## Council brings city leaders, minority students together

#### by Ginger Pope/UD

Chancellor John T. Montford and the Chancellor's Minority Advisory Council sponsored a reception Monday to link minority students and community leaders together.

Tech has a lot to offer all students, but it is important to mirror Texas in terms of diversity, Montford said.

First-year minority students, student organization leaders and community leaders attended the reception in the Merket Alumni Center.

"We are currently trying to put into place a mentor program for students," Montford said. "Our two biggest challenges are to have minorities get acquainted better and for us to provide a helping hand."

Tech students need mentorship while at of Tech's Hispanic Student Society and a senior elementary education major from Whichita Falls.

Several minority leaders from the Lubbock community were invited to the reception in hopes of connecting with students, Rodriguez said.

"We had leaders from churches, businesses

ence the same homesickness as everyone else, and it's good to have someone from the same background to associate with."

This is the first time for a Montford reception bringing minority leaders and students together, Rodriguez said.

"We need to keep things of this nature going all year long," she said.

Rodriguez has attended three other schools, and she said she believes Tech has the most to offer to minority students.

Patrick Day, assistant dean of students, said Monday's reception was planned to provide a relationship between Lubbock minorities and Tech minority students.

"Our goal is to enhance the retention of stucollege, said Sofia Rodriguez, president-elect dents and create an environment conducive to the needs of students," Day said.

> About 670 black students and 2,200 to 2,400 Hispanic students attend Tech, Day said.

Before Montford assumed his position as Tech chancellor, the advisory council was known as the President's Minority Advisory Council.

## **Their View**

# **Students need** to tackle class responsibilities

One of these days, I'm going to sue Texas Tech.

Now, I know I'm not some big, talented, athletic football player who's sad because he didn't make it into the NFL. But still, if my future doesn't go right for me, I might as well blame someone other than myself. Everybody else is doing it in

**Brooks Boyett/columnist** 

Stephen Gaines says that Tech messed him up by not properly educating him. Sure, he skipped classes and didn't study enough. But still, it was Tech's fault. After all, he was an athlete at Tech. The coaches at Tech should have warned him that if he didn't attend classes, then he might not get his degree. They should have told him that relying on a career in the NFL wasn't the brightest way to go.

today's society.

It's all Texas Tech University's fault.

That's the way I plan on looking at things for the rest of my life. If I don't get the perfect job after graduation, then - BAM! I'll hit Raiderland with a multimillion dollar lawsuit. I'm sure that somewhere in one of their recruiting efforts, those Tech people mentioned something about how my degree would get me a great job and stuff like that.

The liars.

If I get fired from my job in an advertising firm because I misspell the client's name in one of its advertisements, then gosh darn it, Tech is going to get sued big time. It's their fault for not taking me by the hand and telling me exactly what to do.

Sure my professors emphasized the how horrible this error is, but did they really make me believe that I would get fired for such an error?

I'm just not so sure.

If I'm ever in a car wreck and get injured, I will be sure to call one of those law firms on TV and name Tech as a defendant in my lawsuit.

Why? Because I probably would have avoided that wreck if I wasn't so worried about being fired from that job because Tech didn't teach me enough about the world of advertising.

Maybe I will just sue Tech right now.

It's really not fair that I don't have a scholarship. I have really good grades. I'm a hard worker. But Tech wouldn't give me one of its scholarships. They said I wasn't financially needy enough.

Well, my parents sure as heck aren't rich. I have a brother in college and a sister about to start college next fall. But we don't starve as a family. We eat food each day and wear clothes, too. To the scholarship people, I guess this

## Tech fans need to show courteous behavior

SCHOOL LAB

To the editor: I am an Indian student To the editor: I have played football here at Texas Tech in the department for the Red Raiders for the past four of chemical engineering. I have been in the school (and in the United States) for the past one and a half years. It athletic department. I received my dehas been a very pleasant experience gree last December. for me, but one aspect of college sports has been on the back of my mind for school from which I received it and quite some time now and, hence, I the athletic team I represented. If any-

very impressed by the high standards and quality of sports at the college the value of academics here at Tech. level. However, the so called home Nor does our athletic department becourt advantage (much has been writ- ing put under a microscope ruin the ten about it in the past couple of image of our university. As athletes weeks) seems to me to be quite un- here at Tech, we work hard to represportsmanlike. Let me explain. In India, I have been to international cricket our fans can be proud of on the field (cricket is one sport from which baseball has been derived) matches played between various countries. In matches featuring India, the crowd obviously supports the Indian team, which is perfectly reasonable. One major highlight, however, is that the crowd appreciates any good play from anyone. Further, no one tries to upset a player's concentration during crucial moments, even though this could be easily done. deplore the fact that players from opposing college teams face a lot of distraction during free throws. Also, no one applauds a good move, a touchplay from opposing teams. I am not trying to say that we must support an This is something Hanspard has to good moments just because it happens yours? to be the opposing team who put it play for Tech the next season? Are we going to cold shoulder him or her? The answer is an obvious no. The gist I am trying to get across is let us be mature and get the best out of the game as spectators. Besides, somebody has to lose and somebody has to win. I am suggesting, in general, that heckling had better be avoided to make sports more enjoyable.

