## Candidate may have lied on resume

By Apu Naik  
Staff Writer

Attorney general candidate John Cornyn may have lied to the press and public about his criminal case experience as a Bexar County Judge.

The dispute about Cornyn's past stems from an Aug. 27 article in the *Austin American-Statesman* in which Cornyn allegedly said he "tried criminal cases as a Bexar County district judge for seven years in the 1980s."

Jim Mattox, Democratic candidate for the attorney general position, immediately questioned this statement and inquired about its legitimacy with Bexar County.

A press release from Mattox stated, "The

Chief Deputy of the Bexar County District Clerk's office reports that after a thorough search of court records using Cornyn's bar number 48-37-309, the results revealed that he never handled criminal matters."

"What Cornyn did is provide false information about his criminal law experience to a reporter in order to purposely pump his resume," said Audrey Duff, a spokeswoman for Mattox.

"And then, instead of correcting this false information, he is now compounding the dishonest claims by disseminating the same false information to thousands of voters and other media outlets."

Shortly after the accusation was made by Mattox, Cornyn issued a statement clarifying the types of cases he had tried.

Cornyn told the *Statesman* that he had presided over one criminal case and a large number of drug forfeiture cases during his seven-year term as district judge but that his legal experience is largely in the civil area.

"John (Cornyn) has never given false information to anyone, and he has never embellished his resume," said Matt Winslow, spokesman for Cornyn. "His legal experience is clearly in the civil arena, but he did preside over one criminal case during his term."

But neither Winslow or Michelle Kay, Cornyn's spokeswoman, had any information regarding the criminal case Cornyn presided over during the 1980s.

Kay, who gave the alleged false information to the *Statesman*, said she gave the newspaper the same information that

Cornyn released to the media after the Aug. 27 article.

"During my conversation (with the *Statesman*) the question was raised as to whether or not John (Cornyn) had presided over any criminal cases," said Kay.

"I responded that he had presided over the one criminal case and many other drug forfeiture cases, but I never intended to give the impression that John had a history of presiding over criminal cases."

Kay went on to confirm that Cornyn's experience is largely in the area of civil cases, that the candidate has never claimed to have presided over more than one criminal case and that the article published by the *Austin Statesman* was simply a matter of misunderstanding.

But *Statesman* reporter Osler McCarthy stands firmly behind his story, and confirmed that Cornyn's spokeswoman gave him false information.

"I believe (Kay) simply did not know whether or not he (Cornyn) had ever presided over any criminal cases, if any," McCarthy said.

"But there was never any indication on her part that she would confirm Cornyn's past and then call me back. She simply gave me the information and I ran the story."

Former Attorney General Mattox immediately criticized his opponent after the article was released by demanding a public apology and accusing Cornyn of exaggerat-

see Cornyn, page 2

## Commuters asked not to park in lot

By Gretchen Verry  
Staff Writer

Students who park at park-and-ride on Fourth Street may have found a surprise waiting for them lately — a tow truck.

"We are encouraging all students to use the Wal-Mart (Super Center 702 West Loop 289) parking lot," Brent Black, manager of service development at Citibus, said.

Black said there is plenty of parking in that lot and Wal-Mart wants students to park in that location.

Two days ago, Wal-Mart began towing cars from their lot in front of their former store on Fourth Street. Last year, this was the location for one of two park-and-ride lots for students who rode the West Fourth Street Citibus to campus.

"This summer, Wal-Mart had approached us and asked that we don't advertise that stop on our maps anymore because they had gotten complaints from other tenants in the shopping center," Black said.

Black said they were given permission to continue stopping at the site, but did not to encourage students to park there.

The bus stop sign remained in place, and students were not told that the lot was off-limits, although a sign warned that vehicles would be towed.

Wal-Mart made good on the sign

when they began towing cars out of the lot.

"It is unfortunate that it had to happen like this, it should have been communicated better," Black said.

Wal-Mart has a contract with Independent Towing Services and will continue to tow cars as they feel it necessary.

Bryan Adams, external vice president of the Student Government Association said the SGA has no plans as of now to expand the route to make up for the loss of the lot because it was not a scheduled stop for this year's route.

Citibus has said the bus stop sign will remain in place, and the bus will continue to stop at the location, but only for the benefit of students who live in apartments across the street.

"We continued stopping because we didn't want to pass up students walking over from Waterford Apartments who wanted to catch the bus before it got crowded," Black said.

Citibus drivers will warn students about the parking situation when they enter the bus at that location.

Wednesday, supervisors from Citibus warned students as they tried to park in the lot, and signs were posted on the buses warning students.

"The supervisors tried to tell everyone who tried to park there, but I am aware of at least one car that slipped by," Black said.

## On Track, On Time

### Construction of laboratory right on schedule

By Melody Ragland  
Staff Writer

**T**exas Tech's Plant Stress and Water Conservation

Laboratory currently is on schedule and expected to be complete in January 1999.

Construction on the lab began in October 1997 and is expected to be finished Jan. 21.

"As of right now we are on track," said Dan Upchurch, laboratory director.

Upchurch said in 1988, the U. S. Congress authorized the construction of the Plant Stress and Water Conservation Laboratory.

The lab was funded over a period of time and is being paid for through federal funds. Construction of the lab, being built on the Texas Tech campus at Fourth Street and Memphis Avenue, is costing \$14 million. Tech is leasing the land for the lab to the government at this time.

The lab's architect and engineers meet once a month to go over problems and see how things are going, said Upchurch.

Upchurch said Lubbock was chosen for the site because every major crop is grown in a 50-mile radius. He said the lab does not just focus on the South Plains and the research being completed there will help global agriculture.

"If we can solve them (agricultural problems) here, we can help everybody," said John Burke, research plant physiologist.

Upchurch said the agricultural industry is doing a very good job, but the purpose of the lab is to be of more help.

"We will be at the forefront of all revolutions with this lab," Upchurch said.

Research is already being

Halfway There: Construction for the USDA's Plant Stress and Water Conservation Laboratory at Texas Tech is almost complete. The lab, located at Fourth Street and Memphis Avenue, is expected to be finished Jan. 21.

done at the USDA's Agricultural Research Service in Lubbock.

Upchurch said the mission of the laboratory is to research how plants respond to environmental stress. The lab does research in several different areas.

Upchurch said researchers look at how water, wind erosion and temperature affect the plant and its roots. He said they use irrigation and crop management to analyze the most efficient way to use water.

The researchers use germ plasm development and plant biotechnology to see if certain genes can be transplanted into another plant to alleviate stress.

"The research is important for everyone," Burke said.

Daniel Krieg, plant and soil science professor, said the lab has the potential to unite all research centers on the South Plains. Krieg said they should be able to bring faster solutions to table.

"The lab will help Texas Tech's image across the country," Burke said.

Shoo Fly: A boll weevil preys on a cotton bloom. The Plant Stress and Water Conservation Laboratory's goal is to solve agricultural problems.

## President says he told 'essential truth'

WASHINGTON (AP) — President Clinton said Wednesday he told "the essential truth" about his affair with Monica Lewinsky but declined to discuss her graphic account. Asked whether he might resign, he responded that Americans "want me to go on."

"The right thing for our country and the right thing for all people concerned is not to get mired in all the details here," Clinton said.

Congress, however, is plunging ahead toward possible impeachment proceedings and the release of thousands of pages of sexually explicit material.

The House may vote this week to release Clinton's videotaped grand jury testimony that reportedly shows an angry, defiant president struggling with questions about Lewinsky.

Although the president did not respond directly when asked whether he might resign under any circumstances, spokesman

Mike McCurry said the answer was no.

Clinton spoke at his first news conference since Friday's release of the report by Independent Counsel Kenneth Starr that accuses the president of perjury, obstruction of justice and abuse of power in trying to cover up his affair.

The news conference, with visiting President Vaclav Havel of the Czech Republic, was held in a State Department auditorium where hundreds of administration employees applauded Clinton's answers. Some of them hissed at reporters' questions about Lewinsky. Havel reflected the bewilderment of many people around the world that Clinton is in such trouble about an affair.

The Czech president said he didn't understand some things about the United States but that he would remain Clinton's friend, whether or not Clinton were president.

## Complex residents receive \$300 credit

By Jonathan Biles  
Staff Writer

Current Carpenter/Wells residents received a \$300 dollar credit to their room and board account to compensate for construction hassles.

Paulo Peres, facilities planning manager, said even though nothing is in writing, the construction is still on schedule, and temporary residents of Coleman can expect to move into Carpenter/Wells in mid October.

Director of Housing and Dining Dr. James Burkhalter, said all efforts are being made to accommodate residents of Carpenter/Wells and this is

the last refund residents can expect.

"I think that it (\$300 refund) is more than adequate, if we stay on our current schedule we are on," Burkhalter said.

Along with the construction hassles, the dust has been a factor to students and their vehicles. Peres said in effort to control the dust, early next week, the ground and maintenance department of Tech will begin seeding the ground with rye grass.

Peres said the grass is only meant as a temporary solution to the dust problem and bermuda grass, the grass that encompasses the campus, will be laid sometime in spring. Rye grass will

begin sprouting within seven to 10 days of seeding, Peres said.

Peres said construction has fallen behind the Commons building, the central building but extra crews have been redirected in order to speed up the construction.

Peres said the walkway that connects the north to south complexes will be completed within two to three weeks.

"We are pushing for the walk to be finished real fast. In fact, they stopped the decking on the commons to pour the slabbing," Peres said.

If students who currently live in Carpenter/Wells have problems,

Peres said the students will give a report to housing and dining, then the contractor will take care of all problems that are under warranty.

"With any new building, we expect that their will be problems," Peres said.

"All problems will be taken care of by the contractor."

Burkhalter said no contracts of Carpenter/Wells residents have been canceled.

"I think at this point, people are willing to wait it out. I don't expect people to be happy, I wouldn't be happy, I hope they are happy enough," Burkhalter said.

# Tech receives grant in support of studies

By Gretchen Verry  
Staff Writer

Texas Tech Department of Biological Sciences received a \$2 million grant Wednesday from the Howard Hughes Medical Institute.

A reception commemorated the achievement.

The grant will be used to support undergraduate studies, with an emphasis on research.

"I'm overwhelmed by what our faculty and students have been able to do here," Tech President Donald Haragan said.

Tech is one of only two schools in Texas that received the grant.

Rice University, in Houston, also received a grant totalling \$1.6 million.

Tech's grant will be the third that the Department of Biological Sciences has received from the Hughes Institute, bringing the total amount of grants received to \$4.3 million.

This is the most for any school in Texas and the second most of all the Big 12 schools, said Richard Blanton, associate professor of biological sciences.

"Look at the list of schools that we competed against, and I think that you will be doubly impressed with the efforts of our faculty and students," Haragan said.

Only Cornell and the University of

Arizona received more money than Tech this year.

Tech, Stanford, CalTech and the University of Miami all received \$2 million.

There were 191 universities who submitted grant proposals this year.

Of those, 58 were selected to receive funding.

Blanton, who was co-program director of the grant awarded in 1992 and program director of the grant received in 1994, will serve as the program director for this year's grant.

"The grant is awarded based on the combination of an evaluation of the school's proposal with the track record with previous grants," Blanton said.

The proposal consisted of the proposed continuation of many projects started as a result of past HHMI grants.

"The institute approved almost everything we asked for.

"We can basically do everything we proposed," Blanton said.

This year's grant proposal consisted of three major components.

The first, and largest, is the undergraduate research program, where students work on independent research projects under the supervision of a faculty mentor.

This program will be a continuation of a program developed after the first grant was awarded.

Wes Underwood/The University Daily

Show me the money: President Donald Haragan and Richard Blanton were present at the reception that commemorated the \$2 million grant awarded from the Howard Hughes Medical Institute.

To date, 147 students have participated in the program.

The students have organized themselves into a university-recognized student organization, the TTU/HHMI Fellows Service Organization.

