√ Art Cole's dream -a modern community theater - has been fulfilled. And his dream won't end when he steps down as MCT director next month.

# Carter, Schmidt have private talk

Carter and West German Chancellor Helmut Schmidt met privately Saturday on the eve of a seven-nation summit conference, and the president said afterwards there are "no differences between us" on key issues.

"We have absolutely no doubts" that West Germany will support a North Atlantic Treaty Organization plan to deploy new nuclear missiles in Europe, Carter said.

With questions about the missiles, and about the appropriate allied response to the Soviet intervention in Afghanistan, dogging the two leaders. as they and their summit colleagues gathered here, Carter and Schmidt spent about 90 minutes together, onehalf hour more than anticipated.

The two-day summit conference, which begins Sunday, will seek a common approach to some of the most pressing political and economic problems of the post-war era. But differences appear so great that major agreements are considered unlikely on problems ranging from the Afghanistan crisis to the need to reduce oil imports and consumption.

Carter, leading a U.S. delegation that includes Secretary of State Edmund S. Muskie and Treasury Secretary G. William Miller, arrived late

Saturday afternoon following a twoday visit to Rome and the Vatican, during which he met with Italian leaders and Pope John Paul II.

About one hour after he arrived at 5:54 p.m. (11:54 a.m. EDT), Carter began his meeting with Schmidt at the president's residence here, the Hotel Cipriani.

When the two men emerged, they smiled and the president said "we both agree" that the Soviets must withdraw "all their troops" from Afghanistan.

On one of the key issues reportedly dividing Carter and Schmidt - the chancellor's suggestion that the mis-

sile deployment be delayed -- Carter said Schmidt was committed to carrying out the NATO decision that was reached last December to put the missiles in place.

The chancellor's planned trip to Moscow on June 30 was also discussed, Carter said.

Schmidt said he wanted to "underline" what Carter said and added: "I never thought that we did not agree in substance" on the question of the missiles

The Washington Post reported Saturday that Schmidt said in an interview that a letter he received from Carter last week questioning the German position on the missiles was "as tonishing

Asked about the letter after the Schmidt meeting, the president said he sent it because there were "erropeous press reports" about the subject.

After the Schmidt meeting, the president took a one-hour tour of Venice by motorboat.

Carter has described the summit meetings as "a conference of democracies" that are bound to disagree at times.

In addition to the United States, the participants are West Germany. France, Great Britain, Italy, Canada, and Japan.

# Carter says he, Pope John Paul II share 'pilgrimage'

VATICAN CITY (AP) - President Carter said Saturday he and Pope John Paul II, his host during a threehour Vatican visit, are embarked on a "common pilgrimage" in behalf of peace, human rights and the eradication of hunger and disease.

Carter, who met privately with the pope for more than an hour, repeatedly pictured the two men as partners and collaborators. But the pontiff was less personal, avoiding direct references to any Carter policies.

Seated in ornate armchairs in front of separate microphones, the president and the pope reported on their talk in the papal study. Carter applauded the church leader for focusing world attention "upon those suffering from hunger, from poverty and disease; upon refugees in every coryears ago and may eventually be proclaimed a saint of the Roman Catholic Church.

"Beatification has a special meaning for members of the Catholic church," Carter said, but people of many religious traditions and origins can feel the joy and the satisfication of tomorrow's events."

The president took special note of the presence in his audience of three American cardinals, John Krol, Terence Cooke and William Baum.

After his meeting with the pope, Carter declared that "heads of nations and leaders of relgious faiths as well stand in need of a shared commitment to serve humanity." He continued:

"In the midst of a trip which I am

ner of the earth; and upon those laboring under political oppression." Declaring that the United States "shares these concerns of his holiness," Carter said, "They are our unfinished tasks as well."

The visiting president also spoke of "our common pilgrimage," which he said is "more urgent than ever before" as resources are diverted to finance the means of war.

The pope, in avoiding any direct personal praise for Carter, confined himself to saying:

"I desire to express my esteem for all those who at the national and international levels have exemplified the values of compassion and justice, of personal concern for others, and fraternal sharing in an effort to promote ever greater freedom, ever more authentic equality and an ever more stable peace for a world craving for truth, unity and love."

Wearing a dark blue suit, Carter walked into the Vatican from his Marine Corps helicopter accompanied by a phalanx of tail-coated functionaries and crimson-sashed clerics that were flanked by marching Swiss guards in medieval costumes.

Mrs. Carter wore a black dress and matching veil while daughter Amy covered her head with a white veillike cloth.

Pope John Paul, upon greeting the president's 12-year-old daughter, leaned down and kissed her on the cheek

After the private meeting of president and pontiff, the Carters participated briefly in a greeting to American clergymen and others who had gathered at the Vatican for the beatification on Sunday of Kateri Tekakwitha, a Mohawk Indian from what is now New York state who died 300

ntly taking whose objective is to promote peace and cooperation and common purpose with the close partners of my country, it has been a privilege today to meet with a man passionately dedicated to these same ideals."

The pope, who recalled with warmth his reception at the White House last October, said of Carter's reciprocal visit: "I am pleased to see in it an indication of your country's profound respect and esteem for ethical and religious values, a respect and esteem which are so characteristic of millions and millions of Americans of different faiths."

The pope spoke largely in general terms about world problems but was specific in assuring Carter "of my deep interest in every effort...devoted to world peace, and particularly the Middle East and neighboring regions.'

John Paul said the status of Jerusalem is "pivotal to a just peace in those parts of the world" and urged that 'just attention be given to the issues affecting Lebanon and the whole Palestinian problem."

He made no reference to Israel. After his meeting with the pope, Carter and his family took an hourlong tour of the Vatican. As he left the Sistine Chapel, reporters asked for his impressions. "Awe-inspiring and beautiful," the president replied. Asked what he liked best, Carter said, "It's hard to say - it's all beautiful.

The president and his wife and daughter spent about 20 minutes in the Sistine Chapel, listening to an explanation of Michaelangelo's paintings there.

The pope did not accompany Carter on the tour. Instead, the president was joined by other Vatican officials. - 0 m to The

# GOP party officials halt search for suspected bugging devices

WASHINGTON (AP) - Republican Party officials Saturday night temporarily halted a search for bugging devices in the party headquarters after learning a police officer may have examined possible eavesdropping evidence uncovered in the office of the party's co-chairman.

Linda Gosden, spokeswoman for the Republican National Committee, said she had learned of the police officer's presence late Saturday night and that it was not known whether the officer, apparently sought out by the committee's security chief, examined any evidence in the office of Mary Crisp.

Electronic experts conducting the sweep said they would have to determine exactly what the officer -Larry E. Sterling, of the District of Columbia police department's morals division - did.

Ms. Gosden said the electronic sur-

veillance search of Ms. Crisp's office would be suspended until the officer's activities were investigated.

Meanwhile, the electronic experts, concluding the first phase of their sweep of the office, said that there was no evidence of any electronic field or radio bugging device. They have yet to look at Ms. Crisp's telephone and delve into the circumstances surrounding a mysterious wire, running the length of the office and believed to be possible evidence of past bugging.

"I have reason to believe the wires were either examined, looked at or done something to," said Ms. Gosden.

At the same time, the electronics experts said it may be too late to find anything. "It's like murder - when rigor mortis sets in, it might as well be gone," said one of the experts of the evidence. He asked not to be named

The sweep was being conducted of Ms. Crisp's office after a surveillance expert said he believed he found evidence of eavesdropping devices during a three-hour inspection Wednesday.

The finding prompted GOP officials to order new examinations in the fourth-floor Capitol Hill offices of Ms. Crisp, of Arizona.

Ironically, the Wednesday discovery came eight years and one day after the arrest of the Watergate burglars in an attempt by then-President Richard M. Nixon's re-election committee to bug the office of the Democratic National Committee chairman.

GOP officials were reluctant to jump to conclusions about a possible bugging

# Watching the candidates

#### By WILLIAM RANDOLPH HEARST JR.

NEW YORK - One of the duties of those of us in the business of communication is to do our best to keep up with candidates, ,

especially those who seek the highest office in the ! land.

It can be a pleasure as well as a duty, for politics can be fascinating and, to coin a cli-che, you meet the most interesting people. We assign reporters to follow the politicians HEARST around the hus-

tings, and periodically invite a candi-

date to visit us at our headquarters. Certainly it was a pleasure four years ago to invite a relatively un-known ex-governor of a Southern known ex-governor of a Southern state to pay a call on us in New York. We feit better equipped to appraise his activities during the campaign and to judge his conduct when he made it to the White House. Jimmy Carter impressed us with the agility of his uhind, his loyalty to

country and an ambition to serve this land to the best of his ability. Like many seekers of public office, he promised too much to too many people, an occupational disease that attacks almost all politicians.

I was reminded of the Carter visit last week when another ex-governor paid us a call here at Hearst headquarters. The man who once was chief executive of the state of California outlined the reasons he believes he should replace the man who once was

## **Editor's Report**

chief executive of the state of Georgia

As we lunched with Ronald Reagan in the Good Housekeeping Institute dining room, I couldn't help but think how he has matured over the years. When I first knew him in California many, many years ago, no one was thinking of him, even remotely, in terms of the presidency of the United States or even the governorship of California. Nor, I would venture to say, was Ronald Reagan. Today he handles himself with ease

and confidence, gained from eight

# Disbanding of settlements, Begin's resignation asked

TEL AVIV, Israel (AP) - Israelis in the "Peace Now" movement rallied Saturday to demand the disbanding of Israeli settlements in occupied Arab territories and the resignation of Prime Minister Mena-

Carrying signs urging "Feace Now" and "Begin - Follow Nixon," an estimated 3,000-5,000 persons gathered near the Tel Aviv Museum plaza to protest Begin's foreign and economic policies.

Speakers also accused Begin's government of being responsible for the stalled Israeli-Egyptian peace talks. The talks have been deadlocked since May 8 over the issue of

Palestinian autonomy on the West Bank of the Jordan River and the Gaza Strip, captured by Israel in the 1967 war.

Begin faces problems Sunday when his Cabinet meets to try to trim the national budget in line with Finance Minister Yigal Hurvitz' inflationfighting program. The defense budget was cut Thursday by 4 percent about \$140 million - but that was \$160 million less than Hurvitz proposed. Begin has said he will try to persaude other ministries to absorb the

Hurvitz has threatened to resign if the budget reductions are not

carried out. Inflation is running at an annual rate of 195 percent. Begin also has been unable to win agreement from his coalition colleagues to shift Foreign Minister Yitzhak Shamir to the Defense Ministry and Energy Minister Yitzhak Modai to the Foreign Ministry. Begin has been serving as his own defense minister since the resignation last month of Ezer Weizman.

At Saturday's rally, Peace Now leader Omri Padan spoke to the crowd from a platform in front of a backdrop featuring white peace doves splotched with red to symbolize the recent bloodshed on the West Bank, where Israeli settlers and two Palestinian mayors have been killed in a series of attacks and bombings.

# Small group gathers to hear Juneteenth singing celebration

#### By ED TODD Staff Writer

The sun was high, the breeze was stilled; but the spirit was soaring in some and resting in others.

"God's been so good to me," extolled gospel singer Lynn Campbell as the New Jerusalem Baptist Church Choir and pianist Odell Niblett backed her up on stage.

The sun was bearing down, and shaded spots were almost as sparse as the crowd. But the gathering would increase as the sun set on Saturday and the cool night air would move in on the Juneteenth celebration for the Midland black com

"Jesus is the best thing that ever happened to me," Miss Campbell sang praisingly as if she, at 21, were a budding Marian Anderson.

The choir was giving thanks and praising the Almighty for His bless-

Freedom was one. "Well, that's good, too," declared Pearline Green, as the music lifted her. She was clasping a "Black Is Beautifull" bumper sticker under some shade of the Tall City Lions Club

Den in southeast Midland

Miss Campbell faded into the background, and the music relented just long enough for Niblett, the man at the keyboard, and for the choir to start afresh for the gray-haired Kittie Palmer.

"His eye is on that sparrow," the woman shouted in sweet song. "Ah, yes!" cried Willie Eva Cole man.

"Come on!" yelled Mrs. Green. Gospel music poured out.

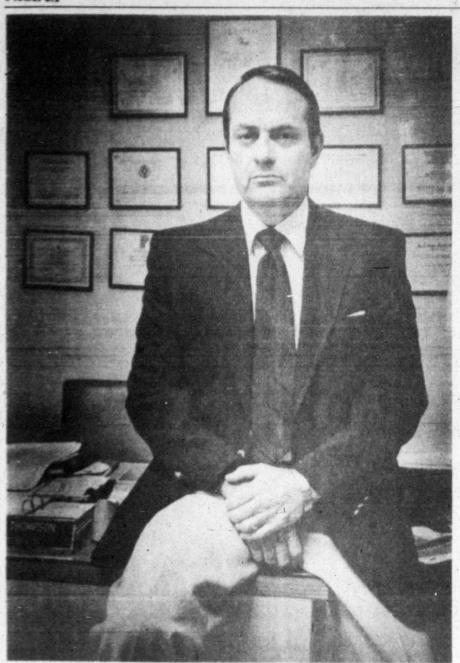

"...And I know, I know, I know that I know He watches over...over

me," Mrs. Palmer sang in the style of gospel vocalist Ethel Waters. The Rev. John Campbell, the New Jerusalem Baptist Church minister, was clapping in rhythm and with great spirit.

Niblett, like a seeing Ray Charles, sang: "Stay with me Lord, stay with me Jesus...don't leave me Lord..." The music ceased, and an extended pause came over the celebration, which commemorates Emancination Day - Freedom Day - for Texas Negroes, who were freed from slav-

# FBI Academy highlight for deputy **By KAY CRITES**

Midland County Sheriff's Department Chief Deputy George Thompson is about to embark on the second highlight of his long career in law enforcement

**Staff Writer** 

THE MIDLAND REPORTER-TELEGRAM, SUN., JUNE 22, 1980

This summer, Thompson will attend a three-month National FBI Academy in Quantico, Va. "As far as we can determine, I am the first Midland County sheriff's deputy to attend the National FBI Academy."

The academy offers administrative- and management-level classes, such as management for law enforcement; leadership, problem solving and decision

Thompson was promoted to chief deputy.

Thompson has an associate degree and is taking classes at The University of Texas of the Permian Basin in criminal justice management. He will receive 14 hours of college credit toward his bachelor's degree for attending the FBI academy.

He also has his advanced and instructors certificates in law enforcement, is a state certified arson investigator and certified jailer.

The instructors certificate qualifies Thompson to teach at the Permian Basin Law Enforcement Academy here, at in-service schools and at the Department of Public Safety academy in Austin.

### Midlander in Profile

making; interpersonal violence; and socio-psychological aspects of community behavior. Also offered are courses in "law enforcement arts" - pistol marksmanship, police arms and maintenance, rappelling and rope rescue and a physical fitness challenge course taught by a retired Marine Corps master sergeant.

Thompson enrolled in two of the "arts" courses: combat shotgun and tactical strategy, techniques and operations for communities caught in a hostage crisis

"Capt. Richard Stratton and I will be responsible for it if we have a hostage situation. I wanted to take this course so we will know how to do it," Thompson said, referring to establishing a command post during a hostage crisis

The tactical strategy course includes a lot of physical activity, such as rappelling from the top of a building into an adjacent third-story window

'As long as I don't look down, I'll be all right," he joked.

Being accepted into the academy is a long, involved process. The head of the agency, in this case Sheriff Dallas Smith, must nominate the person. Then there are applications to fill out. And a physician must certify that the applicant can stand the rigorous physical strain. All accepted applicants are required to enroll in a physical training course.

During this time, the FBI conducts an intensive background search on the applicant. If all goes well, the applicant is accepted.

'But there's nothing that says they have to accept you," said Thompson. "Going to the FBI academy is about the second highlight of my police career. The first was in 1972 when Dolph Briscoe's staff asked me to manage his security while he was campaigning for the primary.

Thompson began his career in law enforcement with the Houston Police Department in 1959. In 1963 he worked with the 720th military police in a riot control and counter insurgency unit.

Then in 1965, he began with the Spring Valley Police Department, moving to the Harris County Rehabilitation Center. In 1975, he left public service and became director of investigations for Data Limited, a private company that investigates frauds for insurance companies. In 1977, he was hired by the Midland County Sheriff's Department as a jailer.

He soon was transferred to the Criminal Investigative Division as an investigator and in April 1977 he became captain of CID. In June 1979,

As she entered the Marion County Courthouse, about 40 elderly women holding American flags formed an arch for Mrs. Marvich to walk under

Mrs. Marvich's efforts to become a citizen had been frustrated for years by an immigration law that required the name of the wooden sailing ship that brought her to New York from her native Belgrade, Yugoslavia, in 1894. Unable to remember the name of the ship, Mrs. Marvich said she had abandoned the effort, bewildered and embarrassed.

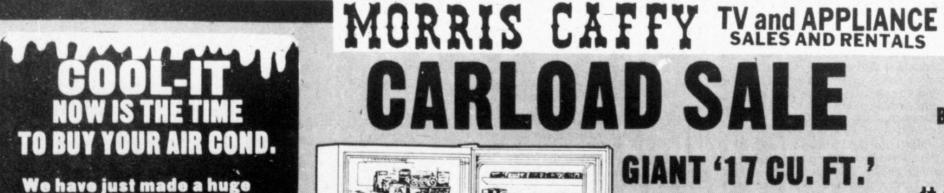

Neighbors, who annually hold public birthday parties for Mrs. Marvich, revived the effort to gain her citizenship when she told them that her fondest wish was to become an American.

The Immigration and Naturalization Service swiftly granted Mrs. Marvich citizenship after members of West Virginia's congressional delegation asked President Carter to inter-

The immigration service, in a departure from normal procedure, arranged a special citizenship ceremony in Fair-mont. Maxwell and senior immigration officials traveled to Fair-

**CROSS PLAINS** - Services for Beulah "Boots" Howell, 76, of Cross Plains, mother of Mrs. Eugene "Jimmie" Penn of Midland, will be at 10 a.m. Monday in the Higginbotham 'Funeral Home chapel. Burial will be in Cross Plains Cemetery.

Mrs. Howell died Friday at her home following a short illness.

She was born Oct. 25, 1903, in Burnet. She and her late husband, Merle "Happy" Howell, owned and operated a grocery store and restaurant here. Mrs. Howell was a member of the North Main Church of Christ and was involved in civic affairs.

Other survivors include two brothers, two sisters, three grandchildren and a great-grandchild.

The public will have the opportunity to comment on the current transportation plan and to review other items required for continued certification of the planning process. The certification will enable Midland-Odessa to continue to receive federal funds for specific transportation

improvements. Items to be reviewed are those reccommended by the steering committee in an earlier meeting. Specific projects included in the review will be

Juneteenth celebrators weren't exactly jumping under the scorching sun Saturday. But these folks found a bit of shade in an effort to weather the heat amid gospel

music and occasional "Black Is Beautiful" signs. The events and crowd were to pick up as the day turned into night, the hot

temperature cooled off and the music was jazzed up for the Emancipation Day holiday. (Staff Photo by Brian Hendershot)

# Weekend activities mark emancipation

(Continued from Page 1A)

'The (gospel music) expresses where we, as black people, have come from," sermonized the Rev. David Henderson of New Hope Baptist Church. "...God has brought us a mighty long way ...

"...We think about freedom," he roared. "...We talk about being emancipated, (but) you will never be free, you will never be emancipated until Christ runs your life." "Amen."

Saturday night, when some "soul sounds," such as jazz, and rock 'n' roll music took over the format and the turn-out of folks celebrating the holiday would increase.

Inside the Lions' Den, Bennie Harrison was preparing the barbecue beef and other vittles, and Lester Davis and Curtis Wallace were giving him aid.

Lions Roosevelt Campbell and Earl Booker were serving up food and drinks to order.

focused on slavery, emancipation, freedom fighters such as Martin Luther King Jr. and Malcolm X, black legislators, black soldiers in the Civil War and World War II, segregation and slaves for sale.

"People For Sale," headlined a poster from another century. "To be sold, on board the ship ..., a choice cargo of about 250 fine healthy Negroes

Booker, 54, has lived through the dark days of segregation when "colored" people were cast into a separate-but-unequal world, black men were "boys" and their women were

referred to as "Aunt Jemimas" or considered as objects to be exploited.

Booker used to be cynical and outspoken about that past reality. "I've mellowed," he said. "I'm not

bitter.'

His friend and sometimes verbal sparring partner, Campbell, was interested in getting the celebration into high gear.

'This is Freedom Day for me," Campbell said. "I'll do what I want to do

He bought a slice of sweet-potato pie and gave it way

Texas area forecasts ery back on June 19, 1865. West Texas: Partly cloudy through Monday with scattered mainly late afternoon and nightime thunder-storms. No important temperature changes. Lows Sun-day night low 60s in the Panhandle and mountains to 70s in the southwest Highs Sunday low 90s in the Panhandle to near 102 in the southwest except near 112 in Big Bend valleys. Highs Monday mid 90s in the Panhandle to near 104 in the southwest except near 112 in Big Bend valleys.

# North Texas: Partly cloudy and a little warmer Sunday through Monday. Widely scattered thunder-storms will be most numerous in the south. Thunder-storms will end in the northwest Sunday and in the southwest Sunday night. Lows Sunday night 68 to 75. Highs Sunday and Monday 92 to 100.

South Texas: Numerous transfer and Monday. Lows Sunday. Partly cloudy Sunday night and Monday. Lows Sunday night mostly in the 70s. Highs Sunday and Monday mostly in the 90s except mid to upper 80s along portions of the immediate coast and 100 to 105 along the

Thunderstorms again roamed most of the Permian Basin Saturday night.

Most of the thunderstorm activity occurred in Big Lake where two inches of rain and high winds raked its way in a northeasterly direction. Hail mixed with rain fell for about an hour in Big Spring.

While the heavy weather activity was occurring in those two places, Lamesa and Rankin received a light rain.

Andrews, Crane and Odessa reported only partly cloudy conditions.

As for the Midland forecast, there is a 30 percent chance that the wet stuff should fall sometime tonight.

Despite the precipitation falling everywhere but Midland, there was no precipitation recorded at the National Weather Service at Midland Regional Airport within a 24-hour period. The monthly precipation total by 9 p.m. Saturday remained at 1.59 inches and the yearly total at 5.02 inches.

Winds today should be southerly

the Year.

ness.

WASHINGTON (AP) - Ronald Reagan's campaign chairman and other Republican senators have drafted a charter for the FBI which would allow the bureau to resume many domestic spying tactics that violated civil liberties in the past.

Sen. Paul Laxalt of Nevada, national campaign chairman of Reagan's presidential effort, has been seeking Republican co-sponsors for a draft FBI charter for two weeks. The Associated Press obtained a copy of the draft. A final version may be introduced in the Senate by mid-week.

"Our charter would theoretically leave the way open for those FBI abuses" uncovered in a Senate investigation of the bureau in the late 1970s, said Laxalt aide Alfred Regnery. 'But we don't think those things are likely to happen again."

But a top Justice Department official, asking anonymity, called the Laxalt proposal "frightening." FBI officials say they prefer their own charter submitted to Congress by the Carter administration a year ago.

Jerry Berman, legislative counsel for the American Civil Liberties Union, called the Laxalt proposal "an open-season license to investigate lawful political activity, compile dossiers on citizens, invade privacy through the use of intrusive investigative techniques, and in effect, institutionalize a return to the Hoover era."

The Senate committee investigation uncovered evidence of FBI surveillance, harassment and smears directed at political dissenters while J. Edgar Hoover was director. Those disclosures led to the drive to write a legislative charter.

Regnery said Laxalt and the Republicans working with him thought the administration's charter was too restrictive in "trying to prevent the things the Senate committee dug up.

According to Regnery, Laxalt's guiding principle was "to put the FBI under the same restrictions that apply to every other law enforcement agency." As a result, he said, restrictions are limited to those in existing law

The Laxalt charter would:

-Mandate the FBI to investigate

any person or group threatening to violate the law or whose actions have the potential for violating the law, whether facts indicate a crime is imminent or not. -Mandate the FBI to maintain sur-

veillance of any person who advocates violating the law, even if it is non-violent civil disobedience.

-Mandate the FBI to gather intelligence on any public demonstration with a potential for violence. -Allow the FBI to distribute crimi-

nal records to private employers. -Shield agents from prosecution

for breaking the law if they were following orders. -Allow a new president to replace

the FBI director at will during the first six months the president was in office.

Regnery said the provision allowing a new administration to remove the FBI director, who now serves a 10year term, would probably be deleted 'to de-politicize the charter." But he called Laxalt's version "a positive

Republican alternative." He said the Reagan campaign staff did not help with the draft, but "they may pick it up and use it," and he said the Republican party might decide to incorporate it in its platform. Laxalt, as Reagan's campaign chairman, has influence over Reagan policies but there's no indication Reagan himself

has endorsed the draft charter.

The Carter administration's charter has been languishing in House and Senate committees, but FBI Director William H. Webster has said that he has already implemented many of its safeguards administratively.

"It's apparent that the Laxalt proposal will be different from ours,' said FBI spokesman Dave Divan. "We think ours is just what we need.

John Hotis, an aide to Webster, said bureau officials plan more talks with Laxalt's staff "to try to work out any differences. In some areas where it looks like we have substantive disagreements, it may be only a problem of language or interpretation.

The ACLU's Berman objected to dropping the administration's already implemented proposal to open criminal investigations only where facts and circumstances reasonably indicate a crime has been or is about to be committed. He said this could "put the FBI back in the business of political surveillance of persons or groups who vigorously but legally dissent from government policy."

Regnery said the Laxalt draft intended to mandate broad areas of investigation but in practice would it up to the FBI to decide who should be investigated

"It would be possible for the FBI to be involved in abuses," Regnery said. "But we're confident that the heightened public and congressional awareness of the abuses would prevent it. Congress could come back and stop any abuses.'

Berman said the Laxalt rules for investigating those who advocate violating laws matched the FBI's reasons for spying on civil rights leader Martin Luther King Jr.

that her husband was a member of the American CIA," he was quoted as saving.

The leader of the Moslem fundamentalist party, which has sought to limit Bani-Sadr's power and is expected to play the key role in determining the fate of the American hostages, was quoted as saying any solution to the hostage standoff should not be aimed at establishing ties with the United States.

Ayatollah Mohammad Beheshti, leader of the clergy-dominated Islamic Republican Party and an influential member of Iran's ruling Revolutionary Council, was reported to have said in southern Iran:

"It was after a great struggle that the Iranian nation had succeeded in severing its ties and stopping its dependence on the United States. This policy should be followed and pursued in the future. The economic policy of the country should be directed in such a way that the Iranian nation should not get involved again in depending on the United States and Soviet Union and all other powers," he was quoted as saying.

#### (Continued from Page 1A)

years as governor of the nation's most populous state.

During those years he had to make some tough decisions. They were not necessarily popular decisions, but they were made by a man who now feels at home in the role of responsible leadership.

Reagan, let us remember, came out ahead in a rugged primary race that included such sophisticated and experienced rivals as George Bush, Howard Baker, John Connally and Bob Dole. Anyone who can do that certainly has a high degree of political maturity.

Some people fault him for talking too much about California. Well, if you listen to him carefully you learn that he has reasons other than loyalty

to talk about his home state. He told us at our luncheon meeting

that some of the things he achieved in California could be transplanted to Washington

One that especially intrigued me was his program of seeking out the best minds in business and other areas of society, persuading these experienced, successful people to work free for the general welfare of their state. They formed themselves into task forces and brought the efficiency of private enterprise into the government.

Ronald Reagan feels, and I completely agree with him, that there are many talented citizens who are ready, willing and able to serve their country in this way. All they need is a president to inspire and lead them and harness their brainpower.

Both candidates - four years apart - took time off from their busy scheduled to come to Hearst headquarters in New York to answer questions. It was flattering to us, of course, though we did no expect either of them to get down to specifics so early in their individual campaigns.

I do recall, though, that Gov. Carter advocated sharp cuts in the national budget. He also promised to trim the size and cost of government. It hasn't happened in his four years as president.

Instead, the budget has soared to over \$600 billion, biggest ever in peacetime. Government bureaucracy has ballooned in a classic adaptation of Parkinson's law. In brief, the law states that people keep hiring more people, who hire even more, even-tually pushing everybody up in rank

It simply doesn't make sense to me. for instance, why we should have a multi-billion-dollar Department of Education with a corresponding subbureaucracy when the task could be done more wisely and responsibly in our own states and communities with parents and teachers, who are infinitely closer to the problems, working together. It must be mentioned here that my paternal grandmother, Phoebe Apperson Hearst, and two other ladies conceived, organized and launched the nationwide organization known as PTA.

