in the Haskell area has speeded up in recent days, but is still hampered by wet ground in spots and a shortage of combines, local grain men reported Wednesday

The once-promising wheat and oat crop has deteriorated considerably as harvest has pro-gressed, with most of the wheat of poor quality, light test, and premature.
"The crop is the worst in the

county's history, insofar as the quality and weight of the wheat is concerned," one local buyer said. Some of the damage to the crop has been caused by ruse, he said, but other factors, too much moisture or a late freeze, contributed to the low quality

the crop, he believes.
Wheat being brought in is averaging around 53 pounds on bucket test, with some testing 58 pounds but none going as high as 60 pounds. Some wheat is turning out as much as 20 bushels per acre, with about 12 bushels the average yield, according to A. T. Ballard of Market Poultry & Egg Company.

Oats likewise are disappointing to growers, and are turning our extremely light, testing 23 to 28 pounds with a yield of 30 to 40 bushels per acre. Oats suffered more than wheat from recent high winds, and a big part of the acreage in early oats is "on the ground." Late planted oats, which will be harvested in about two weeks, will likely show an improvement in quality, Ballard

forty years ago, in June of 1917, the Humble Company received its charter from the State of Texas.

The Company was formed through a merger of the properties of a number of independent oil operators. Its founding brought together a remarkable group of men who occupy an important place in the annals of the oil industry:

R. S. Sterling and his brother, F. P. Sterling, the principal organizers of Humble Oil Company from which the present company acquired its name; W. S. Farish and R. L. Blaffer composing Blaffer and Farish; H. C. Wiess with assets from Paraffine and Reliance Oil Companies; Walter W. Fondren and C. B. Goddard, producers; and L. A. Carlton and E. E. Townes as lawyers.

All of these men contributed greatly in adopting the principles, in shaping the policies, and in laying out procedures that have guided the Company's progress through these forty years. Their influence will survive as long as the Company continues.

They possessed courage and business judgment. They established high standards of performance. They built a strong organization of competent men

The Company, as it stands today, is a tribute to the leadership, the vision, and the work of its founders.

But it is doubtful that these men, with all their foresight, visualized the changes that have occurred in the oil industry since 1917, or the size and complexity of Humble's present operations, or the extent of the Company's contributions through the years to the progress of our society.

To all who have made those contributions possible-employees, customers, shareholders and the people of the states in which the Company operates-Humble extends its thanks.

Washington News Letter

LYNDON B. JOHNSON U. S. Senator

Throughout my life, I have firmly held to a fixed belief. It was summed up by Thomas Jefferson when he said:

"I know of no safe depository of the ultimate power of society but the people themselves; and if we think of them not enlightened enough to exercise their control with a wholesome discretion, the remedy is not to take it from them, but to inform their discretion by education."

Because of this belief, I did not

deplore the fact that the Russian communist leader Nikita Krushchev was able to come into our Throckmorton GI homes by television and state his Finishes Aircraft case. I believe Americans have too much sense to be deceived by open communist propaganda.

I did regret, however, that we did not answer his broadcast with a demand that the Russian leaders grant spokesmen of our own morton, was graduated June 14 choosing the right to appearuncensored—on Soviet television and radio. I am willing to back the American case against the communist case any time-because I am confident the American case will win.

Since the end of World War II. this nation has taken the lead consistently in trying to rescue mankind from atomic conflict. We have offered to reduce armaments; to share our atomic secrets; to allow "open skies" inspection to enforce disarmament agreements. We have asked in re- W. S. I believe we should demand the right to make weekly telecasts and radiocasts to the Russian people. They should have the chance to hear our businessmen; our labor leaders; our professionals; our leaders of agriculture. In return, we should be willing

"The Wildest Town on the Prairie" was applied 90 years ago by the late Dr. Robert T. Hiss, Dai-Mrs. Shelley Royall, Haskell, las historian, to Fort Griffin town, the first settlement between Fort Worth-Weatherford and Sante Fe. N. M. Centering around the Bee Hive Saloon and 15 other such spots where the traveler could quench a thirst, or gamble to win or lose with the Best of the Frontier—Doc Halliday, Johnny Golden and Lotta Deno were among the better known. Early newspaper accounting listed 37 rope "neck tie" parties at the height of the lawless frontier.