Prior to the beginning of the fellows program, only one Tech student had received the prestigious national Goldwater Scholarship for biology students.

Since the inception of the pre-

gram, 13 students have received Goldwater Scholarships and 11 of those students were participants in the program.

Brooke Phillips, a participant in the fellows program, was the recipient of a Fullbright Scholarship as a result of her HHMI-funded research project.

The second part of the proposal included more than \$500,000 for equipment purchase for teaching laboratories.

The funds created a new facility, the TTU/HHMI Core Cell and Molecular Biology Teaching Laboratory.

A new course, experimental cell biology, was designed to use the facility and provide students with training in methods of cell and molecular biology.

The third component of the proposal will expand an outreach program to local and regional schools.

The program provides traveling laboratories for local high schools and junior highs.

"Primarily, these programs have been offered to high schools, with a presence in junior high schools in the area.

"With the new grant, we hope to extend into elementary schools," Blanton said.

The grant also will be used to support one day event lectures and small grants for teachers.

# Cornyn responds

Cornyn from page 1

ing his legal history.

"Cornyn and his campaign should apologize for providing false information, not deny doing it," Mattox said.

"It's amazing they would impugn a reporter's character in an attempt to cover up their own misdeeds."

In Cornyn's letter of response to the allegations, he affirmed his credentials and stressed that the attorney general's responsibilities weigh more heavily in the areas of civil justice rather than criminal.

"My credentials are solid, I am proud of my record, and I have no reason to exaggerate my qualifications," Cornyn said.

"My experience is largely in the civil arena ... The attorney general is the state's top civil lawyer.

"At press conferences around the state, I have said over and over that the attorney general needs to be the state's top law enforcement official and not the state's top cop."

# Public warned of alternative medicine

BOSTON (AP) — Citing the hazards of poorly tested herbal remedies, one of the nation's most distinguished medical journals said alternative medicines should be subjected to the same rigorous standards as mainstream treatments.

In an editorial, Drs. Marcia Angell and Jerome P. Kassirer of the *New England Journal of Medicine* argued that testimonials and speculation are no substitute for precise medical evidence that treatments are safe and effective.

"There cannot be two kinds of medicine — conventional and alternative," they wrote in last week's issue. "There is only medicine that has been adequately tested and medi-

cine that has not, medicine that works and medicine that may or may not work."

Herbal remedies sold as dietary supplements have proliferated since 1994, when Congress exempted them from regulation by the Food and Drug Administration.

The same issue of the journal carried these reports on alternative medicine:

— Doctors from Alberta Children's Hospital in Canada reported two cases in which parents opted to treat their children's cancer with shark cartilage or the herb astragalus instead of standard medicines. In both cases, the cancers progressed, and one child died.

— The California Department of Health Services tested 260 traditional Chinese medicines and found one-

third were contaminated with heavy metals, such as lead and arsenic, or pharmaceuticals not listed on the labels.

— Doctors from Robert Wood Johnson Medical School in New Jersey tested a mixture

of eight herbs, sold as PC-SPES, on men with prostate cancer. They found it worked like estrogen, decreasing testosterone and cutting sex drive. While not proving whether it relieves cancer, the study shows the herb blend has potent hormonal effects.

— The FDA described an episode,

publicized last year, in which the herb plantain was contaminated with a naturally occurring form of digitalis, a heart stimulant that can cause cardiac arrest.

— A group of doctors from Arizona reported the case of a man found driving erratically after taking a supplement promoted as a way to increase growth hormone. A letter from the manufacturer, RenewTrient Research of Cocoa Beach, Fla., said the man ignored a label warning to take the substance only before sleeping.

"Alternative treatments should be subjected to scientific testing no less rigorous than that required for conventional treatments," the journal editorial said.

At the American Council on Science and Health, associate director Jeff Stier said, "It's good to see that mainstream medicine is coming on board to defend itself" against unproven treatments.

“Alternative treatments should be subjected to scientific testing...”

# House underfire for approving drug bill

WASHINGTON (AP) — As the House voted to add \$2.6 billion over three years to the government's drug interdiction efforts, the White House's drug policy coordinator was urging lawmakers to reject it.

Retired Gen. Barry McCaffrey said he would welcome extra money but criticized the bill, passed 384-39, as an ill-conceived exercise in micromanagement possibly motivated by election-year politics. The Senate has not yet voted on the measure.

"This bill is not the answer," McCaffrey told reporters Wednesday after speaking before a joint meeting of two Senate subcommittees. "I understand that elections are coming, but they should not vote for this bill."

By 396-9, the House passed a separate bill to establish several programs designed to reduce the use of illegal drugs in the United States, including one that would promote medications used to treat addiction. The bill also would authorize \$195

million a year to expand an anti-drug media campaign that has been operating on a trial basis in only a few cities.

Introduced in both the House and the Senate, the earlier bill would authorize spending \$2.6 billion over three years for illegal drug-fighting efforts involving interdiction, law enforcement and U.S. activities in countries where illegal drugs are produced. The bill does not say where the money would come from.

The measure's goals are unrealistic, McCaffrey said, and its provisions are not tied to a coherent strategy or based on informed analysis of the drug problem.

Furthermore, he said, some provisions authorize the purchase of equipment he's never heard of and micromanages decisions that would

be better left to officials paid to make them.

"Wisely, the Congress never thought to tell General Norman Schwarzkopf where to deploy his armored forces during operation Desert Storm or when and how to attack," McCaffrey said.

House Speaker Newt Gingrich, R-Ga., said if the Clinton administration lacks the will to tackle the problem, Congress will step in.

Republicans have long criticized the administration for what they believe is a lax and failed drug policy that puts too much emphasis on education and prevention and not enough on law enforcement and punishment.

They contend that until Clinton took office in 1992, close to 33 percent of the government's drug-fighting budget was devoted to interdiction and activities in countries where raw materials for illegal narcotics are grown. Today, that percentage is about 13 percent.

"It was reasonable to project in the summer of 1992 that we were going to win the war on drugs," Gingrich said.

"For a variety of reasons, the war on drugs got off track."

Sen. Paul Coverdell, R-Ga., said the bill would help restore balance in the nation's anti-drug strategy.

"During the late 1980s, our drug policies produced encouraging results," Coverdell said at a joint meeting of the Senate's Foreign Relations Committee and its Caucus on International Narcotics Control.

"We have, since 1992, virtually abandoned this approach. ... The bottom line is that as we shifted resources away from interdiction, it became easier for drug traffickers to transport illegal drugs into this country."

McCaffrey insisted the amount of money spent on interdiction has increased in recent years and is being spent more efficiently than a decade ago.

# Bush: Family weighs heavily in future plans

AUSTIN (AP) — Gov. George W. Bush said Wednesday that considerations about his family — including the public attention they would receive — will play a key role in whether he decides to run for president in 2000.

Bush

Vice President Al Gore.

But Bush insisted again Wednesday that his mind isn't made up and won't be

for several months. "The thought process is not going to occur until next year," he said.

However, Bush emphasized that family concerns always have been a critical factor.

Describing himself as accustomed to the scrutiny that comes with campaigning and holding public office, Bush said, "One of my concerns is about putting my family in the (public) bubble."

"If you end up being the president, once you're in the bubble you're always in the bubble. Everywhere you go, you'll be surrounded by people. You can't even go buy fishing lures."

"I'm going to have to look long and hard about whether this is something I want my family to live with," he said.

As for the Clinton affair, Bush called it, "A very serious and somber moment for the nation."

Bush said he hopes Congress takes a nonpartisan approach as it considers impeachment or other sanctions of the president because "we're talking about a legal matter, not a political matter."

He also urged the public to "take a deep breath, take a step back and let the process work."

As he campaigns for re-election this year, Bush has advocated premarital abstinence and personal responsibility.

# Wallace eulogized as having courage to change

MONTGOMERY, Ala. (AP) — Former Gov. George Wallace, the snarling, fist-shaking segregationist of the 1960s who would later preach racial cooperation, was eulogized Wednesday as a man who had "the courage to change."

Among the 25,000 people police estimated visited the Civil War-era state Capitol to see Wallace's open casket in the rotunda on Wednesday and Tuesday were blacks and whites from all levels of society — precisely the kind of constituency Wallace sought in the end.

Alabama's top state government and congressional officials, offering prayers and reminiscences, held a memorial service for the former governor in the state House chamber where the Confederacy was organized in 1861.

"He had the courage to change," Gov. Fob James said. "He had a message and he believed in it ... the mes-

sage of reconciliation."

Wallace, who died Sunday at 79 after being stricken with a blood infection, was buried later in the day next to his first wife, Lurleen, at a Montgomery cemetery.

Wallace was elected governor in 1962, 1970, 1974 and 1982. In 1963, he declared,

"Segregation now, segregation tomorrow, segregation forever!" and tried to block the enrollment of two blacks at the University of Alabama with

his "stand in the schoolhouse door."

He was a serious contender for the White House in 1968 and 1972, championing "the little man" against big government and elitists. He was shot by a would-be assassin and left paralyzed in both legs during the Democratic presidential primaries in 1972.

Critics saw him as a calculating racist whose rhetoric put civil rights demonstrators in peril during a time

of church bombings, beatings and Ku Klux Klan violence. By 1982, however, he had come full circle on race and won with the crucial help of black votes. He renounced his segregationist stand.

"We have to learn to forgive and forget," said Reddie Russell, a black worker at a Montgomery Air Force base who arrived in the Capitol rotunda. "This was history being laid to rest."

Foy Persell, who is white, and Thomas Boone, a black man, arrived together.

"I feel like he used race as a means to get elected, but deep down he was not against anybody," Persell said. "But I was glad to see him change. It's one thing to make a mistake, another thing to admit it."

From the Capitol, Wallace's casket, draped in a flag of Alabama, was

taken to the stately stone sanctuary of First United Methodist Church in an old, tree-shaded neighborhood near the Capitol.

Wallace's second wife, Cornelia, attended the funeral services. "I thought it was lovely," she said afterwards.

"They played his favorite song, 'Amazing Grace.' ... It was the kind of music that was the cornerstone of his belief."

Groups of people, including blacks at a housing project and students outside a high school, stood along the route of the funeral procession as the cream white hearse bearing the body drove from the church to the gravesite.

Wallace was buried at Greenwood Cemetery to the strains of a Scottish bagpipe, a jet flyover and a 21-gun salute.

“He had the courage to change.”

Fob James  
Alabama governor

## Turning up the heat Reverend comes to preach in Hub City

By Sebastian Kitchen  
Staff Writer

The Reverend Horton Heat consumes concert-goers with his rockabilly rebel trio and entertains them with his sermons between songs.

"He always has these interesting sermons he does between songs," said Brandon Couch, a post-graduate student at Texas Tech and production manager at KTXT-88.1 FM. "It is like getting two concerts in one, comedy and music."

Couch and his friends used to go see the Reverend Horton Heat in Austin.

"It was always a blast," he said. "He is real good at working the crowd. He is very funny."

The Reverend will headline a show tonight at the Depot's 19th Street Warehouse, 1824 Ave. G.

Fade 22 will open the show followed by A Pony Named Sara. Speeddealer, formerly REO Speeddealer, will take the stage before the Reverend.

Doors will open at 8 p.m., and Fade 22 will take the stage at 9 p.m. The Reverend is scheduled to play at 11:45 p.m.

KTXT is hosting a barbecue with the band today from 5 p.m. to 7 p.m. at an undisclosed location.

The station has been giving away opportunities for listeners to attend the event, and people can win a chance to take part until this afternoon.

The station also is giving away tickets to the show.

"He always draws a crowd here,"

said promoter Lane Arnold. "He does great. He puts on great show."

The Reverend Horton Heat's latest release, *Space Heater*, is the latest from the trio.

The band made TV appearances on "The Drew Carey Show" and "Homicide."