Although nobody brought up the subject of his age at our interview (if elected, Gov. Reagan will be 70 when sworn into office, the oldest in American history), here are some facts to

think about:

ernment

Konrad Adenauer known as "der alte," the old man, was elected chancellor in war-shattered West Germany at 73. He was re-elected repeatedly and presided over a rebuilt nation of enormous prosperity. "Der alte" stepped down at the age of 87! In a France on the verge of civil

war, Gen. Charles de Gaulle came back to lead his nation again away from turmoil. His age? You guessed it - 69, just as Reagan's. And de Gaulle governed for another 10 years.

Winston Churchill was 85 when he retired from active political life in England, and only then because he fractured his hip in a fall. Age obviously doesn't make the

man, nor does youth endow him with special talents, least of all experience.

and salary until you have a huge pyramid.

Waggoner Carr knows what Billy Clayton going through following federal indictment

AUSTIN, Texas (AP) - Former Texas Attorney General Waggoner through.

"He's going to have very dark days," said Carr. "His world is crumbling and he doesn't deserve it in my judgment. Nonetheless, that's his future

Carr's comments came on a State Capitol Dateline program scheduled to be aired Sunday. The show is a production of the Wendell Mayes radio stations.

Carr won acquittals in two federal indictments stemming from the Sharpstown scandal in the early 1970s. Clayton faces a federal indictment alleging he took a bribe to help an insurance company win lucrative state business.

**Avalanches** recorded

### in crater

VANCOUVER, Wash. (AP) - Avalanches of rock cascaded inside the crater of Mount St. Helens on Saturday, jiggling seismographs on the volcano's flanks, scientists said.

Clouds and a plume of steam drifting to 11,000 feet obscured a view of the summit of the mountain, where a dome of crusted lava has been growing in the crater.

**U.S. Geological Survey** spokesman Pete Rowley said Saturday the shaking of the mountain was caused by falling rock, not by earthquakes, adding: "There is no significance other than the crater is unstable."

He said: "The volcano is extremely quiet. Many of us suspect it may be starting to die down. ... I personally believe there won't be another major eruption like that on May 18th, but there will be smaller ones for a while

longer ....." The May 18 blast lowered the 9,677-foot volcano by 1,500 feet, killed 24 persons, left 44 missing, scattered ash and filled rivers with mud and debris.

The cloud cover Saturday prevented scientists from getting a look at the lava dome in the crater.

# Cowboys riding Rio Grande range for Uncle Sam

With Mexico and the Rio Grande in the background, Albert Harlan checks the Texas side for signs of stray or smuggled livestock. Harlan is a county supervisor of the federal Tick Eradication Program that helps protect the nation against cattle tick fever coming from Mexico. (AP Laserphoto)

#### **By SUSAN STOLER**

HIDALGO, Texas (AP) - In his 24 years of patrolling the Rio Grande on horseback, Albert Harlan has been shot at, stumbled upon dead men, watched illegal aliens swimming from Mexico and found ample signs of drug smugglers.

But none of that really concerns him.

Harlan is a government cowboy who rides and ropes for Uncle Sam. He, and others like him, watch for

stray or smuggled livestock from Mexico that may be carrying dangerous fever ticks.

Harlan is one of 107 men and one woman working for the Tick Eradication Service within the U.S. Department of Agriculture's Animal Health Services - professional cowboys, in a sense

Harlan, a large man with a weathered face and a no-nonsense manner, rides the range for a living. Dressed in his straw cowboy hat, boots, spurs, and chaps, Harlan is the real article. Eat your heart out, John Travolta.

The service's territory covers eight Texas counties bordering Mexico from Del Rio south to the mouth of the **Rio Grande** 

It's a close-knit organization that helps protect the nation's livestock industry from devastating outbreaks of cattle tick fever.

'My daddy retired from the force just about the time I went in. As a boy I would go with him to translate Spanish," Harlan said "I just like this ' kind of work and the kind of challenge that goes with it."

Harlan, 53, supervises 14 inspectors in Hidalgo County. Each furnishes his or her own horse, trailer, saddle and equipment. The job pays \$11,243 for beginners. The government throws in another \$2,600 annually to compensate its cowboys for the use of their personal horses.

The government has established a tick quarantine zone that ranges in width from 1 mile to 6 miles north of the river. All horses and cattle leaving the zone must be dipped or sprayed with pesticides.

Any livestock found straying within the zone are rounded up and treated. The problem most often arises when Mexican cattle stray across the Rio Grande, or when they are brought into the United States by smugglers. The State of Texas pays \$525,000 a year for chemicals and other expenses while the federal government budgets \$3 million annually.

The tick force is the only mounted river patrol along the Texas border and federal cowboys like Harlan often tip U.S. Customs and Border Patrol agents to illegal activity such as drug smuggling, which is common along the border.

"You come up on all sorts of things," Harlan said. "I wouldn't send anyone out alone at night. If you come up to somebody sitting over \$40,000 worth of marijuana, they're not going to have any qualms about killing you.

Each inspector in Hildago is responsible for patrolling about 10 miles of river. They know all the curves, sand bars, which horses and cattle belong there, and the favorite smuggling spots. The cowboys are able to cover about four miles of the river an hour, riding through the thick brush and high grasses along the banks.

Inspectors spend a lot of time alone outdoors and that can be dangerous. Derley Guerra, an eight-year veteran working Hidalgo County, once laid for three hours with a broken hip after his horse fell on him. He coaxed a man to cross the river and help him and was back in the saddle three months later.

An inspector drowned eight years ago near Brownsville.

"He was roping some cattle when a bull thrashed around, hit his horse and he fell off and drowned in the river," said Tom Garcia, Cameron County supervisor.

Another inspector stationed at a camp outpost north of Laredo was murdered four years ago in an unsolved slaying.

Many inspectors carry guns for self-defense while on the river although they're not authorized to do so. Their superiors frown on the practice, but tend to look the other way.

The job formerly required a satisfactory score on the civil service test

Supervisors convinced central office directors to drop the test, Garcia said, after some new employees with high test scores could barely sit in the saddle.

# Time to check lawn for grubs

By CHARLES W. GREEN Midland County Extension Agent — Agriculture

Each year between June and September, livestock producers can effectively control costly cattle grubs by applying livestock insecticides. Grub control can be achieved with a variety of treatments which include sprays, dips, pour-ons, spot-ons and feed mixes.

During late fall and winter, grubs appear on the backs of livestock. It's too late then to begin control measures since most of the damage has already been done.

In addition to controlling cattle grubs, an insecticide used now will also provide contact control of horn flies for two to three weeks. This makes the overall cost of treatment favorable.

Insecticides suggested for grub control include coumaphos (Co-Ral), crufomate (Ruelene), phosmet (Prolate), trichlorfor (Neguvon), famphur (warbex), fenthion (Tiguvon) and ronnel. Read and follow directions on the insecticide label before treatment. Cattle that are sick or under stress should not be treated,

THE CATTLE GRUB is the larval stage of the heel fly. The adult fly has no mouth parts, so it causes no pain to the cattle. However, it frightens cattle, making them difficult to manage. Animals often seek relief by standing in shade or shallow water.

The life cycle begins when the heel fly lays its eggs on an animal. The eggs, glued to hairs, hatch within a few days, and larvae (worms) enter the skin at the hair follicles. The immature stages then migrate through the animal's body for six to eight months and reappear in the animal's back in the fall and winter.

Cattle grub losses are effected in a variety of ways. Besides damaging meat and hide by their feeding activity within the animal, they lower beef cattle gains and reduce milk production throughout the year, which means lighter calves. Profit losses are estimated to cost Texas cattle producers \$8 to \$10 million a year.

MAY OR JUNE BEETLES, adult stage of white grubs, have been emerging from home lawns for the past several weeks. Female beetles will be laying eggs in the soil beneath the grass sod. Eggs hatch in 3 to 4 weeks. Newly hatched white grubs move up near to the soil surface line and feed on grass roots.

Control treatments should be applied to infested lawns when small grubs are present in numbers of 4 or more per square foot of grass sod. Small grubs feed for about 3 weeks before they reach a size that causes extensive damage to grass roots and are more difficult to control with chemical treatments. Lawn areas should be checked weekly, starting the first week of July, for small white grubs (less than one-half inch in body length). Check one square foot of sod in at least two different locations of each 1,000 square feet of grass in the home lawn. Examine the roots in the upper 4 inches of soil for white grubs.

**DIAZINON OR DURSBAN** are the two soil insecticides suggested for control of white grubs in home lawns in far West Texas. The grub has become resistant to most other materials. Both insecticides are formulated in liquid and granule forms for

treatment of lawns.

When Diazinon granules are used, the suggested rate is 1 pound of 14 percent granules or 12 to 15 pounds of 2 percent granules per 1,000 square feet of lawn area. Suggested rate for Dursban granules is 15 to 20 pounds per 1,000 square feet. After application of granules, drag the grass with a water hose, etc. to knock the granules down to the soil line. Then apply enough water to soak the grnules into the soil (one-half to one inch of water). Keep children and pets off the lawn until the insecticide is washed into the soil.

Apply Diazinon or Dursban sprays at the rate of 25 gallons of water, including he insecticide, per 1,000 square feet to wash the insecticide into the soil. Wetting the lawn before spray application also helps, Irrigation (one-fourth inch) after spray application helps move the insecticide into the soil.

Diazinon treatments will last for three to four weeks; Dursban about twice that. This makes it imperative that your timing (when grubs are young) is right.

# Painter uses nation's older barns for canvas

MASON, Ohio (AP) — Harley Warrick's paintings aren't seen by most turnpike motorists, but they're still visible along back roads in Ohio, Pennsylvania and West Virginia.

Warrick has been painting "Chew Mail Pouch Tobacco" signs since 1947. He figures he's decorated more than 17,000 barns in those 33 years.

"When I lease a barn, I look it over," said Warrick, who paints or retouches some 200 barns a year. "I paint the peak black and then drop down to the word 'CHEW.' You trim it up, go around the white with the black; we call that cutting in.

"I don't measure anything but the bottom line of the letters. With the first 1,000 or so, you have to measure; after that, you don't need to."

Warrick is the only barn painter still employed by the General Cigar and Tobacco Co. of Wheeling, W.Va., maker of Mail Pouch tobacco. Three decades ago, the company kept four crews of painters busy. Finding suitable barn sides is becoming more difficult, Warrick said.

"You drive down the road and see a barn that's exposed pretty good — it's nice if it's right into the curve of a road when you're looking into it.

"We're concentrating on the areas where the customers are — the miners, the factory workers' and steelworkers. You don't get too many customers in the white-collar areas."

As farms get larger and fewer in number, there are fewer barns for Warrick to turn into billboards. "Most of the barns are disappeairng," Warrick said. "Now, the old farmers aren't keeping them up.

A lot are building metal barns. "I just won't do a metal barn. It just doesn't look right; it's too neat ... it looks like a ballpoint-pen

Rembrandt. "It wouldn't look like a Mail Pouch barn. You need a barn with beat-up lumber and a sag in the mid-

Bob Carter of Mason has a barn that Warrick thought was suitable for Mail Pouch treatment, so he agreed to lease it and let it be painted.

"We like the old country look," Carter said, explaining why he allowed his barn to be used for advertising. "You used to see them all the time and you don't see them any more." Warrick, who lives in Belmont County in eastern

Warrick, who lives in Belmont County in eastern Ohio, maintains some 1,200 barn sides. Uncounted thousands more are fading or crumbling along littleused back roads

As one of the last artisans to roam the countryside plying his trade, Warrick works alone with paint and brush — never sprayer — and counts himself lucky.

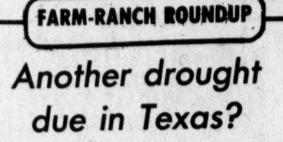

"You'd have to like it," said Warrick. who can paint a 40-by-18 foot job in less than a day. "You couldn't do it for this long and not like it."

COLLEGE STATION - Texas is due for another serious drought soon ... if past records are any indication

"Statewide droughts have seemed to follow a cycle of every 20 to 25 years," said Dr. Jack Runkles, director of the Texas Water Resources Institute of

the Texas A&M University System. "The last major drought in the state ended 25 years ago, and the threat of inadequate rainfall looms each passing day," he said. "Another drought is not a matter of 'if' but a

matter of 'when.'

Ranchers, farmers, city officials and other weather weathers say the current dry spell was seriously aggravated because areas failed to receive either

fall or spring rains. The High Plains, Trans-Pecos, Edwards Plateau and South Texas border area received only 20 to 65 percent of their normal rainfall from October through December of 1979. Such amounts were well below a standard deviation, he said. "An extended drought would certainly mean local

shortages in many areas and water restrictions in most Texas cities," said Runkles. "But few Texas cities...have any type of contingency plan in case of a drought."

The last major drought in Texas lasted from 1950 to 1957. And 235 of the state's 254 counties were declared federal disaster areas.

Sweetwater, an agriculture and business center of 15,000 people, is in a plight due to a water shortage. The West Texas city could be typical of a drought-hit

Nearby reservoirs have dropped dangerously low there, and the city has held a "Pray for Sweetwater" meeting.

### Webworms reported

STANTON — Fail webworms that attack the fo-liage of trees and which can defoliate trees have been observed in the Midland area, says David Foster, Martin County agricultural extension entomologist.

Trees weakened by fall webworm infestations are

also susceptible to damage by disease. Trees are damaged by larval feeding, as young larvae feed on the leaf surfaces and "skeletonize" the leaves. Older larvae consume all but the largest leaf veins.

The presence of webworms is indicated by loosely woven, dirty white webs enclosing the foliage on the ends of the branches. The webs contain a quantity of black pellets of worm excrement; the leaves become unsightly.

Fall webworms attack more than 100 varieties of fruit, shade and woodland trees but do not attack evergreen.

The control of webworms may be through cutting out and burning the webs or by other mechanical means.

Pesticides, such as acephate (Orthene), carbaryl (Sevin) diazinon and malathion, may be used to control webworms.

Bargaining bill conforms

AUSTIN — Texas Rep. L.P. "Pete" Patterson says that any bill introduced concerning collective bargaining rights for Texas farm workers should conform with federal laws.

Conform with federal laws. Patterson, one of several members of the House Agriculture Livestock Committee which has studied the farm workers' plight in California, said he does not believe a collective bargaining bill could pass unless it is "drastically changed" from the mea-sures introduced during the last session of the Texas

Legislature. "We need to try to coincide with the federal act if we ever try anything like this," Patterson said in an agricultural lobby workshop.

# North Dakotans fighting drought

DICKINSON, N.D. (AP) — There are no waving grain fields in many parts of North Dakota this summer. Farmers in the state that produced 252 million bushels of wheat last year are fighting the driest spring they've seen since the '30s. Scattered showers have brightened their faces and

their pastures in the last few days. But rainfall still is their pastures in the last few days. But rainfall still is far below normal, with the best areas averaging less than 3 inches. Usually, more than 5 inches falls between April and mid-June. In southwestern North Dakota, hard red spring wheat that usually stands knee high is less than half that now. Farmers who seeded wheat in late spring

find only a dry dirt crust. "My dad went through the '30s, but I've never seen anything this bad," said Gordon Pavlicek, a tall young farmer who has worked 1,600 acres with his father outside this community of 12,500 for 10 years.

Pavlicek was forced to sell 45 head of cattle because he had no feed for them. "The alfalfa doesn't look like it will make anything," he said. "Even if it does, it will be a light crop. And I didn't feel at \$90 a ton, hay was worth buying." His wheat fields, which could yield 30 bushels an acre, might not make even 15 this year. And he'll be hard-pressed to pay for the \$75,000 tractor-tiller he

bought last fall.

bought last fall. "I sure hit that all wrong," he said. "If I'd waited until spring it might have been a different ball game. Interest went up 5 percent for me. I borrowed thinking I was going to pay 10-12 percent and it turned out to be 16%." Pavlicek expects federal crop insurance and disas-

ter payments to bring him about \$60 an acre — only about 60 percent of what he would get from a crop, but maybe enough to break even. National Weather Service officials say this is the

driest spring in the area since 1936. Although the long-range forecast for mid-June to mid-July calls for above normal rainfall, that would be too late for

most crops. Tony Pavlicek tries to give his son some lessons he learned in the Dust Bowl years of the 1930s. The elder Pavlicek recalls that after the drought came hail and grasshoppers. His family lived on bread and jelly, he said, and "you didn't buy anything you couldn't pay for " for.

for." Now, says Gordon Pavlicek, "I'm listening a lot closer to him." Cattle sales boomed six weeks ago at North Dako-ta's largest auction barn here. Manager Willard Schnell said the sales peaked at about 4,000, quadru-ple last year's figure. But low rainfall has made some ranchers hang on to cattle, while others are moving them to greener pastures out of state. Last week's sale was 1,100. The American State Bank of Dickinson financed a trip to Cody, Wyo., last week so ranchers could get a look at pastures.

# **Precision** pilots to put on show

SAN ANGELO - Precision aerobatic pilots Jim Franklin and his brother Steve today will be be putting together an air show that perhaps rivals the "greatest" two-man air show on earth.

PAGE 10A

The show starts at 1 p.m. at Mathis Field here.

Jim will be flying the bi-wing Waco UPF-7 and the Piper SuperCub, and his younger brother will be taking aloft the bi-wing Jungmeister train-

Jack Morgran, who is promoting the Franklin Brothers Air Show, said that he been "pushing airplanes" since the early 1940s and has seen pilots that "rate from one to 10 in all facets of flving.

"I rate Jim Franklin at the top of the heap for sheer flying artistry," said Morgan. "That's really what he is ... an artist at his trade."

Morgan, who is also a booster of the Confederate Air Force, which preserves and flies World War II "wars birds," said that Jim Franklin is unbeatable in the air.

### Public hearing set

AMARILLO - A public hearing to determine the scope of an environmental impact statement on the six-state High Plains-Ogallala Aquifer Area Study will be held at 2 p.m. Tuesday in the Best Western Villa Inn here.

The hearing is being conducted by the Economic Development Administration.

The High Plains Study is a \$6 million research project to examine long-range economic development alternatives for sections of Colorado, Kansas, Nebraska, New Mexico, Oklahoma and Texas which are dependent on declining water resources in the Ogallala Aquifer.

Major development alternatives being considered include

-Continuation of existing water policies and trends.

-A program to encourage conservation through incentives.

-Application and uses of new technology to

management, de-salinization.

# Texas Republicans attack Carter at state convention

HOUSTON (AP) — The state's top Republicans, to the delight of 3,875 GOP convention delegates, laid it on President Carter Saturday, saying the Democratic incumbent must be beaten in November to insure the future of the nation and Texas.

Carter was blasted by Rep. Bill Archer, R-Texas, by Sen. John Tower, R-Texas, by Anne Armstrong, former ambassador to Great Britain, and by Gov. Bill Clements, the first Republican ever elected the state's chief executive.

It was a quiet state convention, and one where all the speakers called for party unity in an aggressive campaign in behalf of Ronald Reagan to bring the state's important 26 electoral votes into the Republican column.

The only thorn in the otherwise rosy convention was a proposed resolution that a human life amendment be passed that would, in effect, outlaw\* abortions except in certain cases of rape, incest or when the life of the mother is in danger.

Clements told the delegates, "We must seek what is right for Texas in Washington, because the man sitting in the White House today is not right for Texas and we must do everything in our power to get him out.

"Not one Texan has escaped the disastrous impact of Jimmy Carter's policies. We cannot take any more of a man who answers challenges by creating more bureacracies like the Department of Education and the De-

#### partment of Energy

"We can take no more of a man who doesn't know what he's doing or where he's going, so I say it is high time that we tell him where to go right back to Georgia."

The governor added, "The people of Texas are not crazy. We're going to turn the tables. We're going to tell Jimmy Carter something. We are going to tell him that we don't want him as our president any more. We have had it."

He said Carter had committed "five unforgiveable sins against Texas" and listed them as follows:

- "The so-called windfall profits tax against the oil industrty.

- "The natural Gas Policy Act of 1978 that placed intrastate natural gas under federal control for the first time in history.

- "The tremendous damage he has done to our relations with Mexico.

- "The federal suit against our Texas prison system in an effort to degrade what many experts considered to be the best prison system in the nation.

- "And the recent attempt to lump all Hot ston area school districts into one desegregation plan."

Tower said the president "has brought about the humiliation of the United States. Since Jimmy Carter has been in office, it has become more dangerous to be a friend of the United States than an enemy."

The senator said, "I have never seen the Republican Party more united, but don't take it for granted we can carry Texas without a lot of work.

"I remember in 1976," Tower said, "when the president told Americans he would never lie to them. That was his first lie."

Archer and Armstrong followed the same pattern, lashing out at the president for the high rate of inflation, the high rate of unemployment, a weak defense program and an even weaker foreign policy.

Rep. Jack Kemp, R-N.Y., told a news conference that he believed the Republicans should take no definite stand in the party platform on the Equal Rights Amendment or the abortion issue.

He also said it "is nice to be mentioned as a possible vice presidential candidate, but I certainly don't expect it to happen."

Because of a May primary, Reagan already has claim to 61 national convention delegates and George Bush has 19.

Although Bush has left the race, he is going to keep his delegates in an effort to get another federal campaign grant to pay off his debts. Bush has said he will ask his delegates, once the national convention is under way, to go for Reagan on the first ballot.

# July Fourth celebration scheduled

The 18th annual Fourth of July celebration sponsored by the Col. Theunis Dey Chapter of the Daughters of the Amercian Revolution and the Downtown Kiwanis Club will be held at 9 a.m. July 4 in Wadley-Barron Park.

The traditional old-fashioned celebration and sidewalk parade will begin near the corner of Cuthbert and North A Streets. Registration for sidewalk parade participants is scheduled at 9 a.m. on the corner of Harvard and A Streets. Parade will begin at 10 a.m.

Pre-schoolers, first through third grades, fourth through sixth grades and miscellaneous categories can compete for various honors as most representative of the Fourth of July.

An awards presentation for the the sidewalk parade winners is scheduled to be at the Wadley-Barron Park gazebo.

After the parade, youngsters can participate in old-fashion games sponsered by the

# When you've arrived... Meadowpark

#### What is Meadowpark?

Meadowpark, a project of Citizens Savings & Loan Association, will be a Planned Unit Development of attractive patio home and townhome clusters. Meadowpark will consist of up to 200 attached and detached patio homes and attached townhomes on nearly 60 acres in north-Midland. The development is inside the city of Midland and receives all municipal services, including police and fire protection, and water and sewer services. Patio home clusters will have seven-to-eight residences each.

#### Meadowpark Owners' Association

Common recreation facilities and park areas are managed by the Meadowpark Owners' Association. Purchasing or building a patio home on your own lot automatically makes you a member of the Meadowpark Owners' Association. The Association provides management and maintenance of the common park areas, playgrounds, tennis courts, and swimming pool.At the homeowner's option, the Association may also maintain the exterior portion of your residence. Citizens Savings & Loan Association serves as both developer and permanent lender, and you may wish to visit with one of our loan officers about interim financing and permanent mortgage for your Meadowpark home. We will be pleased to supply a list of reputable builders who will execute your selected Meadowpark plan.

#### Where is Meadowpark?

The Meadowpark community is located on 59.91 acres northeast of the intersection of North "A" Street and FM 868 (proposed Loop 250). It is convenient to Garfield and Big Spring Streets as well. Nearby are

Downtown Kiwanis Club. In addition, persons can quench their thirst and hunger pangs at the food and soft drinks stand, also sponsered by the Kiwanis.

Famílies are encouraged to bring picnic lunches and enjoy other activities.

More information regarding July 4 activities can be obtained by telephoning Gayle Dodson, parade chairman, at 682-3376.

#### **UTPB** lists

С

#### scholarships

ODESSA — Several scholarship awards are available to area minority students planning to attend the University of Texas of the Permian Basin this fall.

Joyce Thompson, director of financial aid and placement at UTPB, said three or four awards of \$250 to \$300 each will be available to minority students this fall through the Nojem Libson scholarship. Applications must be in before June 26.

"The Libson scholarship is available to any minority student with preference given to Ector High School and Odessa College graduates," she said.

Thompson noted applicants must meet admission requirements and show financial need. Persons desiring appli-

cations or further information may contact the financial aids office at 367-2354.

#### A low density development.

Meadowpark residents will enjoy a great deal of room and privacy because of the very low density of the development.

In Phase I, ample landscaped park areas and recreation areas comprise nearly 49 per cent of the total. Patio home lots account for about 26 per cent. A low density of 2.5 residences per gross acre allows for privacy. (Many fine residential developments average more than four residences per gross acre.)

The cluster arrangement of Meadowpark is not only attractive, but also restricts traffic flow on residential streets. Spacing between streets helps minimize street noise. Onstreet parking is prohibited, so that streets become areas for family activities—including bicycling, walking or jogging, and children's games.

#### Patio Homes and Townhomes

Lot sizes in Meadowpark will accomodate patio homes ranging in size from 1,576 square feet, up to a four-bedroom patio home with 3,600 square feet livable. A total of 17 floor plans are available in one and two story designs.

Prospective buyers may, if they wish, employ their own architect/builder to submit a house plan more suitable to their needs. As a Meadowpark homeowner, you own the lot on which your home is located, all of the improvements on the lot, and an interest in the common areas and facilities.

Meadowpark homes will offer two or more enclosed patios, affording a relaxed, suburban lifestyle. This allows for very little yard care and a great deal of privacy. Interior patios are not included in the general landscaping, but homeowners may contract with the Owner's Association to provide their landscaping.

General landscaping includes attractive entrances off of FM 868 (proposed Loop 250) and North "A" Street, berms for noise and visual barriers, trees, ground cover and grass. Clusters of live oaks and red oaks will be used throughout, and poplar and flowering trees will be used at various locations. Sidewalks connect the visitor parking area with the front entrance of each lot, as well as provide walkways between clusters. Each residence has a minimum of two garage

parking spaces.

#### Each Meadowpark residence is designed as an energy efficient home and will meet Texas Electric Service Company's strict "E-OK" rating. Texas Electric will inspect your home at each stage of construction and will certify that the completed structure has earned 135 "E-OK" points. A number of insulation and design factors contribute to the rating. For example, exterior walls will have at least R-19 insulation ratings, with attics insulated to an R-26 minimum.

Photograph of architecural scale model of typical patio home cluster.

#### Have you arrived?

Today's active family seeks a comfortable home with large rooms and closets, the best appliances, but a minimum of yard care and upkeep. Meadowpark offers great opportunity for outdoor recreation, and an informal, suburban atmosphere in which there is a balance between neighborliness and privacy.

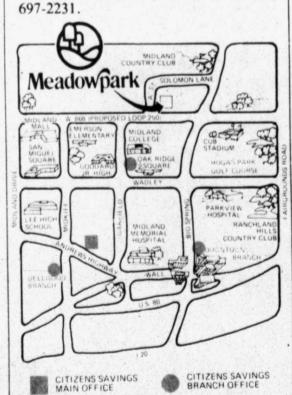

Extras such as tennis courts, swimming pool with cabana, bathhouse and deck area, playgrounds and landscaped park areas are available to all through the Meadowpark Owners' Association. Each home is designed to be energy efficient. Each is designed for a lifetime of real living.

When you've arrived . . . Meadowpark.

#### What does it cost?

Patio homes and townhomes start in the low eighties and range up to \$150,000. Of course, you may request additional features in planning with your builder which may affect the final sales price.

Homeowners are assessed a monthly maintenance fee which provides for landscaping (except that within each lot area), upkeep of the grounds, care of recreational facilities, outdoor lighting, and real estate taxes and insurance for the common areas and facilities. newly developing shopping centers and a regional mall, Midland College, schools and Midland Air Park. Country clubs are close by as well. Meadowpark was conceived by Citizens Savings & Loan for homebuyers looking for carefree living at affordable prices. For more information about Meadowpark, call Citizens Savings & Loan Association, and ask for John Phipps, Vice President. Telephone:

# **Tom Green County Democrats** dominate

#### **Austin Bureau**

SAN ANTONIO - Tom Green County dominated the selection process from the 25th senatorial district for the Democratic National Convention as Democrats met at their state convention here this weekend.

Linda Shoemaker, a school teacher, and Stephen Polunsky, a University of Texas-Austin student, were selected as Carter delegates at the district caucus, while San Angelo investor, Jan Chandler was named as uncommitted.

Junction seat accountant, Hayden Woodard, a Carter delegate to the 1976 convention, was named as alternate.

Harris Kerr of Midland was elected chairman of the senatorial district caucus. D.L. "Dallas" Willis, of Midland, was named to serve on the credentials committee at the National Democratic Convention.

County chairmen from the 25th senatorial district met Saturday and voted for repeal of party rules allowing state officials to remove local officers who support candidates of another party, arguing it should be up to the local people who elected those officers to remove them.

