES, the programs of imple-mentation are just beginning. Mid-land has established some very challenging goals and it will take a continually active, involved citizenry to attain these goals.

We look forward to the challenges and to the media's continued support as we build a better community in the Eighties. Again, our thanks.

Guy R. McCrary **Executive Director OBJECTTIVES FOR** THE EIGHTIES

### Mechanical musts

#### To The Editor:

I would like to quote from an article in the "California News" called "In Defense of Auto Mechanics."

A professional mechanic "must know how to service cars 10 to 14 years old which have hundreds of variations.

He has to keep up with Detroit's constant technical changes. He must know the ever-changing

federal standards and try to comply with them.

He has to invest in better and more expensive tools and diagnostic equipment to service today's more complex

If a car comes into the shop on

• Readers are invited to submit letters on any subject al-though slanderous, defamatory or unsigned letters will not be considered for publication.

For valid reasons, at the dis-cretion of the editor, the name will be withheld but must be included in the original letter. Writers should be as concise as possible and the right to con-dense letters of more than 200 months is measured

words is reserved.

Letters must be received by noon Thursday for Sunday pub-lication. If necessary, the latest received may be held for publi-cation the following Wednes-

day or Sunday. ) They should be addressed to: Letters to the Editor, The Midland Reporter-Telegram, P.O. Box 1650, Midland, Texas 79702.

Tuesday, a mechanic is supposed to know all about it by Wednesday.

The guys in Detroit get new, clean on-the-desk-type parts. The mechanic gets them after miles of dirt, road tar, grease, and who knows what else. And the parts are always surrounded by hundreds of other equally difficult to obtain parts.

In the period of a working day, a mechanic may face any of 125 million different cars and trucks - from a \$50.00 clunker to a \$13,000.00 foreign job — and is expected to know the

answers, in inches and centimeters. Then he must guess the cost of parts and labor, trying to keep the costs down to where a customer won't faint when presented with the bill. He's also striving to please the customer, the government, and if possible,

The Good News

To The Editor:

What a pleasant experience it is to pick up The Reporter-Telegram and find — amidst the news both good and bad - that which is always Good News, the Bible. I want to express my appreciation for your providing this invaluable service. I am certain that many, many readers appreciate it.

The Bible, though timeless, is also timely, and certainly has a vital message for Midlanders today, regardless of religious affiliation or lack thereof.

Wayne Snyder Midland

### Not up-to-date

#### To The Editor:

In the Sunday newspaper dated April 17, 1980, in the Letters to the Editor column, there was a partially uninformed letter regarding the information (or lack of) from the new policy instituted at the National Weather Service and their service to and with the public and/or Radio-TV media. Sadly to say, the writer was only partially informed on the subject or failed to transcribe all of the facts relative to the format for informing the public about weather conditions.

For instance: As the writer understood the new placing of weather conditions on the telephone (both for public and media outlets) they would not be updated but three times each 24 hour period. In 20 years of broadcasting in the West Texas area it has always been done in that manner with updates on the forecast whenever out-of-the-ordinary weather necessitated an update. For many years the weather service did update (hourly) current conditions, but for some time now have not seen the necessity of this as conditions were outdated by the time the next hour's readings were taken.

However, when a radio station has wanted to know what the weather was and was going to be, most stations where I have worked have a weather wire that is tied directly to the National Weather Service wire that gives more information about local and area weather (on an hourly basis) than most persons could give a hoot about. I would emphasize the phrase "those stations that really wanted to know." The cost of this service is minimal to the media and the information, especially during hectic periods, invaluable to the listener concerned with what is going on in the area. Likewise, a simple thermometer doesn't cost all that much either. Maybe the National Weather Service is trying to utilize their time

### **Public praise**

#### To The Editor:

So often we hear or read only com-plaints about our SPCA and Antmal Control Unit.

PAGE SG

I witnessed a happening today that compels me to commend publicly these units and especially one of the city's employees - Mr. Steve Lair. For two days and nights I had ob-

served a white German Shepherd dog sitting or lying in the open in the rain in a vacant lot directly across from my home. The dog seemed weak but alert and never would leave or seek shelter. Sunday noon I called our Animal Control Center. Within an hour Mr. Lair came, and spent over half an hour getting near to the dog and trying to make friends. After doing this and trailing the dog when he moved, he finally succeeded get-ting the dog to walk with him to his truck. It seems the dog was nearly starved and was hopefully waiting for someone to return for him. Mr. Lair took this dog to be cared for and to hopefully find a good home

for him.