The Reverend plays the guitar and sings vocals.

He is joined by Jimbo, who plays stand-up bass, and drummer Scott Churilla.

As the front man of the band, the Reverend is a Dallas pool shark who wears a suit with sharp shoes and a greased back hairstyle.

His influences range from Tennessee Ernie Ford to Buddy Guy to the Butthole Surfers.

The rockabilly rebels recently finished a stunt with the Warped Tour. REO Speeddealer also performed on part of the tour.

The band is known as just Speeddealer now because of a lawsuit from REO Speedwagon.

Speeddealer agreed to drop the REO if they could leave the old name

The Reverend Horton Heat

Courtesy photo

on the 5,000 CDs that had already been released.

Speeddealer, who originally formed in Lubbock, is known for a quick, all-out metal and punk music assault.

The rough-looking band has even rougher lyrics.

Speeddealer and Reverend Horton Heat may have different styles and

lyrics, but both have managed to entertain crowds all over the country and Lubbock is next.

## Depeche Mode readies for tour

NEW YORK (AP) — To pen his melancholy lyrics, Martin Gore often returns to the topic that's closest to him.

"Songs about relationships are always quite high on my priority list," said Gore, co-founder and songwriter for Depeche Mode. "It's something that's happening around me all the time."

Depeche Mode was formed in 1980 and is known for such hits as "Just Can't Get Enough" and "Personal Jesus."

On the British band's new single, "Only When I Lose Myself," Gore again explores topics like co-dependence and obsessive love. The song is featured on a new retrospective record, *The Singles 1986-98*, scheduled for release Oct. 6.

Gore, singer Dave Gahan and keyboardist Andy Fletcher were in Manhattan in July to film a video, which Gore described as very "ethereal," with many images of wrecked cars.

"Our bit was very simple, basically rocking backwards and forwards out of lights," Gore said. "I suppose it'll all be done in post-production."

The band recently launched the European leg of a world tour, its first in five years, in Helsinki, Finland. U.S. tour dates include Madison Square Garden in New York on Oct. 28, with shows also scheduled in Miami, Houston, Denver and San Diego until the end of the year.

Veteran band photographer and visual collaborator Antonio Corbijn designed the low-key, 1930s-inspired stage for the tour. Corbijn has been documenting Depeche Mode for the past 12 years, as the band steadily gained worldwide fame.

The future of Depeche Mode became uncertain when Gahan almost died after a drug overdose in a West Hollywood hotel room in 1996.

"There was a period that lasted for a week where I very seriously considered if this was a viable option anymore," Gore recalled.

Prior to launching its new world tour, the band stayed away from the rigors of the road.

Gore is confident that the respite has made Depeche Mode more mentally fit.

"... I very seriously considered if this was a viable option anymore."

# Local 24-hour help-line aids callers on various issues

By Laura Hensley  
Staff Writer

Changing lives is what Janie Frazier expected to be doing when she decided to volunteer for the Contact Lubbock help-line.

This senior family studies major from Cleburne has heard it all — from suicidal teens to a lonely man who needed someone to talk to.

Now, nine months later, the life she has changed the most is her own. "Contact Lubbock has changed my life," Frazier said.

"I came in thinking I would be helping all of these sad people, but in the end it's me that has changed."

Contact Lubbock has been providing a listening year for people who need help in numerous ways for 27

years. The organization offers several services over the phone for people who are depressed, suicidal, lonely or having relationship problems.

Frazier began training in January and started answering help lines in March. She was there completing a practicum required for her major.

She said the center was a nice surprise and not stereotypical of help-line work.

"It's not what I expected at all," Frazier said. "I thought I would be in

a little room, by myself, answering phones. But it's very comfortable here. It's just like hanging out at home. I got up here and just love it."

The center easily became a part of her life and she has stayed there through the summer and now is working as the children's line coordinator. "I leave here feeling good," Frazier said.

"I feel like I've really helped someone. Sometimes I get calls here of people just saying thank you. They just want to say

thank you for being there to listen and talk to."

Contact Lubbock offers 24-hour crisis intervention, service referral and listening ministry through phone lines.

The center uses volunteers to help organize certain programs and answer phones.

"A lot of people don't know about us," said Debbie Frapp, director of Contact Lubbock. "We are always looking for volunteers. We need someone who has good communication skills already and can reach out and be a helping hand for someone in trouble. We do get a lot of volunteers from Tech and they are great."

A required volunteer training session will begin tonight from 6 p.m. to 9 p.m. at St. Christopher's Episcopal

Church, 2807 42nd St. The training is \$25 for all Texas Tech students.

"I think the training is something that everyone can benefit from," Frazier said.

"It focuses on life and how to improve it."

Frazier said special speakers are brought in to speak about topics such as suicide and grief.

Trainees also are involved with role playing exercises.

"The training is so specialized it really makes you familiar with the subjects," Frazier said.

"By the end, you know what it's like and you know how to deal with things."

There also will be an opportunity for groups to get involved with fund raising for the center in October.

Contact Lubbock is a 24-hour help-line. The help-line numbers are 765-E393 or 1-800-886-4351.

The center needs volunteers to sell tickets for its Stay at Home Ball Oct. 16 and 17.

For more information about volunteering opportunities at the center, call 765-7272.

“Contact Lubbock has changed my life.”

Tech student

## Birds have memory similar to humans

(AP)— To scientists' surprise, birds have been found to have the kind of memory that enables people to recall where they left their car keys.

The research by British and American behavioral scientists shows that birds can remember not only where, but when, they hid critical items such as worms and other food. The birds even dig up less perishable food if too much time has passed and their favorite worms have probably rotted.

The study of scrub jays, published in last week's issue of the journal *Nature*, marks what the researchers said is the first demonstration of episodic, or event-based, memory in animals other than humans.

Previously, many scientists be-

lieved episodic memory was unique to humans.

This type of memory is jokingly referred to as "mental time travel" because it involves mental images of past events. To remember where you put your car keys, you might "see" yourself walking into the house the night before and dropping the keys on a table in the hall.

Episodic memory functions in a fundamentally different way from and uses other parts of the brain than knowing a fact, such as what car keys are. That is a form of semantic memory. It's also different from having the more basic instinct that you are hungry.

Determining that birds use some form of episodic memory is enor-

mously important, said scientists who have analyzed the findings.

Birds and humans split on the evolutionary tree 250 million years ago, so the finding suggests that fundamental mechanisms of information storage in the brain may have evolved even before the age of dinosaurs. The study also may help researchers more fully understand the human brain's decline into Alzheimer's disease.

"It could be a big step in understanding how space, time and events are represented in the brain," neurobiologists Kathryn Jeffery and John O'Keefe of University College in London said in a review of the study. "It also helps solve a problem in the field of human memory — where and how

is a memory for events formed and stored?"

Previous experiments already had shown that birds can remember what kind of food they had stored and where they had hidden it, even without sensory clues such as smell and appearance. But making decisions based on the timing of past events is a crucial element of episodic memory.

In the bird study, researchers Nicola S. Clayton of the University of California at Davis and Anthony Dickinson of Cambridge University allowed scrub jays to store their favorite food, larvae of wax-moths, or "wax worms," on one side of a sand-filled tray. The birds hid peanuts on the other side of the tray.

## Bush hopes for Hispanic support with Emilio song

HARLINGEN (AP) — Gov. George W. Bush continued courting the Hispanic vote with the unveiling Wednesday of a new campaign commercial and song by Tejano star Emilio.

"I am Democrat, but I know who the right man is for this position," Emilio Navaira said before singing the song — a re-worked version of his hit "Juntos."

In the commercial featuring the song, Hispanics are featured prominently as Emilio sings at a microphone with a Texas flag as the backdrop.

Calling it "vote asking time," Bush said he was looking for support from

Hispanics, who are traditionally Democrats, in his bid to be re-elected as governor.

"This is part of my sprint to the finish," Bush said.

"I intend to have Democrats, independents and Republicans supporting me. I intend to do well in the Hispanic community."

Democrat Garry Mauro said Bush is using the same formula Republicans have used for half a century in trying to woo Hispanic voters.

"First you speak a little Spanish, then you hire a Hispanic advertising agency, you put up Hispanic billboards and hire a Hispanic musician," Mauro said Wednesday.

"The problem is he's wrong on all the issues. A candidate who says he supports requiring citizenship papers when people go to vote is not going to carry South Texas."

Mauro said he's not worried about losing Hispanic votes because, he says, Bush has not done much for Hispanics.

He said the governor opposes affirmative action and has not appointed many Hispanics during his four-year term.

Bush's introduction of the song was meant to coincide with "Diez y Seis de Septiembre" celebrations of Mexican independence in San Antonio, Corpus Christi, Harlingen and El Paso.

Emilio said he and Bush met at a Tejano music event and Emilio was impressed by Bush's ideas about family, ultimately leading to the campaign collaboration.

"He and I share the same values for Texas," said Emilio.

Emilio is a San Antonio native who is married and has two children.

Bush took the opportunity to reiterate that education is a top priority for him and to tout his plan to put \$3.6 billion of a state budget surplus into education, including money for school programs and reduction of school property taxes.

## Garber a 'hit' as Red Raider spiker

Brian White/The University Daily

**Just One of the Gals:** Junior middle blocker Lori Garber hopes to make an immediate impact on the Red Raider volleyball program. Garber, a transfer from Hawaii, is happy to call Texas Tech her home.

By Jeff Keller  
Staff Writer

Junior middle blocker Lori Garber has had a long journey to the Texas Tech volleyball team.

Garber did not decide to attend Tech straight out of high school. She attended Hawaii her freshman and sophomore years.

At Hawaii, Garber was able to play on a consistently nationally ranked team. She was not able to see as much playing time as she wanted.

"I didn't get a chance to play too much," Garber said of her experience as a Rainbow.

Differences with her coach made Garber decide to leave the islands and head for the plains of West Texas.

"My coach and I weren't very compatible," Garber said of her coach at Hawaii.

Now that she is at Tech, Garber is seeing playing time in every match.

She makes up a third of the middle blocker trio used by Tech.

Along with sophomore Janelle Jones and senior Sonia Moric, Garber is rotated to the middle blocker position to keep a fresh player at the position at all times.

Garber, at 6 feet 3 inches, stands with Jones as the tallest Red Raiders.

"She is a great addition to our team," Tech coach Jeff Nelson said of Garber. "A tall player, strong at the net

and leading in blocking. She is doing a lot of good things."

Garber said she is having a better experience thus far with Nelson, than with her previous coach.

"He is a better motivator," Garber said of Nelson. "He is a little more realistic."

Garber not only left the school that she had been at for two years, she also left a lot of friends behind.

She still has a lot of friends in Hawaii but she is in the process of making friends at Tech.

"I was there for three years, so my teammates and I were good friends," Garber said of her Hawaii teammates. "I have only been here for a month, but these girls are great."

Having played on a top team in Hawaii, Garber said she is familiar with the kind of top-notch volleyball it takes win at the collegiate level.

"I wasn't expecting us to be as good as we are," Garber said of the Tech squad this year. "I think we have a good team, but I think we are a little raw right now. We definitely have a chance to do good things this year."

Garber is leading the Red Raiders in blocking thus far on the year. She will have a chance to increase her block total this weekend as Tech travels to Provo, Utah for the BYU Mizuno Classic.

"She hits the ball real hard," Nelson said of Garber. "She has added a lot of additional power to our team."

## Paralyzed gymnast recovering from fall

NEW YORK (AP) — The Chinese gymnast paralyzed during a warmup vault at the Goodwill Games is learning to write her name again — using fingers that still can't move.

"Her spirit is quite amazing — highly motivated. She is consistently in a good mood," said Dr. Kristjan Ragnarsson, an expert on rehabilitation for spinal cord injuries at the Mount Sinai Medical Center.