## **Tech athletics deserve** necessary respect

years and can't believe how once true fans have turned on the Texas Tech

I could not be more proud of the

## Reality needs to be taken into Tech account

To the editor: I'm tired of listening to the athletic bashing going on here. Sure, I can live in a fantasy world and demand a clean, powerhouse athletic program or I can face up to reality. Last year, Texas Tech provided one of the most successful, well-rounded athletic programs in the country. I don't think too many universities can boast of top decided to put my thoughts in print. one thinks their degree is going to be 25 teams in baseball, men's and I have been to some football, bas- worth crap, obviously they do not women's basketball and football. Hey, right. They need them and deserve ketball and baseball games and am think a lot of our school to begin with. let's all jump on the wagon to support We, as athletes, do not determine Tech. But, as soon as we get caught, portunity through sports that would the athletic department becomes the not otherwise be offered to them -adevil incarnate. We (may have) gotten caught, that's reality. To say that breaking the rules doesn't occur elsewhere just because they have not been caught is pure, ignorant bliss. Just because we don't get caught speeding doesn't make it legal. Another thing, Laura Hipp (Your View 2/21/97), since when does the performance or morality of an athletic team have any bearing whatsoever on the quality of your degree? I know Harvard graduates who are ashamed to show their resume to employers because their football team isn't quite as good as Nebraska's. Has anybody checked where a degree from Southern Methodist University is valued in comparison to one from Tech? I got a feeling that there aren't too many SMU students that would offer their degree in exchange for one from Tech — that's reality. Your degree is only worth so much. down or anything that shows quality equate GPA does not make him a bad That's why no one gets the real cash out of college; they have to get a dose jor of reality first. This is something all opposing team, but let's not miss out deal with personally. Why worry if he these (University Daily) columnists on the opportunity of enjoying some got his degree, as long as you got seem to be lacking. Take Matthew Dillingham (Your View 2/21/97) for 249 19 35 I'm sure Dillingham knows exactly What if the same player came to rules) athletes achieve their goal in the duties and responsibilities of the chancellor of Tech. He makes assumptions comparing law professors and Montford's work loads. I don't know if anyone out there has noticed, but Montford has probably gotten more money for Tech in the last month than God has given to the entire Lubbock church community. The only reason we can make renovations to the administration building is because of Montford's fund-raising ability. Isn't it kind of funny how Montford's spe-

cial interests involve the university?

In addition, it's easy for people to complain in the paper or in some other kind of media, but, instead of griping, why don't you get off your lazy butts and get some student support and take it to the student government. If all anyone does is sit there and complain, all they'll ever be are average students and, like columnists have said, no one looks out for the average student.

As for all you out there who think athletes get special privileges, you're them. A lot of these kids have an op chance to go to college. Most athletes practice 20 hours a week in season, plus go to practice and travel to games. It doesn't matter if they have a test the next day or not; they still have to practice and play. Then, when they get done they have to study. We all know that the athletes going to Tech are not the best students in the world. Since they tend to help the school earn a lot of revenue and a majority of them are good people, then I think we can afford them tutors and one free meal a day. They need your support because they are people trying to make it just like you and me. What do you think goes through their mind day after day when people, ignorant of their situation, berate them with their opinions? I'd love to say they ignore it, but they don't. Do not let the actions of a few dictate your opinions - get some facts.

**Your View** 

means I'm loaded. I disagree.

So, I'll sue Tech for a full scholarship. That'll show them.

But I think this scholarship should be different from the others. It should reward me for my fine academic standing, but it should allow me to play football, too. Spike Dykes would be required to start me at tailback, even though I'm roughly one-third the size of most water boys.

Sure, Tech's reputation as a football team would suffer and they'd lose a few games. And sure, I'd be taking advantage of all that Tech was giving me. But, hey, no big deal, because I deserve it.

And if you don't like my idea, I'll sue you, too.

## **Term limits receive court setback**

## Justices reject Arkansas ballot notification without comments

WASHINGTON (AP) - The Supreme Court dealt a setback to supporters of congressional term limits Monday, rejecting Arkansas' effort to put an election-ballot brand on candidates who fail to embrace the restraints.

Under a new provision of the Arkansas Constitution, elected officials whose efforts in behalf of term limits were deemed unsatisfactory would have had a "scarlet letter" notation next to their names on Election Day. It would have stated: "DISRE-GARDED VOTER INSTRUCTION **ON TERM LIMITS."** 

That requirement was struck down by Arkansas' highest court. In its action Monday, the Supreme Court let that ruling stand without comment.

The Arkansas measure is duplicated in eight other states, where legal battles continue.

The "scarlet letter" nickname for such provisions comes from the 1850 Nathaniel Hawthorne novel in which people convicted of adultery were forced to wear a scarlet "A."

The amendment to the Arkansas Constitution was adopted by voters in November.

Backers had hoped that the nation's highest court would use that case to remove any doubts about the seek penalties against companies that validity of such steps.

"We will continue to fight in the trenches," said Paul Jacob of U.S. Term Limits.

The group expects positive results in other appeals courts, which "will create conflicting precedents that can only be resolved by an

eventual decision from the U.S. Supreme Court," he said.

In other matters, the court: administration's effort to ward off new restrictions on who may join federally chartered credit unions.

-Refused to review a case from St. Louis in which a lower court ruled that the Constitution does not forbid police from letting the news media enter a home while it's being searched.

-Said it will use an Illinois case to decide whether citizen lawsuits can miss a federally imposed deadline for

reporting their use of hazardous chemicals.

The nation's

ing the Constitu-

states had taken

Twenty-three

tion

There's a lot of popular support ... for term limits.

Winston Bryant, Arkansas attorney general

such steps.

The court's 1995 decision also said -Agreed to study the Clinton Congress cannot impose term limits for its own members by merely enacting a law.

The Arkansas measure called on the state's legislators and members of Congress to do all within their power to win ratification of a proposed amendment limiting service to 12 years in the U.S. Senate and six in the House.

The House rejected such a proposed amendment Feb. 13, and the

Senate is unlikely to resurrect it. The Arkansas measure doesn't say whether the "scarlet letter" notation

should appear in only one election or each time a person seeks office in the future.

proval in Alaska, Colorado, Idaho, Maine, Missouri, Nebraska, Nevada and South Dakota.

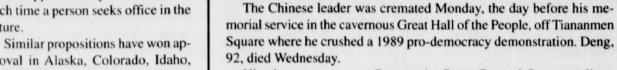

Each measure requires those states' congressional members to push for a vote that would send the proposed amendment to state legislatures for ratification.

Court challenges are being waged in Idaho, Maine, Missouri and Nebraska - and future challenges in the four other states are likely.

The Arkansas Supreme Court ruled that the measure adopted by its state's voters violated the federal Constitution's requirement that all amendment-making efforts originate in Congress or in the state legislatures.

That ruling was appealed by a group called Arkansas Term Limits and the state, represented by Attorney General Winston Bryant.

"It's just a temporary setback," Bryant said of Monday's court action. "There's a lot of popular support across the nation for term limits."

elaborate farewells.