We need a lot of "Mr. Lairs" in this world who show such patience, com passion and concern in doing his job so well.

Mrs. Hugh Dickson Midland

### Economic ecstacy

#### To The Editor:

Seldom do I stumble onto something about which I feel childishly exuberant, something I feel is almost all my own. But I have found an almost insane glee over the bargains found at garage sales. I honestly haven't been as excited over anything since I was a child.

You really should follow my footsteps and find a bargain yourself -something you need (or at least tell yourself at the moment that you need) at a dirt-cheap price - to appreciate my ecstacy. Why when I feverishly tear through the Friday paper looking for the "Garage Sale" section of the classifieds, I feel like I'm looking for directions to a precious treasure. And seeing a home-made sign on a telephone pole directing all who pass by to a garage or backyard full of "goodies" sparks in me a curiosity that overwhelms me. And there is no resisting the urge to follow the signs; my excitement equals or surpasses what I felt when, as a child, some sweet little lady dropped a Hershey bar into my trick-or-treat bag on Halloween.

I know I must be crazy, but I will brave all kinds of weather for bargains found only at these sales. Could it be that I have finally found my alling," at least for week ty? To those who haven't yet discovered this delightful way of American life, 1 urge you to try it. Should your bank account be lean and you need furnishings for your house, clothes for your kids, or anything else you fancy, it's the only way to go, especially when money is tight, as it is now. Heck, if nothing else, just go and browse to your heart's content. Garage sales are, after all, as American as mother and apple pie. Dixie C. Mims Midland

make a living."

-Idiot is "a member of a large and powerful tribe whose influence in human affairs has always been dominant and controlling. The Idiot's activity is not confined to any special field of thought or action, but 'per-vades and regulates the whole.' He has the last word in everything; his decision is unappealable. He sets the fashions of opinion and taste, dictates the limitations of speech and circumscribes conduct with a dead-line."

-Immoral is that which is "inexpedient.'

-Politician is "an eel in the fundamental mud upon which the superstructure of organized society is reared. When he wriggles, he mistakes the agitation of his tail for the trembling of the edifice. As compared with the statesman, he suffers the disadvantage of being alive."

to a more effective result and let the cooperating media get the word to the public?

Max Howard Midland

# **Request derailed**

#### To The Editor:

The City of Midland experienced another prime example of bureaucratic snobbery when Midland's request to Washington for additional gasoline to operate Mid-Tran was not even acknowledged.

I can top that example.

Thinking to ride AMTRAK train this summer, I wrote AMTRAK (the quasi-government organization that operates passenger trains in this country) in Washington, D.C., for schedules and fares.

(Why AMTRAK headquarters are in Washington, one of our most costly cities, when it could serve better in a more centrally located point has never been explained.)

Thinking that two requests would surely result in a quick reply from at least.one, I wrote AMTRAK at two different addreses in Washington (it has three or more.) My requests were mailed more than six weeks ago. I have not heard one word in reply.

The alternative is a toll free number in Los Angeles, which serves an area from New Orleans to Seatle, excepting Houston and Fort Worth. One can well imagine the difficulty of getting other than a busy signal. I have dialed that number for days on end before getting an "on hold" signal. No wonder AMTRAK is failing.

> R. L. Denton Midland

### Sticky situation

#### To The Editor:

Apparently some political candidates exist somewhere above the laws governing defacement of public prop-

Luckily only one of the persons run-ning for public office mindlessly saw fit to plaster his bumper stickers on many of the city's street light standards as well as traffic light standards and their ancillary control

boxes' (ie. public property.) Said person should be required to remove the eyesores in question immediately.

Fortunately, most of both political organizations' respective candidates have picked up their various placards; however, we'll be forced to endure the stickers in question for years into the future.

Somehow I don't think that the right to free elections includes an automatic carte blanche permitting unbridled and generally unsolicited application of such adhesive asininity.

Put bumper stickers on bumpers (of those persons solicited beforehand) not on public property. John E. Meyer

Midland

### Thanks, team

#### To The Editor:

On April 17, we were summoned to the emergency room of Odessa Medical Center. Through the efforts of the Midland Police Deptartment, they notified the Southwestern Bell Softball Team which in turn located us, and informed us that our little girl had been struck by an auto.

With the cooperation of the Midland Police we were escorted out of Midland and into Odessa where through radio contact the Odessa Police met us and escorted us to the emergency room. To the officers that helped us, our eternal thanks!