Sang Lan

broke her neck July 21 at Nassau Coliseum on Long Island and remains paralyzed.

"She's very skillful," her doctor said. "She's working very hard on things that come very simply to us."

Holding utensils with the help of a splint attached to her hand, the 17-year-old gymnast painstakingly feeds herself, combs her hair, brushes her teeth and is learning to dress herself. She gets out of bed with a sliding board onto a wheelchair, which she pushes around the hospital corridors.

It's all in preparation for a new, more self-sufficient life that includes learning English from a tutor.

"She greets me very politely in English — 'Good morning, Dr. Ragnarsson,'" the doctor said.

The bad news, he said, is that there has not been any significant change in her neurological condition since the accident. Sang still has no feeling in her lower body or her hands.

She is, however, developing the muscles she can control, including those in her neck, shoulders, arms and wrists, and she's learning to balance her body

while sitting.

For this kind of spinal cord injury, Ragnarsson said, the prognosis is "exceptionally poor." Any other development would have been "almost miraculous."

However, the doctor said, he has heard that some people with a complete spinal cord injury such as Sang's have regained some function.

He said the teen-ager is facing the bad news "with maturity."

"I'm sure there have been moments of frustration and depression, but she has kept those to herself," he said.

Ragnarsson has also treated former New York Jets player Dennis Byrd, who recovered six years ago from paralysis after breaking his neck. But Sang's injuries were more severe, he said.

Sang plans to get more education because she understands it's necessary "when you have lost the physical skills," Ragnarsson said.

She is to be discharged from Mount Sinai by mid-October to live in a nearby hospital-owned apartment and continue rehabilitation, which now takes as much as six hours a day. Her parents, who flew to New York from China after the accident, are participating in her therapy.

The costs are covered by Goodwill Games insurance and a private fund started for her.

For now, there's no talk about returning to China.

From her hospital room on Wednesday, Sang sent a message to America, through Ragnarsson: "She's enormously grateful and appreciative not only to hospital staff and doctors, but to the American people who have shown so much interest."

“Her spirit is quite amazing...”

Dr. Kristjan Ragnarsson  
Sang Lan's doctor

## Tyson to fight battle in and out of ring

(AP)—The heavyweight champion of the world fights Saturday night in Atlanta. A much better bout will take place a dozen hours earlier on the other side of the country.

That one pits Mike Tyson against the same five members of the Nevada State Athletic Commission who took away his boxing license in July 1997. From the look of things, Tyson will be lucky to get a fair fight.

Every time he gets into another scrape, newspapers around the country run an agate type-sized list alongside the story chronicling all Tyson's past transgressions. And if the list the commissioners have taped to their desk is current, the only thing

his exile has demonstrated is that Tyson is still just as destructive outside the ring as inside it.

Tyson is on probation stemming from a 1992 rape conviction, but it hasn't cramped his style.

On the contrary. Two women are suing Tyson, claiming he flipped a table on them at a restaurant in March. And during an aborted attempt to get New Jersey to license him, Tyson blurted an obscenity to his attorney toward the end of the hearing, proving his patience is as limited as his vocabulary.

Such things would have been trouble enough for most guys.

But Tyson being Tyson, he had to

double the ante before sitting down at the table in Las Vegas.

According to Gaithersburg, Md., police, Tyson was a passenger in a Mercedes-Benz being driven by his wife when his car was rear-ended by a second car that had been rear-ended by a third. The drivers of the other two cars got out and were talking when Tyson joined them.

Apparently, he was in no mood for conversation. In a complaint filed with police, one of the drivers, a 50-year-old, said Tyson kicked him in the groin. The other, age 62, claimed he was punched in the face by the former heavyweight champion.

Tyson denies striking either man,

and the truth may not be sorted out until the matter goes to court. But Dr. Elias Ghanem, chairman of the Nevada commission, said it won't stop his panel from asking tough questions about it or voting on Tyson's request at the end of the scheduled five-hour session.

"It's going to be a very, very tough hearing I'm pretty sure, only because of what has happened recently," Ghanem said. "It all has to come into play."

In this feel-good summer of home runs and heroes who remind us how sportsmen are supposed to behave, the decision would appear to be a no-brainer.

## Cowboys' defense on mend

IRVING (AP) — The Dallas Cowboys usually could count on their defense to keep them in the game.

It didn't Sunday, and suddenly, solid defense is a problem for the Cowboys who rank No. 23 in the NFL after being No. 2 last year.

The defending Super Bowl champion Denver Broncos, behind John Elway, went over, through and around the Cowboys in a 42-23 humiliation Sunday that stunned the defensive coaches and players.

The Cowboys coaches and players had to admit they were out-schemed by Denver coach Mike Shanahan Sunday.

"It's hard for linebackers to cover wide receivers and tight ends and that's the position we got caught in at times," said linebacker Randall Godfrey.

"We couldn't adjust until halftime."

Safety Darren Woodson said the Broncos "came out with a different game plan. We didn't match and we didn't cover. We were all over the place."

Defensive coordinator Dave Campo admitted "they caught us on some things and we got unnerved. We got calmed down at halftime."

By then they were down 35-17 and had yielded 379 yards offense, the most in a half in franchise history.

The collapses came as a shock because the defense had played well in the opening 38-10 win over Arizona.

"It was like Omaha Beach," said defensive tackle Chad Hennings.

"We haven't had a game like that in four years," said defensive coach Bill Bates.

"The 49ers did it to us in the 1994 NFC championship game 38-28."

Was hired because of his offensive genius, said he hasn't lost confidence in Campo or his staff.

# Changing faces, winning ways

## Peese steps into new role

By Brent Dirks  
Sports Editor

Despite being a freshman, Texas Tech soccer goalkeeper Brittney Peese gained some veteran experience after helping the Red Raiders to the Maryland/Puma Tournament title last weekend.

"I'm ecstatic," Peese said of the Red Raiders first tournament title in the program's history. "We played really hard. We deserved the win."

Before Tech's first win of the tournament, a 3-0 win over Towson State, Peese said she was nervous, but that changed after her first collegiate start.

"But I knew once game time came, I knew I had to forget about being nervous and play the game," Peese, who came to Tech from San Antonio Clark, said. "I knew I had a good team in front of me, so I wasn't worried."

Peese showed off her goalkeeping skills against Towson State and in the 3-2 victory over once nationally ranked Maryland to capture the tournament title.

She finished the tournament with 180 minutes of play, eight saves, two goals and a 1.00 goals against average for the season.

Peese said there are mixed feelings substituting for starting goalkeeper Kellie McCallister.

"It's just hard because I feel bad for Kellie," Peese said. "She's a great goalkeeper. It's bad she got hurt, but I'm happy I get the chance to step in. I'd be just as happy if she was playing."

Red Raider coach Felix Oskam said Peese played well in the tournament.

"It was just unbelievable," Tech coach Felix Oskam said of Peese. "Against Towson University, which is obviously not as the same level as Maryland, we thought 'lets put Brittney in there, get her feet wet.' She

was a little nervous in the beginning, but after that, she played very well."

During the battle against the Terrapins, Oskam said, she helped to keep the Red Raiders in the game before two late goals by forward Amy Rutstein propelled Tech to victory.

"Against Maryland, she was very focused, came off her line very well and made some big time saves to keep us in the game."

With McCallister not playing again in the Butler Tournament in Indianapolis this weekend, Oskam said he was confident in Peese to help the Red Raiders to victory.

"I don't think she can be a freshman anymore," he said. "She's got two games behind her, two important wins on the road. She will have much better grasp on how things are going, and I think she's full of confidence, and that's what we need right now."

**"We played really hard. We deserved the win."**

**Brittney Peese**  
Tech backup goaltender

Jennifer Galvan/The University Daily

**A New Role:** Freshman goaltender Brittney Peese has played well for the Red Raiders this season. They won their first-ever tournament last week in Maryland.

## Players excited at OU

NORMAN, Okla. (AP) — A year ago, not many Oklahoma players or fans would have liked the chances of the special teams coming through in order to win a game.

"No way, no way in the world," tight end Jason Freeman said.

Thanks in large part to Jeff Ferguson, gloom and doom have been replaced by bubbling optimism. Ferguson, a redshirt freshman, handles the punting and placekicking and came through in a big way last week against Texas Christian.

After dropping a punt snap and missing a 39-yard field goal in the first half, Ferguson punted beautifully in the second half, produced a great outside kick and then won the game with a 40-yard field goal in the closing seconds.

The heroics were a big lift for a unit that has been almost comically bad during the past three years.

"I think it does a lot for our football team," coach John Blake said. "Special teams have come forth now and made plays for us."

That didn't surprise Ferguson, who kicked 21 field goals and averaged 41 yards per punt during his time at Holland Hall High School in Tulsa.

## De La Hoya sees Chavez as setting sun off in horizon

LAS VEGAS (AP) — Oscar De La Hoya looks at Julio Cesar Chavez and sees a great fighter whose best days are long since gone.

He also sees a big payday, but claims that is only part of the reason why the two are fighting Friday night, two years after De La Hoya easily stopped Chavez in the fourth round

of their first title fight.

This time, De La Hoya said, it's personal.

"If it was up to me, this one wouldn't even be in the record books," De La Hoya said. "I'm fighting for the respect he didn't show me the first time. That's how personal this one is."

De La Hoya, who will earn some \$9 million to defend his WBC welterweight title against Chavez, wants something else when he takes on the former champion in a rematch of their June 7, 1996 fight for the 140-pound title.

Simply put, he wants Chavez to tell him that he is indeed the better

fighter, something he didn't do after the first fight.

"A fighter like him will never admit he lost," De La Hoya said Tuesday. "The only way for me to get him to admit defeat is a devastating knockout."

In their first fight, De La Hoya sliced open Chavez's face, then beat

him into a bloody pulp until the fight was finally stopped in the fourth round.

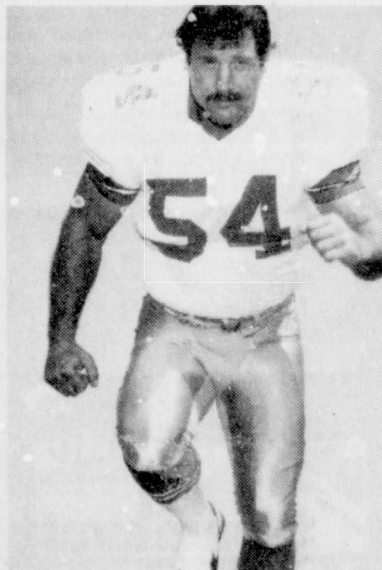

Chavez claimed after the fight that he suffered a cut over his eye while playing with his young son the week before the bout and that he would have never lost if the cut had not reopened.

# Student Legal Services

Not knowing your legal rights can be confusing, scary and expensive. Student Legal Services helps minimize the negative effects of legal problems through early intervention and negotiation — all free of charge.

Student Legal Services offers free legal counseling on personal legal matters to all enrolled students and registered student organizations.

Although the counseling does not include actual representation, a lawyer referral will be given on request. The attorney also can guest lecture to classes and organizations.

There is no charge for the services of Student Legal Services because the students have in effect already paid for the service through some of their student fees.

One major problem the office faces is students who wait until the problem becomes unnecessarily complicated.

It is not unusual for students to adopt the attitude that if a problem is ignored, it will go away — but it rarely does.

Another common mistake people make in dealing with legal problems is to react quickly and angrily.

Jim Aldridge

Director ..... Jim Aldridge  
 Telephone ..... 742-3289  
 Location ..... 308 West Hall  
 Hours ..... 8 a.m. - 5 p.m.  
 e-mail ..... jaldridge@ttu.edu

The purpose of Student Legal Services is to provide as much legal assistance to the students as it can and to keep the legal fees a student must pay as low as possible.

Many college students take a lot of abuse because people do not think they will pursue legal action. That is why Student Legal Services exists. Students simply can call the office, and personnel will do their best to direct students in the actions they should take. Although the attorney cannot represent students in court, advice can be given in how to approach legal problems.