His chosen successor, Communist Party General Secretary Jiang Zemin, led colleagues in a long, slow procession past Deng's body as it lay on a bier among flowers at a military hospital in western Beijing.

With white flowers in their black lapels, they bowed three times before his body. Deng's family had asked that no farewell ceremony be held for Deng in keeping with his wishes.

Jiang and his colleagues are determined to show Chinese that they are Deng's political heirs, and state-run television, which broadcast much of the ceremony on nightly news programs, prominently featured their bowing.

## Vatican: pope to visit Lebanon

VATICAN CITY (AP) - In yet another addition to his crowded travel schedule this year, Pope John Paul II will spend two days in Lebanon in May - a visit that was delayed in 1994 because of security concerns.

Doctors have recommended that the pope cut back on his activities, and his trips this year are no more than two or three days, except for a 10-day stay in his native Poland.

Two 1997 destinations will have dramatic backdrops: the war-damaged cities of Sarajevo and Beirut, the Bosnian capital's predecessor as an urban symbol of civil conflict.

John Paul goes to Sarajevo April 13 and Beirut May 10-11. Both visits were put off in 1994 because of security worries. In between, he plans a two-day visit to Prague. Trips to Poland, Paris and Rio de Janeiro also are on the agenda in 1997.

The announcement of the Lebanon trip came from papal spokesman Joaquin Navarro-Valls Monday shortly after the Lebanese prime minister, Rafik Hariri, visited John Paul at the Vatican.

## Somaliland president re-elected

MOGADISHU, Somalia (AP) - Clan leaders in the breakaway republic of Somaliland have re-elected Mohamed Ibrahim Egal as their president, the Somali press reported Monday.

Egal, a former prime minister of Somalia, was elected with 223 of 315 votes cast by show of hands over the weekend in Hargeisa, capital of the self-proclaimed republic that is not recognized internationally.

Somaliland broke away from Somalia in May 1991, five months after the ouster of the late dictator Mohamed Siad Barre. The rest of Somalia disintegrated into a fiefdom of warring clans.

The former colony of British Somaliland has been spared much of the factional fighting and appears to have achieved political and economic stability under Egal.

More than 10 candidates contested the presidency. Suleiman Gaal, a former minister of education in Said Barre's government, came in second with 90 votes, and Mohamed Hashi, the Hargeisa mayor, came in third with 2 votes.

Saddle up: The Texas Tech Polo Club practices Saturday at the rabbit and Indiana Avenue. The Polo Club's purpose is to promote the sport at field, the area of land bordered by the Brownfield Highway, 19th Street Tech. Membership in the club's varsity squad requires horsemanship skills.

## Merger

## continued from page 1

do it."

Auñón said the idea of merging or closing the department of engineering technology will not work.

Auñón also said he doubts a merger will occur anytime in the future.

Ronald Pigott, committee member and chairman of the department of engineering technology, said closing or merging the department of engineering technology was never an option the recommendations committee considered giving Auñón.

Pigott said he never really understood why merging was considered.

The department of engineering technology currently is the fourth or fifth largest undergraduate department in the College of Engineering, Pigott said.

"We increased in the number of students this semester from the fall semester," Pigott said.

"We usually go down 5 to 10 percent in the spring, but we received about five new students and have 214 now."

## Emu

## continued from page 1

The flavor of emu steak was described by about two-thirds of the consumers as beeflike, she said.

Meat may not be the biggest impact emus have on mass markets — the oil derived from emu fat costs about \$80 a pint, Thompson said. The oil is promoted as having medicinal qualities, alyet. Emus also provide leather, which is good for clothing and purses.

"It's sort of similar to ostrich leather, but it's thinner," Thompson said.

"It's more supple and more pliable."

Even though emus provide several products, their meat remains the most familiar to consumers, Thompson said. Emu meat probably never will dominate the market currently dominated by beef, chicken and pork though research hasn't proven it instead, it will most likely be part of

a niche market that includes health conscious consumers and restaurants that offer exotic meats on their menus.

But the supply of emu meat is not constant, Hoover said, making it difficult for restaurants to include it as a menu item.

"The emu industry is better served if it promotes itself as a specialty item," Hoover said.

"Emu meat is an alternative red meat for people who want something a little different."

## Fire sweeps India, killing 77 NEW DELHI, India (AP) - Fire swept through a thatched-roof

hall in eastern India where thousands had gathered Sunday for a Hindu religious festival, killing 177 worshipers, authorities said.

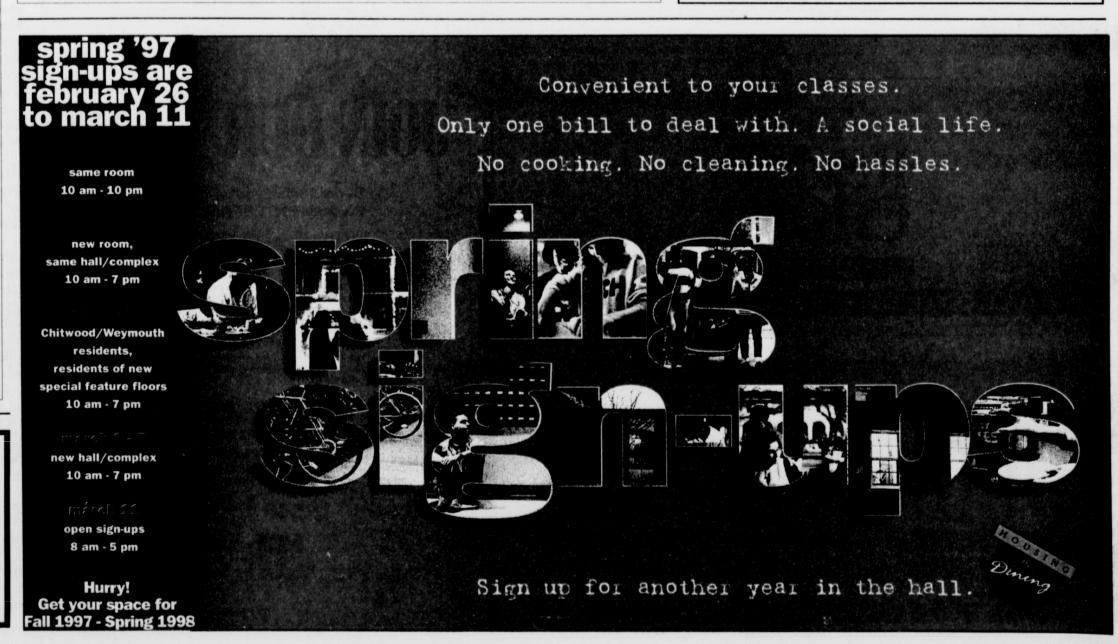

By Monday morning, rescue workers using shovels and pitchforks uncovered 154 charred bodies, while another 23 people had died in the hospital, said Gobinda Chandra, a district magistrate.