Through abrasions and fractures, our little girl will be back in school. Tony, Sue & Tessie Lara

Odessa

### Special problems

To The Editor:

Do you have a child in the Speech. and Language Therapy program of MISD? Do you realize the type of. setting and conditions that your child and his teacher have to work under? The speech pathologists have been known to hold their classes in a variety of places such as the library (while being used by other classes), a.t bookroom, on stage (which is part of the noisy cafeteria), sharing another. teacher's room, in the nurses' office (with sick children), out in the halt and sometimes several of these places in one week as schedules, change.

Diagnosticians, nurses, and bilingual teachers are in the same boat. They are shifted around wherever. there might be an extra nook or cran-? ny. This is usually not the principal's fault. Some make a definite effort to provide a comfortable and adequate; working space. There is just not? enough room for all the extra personnel that parents, administrators, and state educators require us to have? (especially in the special educational program.) I certainly agree these are! all very important and necessary members of our faculties but why is it? we can't reciprocate their value to our school system, with decent places to evaluate, diagnose, and teach?

Wouldn't it be possible to supply each school with an "annex" building or a trailer (like at Bowie) to house all n of these "special" people? Name withheld

# **POSITIVE THINKING** America's mothers: They inspire much in us

Satire, by definition, includes startling idea

### By NORMAN VINCENT PEALE

my direction, he picked up some stones and began shying them out across the lake water, watching each one skim and skip, describing one beautiful arc after another, until the stones disappeared from sight.

down the walk from the nearby house came a graceful, slender, younglooking woman, obviously the boy's mother. When she came within reach of him, she didn't kiss him. (I thought, 'Smart mother.'' Women should know when kissing is in order and when it isn't. At age 10, when a fellow gets home from school, that ain't it.) She just put out her hand and ruffled the kid's hair - a man-toman kind of greeting. Then they turned and together went up the walk

toward the house. My mind was flooded sudddenly with memories of my own boyhood when my mother was always there

whelming happiness. Stepping on the accelerator, I went speeding on up the highway, oblivious of everything except the dream world known as "When I Was a Boy."

From this blissful state I was rudely awakened by the sire of a state police patrol car shrieking in my ear. A grim-looking officer ordered me to pull over. And I counted myself lucky, and very kindly dealt with, when after examinig my license he looked at me again, with a curious mixture of amusement and reproach in his expression, and with the admonition, 'Take it easy, Reverend ... " allowed me to go on my way.

Now admittedly, the highway is not the right place for reveries of any kind if you are going to express your happiness by exceeding the speed limit. However, the memory land of meeting and talking with your mother in the long ago is very good, a very wholesome place to revisit now and then.

Calvin Coolidge, so they say, used to sit down once in a while and give some minutes to just thinking about his mother. I always did admire the sagacity of Coolidge, but since hearing this of him I have been even more impressed.

To what kind of influence do we expose ourselves by thinking about our mothers? Mothers differ from one another, of course, in character and

certain values in life of which we can say that these are things American mothers traditionally stand for, things the mothers of America have fostered from Puritan times down through the days of the Western pioneers to the times in which we live today. And the importance of these values is one reason why it is fitting that there should be a day in our calendar this time of year designated 'Mother's Day" by way of paying tribute.

A gentle lady by the name of Nancy Hanks as she lay dying looked up at the lanky boy standing beside her and said, "Abe, be somebody." That is part of what American mothers do for their children. They inspire them to

Another very important part of their influence is a way they have of stressing the basic things in life against the tendency to get off the beam in pursuit of things like wealth or fame or public office. What the American mother mainly wants for her children is that they 'should be healthy, happy men and women, honoring God and doing something worthwhile in life.

# the bus moved off.

### Government's role in mechanized farming hassles D

### **By JOE BIGHAM**

PAGE 10G

FRESNO, Calif. (AP) - To men who work in the fields, the machines are "los monstruos" - the monsters that gobble up their jobs.

To many farmers, the harvesting machines are the key to profits - or survival.

The dispute has focused on government's role in developing farm ma-chinery since U.S. Agriculture Secretary Bob Bergland promised last De-cember not to spend federal money on research that threatens farm employment.

"We will not put federal money into research where - other factors being equal or neutral — the major effect of that research will be the replacing of an adequate and willing work force with machines," Bergland said. But in California, controversy al-

ready was raging over farm mechani-zation research by the University of California.

An antipoverty group, California Rural Legal Assistance, had filed a lawsuit challenging the university's use of tax funds in that undertaking.