A new service available to students through Student Legal Services is the student mediation services. Mediation is an alternative approach to the traditional methods of resolving

disputes. Mediation is a voluntary, confidential, interactive process that enables students with disputes to work through issues of importance that are causing conflict between them. During a mediation session, an impartial person, the mediator, facilitates communication between the parties to promote reconciliation, settlement or understanding.

The mediators at Texas Tech are a diverse group of faculty, staff and students who have received professional mediation training.

Areas of services are: legal counseling, lawyer referral, preventative legal education, mediation services and notary services. The office also can help students with much of the paperwork involved such as leases and wills.

Wes Underwood/Student Publications

Jim Aldridge, Student Legal Services director, spends his day taking care of the legal matters of the students. Services are rendered free of charge.

## Most Asked Questions

**Can Student Legal Services represent students in court?**

*No. The attorney can provide only legal advice. However, this advice may make going to court unnecessary or may consist of preparing students to represent themselves.*

**If a student has a possible insurance claim against Texas Tech, who does he or she contact?**

*Contact the Office of Contracting, after reporting to the department involved.*

**Is there a charge for using the Student Legal Service office?**

*No. There is no charge for the services provided by Student Legal Services. Students already have paid for this service through tuition and fees.*

**How do students locate attorneys to represent them in court?**

*The Student Legal Services office has a lawyer referral plan and can provide students with a selection of attorneys in the appropriate legal area. The State Bar of Texas also has a lawyer referral service. Call 1-800-252-9690.*

Wes Underwood/Student Publications

Jim Aldridge, Student Legal Services director, gives a student advice on a legal matter. One major problem the office faces is students who wait until the problem becomes unnecessarily complicated.

# TEAM Center

The Testing Evaluation Assessment and Measurement Center is a service area devoted to helping students reach their highest potential in academic excellence.

The testing center applies the principles of education, learning and psychology in assisting students at all levels of college to maximize their academic, vocational and career progress.

Whether students are entering freshmen or other classifications, CLEP is an economical and expedient way to earn course credit by taking a 90-minute multiple choice exam.

CLEP exams are available in a variety of subjects; credit earned varies

from 3-16 hours (per test) depending on the subject exam selected by the student.

The TEAM Center is a national testing center for the Educational Testing Service, ACT and National Evaluation Systems.

The center's staff serves as test administrators for many medical, national and state certification programs, including ACT, SAT, TASP, GRE, LSAT, MCAT, Praxis NTE and TOEFL.

Bill Carter

Director ..... Bill Carter  
 Telephone ..... 742-3671  
 Location ..... 213 West Hall  
 Hours ..... 8 a.m. - 5 p.m.  
 e-mail ..... a1jms@ttuv1.ttu.edu

The center also serves as a computer test site for the TASP test.

The center administers a wide variety of career, academic and vocational tests. These tests are used by students to help determine their strengths and interests.

Career-interest inventories help

students explore specific career fields and opportunities by linking interest to occupations.

Academic aptitude testing is used to measure individual academic strengths.

These tests are helpful in the development of academic survival skills and can be used in the creation of learning/degree plans, which focus on the individual strengths.

Test administration for initial screening of learning disabilities also is provided. After this initial screen,

students seeking legal certification are referred off-campus to private practitioners.

In an attempt to provide quick and easy access to career and academic testing, the TEAM Center is establishing computer-based inventories across campus. The center has a site-license for the DISCOVER program, which is a career exploration inventory.

Also available on computer is the GREG program, which is a time management/academic prediction program. This program helps students analyze how time management affects their GPA.

For more information, call 742-3671 or come by 213 West Hall.

The TEAM Center monitors CLEP testing to Tech students. CLEP is an economical and expedient way to earn course credit by taking a 90-minute multiple choice exam.

Wes Underwood/  
 Student Publications

Wes Underwood/Student Publications

Pat McConnell, testing specialist in the TEAM Center, assists a student in his studies. The center helps students at all levels of college to maximize their academic, vocational and career progress.

- CLEP Testing
- ACT, SAT, TASP, GRE, LSAT, MCAT, Praxis NTE and TOEFL testing
- DISCOVER (Career Exploration Inventories)
- Academic Aptitude Testing
- Learning Disability Testing
- Time Management/Academic Prediction Program

## Most Asked Questions

**How can students earn course credit through the examination process?**

*At the testing center, many CLEP exam options are available. Exams are multiple choice format and take approximately two hours to complete.*

**Which areas of a person's brain are strongest and how do students use these strengths to earn the highest grades possible?**

*Appropriate test samples can be used to develop a brain map of academic strengths.*

**How do students know what their academic strengths are and how can they use them to devise a learning/degree plan based on these strengths?**

*Test sampling of academic strengths help students focus their learning by utilizing their strengths for academic success.*

**How can students identify their interests in course work and college majors?**

*Career/interest inventories are available through the testing center.*

# Student Publications

Student Publications is more than just the newspaper. Student Publications at Texas Tech means *The University Daily*, *La Ventana* and *Amigos! New Student and Freshman Directory*.

With two primary goals, Student Publications provides a forum of communication for the campus community and provides actual work experience for students at Tech.

Produced each weekday by a student staff, *The University Daily* focuses on stories that specifically concern Tech students, faculty and staff. It also provides an overview of state, national and world news via the *Associated Press* wire service.

*The UD* operates under the independent editor concept, which means that Laura Hipp, the student editor, is responsible for the non-advertising content of the paper. This includes both the news articles and the opinion columns.

As a student journal, *The UD* of-

fers several opportunities for feedback from its audience. Readers are invited to submit letters to the editor and guest columns for possible publication on the opinion page.

*The UD*, which enters its 73rd year of publication this fall, rates as one of the best student newspapers in the nation, having entered the *Associated Collegiate Hall of Fame*. *The UD* earned this honor by accumulating 10 consecutive years of All-American ratings. Only a limited number of schools have received this honor. Look for *The UD* at 79 locations throughout the campus.

When students purchase an edition of *La Ventana*, they are acquiring a compact, well-illustrated history of any given year at Texas Tech.

Jan Childress

Director ..... Jan Childress  
 Telephone ..... 742-3388  
 Location ..... 103 Journalism  
 Hours ..... 8 a.m. - 5 p.m.  
 e-mail ..... janchildress@ttu.edu

The 1995 *La Ventana* is a recipient of the national *Associated Collegiate Press' Pacemaker* award and a 1996 recipient of the *Columbia Scholastic Press Association's* prestigious *Gold Crown Award*.

The 1996 *La Ventana* also was the recipient of the ACP's *Pacemaker*, and the 1997 *La Ventana* is a *Pacemaker* finalist.

These awards are the highest honor bestowed upon a college yearbook and its staff.

All aspects of life at Tech are covered by *La Ventana*. Besides the usual

class photos and club activities, *La Ventana* strives to record in both copy and photos the essence of life on and off campus.

The value of this book increases as a refer-

ence source and a treasure chest of memories.

The 1999 *La Ventana* editor is Tyson Seibly.

An invaluable companion during that first year at Tech is *Amigos! New Student and Freshman Directory*.

Published each fall, the directory contains photos, hometowns, local addresses and phone numbers of all incoming students, plus valuable tips on getting around the Tech and Lubbock communities.

Another publication for incoming students is *Freshman Life*. Produced

during the summer and distributed during orientation sessions to students and parents, *Freshman Life* is a valuable tool for freshmen to get to know the Tech campus and the city of Lubbock.

Student Publications employs 11 professionals to advise the student staffs and to handle non-editorial functions of the publications.

More than 80 students work in various paid positions on the two primary publications — *The University Daily* and *La Ventana*. Many of the students are non-mass communications majors.

There are no prerequisites for applying for staff positions on the publications. Editors of *The University Daily* and *La Ventana* are chosen by the Student Publications Committee each spring.

*The University Daily* and *La Ventana* both receive national recognition and awards on an annual basis, and students receive jobs upon graduation.

## Most Asked Questions

### How can students buy a *La Ventana*?

A *La Ventana* yearbook may be purchased at spring and fall registrations by indicating the purchase on your tuition fee statement. Yearbooks also may be purchased throughout the year in 103 Journalism. Students can pay by cash, check or credit card. Students also can purchase their *La Ventana* via the phone registration system or online at [www.studentpub.ttu.edu](http://www.studentpub.ttu.edu)

### How can students get their picture in the *La Ventana*?

The yearbook photographer is on campus in the UC during both spring and fall semesters. The fall schedule usually is in October, and the spring schedule is in mid-March.

### If a student writes a letter to the editor of *The University Daily*, how does he or she get it published?

Letters must be no longer than two typed, double-spaced pages. All letters must be signed and submitted in person with a valid Tech ID and a phone number to 211 Journalism.

A Tech student picks up his *La Ventana* yearbook from secretary Mary Lindsey in the journalism building. Students can order a yearbook during registration or they can come by 103 Journalism and order one. Delivery for the 1998 yearbook will be in September. Look for advertisements and fliers around campus for dates and locations to pick up your *La Ventana*.

John Woelke/Student Publications

The full-time staff at Student Publications attend professional workshops twice each year to improve morale and job performance and to strengthen teamwork. The full-time staff performs the day-to-day business tasks to make sure students receive quality publications.

# Counseling Center

The Counseling Center offers a variety of services and programs for a wide range of student needs and interests. The Counseling Center serves a population ranging from entering freshmen to returning adult learners.

Many of the people the center deals with come seeking help in selecting a major or career.

With the center's computerized career guidance system, the staff is able to give information on a large base of career opportunities.

The Counseling Center also shows students how to choose a major area of study on top of providing personal and social counseling for people with a broad range of issues and concerns.

Adjustment problems are common for students to experience at

Rolf Gordhamer

one point or another during their college years, and every case is treated confidentially.

Additionally, the Counseling Center is able to provide help to people with a crisis, personal trauma or stress management.

Another program the Counseling Center offers is the Peers for Retention, Interaction and Diversity in Education program. The PRIDE pro-

gram is a mentoring program for minority students to help them adapt more to a university setting.

The center also offers a speed reading program and group and relationship counseling.

In order to secure help in any of these areas and to take advantage of the different programs the Counseling Center has to offer, call 742-3674 or come by 214 West Hall.

## Most Asked Questions

**What services are provided by the Counseling Center?**

*The Counseling Center provides a service for students with career, academic or personal concerns. The center also has a variety of group activities.*

**Do students really have to be mixed up to see a counselor?**

*The vast majority of students who come to the Counseling Center are average people with problems typical of their age and environment. If an issue is a concern to students, then the staff at the Counseling Center is willing to help them sort out their problems. The center also provides services to students who may be dealing with more severe issues and concerns.*

**Can students be sure their conference with a counselor will be confidential?**

*Yes. Services at the Counseling Center are held in the strictest of confidence.*

**Where can students take career tests and what kinds of testing are there?**

*The Counseling Center provides a variety of testing such as interests, aptitudes and personality inventories. For more information or for career testing, call 742-3672 to set up an appointment or come by 214 West Hall.*

**Are Counseling Center services free?**

*Yes. They have been paid for through student fees.*

**How can I arrange to see a counselor?**

*Call or come by the Counseling Center.*

*Students will complete a brief form and schedule an appointment to see a counselor.*

# Housing and Dining

Living in a Texas Tech University residence hall is a must. It's convenient. It's simple. It's virtually worry free — no hassles! It's just an easy way to go, not to mention what a great part of the college experience it is.

Students learn in a more conducive atmosphere. Friendships are easy to develop in the residence halls at Texas Tech. It's a dynamic lifestyle with exceptional learning centers consisting of 18 halls with accommodations for more than 5,000 students.