There was some squabbling in the delegation over actions of Senator Ted Kennedy supporters who apparently sought to have the delegation go uncommitted.

The 25th senatorial district sent 103 delegates and the first sign-in showed 67 for Carter, 16 for Kennedy and 20 uncommitted.

The second sign-in showed 69 delegates for Carter, 7 for Kennedy and 27 uncommitted.

In the 28th senatorial district, which includes Ector County, Odessa elementary teacher Jessie Smith and Lubbock teacher Sue Duncan were selected as Carter delegates with Lubbock farmer James Davis Jr., as alternate.

Paul Looney of Lubbock was named as a Kennedy delegate.

# Kennedy backers gaining in Texas

SAN ANTONIO, Texas (AP) -President Jimmy Carter came out ahead, but Sen. Edward Kennedy's followers picked up important party power in Saturday's Democratic state convention.

Kennedy supporters won three places on the important Texas delegation to the Democratic National Committee, two more than on the current seven-member group.

The Massachusetts senator also picked up two more national convention delegates in Saturday's final session. Two lengthy roll calls were re-

quired to settle fusses.involving three Carter supporters and an uncommitted delegate who challenged committee selections for the powerful national committee

In one, Dallas moderate Millie Bruner fought off a challenge from current DNC member Carrin Patman, who had been balked by the convention committee

In the second Jesse Jones of Dallas, another Carter backer, was successful in defending his committee appointment against Doug Seale of Wellington, an uncommitted delegate. Other members of the national

committee, which will have a hand in the New York national convention, are Ed Ball, Galveston; U.S. Rep. Mickey Leland, Houston; Juan Malvonado, San Juan; Sylvia Rodriguez, San Antonio; Sue Pate, Beaumont; and Billie Carr, Houston. Malvonado, Ball and Carr are Kennedy backers. Resolutions approved shortly before the convention adjourned

- Oppose transportation and storage of nuclear fuels in Texas.

- Urge legalization of bingo. Allow free public schooling for children of aliens.

- Endorse abortion procedures prescribed by the U.S. Supreme Court with federal funding for the needy.

Back collective bargaining for state and local government employ-

Two resolutions that would repeal state laws against homosexual and lesbian acts and would ban discrimination were defeated after long roll call votes.

Also failing in the final minutes of the convention were resolutions that would free all delegates to the national convention to any pledges to presi-

dential candidates and would oppose construction of nuclear power plants

in Texas. After adjournment, the national convention delegates met and elected three co-chairmen — Lt. Gov. Bill Hobby, former Attorney General John Hill and state Democratic chairman Billy Goldberg.

Sen. Lloyd Bentsen, D-Texas, and House Majority Leader Jim Wright D-Texas, were named honorary chairmen.

Final results of the 3,900 delegates' presidential preferences showed Carter was favored by 68.4 percent and won 104 of Texas' 152 delegates to the Aug. 11-13 national convention.

Kennedy had 25 percent and 38 dele-gates. There will be 10 uncommitted delegates from Texas in New York.

AND WHITE RCA SERVICES

SAVE

than \$300 million.

By any standards, these are immense amounts of money.

But a wizened Bolivian, Don Antenor Patino, went Mexico one better when he built Las Hadas, his resort complex near the Pacific Coast town of Manzanillo

It is not the total outlay of cash that is important - although \$40 million is not pin money - but the investment per room that puts Senor Patinos in a sphere all its own.

He spent more than \$200,000 per room to make his Las Hadas (Spanish for "the fairies") the most opulent. resort in the world.

If Patino wanted to make the Guiness Book of Records, perhaps he succeeded. He certainly was a miserable failure at hotel ownership.

The trouble started when Patino insisted on having a "Gala in White" to introduce the new resort to his friends. He planned his party about four months too early. The hotel was ready, the staff wasn't.

All the beautiful people came - but no one cleaned up the next day.

The beautiful birds flew away after the bash sqawking about the terrible service and the reputation of Las Hadas was tarnished from day one. So, no more beautiful people.

Which is OK, because beautiful people rarely pay for a hotel, anyway. What you need are nice middle class Americans who will spend lots of American dollars and pay the mortgage

Unfortunately, most of these people were frightened away by the image of Las Hadas as a millionaires playground which only the super-rich

The Villas del Palinar, above, in rentosk the Las Hadas golf course

on

The maids see that each marble block of your room's floor is scrubbed daily by hand. And they take such an interest in removing any tarnish from the bathtub that you feel guilty about

dirtying it again. Beach boys start at first light to rake every inch of beach to remove objects, like footprints, which might offend the sensibilities of a guest who has come to Las Hadas to escape.

Restaurants and guestrooms are being redecorated, new pool furniture has been added, cabanas now dot the beach.

Ah, but that is just the tip of the enchilada. For Casolar is going everyone in Mexico one better. The organization is even going to make Patino look like a piker. For it is spending \$1 billion to make Manzanillo the world's premier resort area.

The 1,100 acre, two-site development, designed by reaowned architect Edward Durrel Stone, is the largest privately-financed resort community in Mexico. Agent in Midland for the development is Deed Real Estate Co.

The resort includes:

La Punta, a residential area containing 270 luxury villa sites, separate beach club and tennis courts. If you want one, expect them to be fairly expensive.

Villas del Palmar, 192 condominiums overlooking the golf course of Las Hadas.

Expansion of the Las Hadas Country Club to include 17 tennis courts, a private airport and an expansion of the Peter and Roy Dye-designed golf course from nine to 18 holes.

A 1,000 seat tennis stadium.

300 more cond A private 20-acre lake

A second 18-hole golf course and 10 tennis courts.

'Look Back in Anger' opens in revival

NEW YORK (AP) - "Oh, don't try and take his suffering away from him," says the momentarily fed-up wife of the angry young man. "He'd be lost without it.'

Yep, "Look Back in Anger" time again. John Osborne's 1956 drama, once called a searing attack on the decay and snobbery of England's Establishment, bowed Thursday for a 10-week run off-Broadway

This revival, at the Roundabout, stars Britain's Malcolm McDowell, late of "Caligula" and "Time After Time." He's making his U.S. stage debut as the educated, impoverished, failed and irascible anti-hero, Jimmy Porter. It is a challenging role.

But I wish this fine actor had passed on it. At 37, he seems a tad old for a young man, angry or no. And his man comes across as a bit of a twit, a noisy featherweight and not a serious student of rage.

It doesn't help that the play, set in a dreary one-room flat in the Midlands, now shows its age. I mean, how can Porter sneer at the Establishment now that Mick Jagger and Elton John own it?

Be that as it may, we again learn Porter has married into the middle class, refuses to subscribe to its values, finds his troubles compounded and, in frustration, vents his spleen almost continuously.

Here, the staff victims are Lisa Banes as his slow, sad wife; Robert Burr as her father, a retired Army colonel; Fran Brill as her actress

# Def Leppard eases back to entertain rock lovers

**By GEORGIA TEMPLE** Staff Writer

Popping each other with towels and bantering non-quotable, humorous comments back and forth, members of the British rock group, Def Leppard, were just easing back after their recent Midland performance with Judas Priest.

After several attempts on the part of their lead singer, Joe Elliot, to make them get serious, he shruggs his shoulders.

"We're just like children," he says, laughing. The only argument he would get to that statement from some in the music industry is that they are children, with the average age in the group being only

But Joe's touchy about the subject of age.

"So what about our age," he says, immediately intense. "We play music as good as anybody else. And we can use it to an advantage to a certain extent.

It's true. While members of other rock groups may have more exposure and experience, many are also pushing the 30 or even 40 age bracket. Def Leppard

make up for in determination, drive and ambition.

None of the members had previous experience playing with another group and, as a group themselves, they have only been together since October 1977.

England. Their intention then was local gigs, rather

one playing only the top 40, another runs talk shows, Mathis-type music. Rock can be heard "10 hours a p.m. till midnight "bands that normally don't get

the British press began to notice them, articles

ence in a British and an American audience.

The money has certainly improved from the five quid they earned on their first engagement in 1978. But Joe is quick to say, "Honestly, at the moment money's not our sole objective. Maybe in five years when we're fed up. But right now, we go out there to make as many people as possible happy.

"I've always been into music. Me mother tells me that when I was five or six that I would stand on a stool in the kitchen, with a plastic guitar and sing 'When He Loves You.'"

Def Leppard has come a long way in a short period of time. Its latest album has sold 40,000 copies in England, placing it 15th in ratings in a two week time period. Here, in the U.S., the album has sold 94,000 copies, with Billboard rating the group 61.

Scheduled to appear in Midland again Tuesday night as a back-up to Scorpian and Ted Nugent, Def Leppard will perform at 8 p.m. in Chaparral Center. If enthusiasm and determination counts in the world of heavy rock, it won't be the last time Midlanders will hear the name, but it may be their last opportunity to see them in person.

# Boardroom cowboy marks 50 years in show business couldn't walk up to the bar and have a

HOLLYWOOD (AP) - This will be Gene Autry Week in Los Angeles, and the one-time singing cowboy responds in typical style: "I'm very thrilled, but I can think of a lot of performers who deserve it a heckuva lot more

than I do." Today the 72-year-old Autry does most of his performing in corporate board meetings or in the president's box of Anaheim Stadium, watching his California Angels play baseball.

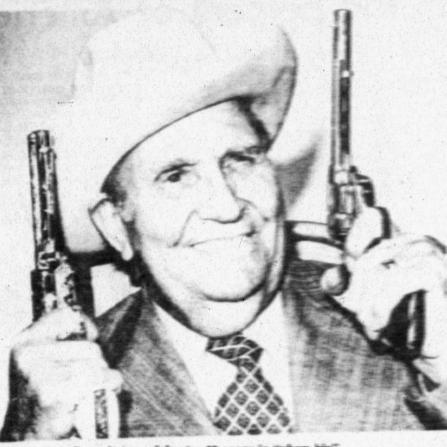

Fifty years ago, he was a 22-year-old out of Tioga, Texas, by way of Oklahoma, and he landed his first permanent job: singing and playing his guitar every day on Sears and Roebuck's Chicago radio station WLS 'World's Largest Store"). The job lasted until 1934, when Autry came to California and soon was the screen's favorite cowboy.

The golden anniversary is being celebrated this week by civic functions, including an exhibit of Autryiana at the California Museum of Science and Industry. The Museum also will present 13 weeks of Saturday matinees featuring Autry movies plus chapters of one of his two serials, the 1935 "Phantom Empire.

Local television station KTLA will present a TV special, "Gene Autry, An American Hero," a selection of his half-hour TV movies plus the features "Melody Ranch" (1940) and "Back inthe Saddle" (1941). KTLA, incidentally, is owned by Autry's Golden West Broadcasters.

Speaking by telephone from his office at the Gene Autry Hotel in Palm Springs, Autry admitted that his performing career started earlier than 1930

very young, 16, I think. I worked in a

GLASTONBURY, Conn. (AP) - Little League Tuesday. Mrs. Hart was found shot to death several miles away on Wednesday.

State police spokesman Joseph Crowley would not comment on what police were told. "When they get back," he said of the officers, "they'll sit down and

discuss what they've heard. That's all I can say.' Detectives had parked an unmarked silver police car at the edge of pine woods on the spot where Mrs. Hart's car was found, hoping its presence would jog the memories of people who had been at the field.

On Tuesday, Mrs. Hart's husband, Robert, found the body of their 14-month-old son Thomas in the couple's suburban driveway, about one mile from Butler Field. His skull had been crushed by a motor vehicle that ran over him.

Mrs. Hart, 29, a former school teacher, was miss-

Her body was recovered the next day, dumped in woods in Andover, about five miles away from home. She had been shot in the chest and head. Police have declined to comment on one report that she had been raped.

In South Hadley, Mass., Mrs. Hart's hometown, her husband and between 150 and 200 friends and relatives attended a memorial service Saturday afternoon for the mother and child.

With news reporters excluded, the mourners filed solemnly into the ivy-covered, brick First Congregational Church, which Mrs. Hart attended as a child and in which she was married eight years ago.

In Glastonbury, a quiet, wooded suburb of Hartford, residents expressed a desire to help, although some seemed frustrated at their inability to do so.

# Armored truck robbed, bandits get \$165,000

ROYAL OAK, Mich. (AP) - Three armed bandits robbed an armored truck of more than \$165,000 Saturday in a suburban Detroit shopping plaza, police said.

The gunmen, described as white males in their mid-30s, held up a Total Armored Car Service Inc. security truck about 11:20 a.m. outside the Meijer Thrifty Acres Shopping Center in this Detroit suburb, authorities said.

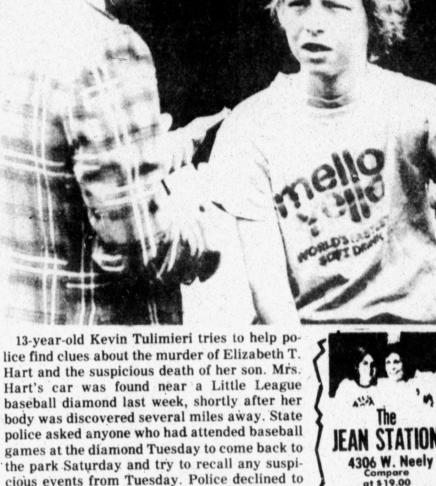

Police had said earlier that a Brink's Inc. armored truck had been robbed, but later said the vehicle was operated by Total. However, a man who said he was a Total dispatcher denied Saturday that one of the company's vehicles had been robbed. FBI spokesman John Anthony said a Total truck was involved. One guard was hit with a handgun during the holdup, but was not seriously injured, Anthony said. It had not been determined that the bandits fired any shots

The thieves' getaway car later was found in a nearby residential area, police said. Anthony said the armored truck driver fired two shots at the fleeing car, shooting out its rear window.

# Pharmacy is burglarized

BIG LAKE - Several bottles of drugs, including the federally-controlled pain-killer Darvon, anti-depressant Librix and some antibiotics were taken about 12:30 a.m. Saturday in a burglary of Reagan Professional Pharmacy.

"The druggist (George James) said they really didn't get enough to hardly do any good," said Chief ounty Sheriff's Jailer Dan West of the Reagan

cious events from Tuesday. Police declined to say whether they gained any useful information Saturday. (AP Laserphoto)

# Marines suffer food poisoning

SAN DIEGO (AP) - More than 400 recruits at the Marine Corps Recruit Depot were stricken with food poisoning shortly after breakfast Saturday, a Marine spokesman said.

Sgt. Jeff Jones said 91 of the 442 afflicted were admitted to Balboa Park Naval Hospital. The others were being observed in their barracks.

The recruits were vomiting and suffered from nausea and stomach cramps, Jones said. The first cases were noted at about 8:30 a.m.

As part of the investigation into the cause of the food poisoning, all afflicted recruits were to be asked what they ate for breakfast.

About 3,500 people are at the depot, Jones said. Navy Lt. Cmdr. Ed Darrow said the recruits admitted to the Naval facility were being treated for dehydration and were listed in satisfactory condi-

THE MIDLAND REPORTER-TELEGRAM, SUN., JUNE 22, 1980

Want work? Nothing works like a WANT AD. Dial 682-6222

Service to se

As I recall, about 15 years ago, the city of Midland bought water rights from a rancher 50 or 60 miles southwest of Midland.

#### As I remember, this cost \$500,000. Wonder if the city has any plans to use the water and if anyone ever checks to see no one else is using it? - D.A. Ross

ANSWER: John Lowe, director of utilities for the city of Midland, says the timing and price sound correct, but he believes the water rights you speak of were purchased from the T-Bar Ranch, which is located in Winkler County, near the Texas-New Mexico northern boundary line.

Mr. Lowe went on to say there is a test well authorized by the Midland City Council. Atlantic Richfield Co. has a small plant on the ranch and pays the city for the amount of water used.

#### Several years ago through the generosity of the Downtown Lions Club, the deaf and hearing impaired in Midland were provided with teletypewriters (TTYS).

At this time we were told a TTY would be placed in either the Central Fire Station or the Police Department so the deaf could call in an emergency, such as a fire or when in need of an ambulance or police. To this date none has been placed in any place.

San Angelo has only two TTYS in operation there, but they have one at the fire station there in case of an emergency.

Is there any chance of one being placed at the fire

department or police department here? -- Charles A. Archer

682-5311

ANSWER: Ray Gwyn, outgoing president of the Downtown Lions Club, says he will check with committees of the club about the installation of the TTYS. He thinks one has been installed at the fire station, and one possibly in the Midland Public Safety Building.

The incoming president of the club is Forrest Morris, 694-8878.

#### · I received an American flag for a birthday present, and would like to know what are the rules of flag etiquette? - Mrs. M.W.

ANSWER: Based on information in Scott, Foesman and Co.'s new publication, "Civics for Americans," the flag can even be displayed in bad weather, if it is during a special patriotic event. It also can be displyed around-the-clock, if properly lighted.

The book also says when the weather is bad, an all-weather flag should be used.

The union, or blue field, should always be at the top, and if the flag is hung on a wall, the union must always be on the observer's left.

When flown from the same halyard with other flags, the United States flag is hoisted first and lowered last. If flown at half-staff, the flag should be hoisted to the peak momentarily, then lowered to mid-point

Finally, flags used to cover caskets should not be lowered into the grave; they should never be allowed to touch the ground.

#### **Plants** propagate 'on the pill'

#### By IKE FLORES

WINTER HAVEN, Fla. (AP) - Birth control pills for plants? When Bob Kundtz said he wanted some for a horticultural experiment both his doctor and druggist were taken aback.

But Kundtz, known as the "wizard" of Florida's Cypress Gardens, wanted the pills, not to prevent conception but to get some plants to reproduce.

Soaked in a solution of one birth control pill to one quart of water, the plants soon sprout new offshoots complete with root systems. The offshoots are then separated and repotted as new plants.

"I first heard of it in Australia about three years ago," says the well-traveled vice president of the famous flower-and-water-ski attraction in central Florida

"I couldn't get a variegated pineapple to put out new growth quick enough. And this friend of mine said, 'No problem, old chap. Do thus and so.'

"I thought he was pulling my leg, but I kept it in the back of my mind," Kundtz says. "It sort of bugged me.

"About a year later, I couldn't get a pandanus (a member of the lily family) to throw any keiki (a horticulture term for new growth). So I went to the drugstore and asked for some birth control pills.

"There was a lot of whispering in the back of the istration for gardening.

store, and then I found out I needed a prescription for them. So, I go over to my doctor. He said, 'Bob, does your wife know?""

But Kundtz persisted through all the ribbing, got his pills and tried them out.

It really does work," he says. "Little plants come out thicker than hairs on a dog's back.

Kundtz says a gynecologist friend of his believes it's the estrogen - a growth hormone - in the pills that causes new plant growth quickly.

So far, he knows the pills work on the lily family, bromeliads and ferns.

Now, Kundtz is trying to find out whether he can get other plants to do the same. He is treating tomatoes and pepper plants in his home garden and intends to try the pills on shrubs.

'It's really too early to tell, but the peppers seem to be branching," he says. "I'm going to keep playing around with it and see what else I can

He's also interested in seeing whether the birth control pill solution would increase root systems in trees and stimulate flowering, which in fruit trees would mean more fruit or berries.

He says a home gardener can probably get results as well as anyone but jokingly warns that the pills aren't cleared by the Food and Drug Admin-

### THE NEWSPAPER BIBLE

# All Israel will be saved

But you must be careful not to brag about being put in to replace the branches that were broken off. Remember that you are important only because you are now a part of God's tree; you are just a branch, not a root.

"Well," you may be saying, "those branches were broken off to make room for me so I must be pretty good."

Watch out! Remember that those branches, the Jews, were broken off because they didn't believe God, and you are there only because you do. Do not be proud; be humble and grateful-and careful.

For if God did not spare the branches He put there in the first place, He won't spare you either.

Notice how God is both so kind and so severe. He is very hard on those who disobey, but very good to you if you continue to love and trust Him. But if you don't, you too will be cut off.

On the other hand, if the Jews leave their unbelief behind them and come back to God, God will graft them back into the tree again. He has the power to do it.

For if God was willing to take you who were so far away from Him-being part of a wild olive tree-and graft you into His own good tree-a very unusual thing to do-don't you see that He will be far more ready to put the Jews back again, who were there in the first place?

I want you to know about this truth from God, dear brothers, so that you will not feel proud and start bragging. Yes, it is true that some of the Jews have set themselves against the Gospel now, but this will last only until all of you Gentiles have come to Christ-those of you who will.

and then all Israel will be saved. Do you remember what the prophets said about this? "There shall come out of Zion a Deliverer, and He shall turn the Jews from all ungodliness

At that time I will take away their sins, just as I promised."

# The Midland Reporter-Telegram

SUNDAY, JUNE 22, 1930

**GENERAL NEWS** 

#### PAGE IC

#### CLASSIFIED

# Homeowners hot as Big D taxes soar

#### **By LAURA RICHARDSON**

DALLAS (AP) - Texans and taxes: "It's a political problem," says the legislator.

"It's unfair," says the newspaper. "It's a mess," says a disgruntled taxpayer.

It's a brouhaha par excellence in Dallas, an uproar with statewide implications. After working eight years and spending \$4 million to equalize taxes, the city fathers find themselves riding a storm of outrage over 1980 assessments.

**THEY HAD EXPECTED** questions about the new valuations, and spent \$25,000 on a light-hearted, happy-ending public relations film, "Ad Valorem Infinitim," that was supposed to explain the equalization program.

The movie, which featured a homeowner getting his taxes reduced, was never released. A city official explained that it was not realistic, since homeowners were actually going to see increases.

Homeowners saw them and didn't like them. Local tax rebel Frank Bodzin organized a petition drive to restrict taxes, and the Association of Community Organizations for Reform Now said it would push for massive neighborhood-by-neighborhood challenges of the assessments...

IN A STATE with one of the nation's lowest taxation rates, the question is more who pays than how much.

The Dallas Times Herald revealed in a series of articles that the new assessments quietly shifted the tax burden from businesses to homeowners.

Eighty-eight percent of the city's homeowners will pay higher taxes, city assessor-collector Max Noller said in early June. Residential property will shoulder 32 percent of the 1980 burden - up from 23 percent in 1979 — while business inventories will pay only 18 percent, down from 30 percent last year.

"I was very upset over the figures they showed in personal property,' said Mayor Robert Folsom. "The figures were too low. That's where all the dollars are going out (for tax

breaks). That's where the dollar difference is.

THE DALLAS MESS highlights just about every tax problem possible under the state's seemingly simple ad valorem system. From undermanned assessor-collectors offices to unplanned loopholes to over-rated real estate and undervalued inventory - Dallas has it all.

The state Constitution requires that "taxation shall be equal and uniform" and that all property "shall be taxed in proportion to its value."

The last session of the legislature passed a new property tax code, of which one of the provisions required that property be assessed at 100 percent of its market value.

In conjunction with this new law, the city of Dallas embarked on a re-evaluation program, so that residents who hadn't seen an assessor for a decade or so were suddenly hit with 1980 values on their homes.

**BUT MANY RESIDENTS** claimed that the new valuations were inaccurate, and the city - after a flood of . publicity - agreed, noting that almost 10,000 east Dallas residents who lived in homes tax assessors belatedly discovered were "unrenovated shells" had been slapped with 300 to 500 percent hikes in valuations.

The mistake raised questions about the manpower and expertise in the assessor-collector's office.

State Rep. Wayne Peveto, D-Orange, author of the new tax code and a self-styled tax reformer, says fairness and equality in taxation "has merely been a goal, because most tax offices have never had the personnel to appraise property according to its value.

According to Peveto, legislative studies show that residential property particularly lower-priced homes have historically paid more than their fair share of taxes.

"THE REASON IS expertise," he says. "Anyone can go out and appraise a \$30,000 home. But when it gets to industrial property and business inventory, many of these appraisers just don't know how to handle them.

mediately.

The result has been that in most Texas cities appraisers rarely rate business inventory. Instead, businesses "render" - that is, they declare to the tax office what their property is worth.

The practice is standard operating procedure in Texas, even though tax assessors realize it has its pitfalls.

"Personal property assessment unfortunately is at the mercy of the integrity of the owner," said an Austin city official who asked not to be identified. A legislative study published in 1977

showed that businesses generally rated their property at around 58 percent of full market value.

"I do believe that businesses undervalue themselves," said Mago Garcia, assessor-collector for San Anto-

EARL MARTIN, Houston assessorcollector, said his office "takes the position that there has been an inventory sometime in the past" when it compares the annual rendition sheets businesses file.

Despite what they know about the difficulties of getting accurate annual renditions, city assessors still claim that business accounts are "more current" than residential assessments - and in Houston, Austin and Dallas, tax offices all said that because of this they expect homeowners will pay more of the total taxes next year

Dallas, however, began backpedaling furiously when the Dallas Times Herald started publishing figures that showed an astonishing discrepancy between "full market" values.

In an area where Dallas' taxing authority overlaps the suburban Garland Independent School District, the newspaper discovered "full market value" was very definitely indefinite.

# **Eight receive** Permian scholarships

Eight Permian Basin graduates recently were selected to receive scholarships from the Permian Merit Scholarship Foundation, announced J. Conrad Dunagan, president.

William James Nordling, Robert Clifford Nordling, Debra Frances Scott-Williams, Clay Alan Bateman, Larry Charles Ledbetter, Angela Gaye Schaefer, Susan Claudette McKasle and Allan Brant Myers received four-year awards of \$1,200 each solely on the basis of merit, Dunagan noted.

However, students must attend any one of the five Permian Basin community colleges for two years and two years at the University of Texas of the Permian Basin, he added.

Scholarships by the non-profit organization are provided by persons and businesses in the Permian Basin area who support the objectives of the program, the president said.

These objectives areto honor the students in the Permian Basin who have excellent academic performance records; to encourage industrious young people in the community who may become its future leaders; and to maintain an academically strong student body in the area community colleges.

Lee High School graduate, William James Nordling, plans to study computer science at Midland College and UTPB. Nordling, son of Mr. and Mrs. Robert William Nordling, was a member of the National Honor Society, Junior Engineering and Technical Society (JETS), Midland Gem and Mineral Society, Pan American Student Forum and was librarian for the Science Fiction club.

Sponsored by W.F. Roden of Midland, the LHS graduate has received three academic letters and honorable mention in the Sul Ross State University government contest.

Susan Claudette McKasle, daughter of Mr. and Mrs. Claude McKasle, is a graduate of Reagan County High School in Big Lake. Miss McKasle plans to attend Midland College and UTPB to study criminal justice and management While at Reagan County High School, she was a member of Mu Alpha Theta, National Honor Society and the golf team. She was elected vice president of the junior class, secretary of the senior class and National Honor Society sweetheart. Miss McKasle, sponsored by Texas National Bank of Midland, is listed in Who's Who of American High School Students. Lee High School graduate, Robert Clifford Nordling, son of Mr. and Mrs. Robert William Nordling, was active in the National Honor Society, German Club, LHS Fiction-Fantasy Club and JETS. He is listed in Who's Who Among American High School Students and Who's Who Among Texas and Oklahoma Foreign Language Students. Nordling was a member of the junior varsity basketball team and has received three academic letters. Sponsored by the Midland Reporter Telegram, he plans to attend Midland College and UTPB to study

philosophy

Clay Alan Bateman, son of Mr. and Mrs. W.A. Bateman, plans to study mechanical engineering at Midland College and UTPB. The Lee High School graduate was a member of the National Honor Society, Key Club, varsity basketball and baseball teams and was an officer in the Industrial Arts Club.

Allan Brant Myers

Texas Electric Service Company in Midland is Bateman's sponsor.

Rankin High School graduate, Allan Brant Myers, was involved in football, track, basketball and church activities. Myers, son of Mr. and Mrs. Willie Myers, was a member of the National Honor Society, band, stage band and elected vice president of the National Honor Society, captain of the football team and treasurer of the senior class.

He is recipient of the Merit Award, the American Legion Award and made the honor roll all during high school. First State Bank in Rankin sponsered Myers who plans to study mathematics at Midland College and UTPB.

Debra Frances Scott-Williams, daughter of Mr. and Mrs. George Scott, is a recent graduate of Midland High School. She was active in the National Honor Society and has received a letter of commendation from the National Merit Scholarship program

Ms. Williams will attend Midland College and UTPB to study psychology. She is sponsored by Commercial Bank and Trust in Midland.

Lee High School graduate, Larry Charles Ledbetter, was a member of the National Honor Society, varsity football, track, Key Club and industrial arts club where he served as vice president. Ledbetter, son of Mr. and Mrs. H.L. Ledbetter, plans to study business at Midland College and UTPB.