"Our grievance isn't with mechanization per se," says Al Meyerhoff, an attorney for the group. "It is with subsidies being provided for mechanization that are putting small farmers out of business and causing workers to lose jobs.'

James Kendrick, the university's vice president for agricultural sciences, contends the research helps

REDEEM

STAMP

keep American agriculture in a competitive and economically healthy.

The two sides disagree over how much federal money is entwined with other dollars in mechanization research.

Meyerhoff says agricultural re-search budgets exceed \$1.2 billion annually at the nation's land grant colleges, including \$72 million at the University of California.

Kendrick says only \$39,000 in federal money was spent on farm mechanization research last year at the Davis campus, center of the university's agricultural research.

Bergland has estimated federal ex-

penditures on such research nationwide at \$1 million this fiscal year.

Much of the concern over lost jobs is triggered by statistics showing the peak tomato work force has been sliced in half to 21,000 people in the 15 years since the tomato harvester was introduced.

Growers insist that without the harvester developed by the University of California, the state's tomato industry would have withered, because too few workers were available after the bracero program ended in the mid-1960s. The bracero program allowed farmers to get workers from Mexico if there wasn't enough domestic

But many workers consider harvest machines "mechanical behemoths that threaten to decimate the farm labor work force," contends United Farm Workers President Cesar Chavez

A report prepared by the California Institute for Rural Studies with a U.S. Labor Department grant projects the loss of 38,000 harvest jobs in 13 California crops by 1982.

**Clark Biggs of the California Farm** Bureau Federation doesn't see grounds for alarm. He says that farm employment rose by 6,500 from 1968 to 1978 and exceeded 218,000 two years

The Rural Institute confirms a rise in hired farm workers during those years but says it was at the expense of "farmers and unpaid family workers.'

The rural studies group proposes that the federal government provide "job property rights" such as "substantial unemployment benefits and training" to shield farm workers from unemployment brought on by machines.

A University of California study on agricultural policy issues in the 1980s says mechanization could reduce employment between .5 and 1.5 percent per year.

"Both acreage and yield in all crop categories, however, are expected to keep increasing, so it is possible that no significant net decrease in field farm labor needs will occur in the near future," the report says.

### Shrimper tensions festerina By KEN HERMAN

AUSTIN, Texas (AP) - Gov. Bill Clements says there is little he can do to stave off possible violence between Texas and Vietnamese shrimpers in the tense waters of Galveston Bay.

Officials and fishermen from the Seabrook area came to the governor's office last weeklooking for answers.

After the 90-minute meeting, Clements told reporters there is no legal way to stop shrimpers - Texan or Vietnamese - from buying boats and going into business

Clements said all he could do is call out the National Guard or Department of Public Safety if tempers flare and violence erupts.

Shots have already been fired and crosses have been burned as an influx of Vietnamese fishermen has swelled the Seabrook fleet by 75 percent.

"I'd be lying if I said we are going back with all the solutions we hoped to come up with," said Emery Waite, a Seabrook businessman who owns a fish processing plant and fishing

"I'm going to put on my bullet-proof vest," he said half-jokingly.

A coalition of Texans

and Vietnamese is trying to ease tensions between the two groups. Don Reynolds, a member of the coalition, said all the Vietnamese and 75 percent of the Texas shrimpers have joined. But he added he is worried about the local nonmembers. Waite said shots were fired across the bow of a boat last year as shrimpers converged in the crowded waters of Galveston Bay.

**Police** Chief Bill Kerber said a cross was burned — Ku Klux Klanstyle - under an area bridge last week.

The shrimp season opens next Thursday. 'There's only so many dollars that are going to come out of the water," said Reynolds.

**Clements** announced an effort to ease the competition. Seminars and educational programs will be started to try to persuade Vietnamese to stay out of the overcrowded shrimp business.

Nguyen Van Nam, also member of the coalition, said he tries to persuade Indochinese immigrants to stay out of the business.

"Some come here and want to buy boats. They don't know what the problem is," he said. Clements said the free market must be allowed to work. He predicted some shrimpers would give up the business when they see the competition is too large.

Until then, he said, his main concern is to keep peace in the community, and to avoid replays of the shooting death in Seadrift last year.

"We are working hard to try to bring about peace, tranquility and reasonableness," Clements said. "I will take whatever steps are necessary to maintain peace and tranquility."

'We do not want any kind of conflict or incident such as happened in the past," he said.

The governor admitted he has little specific power in the matter. He said courts have ruled the Texas Parks and Wildlife Department cannot limit fishing permits to relieve overcrowding.