The Fort Griffin Fandangle show in Albany on the evenings of June 27, 28 and 29 tells the Story of Fort Griffin, as written and directed by Robert Nail, with music and and dancing, dialogue and pantomine-with the more than 400 costume dresses for the women and girls from "Godeys Fashion"—no one seemed to care what the men wore in that day and time.

Public Director Alice Reynolds nag written some new songs, and with balladry and chorus the Frontier songs are presented in the story under multi-colored lights, under the stars in a large stage, with background of native

July Plentiful Foods List Is Announced.

College Station-Turkey and ice cream are the featured foods on the U.S. Department of Agriculture's Juy plentiful foods list. These two foods will get special promotions during the month— Mid-Summer Turkey Time, July 25-August 4 and Ice Cream Festival, July 1-31.

Turkeys have long been thought of in terms of Thanksgiving and Christmas, but changes in production methods have made this old favorite available the yearround. Ice cream just goes with summer time and increased supplies of milk and butterfat have also increased the amount of ice cream available.

John J. Slaughter, southwest division chief of the USDA's Agricultural Marketing Service, says monthly surveys form the basis for determining the plentiful foods.

Fresh fruits are prominent on the July listing and include peaches lemons and limes. Frozen strawberries will also be in good supply.

Cattle Trade is Again Active at Fort Worth

By TED GOULDY Out-of-state demand for both stocker and slaughter cattle and calves enabled trade at Fort Worth to get away to a favorable opening session Monday. The prices were fully steady.

Good and choce fed steers and yearlings cashed at \$20 to \$23.50, while common and medium slaughter kinds sold from \$12 to \$19. Stocker steer yearlings sold from \$21.50 down, and feeder heifers sold from \$20 down.

Good and choice stocker steer calves cashed at \$20 to \$24, and heifer calves ranged mostly from \$21 down. Good and choice slaughter calves cashed at \$19 to \$22. and culls, common and medium sorts sold from \$10 to \$19. Fat cows sold from \$13 to \$15 .-

50, and canners and cutters cashed at \$9 to \$13. Stocker cows drew \$10 to \$14. Bulls gold from \$11 to \$15.75. The movement of livestock to

market at Fort Worth, and all around the major marketing circle was of only moderate proportions. All species were in smaller numbers than last week, and behind a year earlier. Preoccupation of farmers with

field work was given a major part of the credit for the moderate movement. Despite a collapse of 4 to 7 cents per pound at major whole-

sale meat markets in the East-ern Seaboard and Midwestern areas over the weekend, hog prices were strong at all points and at Fort Worth the top was \$21. hitting a new high for the year. This was 25c above last week's close. Medium grade butchers sold from \$16.50 to \$20. Sows drew \$18 down.

Is An Automobile Animal, Vegetable Or Mineral?

Detroit-Of more than 50 animal, vegetable and mineral products which go into the making of a modern automobile, less than half, surprisingly enough, are metals.

Furthermore, nearly one pound in every five of its weight is some non-metallic substance.

According to Dean Engle, chief engineer at Dodge, rubber is the most used of the vegetable species, with some 175 pounds of the bouncy stuff used for tires, shock mountings, weather sealers and foam-type upholstery. Gasoline is the only non-metal (though min-eral) which comes close to rubweighing in (with a full tank) at just over a hundred pounds.

Cotton, sisal, jute and cork are others of the vegetable family which have found their way into cars. Engle said.

Minerals, as might be expected. are the most common substances utilized in cars, among the weightier being glass, water, oils and plastics. However, if metals were added in here where they belong, minerals would outbalance animal and vegetable products by more than four to one, Engle added.

"It often comes as a surprise to learn how much material other than metal goes into a car," he said. "In a car weighing 4000 pounds, just about 700 pounds will in Kentucky on his return trip be non-metallic substances.