He is sponsored by Citizen's Savings and Loan in Midland

Lab school looks different Teams teach old ideas a new way

#### By DAVID CAMPBELL Staff Writer

682-6222

Students in this classroom do not sit in neat rows of chairs and listen attentively while the teacher lec-

They sit on the floor in groups, relaxed and engrossed in taking measurements of their arms, legs, ears or those of a dinosaur. And they are not given grades for their performance or achievement of skills.

There is not one teacher in the room, but four teachers with teaching assistants. Lecturing is held to a minimum and teachers can be found working with kindergarten to sixth grade students on a one-to-one or group basis.

THIS PICTURE strays from the traditionallystructured classroom setting most Midland parents think of when they talk about school. But this classroom wasn't designed to be traditional. Instead, the classroom is part of a teaching laboratory provided for Midland teachers through a Title I program, Midland Independent School District and the University of Texas of the Permian Basin.

Students in this classroom could learn and retain as much — if not more — about the three "R's" compared to the traditional classroom setting, said Jo Massey, Title I coordinator and "principal" of the lab school

Teachers can try new methods of teaching "the basics" and are introduced to various classroom situations. Also, instructors can receive six hours of graduate credit toward a master's degree and a supplemental increment to their salary, noted Dr. Scott Irwin, professor of pedagogy at UTPB.

THIS IS THE first year Midland teachers have had a teaching lab, Irwin said. "In the past, most of the teaching labs were held in Odessa and Midland teachers would have to drive back and forth each day during the summer to attend the sessions."

Located at David Crockett Elementary School, about 400 Title I students are bused to the teaching lab facility, according to Miss Massey. Title I students are a grade or more behind the level where they should be.

Before the regular school year ended, parents and teachers of Title I students were notified of the program, Miss Massey said, adding that most parents were interested in continuing their children's learning through the summer.

'The parents were afraid that their children would lose what they learned in school during the summer recess," she said of the retention factor in a student's learning process.

Federal funding for the program comes from the Title I program which is budgeted for \$31,699. About \$2,000 from the Midland school district is allocated to student busing from eight Title I elementary schools, figures indicate

In the past, summer school for Title I students was handled at the eight elementary schools, Miss Massey said. This is the first year the program has been consolidated in one school.

"PARENTS WHO ARE being trained as teacher's

aides ride in the buses with the students," she said. The lab school meets five days a week in a

60-minute morning session. During that time, four teams of eight teachers - one team to a center conduct school using lesson plans developed by instructors.

Each lesson plan utilizes teaching objectives and the methods for accomplishing t

public, she would most likely avoid it.

"Some of the things I learned while teaching in this situation I will use in teaching my students," Ms. Saldana said.

Evaluation of the student's progress does not follow any formal documentation, Irwin said. "Each student is assigned a folder where he stores his work and the teacher can examine the work to determine the progress of the student," Irwin said.

As to the overall program, Miss Massey said there is no follow-up evaluation in the fall to see if participating students showed less achievement regression than those who didn't participate.

However, she noted that attendance at the lab school was very high, which might be an indicator of the program's success.

Tyrone Clater, Warrick Clater and Andrea Clater, Washington Elementary students, said they like the lab school better than the regular classroom.

When asked what they learned Friday, Tyrone and Warrick rattled off about five different names of dinosaurs - Tyrannosaurus Rex, Stegosarus and Triceratops among others.

"Themes (like dinosaurs) were chosen to motivate students into learning other concepts," Irwin said, "Once students discover that learning is fun, perhaps they will want to learn more when school in the fall starts."

PAGE 3C

objectives, Irwin explained.

Teachers must define what they plan to accomplish, how they will implement the methods for achieving the objective and determine if the student was able to learn from the teaching method," he said.

Teachers use a different theme each week to gain students' interest and at the same time introduce reading, mathematical and language arts concepts, Irwin said.

Last week the theme of dinosaurs was used to teaching primary grade students in one center the basic concepts of reading and math, he cited as an example.

Also, the lab school incorporates team teaching, large and small group instruction with multi-age and non-graded classroom situations. The team teaching method lets teachers use each other as resources to help them enrich their teaching methods, Irwin noted.

FOLLOWING THE hour-long classroom session, teachers attend class where they are taught how to teach certain concepts, said Dr. Pete Inetach, professor of pedagogy at UTPB.

A DeZavala kindergarten teacher, Josefina Saldana, indicated she liked the lab school's informali-"Just look at how the kids are working at ty. the assignment," she said, pointing to several first graders sitting on the floor leisurely measuring feet with a 10-link, multi-colord plastic chain.

At that session, Ms. Saldana explained those first grade students were introduced to the concept of measuring objects using a counting system of 10. After each measurement, the students would record the results on a chart while learning to count to 10.

"I noticed that sixth grade students introduced to this concept have applied it to learning the metric system," she added.

**REGARDING INSTITUTING the informality of** the lab classroom to the regular classroom, the kindergarten teacher said she would like to do it. But because of the teacher's accountability to the

### Afghan shopkeepers heed Moslem strike call

NEW DELHI, India (AP) - Most shopkeepers closed their stores and students marched through the streets of the Afghan capital of Kabul Saturday, responding to a call by Moslem rebels for a general strike against the Soviet presence in Afghanistan, a reliable source reported.

The source, quoting contacts in Kabul, said authorities responded by moving tanks and armored vehicles into the city and by sending helicopter gunships overhead. But they also were reported to have used loudspeakers on trucks and distributed handbills in an effort to keep the peace, and there were no reports of violence.

An official of the Kremlin-supported Afghan regime confirmed in New Delhi that many Kabul shops did not open as usual Saturday.

In February, an estimated 300 persons were killed during several days of anti-Soviet rioting in the Afghan capital. A second wave of disturbances, commonly referred to as the "children's revolt." swept Kabul in late April and early May.

Unofficial reports from Afghanistan said thou-sands of schoolgirls and schoolboys, who taunted Soviet and government soldiers, are still being held in prisons and that more than 300 others were killed by gunshots and beatings.

High school and university students were reported Saturday to have marched toward the British Embassy, but authorities apparently did not immediately move against them

# ENGINEERS: MEET THE UNIQUE CHALLENGE OF OIL & GAS PRODUCTION!

Anadarko Production Company is in the business of exploration, drilling and recovery of oil and gas. Our company is not the largest in the industry, however, we pride ourselves on our size. It enables us to manage our growth without losing personal involvement. We are financially stable, backed by the strength of our parent company, Panhandle Eastern Pipeline. We have been able to reinvest an ever increasing portion of our revenues in researching better methods, securing new properties, and providing the expertise to meet the challenges facing us in the 1980's.

Anadarko currently offers career opportunities for Petroleum, Chemical, or Mechanical engineers for our Liberal, Kansas office.

If you are looking for a career opportunity which encourages independence and creativity, investigate Anadarko.

### PIPELINE PLANT ENGINEER

Availified individuals of this position will possess a B.S. in Petroleum, Chemical or Mechanical Engineering with at least four years professional experience in pipeline, gas processing, and/or refinery facilities. General responsibilities will be the design of pipeline construction and related facilities, gas processing, plant design, economizing and/or modification of existing plants and pipelines.

## **PRODUCTION ENGINEERS**

Qualified individuals for these positions will possess a B.S. in Petroleum or Mechanical Engineering with a least two years professional experience. General responsibilities will include planning and coordinating drilling, production, and general engineering activities.

Anadarka Production Company offers competitive salaries and bnefits which include an excellent relocation package.

If you would like to consider becoming a part of the Anadarko team for the, '80's, then take the initiative for your career and contact us directly for more information regarding these and other opportunities with Anadarko.

Contact Karl Harman, Randy Rogers or any member of our professional or management team or send your resume in confidence to:

we need accounting professionals who are ready to move up

# Tracy Gann aids North

HOUSTON (AP) - Mike Capel of Spring pitched the first three innings and made a relief appearance in the ninth to lead the North to a 5-4 victory Saturday over the South in the Seventh annual Texas High School Baseball Coaches' All Star game, and Midland's Tracy Gann contributed with a key hit in the victory

Capel, the North's starting pitcher, faced only nine batters and saw his team jump to a 3-0 lead before he left the game at the end of three innings.

The North had scored one run in the top of the third when Barry Davis of Frisco doubled to drive in another, and then tallied when Gann singled.

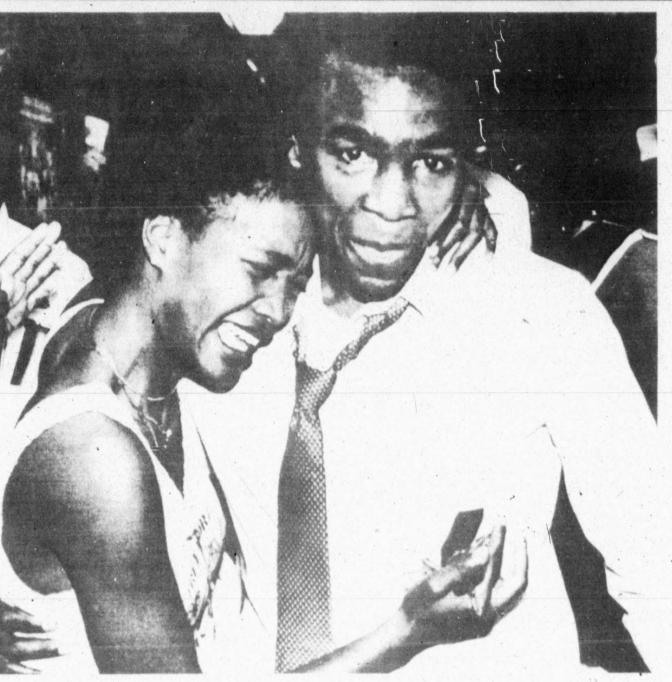

The North added two more runs in the fifth and the South scored once in the fifth and sixth before their two-run rally in the ninth.

Xavier Sanchez of Wharton scored for the South in the ninth on a passed ball and Steven Swierc of Falls City doubled, sending Mark Machalec of Alief Hastings across the plate to make the score 5-4.

Capel then made his relief appearance and picked up the save when Swierc was caught in a run-down between third and home on an attempted double steal

The losing pitcher was Pat Meeks of Bridge City

The win was the first for the North in four years. The South leads the series by a 4-3 margin.

Former welterweight champion Sugar Ray Leonard is greeted by his weeping sister Sandy at a Washington airport Saturday. Leonard lost his title

to Roberto Duran in a 15-round bout in Montreal. (AP Laserphoto)

# Where does Sugar Ray go from here?

#### By WILL GRIMSLEY **AP Special Correspondent**

MONTREAL (AP) - Where does Sugar Ray Leonard go from here? Anywhere he pleases.

One defeat out of 28 professional fights - particularly one so close that the balance might have swung the other way by a furious round or two cannot dull the ardor of the boxing game He remains America's darling. At 24, Sugar Ray still holds the strings to potential \$8 and \$10 million purses among the welterweights. He is the catalyst of his division. They still must bounce off him - even the marvelous Roberto Duran, his conqueror in Friday night's World Boxing Council title bout; Pipino Cuevas, the grim, destructive World Boxing Association titleholder and Tommy Hearns, the 20-year-old stringbean who hasn't lost a fight.

Duran, old "hands of stone," beat the popular, charismatic kid from Palmer Park, Md., fair and square in Friday night's shootout in Montreal, where Leonard's fistic career got its blastoff with an Olympic gold medal circuit television didn't know which way the verdict would go.

One of the three judges, who was announced as having it a draw originally, found later that his scorecard gave Duran a one-point edge in a 293-point calculation. It was almost equally close with the other two judges.

The fight dispelled the cloak of

poration choreographed the entire spectacular, stands to earn \$8-10 million depending on TV closed-circuit receipts. Duran was guaranteed \$1.5 million.

After the punishing fight, Leonard, on the verge of tears, was vague about future plans. He said he wanted to "put the pieces together" and alter

# Clark shuts off Diablo bat power

#### By RICHARD VINCENT **Sports Writer**

It was First National Bank Night Saturday at Cubs Stadium and Midland took advantage, cashing in Randy Clark's fourth complete game to defeat El Paso 2-1 and put third place for the first half of the Texas. League West race in the security vault

Jared Martin and Jesus "Chico" Alfaro each knocked in a run for Midland, Alfaro's eighth-inning single, which he deposited in left field, breaking a 1-1 deadlock and giving the Cubs the winning tally.

The two teams complete their current series and close first half play tonight (6:30) at Cubs Stadium. Midland owns a two-game bulge over the fourth place Diablos, who they've now beaten three straight.

Clark checked the heavy-hitting Diablos on five safeties to raise his record to 5-3. He ran into mild trouble in the second, when the bases were loaded, the third, when El Paso scored its lone run, and in the sixth, when two Diablos were left standing. Still, the hard-throwing righthander got stronger as the game wore on and the wind kicked-up, saying he felt in control the entire contest.

Asked about the blustery conditions, Clark said, "It felt good, you know, and I think it was really to my advantage because it kept the ball in the park.

Clark said his fastball was hopping, adding, "but I was getting my curve over so they couldn't sit on my fastball.'

He was particularly tough against El Paso's version of a SWAT team, Jeff Brunansky, who got one hit, and Daryl Sconiers, who went hitless. Clark said facing those active sticks didn't cause him to lose any sleep. "Well, it doesn't worry me," he said, "I can't change my game."

Rick Steirer wasn't as fortunate as Clark, being tagged with his sixth loss in nine decisions. He was cruising along with a three-hitter through five, but the Cubs finally sent him to the showers in the eighth. Charlie Phillips faced one man in relief.

But by the time Phillips came in,

jury.

row

the party was over.

Midland's first run came in the third as catcher Mike Shepston drilled a triple to the furthest reaches of left center to open the inning. Martin followed with a long fly out to center which easily brought Shepston home.

In the eighth with one out, Martin slapped an opposite-field double to the corner in left. He went to third on Scott Fletcher's third hit of the night, and scored on Alfaro's hit.

El Paso's third-inning run came after Tom Bhagwat singled and Brunansky doubled. Following Rich Brewster's ground out, Sconiers grounded out, scoring Bhagwat from third.

**BRUIN BREWINS** — Chicago Cubs farm director C.V. Davis was on hand Saturday to present awards from the Topps Chewing Gum Co. to M-Cubs Fletcher and Dave Stockstill for their play last season...Stockstill was MVP of the Midwest League while playing for Wausau, Wisc., while Fletcher received the same honor for his play at Geneva, N.Y., of the New York-Penn League ... Fletcher's parents and grandparents were in attendance Saturday night...Gary Krug, who went 0-3 saw his seven-game hitting streak snapped...Tonight's promotion is Campbell's Kids Night...Most of the more than 2,000 fans on hand Saturday made a bee-line for the exits when wind and clouds shrouded the Stadium in the fifth ...

Edwin Moses close to consecutive win record

But the tough, bearded Panamanian's victory wasn't all that overpowering. Leonard put his head against that of Duran — the matador drop-

ping his cape and getting into the pit with the bull - and battled him shot for shot for 15 brutal rounds. Neither man dropped. Neither re-

treated. Neither even quivered. It was like a war and, when it was over, the 46,000-plus spectators on the scene and the millions watching on closed-

mystery and answered previously unanswered questions.

Could young Leonard stand up under Duran's buzz-saw, unorthodox pounding? Yes. Was Leonard thrown against the bull too quickly in his budding career? Perhaps. Had Duran slipped or was he still - as many contend — the best fighter pound for pound in the world? The answers: no and yes, in order.

Sugar Ray, whose one-man cor-

The 46-year-old Albuquerque driver won the pole position for the 500-mile race — the second leg of champ car racing's triple crown - with a two-lap qualifying average of 185.491 mph.

But Unser has done that twice before on the Pocono's demanding 21/2mile tri-oval without winning the race.

In fact, the veteran driver never has started lower than 10th in eight previous Pocono races. Yet he's never finished better than fourth.

"There's two things I'd like to accomplish here," the older of the two racing Unser brothers said. "I'd like to finish the race and, second, I'd like to win it. I can just feel in my bones how much I'd like to win here, because this is one of the few races I haven't won."

Unser, who has won two Indianapolis 500s and three California 500s. won't be a shoo-in, though. The 33-car field is loaded with good equipment and big-name drivers.

Three-time Pocono winner A.J. Foyt and former Indy winner and world driving champion Mario Andretti will join Unser at the front of the 11-row grid.

Andretti, a local hero from nearby Nazareth, Pa., never has won here, either

Other former Indy winners Al Unser and Rick Mears, who teams with Bobby Unser and Andretti under the colors of the Penske racing team,

are considered top contenders. And nobody is about to forget about Johnny Rutherford and his "Yellow Submarine," lurking quietly in the middle of the second row after a disappointing qualifying effort.

Rutherford, who drove his yellow grounds effects Chaparral to victories at Ontario and Indianapolis this year, crashed the car he used in those races during a practice session.

The hard-driving Texan hopped into his team's identical backup car - in which he finished second to Unser two weeks ago at Milwaukee - and found the suspension wasn't set up properly for Pocono's three demanding t7rns.

"I wouldn't count us out just yet," Rutherford said grimly after his qualifying effort. "We ran pretty well, considering, and we still have some time to tinker around with the car before the race starts.'

He said he first wanted to care for his wife, Juanita, so she could "erase

and forget what happened." It's recalled that Sugar Ray, after winning an Olympic gold medal here in 1976 and becoming an immediate media personality, went into professional boxing reluctantly. He yearned to go to college and become a businessman. Illness to his mother and father and family economics dictated another course.

Is there a chance that Leonard, with no more security problems, might now hang up his gloves and pursue his original aims? A chance, yes. A likelihood, no.

Pride plays tricks on the human psyche. There will be both inner and outside pressures for Sugar Ray to fight again, to redeem this one defeat and to go to the superstar status for which he appeared ordained.

Duran is 29, a tremendous fighter, but concededly nearing the other side of the mountain peak. Sugar Ray has a half-dozen more years to mature, improve, perhaps become unbeatable

Even with the first splotch on his record, he is the most engaging and fascinating in boxing, Duran to the contrary

With his choirboy face, his articulate speech, his poise and personality, he is boxing's kingliest treasure. No. other figure - not even Duran, not even an aging Muhammad Ali - can create such instantaneous excitement, particularly in America.

tition to determine the finest allaround woman track and field athlete in the United States.

Anderson, competing in her first pentathlon of the year, won the long jump at 21 feet, 8¼ inches and the 100-meter high hurdles in 13.85, finished second in the shot put with a career best of 44-0, tied for second in the high jump with a personal record of 5-101/2 and ran the final 800-meter race in 2:11.42.

Jane Frederick, the American record-holder in the penthatlon and a two-time Olympian, led after the first three events, but was forced to withdraw because of a strained left hamstring.

"I probably shouldn't have started (competing today), but I didn't have the courage to say 'no' to this meet,' said Frederick, who added that she injured the hamstring several weeks ago and reinjured it last Monday.

"I haven't been 100 percent for the past year and it's driving me crazy," she added. "I can't afford to be driven crazy - makes you want to quit. I don't want to quit - I enjoy it so much. I just want to be healthy."

Meanwhile, Linda Waltman of Fort Worth, Texas set a world record in the 800-meter race in the penthatlon with a time of 2:09.30.

# Borg, Navratilova head to Wimbledon for repeat titles

WIMBLEDON, England (AP) - Wimbledon, the most conservative sports event in the world, starts its two-weeks tennis festival Monday. still resisting change.

If the bookies have got it right, even the singles champions will be unaltered. They make Bjorn Borg a heavy favorite to win the title for a fifth straight time, and they put defending champion Martina Navratilova at the top of the women's list.

The tournament itself will certainly be in the old groove. The All-England club, which has run Wimbledon since 1877, doesn't believe in change

It is unruffled by a Government commission of inquiry which suggested Wimbledon should follow the example of every other major tournament and accept commercial sponsorship, and put a half-million pounds (\$1.15 million) more into British tennis.

Wimbledon spurns sponsorship because it does not need it. The club knows that, barring disastrous weather, more than 300,000 will squeeze into the grounds to watch the 12 days of tennis. It already gives financial support to the national game.

It remains apart from the rest of the circuit in other ways. It does its own seeding, politely using the computer rankings of the Association of Tennis Professionals (ATP) for guidance only. It does not acknowledge the Grand Prix supervisors, who keep a strict disciplinary eye on every other tournament.

So if a player throws tantrums on the Center Court he will be dealt with by tournament referee Fred Hoyle, with the backing of a committee steeped in a century of tradition.

In prize money Wimbledon keeps pace with the times. Borg will be gunning for a first prize of \$46,000 and Navratilova for \$41,400.

The bookies had to offer short odds against Borg and Navratilova to to protect themselves. In this betting-conscious country every office worker and shop assistant likes to have a flutter on the big events and tends to put his money on the favorite.

If Borg and Navratilova win again, the betting shops may have to pay out millions. So the bettor is discouraged by odds that make betting scarcely worth while. You have to bet 4 pounds on Borg to win 5 pounds

But the tennis world knows the chances of Borg being upset are bigger than that. The Swedish star himself knows it.

'The most difficult thing at Wimbledon is getting past the first round or two," Borg said.

"Anything can happen. I don't know what my form is going to be like. The grass courts sometimes behave strangely. If the big servers are on a lucky day they can knock out the good players. It always happens at Wimbledon."

It has almost happened to Borg himself during his four-year run of Wimbledon triumphs.

In 1977 he was two sets down to boom-boom Australian Mark Edmondson in the second round. In 1978 he trailed two sets to one against the big-hitting American left-hander Vic Amaya in the first round.

The draw appears to have been kind to Borg. If all goes well he will reach the last 16 before coming up against a big server. Then he could have men like America's John Sadri or Australia's Colin Dibley in his path.

Of the top contenders, third-seeded Jimmy Connors has the toughestlooking draw. He is in the same section as Sherwood Stewart of the United States, Pat McNamara and John Alexander of Australia - all heavy servers who could wreck a few dreams if their serves are on.

Borg and Connors avoided tournament play and spent the last two weeks practising on grass.

But No. 2 John McEnroe was eager to win the warm-up event at London's Queen's Club last week and did it in impressive style, not losing

a single set and dropping only a few points on his service. In the past, more than one Wimbledon champion has tuned up by competing at Queen's Club and taking things gently, losing in an early round. McEnroe took a different view.

"The more matches I won the longer I would stay in the tournament

and the more match practice I would get," he sad. "So I figured the best thing was to win it."

Vitas Gerulaitis, the No. 4 seed, played at Queen's and lost to Australia's Kim Warwick in the semis. But it happened in a freak wind, which upset form.

Of the 16 seeded players in the men's singles, two have pulled out with injuries - Harold Solomon of the United States, No. 11, and Yannick Noah of France, No. 12.

All the other top stars are playing except Guillermo Vilas of Argentina, who is recuperating from an appendicitis operation.

Navratilova arrived late in Britain and gave herself a bare week's tennis on English grass. She fell to Betty Stove of the Netherlands in the third round of the warm-up event at Eastbourne. It did her image no good as the big one approached.

But Navratilova's big serve-and-volley game suits the Wimbledon grass and she remained the favorite.

Tracy Austin, seeded No. 2 behind the exiled Czech, has a chance to become Wimbledon's youngest woman champion for more than 90 years. On the day of the women's final, July 4, she will be 17 years 7 months

Maureen "Little Mo" Connolly was 17 years 10 months when she first won the title in 1952

The youngest-ever champion was Lottie Dod in 1887, who was 15 years 10 months. Lottie had an advantage over her rivals because, being a schoolgirl, she didn't have to conform to the laws of decency and play in ankle-length skirts, and thus moved about the court more freely. That is one tradition Wimbledon has left behind.

one tradition Wimbledon has left behind. If British heroine Virginia Wade gets beaten, the crowd's sympathy might switch to third-seeded Chris Evert Lloyd, two times title winner. She has a British husband, Davis Cup player John Lloyd, and retired for two months this year to spend more time with him. Since she came back to tennis Lloyd has not lost a match. She won the Italian and French Opens on clay, and a grass court tournament at

and the state of the second se Chichester a week ago.

# **Frustrated Bob Gilder** retains 2-shot golf lead

ILE BIZARD, Quebec (AP) -Journeyman tourist Bob Gilder struggled to a hard-won round of par 70 and retained a 2-stroke lead Saturday in the third round of the \$350,000 Canadian Open Golf Tournament.

But it was a frustrating experience for Gilder, who had to scramble to recover from the trouble he found with a driver that suddenly became erratic.

'It was kind of frustrating," said Gilder, who had opened the day with a 3-stroke lead and played his front side 2-under-par

"I thought I could really put some distance between myself and the rest of the guys.

"It's frustrating to finish only 6under. I thought I played better than that today. I had a chance to open things up, particularly over the front side, but I just couldn't put it away. "But," he said, with a look ahead to

Sunday's final round of the chase for a \$54,000 first prize and a national championship, "there are only two

ing career

Two more shots down at even par was Joyce Kazmierski. Sally Little. Vicki Fergon and Shelley Hamlin were at 145.

Jerry Pate, a former U.S. and Canadian Open title-holder, came from seven strokes off the pace with a solid, no-bogey 65-the best round of the tournament-and moved into second at 206

"I feel like my bad days are over," said Pate, who has been in something of a slump for more than a year. Ben Crenshaw dropped birdie putts totaling about 65 feet on the last two holes that finished off a 2-under-par 68 and put him three shots back at 207. "I'd like nothing more than to win

this tournament," said Crenshaw. "I haven't won since early in 1979 and I've been second seven times in the last 12 months. I feel like it's time to win. This tournament is very high on my priorities.

#### By REX WORRELL **Hogan Park Golf Pro**

The Hogan Park Golf Course will hold a Low Net (handicap) tournament to kickoff the 1980 National Golf Week, which runs Monday through Sunday. There will also be a special prize for Low Gross.

The entry fee is \$5, plus green fees. Gift certificate prizes will be awarded. The number of places paid will depend on the number of entries for the week. You can play in your own group during any day of the week. Be sure to sign up in the golf shop before you tee off. For more information, contact the golf shop.

Not only will you be getting prizes for your efforts, but you will also be helping National Golf Charities such as the United Voluntary Services, Junior Golf Foundation, USGA Turf Reserach, Golf Course Superintendent's Scholarship Funds, PGA Benevolent and Relief Fund, Women's Western Golf Foundation and PGA Education. Your entry fee will be considered a contribution even though prizes will be awarded to the tournament winners.

The first two sessions of the Junior Program at Hogan Park have been completed. However, junior golfers still interested in Junior lessons, the Parks and Recreation Department will hold another free golf lesson clinic July 7-11 with Rex Worrell and Terry Wilks serving as instructors. The 12-17 year-old group will meet rom 9 a.m. to 10 a.m. and the 18-year and older group will meet from 10:15 to 11:15 a.m. Register at the Parks and Recreation Department or the

The Hogan Park Men's Golf Association will hold a Two-Man Partnership tournament July 4-6 with the following format - July 4: Two-Man Scramble. July 5: Two-Man Low Ball. July 6: Two-Man Scramble. Flights will be made after the second day's round. Entry fee is \$25 per man, plus green fees. Sign up at the golf shop.

The 9-Hole Division of the Hogan Park Women's Golf Association held a Criers event Thursday with Ginny Piette taking home first place honors and Frances Stahl runnerup. They will play a Most Pars event this Thursday with the pairings listed below

The 18-Hole Division of the HPWGA will hold a Criers event this Thursday with pairings listed below.

Thursday's sHole Pairings: Rita Boe, Marge Cardwell and Dorothy Koonce: Mary Davis, Barbara Larsen and Harriett Barnes; Peggy Mattina, Jeanne Allen and Rosalee Neiberger; Betty Williams, Jane Gill and Gerry Fesmire; Frances Stahl, Leah Sutcilife and Dorothy Huchton: Jean Connor, Margaret Rhea and Nancy Cox; Betty Cope, Ginny Pietle and Rosa Lee Cook; Peggy Parkins, Lois Guthrie and Jean Schooler; Ruby Pennington, Margaret Moore and Rosa Legg; Joan Dunn, Wima Allenson and Carrol Gillette.
 Thursday's 18-Hole Pairings: Florence Mailey, Merri-lyn Walker, Fern Barnett and Dot Turk; Annelle Mack, Dede Plank, Shiriley Mayes and Polly Mackey. Margaret Stricker, Charlotte Marburger, Nell Kimball and Dorothy Melzer; Pat Walker, Jane Thomas, Ella Heath and Marilynn Philpy; Bernice Cox, Margaret Mills, Bernice Webb and Merla Ketner; Wilma Cox, Maxine Buskirk, Gene Velten and Renee Belue; Lucha Haskins, Muriel Inman, Jane Wagner and Betty Cobb; Gloria Dellenback and Betty Mathis.