He said 123 people remained hospitalized, 30 of them in critical condition.

The fire tore through a temporary hall erected for followers of the late Swami Nigamananda, a Hindu spiritual leader, who had assembled for several days of worship on the outskirts of the town of Baripada, 1,250 miles southeast of New Delhi.

The flames sent panicked worshipers running, Press Trust of India reported, quoting witnesses. Many of the victims may have died in the stampede, the news agency said.

The fire overwhelmed Baripada, which has two fire trucks. The state government ordered doctors from larger towns to rush to the site.

# Image: Constraint of the state of the s

leaving a filthy gas station restroom or a clean bathroom at home, hand washing is one of the most important ways to prevent the spread of germs.

Texas Tech Student Health Services, Methodist Hospital, Bayer Pharmaceutical Division and the Lubbock Health Department have joined together to participate in "Operation Clean Hands," a national public health initiative to educate the public about health risks associated with poor hand washing habits.

This is a heath problem that college students don't hear much about," said Michelle Pettus, a health educacated about this."

allers and a new work we want

A national survey announced in September at the Interscience Conference and Antimicrobial Agents and Chemotherapy in New Orleans revealed that Americans are not as thorough in washing their hands as they think. Ninety-four percent surveyed said they always wash their hands after going to the bathroom; however, surveyors' public restroom observations showed that only 68 percent actually do.

"The problem is that most people just aren't in the habit," said Liz Inskip-Paulk, health education man-

deal, no one will catch them or they just don't want to wash because the bathroom looks dirty."

However, health professionals said hand washing is essential because it helps prevent the spread of germs that cause the common cold, as well as germs that are resistant to antibiotics.

"Studies of child cares have been done," Inskip-Paulk said. "Kids that wash their hands more have a significantly lower sickness rate that those who wash less."

Inskip-Paulk said there is a technique that helps maximize handwashing effectiveness.

said. "Use warm to hot water, any kind of soap that is handy, and use the friction between your hands to get bubbles going."

However, germs lurk on every surface, so hand washing should be done with care.

"The dirtiest place in the bathroom is the paper towel dispenser handle," Pettus said. "You should dispense paper towels before you ever start washing your hands."

Experts say hand washing at the proper times also is important.

"You should wash your hands before you prepare or eat food, treat a wound or care for someone who is sick," said Annette More, a registered

The FDA announced Monday that high doses of six popular birth-control brands, when taken within three days of unprotected sex, are 75 percent effective at preventing pregnancy.

For every 100 women who have unprotected sex during the second or third week of their menstrual cycle, eight would normally become pregnant - but only two would if the women took emergency contraception, explained Dr. James Trussell of Princeton University.

His research convinced the FDA that emergency contraception could prevent up to 2.3 million unplanned pregnancies a year, 1 million of which now end in abortion.

"We're going to see a really big change here," said Trussell, who helped set up a hot line and Internet service that offers women information about emergency contraception and addresses of nearby doctors who already prescribe it.

He said women typically pay \$21 for a cycle of birth control pills plus the cost of a doctor's visit.

To work, two to four birth control pills are taken anytime up to 72 hours after sex - not just the "morning after" - and then the same dose is taken again exactly 12 hours later.

The brands include Wyeth-Ayerst Laboratories' Ovral, Lo/Ovral, Nordette and Triphasil, and Berlex Laboratories Levlen and Tri-Levlen.

The pills prevent a fertilized egg from implanting into the uterus so that it can grow into an embryo.

If a woman already is pregnant, the pills will have no effect.

Emergency contraception is different from the controversial abortion pill RU-486, which is awaiting final FDA approval and ends pregnancy by expelling an already growing embryo from the uterus.

The emergency contraceptive's side effects are nausea and vomiting, sometimes severe enough to prevent the pills from working.

Over 4 million women have taken emergency contraception in Britain alone, and studies there have shown no serious side effects.

# **Circus aftermath leaves fans angry**

## by Sebastian Kitchen/UD

A group of Texas Tech students who left the Depot District upset after midnight Saturday, left upset again Monday after not receiving a refund for the Jim Rose Circus.

"It is not fair," said Brad Copeland, a senior telecommunications major from Houston. "We paid \$10 to see a show we wanted to see. We had a right to see it, and they took it away from us. We should get our money back."

Copeland and his roommate Jason Christian, a junior telecommunications major from Dallas, attended the show with about 20 friends.

Christian and several others went to the Depot District Monday to discover they would not receive a refund for a show they were not able to see.

The head bouncer and a female member of the circus both told the crowd they would get a refund, Christian said.

"We are disappointed the Depot District won't take responsibility for

relevant.

the actions taken in their establishment," Copeland said. "They owe this to the people who go to their shows."

Rose and three of his per-

formers were arrested by members of the Lubbock Police Department on adult entertainment charges.

Dale Nelson, the manager of the Depot District and an unidentified patron of the club also were arrested. They were released Saturday morning.

"I am lucky I didn't get arrested for promoting the event," said Lane Arnold, concert promoter for the Depot District. "I think they were just

point."

Arnold said.

"I want to know why Lubbock will pray for me while I'm at the Marilyn Manson concert and nothing happens when this other stuff goes on."

## Tech students lack common courtesy

Amy Osmulski/

Courtesy was something my dear mother tried to teach me when I was young.

I learned pretty well. I learned to say "Please" and "Thank you." I learned to address people with Mr. or Ms., unless otherwise told to.

I learned to look people in the face when being talked to, and especially not to walk

**TechLife editor** 

away from people who were talking to me. Why bring this up now?