LAGE

With three boys at home, I do about 25 loads of laundry a week! I found that by hanging my laundry to dry instead of using my electric dryer, I saved \$50 a month or more. But, I still had a problem - how to hang that much laundry.

I'VE LOVED HIM LIKE A SON ALL THESE

YEARS, BUT HE'S FINALLY PUSHED ME

MISS TWITCHELL, I NEED TO BORROW

YOUR TYPEWRITER J

TOO FAR

I discovered that if I hang the clothes crossways on the lines (one item pinned to two lines) instead of lengthwise, I can hang a lot more pieces of laundry on the same number of lines.

Takes a little longer to dry, but it's worth it to me - gets me out of the basement. **Diane Claugherty** 

Another added benefit is that you can more readily "balance" your lines as you hang the clothes.

You're less likely to have lines that sag in the middle

I'VE TOLERATED THAT FOR

THE LAST TIME!

BUT WHAT ABOUT BLONDIE AND

HIS CHILDREN ?! WHAT'LL

HAPPEN TO THEM?

#### CATHY'S CASE FOR BIRTHDAY GIFTS DEAR HELOISE:

I bought my mother a present for her birthday, but I didn't have any wrapping paper, so ....

I used a pillowcase. I put the box in the case and twisted the top, tied it with a ribbon, and it really looked pretty.

It's inexpensive besides and fun to watch the look on Mom's face when she opens it.

Cathy Swanick, Age 11

KNIT HIT DEAR HELOISE:

The snarl at the end of the pull skein hank of yarn takes more time to unravel than I'm willing to give it, so I've come up with a very effective solution.

I use a terry washcloth sewed to form a tube. I remove the paper from the skein of yarn and pull the whole skein into the tube. As the yarn is used up, the

tube collapses with the diminishing yarn and the terrycloth acts like a thousand tiny fingers holding the yarn in shape to the very last bit. Bonus: I added another line . of stitching parallel to the seam line to form a pocket to keep the hook when not in use. Cheap and a real help.

Ann Bergant BAGGING PINS

DEAR HELOISE: When your clothespin bag finally gives way, cut off the wire hanger from the top and save.

easy to work with. - Heloise NYLON HAIR DEAR HELOISE: I made my small grand-

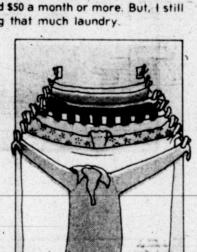

daughter a set of pigtails from discarded nylon stockings, using three stockings per plait.

I sewed them together at the top so that she could bobbypin them to her hair. She

was absolutely delighted! Gladys Dodd

HINTS FROM HIM DEAR HELOISE: Shaving cream cans leave rust rings on the medicine cabinet shelves.

### LETTER OF LAUGHTER

I was discussing this with him and asked if the teacher said she thought he was smart.

He said, "No, she didn't say, but my mom thinks I am." Jack Giswold

DEAR HELOISE:

plastic laminated counter tops, mix one-half cup household bleach with four cups water.

Just wipe stains away, but do not let the solution sit on the counter for more than a few minutes. Dana Neal

DEAR HELOISE: My sister's 5 year old recently visited school for the first time and the teachertested him' for reading and writing skills.

DEAR HELOISE: To avoid splattering the

bathtub when painting the bathroom, spread wet newspapers over the bottom and sides of the tub.

They will cling to the sur face without slipping and protect the tub from paint. Gladys Dodd

DEAR READER: This is your column. If you'd like to share a hint, ask a question or make a suggestion, write me care of this newspaper. Hugs, Heloise We thought you would like to know how to make

frozen treats on a stick.

The way you make them is to mix up powered drink mix in any flavor you like, then freeze it in icecube trays.

When almost frozen, stick in short pieces of sturdy plastic straws (one to each cube) and put them back in the freezer.

Wait a half hour or so and enjoy! Debbie and Smita

1980 King Features Syndicate, Inc.

Then cut the length nee for a new bag out of a leg from a pair of old jeans.

Sew across one end and then sew the wire hanger in the top. Result? A new and very sturdy clothespin bag. - Mrs. Judy Ann Knutsson

Utilize bright doubleknit

scraps for this project too.

They wear like iron and are

A simple way to prevent this is to put an inexpensive plastic coaster in the cabinet. No ring. And no hassle that might prevent use because you still just set the can in the cabinet. A plastic lid from a potato chip can, or the lid off a margarine container would work just as well. Keith Ward