#### Tracy Austin captures title in Wimbledon tuneup

EASTBOURNE, England (AP) - Tracy Austin faltered, recovered and defeated Australia's Wendy Turnbull 7-6, 6-2 Saturday to win the Women's Grass Courts Tennis Championship, a tuneup for Wimbledon next week.

Austin, 17, who is bidding to become Wimbledon's youngest champion since Lottie Dod won in 1887 at the age of 15, was in firm command at the end of the match and won a first prize of \$21,850.

But at one stage in the first set she was in serious trouble, looking more bothered than her opponent by the wind which swirled around the grass court.

golf shop.

Austin led 5-1, but lost touch with the match and allowed Turnbull to take the next four games and level at 5-5. The American pulled her game together and won the set on a tiebreaker.

In the second set Austin raced to 5-0, dropping only eight points. Turnbull came back briefly to win the next two games.

Austin is seeded No. 2 behind defending champion Martina Navratilova at Wimbledon.

Navratilova, on her first appearance in Britain this year, lost to Betty Stove of the Netherlands in the third round.

American LL city

tourney to open

Five of Midland's best Little

League teams will be trying to earn

the title of "city champions" this

week as the American Little League

city championship tournament begins

a six-day run at Henderson Field

The tournament is a double elimi-

nation affair and action on all six

consecutive days begins at 6 p.m. The

tournament features five division

champions from the leagues of West-

ern, Mid City, Eastern, North Central

and Tower. Tower is the host team

Monday's action will feature West-

ern against Mid City and Eastern

against North Central. Tower drew

Tower will meet the winner of the

Eastern-North Central contest on

Tuesday while the Eastern-North

Central loser will be in a survival

battle against the loser of the West-

The winner of the Western-Mid City

Action will continue at least

through Friday. However, if an addi-

tional game is needed, there will be a

championship contest on Saturday. A

victory on Friday by the team coming

through the loser's bracket would

North Central's Indians recently

force a Saturday contest.

# Go out and catch a record

state record fish? It's possible in light of figures compiled by the Texas Parks and Wildlife Department which show 13 new record fish catches within the last two years.

No fisherman alive ever thought the state largemouth bass record would be broken. The record - 13-pounds, 8-ounces - stood since 1943. But it happened in February, although the fish caught for the new record was a Florida largemouth black bass.

Texas fish records are very interesting. Biologists knew some records would be broken, due to stocking nonnative game fish. And they wanted it that way. We've always wanted more fish in Texas waters to catch. And we as fishermen wanted fish grown to trophy sizes. By looking over the records, things are going our way.

The record for the relatively new hybrid white/striped bass has been broken repeatedly. Most of the records have been set at San Angelo's.

#### White wants new pact

KANSAS CITY, Mo. (AP) - Frank White, All-Star second baseman of the Kansas City Royals, says he will ask to be traded unless the club renegotiates his contract.

The Royals' starting second baseman since 1976, White has been a vital part of Kansas City's three division championships

1.62

3.54

Nasworthy Reservoir. The current record is 17-pounds, 8-ounces.

The smallmouth bass, stocked to fill a niche in some of Texas' older reservoirs, is one of the best records for an angler to shoot for. The current record is 5-pounds, 12-ounces. But it's not expected to stand too long, meaning West Texans might have a good shot at the mark, since smallmouth have been stocked heavily in Lakes Mackenzie, Meredith, Amistad and Greenbelt.

The chances of catching a record striped bass are up for grabs. The current state record is 33-pounds, 31/2ounces, but stripers are growing to 50-pounds in other states and there's already some larger than that swimming Texas waters. Toledo Bend, Texoma, Amistad, Falcon, Whitney and several more lakes are striper hotspots

In May 1979, a record 76-pound yellow, or flathead, catfish was taken out of East Texas' Lake Murvaul.

A new record for the freshwater books is the saltwater flounder. Does that make sense? Yes, since the species has been stocked into several Texas reservoirs. Now there's a record to shoot for, the current best being 9-pounds.

Another exotic gamefish, the Nile Perch, offers a cast at the state record, which is 12-pounds, 1-ounce.

The record for the Tiger-Muskie, a cross between northern pike and a muskellenge, is 9-pounds, 1-ounce.

The current record for the little redear sunfish is 3-pounds, 4-ounces. And the brown trout record now stands at 6-pounds, 8-ounces. Top walleye snagged was 10-pounds, 4ounces

It's amazing to us the number of new state records established the last two years. However, I think the record for the alligator gar may stand for a long time. Set in 1951, the fish weighed 279-pounds. But who knows, it may be broken someday.

Astros continue Dome victory binge

HOUSTON (AP) - Vern Ruhle won his fifth straight game, and Art Howe smashed a two-run homer to lead the Houston Astros to a 4-2 victory over the Pittsburgh Pirates Saturday night before 45,867 spectators, the largest crowd of the season at the Astrodome.

Ruhle, 5-1, allowed 11 hits, struck out four and walked none in 7½ innings. He also added an RBI single in Houston's sixth victory in a row and 14th straight at home, a club record. Joe Sambito came

on in the ninth to get his eighth save. Howe's home run, his second of the season, followed a Danny Walling double and gave Houston a 3-) lead in the fourth. Walling's double extended his hitting streak to 10 games.

Omar Moreno put the Bucs ahead in the first when he led off with an inside-the-park homer that rolled past Walling in right field and went all the way to the fence

Houston tied the score in the bottom of the first on two-out singles by Joe Morgan and Jose Cruz and an **RBI** single by Walling

The Bucs cut the Houston lead to 3-2 in the fifth. Moreno singled with one out and went to third on a single by Mike Easler. Moreno then came home on Bill Robinson's sacrifice fly.

The Astros increased their advantage to 4-2 in the seventh on a one-out double by Dave Bergman, a single by Alan Ashby and Ruhle's run-scoring single.

#### Knight carries Reds over Cards

CINCINNATI (AP) - Ray Knight's two-run double highlighted a five-run Cincinnati seventh inning that carried the Cincinnati Reds to an 8-5 victory Saturday over the St. Louis Cardinals.

Frank Pastore, 9-4, gave up eight hits en route to his sixth complete game of the season.

Kim Seaman, who replaced St. Louis starter Jim Otten, walked the bases loaded with one out in the seventh. Knight then greeted reliever John Littlefield, 2-1, with a two-run double off the left field wall. George Foster was walked intentionally and Cardinal shortstop Garry Templeton threw wildly into the Reds' dugout trying to double up catcher Joe Nolan at first base, letting in two more runs. Dave Concepcion then singled Nolan home from second.

#### Evans, Clark sink Phillies, 9-3

SAN FRANCISCO (AP) - Darrell Evans drove in three runs and Jack Clark continued his hot hitting with a double to trigger a three-run fifth inning which led the San Francisco Giants to a 9-3 victory over the Philadelphia Phillies Saturday.

The Giants stroked four consecutive hits off Randy Lerch, 2-9, as they broke a 2-2 tie in the fifth. Clark's hit was his second double of the game and his 11th hit in four games.

Ed Whitson, 5-7, who had an RBI single in San Francisco's four-run eighth inning, allowed seven hits, three by Greg Gross, as the Giants won their fourth straight game and their ninth in the last 12. Evans doubled for two runs in the eighth.

In the fifth inning, Clark moved to third on Rich Murray's infield single and scored on Jim Wohlford'd single to right. Joe Strain then doubled to left, scoring two runs. Strain was 3-for-3 with a pair of doubles in the game.

#### Braves rip Chicago Cubs, 8-0

ATLANTA (AP) - Dale Murphy drove in four runs with a single, double and home run to back the three-hit pitching of Doyle Alexander as the Atlanta Braves downed the Chicago Cubs 8-0 Saturday night.

Chris Chambliss also belted a three-run homer and

NEW YORK (AP) - Jim Spencer hit a three-run homer in the first inning and Tommy John became the American League's first 10-game winner as the New York Yankees beat the Oakland A's 5-3 Saturday for their ninth consecutive victory.

Spencer, who drove in five runs Friday night, lined his fifth home run of the season over the fence in rightcenter field off Mike Norris, 8-5, after Graig Nettles singled with two out and Reggie Jackson walked on four pitches

The Yankees' only other hit, until Nettles led of the eighth inning with his 11th home run, was Bobby Murcer's run-scoring, two-out single in the second after Norris issued walks to Bobby Brown and Willie

## Rudi lifts Angels over Bosox, 4-2

BOSTON (AP) - Joe Rudi's tworun double off the glove of Boston left fielder Jim Rice capped a three-run third inning that brought the California Angels a 4-2 victory over the Red Sox Saturday.

With Boston leading 2-0, loser Chuck Rainey, 7-3, gave up a two-out single off his glove by Carney Lansford. Rod Carew doubled to left-center field, scoring Lansford. After Jason Thompson walked, Rudi drilled the ball to left. Rice raced to the base of the wall and leaped. He got his glove on the ball but it bounced out and caromed away for a double. Rudi drove in his third run of the game in the eighth with a single after Carew singled and was sacrificed to second by Thompson.

Boston had touched Chris Knapp, 2-4, for runs in the first two innings. Rick Burleson opened the first with a walk, took second on Jerry Remy's bunt single, went to third on a grounder and scored on a sacrifice fly by Tony Perez. With two outs in the second, Butch Hobson singled and scored on an opposite-field double by Dave Rader.

## Putnam's single saves Texas in ninth

ARLINGTON, Texas (AP) -Pinch-hitter Pat Putnam scored Jim Norris from second base with a oneout single in the bottom of the ninth to give the Texas Rangers a 2-1 victory over the Toronto Blue Jays Saturday night.

Lefty Jon Matlack earned his fourth victory against three losses while Toronto reliever Joey McLaughlin was tagged with his fourth defeat in seven decisions

Norris led off the ninth with a single and was sacrificed to second by Jim Sundberg. The Blue Jays intentionally walked Johnny Grubb to get to Bud Harrelson, but Rangers Manager Pat Corrales inserted Putnam. Matlack scattered seven hits and

struck out eight. Toronto took a 1-0 lead in the second when Otto Velez singled, moved to third on an error by shortstop Harrel-

son and scored on a single by second baseman Garth Iorg. Texas tied it 1-1 in the sixth on singles by Al Oliver and Rusty Staub

and a sacrifice fly by Richie Zisk. Jerry Garvin relieved Toronto starter Jesse Jefferson to start the

seventh and lasted 11-3 innings before McLaughlin was called on. McLaughlin put down a Ranger rally in the eighth. Bump Wills sin-

gled off Garvin and stole second.

Randolph. Oakland outhit the Yanks

John, 10-2, was helped by two de-fensive gems in the fifth inning after Dave McKay's leadoff double and Rickey Henderson's bunt single put Oakland runners at first and third with none out and the A's trailing by a run.

With Henderson running, Dwayne Murphy grounded sharply to second baseman Randolph, who fired home to nail McKay. The runners advanced to second and third as third baseman Nettles made a diving stop of Mike Heath's smash and threw him out and Randy Elliot flied out to end the threat

#### Stone blanks Mariners

BALTIMORE (AP) - Steve Stone pitched a five-hitter, and Eddie Mur--ray cracked his 12th homer of the season Saturday night as the Baltimore Orioles defeated the Seattle Mariners 9-0.

Stone, 9-3, the winningest pitcher on the Orioles staff this season, struck out seven and walked two. He was touched for a two-out double in the first inning by Dan Meyer and four singles, one by Meyer.

#### Brewers hit Money pot

KANSAS CITY, Mo. (AP) - Don Money drove in three runs with a pair of homers, and Lary Sorensen scattered nine hits to lead the Milwaukee Brewers to a 5-1 victory over the Kansas City Royals Saturday night.

Money, who started at second base for the injured Paul Molitor. slammed a two-run shot to left in the third inning to give the Brewers a 3-0 lead, then followed with a solo blast down the left field line in the sixth to make it 4-0.

#### Wynegar cools Indians

BLOOMINGTON, Minn. (AP) -Butch Wynegar drove in all three Minnesota runs with two singles and a double Saturday to give the Twins a 3-2 victory over the Cleveland Indians

Geoff Zahn, 6-9, pitched 81-3 innings to pick up the victory. Zahn now has allowed just one run in his last two starts. Wayne Garland, 2-1, also went the distance and took the loss.

#### Wilcox beats Chisox

CHICAGO (AP) - Milt Wilcox scattered five hits for his fifth successive complete-game victory, pitching the Detroit Tigers to a 4-1 victory over the Chicago White Sox Saturday.

Wilcox, 7-4, struck out four batters and walked two and got most of his ort from Steve Kemp and Juhn Wockenfuss. Kemp scored twice and drove in one run and Wockenfuss drove in two runs and scored once.

## Detroit seeks to control unruly fans

DETROIT (AP) - The Detroit City . Council is considering an ordinance that would prohibit fans from bringing potentially dangerous objects into Tiger Stadium.

1 .... Marine .....

The proposed ordinance was prompted by debris-throwing at Monday's baseball doubleheader between the Detroit Tigers and Milwaukee Brewers.

Several people were ticketed and others were ejected from the park for their rowdy behavior. There also were some arrests.

1202 ANDREWS HWY

PHONE 694-9536

said before the start of Saturday's game both teams will be warned against knockdown pitches. The two teams wind up the four-game series with a doubleheader Sunday.

# DR. NEIL SOLOMON Measles worse than chickenpox

**Dear Dr. Solomon:** As a mother of three children, I feel I almost qualify for a medical degree. The usual assortment of cuts, bumps and diseases experienced by my youngsters has given me cause to learn more about medicine than I would have liked. One thing that continues to puzzle me, though, is how to distinguish between measles and chickenpox. Is there some way a layperson can tell thee apart? — Mrs. V.B.

Dear Mrs. B.: Before responding to your question, I would urge all parents to see that their children are immunized against measles as soon as possible after they reach the age of 15 months. It is not necessary to wait until a youngster is ready for school before before taking this very important step. However, there is no immunization against chickenpox (varicella), and many doctors believe that none is necessary.

Dr. David Durack, an associate professor of medicine at the Duke University Medical Center, and chief of the division of infectious diseses, describes measles as a moderately severe disease. It has a 10- to 12-day incubation period, with early cold-like symptoms including runny nose, sore and red eyes, and a fever that precedes the rash by two to four days. The fever may go as high as 104 defrees or even higher. A short time before the rash becomes visible, children often develop small white spots - known as Koplik's spots - on the inside of their mouths

The principal sign of measles is a flat, blotchy red rash that starts on the face, spreads to the trunk, and may even extend as far as the palms of the hands and the soles of the feet. The rash lasts from a week to 10 days.

The symptoms of chickenpox, on the other hand, generally are fairly mild. The main symptoms are a slight

# RINGING THE BELL Take another look at the black church

With BOB TIEUEL

According to Editor Raymond Campbell of the Texas Epistle, in a period of unprecedented black Christian challenge, the people need to hear a strong voice coming from the black church. "Frankly, I am appalled at the quiet voice of the black church which does not raise the crucial issues of unemployment, housing, education, crime and the many issues which confront people — the aftermath which leads to Jonestown," he said.

Campbell says the black church has often been

fever and some itching. The rash primarily affects the trunk and face and is seen less frequently on the arms and legs. It begins as small red patches that eventually develop into fluid-filled blisters, and lasts about a week.

Very often the blisters break, particularly if they are scratched. They then dry up, forming a crust and leaving a small brown patch that later disappears. Prolonged scratching can result in infection and permanent scarring.

The main concern about measles is the possibility of serious complications. These include ear infections that may result in deafness, bronchitis, pneumonia and, occasionally, severe encephalitis (an inflammation of the brain) - Such complications may occur either during the course of the illness or even years later.

Dr. Durack cautions that children with chickenpox should be kept away from adults who are undergoing chemotherapy for leukemia or other malignancies. Drug therapy can lower the body's resistance to infection, and an adult can get a second case of chickenpox. In older persons, the disease is much more serious.

As for German measles (rubella), the symptoms are similar to those of measles, but much milder, and usually last for three to four days. Immunization against German measles is recommended for women of childbearing age in order to protect their unborn children from birth defects.

(If you have a medical problem, see your doctor. If you have a medical question, write to Neil Solomon, M.D., 1726 Reisterstown Road, Baltimore, Md. 21208. Dr. Solomon cannot give personal replies but will answer as many questions as possible in his column.)

# Science teachers reveal concern at decline in class enrollments

THE MIDLAND REPORTER-TELEGRAM, SUN., JUNE 22, 1980

#### By KEVIN McKEAN AP Science Writer

EXETER, N.H. (AP) — Science education in U.S. high schools is deteriorating and many graduates lack the basic knowledge needed in today's technical society, educators say.

Teachers and consultants at a week-long meeting on secondary school science here say enrollments in their fields are declining, teachers are scarce and achievement scores are dropping.

"Students are drifting away from taking science unless required to," said Paul DeHart Hurd, professor emeritus at Stanford.

Hurd said the problem was "serious because of the increasing need for citizens to understand science and technology to make informed decisions about their own welfare."

The conference, which runs through Sunday at Phillips Exeter Academy, has brought together 37 leading high school science teachers, many of whom say they are struggling to maintain quality in the face of declining student interest and school system support.

Part of the problem stems from the early 1970s when most schools relaxed course requirements.

Dr. Al Buccino of the National Science Foundation said about 60 percent of students were taking at least one science course in 1972-73, compared to fewer than half today. The loss is primarily in 11th and 12th grade chemistry and physics, the most advanced courses.

Meanwhile, high school students' scores on the standardized national exams have declined about 2 percent to 3 percent a year since 1969.

"A few students seem to be taking more and more

**Campbell Kid's Night** 

**Home Tonight** 

-VS-

El Paso

6:30 p.m.

science. But the gap is widening between those who are committed and talented and the majority of kids who seem to be ending their study of science and math at an increasingly early age," Buccino said.

A National Science Foundation report due to be submitted to President Carter next month will compare U.S. science education unfavorably with that in Germany, Japan and the Soviet Union. A National Academy of Sciences committee meets next week to discuss the same issue.

The problem is compounded by a scarcity of instructors. A National Science Teachers Association survey found a shortage of physics teachers in 72 percent of the school districts and of chemistry teachers in 68 percent.

"The reason is that a student graduating with a university degree in physics can make \$7,000 to \$10,000 more in industry than he can in teaching," said Tim Ingoldsby of the American Association of Physics Teachers.

Some educators, like Hurd, are calling for a sweeping revamp of the science curriculum such as followed the Russian launch of Sputnik in 1957. U.S. science courses have changed little since then, they say.

But teachers at the conference said they could make do with more basic help, such as teaching materials tied to current events, an exchange program with university science teachers, a lighter course load or more lab supplies.

called a sleeping giant because it has not provided the leadership necessary to deal with such issues as crime, racism, poverty, exploitation, unemployment, inadequate housing, inferior education, insufficient health care, injustice and concern for the rights of women and children and the elderly.

THE BLACK CHURCH is being called upon to lead a massive mobilization for social change. according to Bishop C.D. Coleman, presiding elder of the Christian Methodist Episcopal Church, which closed its Northwest Texas Conference in Midland last week. He urged members to take an active part in the election proces this fall or we may regret that we did not help select our national leaders who will shape our destiny for years to come.

The black church is the only institution in the black community that is owned by the black community and in turn it is the black church that owns and operates the major institutions of higher learning in the U.S. Many of these institutions are facing financial challenges, and black leaders are calling upon the church to excert every influence on the federal government to assist in this time of crisis.

A large group of black ministers recently met with President Carter in he White House and reviewed the black church-related college future with him. Results will be published soon.

**CHRISTIANITY** is not a sit-by-the-sidelines religion, states Jessie Jackson, and blacks can find allies in white Christians who once were hostile to blacks. These same leaders declare that unless the church uses its power to acquire economic clout, we (blacks) will never be accepted in this society. What do you think, bellringers?

And in Dallas, preparations are being made to entertain the Dallas-Fort Worth annual conference of the C.M.E. Church that opens Monday at Cedar Crest C.M.E. Church, the second of five conferences to be held by Bishop Coleman. It is reported that a large number of West Texans and New Mexicans will attend the confab.

# Pollen problems now plague Arizona

#### By MICHAEL A."CHIHAK

and wheezing, and you're thinking of leaving Brook- And there are new things being used in landscaping lyn or Milwaukee or Pittsburgh for the much-adver- to cut water use. ... It's hard to predict what effect tised dry, healthy climate of Tucson, consider this: they will have in the future. All those places have lower polien counts than Tucson.

An allergy specialist says Tucson's annual pollen count is about 7,000 grains per square inch. In must be encouraged to use plants that emit little Brooklyn, Milwaukee and Pittsburgh, the count pollen is about 4,000 grains.

"Tucson now has as much pollen during the year as many cities in the East and Midwest, cities many allergy sufferers have fled to escape allergy problems," said Dr. Jacob Pinnas, who heads the allergy clinic at the University of Arizona Health Sciences Center.

Airborne pollen is a significant contributor to hay fever, asthma and a variety of allergies.

The irony of the situation is that most of the pollen problem here is caused by vegetation that was brought from other places to make the desert look green

"The amount of pollen has increased tremendously from when we first started doing pollen counts," said Harry Hayes, who is in charge of the pollen count at the Tucson Clinic, a medical center.

"And it's due to the fact that people moving here from different parts of the country find it expedient to make their yards look like back home," Hayes

Tucson, with its low humidity and year-round warmth, has been praised as the place to help clear lungs and dry out sinuses. One 1960s television commercial advertised a nasal spray as the equivalent of "sending your sinuses to Arizona."

In the narrative for a slide-and-tape presentation he recently put together on Tucson's pollen problem, Pinnas said 90 percent of the area's adult population came from elsewhere.

'And up to half moved here for health reasons, primarily for respiratory disorders such as bronchial asthma and hay fever," he said:

But he said many are finding little relief because of an abundance of exotic and imported vegetation, such as mulberry and olive trees and Bermuda grass. Those are three of the largest contributors to Tucson's airborne pollen problem.

'Back 20 to 30 years ago, people who came here for their health found considerable relief," Hayes said. "But now as they grow older, they have found a greater sensibility to pollens.'

Pinnas said: "Some people come here for a trial for a few weeks," he said. "They are not allergic to our pollen, but they become sensitized. ... Many people never had allergies before moving here."

Many people are helped by Tucson's climate, Pinnas said. Advantages include fewer molds, which can aggravate some allergies, and a lack of mites in common house dust, a major problem in other places

But he said the pollen problem is not abating. "I

EMPLOYMENT OPPORTUNITY RETAIL SECURITY PERSONNEL **Experienced in Internal & External** Protection. See other employment opportunities in our ad on page 4C

think it's probably getting worse," Pinnas said. "There's an increase in Bermuda grass, an increase TUCSON, Ariz. (AP) - If you're tired of sneezing in weeds, an increase in olive and mulberry trees.

Hayes and Pinnas said change could be a long time coming. They said people must be told of the pollen problems that a lot of vegetation causes, and they

The best thing is to use native vegetation, especially cactus and palo verde trees, Hayes and Pinnas said. Citrus trees and other types of vegetation that

produce colorful flowers also emit little polien since they are pollinated by insects, birds and bats instead of the wind

'There's not an easy answer," Pinnas said. "We can legislate against the planting of mulberry trees. ... But many people are non-allergic, and they can't see a reason for having to get rid of their pollen-producing trees and vegetation.'

# You need your own Survival Kit in this changing financial world.

Compare the growth of \$100,000 in a Survival Kit" versus conventional 8% certificate savings. \$152,120 in

Survival Kit

**\$24,387 greater increase** in savings over an ordinary savings plan for a person in a 50% tax bracket.

30% TAXPAYER 511.632 greater increase even at a 30% tax bracket. That's what would happen for a saver, age 61, who deposits \$100,000 at 8% and saves to age 67 in the example above

Inflation and taxes go hand in hand to damage many people's plans for financial independence and a comfortable retirement. Inflation puts you in a higher tax

bracket without increasing your buying power. And those higher taxes eat into the growth of your savings. One answer is the Survival Kit. It defers federal and state income taxes on the interest your savings earn. The dollars that otherwise would go for tax stay in place to earn interest on themselves. Depending on your tax bracket, your savings can grow

twice as fast. The Survival Kit can offer you this lifesaving advantage in growth because it is a group annuity plan underwritten by American Life and Casualty Insurance Company. But it is nothing like the traditional annuity which holds funds at a low, fixed rate of return.

Instead, it combines the advantages of modern, high-return certificate savings, with the advantages made possible by this annuity plan. In addition to the crucial deferral of taxes. you gain surprising withdrawal privileges, a variety of valuable estate planning benefits, and the option of choosing between lifetime retirement income payments or any other form of withdrawal that meets your needs.

Call us today for full information on all the ways the Survival Kit can help you plan your future in this changing financial world.

#### Your Survival Kit outperforms ordinary savings after retirement

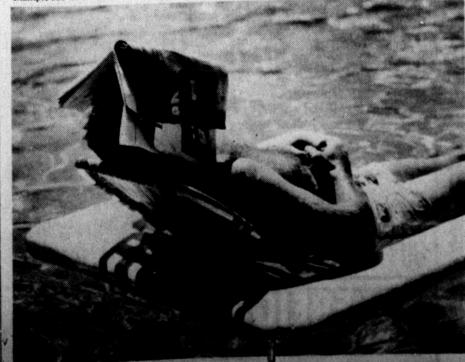

When \$10,000 a year is withdrawn from each of the 6-year totals shown in the first chart, the Survival Kit's tax-deferral feature continues to pay extra benefits,

**Balance remaining** Spendable income: Total after 10 years of after 10 years of \$10,000 withdrawals \$10,000 withdrawals

# More corruption indictments seen in oil-rich Gregg County inquiry

#### By ALAN SAYRE

LONGVIEW, Texas (AP) — Federal authorities say more indictments are expected this year in a long-running investigation into alleged corruption in oil-rich Gregg County — an inquiry that already has brought down the sheriff, a county commissioner and two other county officials. And one investigator who looked into allegations of wrongdoing in the East Texas county as long as 20 years ago says the area is known to authorities as "a little Duval County."

Duval County — located in far South Texas — was shaken during the 1970s by a federal and state investigation into corruption which led to the convictions of several top political leaders there.

The first round of indictments in Gregg County, involving alleged law enforcement protection of illegal gambling activities, resulted in convictions last December against former Sheriff Tom Welch, suspended County Commissioner William Satterwhite, a former justice of the peace and two ex-law officers.

"We're still looking at some public officials," said James A. Abbott, special agent in charge of the FBI office in Dallas. "We anticipate other indictments later this summer."

Welch and his four co-defendants who prosecutors said "soiled and sullied" their oaths of office "as sure as they spat on the American flag" were found guilty of federal racketeering charges in Tyler. Welch, former Justice of the Peace Charles Cashell and former sheriff's captain Billy Ray Roach were convicted of protecting illegal gambling on the midway of the Gregg County Fair.

Welch, Satterwhite and former Chief Deputy James Cochran also were convicted of conspiring with county law officers to ambush three men at a county-owned equipment barn in 1974. The alleged plot was unsuccessful.

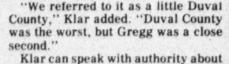

A savings and loan official in Longview, Irving McCracken Jr., said many residents were surprised by the investigation.

"The reaction initially was that we were going to support our sheriff until the due process ran out," he said. "Now everyone has gone back to trying to make Longview a good place to live"

But the developments in Gregg County came as no surprise to Otis Klar, a former investigator for the Department of Public Safety and the Texas attorney general's office.

Klar, now an investigator for the Nevada Gaming Control Board, said the attorney general's office was asked to assist with grand jury investigations in Gregg County as far back as "15 to 20 years ago."

"We never got into any prostitution or gambling," Klar said. "The allegations mostly involved stealing by county officials ... contracts ... kickbacks .../ and using county funds to buy equipment for their ranches," he said.

Duval County and its style of corruption as he was one of several members of the attorney general's staff assigned to Duval County in the 1970s.

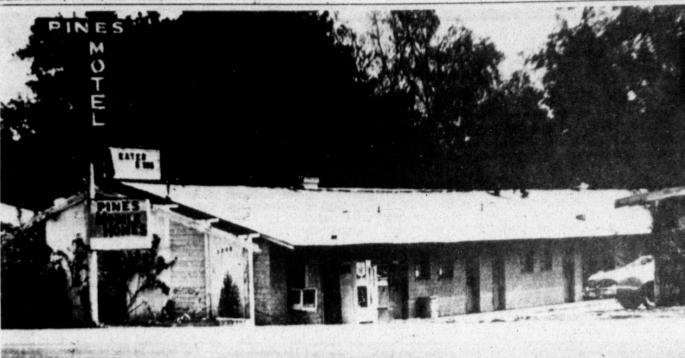

Six others have pleaded guilty or been convicted on federal charges stemming from investigations into three illegal gambling operations near Longview and Kilgore.