"A person just never realizes how much a group of firemen mean to them. This fact was brought to my mind so real during our little fire. When I heard those fire trucks and saw those familiar faces, an assurance and burst of pride came over me to know I lived in a community with such a fine, expedient fire department. I am sure it was not over four or five minutes, at the most, after the alarm was turned in that you were there and such a welcome to a family scared to death.

"To our fire department and all personnel, may I say thanks a million. If you ever need anything or if I can be of any service to any of you, I would consider it an honor to help in what little

Science Sees Slow Trend Toward Vegetarianism

AUSTIN, Texas-A University of Texas sociologist says Americans are moving slowly toward vegetarianism because of expected rapid population increases. More people can be kept alive

on smaller amounts of land if they eat vegetable matter, rather than animal matter, Dr. Carl M. Rosenquist, specilaist in population trends, or demography, points At the present rate of increase

U. S. population will double within the next 50 years. Scientists at the University of Texas and elsewhere are attempting to develop new food sources, such as algae, so that future generations will not go hungry. U. S. population now stands at

What Is The Chamber of Commerce Worth to Haskell?

(First in a series of articles pointing out the value and achievements of the Chamber of Commerce.)

If you are a businessman, your business has profited from the Trade Extension Program sponsored by the Chamber of Commerce. The monthly Dollar Day and the Christmas Program are two very good examples of the work being done in expanding Haskell's trade terri-

Also, in the field of trade promotion, information concerning Haskell, its schools, churches and other civic inducements is mailed or furnished daily in response to inquiries coming to the Chamber of Commerce.

its active program for civic improvements, street paving, better street lighting, extension of water and sewer mains, sidewalks, etc.

The organization also serves as an information center for newcomers to Haskell, giving assistance in locating homes, apartments, offices, or other rental property desired by new citizens. Goal of the Chamber of Com-

merce is to promote the growth of our city and develop the re-sources of this section to the fullest extent.

To attain this goal the organization needs the support and active help of every citizen interested in building a bigger and bet-ter Haskell. You may enroll for an individual membership in the C. of C. for as little as \$1 per If you are a property owner, month. Alcohol, Accidents Go Hand-in-Hand

Alcohol and accidents go handin-hand, the National Safety Council said today.

More than a fourth of the drivers or adult pedestrians killed in traffic had been drinking, a study by the Council revealed. Further, the Council observed, six of every 100 motorists involved in fatal accidents were "un-der the influence of alcohol," the most serious violation included in the general category "had been

Drinking impairs judgment and reaction time, the tests showed. When quick thinking is vital to survival, the drinking driver is handicapped.

While whiskey was used in this test, physicians point out that a 12-ounce bottle of beer contains about the same amount of alcohol as an ounce of whiskey. "If we're to pull down the national traffic death toll, we have to stop motorists from driving after drinking," the Council said.

AUSTIN-Most owners of farm and ranch ponds do themselves more harm than good in over-stocking their places with fish, is the warning of the hatchery superintendent of the Texas Game and Fish Commission. A dozen of these men, meeting in Austin to work out plans for handling an overflow of requests for fish, say they will do everything pos-sible to restock as many places as they can this year.

"Cooperation on the part of the property owners, however, can make the job a great deal more successful, one of the superin-tendents said. 'Nearly everyone wants a heavier planting than is justified in their impoundments. "We have learned through years

of experience that ponds can be overstocked and as a result the fish do not grow as rapidly as they should. Then the owner comes back for more fish to put into the already overcrowded pond.

The hatchery men pointed out that some owners will misrepresent the size of their tanks or ponds to get more fish than need-ed. This year, with so many im-

poundments refilled by continuous rains, it will be impossible to meet all demands unless requests are within reason, the hatchery men say.

"When making application for fish the owner should attempt to give us accurate information as to area," the superintendent said. "If they tell us the tank covers 40 acres and ig saily covers 10 acres, they have done themselves and everyone else harm." lay - get started