Because, since the beginning of this semester I've had run-ins with possibly the rudest people in the world. It's inconceivable to me that so many discourteous people attend Texas Tech.

In fact, on my way to class Thursday morning in the dismal, pouring rain, I got splashed by a car. There is no doubt in my mind that this car intentionally hit a puddle on the side of the road just right, so the water would come shooting up and all over me.

That was rude. But, no worries. I'm a carefree person.

So on I went, trudging to class with a smile on my face. Until the next car - two cars in a seven-minute period splashed me, and I'm almost certain the second person was laughing as they drove away.

OK. Stay calm. A little water never hurt anyone, right?

I was almost to campus, and I was sure my wet set days were over. So, I continued on my way, with less of a stride in my step.

Now, it's basic knowledge that when a crosswalk flashes "Walk," pedestrians have the right of way. They can walk across the street without fearing for their lives, and without seeing or hearing any vulgarities. This rule apparently only applies to crosswalks not leading onto the Texas Tech campus.

Everyone knows that drivers in Lubbock are the worst - seriously, this is a well-known fact. But, come on. Have a little respect for human life.

So, I made it to campus and, in vain, thought I would be safe.

Well, to my surprise, there is not a bubble protecting the Tech campus.

Many students on this campus don't seem to understand how important it is to watch where you're going. This means, while walking don't talk on the phone, don't stand in the middle of a walkway catching up on gossip, don't stop to light a cigarette and don't read while walking to class. Pay important attention to the latter. It can be hazardous to your health if, say, you trip on a pothole in front of the University Plaza, fall into University Avenue and see your life flash before your eyes.

I know — suck it up, toughen your skin, if you don't like it, don't go to school

No, I don't think so. I think I have as much right as anyone else on this campus to be treated like a human being.

Amy Osmulski is a senior journalism and theatre major from Big Spring. She's getting really tired of the whole attitude on this campus.

**FREE CONCERT!** 

Cloning success creates possibility of brave new world (AP)-It is as if the birds and the genetic material in them to clone. bees suddenly have been rendered ir-

Around the world, biologists gathered at laboratory water-coolers Monday to assess the latest installment in a gripping biotech soap opera — the creation, as if by magic, of a wee lamb named Dolly.

Scottish scientists have revealed that they used a mammary cell from an adult ewe to create little Dolly in the spitting genetic image of its ovine mother. They've successfully repeated the experiment eight times since then.

"The whole thing is just a mindblower," said Ursula Goodenough, a geneticist at Washington University in St. Louis.

The achievement raises countless questions about fate, immortality and the nature of self, but none of that will apply to humans or anything else unless scientists can duplicate their feat in other creatures

"There's certainly no way to rule can figure it out, they may be able to out the possibility, but I wouldn't extend the cloning process to pigs,

So it's a bit too early to mourn the 'End Of Sex" and declare a "Brave

New World" in which people have first names and model numbers. In fact, there seems to be some-

thing unique about sheep that makes them especially suitable for cloning. Researchers have tried for decades to do the same trick with frogs and mice, with no luck. Frogs cloned from adults die in the tadpole stage.

And cloned mice don't develop far beyond an undifferentiated ball of cells. So what is it about sheep?

technology industry, which could use the Scottish cloning process to make specially designed pigs and cattle for organ transplantation. "Pigs are of great interest to be

used as organ donors for humans," said James

ceptible to mad cow disease.

The Scottish process would be use-Nobody knows. But if someone ful for transplants because, in addition to creating a copy of the adult animal, it gives scientists a more el-

be made with special immune system genes that allowed its organs to be transplanted into a human without rejection.

Predictably, animal rights activists aren't too happy about that, or the other immediate economic implication of the feat.

"The main thrust of this experimentation has not been for organs, it's been for factory farming," said Ingrid Newkirk, president of People for the Ethical Treatment of Animals. "Unfortunately, every cloned animal is going to feel the suffering that's inherent in the mass production of living beings."

But plain folks everywhere get a little queasy when they think about Dolly, because she raises some of those big questions about who we are and why we're here.

And she should, said Dianne Bartels, associate director of the Center for Bioethics at the University of Minnesota.

"It's sort of the specter of science fiction come true," Bartels said.

mans in the foreseeable future.

wager an awful lot that it would ever be successful in humans in the foreseeable future," said David Kirk, an embryologist at Washington University.

Even if it is, experts are split on how similar a human clone would be to its progenitor. A clone would look almost identical to the person who spawned it, biologists said, but personality or susceptibility to some diseases could still vary quite a bit. Childhood nutrition and even a mother's experiences during pregnancy can affect how a person turns out just as much as genes do.

That means the chances of evil Nazis reproducing dozens of little Hitlers with blood from a handkerchief, as they did in the 1978 movie "The Boys from Brazil," are pretty remote.

Never mind the fact that blood cells don't have nuclei, so there's no

egant means of genetically editing That would be a boon to the bio- their creations. So a pig clone could

## Tech baseball team deals with player's dismissal, weather woes

#### by Christy Apple/UD

Texas Tech baseball coach Larry Hays dismissed junior right fielder Rick Nadeau from the team Friday for violating team rules.

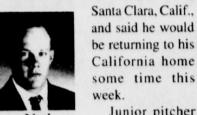

Nadeau had been part of off-thefield problems that had been distracting the team this season.

Nadeau said he was not going to class and was reprimanded for his actions. He said he was not surprised and knew a disciplinary action would happen soon.

"Coach Hays called me into his office and asked why I had not been to class, and I told him I did not know," Nadeau said.

"I know the truth hurts and it is embarrassing to say it, but I had not gone to class in the last six weeks."

Nadeau transferred to Tech this year from College of the Canyons in

and said he would be returning to his California home some time this Junior pitcher

Nadeau Jason Gooding

said the action Hays took against Nadeau was consistent with team policies and the players knew it was just a matter of time.

"This is no big surprise," Gooding said. "Hays is very demanding, and if you do not do the right thing, then actions will be taken against you."

Nadeau said he is embarrassed by his actions but said he only can blame himself. Nadeau said he hopes Hays will use him as an example to the team of what will happen to a player if he does not abide by the team's policies.

get caught, but after the first six weeks there was nothing I can do," Nadeau said. "It got to the point of wasting everybody's time, the school's money, the team and coaches' time."