In a recent development, four people — including a former justice of the peace — were indicted in connection with a federal investigation into a complaint by authorities that a house of prostitution operated out of the Pines Motel at Kilgore.

In that case, Gregg County Constable Dwight Watson resigned his office after entering a guilty plea to a single count of a perjury indictment on June 2. The charge contended that Watson lied when he told a grand jury that he had not received "one thin dime" from operators of the Pines.

A former investigator for the DPS and the state attorney general's office who asked to remain anonymous said Texas authorities often received complaints concerning the Pines Motel.

"When I was with the attorney general's office we would get complaints from travelers who were harassed into leaving (the motel)," he said. "The complaints were referred to the Department of Public Safety."

# COWBOYS aren't alone anymore

These boots really do seem to be made for walking and that's just what W. M. "Hoot" Gibson, vice president and trust land manager at First National Bank, uses them for. Gibson is enjoying the recent surge in boot popularity

among businessmen, but he has worn them all his life. He grew up on a ranch near Holiday and developed a love he still has for the comfort of boots, which many people share. (Staff Photo by Edward McCain)

#### **By SANDI BREEDEN** Lifestyle Writer

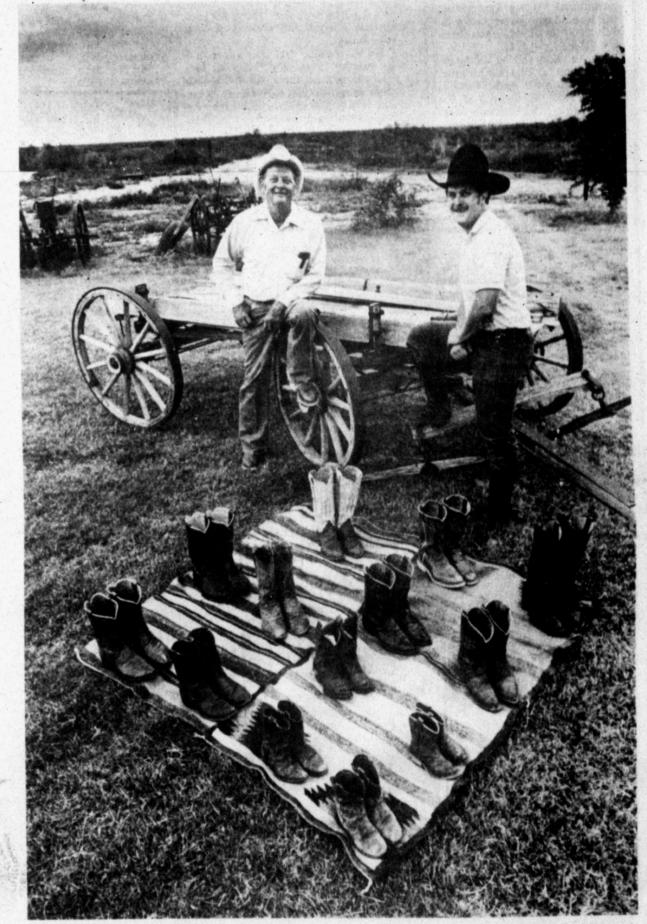

Seeing a cowboy without boots on is like J.R. Ewing not being devious.

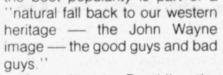

It has never been a secret that boots were part of a cowboy's dress, but they are becoming so popular, even businessmen, all kinds, can now be seen with their boots peeking out beneath their business suit. And more women can be seen with boots on with their jeans and some are even wearing them with skirts."

Just as the variety of business suits and types of jeans differ, so does the selection of boots

'Some of my best boot customers are businessmen," said Rod Franklin, manager of M.L. Leddy's and Sons. "We are seeing more professional men wearing boots to work and nationwide, boots are becoming more popular," he added.

Franklin says the western wear popularity and ultimately the boot popularity is part of a

According to Franklin, the popular leathers for making a dress boot are ostrich, anteater, lizard and alligator. "These leathers are softer, more supple and have a prettier shine," said Franklin.

Elephant ear or oil-tanned calf make popular work boots because "they are a durable, heavier leather," said Franklin. Other characteristics of the popular work boot, he said are a high, 14-16-inch top and a high, riding heel with a slant. As far as which type of toe is more popular Franklin said the younger generation likes the round toe while the middle age prefers a pointed toe because "that's what they grew up with."

Ruby Wells, owner of Wells Boot City, has also noticed an increase of businessmen buying dress boots. "Quite a few busi-

## Nostalgia catches on in old theaters

LOS ANGELES (AP) - The heavy throbbing of the pipe organ reverberates through the theater, like 360-degree stereo. On the screen, gray and whray and white figures in exaggerated makeup move in jerky pantomime.

Yes, it's a scene from the '20s. But it's also a scene from the 1980s, as a movement born of the nostalgia craze catches on in forgotten old theaters and concert halls across the country. A new generation is discovering, along with their parents and grandparents, that the theater organist's accompaniment of silent films wasn't just the best that could be done with limited technology. It's an art form in itself.

DEAR ABBY

One of the best-known practitioners of that art, and one of the half-dozen still making a living at it, is 74-yearold Gaylord Carter.

"WHEN THE MUSIC is correct and fitting to the scene, it's not going to be noticed. Only when the music is blatantly wrong will it be noticed," said Carter, who finds his skill in demand these days.

"Nobody paid attention to us, it was all taken for granted," Carter said of the old days. Quite a contrast to his performances now, where he is expected to perform solos, showing off his own dexterity and the unique capabilities of the theater organ. The silent film accompaniment is just one

friends.

'Saturday Night.'

'Once in a While.

Now and Then

part of the show

"I find more interest in what I'm doing all the time." Carter said. "There's an enthusiastic reaction from the audience. I'm there whooping it up, taking bows, doing modern things like 'Star. Wars' and 'Chorus Line.' We don't just have a big nostalgia swoon."

But although most of his audience today comes to hear him play more than to see an old film, Carter said, "after the overture, when they get lost in the picture, they've forgotten I'm there. I find myself involved in the picture, and the music is just a part of it. I tie the image and the musical reaction together and create a kind of happening.

# Young lovers need more than cooling

Midland over 25 years

Winwood Mail, Odesse

10:00-9:00 Mon. thru Set

#### By ABIGAIL VAN BUREN

DEAR ABBY: Our son who just turned 17 and his girlfriend who is 16 have been going steady for 10 months. They insist that they are "in love," and we know for a fact that they have been sleeping together. (They admitted it.) We feel that they are not mature enough for such a serious relationship.

We have asked that they agree to a six months' "cooling off" period, during which time they will both date other people but not each other. At the end of this period if they still feel the same about each other, they may then go out with each other.

The kids think we are being very unfair to ask this of them. What do you think, Abby?-CONCERNED PARENTS

DEAR CONCERNED: You are not being "unfair," but you are being unrealstic. Most teen-agers who think they are "in love" and are sexually active will find a way to be together no matter what.

As concerned parents you should make sure your children know all the facts in order to prevent unwanted pregnancy and VD. And please don't feel that giving them information is the same as giving them permission. It's not: it's simply being realistic and lovingly protective. •

DEAR ABBY: Last year Kenny, my husband of 10 years, walked out on me and our two children, claiming he had found a "new love." For eight months we heard nothing from him. Suddenly two weeks ago he called to say that he had broken up with his girlfriend, and that he realizes he still loves me and wants to come home. In the meantime I met another man

# AT WIT'S END Taking a trip where friends have been and had better time

#### By ERMA BOMBECK

Every time my husband and I take a trip, we have visions of coming home and sharing it with our friends

We don't expect to enter the city on donkeys traveling streets lined with palm-carrying enthusiasts, or deliver a message from a hillside while thousands sit at rapt attention

But is it too much to ask for a small group to listen politely and occasionally say, "That sounds wonder ful!" or "I hope you took pictures"?

Well, it never happens. We always draw the couple who (a) were there 20 years ago before it became run down with tourists, or (b) saw the only thing there worth seeing

The other night, we regaled a group with our trip to Athens. We told them we had seen the Acropolis by day and night, Hadrian's Arch, Mt. Lycabettus, Constitution Square, the Royal Gardens, the Stadium, the Athens Cathedral, the National Archaeological Museum, the Gennadeion, Daphni, Eleusis, Piraeus, the Temple of Poseidon and Cape Sounion. One of our guests, Stan, looked at me and said, 'You didn't eat at Styros Herculonburger?" I shook my head. "Then you didn't see Greece," he snorted. As his wife entered the room he said, "Doris, can you imagine the Bombecks went all the way to Greece and didn't eat at Styros Herculonburger?" Doris dropped into a chair like she was just bitten

Investment buying marks fall fashion

only future threat might

be an overload of op-

**Copley News Service** 

NEW YORK - Fashions for fall '80 stress there is anything a busy beauty, elegance and loads of accessories rath- attempts at style dictaer than extremes or a new look.

In deference to the inflation-recession and milady's pocketbook, New York's fashion designers are giving the nation's women a chance to add to rather than replace their wardrobes.

They call it investment buying.

The increased cost of pure fabrics, which generally have replaced the synthetics, have put those pretty little pure silk blouses or the little black dress in the \$150 up class while a pure wool or even a wool blend suit or coat can cost from

\$350 up. However, the styles are more classic than daring and are touted to "last through the decade. More than 42 design-

ers have shown the nation's fashion writers their new fall-winter creations during fashion week at the Plaza Hotel.

'Women today would rather buy one good, long-wearing dress or suit that will take them anywhere," says Eleanor Lambert, fashion expert and sponsor of the shows.

"It took all the 1970s for women and fashion to finally get their roles straight," says Lambert. "That mysterious, awesome phrase, 'they are wearing,' evaporated as the arts and skills of acquiring a personal style became everybody's game, and the shambles left by the '60s freak-out an almost invisible scar. 'Eighties-wise, the

tions," she adds. "If beading, feathers and batwing sleeves rather than the Pierre Cardin woman fears more than wide, padded shoulder tor it is lack of direction. -Skirts run the gamut As of fall 1980, however, from pleated, slim lines there is no danger of to full pleats to balloon being abandoned to a reand bulkies. The provoc-

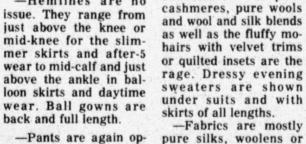

play of 'Do Your Own ative front and side slits Thing II' even with all have been replaced with the options.' modified kick pleats. Here are highlights of the fall fashion picture: -Hemlines are no

-Major trends range from the Edwardian and Gibson Girl leg-of-mutton and balloon sleeves, lace jabots and insertions to the Hapsburg splendor echoed in regimental trimmings, ruffles and fur borders to the modern art and science fiction age of cutional with an anythingbism and Picasso ab-

stractions. - Silhouettes offer the hourglass look, the blouson, the torso, the straight-line chemise and the hemline ruffles as well as flared skirts and A-lines along with the asymmetrical slant of skirts starting at the

to go on the blink. To cut off "Mork and Mindy" i the middle of an episode may send some viewers into a frenzy that could cost them plenty. Consumers should learn to shop for home repair

Shop carefully for

home repair services

**Copley News Service** Few experiences are more traumatic for the modern American family than for the television set

services as carefully as they shop for the television and other appliances that need the repair.

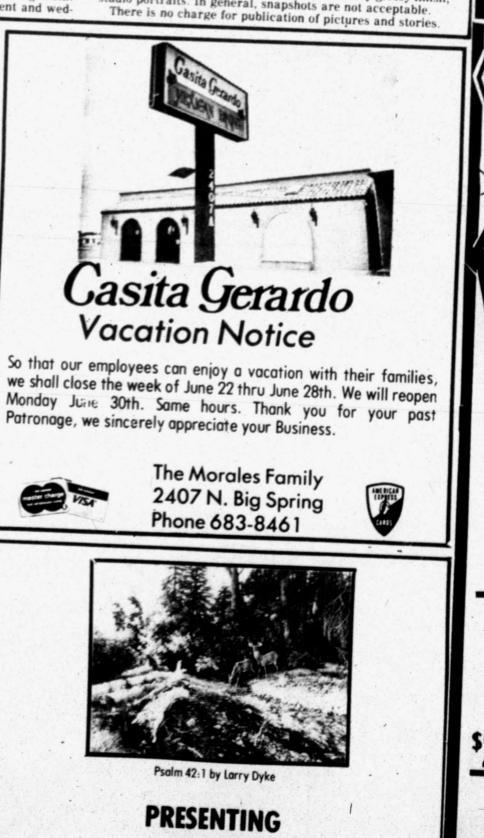

The Maytag repairman, so say the ads, is a lonely guy who doesn't have anything to do. Unfortunately, many of his counterparts make their own work by ignorantly or perhaps fraudulently repairing items that don't need much work. One study in New York by a consumer affairs group showed that of eight different repairmen who were asked to fix a television set (the set needed only one tube replaced). there were eight different estimates. The final charges in seven out of eight were as much as 110 percent overstated. Higher than necessary fees were charged and brand-new parts were needlessly re placed

Similar results were obtained in a test of washing machine repairmen. Because few consumers are knowledgeable about the inner workings of televisions and other appliances, repairmen across the country are able to get away with such shenanigans.

One way to find honest repairpersons (and there are obviously many who are completely honest) is to rely on the advice of a friend who has used the service. If this is not fruitful, try calling the manufacturer for a recommendation of a repair service in your area. By no means should consumers be hoodwinked by the same kind of tactics that sell worthless products on television-meaning, misleading advertisements. Many people will turn to the Yellow Pages and let their fingers do the walking into a ripoff. Shady dealers will often take out big ads in the phone book in order to appear established and respectable. The same operators will also list themselves under two or three names, but a careful reading of the ads can reveal a common phone number.

Once you find a repair service, the vigilance has just begun. If the repairman must come to your home, make sure you receive an estimate before authorizing his visit. Check with a few other shops to compare this estimate.

# Mendell replaces Byrd as production manager

L. H. "Larry" Byrd of Midland, division production manager, Midcontinent Production Division, Exxon Co., U.S.A., has retired after 43 years with the company

Dan Mendell III, who served as operations manager in the Southeastern Division in New Orleans, has been named to replace Byrd.

Byrd joined the company in 1937 in Talco. He served in var

director of West Texas Chamber of Commerce, director of the Better Business Bureau, director of the Midland Chamber of Commerce and director of Midland Memorial Hospi-

In 1978, Byrd was named president of the Permian Basin Oil Show. He is a native of Jacksonville and received a B.S. degree in chemical

Messer, secretary; Duane Adams, treasurer, and John Paniszcyn, president. They were installed at a meeting last week in the Midland Hilton.

## Three strikes final in Gulf

HOUSTON - Natural gas discoveries in three areas of the Gulf of Mexico off Louisiana and Texas were announced by Tenneco Oil Exploration and Production. All three tracts were acquired by Tenneco and partners in the November 1979 lease

commercial quantities of natural gas was indicated by log analysis. Test

The wells and their locations are: Sabine Pass Block 11, held jointly bid of \$54,399,000.

High Island Block A-515, with Tenneco Oil and Pogo Producing Co. having 75 percent and 25 percent working interests, respectively; in 202 feet of water about 120 miles south of Galveston, and drilled to a total depth of 7,400 feet. The government received a bonus of \$15,680,000 for this lease.

Development plans are being formulated for all three leases.

# Energy solution available but 'price must be paid'

#### By MAX B. SKELTON **AP Oil Writer**

HOUSTON (AP) - John E. Swearingen-says the nation's energy problems are capable of solution in the coming decade but the economic magnitude of the task is awesome. "All that is required is that we

increase domestic production of every energy source available to us oil, gas, coal, shale oil, nuclear power," Swearingen said.

"In order to do so, however, we are going to have to pay the price.

The chairman of Standard Oil Co. of Indiana and immediate past chairman of the American Petroleum Institute said that, in his opinion, in excess of \$400 billion in constant dollars will have to be spent over the decade of the 1980s to sustain current levels of crude oil and natural gas production

"Expressed in current dollar terms, the required expenditure will exceed \$800 billion," he said.

"FOR THE PURPOSE of comparison, the Manhattan Project which developed the atomic bomb during World War II cost \$3 billion, the equivalent of about \$15 billion. And our greatest effort, which put an American Astronaut on the moon, cost \$25 billion in the late 1960s.

Writing in "SpaN," Indiana's quarterly employee-stockholder publication, Swearingen said energy is a program many times the size of the space program

"And that leads to one inescapable conclusion: All of us, as Americans and consumers are going to have to pay more for energy," he said.

'We simply cannot have the energy of the 1980s and beyond at yesterday's prices. And the sooner the politicians face up to this fact and transmit it to their constituents, the sooner we can get down to the business of building a secure national energy future."

In a very real and direct sense, Swearingen said, the nation's energy future will largely determine its future as a nation

"OUR GREAT industrial society was built with abundant and timely supplies of energy," he said. "Without those supplies, the engine that drives our economic system and sustains our very way of life would sputter to a halt. Thus, the energy problems we are grappling with today affect our civilization in the most basic way.

Chief among those energy problems, Swearingen said, is crude oil.

"As we move into the decade of the 80s, every oil company, every consuming nation, and for that matter every oil producing nation, has a vital concern about the continuity of supply and price," he said.

Swearingen said the United States last year imported about 43 percent of its oil requirements and this year's figure will be similar.

He added that last year's bill for oil imports came to about \$60 billion, a figure that is expected to jump this year, with the price increases already imposed by the Organization of Petroleum Exporting Countries, to about \$85 billion.

#### "Consider the magnitude of that figure for just a moment," he said.

"TO PUT IT IN relative terms, it represents the equivalent of the United States giving to foreign oil producers all the stock in General Motors and Ford, Exxon and Texaco, DuPont and Dow, and General Electric," Swearingen said.

"And keep in mind that this is to pay for 1980s imports only. Every year thereafter, for as long as our national energy policy is one which holds domestic prices below replacement costs and thus encourages consumption, limits production, and relies on imports to fill the gap, this massive transfer of wealth will continue.

The unpleasant but unavoidable fact, Swearingen added, "is we are held hostage to OPEC."

"We have no control over what they will sell us, and we have no control over the pricewill pay," he said.

"OPEC plays the tune; and we are forced to pay the piper. And ultimately, down the road lies economic chaos.'

NOR IS FISCAL chaos all the nation has to fear, he added.

"If one can locate Iran, Afghanistan, the Strait Mormuz, and the Persian Gulf on a map, one can easily understand the threat posed to our supplies," he said.

'And the situation is worsening. Storm clouds continue to thicken over the Middle East, and the most minor accident could set fire to that tinder-

# Synthetic Fuels Corp., Exxon give new life to synthetics fuel industry

By LYDIA CHAVEZ The Los Angeles Times

For more than a decade proponents of shale oil have insisted that it was a matter of only a few years - and a few dollars per barrel in the price of oil - before commercial production of the potentially huge fuel source was technologically and economically feasible.

has also developed a model, called "Permisso" to help guide companies through the permit maze. Two Colorado counties will carry the brunt of shale oil's initial develop-

volved. The Department of Energy

ment. Rio Blanco County will grow from its present population of 5,300 to 24,000 in eight years, and Garfield County will mushroom from 20,000 to

ment of Housing and Urban Developmnt and the Department of Energy to determine what kind of government aid would help head off urban problems

Locked into the marbled rock that runs through three basins in Colorado, Utah and Wyoming are 1.8 trillion barrels of oil. The industry contends that of this, 600 billion barrels nearly four times the proven reserves of Saudi Arabia and more than 20 times the proven reserves of the United States - are recoverable. About 80 percent of those reserves (See Exxon Page 4G)

sale. In all three wells, the presence of

and equally by Tenneco Oil and Gulf Oil Corp.; in about 35 feet of water about 75 miles east of Galveston, and drilled to a total depth of 14,038 feet. The lease was acquired for a bonus

Ship Shoal Block 181, held jointly and equally by Tenneco Oil and Texaco Inc.; in 65 feet of water about 75 miles south of Morgan City, La., and drilled to a total depth of 10,300 feet. The bonus bid on this lease was \$38,-914,000

s field assignments in East Texas prior to a transfer to the Petroleum Engineering Group in Headquarters, Houston.

After holding several engineering positions in Houston and Corpus Christi, he entered military service in 1942.

After returning from military serve he held engineering assignments in East Texas and management positions in California and Dallas. He transferred to Midland as manager of the Midcontinent Production Division in 1965.

During his career with Exxon, he has been active in community and civic affairs. In Midland, he served as director of Junior Achievement,

engineering from Texas A&M University.

Mendell joined Exxon in 1961 in Grand Isle, La. His engineering assignments include other areas of Louisiana, Headquarters in Houston and Baytown. In 1973, he transferred from Public Affairs Headquarters to the East Texas Division as engineering manager. He was named operations manager and in 1977 transferred to New Orleans.

He is a member of the Society of Petroleum Engineers of AIME and the American Petroleum Institute.

His hometown is Wichita Falls. He earned a B.S. degree in Chemical Engineering from The University of Texas at Austin.

## Wentworth takes office

E. J. "Gene" Wentworth, with The Superior Oil Co. in Midland, was installed president of the American Association of Petroleum Landmen at the recent annual meeting in Reno, Nev.

He replaces Donald L. Simasko, owner of Simasko Production Co. in Denver, Colo, and Alaska.

New officers serving with Wentworth include: D. Calvin Blue Jr., Texas Gas Exploration Corp., Houston, first vice president; T. B. Wilcox III, Wico Oil Co., Oklahoma City, second vice president; Max H. Ernest III, XO Exploration, Inc., Denver, third vice president; D. K. Galtney, Shell Oil Co., New Orleans, treasurer, and George T. Warren, Occidental Exploration Producton Co., Bakersfield, Calif., secretary.

Canada's new officials establish energy rules

TULSA - The economic ground rules and pace of energy development in Canada well into the 1980s are being set by new federal government policies and critical negotiotions with producing provinces on oil prices, Oil & Gas Journal reports in its June 16 issue.

The federal Liberal government elected last May has established a number of key objectives in the energy field. They include a target of oil self-sufficiency by 1990, a bigger slice of petroleum revenues and 50 percent Canadian ownership of the domestic petroleum industry within 10 years.

The implications of these policy objectives are taxation and land lease policies which would encourage Canadian ownership, a reduced slice of revenues for the oil and gas industry and the possibilities of an export tax on oil products at the refinery level, the Journal says.

Policies on land regulations for federal or crown properties are expected to be spelled out later this year in the government's first budget, which also will include tax measures designed to promote Canadian ownership.

The most immediate problem is negotiation of a new agreement between Ottawa and the petroleum-producing provinces, primarily Alberta, on oil pricing and revenue sharing.

# **Rial finals** flowing well

Rial Oil Co. announced completion of its No. 1 Chieff in the Giddings field of Fayette County.

It finaled for a daily flow of 514 barrels of oil and 925,000 cubic feet of gas per day, with a flowing tubing ressure of 1,800 pounds, through an 8.64-inch choke.

The well, in which the company's working interest is 55 percent, is on a important is on a important is a second block approximately five miles from Rial's closest ction wells in the area.

The current agreement, which sets the domestic oil price at \$14.75 per barrel, expires June 30. But little progress has been made to date, and the odds are against a settlement before the deadline.

Both sides have indicated they would consider an interim agreement if some progress has been made by the end of this month.

The federal government and Alberta, the pace-setting province which produces 85 percent of Canada's oil and gas, have powerful legislative weapons to bring to the bargaining table.

The federgal government has the power to set prices unilaterally but in the past has always reached negotiated settlements with the provinces. Ottawa also has the legislative power to take control of Alberta's oil and gas fields by declaring that such action is in the national interest.

Negotiations have been heated to date but neither side is expected to deploy its heavy legislative artillery because it would touch off a major constitutional crisis in federal-provincial relations.

Odd man out in the confrontation involving billions of dollars in revenues is the petroleum industry, the Journal says. The industry has played the role of a vitally interested but more or less helpless observer of the slug-out among politicians.

From the federal point of view, there are compelling economic and political reasons for Ottawa to seek a larger slice of petroleum revenues.

These include a \$14-billion federal deficit, which is rapidly growing because Ottawa is paying as much as \$3.1 billion per year for a subsidy program that balances cost of imported oil to maintain the \$14.75 per barrel domestic price across the country.

Governments, federal and provincial, will be the winners in whatever pact emerges, the Journal says.

## Bob Benne opens office

Bob Benne has opened a consulting geology practice at Loraine Center, 601 N. Loraine St. in Midland.

He has been retained by Adams **Exploration Co.** 

Benne previously was associated with Union Oil of California and Mesa Petroleum Co. as a petroleum exploration geologist.

He holds geology degress from Oklahoma State University (B.S.) and the University of Oklahoma (M.S.)

He is a member of the New Mexico Geological Society, the West Texas Geological Society, the Society of Economic Paleontologists and Mineralogists, and the American Association of Petroleum Geologists.

## Confirmer completes

HOUSTON - Houston Oil & Minerals Corp. announced it has successfully completed a confirmation well in the Ware Creek field in Columbia County of south central Arkansas.

The Bradley No. 1 flowed from perforations below 10,000 feet in the Smackover at a rate of 652 barrels of oil and 1.5 million cubic feet of gas per day on a 12/64-inch choke with a flowing pressure of 935 pounds.

The Bradley No. 1 is the second well drilled by Houston Oil & Minerals Corp. in the Ware Creek field where the company has a 100 percent working interest in 1,734 acres. Both wells are currently shut-in awaiting the in-stallation of production facilites and the finalization of a gas sales agreement

Production from this field is expected to commence during the third ouarter.

Those hopes have always been dashed. But now with the imminent creation of the federal Synthetic Fuels Corp., and the entry of Exxon Corp., the world's biggest oil company, into the shale business, those

hopes are rising higher than ever. The Department of Energy envisions about 10 projects producing 400,-000 barrels of shale a day by 1990. Most observers believe that the department's goal is realistic, and perhaps even conservative.

says Roger Loper, the newly appointed resident of the shale subsidiary at Standard Oil of California, which like Exxon only recently accelerated its shale plans. "It's going to be a whole

others, is based on a number of factors beyond the expected reality of government incentives that the industry has long demanded as collateral

Water sacrcity, environmental constraints and permit difficulties that have squelched shale oil's prospects in the past, said Malcom Weiss, deputy director of Harvard's Energy Lab, 'now seem more tractable.

the Upper Colorado Basin, where shale oil a day to replace 2 percent of present U.S. imports by 1990.

-A study that could ease water

worries. In the past, the shale industry, which uses two to three barrels of water for each barrel of oil it produces, has been criticized as a sponge that could easily absorb an unacceptable amount of the West's water supply. The study, which is still in draft form and was done for the U.S. Water Resources Council, indicates, however, that there is ample water to support both a 1.5 million-barrel-a-day industry and the region's agricultural interests if the water resource is managed properly. -New studies that may eliminate

air quality fears. Earlier studies completed by the Environmental Protection Agency said that Colorado's air quality could only tolerate a 200,000-barrel-a-day industry. Terry Thoem, director of energy-policy for the agency's regional office in Denver, says that rough calculations completed by the EPA this year show that a 400,000-barrel-a-day industry would not be a problem. nd a study now being completed by Systems Application linc. for the agency, suggests that the region could support a 900,000-barrel-a-day shale industry, according to Thoem.

-The easing of the permit process. Steps have been taken by both Colorado and the Department of Energy to remedy the permit nightmares that oil companies have complained about. To construct a shale plant, more than 200 permits are needed. Monte Pascoe, director of the state's Department of Natural Resources, says Colorado has developed a "first of its kind" joint review process that sets a permitting schedule for the company and all the agencies in-

ing to Pascoe. The development of Utah's Uinta basin is expected to trigger a similar surge there.

Local and state officials in Colorado are already working with the Depart-

DOE awards contract for alternate fuel search

BARTLESVILLE, Okla. - As a part of its program to find practical uses for alternative liquid fuels, the Department of Energy's Bartlesville Energy Technology Center (BETC) has awarded a \$352,920 research contract to a North Carolina company to study the use of distillate shale oil as fuel in a diesel engine

The Power Systems Division of Morrison-Knudson Co., Inc., Rocky Mount, N.C., will test a shale oil distillate in a 900-rpm diesel engine with a bore of 91/16 inches.

This type of engine is designed for stationary installations and is used to produce electricity by small electrical generating utilities, by commercial and industrial powerplants, and for marine and oil rig service. A similar engine is used for locomotive purposes.