The support for students in their academic, social and cultural endeavors is carefully delivered from a very dedicated staff. From personal attention for room assignments to dietary assistance, the Tech Housing and Dining staff is ready to meet your needs with a commitment to providing qual-

ity service that will meet or exceed all student's expectations.

Conveniently located dining halls serve extensive menu varieties which include award-winning choices. Meal plans are available that give students the opportunity to choose the number of meals that best suit their schedule and preferences.

Students who live on campus will find themselves close to classrooms and laboratories, exhibits, the Uni-

versity Center, the library, athletic facilities and shops along University Avenue. Choice is very important and with selections from unique and diverse living environments, students are sure to find just what they want.

Tech will in no aspect of its programs exercise any differences in the treatment of persons because of race, creed, national origin, age, sex or disability. Equal opportunity and access to facilities shall be available to all.

## CARPENTER/WELLS COMPLEX

Carpenter/Wells Complex, an apartment-style residence, offers three bedroom townhouses and four bedroom flats to men and women. Carpenter/Wells Complex is open year-round for the convenience of residents. Residents may live in this complex during the summer without being enrolled in classes, provided the student will be enrolled for the next fall semester.

Each apartment includes a living room, kitchenette (full-sized refrigerator, microwave oven and a two-burner cooktop), single bedrooms and two bathrooms. A Commons Building, which includes an office, computer lab and study lounge is located in the center of the complex. Other amenities include an exercise room, lounge, laundry room and Sam's Place, a deli/convenience store. All apartments have outside entrances.

Furnishings include a sofa, table and chair (living room); dining table and chairs; and each bedroom is furnished with a twin bed, dresser and study desk and chair. The living room and bedrooms are carpeted. The kitchen and bathrooms have vinyl floors.

## DINING SERVICES

Dining halls are conveniently located within or adjacent to each residence hall complex. Dining Services provides excellent quality, value and service to all customers. All dining halls are staffed by a team of professionals. Students are encouraged to dine in any of the five dining halls, the associated theme lines or The Market at Stangel/Murdough (food court). Dining hours are established to meet students' busy schedules. There are 20 meal periods per week with three meal periods per day except Sunday evening.

There is Sneed Snack Bar and Sam's Place (convenience store/deli) operated for the convenience of the residents. Also, The Market at Stangel/Murdough has a variety of after-hours options inclusive of Sunday evening. These options are provided on a cash, Dining Dollars or TechExpress basis.

The Market at Stangel/Murdough offers a very large variety of options on an ala carte program. There are 11 different outlets and many are manufacturer-branded concepts. FLEX meal plan holders can eat here with an equivalent dollar amount applied against the total cost of the meal. The difference is paid in cash, Dining Dollars or TechExpress.

Brian White/Student Publications

## MENU VARIETY

An extensive menu has been developed to meet customer needs. Brand name foods are purchased to satisfy the quality-conscious consumer. Our dining halls are proud to hold the awards for Standard Menu/ Large School Division, Special Catered Events and Theme Meal menus. The variety on the six-week cycle menu includes multiple entrees, self-serve vegetable bar, soup and salad bar, fruit bar, sandwich bar and hot breads. To compliment each meal, an extensive selection of beverages, condiments, desserts, yogurt and ice cream also are provided.

Award-winning International Theme Line menus are featured at each residence dining hall (except The Market at Stangel/Murdough) at specified meal periods. The various themes are Italian, Oriental, Southwest/Grill, Deli/Pizza and a Breakfast Buffet.

## UPPERCLASS/GRADUATE HALLS

Gaston Hall, Gaston Apartments and Doak Hall have been designated for returning, transfer and graduate students who are at least of junior classification and 21 years of age. These halls provide a community environment conducive to meeting the needs of this particular age group including programs, activities and services. Gaston Apartments and Gaston Hall are open 12 months a year.

### Are the residence halls open during the holidays?

The residence halls remain open during Thanksgiving and Spring Break holidays. However, all halls except Carpenter/Wells, Gaston and Doak halls close during Winter Break. Carpenter/Wells and Gaston are open during the break between spring and summer school. Meal service is not available in the residence halls during any of the holidays or breaks.

Brian White/Student Publications

## HONORS HALL and FLOORS

Students with a 1200 SAT, 28 ACT or in the top 10 percent of their graduating class are eligible for the Tech Honors Program. Continuing Tech students with a 3.25 GPA or above also are eligible for the Honors Program. The Honors Hall and floors provide support to students achieving academic suc-

cess. Honors students are eligible to live in the Honors Residence Hall, Gordon Hall, or on the Honors Floors in Wall/Gates. Verification of participation in the program is required for assignment to this living option. For more information, contact the Honors Program at 742-1828.

# Counseling Center

The Counseling Center offers a variety of services and programs for a wide range of student needs and interests. The Counseling Center serves a population ranging from entering freshmen to returning adult learners.

Many of the people the center deals with come seeking help in selecting a major or career.

With the center's computerized career guidance system, the staff is able to give information on a large base of career opportunities.

The Counseling Center also shows students how to choose a major area of study on top of providing personal and social counseling for people with a broad range of issues and concerns.

Adjustment problems are common for students to experience at

one point or another during their college years, and every case is treated confidentially.

Additionally, the Counseling Center is able to provide help to people with a crisis, personal trauma or stress management.

Another program the Counseling Center offers is the Peers for Retention, Interaction and Diversity in Education program. The PRIDE pro-

gram is a mentoring program for minority students to help them adapt more to a university setting.

The center also offers a speed reading program and group and relationship counseling.

In order to secure help in any of these areas and to take advantage of the different programs the Counseling Center has to offer, call 742-3674 or come by 214 West Hall.

## Most Asked Questions

**What services are provided by the Counseling Center?**

The Counseling Center provides a service for students with career, academic or personal concerns. The center also has a variety of group activities.

**Do students really have to be mixed up to see a counselor?**

The vast majority of students who come to the Counseling Center are average people with problems typical of their age and environment. If an issue is a concern to students, then the staff at the Counseling Center is willing to help them sort out their problems. The center also provides services to students who may be dealing with more severe issues and concerns.

**Can students be sure their conference with a counselor will be confidential?**

Yes. Services at the Counseling Center are held in the strictest of confidence.

**Where can students take career tests and what kinds of testing are there?**

The Counseling Center provides a variety of testing such as interests, aptitudes and personality inventories. For more information or for career testing, call 742-3672 to set up an appointment or come by 214 West Hall.

**Are Counseling Center services free?**

Yes. They have been paid for through student fees.

**How can I arrange to see a counselor?**

Call or come by the Counseling Center.

Students will complete a brief form and schedule an appointment to see a counselor.

Rolf Gordhamer, the Counseling Center director, meets with a student in his West Hall office. The Counseling Center provides help for students in the areas of career and major selection as well as personal problems and stress management. The center also offers couple and marriage counseling.

# Career Planning and Placement

Whether you are a graduating senior or an incoming freshman, the Career Planning and Placement Center provides services designed to assist students searching for a job, internship or even a career field.

In addition to providing assistance in writing resumes and cover letters, the Career Planning and Placement Center provides a variety of resources to students in the form of catalogs, magazines, videos and on-line services with information about companies, internships and cooperative education programs.

Students can register with the office via computer diskette and are asked to provide information about themselves, including job experience, academic performance and

personal interests.

Information provided for the Career Planning and Placement Center then is passed on to employers searching for prospective employees or interns. CPPC staff members are on hand to assist students with the registration process.

The center also coordinates a cooperative education program in which students work to gain valuable experience, a salary and contacts that will be useful in the future.

Seniors are strongly encouraged to register with the center and begin

 e-mail ..... dkraus@ttu.edu

their job searching early.

Assistant Director Tom Casey said employers begin seeking information about candidates six to nine months prior to graduation. Casey also said the center has been asked by some employers to submit information about December 1998 and May 1999 graduates.

Freshmen, sophomores and jun-

iors also are encouraged to contact the Career Planning and Placement Center early to obtain information about employers and job-search strategies as well as information

about available internships. CPPC Director David Kraus said often students who would benefit the most from the services offered at the center are the least likely to take advantage of them. Kraus said because job searches take time and perseverance, students, especially those whose majors are not in specific career fields, should begin their job

searching early.

Kraus and Casey said students sometimes see the office as a resource only for students in engineering, business and other clearly defined career fields; however, the center offers assistance to students from all backgrounds.

Career Planning and Placement coordinates at least three on-campus career days during the year. Fall Career Day in September, a summer camp job fair and a teacher job fair in the spring.

The peak times for campus interviewing begin around the first of October and last through mid-November and late January through early March. However, Kraus said, interviewing occurs throughout the year.

## Most Asked Questions

### How can a student register with the CPPC?

Registration is done by a computer registration disk, which may be purchased at the Tech Bookstore. Students also need 10 copies of an unofficial transcript, a list of references and a signed authorization and release statement allowing the CPPC staff to present the students' qualifications to prospective employers.

### Can the CPPC help students in choosing a career field?

Most definitely. There are a number of resources students might find helpful in making these important decisions. SIGI-PLUS consists of nine parts and normally takes students about 1 1/2 to 2 hours to complete. It will ask the student a series of questions about his or her likes, interests, aptitudes and possible career fields that seem to match the student's profile. If a student has a particular career field in mind, he or she also can find out more information about that field.

### When should students begin utilizing the services offered by the CPPC?

Freshmen and sophomore students are urged to become familiar with the services at the CPPC. Career advising is available, and many students find the computerized career guidance system (SIGI-PLUS) to be very helpful. Students are strongly encouraged to participate in the university's Cooperative Education Program in addition to the annual Career Information Day hosted by the center in September and the Summer Camp Job Fair Day in February.

▲ The Career Planning and Placement Center provides a variety of resources to students in the form of catalogs, magazines, information about companies, internships and cooperative education programs. can utilize when writing papers or presentations. Student Health also offers health education classes on a variety of topics such as tobacco cessation and a pre-exam counseling class for women who are planning their first visit to the Women's Health Clinic. Other classes are offered periodically and are advertised in *The University Daily* or throughout academic buildings.

The clinic also sponsors Impact Tech, a peer education group. This group of volunteer students learns about health issues such as substance use and abuse. The group of students then go into the campus community to educate other students about these issues.

Impact Tech is available to conduct programs for campus groups and

academic classes. Students who are interested in volunteering for Impact Tech should call 743-2860 for more information.

Appointments in Student Health usually are available on the same or following day you call. Appointments can be made by calling 743-2848. If you have an appointment and are not able to keep it, please call and cancel your appointment so other students may be seen during that time slot.

Students needing care after hours are encouraged to locate another clinic or hospital in the community. Any services obtained outside of Student Health are NOT covered by a student's medical services fee and are the responsibility of the student. Students may obtain care at University Medical Center at discounted rates.

Wes Underwood/Student Publications

A Student Health Services doctor gives a student a check up. Licensed health care professionals provide care for minor illnesses and injuries to students with a focus on prevention.

## Most Asked Questions

**Does Student Health Services have real doctors?**

Yes. Student Health Services is a primary care clinic staffed with licensed physicians, certified nurse practitioners, nurses and a support staff. The medical staff at Student Health has more than 200 years of combined experience. Now that's health care you can trust!

**How do students pay for these services?**

Each semester, students who are registered for four or more hours are assessed a medical services fee, which entitles them to necessary visits to the Student Health Services clinic and access to the other services provided through Student Health. However, students should be covered by major medical insurance for emergencies requiring care outside Student Health. Students taking fewer than four hours may pay the medical services fee at the Bursar's office.

## We Have Everything You Need!

### Need money?

**American State Bank**

The UC's plan to provide the Tech campus with the best in facilities and services also includes American State Bank. Their motto "Right Size to be Friendly" is most appropriate. Stop in and find out about their services and facilities.

UC Check Cashing will cash pre-printed personal checks and TTU checks for anyone with a valid Tech ID.