Hays said he is disappointed Nadeau violated team policy and now says the team will have to rearrange its lineup, especially in the outfield.

"He had a great series last weekend," Hays said of Nadeau, who drove in six RBIs and had five hits against Eastern New Mexico State Feb. 15-16.

"We are going to have to do some shuffling around."

Senior second baseman Chris Shuffield said the team knows Nadeau was an important part of the Red Raiders and his absence will be felt. "Rick has some great hits,"

"I knew sooner or later that I would Shuffield said. "We are going to miss him a lot, both swinging the bat and defensively."

> The Red Raider baseball team anticipated playing its first road game of the season today against the New Mexico Lobos.

> The three-game series was canceled because of bad weather in Albuquerque, N.M. Hays expressed frustration that the Red Raiders have not been able to practice on the field much so far this season.

Big 12 Conference play starts March 7, when Tech travels to Austin to take on the Texas Longhorns.

Hays said he wishes his players, in particular the pitchers, could get more playing time. But he said that with the bad weather lately, that hope probably will not be fulfilled before the Red Raiders face Texas.

## Astros' Wall earns fifth starting spot

sisted of more than four or five words.

The soft-spoken righthander isn't one to waste words unless he's joking around with Billy Wagner, his best friend on the team.

"You guys (the media) just don't know how much Donne really talks," Wagner said. "You should let me have that tape recorder so I can show you how he never shuts up."

Holt, a baby-faced righthander from Dallas, has the gift of gab and isn't shy about sharing his opin-

ing there is another, and Wall will his have hands full trying to hold off rookie Chris Holt for the No. 5 slot in the Astros' starting rotation.

Rule V draftee Ramon Garcia and lefthanders

C.J. Nitkowski and Trever Miller, both acquired in the nine-player deal with Detroit, also could figure into the mix.

But for the most part, it's a twoplayer battle between Holt and the incumbent, Wall. And new manager Larry Dierker has said the job is Wall's to lose.

"It's nice to know the manager believes in you, but you don't want to get too overconfident," Wall said. "I feel like I have to go out there and prove myself again. You can't go out there with a lackadaisical attitude and act like your job already has been given to you."

That's a typical response from

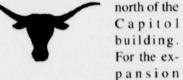

University of Texas stadium expansion approved second deck to the north and south north of the Austin, asked Armbrister during Sen-

AUSTIN (AP) - The University of Texas' plan to expand its football stadium got a boost with a Senate vote to exempt the project from a law protecting views of the state Capitol.

The Senate voted 31-0 Monday for an exemption bill sponsored by Sen. Ken Armbrister, D-Victoria.

The measure now goes to the House for consideration.

University of Texas regents last year approved the expansion plan for Royal-Memorial Stadium, which is

plan to go forward, lawmakers must agree to waive protection of the Capitol views the expansion would obstruct

"It would be true that all the people in Texas own the Capitol and would like to see the views protected?" Sen. Gonzalo Barrientos, D- ate debate.

More than 30 views are protected under the current law.

Armbrister said, "As they also own .. the Darrell K. Royal Stadium."

A deck on the stadium's east side, scheduled to be finished next year, would affect protected views from the plaza of the Lyndon B. Johnson Li-

brary at UT. It would not obstruct views from the library's eighth floor, where former President Johnson had an office.

## Burks living up to Mays comparisons

TUCSON, Ariz. (AP) — As a the road as well, hitting .291. young prospect from North Texas, Ellis Burks drew comparisons to Willie Mays. If he keeps having monster years like he had in 1996, future prospects will be compared to him.

Burks, establishing career bests in every offensive category, led the National League in runs (142), total bases (392), slugging percentage (.637) and extra-base hits (93) and finished second in batting average at .344.

He hit 40 homers, drove in 128 runs and stole 32 bases.

The Colorado Rockies outfielder became only the second player in major-league history to collect 40 home runs, 30 stolen bases and 200 hits in a season, joining Hank Aaron, who did it in 1963. His 392 total bases were the most in the NL since Aaron's 400 in 1959.

Burks, who finished third in the league's MVP voting behind Ken Caminiti and Mike Piazza, also played Gold Glove-caliber defense in left field.

At 31, he finally showed what he was capable of when staying healthy for a full season. Playing half his games at Coors Field didn't hurt, but Burks was one of few Rockies who played solidly on

"I'm not trying to do an encore," Burks said Monday. "Last year, as gratifying as it was, is over. I worked hard in the offseason, I'm in great shape, I have a new contract, I'm playing a new position. I just want to play hard every day."

Rockies manager Don Baylor said his top priority is for Burks to stay healthy, figuring his production will take care of itself.

The back and hamstring problems that slowed his career were held in check in 1996, thanks to a pregame exercise routine and regular rest. Burks still managed to play in a career-high 156 games.

"Last year was just one of those years when it seemed like I could do no wrong hitting or fielding," Burks said. "I went to the ballpark every day with confidence I could make an impact. And when I did make a mistake in a game, I usually was able to make up for it. I was focused every day I came to the ballpark."

The Fort Worth resident who signed a \$8.8 million, two-year contract last October with Colorado, played mostly in left field last season but started 31 games in center field, where he is slated to be playing this season.

## Red Raider football team hires offensive line coach

The Texas Tech football team hired Clovis Hale as offensive line coach effective immediately, Tech coach Spike Dykes announced Monday. Hale will take the place of Ted Unbehagen, who left Tech Feb. 11 to take the same position at Houston.

Hale served as the Red Raiders' offensive line coach from 1984 through 1986 before serving on the Texas staff for five seasons. He spent 1978 at North Texas State and folcoach and running backs coach at Southern Methodist after a stint with the Detroit Drive of the Arena Football League.

the services of Clovis Hale to be our offensive line coach," Dykes said. "He will do an outstanding job coaching the line, recruiting and being an integral cog in our staff."

Hale, 55, began his coaching career as an assistant at Lubbock High School in 1966 before joining Dykes' Big Spring staff in 1968. Hale entered the college ranks in the last five seasons as assistant head lowed head coach Hayden Fry to Iowa.