Dan Gurney of BETC, project man-

#### ager, said the resultant engineering data will serve two purposes:

First, it will produce a technical appraisal of the suitability of shale oil. distillate as an alternative fuel for diesel engines, both as straight distillate and as a blend with petroleum fuels.

Second, it will reveal the critical problems that must be addressed in further development work on the fuel and engine systems.

Morrison-Knudson will provide the engine to be tested and will instrument it according to specifications to be approved by BETC. BETC will provide about 200 barrels of shale oil distillate for the research.

Results of each of the series of tests will be reported.

The Morrison-Knudson testing program is scheduled to be completed by April 30, 1981.

# Five rotary rigs added to Permian Basin drilling

Crosby

Dawson

An increase of five rotary rigs, bringing the total to 329, was recorded last week on the Reed Rock Bit Co.'s survey of Permian Basin activity. One year ago there were 218 rotaries making hole in the area.

Lea County, N.M., continued to lead all other West Texas and southeast New Mexico counties in number of active rigs. That area reported 42 units in operation, an increase of two units over the week-earlier tally.

Eddy County, another New Mexico area, also reported an increase of two rotaries over the previous survey, bringing its weekly total to 37 rigs. Together, the two counties account for over 25 percent of the Permian Basin's rotary activity.

Pecos County, leader of the West Texas counties and third in Basinwide active units, remained constant with 25 rotaries making hole.

in West Texas with 13 rigs at work, an increase of five units from the week earlier.

## Graduate Center schedules courses

The Permian Basin Graduate Center, headquartered in Midland, has announced two more oil industry-related courses.

A three-day course on "Hydrogen Sulfide in the Drilling Industry" will be offered Jume 30 through July 2.

The classes will be held from 8:30 a.m. to 4:30 p.m. in the PBGC Building, 105 W. Illinois St.

Don Carter, a safety consultant with Pollution Control Rentals, Inc., will be the instructor. He is a specialist in H2S detection and survival training. He is a graduate of the University of Southwestern Louisiana.

-The course is being offered in cooperation with Prentice & Records Enterprises, Inc., and is designed for any personnel directly or indirectly related to H2S in the drilling industry.

Fee for the coures is \$275, including materials. Registration is limited.

A two-day course on"Use of Old Electric Logs" will be offered June 30-July 1. Classes will be held from 9 a.m. to 4:30 p.m.

Dr. Douglas Hilchie of Golden, Colorado, a petroleum engineer, will be the instructor.

He will offer an in-depth explanation and interpretation of the use of old electric logs.

The course is designed for geologists, geophysicists and engineers.

Fee for the course is \$250 and includes the text, Old Electrical Log Interpretation.

# **Permian Basin Briefs**

Sam M. Paine, formerly of Midland, has been named general manager of the Onshore Division for Sheil Oil

Co.'s Eastern Exploration and Production Operations in New Orleans.

He joined Shell in 1949 in Long Beach, Calif., as a mechanical engineer trainee. Engineering assignments followed in California. **Rocky** Mountains, Houston and New Orleans

In 1960, he was transferred to The Hague, Netherlands. Upon his return to the U.S. his assignments included that of area gas and production manager in Midland, followed by an appointment as Southwest Region production manager in Houston

Paine

Subsequent assignemnts included head office manager of engineering and head office manager exploration and production economics in Houston. From 1973 until his present assignment, Paine served as general manager of production for the Southern Region - now called Eastern Operations.

#### ....

C. W. "Red" Warren, formerly of Midland, has been appointed regional manager for IMCO's Northern Re-

The position was held by G. Del Purvis who recently was named regional vice president of the Southern Region

Warren has been with the firm since 1953. He has held managerial positions for the company in many areas, having served as district manager in Midland and Amarillo and as division manager in Denver, Colo. and most recently in Houston.

The executive committee of the Permian Basin Petroleum Association has voted to donate several hundred Santa Rita medallions to the Permian Basin Petroleum Museum, Library and Hall of Fame.

The medallions were commissioned by PBPA in 1973 to commemorate the 50th anniversary of the discovery of the Santa Rita which blew in on May 28, 1923, to open a new era for Reagan County and the entire Permian Basin.

The medallions are the remainder of several thousand which were cast in 1973 and will be on sale at the museum gift shop.

The El Paso Products Co. in Odessa has been named winner of the 1980 National Society of Professional Engineers Southwest Region Industrial Professional Development Award. Robert L. Nichols of Fort Worth.

immediate past president of NSPE, presented the award to the company last week during the 44th Annual Convention of the Texas Society Professional Engineers in San Antonio

El Paso Products was recognized for its outstanding contribution to the advancement and improvement of the engineering profession through its programs for the professional members of its staff. The award was accepted by William J. Baker, vice president and technical director.

R. G. McKinney of Midland has been elected vice president of Coastal Oil & Gas Corp., a subsidiary of The Coastal Corp., a Houston-based energy supply company.

McKinney, who has moved to Houston, was assistant vice president and exploration manager in Midland. He is responsible for the minerals department and also for the newlycreated investor joint ventures function of the exploration and producton division.

McKinney had been with Coastal in Midland the last two years. Prior to that he had 20 years experience in exploration for hydrocarbons and other minerals with Gulf Oil Co. and International Nickel Co. \*\*\*\*

David L. Woodsmall, Yates area foreman in Iraan for Marathon Oil Co., has been appointed Southeastern District superintendent, Western Pipe Line Division, replacing Jon W. Kinnison, who was appointed manager of logistics for the district.

He has been transferred to Casper. WYO.

#### \*\*\*\*

A. LeRoy Marshall, formerly with Rial Oil Co. and Cactus Drilling Corp. in Midland, has been named an area drilling engineer in Elk City, Okla. for Dyco Petroleum Corp.

Prior to joining Dyco, Marshall was an independent consulting engineer seven years in the Elk city area. Before that he was with Rial in Midland for two years, and previous to that connection was with Cactus Drilling 17 years in Midland.

Wayne A. Munson of Midland has been named senior vice president in charge of production for Martin Exploration Co. of Metairie, La

He worked for Chevron, U.S.A. as a drilling and production engineering supervisor in West Texas. For the last 10 years he was manager of drilling and producton operations for Mallard Exploration of Midland

# LOOP line under way

WHITE PLAINS, N.Y. - A 36-mile, 24-inch pipeline to link the Louisiana Offshore Oil Port (LOOP) with Texaco's refineries and other facilities in Louisiana and Texas is now underway.

Annon M. Card, president, Texaco U.S.A., said the \$50 million project will be owned by the Texaco-Cities Service Pipe Line Co., owned 50 percent each by Texaco and Cities Service Co.

The new pipeline will run from a LOOP storage terminal at the Clovelly salt dome near Galliano in Lafourche Parish to a Texaco pipeline at Houma in Terrebonne Parish, owned by The Texas Pipe Line Co., a wholly-owned subsidiary of Texaco Inc.

The LOOP offshore terminal, 40 miles south of New Orleans, is America's first deepwater port. It will be able to handle the Ultra large Crude Carriers (ULCCs) and other mammoth tankers which cannot enter existing ports.

The 36-mile pipeline from Clovelly to Houma is scheduled to begin operations in 1982 and will have a capacity of approximately 250,000 barrels a day of crude oil.

Tankers anchored at LOOP's offshore terminal will discharge into a pumpimng complex from where the crude oil will go by pipeline three miles inland to a booster station. At that point, other pumps will help push the crude to the Clovelly storage terminal.

Some of the crude will be pumped from Clovelly to Houma in the new pipeline where it will enter a 22-inch line owned by The Texas Pipe Line Co., which runs to Texaco refineries in Port Arthur and Port Neches.

Texas plants in Lockport and Lawrenceville, Ill., will receive crude oil through the existing Capline pipeline which will tie into the LOOP system in St. James Parish on the Mississippi River, just south of Baton Roughe Additional LOOP crude will be processed at Texaco's Louisiana Plant at Convent in St. James Parish.

Thus, five of Texaco's refineries will benefit from the LOOP system, Card said

# Nobody is complaining at Wyoming coal project

recovery has its ups and downs, but a Conoco, Inc. project in Wyoming has more than its share.

Nobody's complaining. In the case of Tisdale Mountain, 80

miles northwest of Casper, oil coming out of the ground must go down before it can be brought up

It's a unique situation in which Conoco engineers used ingenuity to solve . a problem of some gravity. That problem involves oil in a sand

formation just a few hundred feet below ground. Because of the nature

## Company to change name

Rial Drilling Co., Inc., of Midland announced its name will be changed to Sterling Drilling Co., effective Thursday

The company also named three new officer in its Midland office.

Ray Peterson has been appointed vice president, D. W. Gordy wasnamed vice president - Construction, and Marvin Burrow, now is vice president - Operations

Peterson has been with the company since 1979 and is its contract and business manager and supervises administrative matters. Gordy has 30 years experience in the contract drilling business. He supervises and coordinates construction and maintenance of the company's drilling rigs. Burrow, with 35 years experience, is responsible for the supervision of the firm's field operations. Gordy and Burrow have been with the company since its inception.

enough pressure to permit operation of a standard well.

from coal operations, experts gambled \$1.5 million that mining techniques were an answer.

The result is a 980-foot tunnel into the side of the mountain, ending in a collection chamber.

Six horizontal wells lead outward from the chamber into the oil-bearing sand above. Gravity does the rest. Oil trickles into the horizontal well bores, then drains naturally down a slight decline into the collection chamber.

Neatly collected in the chamber, the oil then is brought to the surface by a single conventional well.

Alex Yarsa, Conoco's Casper division manager, points out, "This project demonstrated our willingness to put risk dollars up to make sure that we can get every barrel of oil possible out of these reservoirs.

Squeezing the most oil possible out of existing projects obviously has impact at a time when every barrel counts, but the experience in Wyo ming has other benefits for petroleum 1/6 engineers

# Exxon joins in quest for crude from shale

#### (Continued from 1G)

are trapped in Colorado's Piceance Creek Basin, 15 percent in the Uinta basin of Utah and 5 percent in the Green River Basin of Wyoming.

The development of shale oil far exceeds the scope of any one project the United States has taken on. Miners, for example will have to deal with almost as much shale, 500,000 tons a year, as they moved at the peak of U.S. coal production.

Says Morton Winston, chairman of Tosco Corp., Exxon's partner in a shale project called the Colony Venture: "It will be an enormously difficult task to pull off, but it will be splendid to try.

At present three commercial-scale projects are ready to begin: Tosco and Exxon's Colony Venture is the project closest to obtaining the more than 200 permits needed to construct a 47,000-barrel-a-day plant, Union Oil Co.'s project, which will begin with a 12,000-barrel-a-day plant and scale up in increments to 50,000 barrels a day; and the C-b shale oil venture, owned by Occidentaland Tenneco, which plans to build a 50,000-barrel-a-day plant.

Nine other companies including Standard Oil of California, Phillips, Gulf and Standard Oil of Ohio, have plans to begin construction on commercial plants in the next three years. Exxon and Tosco each have plans to develop alternate sites that will produce 50,000 to 60,000 barrels a day by 1990. Although Mobil is still holding back, it already owns two shale tracts in Colorado, as does Atlantic Richfield.

Two technologies will be tested in the initial phase of commercial development. Both methods, one on and the other below the surface, heat the shale rock to 900 degrees to release the hydrocarbon, kerogen.

The surface technology (the Colony Venture and Union will use different variations) mines the shale in an open pit and cooks it in huge above-ground retorts to release the kerogen. The oil is treated on-site and then shipped to

#### Board approves pooling

Barstow Field in Reeves and Ward counties.

Superior plans to pool 220 acres of state land with 440 acres of privately-owned land in the Carson Unit No. 1.

Participation is based on surface acreage and royalty was set Land Commissioner refineries. Occidental's method, called modi-

Automobile? Sell faster, get more, with WANT ADS. 682-6222

fied in situ in shale jargon, treats the shale below the surface. To do this, football-field sized chambers (90 are needed for a commercial plant) are marked off by tunnels and explosives are used to crush the rock. After the kerogen is released, it is piped out.

Much is made over which process is more advanced. Each company is anxious to prove its technology, because it will increase the price tag for its license to others. Gulf and Standard Oil of Indiana, partners in the Rio Blanco project, for example, recently paid \$6 million for the license to use Occidental's modified in situ technology

Most industry and government experts believe that in the intermediary stages, the above-ground retorts had less problems.

Tom Ten Eyck at the Rio Blanco project, which bought the Occidental license, said they would complete two large underground retorts by the end of 1981, but the managing partners have already approved a plan to begin parallel development of surface retorts

Industry observers believe that once work is started the quirks in the technologies will be easily worked out.

Chevron's Loper compares the nascent shale industry to the oil industry in the 1950s and the early years of the commercial aircraft industry. We've got a lot of learning to do and there will be a lot of change, but once the process is started, the technology will improve rapidly just as it does in any new field." he said.

To insure that none of the momentum is lost, the Department of Energy will offer 41.5 billion in loan guarantees and an equal amount in price and purchase guarantees before the Synthetic Fuels Corp. gets ready to dole out its \$20 billion budget.

Already, oil companies and DOE are looking at the shale reserves in Alabama, Kentucky and Tennessee.

# Latest figures reveal Midland residents as richest in Texas

The Department of Commerce in Washington has just published figures on yearly average income per person in each of the 50 states and they show that citizens of Midland are the richest among the 13,380,000 persons living in the huge state.

At least they were in 1978. The Department of Commerce figures, provided by its Regional Economic Measurement Division, Bureau of Economic Analysis, are for 1978.

Department officials have provided figures for per capita income nation-wide for 1979, however breaking them down into SMSAs takes time - statistical lag - so--the SMSA numbers are a year older.

The average income in the Midland SMSA area in 1978 was \$10,658, making Midlanders the richest people in the nation except for those persons living in the three other SMSAs.

They are Anchorage, Alaska, \$11,839; Reno, Nev., \$11,161, and the wealthy Connecticut SMSA known as Bridgepot-Stamford, -Norwal-Danbury, \$10,721.

\$1,000 higher than that of of Houstonians where the average yearly income is \$9,398.

statewide is that of Alaska, \$11,252. The average for Texans as a whole is \$8,649.

Dallas-Fort Worth, \$8,756.

#### Amarillo, \$8,530. Wichita Falls, \$8,255. Galveston-Texas City, \$8,099. Tyler, \$8,084. Beaumont-Port Arthur-Orange, \$8,052. San Angelo, \$7,859 Longview-Marshall, \$7,799. Waco, \$7,360. Sherman-Denison, \$7,297. Austin, \$7,270. Lubbock, \$7,260 Corpus Christ, \$7,104. Killeen-Temple, \$6,795. San Antonio, \$6,648. Texarkana, 6,628 Bryan-College Station, 6,133. El Paso, \$5,639. Brownsville-Harlingen-San Benito, \$5,024. Laredo, \$4,529. McAllen-Pharr-Edinburg, 4,323.

Department of Commerce by dividing the Census Bureau's best estimates of the number of people living in a

The income per capita of Texans is below the national average, \$8,706, but closer to the average than they were in the past. In 1975, the per capita income in Texas was 4.7 percent below the average, 9.9 percent below in 1970, and 14 percent below in 1960.

Texans were 27.4 percent below the national average in 1094, and 32 percent below in 1929.

# Worsening economy may bring tax decrease for U.S., but not until 1981

By KRISTIN GOFF **AP Business Writer** 

NEW YORK (AP) - Signs of a worsening economy have led to increased speculation that President Carter may consider a tax cut as a method of stimulating the economy. Carter administration officials

made it clear, this past week, that the president had ruled out any tax cut for this year. But that left open the possibility of such a move to take effect in 1981.

Treasury Secretary G. William Miller said Carter "has made no decision yet on tax proposals which might be considered for implementation after 1980."

Later in the week, Jack Watson, President Carter's new chief of staff. went even further, suggesting that leaks by administration officials about 1981 tax cut plans were "ill advised" and "premature."

He said the administration is watching the economic data and will conduct a regular budget review July 15 to determine if "a wide range" of new steps can be taken.

Still, the economic news continues to worsen. And speculation that some stimulative action will be proposed particularly in light of the fall election - is widespread.

a possible tax cut," said a weekly report by Manufacturers Hanover

"That the U.S. economy has been officially declared in a recession during a presidential election year would seem to be reason enough.

"However, the fact that the gross national product adjusted for higher prices very likely fell in the second quarter by one of the steepest rates in the postwar era ... appears to make a tax cut even more likely.

Whether a tax cut would help the economy, without further aggravating inflation is the big question. Inflation, while lower than early this year, is still at double-digit levels. And economic output currently is falling steeply

The Commerce Department's deputy chief economist, William Cox, said this past week that gross national product, the economy's output, may have fallen at an annual rate of 8 percent in the April-June quarter. If that preliminary estimate is correct, the drop would be the steepest since World War II except for a 9.1 percent drop in the first quarter of 1975.

The Commerce Department also revised its estimate of GNP in the January-March quarter to a 1.2 percent increase on an annual basis, slightly higher than its previous 0.6 percent estimate.

year. That was the highest unemploy ment estimate yet by a top administration official.

PAGE 5G

The Carter administration's official estimate of 7.2 percent unemployment, made last March, has already been exceeded by May's 7.8 percent unemployment rate.

In other business developments this past week:

-The Chrysler Loan Guarantee Board postponed until Tuesday a planned meeting to approve the first federal loan guarantees for the Chrysler Corp. The automaker spent much of last week attempting to convince a number of banks to agree to restructure its debt.

That consent must be obtained before the government can take action on a \$500 million issue of government guaranteed notes for Chrysler

-Rising oil prices continued to promote a lopsided U.S. trade balance. The government reported a trade deficit of \$2.57 billion in the first quarter. That was the highest trade deficit since the 1978 third quarter record deficit of \$3.07 billion.

-New housing construction fell 11.5 percent in May to lowest levels

Wadley Ave:, \$65,000; Wallform Inc., 2504 W. Wadley Ave., \$65,-000; Wallform Inc., 2506 W. Wadley Ave., \$65,000; and Wallform Inc., 2508 W. Wadley Ave.

Permits for residential alterations and renovations are:

Gerald Fisher, 1510 Manor Court, \$600; H.D. Wood, 3517 Baumann Ave., \$2,600; Reynaldo Salas, 1302 S. Pratt St., \$600; Robert C. Winkler, 1611

Stanolind Ave., \$50,000; Jerry Henly, 2307 Garden City Highway, \$45,000; Doyle Lovell, 3210 W. michigan Ave., \$600; Pat Cartnez, 1800 W. Michigan Ave., \$3,000; Truc Tran, 4206 Harlowe, \$270; Jesus Bernandiez, 3714 Shell Ave., \$1,000; Robert Carrens, 3313 Fannin Ave., \$7,000; and Bradley S. Bates, 2400 N. Pecos St., \$3,000.

New commercial starts registered last week are:

Swiss Pretezel Shop, Inc., 4511 N. Midkiff Road, \$26,000 and \$20,000; Motherhood Shops, 4511 N. Midkiff Road, \$26,000; Mother Care Stores, 4511 N. Midkiff Road, \$35,000; Scott Dikenson, 4511 N. Midkiff Road, \$20,-000; and Betty Jane Corp., 4511 N. Midkiff Road, \$25,000.

Permits for commercial alterations are:

Plaza Inc., 39 Plaza Center, \$30,000; Apollo Motel, 3307 Front St., \$35,000; and Texas Instruments Terminal, \$17,000.

Permits for new swimming pools were registered for Steve Smith, 2503 Stutz Place, \$14,000 and Mr. and Mrs. Henson, 2506 Metz Place, \$13,000.

# Some Texas areas can't support power plants

#### By BILL KIDD **Austin Bureau**

AUSTIN - Preliminary studies by the Texas Air Control Board show that at least four areas in the state cannot support the location of new power plants because of "prevention of significant deterioration" (PSD) requirements.

That TACB report, prepared for **Texas Energy and Natural Resources** Advisory Council, shows four areas already have consumed their "increments" for sulfur dioxide.

The report notes that the results "are only an indication of the increment consumed, and do not represent an in-depth study of the acceptance of locating new (power plant) sources in these areas.

However, the study shows that, on the basis of the model used, the threehour or annual increments have been consumed in areas around four plants: Welsh, Big Brown, Twin Oak and Limestone.

These plants are located in the Northeast and Central Texas areas, involving parts of Titus, Camp, Upshur, Franklin and Cass counties, and the Limestone-Freestone counties area, including parts of Falls and **Robertson counties.** 

The study used 30-mile squares and sources with greater than 100 tons annually of sulfur dioxide emissions (existing sources constructed prior to PSD requirements and proposed industrial sources were not included in the modeling.)

Two other East Texas areas, around the Mill Creek and Monticello plants, "could have problems if any new power boilers were placed in either area," the report states.

Also, the report notes, "only specif-ic areas were considered but it is recognized that there could be other areas in Texas that have possible **PSD** problems.'

"In fact, through contracted modeling it has been predicted that the PSD increment also has been consumed in portions of Brazoria, Jefferson, Orange, Nueces, Harris and Galveston counties."

While the report is only preliminary, it may indicate problems ahead for new coal- or lignite-fired power plants, particularly if the Environmental Protection Agency promulgates new regulations aimed at preventing "acid rain."

Such rain results from formation of sulfuric acid, out of sulfur dioxide emissions, and the problem has become one of increased concern to regulators and the electric power industry

Effects of such rain in Texas are being discussed and disputed, but there has been general agreement that the Northeast Texas area could be damaged by acid rain, due to the already acidic soil conditions there.

However, as was noted at a University of Texas conference on power plant problems, the transportation of sulfur dioxide emissions means that acid rains in Texas could result from emissions in other states, and conversely, emissions from Texas could be a factor in acid rains elsewhere.

Given that, and the growing concern over the phenomenon, the TACB studies could mean that it's unlikely any new-coal-fired plants will be approved for areas where the PSD increments have been consumed - at least not without significant, and costly, emission controls.

In a related matter, TACB's Inspection and Maintenance Subcom-. mittee must meet before the next TACB meeting (July 11) to consider revisions to the State Implementation Plan, Texas' plan for meeting the requirements of the Federal Clean Air Act.

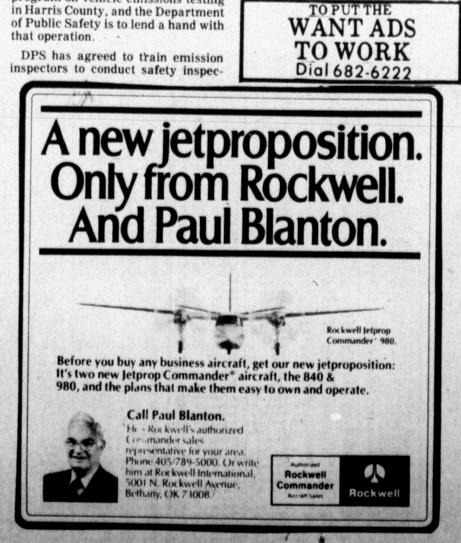

That plan was approved by the EPA after much discussion - often heated - between state and federal regulatory officials.

Revisions to the plan must be submitted to EPA by Aug. 1 to meet requirements of EPA's earlier conditional approval; Gov. Bill Clements should receive the revisions for re-

1981, work by the TACB will focus on collection and analysis of emissions data and air quality data, evaluation of control strategies and development

# Cleaning up downtown

To be perfectly frank, the downtown area of Midland needs a hefty shot of civic pride.

In case you haven't noticed, we're talking about the tall weeds and grass growing along crub lines, in cracks in the sidewalks, alongside the tall buildings Midland is noted for and around lamp standards.

If you'll take the time to look, you'll find that these tall weeds exist abundantly in the downtown area, an area otherwise noted as unusual for West Texas and strikingly beautiful.

Who's responsible for taking care of these weed-cutting chores? That isn't easy to answer. In some cases it may be the responsibility of the city and, in other cases, the responsibility of the owners or tenants of the particular office buildings in question.

The downtown office area does present a striking contrast to the otherwise flat stretches of the Permian Basin. The tall structures invite visitors to the city to take a drive through the downtown district, eyes scanning the upward reaches of the magnificent buildings

They're distracted, no doubt, by the weeds. The abundance of pesky plants in the downtown area serves as an eyesore in an otherwise pleasant scene.

The weeds do not constitute a fire or health hazard, we don't believe, but aesthetically they are damaging.

It's pretty obvious that the civic pride of some Midland residents is not exactly what it should be. That doesn't mean it has to remain so. We'd love to see the downtown area - the entire city, in fact transformed into a showplace. We have all the necessary ingredients; what we need is a push.

It's time that Midlanders developed more pride for the overall appearance of their city, the downtown area included. It doesn't have to be a big, tiring task; with everyone being just a little more concerned about our city and taking small steps to improve it, we can effect an impressive overall change.

And, perhaps, we'll all be a little prouder when relatives or other visitors to our city decide to take a drive or stroll through the downtown area.

# Midland's growing again

It was with pride this week that mit, a 12-story building planned we reported the planned construc- by Wagner and Brown, and a section in Midland of an 11-story of- ond 14-story Midland National Bank tower.

## WASHINGTON MERRY-GO-ROUND Cocaine gangs turned Miami into war zone

WASHINGTON - Cars race wildly down city streets, the passengers trading shots at 80 miles an hour. Mobsters roar into a crowded suburban shopping center, cutting down enemies in a hail of machine gun fire that sends bystanders diving for cover. Rival gangs import hitmen to control territory and muscle out competition. "Rubouts" become so frequent that only the most spectacular triple and quadruple killings automatically make page one.

Chicago in the 1920s? No, Miami today

For the past year, this sundrenched, palm-fringed city has been the center of a gangland-style war reminiscent of the wildest days of the Prohibition era - a wave of violence played out to a cacophony of screech ing tires, breaking glass, the staccato rattle of machine guns and the moans of the victims, some of them innocent **bystanders** The reason is drugs, primarily cocaine. Just as rival mobs fought for control of the bootleg liquor trade in the 1920s and 1930s, highly organized gangs of drug traffickers - most of them Colombian nationals who slip into this country illegally - are turning the streets of Greater Miami into a battleground. Close to one-third of Dade County's record 362 homicides last year involved so-called "cocaine cowboys." This year, the murder rate is running 20 percent higher than 1979. As the enormous profits from the drug trade enrich the gangs, life for their members becomes conversely cheaper. "I've been a cop for 20 years, but I've never seen violence like it," my staff was told by Capt. Marshall Frank, chief of Dade County's harassed homicide squad. "The Hells Angels can't hold a candle to these crazy Colombians. They make the

#### ART BUCHWALD

# Democrats not worried about Carter re-election

WASHINGTON - The Democratic National Committee (read the Carter campaign) is pouring thousands of dollars into an effort to keep John Anderson off state ballots in his independent bid for President.

Some people may think this is dirty pool, but a Democratic friend of mine believes it is the only way to save the country

"All we're trying to do," he told me, "is preserve the two-party system, which could be irretrievably harmed if we allowed the American people a third choice."

"It is rumored that you are not as much concerned about the two-party system as you are that Anderson will take votes away from President Carter," I said.

"That's Republican hogwash," he said indignantly. "We're not only fighting Anderson for ourse'ves but for them as well. What kind of democracy would we have if we permitted every John, Dick and Harry to run for the Presidency? If Anderson gets on the ballot he'll only confuse the electorate. It's hard enough for the people to choose between Carter and Reagan in November, without throwing in a nobody who could siphon off electoral votes

"If he's a nobody, why are you going to so much trouble to keep him off the ballots?"

'Because we're fighting for a principle. If we allowed Anderson to run as an independent this time, we'd have to open the election to anyone in this country who gets it in his head he should be President. The Democratic and Republican parties ought to be the ones who provide the candidates. We have the machinery to do it, and also the know-how. No one can tell what an independent would do if he became President."

"Maybe that's why so many people want to vote for one," I suggested.

"It's obvious that you don't understand the political process in this country," my friend said angrily. 'There is a lot more to it than just electing a President. 'Such as what?.'

"Political patronage for one thing. If an independent was elected, he wouldn't know how to reward the people who worked for him during a campaign. The Republicans and the Democrats have a system for patronage and are able to fill all the jobs that it takes to run a government.

"Couldn't Anderson learn how to reward his campaign workers?"

"It would be very messy," my friend replied. "Independents have no loyalty to anybody. Besides, how can a two-party Congress work with a President that doesn't owe any debt to them?

"But the only reason you people are taking Anderson seriously is that the public seems to be very unhappy with their choices this year. If neither party can côme up with an acceptable candidate, don't you believe that Americans should be able to pull the lever for a third person?

"Anderson is a spoiler. He knows he has no chance of winning. He's hoping he can get enough votes to throw the election into the House so he can look good.

"What's wrong with that?" I asked.

'It's messy. What the country needs right now is a clean-cut victory for its next President, so we can show the world we've given our leader a

manned and outspent.