**TECH EXPRESS**

At Tech Express, located across from the Information Center, students can conveniently add money to their Tech Express card without having to walk to Doak Hall.

### Need answers?

The Information Center is your best resource for any questions about the UC and student activities. Hours are 8 a.m. to 10:30 p.m.

### Need help?

Located in the east basement of the UC, High Tech offers hardware and software at discounted prices. Students also can have their computers and peripherals serviced.

**High TECH** Computer Store

### Need food?

**Pizza Hut**

**Blimpie** SUBS & SALADS

**cappuccino's** We Proudly Brew

**Chick-fil-A** TASTE IT, YOU'LL LOVE IT FOR GOOD

**RAIDER ROCK** CTFWZ

# UNIVERSITY CENTER

Texas Tech University

### Most Asked Questions

**How can students reserve banner space in the UC?**

Banner spaces cannot be reserved but are on a first-come-first-serve basis. Banners may not exceed 30 inches high and 13 feet, 2 inches long. All banners must be approved in the UC Main Office.

**How can students arrange for the use of tables in the UC?**

Lobby tables may be requested in the UC Main Office and can be reserved for up to three days at a time.

**How is approval for posting on campus obtained?**

Posters promoting activities or events by campus organizations must be approved and stamped in the SOS office. Posters then may be displayed on any approved posting space on campus.

### Need more out of campus life?

### Most Asked Questions

**How can students reserve banner space in the UC?**

Banner spaces cannot be reserved but are on a first-come-first-serve basis. Banners may not exceed 30 inches high and 13 feet, 2 inches long. All banners must be approved in the UC Main Office.

**How can students arrange for the use of tables in the UC?**

Lobby tables may be requested in the UC Main Office and can be reserved for up to three days at a time.

**How is approval for posting on campus obtained?**

Posters promoting activities or events by campus organizations must be approved and stamped in the SOS office. Posters then may be displayed on any approved posting space on campus.

vide opportunities for leadership, social and community service.

Numerous programs and services are provided through the Dean of Students office including the Adult Learners program, Multi-cultural Services and the Student Life Assessment program.

The Dean of Students office also provides leadership to students through the Code of Student Conduct, a service that focuses on the behavioral concerns of the student and not just the misconduct and punishment of the student. The service allows the Dean of Students office to take a proactive stance to help stu-

dents make good choices in the educational process.

The Dean of Students staff assumes a major role in encouraging and establishing open and humane methods of campus decision-making and the rational resolution of problems.

The office's method of decision-making and the programs and services offered provide Tech students with the best possibilities to continue their total university experience.

For more information about the Dean of Students office and how students can get involved with their programs, call 742-2192.

## Most Asked Questions

**Are there any special services for disabled, minority and older returning students?**

*Yes. Opportunities available for disabled students include campus accessibility and service information, assistance in arranging courses, classroom and testing accommodations and more. Services available for minority students include personal advisement, financial counseling, assistance with culturally-oriented programs and activities and conducting workshops and seminars in the areas of leadership in development and improving organizational effectiveness. Services for nontraditional students (adult learners) include individualized counseling for educational and personal adjustments to the university environment.*

**How does a student begin a student organization?**

*A student can pick up a student organization registration sheet with instructions at the Student Organization Services office in the University Center. The forms must be completed, along with the proper signatures, and returned to the SOS office.*

Two Texas Tech students look over the Code of Student Conduct handouts in the Dean of Students office. The office focuses on the behavioral concerns of the student and not just the misconduct and punishment of the student.

# Student Business Services

Wes Underwood/Student Publications

The staff of Student Business Services is ready to serve students in everyday business concerning their tuition and financial aid disbursement.

Student Business Services, formerly the Bursar's office, has several primary functions that affect the everyday business of the students enrolled at Texas Tech.

The department works very closely with the Office of Financial Aid and the Registrar in these processes. Coordination with Financial Aid, for example, regarding dates to post financial aid, scholarship, loans and grants to a student's tuition and fee account is a constant and on-going process. Calendars and coordination are done well in advance of the semester or term so as many problems as possible can be avoided.

The tuition rate for Texas resident students is set by the State Legislature and is published in the Education Code. Tuition rates for nonresi-

dent and foreign students are set by the Higher Education Board.

The Education Code also establishes the payment criteria for each semester or term. Payments for the spring and fall semesters may be made in installments of 50 percent prior to the first class day. The remaining 50 percent may be paid in installments of one-half of that amount due prior to, and no later than, the beginning of the sixth class week and one-half of the remaining amount no later than the 11th class week.

Summer terms do not have payment installment options, and payments must be made prior to the first class day. Students should make note that the registration and billing information sheet given to them at registration is their FIRST billing, and

that payment due dates are provided on that sheet. Due dates also are published in the Directory of Classes and catalogs.

Billings are sent to the permanent legal address provided by the student to the Admissions and Records office. If students desire billings be sent to a different location, they may complete a special billing address form at the Student Business Services office.

Cash, personal checks, cashier checks and money orders are accepted for payment purposes, as well as MasterCard, VISA and Discover.

Students may fax their credit card payments and the completed information located on the back of the billing statement to (806) 742-0445. Students also may pick up fax forms from the office.

## Tech SIS

Wes Underwood/Student Publications

Linda Ricks, incoming TechSIS project manager, is welcomed by Jill Bailey, outgoing project manager. The TechSIS project will provide students with telephone and Internet registration systems, available this fall.

Texas Tech has long enjoyed an enviable reputation for its excellent academic programs. The new division of Enrollment Management seeks to enhance that reputation by providing superior student services. To achieve this goal, Tech has embarked on an ambitious project this fall to implement a new Student Information System. The system is called TechSIS.

Providing students with telephone and Internet services has long been a goal of the administration and staff of Tech. This October will bring the full realization of that goal.

Tech's new system is based on SCT's Plus2000 Student Information System. Since Tech first purchased its current student system from SCT in 1983, the company has grown to become one of the nation's primary suppliers of software solutions for institutions of higher education. Many other universities also have selected this same SCT Plus2000/DB2 solution, including the University of Nebraska, University of Alabama and Oklahoma State.

The Plus2000 "suite" of systems purchased by Tech includes Admis-

sions, Student Records, Billings and Receivables, Financial Aid and a new automated Degree Audit function.

The new services that will affect Tech students include:

- **Telephone Services** — including admissions, full registration services, financial aid services, account balances, grades, credit card payment options, etc.

- **Web Services for Students** — providing Internet access to course catalogs, class schedules, on-line registration services, grades, admissions, account balances, credit card payments, financial aid services, name and address access and transcripts.

- **Web Services for Faculty** — including course roster, course waitlists, registration, faculty schedules, course catalog and class schedules.

- **Corequisite and prerequisite checking at registration.**

Administrative Information Services has a team of 12 programmers devoted to the implementation and on-going support of TechSIS. This team is working with offices across campus to install and customize the Plus2000 software for Tech. These

same offices are working with the new system to determine how best to take advantage of all the TechSIS features. The team also has worked on the conversion of data from the current system to the TechSIS format (a DB2 database) and has corrected many existing data inconsistencies in the process. Jill Bailey managed the AIS side of the implementation for the past two years, in July, Bailey left Tech, and Linda Ricks, also of AIS, took over as TechSIS project manager.

An October conversion and production cutover is currently planned, which will have the base TechSIS set up and running for preregistration in November 1998. Some TechSIS options, such as phone and web, will be implemented in phases over the year. Those phone and web functions that are inquiry-only, such as grades display, will be implemented first. More complex options, such as phone and web registration will be implemented more gradually to ensure a smooth transition to TechSIS.

If you want to know more about TechSIS, please visit the project web site at: <http://sisweb.sis.ttu.edu>.

# Admissions and Records

## TRANSCRIPTS

Student may request a transcript of their records at the Transcript office in 137 West Hall. The student's full legal name, social security number and signature are required, along with \$2 per transcript.

## REGISTRATION

New students register in the UC Ballroom during summer orientation. In the fall, students will no longer be required to stand in long lines and will be able to utilize the new phone registration system.

## DROP/ADD

Along with coordinating preregistration sessions, the Admissions and Records office also coordinates drop/add sessions during the fall and spring semesters.

photos by Wes Underwood/  
Student Publications

## Most Asked Questions

### How do I change my major?

After you have picked up your registration materials from your current adviser, and before you register for a particular semester, an academic transfer can be made in 100 West Hall. Prior to a major change students should contact the department of the new major.

### How do I change my college?

Prior to a change in college, students need to contact the new academic dean's office for forms and instructions.

### What is the procedure for obtaining a transcript?

To obtain a transcript, go to the Transcript office in West Hall. Students' full legal name, social security number and signature are required, along with \$2 (per copy, payable in advance) and the address where the transcript is to be mailed. This information may be directed to Box 45015, Lubbock, TX, 79409-5015.

### Do I have to take the TASP test? If so, when?

Testing requirements and ways to obtain exemptions are explained on page 34-35 of the Undergraduate Catalog. Students must take the test prior to attending classes. If any part of the test is failed, students will be required to enroll in a formal program of skills development.

# Student Financial Aid

Wes Underwood/Student Publications

The staff of Student Financial Aid will answer students' questions about federal and private aid and help them plan budgets as well.

Applying for financial aid can be a hassle when students are not aware of dates and opportunities available to them. The Student Financial Aid office, a division of Enrollment Management at Texas Tech, is here to help.

For grants, loans, college work-study and the scholarships administered by the Student Financial Aid office and/or Financial Aid Committee, students must complete the Free Application for Federal Student Aid (FAFSA). The Federal Stafford Loan has its own application and supplement. For scholarships administered by the various departments, students must apply directly to the appropriate administrator on forms available in individual departments.

Student financial aid is based on 1) academic achievement only, for

some scholarships; 2) need, provided satisfactory progress is maintained; 3) a combination of need and academic achievement. Aid will not be awarded to a student who is not maintaining satisfactory academic progress, is in default of a Stafford Guaranteed Student Loan or owes a refund on a previous grant.

Scholarship deadlines are March 1. There is no deadline for other types of aid, but adequate time must be allowed for the application to be processed in time for the aid to be available the semester for which it is to be used. Students' completed applications should be on file before April 15 for the fall semester, Oct. 14 for the spring semester or March 14 for the summer sessions to be considered for all programs for which they may be eligible.

## HELPFUL HINTS

- Apply early, between Jan. 1 and March 1 each year for the next award year.
- Applications for general university scholarships are available to students in January of each year and are due March 1.
- Complete federal income tax forms early to help you in completing the FAFSA or renewal application.
- Send tax documents to Tech only when requested.
- Apply accurately. If you have questions, ask before mailing your application.
- Keep copies of everything you send.
- Read everything carefully — ask questions.
- Keep the Admissions and Records office informed at all times of your permanent and local mailing addresses.
- Research your scholarship opportunities.
- Make sure you know financial aid policies for enrollment and academic progress requirements. Ask in the Financial Aid office for a copy of the Standards for Satisfactory Academic Progress.
- Respond quickly to financial aid mail.

# PASS Center

Wes Underwood/Student Publications

The staff of Programs for Academic Success strives to offer an array of services to assist students in their academic success.

Programs for Academic Success Services is one of the departments in the newly formed Enrollment Management division.

PASS consists of the Learning Center, located in 205 West Hall; TASP Basic Skills Development, located in 72 Holden Hall; XL: Strategies for Learning, located in 56 Holden Hall; and Testing Accommodations, located in the Learning Center.

As a department, PASS strives to offer an array of services to assist students in their academic success. The Learning Center provides tutoring services in most math courses, basic physics, chemistry, biology and a limited number of foreign languages.

Another service, supplemental instruction, focuses on historically difficult courses. This service is offered in a limited number of courses, calling the Learning Center for a list is suggested. A video lab and computer lab area also is located in the Learning Center.