## Sports

## Tech basketball finds it rough in polls

(AP) — Connecticut made it 10 straight weeks at No. 1 in The Associated Press women's basketball poll Monday, and Purdue arose from the mess left by the Lin Dunn firing to make the Top 25 for the first time this season.

Texas Tech fell from No. 14 to No. 15 in this week's poll. The drop comes after the Lady Raiders lost to Texas 72-61 Saturday in Austin.

Old Dominion (26-1), a winner of 25 straight, remained second, and Stanford (27-1) held on at No. 3. Three voters made old Dominion No. 1, and Stanford received one vote for first.

Purdue (16-9) was the only newcomer, making the poll at No. 24 after beating Illinois Sunday to gain a share of the Big Ten championship with the Illini and Michigan State.

No. 4 Georgia and No. 5 North Carolina traded places, as did No. 6 Louisiana Tech and No. 7 Alabama. Tennessee remained eighth, LSU jumped four places to ninth and Florida stayed at No. 10.

## **Texas Tech Basketball in National Polls**

#### Lady Raiders

The Lady Raiders fell one spot to No. 15 in the nation. The drop comes after Tech lost to Texas 72-61 Saturday in Austin.

Kansas moved up one place to head the Second 10, and Texas fell three places to 12th after a loss at unranked Iowa State. Then it was Virginia, Notre Dame, Tech and Stephen F. Austin, followed by Vanderbilt, Illinois, George Washington and Michigan State.

Tulane (23-4), which two weeks ago joined the poll for the first time in history, dropped out after an 81-70 loss to a South Florida team that entered the game 8-17.

LSU's move from 13th to ninth was the biggest jump, and was matched by George Washington (23rd to 19th) and Western Kentucky (25th to 21st). The biggest drop within the poll was three places — by Texas, Arkansas (20th to 23rd) and Duke (22nd to 25th).

**Red Raiders** 

The Red Raiders, despite a 72-

70 win over Texas Saturday, were

unable to climb back into the top

25 as they came in at No. 32.

Arkansas lost to LSU and Georgia, while Duke was beaten by Virginia and North Carolina. Duke got the final spot in the poll by eight points over Portland (25-1).

In the men's poll, the last time St. Joseph's was ranked was 24 years ago. The school hasn't been in the NCAA tournament since 1986.

The longer streak ended Monday when the Hawks cracked the Top 25 at No. 23 and the other appears ready to end courtesy of a 19-6 record and

an extremely impressive spot in the latest computer index.

The University Daily 7

Unfortunately for Tech fans, the Red Raiders were absent from the Top 25 once again, coming in at No. 32.

Kansas (27-1) was again the runaway choice of the national media panel, receiving 68 first-place votes and 1,748 points to hold the No. 1 spot for the 13th consecutive week.

Minnesota (24-2) held the school's highest ranking for the second straight week with two No. 1 votes and 1,658 points. Kentucky (26-3) won two road games last week to stay third.

Utah and Wake Forest switched places at fourth and fifth, and the Top 10 was rounded out by South Carolina, Duke, North Carolina, Cincinnati and UCLA.

New Mexico led the Second 10 and was followed by Clemson, Iowa State, Xavier, Arizona, Maryland, Louisville, Villanova, Colorado and College of Charleston.

The last five teams in this week's poll were Illinois, Indiana, St. Joseph's, Michigan and Stanford.

## Houston trades Chandler to Falcons for picks

SUWANEE, Ga. (AP) - The Atlanta Falcons acquired quarterback Chris Chandler, a player whom coach Dan Reeves thinks will turn around the beleaguered team, from the Houston Oilers for two undisclosed 1997 draft choices Monday.

"We believe he gives us a chance where we can win immediately," Reeves said. "We feel like he gives us the ability to compete. He's a guy who can get the job done."

Reeves replaced June Jones after the Falcons went 3-13 last season.

Asked if Chandler would be the starter, Reeves said, "Right now he's the only one we've got."

Last year's early season starter, Jeff George, was suspended and subsequently released by the Falcons after a sideline shouting match with Jones during a nationally televised game Sept. 22. Earlier this month, · George signed a five-year, \$27.5 million contract with Oakland.

George last season, now is contemplating retirement. The Falcons had talked to San

Francisco backup quarterback Elvis Grbac. "We will not pursue Grbac now," Reeves said.

Chandler, a 10-year pro, has two years remaining on his contract.

"What I wanted was a commitment from a team," Chandler told Houston television station KRIV. "Dan made that very clear to me, and I'm just excited it's going to work out

In two seasons at Houston, Chandler completed 409 of 676 passes for 4,559 yards with 33 touchdowns and 21 interceptions. His 60.5 completion percentage moved him past Ken Stabler as the club's all-time career leader.

Chandler's 33 touchdown passes in two years with Houston were only eight shy of the 41 he threw during his first seven years with the Colts, Buccaneers, Cardinals and Rams.

"I think the last three years I've played as well as anybody in the league," Chandler said. "I have a lot of experience, I have a lot of confidence, I go out there and feel I can play with anybody."

Chandler has been bothered by injuries in the past. "We hope he can play the full 16 games," Reeves said. "He has performed at a high level when he was healthy."

Reeves noted Chandler's ratio of touchdowns over interceptions. "We saw skills in him," Reeves said. "He does throw the ball well. He can throw the deep ball well."

## Tech not satisfied with Longhorn win

#### by Brent Dirks/UD

Riding a big win over Texas Saturday, the Texas Tech men's basketball team tackles Missouri at 8 p.m. today at the Hearnes Center in Columbia, Mo.

The Red Raiders (16-8 overall, 8-6 Big 12 Conference) feel good with the 72-70 win over the Longhorns Saturday, said Tech coach James Dickey.

"They feel great about that win, but we don't feel great about where we're at," Dickey said. "We're happy with the win, but we have still have a lot of work to do to get where we want to be."

Dickey, who never has played the Tigers, said playing at the Hearnes Center will be tough for the Red Raiders especially after Missouri knocked off No. 1 Kansas 96-94 in double overtime Feb. 4.

"They're good," Dickey said. "Everybody's good at their home. It will be tough up there. It worries me every

time we play either at home or on the road."