The situation in Miami has reached the point where a local television station, delivering public service messages to viewers on how to prevent crime such as muggings and burglary, now includes advice on what to do if you're caught in the crossfire of a shootout in the streets. (Answer: Get down and stay there.) Violence has always been an occupational hazard in the drug trade, but lately, as the demand for cocaine and marijuana has skyrocketed, traffickers seem increasingly ready to use deadly force. The lawlessness is spreading across the country until it could threaten law and order in the United States. Yet this threat to the well-being of every American could be ended easily enough. All Americans need to do is stop using illegal drugs and crack down on those who refuse to comply. But the assessment of officials at the Drug Enforcement Administration in Washington is gloomy. America's appetite for illegal drugs - estimated by the DEA to total \$60 billion this year - is expected to continue increasing.

Mafia look like Boy Scouts. They have absolutely no regard for human life . And they have us outgunned, out-

violence will escalate. Notes the DEA's Allan Pringle: "Dope dealers

are now bringing in so much cash that they aren't bothering to count it. They weigh it! They bring in huge sacks of money and weigh it! As long as you have these kind of profits, violence will continue unless there is tremendous pressure from (the public)."

Although the trend is nationwide, nowhere has the violence yet approached the recklessness and ferocity of Miami. In the Miami area, at least eight highly organized crime gangs of Colombians - each well over 100 members strong - battle for con-

trol of the drug import trade "They're peasants from the hills," says homicide detective Al Lopez, a red-haired Cuban-American. "They're recruited by the gangs; brought over here on false passports or smuggled in by boat from the Bahamas. 'They're used to violence, and they think nothing of killing. The gangs rule by fear. The rule is, if you get caught, say nothing. Otherwise, they not only kill the guy who talks but they kill his entire family back in Colombia. It's a very effective way of maintaining loyalty and control.' The cocaine cowboys are in a shooting war for all the usual reasons protecting territory, intramural jealousy, drug rip-offs, plus an added element. "Call it macho," suggests detective Steve Jackson. "They're always looking for revenge. An eye for an eye. Avenge the insult. They regard each other as expendable." Those who are arrested usually post bond, walk out of the courtroom and vanish into the underworld. "We had three guys on \$2 million total bond, but they got it reduced to \$800,000 and skipped," one detective said. "When you buy a kilo of pure coke in Colombia for \$3,000 and wholesale it for \$50,000 in Miami - or \$250,000 if you cut it and distribute it - then you can afford to walk out on these bonds." Added, another frustrated homicide detective, Sgt. Gary McGowan: "I'm appalled at the ease with which these illegals are allowed to function in our country. It's not the immigration department's fault: they're totally overworked. It's the laws that are wrong "Why should these people be given all the rights and privileges of citizens when they're here illegally, shooting up our streets?" And from Allan Pringle, one more warning: "The really frightening part is the spillover effect from what's happening in Miami to the drug trade in general. There is a growing, widespread mentality developing among traffickers - inspired by these Colombian nationals - that life isn't important, that people are quite expendable. It's getting very, very dangerous out there."

fice and retail complex.

The facility, called the Paragon, will cover an entire city block bounded by Marienfeld, Big Spring, Michigan and Louisiana streets. The facility is being constructed by Gifford, Mitchell and Wisenbaker, an oil and gas exploration firm engaged in developing domestic properties.

Since Midland entered this "boom" era several years back. the announcement of new mulitstory facilities in the downtown area has become something not to be deemed infrequent.

For example, the announcement of Paragon was the third announcement within a month of new multistory office structures here. The other two are The Sum-

#### **BIBLE VERSE**

But know this, that in the last days grievous times shall come. For men shall be lovers of self, lovers of money, boastful, haughty, railers, disobedient to parents, unthankful, unholy. II Tim. 3:1,2.

mandate. By going into court and keeping Anderson off the ballot, we're trying to give the people a clear choice between an experienced President, who knows how to deal with inflation, energy and the Soviet threat, as opposed to an ex-movie actor who could get us into World War III.'

"If you feel that way about it." I said. "why don't you spend your money to keep Reagan off the ballot?

"Because he has won his party's primaries and happens to be the Republicans' choice. We have to respect it even if we don't agree with it. On the other hand, Anderson was nobody's choice. He just stayed in the race out of spite when he was rejected by his own party. We can't let him get away with that.

"But," I said, "since he's a Republican, don't you think they should be the ones to try to stop him from getting on the ballot?"

"We wish they would. We think it would be in everybody's interest if this was a non-partisan effort. But they don't seem to worry as much as we do about the two-party system."

"I imagine from what you've said. that you're not worried about a backlash from the electorate for your party's efforts to deep-six Anderson?

"Why should we be worried? Carter has the election in the bag."

#### MARK RUSSELL SAYS

Perhaps some day in the future, the guitars played by anti-nuclear folksingers will be amplified by windmills

In the future, how many anti-nuclear Nervous Nellies will it take to screw in a light bulb? None. It will be too dark to find the socket.

How many people on an average demonstrate at nuclear power plants? One hundred percent more than picket Amtrak after a train wreck.

What does the nuclear industry have to fear more than Jane Fonda herself? Those pro-nuclear tests in airport terminals that are doing for the industry what the Hara Krishnas did for religion.

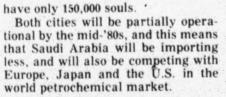

TUBAIL, Saudi Arabia - To contemplate this nation's booming economy is to think of a people who materially had nothing suddenly acquiring incredible wealth; of growthlines Nick soaring off charts; of schools, hospi-Thimmesch tals, roads and highways, even brand-new cities, being built where there were none; of a country without a single year-round flowing stream boosting its wheat production; of a government budget proportionately

valuable products - chemicals, fertilizers, plastics, phamaceuticals. It's from all that oil, over 3.4 billion Moreover, the wealth of flare gas now barrels produced in 1979 - some 20 burned away to the heavens must be percent of the Free World's total. And used in plants producing iron, steel though lesser oil-producing states and aluminum. push for greater revenue, the Saudis argue for "unified prices" because

So Saudi Arabia is fast building a petrochemical industry, and Jubail is its most ambitious component. Jubail presently is a small town in the oilfields of the eastern province, but a few miles away 10,000 workers from 38 nations are creating a new industrial city. Designed by Bechtel of San Francisco, by the year 2000, Jubail will comprise 16 industries and a population up to 400,000 - a city the size of, say, Toledo, Ohio.

Jubail is a technocrat's dream, an incredible project, but no one seems surprised that it is progressing on schedule. Sprawling factories, a com-plex of docks, residential neighborhoods, and 250 miles of highways, streets and railroads will be in place where today mountains of sand are being moved

If Jubail isn't enough, the Saudis are also building Yanbu, a sister city on the Red Sea, also from scratch, and also to be a huge petrochemical site connected by an 800-mile pipeline to the east. Alas, poor Yanbu will

Meanwhile, the Saudis go on building up the rest of their country at a merry clip. A person can't go 50 yards in Riyadh without encountering a construction crew. Smaller towns, villages and agricultural areas are not ignored. Billions have been spent to equip them with electricity and communications, and all have frequent air service. Camels still plod across the desert, but overhead, the Boeing jets streak as the Saudis lurch almost from the 19th into the 21st century in a matter of a few years.

One crucial problem is the question of who is going to operate this boom nation 10 or 20 years from now. Presently, the Saudis are managers and merchants, but they know they must develop their own workforce of skilled Saudis. Consequently, there is big budgeting for vocational schools, announcements of ambitious plans and realists who hope it all happens.

Once, the U.S. business was the biggest benefactor of the boom here, but we are losing out to the Europeans and Asians. In 1975, U.S. firms landed nine percent of the value in construction projects; currently, we are at two percent and slipping. The South Koreans, for example, have quadrupled their share of Saudi construction

projects in the past year. Saudis genuinely like Americans and U.S. products, but we are hard put to be price competitive here anymore. Nearly every competing nation forgives taxes for its nationals working overseas, but not the U.S. So British, Japanese, Germans and Taiwanese are able to work for salaries smaller than Americans, who must pay taxes. When U.S. firms employ non-Americans, those people order products from their own countries,

and we lose again. Moreover, many nations subsidize their overseas firms and don't burden them with the bundle of regulations the U.S. government likes to impose. Finally, while anti-Arab boycott laws are not a major factor in U.S. firms losing business, they are another paperwork nightmare and certainly

don't help. Still, U.S. firms did \$5 billion in business with the Saudis last year, and will do somewhat more in 1980. Recently, U.S. water resource firms recorded \$16.5 million in spot sales at an exhibit here, and projected an-other \$150 million in likely contracts. FOOTNOTE: Saudi Arabia will have spent \$16 billion for water devel-

opment in the next five years.

PAGE 9G

## **AUSTIN NOTEBOOK** Redistricting issue, tax increases loom big on state's political horizon

#### By BILL KIDD **Copley News Service**

AUSTIN - Those clouds on the horizon of the 1981 legislature long ago exceeded handsize, and folks are beginning to wonder if it's premature to hoist the hurricane warning flags.

One reason the coming season appears so stormy is redistricting - a subject which resulted in bitter infighting during the 1971 session, and which promises at the least many hurt feelings and dashed hopes, if not life-long enemies, among members for 1981.

That, and Speaker Bill Clayton's legal problems, added to the usual mass of 4,000 legislative proposals running the gamut from abolishing the death penalty to licensing roadside tomato sellers (both measures which failed to pass last time) would be enough to guarantee the 67th legislature long hours and short tempers.

But it appears more and more certain lawmakers also will have to consider what even most returning members have never had to deal with: a tax increase.

For a decade, thanks to rising oil

and gas prices and inflation-fueled

sales tax increases, the legislature-

was able to not even consider bills to

raise taxes - and under Gov. Dolph

Briscoe, the House Ways and Means

Committee (which had been the Reve-

nue and Taxation Committee) spent

most of its time determining how to

1979 to do the same.

in "surplus" revenues.

\$500 million) but notes that inflation is going to gobble that down with nary a burp

San Marcos Rep. Don Rains, vice chairman of the House Appropriations Committee, met with a group of agricultural lobbyists in Austin, telling them (with no one in the audience disagreeing) that a tax increase is very nearly a certainty, if the state plans to continue its existing programs.

According to Rains' calculations, about \$1.9 billion in additional revenues will be needed to allow the state to keep up with inflation in existing programs, and to provide a 10 percent salary increase for teachers (\$800 million) and state employees (\$700 million.)

Another \$400 million is due to the effects of inflation.

Meeting those increases with the projected \$324 million - or \$700 mil-

Legislative Budget Board calculates lion - additional revenues will be "a neat little trick," Rains says

That means, in all probability, a tax increase will have to be enacted, Rains concludes - leaving about the only question that of how it will be done

One of the simplest solutions would be to raise the sales tax, he noted, since increasing the tax by a penny produces one-half billion dollars in revenue for the state.

That, of course, means a two-cent, or three-cent increase, if that's the market, paying two-thirds of the sevonly way to make up the projected deficit

Rains notes that increasing the sales tax isn't a popular idea with many legislators; it's also not a popula: idea with Gov. Clements, who turned his nose up and his thumb down on a proposal by his Mayors Advisory Committee that a local sales tax be permitted to help fiscally strapped municipalities.

That doesn't mean the proposal won't be revived, however - in fact, it's expected that the proposal will be introduced.

Severance taxes are another area which Rains feels offer possibilities for additional revenue.

.He points out that the current severance tax on oil and gas is a percentage (7.5 percent), which has resulted in Texans, who pay more for their gas on the intrastate market than do outof-state customers on the interstate erance tax - while consuming onethird of the gas.

Rains suggests that a fixed tax - so much per 1,000 cubic feet - would end that situation, and result in fairer treatment for everyone.

And he also notes that some natural resources - such as timber, coal and uranium - are not covered by present severance taxes (although the possibility of a tax on uranium is being looked at by the Texas Energy and Natural Resources Advisory Council.)

The one area that Rains feels can't be considered is property taxes noting that ad valorem taxes already have-people up in arms, especially after they've discovered that the "tax relief" measures passed in prior sessions have redistributed rather than eliminated taxes for many areas.

Rains told the agricultural lobbyists that the agricultural productivity provisions have resulted in small town residents, in a number of districts, having to pick up a greatershare of property taxes - and warned that without some help from the legislature, those districts are going to turn to taxing agricultural personal property more heavily.

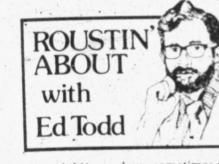

And that means that the legislative forecast has to be for storms, because those clouds aren't going away.

# Death, life complete, complement each other

The coming of death is as sure as is the beginning of life. 7

For mortals, one is never without the other.

But, don't be saddened; it's just part of living. For the good-natured and the cynical, there's humor all

around this mundane, sometimes macabre world that has occasional rays of gaiety and hope. But "dark humor" always looms. Witness:

"Man weeps to think that he will die so soon; woman, that she was born so long ago," wrote that compleat American critic, H.L. Mencken.

German writer Heinrich Heine, recognized for his bittersweet style. observed: "Sleep is lovely, death is better still, not to have been born is of course the miracle.

But, why dwell on death, except to ponder its meaning?

'The more complete one's life is, the more...one's creative capacities are fulfilled, the less one fears death ...," wrote an astute Lisl Marburg Goodman. "People are not afraid of death per se, but of the incompleteness of their lives.

#### True

Though death always is at hand, man - unless suicide is his choice somehow pretends that it always is 'not yet.

"Old man, exhausted by ordeal, detached from human deeds, feeling the approach of the eternal cold, but always watching in the shadows for the gleam of hope," said Charles de Gaulle, the French statesman-soldier who lived a decade past three score and ten.

"Man is the only animal that contemplates death, and also the only animal that shows any sign of doubt of its finality," observed William Ernest Hocking.

Magazine editor Norman Cousins shared this bit of philosophy in his approach to life and death: "Death is not the greatest loss in life. The grea-

# LETTERS TO THE EDITOR

### Ode to Otto

To The Editor:

I would appreciate you putting this in "Letters to the Editor:

Officer Steve Otto c/o Midland Police Department Midland, Texas 79701

#### Dear Officer Otto:

St. Ann's School Board would like publicly to thank Officer Steve Otto of the Midland Police Department's "Crime Prevention Unit" for the time he spent with our students and the effort he is making to reach all the children of our city.

Officer Otto visited St. Ann's School four times this year to inform our fifth and sixth grade students and their parents on the nature of drug abuse and the problems associated with it locally. The parents, especially, feel more comfortable knowing there is someone on the force as knowledgeable, dedicated and concerned as Officer Otto.

In addition to recognizing the work officer Steve Otto is doing, we wish to commend his superiors on the Midland Police Force for their interest and support in promoting this very worthwhile program.

Pat Bernard, Secretary St. Ann's School Board

#### Heart of gold ...

• Readers are invited to submit letters on any subject although slanderous, defamatory or unsigned letters will not be considered for publication.

For valid reasons, at the discretion of the editor, the name will be withheld but must be included in the original letter.

Writers should be as concise as possible and the right to condense letters of more than 200 words is reserved.

Letters must be received by noon Thursday for Sunday publication. If necessary, the latest received may be held for publi-cation the following Wednesday or Sunday.

They should be addressed to: Letters to the Editor, The Midland Reporter-Telegram, P.O. Box 1650, Midland, Texas 79702.

everything good, believed in, and hoped for, which is found in the hearts of men and women everywhere that love life and value their God-given. freedoms and with the greatest virtue being of love and their responsibility of serving a great and wonderful God

The other is the evil force of men and women dedicated and sold out to Satan that not only wish to destroy life and take away all our freedoms but leaving behind thousands of enslaved or murdered innocent victims that will stand in their way. Their greatest tool of overpowering the people of any nation is through the government using so many deceptive tricks and lies that far too many people will buy and even those who claim to be Christians. It is so much easier to go along than to stand up and fight against this evil force, which is mind conditioning thousands of our children through their humanistic religion (Satan's religion) under the guise of "free education" or "compulsory education." There are far too many people who don't want to get involved and believe the souls of our children are only "political" and so much easier to let them be indoctrinated with both the good and the bad, and just sit back and hope they'll be strong enough to stand up and be dedicated Christians and our future missionaries. I just wonder how many little hearts are being molded and influenced outside the home for worse because of a few churches that have taken it upon themselves to teach their own without being motivated by money, buildings and expenses.

ing to follow in daily life the course of

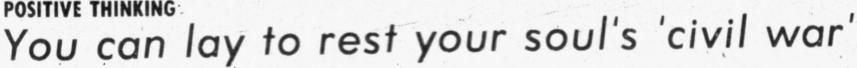

the Sermon on the Mount and on the

other hand indulging in destructive

weaknesses of the flesh, especially

"I was raised in a Christian, reli-

to share experiences with prayer.

#### By NORMAN VINCENT PEALE

A man stopped me on the street and made a very curious remark. He told me that certain weaknesses in his character were virtually tearing him apart. The way he said it struck me as quite descriptive. "I'm a civil war," he said.

While the figure of speech is curious, the condition is a very common one. It was no mere fancy that prompted some writer to compare human nature to a battlefield "where two opposing forces meet and where they seldom part."

The opposing forces are, of course, the good and evil in a person. Essentially we are children of God, created in God's image. As such, we aspire to nobility, goodness, greatness of soul, But we also have an animal nature, compounded partly of base appetites and selfish passions. This is an inescapable concomitant of having a

clash.

will not stay asleep.

for alcohol." Notice that reference to Robert physical body. It is inherent in being Louis Stevenson's famous story of Dr. human. And the two elements in us, Jekyll and Mr. Hyde, because it carthe good and the bad, inevitably ries an important implication. Ste-

venson's tale is a study in split per-Now fortunately we cannot escape sonality. The virtuous, altruistic Mr. this turmoil for very long by sup-Jekyll underwent each day at nightpressing or putting to sleep the good fall a mysterious transformation and in us. It refuses to be suppressed. It lived a separate nocturnal life as the

evil Mr. Hyde.

When the writer of this letter describes his own past condition as an existence of that kind, he is, of course, making his point by exaggeration; but it does suggest that he seemed to himself a case of split personality of course that recognition indicates moral conflict of a most agonizing kind.

Well, let us see what it led to. "When I was stationed in Korea in 1953 and 1954," he writes, "I was stricken to the soul by what I saw of the suffering of the Korean people, especially the children. That, together with being separated from my loved ones, started me off on some very heavy drinking - exceptionally heavy even for me.

"A few days after Christmas in 1954, emerging from a round of terrible excesses and beset with remorse for my unfaithfulness to both family and God. I knew I could not continue this struggle by myself.

"In the late hours of evening I set off through the snow to an Army chapel about a mile away. With a humbleness I had never experienced before, I knelt in that dimly lit chapel and poured out my heart in prayer.

"As I continued to pray, I was

aware of a gentle touch on my shoulder, and the awesomeness of the warm feeling, together with an immediate lightening of my heart, was an experience I shall hold forever.

any religious experience is whether it

prayer - seeking His help for my fellow man on earth and not asking for personal help except where it is truly needed - gives me a strength in daily living that I had not thought possible.

over old weaknesses and he was pret-

ty happy about it.

LOU GRANT

1980 Los Angeles Times Syndicate

"I personally have found that

This soldier had found new strength

To The Editor:

1980 marks the eighth year for the community of Midland to support the Christmas In April project.

Christmas In April is Midland's only volunteer housing repair project. Recipients are elderly and/or handicapped; own their homes; and live on a low income that does not allow them to pay for needed housing repairs.

The Human Relations Council works jointly with the Christmas In April Steering Committee to help coordinate recipients, fund raising and public relations. Christmas In April is desperately needed project in Mid-

Nothing is more pathetic than for an elderly person to have to live in substandard housing. Many of our senior citizens are living in housing with inadequate heat; ventilation, and plumbing facilities.

Again, my sincere thanks to Midland. You're a grand ole city with a heart of gold.

**Bobby Trimble** Coordinator Midland

Two great forces

#### To The Editor:

Just as a Christian may look at the world as saved or lost there are two great forces in the world. One is of

Political party game: Believe it or not, results belie rhetoric

#### By WILLIAM GREIDER The Washington Post

WASHINGTON - In Washington, where so many people dine out on super-earnest and misinformed political opinions, there is easy money waiting for anyone willing to disturb arrogant conversation with a few

hard facts. In this city, people are always blowing off about the big issues, conservative trends and liberal dilemmas and all that. So the following advice is offered to Washington party-goers. Stick out your chin and say something provocative like this: "Richard Nixon, for my money, was the best friend poor people ever

Your circle of acquaintances may simply drift away, assuming you're gassed and beyond rational conversation. Or they will surround you with outrage, challenge your glibness, demand a retraction.

At this point, they are already hooked. You may confidently offer

them a small bet. Such as: The Nixon administration built more low-income public housing for the poor than any of those big-hearted Democratic presidents with all of their liberal prom-

Nobody at this cocktail party, whether they are assembled liberals or conservatives, will believe you. Take their money and tell them to look it up. Page 219 of the Department of Housing and Urban Development's Statistical Yearbook.

While they still have their wallets out, move smartly on to the subject of balanced budgets. Everyone knows that Democrats are the carefree big spenders who fritter away our taxes while Republicans, whatever else they may lack, are good with the bottom line. Therefore, you declare: "Republicans like to talk about ba-

Inced budgets, but the Democrats have a better track record. Harry Truman balanced more budgets than Dwight Eisenhower, but Ike is re-membered as a fiscal scold and Tru-man as a strandthrift."

Nobody will believe this either. Still, it is true. Check the history with the Congressional Budget Office, which keeps track of such things.

While you are chatting with the CBO, ask by the way about defense spending under Republicans and Democrats. This is another sure win-

Democrats are "soft" on national defense and Republicans are stal warts of the military-industrial com plex, right? Wrong. If you look back over the last 30 years, there is one consistent trend in defense spending: Democratic administrations pump up the Pentagon budget and Republican presidents hold it down. Look it up. My point, of course, is that each of these little-known facts and a great many others 1 could cite - conflict with the convenient rhetorical 4ssumptions about national politics and policy. You will always hook someone because they have so often heard or read about the speeches which con-vinced them the opposite is true. Didn't Richard Nixon tell us him-

self that he was against all those liberal programs? Yes, he did. And he didn't he try to turn them off? Yes, he did. And didn't he succeed until Watergate came along to unseat him? No, he didn't.

If Richard Nixon truly meant to dismantle the Great Society, he failed miserably. He reacted, like any other president before or since, not to his own desires or his party's ideological persuasions, but to the homeiy realities which confronted him. That included a Democratic Congress bent on standing its ground, an array of existing federal programs churning out money and growing, plus hoary political equations. How many battles can you take on at once? How many groups of voters can you safely aggravate without losing political esteem?

Considering his expressed views, all those speeches flogging the federal government, Richard Nixon was especially craven in answering those political equitions. He let the federal

gravy pour and took full credit for it until after his re-election in 1972. Then, safe from the voters, he set about trying to turn off the federal spigots. Too late. Watergate intervened, and we shall never know whether Nixon would have prevailed

in his counter-revolution.

I am skeptical myself. The longer I observe government and politics, the more cautious I become about the public rhetoric of politicians, all politicians. This is not because presidents during my brief experience have been especially insincere or mendacious though many have been both.

My skepticism is, instead, a modest recognition that events pull in one direction and most political leaders, Republican or Democratic, liberal or conservative or middle-middle, go most readily with the pull of events. On those infrequent occasions when a president stands against the tide, he is often swept away, despite his own intentions.

#### TV values

To The Editor:

There are so many dangers and problems that our country is facing today that it is difficult; if not impossible, to keep up with all of them. But here is a problem we all can do something about and that is the nationwide plan to clean up TV. One way to do this is to boycott sponsors of shows who use the money we spend purchasing their products to try and destroy our family values.,

A congregation of the Church of Christ in Joelton, Tennessee 37080 (P.O. Box 218) has sent out over four million boycott committments. Write for your copy of their brochure.

This boycott is aimed at those who bring offensive shows into our homes. Each signer of this committment is stating to the sponsors that they will no longer buy their products, if the funds are used to promote trash on our TV networks.

This is of prime importance, please write to the above address today! You have a great opportunity to do some--thing about what is shown on TV.

R. Neumann Midland

### Note of thanks

To The Editor:

The League of Women Voters of Midland thanks you for publishing the three page "Voter's Guide" before the recent primary election. We in the Midland League feel that informing voters is one of the most important things we can do, and we appreciate, your help. You are to be commended for this public service.

# German World War I pilot opposes women combat fliers

SEATTLE (AP) - Curse you, Red **Baroness?** 

None of that for 87-year-old Joseph Bauer, a World War I German pilot. He says women shouldn't fly in combat "if there are enough men around to do it.

"Women can help in other ways on the ground, in the office or loading planes, but not fighting," Bauer said in an interview.

He flew dozens of missions and thousands of hours in a variety of flimsy biplanes over France and Belgium from 1916 to 1918, spotting targets for German gunners on the

His arm bears a scar from a bullet. and he still carries in his foot part of a shell from another fracas.

Bauer sbrugs when asked how many enemy planes he shot down. "When fliers get together, they talk about how good it is to be alive, not how many confirmed kills they had." he says.

"Whoever goes up in an airplane and doesn't get shot down is an ace.

Bauer is a slim 5-foot-6, bald, with a wisp of white mustache. He was dressed nattily in a yellow sweater

and tan slacks. The tidy apartment he and his wife,

HALF GALLON

Madelone, share is a small, sunlit, well-dusted museum of flight. Walls and scrapbooks hold paintings and yellowing photos of gallant fliers, biplanes with black German crosses on their wings and scenes of Bavaria, where the Bauers grew up.

And carefully cushioned in small purple and red velvet boxes, brought out of a drawer, are Bauer's Ircn Cross 1st Class; Bavarian Cross of Merit with Crown and Swords; and the Emblem of Merit for Service to the Fatherland.

"Wars are fought for money. In the end, if you're in the manufacturing game, you make money. You don't make any money fighting the war," he says

"Luck," he adds, "is No. 1. I was a good pilot, not afraid of anything, But, I was lucky.'

His career in the sky began in the trenches. He joined the German Army and while slogging across a grimy no-man's land, "this little Frenchman on a hill shot at the captain and hit me instead, in the arm."

As he recuperated, Bauer reflected on his inglorious life. He watched aviators, unsullied by mud and muck. parading around town, attracting en-

#### ship from women.

"I decided I wanted to be a big shot, too," Bauer says, and he signed up.

"We had many dog-fights. You would try to fight off one plane and another would sneak up and you could hear the 'tat-tat-tat' of the gun as it went by," Bauer recalls.

"One finally dove at us, shooting for our gasoline tank. That would have blown us up, POOF. But he hit me in the foot instead. Lucky again." Bauer headed the plane back behind German lines and spent the rest of the war in a comfortable hospital.

former flier in Washington state. He emigrated to the United States in 1923 and became a citizen in 1930. He has farmed, run a restaurant in Grand Coulee. Wash., and prospected for gold in the Yukon.

For a time when he first came to America, he shuttled passengers in a biplane between Portland, Ore., and Seattle. For extra money, he gave joyrides from Boeing Field, just south of Seattle.

The Bauers' son, Robert, of Fort Walton Beach, Fla., is a retired U.S. Air Force officer, who helped airlift U.S. prisoners of war from Hanoi as the Vietnam War ended, Bauer says.

It's very simple and now I am making a habit of doing it every time I see that cord starting to get short.

The simple trick is to unwind it!

All you have to do is hold the end of the cord at its base and let the receiver dangle. And it will unwind itself - the same way you untwist a yo-yo.

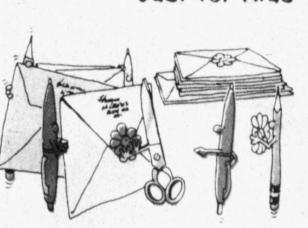

Takes but a few seconds and it sure makes my life a little easier. Give it a try and see what you think. Heloise

WATERING PLAN DEAR HELOISE I have always had difficulty watering my violets without getting water all over the leaves and spilling some on the table or whatever the pot is on.

then spread out the cloth on the table in the position I want it to hang. No ironing and no fuss!

I like to use those handy nonwoven cloths for washing dishes but, after laundering, they are too small and too thin to feel comfortable in my hand.

So. I sew two cloths together, running a line of stitching down the center or around the edges.

#### A SUPER STICKY IDEA DEAR HELOISE:

Sometimes I have problems getting envelopes to stick. Stickers are too expensive to buy and have to be put on every letter.

So what, I do is save scraps of adhesive backed paper which my mom uses to line cabinets, etc. I cut out a flower or something in the size I need.

It's inexpensive and decorative at the same time. Grace