Missouri is led by forward Kelly Thames (13.3 points and 5.7 rebounds per game), center Derek Grimm (11.7 points and 4.8 rebounds per game) and guard Jason Sutherland (12.1 points and 2.3 rebounds per game).

With four Tigers averaging double figures in offensive production, Dickey said Tech's defense, which has limited opponents to an average of 71 points in the last three games, must be ready to play again.

"You have just got to play sound defense and hope you don't let somebody just have a huge game," Dickey

Tech vs. Missouri When: 8 p.m. today Where: The Hearnes Center in Columbia, Mo. Radio/TV: KRLB-FM 99.5/ Creative Sports Channel 22 (Cox Cable 15)

said of the Tigers' offensive weapons. Another question for the Red Raiders going to Missouri is the starting lineup.

After starting four straight games, Tech freshman point guard Rayford Young was benched in Saturday's

Dickey said it

"It depends

Texas game in favor of junior forward Gracen You have Averil. just got to play will be a game sound defense time decision on who the Red and hope you Raiders start against the Tidon't let somegers. If Missouri goes with a bigbody just have ger lineup, Averil

will start. a huge game. on what their lineup looks Tech coach James

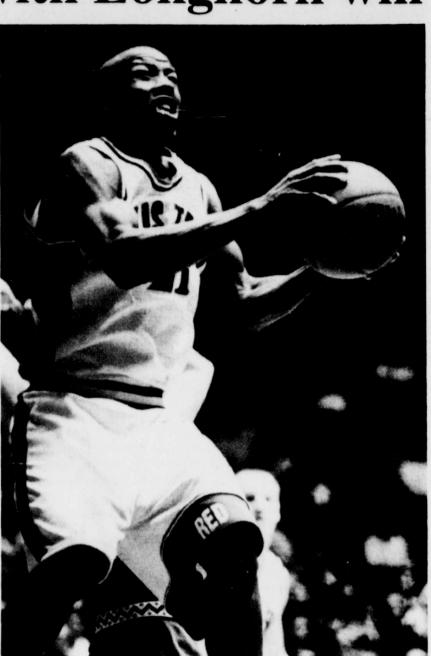

like," Dickey said. "Both of Dickey on Missouri them did a good

job (Saturday). It will depend on who (Missouri) starts."

For the first time since late January, four Red Raiders were in double digits offensively Saturday. Dickey said he would like for that trend to continue.

"We would like to spread it around - it makes it more difficult for the defense," Dickey said of the Red Raiders' balanced attack. "Obviously, it helps Cory (Carr) and Tony (Battie)."

Sophomore guard Stan Bonewitz, who scored 10 points and had a career-high nine assists against the Longhorns, said the Texas win was a good one for the Red Raiders.

Up, up and away: Tech junior guard Cory Carr takes off for a layup against Texas Saturday. Carr had a game-high 22 points in the 72-70 Red Raider win.

"It was a win we wanted to have," Bonewitz said. "We feel good, but we can't be satisfied. We know we still have a long way to go and we have a lot of room for improvement. We need to continue to work hard and get ready to go to Missouri."

Bonewitz said he, like Dickey, would like to see the Red Raiders come out each game with a balanced attack.

"We just want to play well as a team," he said. "(Saturday) we did a

good job of moving the ball, setting picks, trying to get the ball inside. Overall as whole, we played better." Bonewitz, the Big 12's second leading three-point shooter, said Mis-

souri sports a good team as well as a good home crowd and a hostile environment. "They're a great team," Bonewitz

said. "They play especially well at home. It's going to be a tough place to play. We're going to have to work hard to have a chance up there."

## Men's tennis back in action after layoff

## by Brent Dirks/UD

After being handed its first defeat of the season Feb. 16, the Texas Tech men's tennis team hopes to get back to winning as the Red Raiders battle Abilene Christian at 2 p.m. today at the Athletic Training Center.

Tech Director of Tennis Tim Siegel said the match against the Wildcats, Division II's No. 1 team, will be a test for the Red Raiders.

"This is going to be a tough match," Siegel said. "They're No. 1 in the nation in Division II. What will make it difficult in all likelihood is that we will not be playing Ryan (Shupe) or Petar (Danolic)."

Siegel said ACU is comparable to Tyler Junior College, which the Red Raiders defeated 7-2 in the first match of the season. Both doubles and singles are ACU strengths, Siegel said.

It will be important for Tech to regain its confidence after being beaten 7-2 by New Mexico, he said.

"Let me put it this way," Siegel said.

"There is a fine line in college tennis. Every team has talent. Especially with two of our top guys out, other players are going to have to step up. I think we have had a good week of practice."

After losing to the Lobos, the

#### team," Siegel said. "They're 19th in the nation. It's difficult when you have so much time between matches. Starting Tuesday we have

other win, Siegel said.

so many matches in March and April where we don't really have a break."

Red Raiders are ready to get an-

"We certainly lost to a good

In some respects, the loss was as good as a win for the Red Raiders, Siegel said.

"Losing a match is as beneficial as a win if you learn from the loss," he said. "Our guys understood what happened against New Mexico. I think we'll come out with a lot of energy and enthusiasm. Those are two things we have to have."

Junior Doug Lacy said the Red Raiders are excited about having the chance to redeem themselves after the loss to New Mexico.

Lacy said Tech may have been overconfident after the win against Arkansas.

With Danolic and Shupe out, Lacy said it will make the Red Raiders' work even harder.

"It makes us know we have to work that much harder," Lacy said. "We know we don't have our best players in there. If we still beat two teams like Arkansas and Tyler Junior College, we know we can beat anyone when we get healthy."

## Houston athletic director resigns

HOUSTON (AP) - Houston athletic director Bill Carr, who oversaw construction of the school's \$29.1 million athletic complex and entrance into Conference USA, announced Monday he is leaving March 31 by mutual agreement.

Houston President Glenn Goerke, who will be replaced next month by Arthur Smith, praised Carr's efforts in rebuilding the athletic program.

"You can look down the road and see a fork, you say 'Are we going to wait until we get there or do something now," Carr said of his departure from Houston. "This is a time of transition for the university and it just seemed right for this situation."