TASP Basic Skills Development assists students who have not attained passing scores on the TASP test. Basic skills development is required by the state in all enrolled semesters until the test is retaken and passed. Basic skills development may be either a structured 10-week course, or structured individual work in a lab setting.

XL: Strategies for Learning consists of a 10-week structured learning-to-learn course. XL is open to all Tech students and mandatory for students returning from first suspension as well as for second-semester freshmen who have not achieved a 2.0 overall GPA in the first semester of course work.

Testing Accommodations provides an alternative testing site, other than the classroom or department, for students with documented disabilities. Students must be registered through the Dean of Students office to receive this service. Students receive contracts for each course that must be signed by the instructor.

# New Student Relations

Wes Underwood/Student Publications

The Double T Crew guides freshmen through the learning of Tech traditions during new student orientation. New Student Relations took the reins of coordinating orientation this year from the Dean of Students office.

The Office of New Student Relations, a division of Enrollment Management, is responsible for the recruitment efforts at Texas Tech.

It is the goal of the office to promote and generate interest in the outstanding educational opportunities available at the university. Every year, New Student Relations makes nearly 1,000 visits to high schools and community colleges throughout Texas, New Mexico and Oklahoma. The office participates in more than 300 College Day/Night programs from September through December.

In addition to traveling throughout the region, the staff of New Student Relations also devotes much of their time to the planning and execution of events such as University Day, Lubbock On-Campus Days, Honor

Transfer Day, Summer Showcase and the Texas Tech Experience. New Student Relations also acts as the host for new student orientation known as Double T Days.

The staff of New Student Relations also takes great pride in the Visitor Center located in the administration building. Each year, more than 1,800 prospective students take campus tours and attend advisement sessions based on their interests.

Campus tours are guided by University Select. This organization was established in 1995 to serve New Student Relations and the Visitor Center.

In addition to the office here on campus, New Student Relations has regional offices in Dallas, Houston, Austin and El Paso.

## REGISTRATION

New students register in the UC Ballroom during summer orientation. In the fall, students will no longer be required to stand in long lines and will be able to utilize the new phone registration system.

## DROP/ADD

Along with coordinating preregistration sessions, the Admissions and Records office also coordinates drop/add sessions during the fall and spring semesters.

photos by Wes Underwood/  
Student Publications

## Most Asked Questions

### How do I change my major?

After you have picked up your registration materials from your current adviser, and before you register for a particular semester, an academic transfer can be made in 100 West Hall. Prior to a major change students should contact the department of the new major.

### How do I change my college?

Prior to a change in college, students need to contact the new academic dean's office for forms and instructions.

### What is the procedure for obtaining a transcript?

To obtain a transcript, go to the Transcript office in West Hall. Students' full legal name, social security number and signature are required, along with \$2 (per copy, payable in advance) and the address where the transcript is to be mailed. This information may be directed to Box 45015, Lubbock, TX, 79409-5015.

### Do I have to take the TASP test? If so, when?

Testing requirements and ways to obtain exemptions are explained on page 34-35 of the Undergraduate Catalog. Students must take the test prior to attending classes. If any part of the test is failed, students will be required to enroll in a formal program of skills development.

# Student Financial Aid

Wes Underwood/Student Publications

The staff of Student Financial Aid will answer students' questions about federal and private aid and help them plan budgets as well.

Earl Hudgins

Director ..... Earl Hudgins  
Telephone ..... 742-3681  
Location ..... 310 West Hall  
Hours ..... 8 a.m. - 5 p.m.  
e-mail ..... [finaid.web.admin@ttu.edu](mailto:finaid.web.admin@ttu.edu)

Applying for financial aid can be a hassle when students are not aware of dates and opportunities available to them. The Student Financial Aid office, a division of Enrollment Management at Texas Tech, is here to help.

For grants, loans, college work-study and the scholarships administered by the Student Financial Aid office and/or Financial Aid Committee, students must complete the Free Application for Federal Student Aid (FAFSA). The Federal Stafford Loan has its own application and supplement. For scholarships administered by the various departments, students must apply directly to the appropriate administrator on forms available in individual departments.

Student financial aid is based on 1) academic achievement only, for

some scholarships; 2) need, provided satisfactory progress is maintained; 3) a combination of need and academic achievement. Aid will not be awarded to a student who is not maintaining satisfactory academic progress, is in default of a Stafford Guaranteed Student Loan or owes a refund on a previous grant.

Scholarship deadlines are March 1. There is no deadline for other types of aid, but adequate time must be allowed for the application to be processed in time for the aid to be available the semester for which it is to be used. Students' completed applications should be on file before April 15 for the fall semester, Oct. 14 for the spring semester or March 14 for the summer sessions to be considered for all programs for which they may be eligible.

## HELPFUL HINTS

- Apply early, between Jan. 1 and March 1 each year for the next award year.
- Applications for general university scholarships are available to students in January of each year and are due March 1.
- Complete federal income tax forms early to help you in completing the FAFSA or renewal application.
- Send tax documents to Tech only when requested.
- Apply accurately. If you have questions, ask before mailing your application.
- Keep copies of everything you send.
- Read everything carefully — ask questions.
- Keep the Admissions and Records office informed at all times of your permanent and local mailing addresses.
- Research your scholarship opportunities.
- Make sure you know financial aid policies for enrollment and academic progress requirements. Ask in the Financial Aid office for a copy of the Standards for Satisfactory Academic Progress.
- Respond quickly to financial aid mail.

E-mail the Student Financial Aid office with  
your questions at:

# PASS Center

Wes Underwood/Student Publications

The staff of Programs for Academic Success strives to offer an array of services to assist students in their academic success.

Programs for Academic Success Services is one of the departments in the newly formed Enrollment Management division.

PASS consists of the Learning Center, located in 205 West Hall; TASP Basic Skills Development, located in 72 Holden Hall; XL: Strategies for Learning, located in 56 Holden Hall; and Testing Accommodations, located in the Learning Center.

As a department, PASS strives to offer an array of services to assist students in their academic success. The Learning Center provides tutoring services in most math courses, basic physics, chemistry, biology and a limited number of foreign languages.

Another service, supplemental instruction, focuses on historically difficult courses. This service is offered in a limited number of courses, calling the Learning Center for a list is suggested. A video lab and computer lab area also is located in the Learning Center.

TASP Basic Skills Development assists students who have not attained passing scores on the TASP test. Basic skills development is required by the state in all enrolled semesters until the test is retaken and passed. Basic skills development may be either a structured 10-week course, or structured individual work in a lab setting.

XL: Strategies for Learning consists of a 10-week structured learning-to-learn course. XL is open to all Tech students and mandatory for students returning from first suspension as well as for second-semester freshmen who have not achieved a 2.0 overall GPA in the first semester of course work.

Testing Accommodations provides an alternative testing site, other than the classroom or department, for students with documented disabilities. Students must be registered through the Dean of Students office to receive this service. Students receive contracts for each course that must be signed by the instructor.

# New Student Relations

Wes Underwood/Student Publications

The Double T Crew guides freshmen through the learning of Tech traditions during new student orientation. New Student Relations took the reins of coordinating orientation this year from the Dean of Students office.

The Office of New Student Relations, a division of Enrollment Management, is responsible for the recruitment efforts at Texas Tech.

It is the goal of the office to promote and generate interest in the outstanding educational opportunities available at the university. Every year, New Student Relations makes nearly 1,000 visits to high schools and community colleges throughout Texas, New Mexico and Oklahoma. The office participates in more than 300 College Day/Night programs from September through December.

In addition to traveling throughout the region, the staff of New Student Relations also devotes much of their time to the planning and execution of events such as University Day, Lubbock On-Campus Days, Honor

Transfer Day, Summer Showcase and the Texas Tech Experience. New Student Relations also acts as the host for new student orientation known as Double T Days.

The staff of New Student Relations also takes great pride in the Visitor Center located in the administration building. Each year, more than 1,800 prospective students take campus tours and attend advisement sessions based on their interests.

Campus tours are guided by University Select. This organization was established in 1995 to serve New Student Relations and the Visitor Center.

In addition to the office here on campus, New Student Relations has regional offices in Dallas, Houston, Austin and El Paso.

# Recreational Sports

The Student Recreation Center at Texas Tech offers a myriad of opportunities to participate, socialize and stay fit. Included in the facility is one of the largest arrays of cardiovascular training equipment in Lubbock. There are 15 step machines, five treadmills, five recumbent bikes, two Windracers, two Nordic Tracks, rowers, Lifecycles, Aerodyne Schwinn bikes and several pieces of disabled-use equipment.

While most of the equipment is available for drop-in use, individuals who plan ahead can make reservations on six Stairmasters, two treadmills and one of each of the Nordic Tracks, recumbent bikes and Windracers. Three Lifecycles also are available for reservation.

The Recreational Sports Department also sponsors the Sports Club Program at Tech to provide opportunities for students to participate in a wide variety of competitive sports. The department invites all students interested in any of the clubs to call Pee Wee or Janda at 742-3351 for more information about:

Aikido, fencing, gymnastics, rockclimbing, shooting, soccer (men's and women's), volleyball (men's and women's), Windriders, bowling, Flying Raiders, lacrosse (men's and women's), rugby (men's and women's), snow sports, Tae Kwon Do, water skiing, wrestling, cycling, in-line skating, polo, running, swimming, tennis, weightlifting

▲▲ Students get their daily workouts by utilizing the treadmill machines at the SRC. A variety of cardiovascular equipment including step machines, Nordic Tracks and row machines is offered.

◀ A student takes advantage of the free-weight room in the SRC while his partner spots him. Students are able to choose between two circuit rooms and one free-weight room.

▲ Having fun and getting a workout, too, Tech students play basketball on one of five basketball courts in the SRC.

## Intramural Events and Entry Deadlines:

- Flag Football: Sept. 8-10
- Tennis Singles: Sept. 8-10
- Fall Softball: Sept. 15-17
- Golf Singles: Sept. 21-30
- Volleyball: Sept. 29-Oct. 1
- Trap and Skeet: Oct. 5-9
- 2-person Golf Low Ball: Oct. 5-14
- Outdoor Soccer: Oct. 20-22
- Putt-Putt: Oct. 19-28
- Swim Meet: Oct. 27-29
- Co-Rec Basketball: Oct. 27-29

▲▲ The Aquatic Center at the SRC offers year-round swimming with the largest removable, air-supported roof in the country. From lap swimming and water aerobics to lifeguarding and CPR classes, the Aquatic Center has something for every swimmer's needs.

▲ The SRC offers more than 60 noncredit aerobic classes weekly. Classes are free to those who have access to the SRC; they are offered on a drop-in basis to provide for flexibility in schedules. Aerobic classes are scheduled for early mornings, afternoons and

evenings in three rooms of the rec center. Classes include low impact aerobic classes consisting of a warm-up, aerobics, muscular strengthening, toning and a cool-down.

► The Outdoor Program offers many activities that appeal to the more adventurous Tech student. Off-campus adventure trips are scheduled to places like Grand Canyon National Park and Guadalupe Mountains National Park. Workshops include rock climbing, rappelling, backpacking, outdoor cooking and ski maintenance. Equipment rentals are available.

# Upward Bound

The Texas Tech University Upward Bound program is a student-centered department that seeks to help high school graduates pursue post-secondary education. The program is committed to increasing the retention of students whose socioeconomic background may hinder their educational goals.

It is the philosophy of the department that, if given the opportunity, students from disadvantaged backgrounds can succeed in their educational endeavors. Project Upward Bound and Career Exploration programs provide such opportunities.

The Texas Tech Upward Bound program is designed to develop creative thinking, effective expression and positive attitudes toward learning. Teachers, counselors and other professionals provide comprehensive counseling services, academic enrichment and cultural activities that enhance students' potential for educational success.

Upward Bound, funded by the Department of Education, enables high school students from families meeting program criteria, established by the U.S. Department of Education, to develop the skills and motivation

**Director** ..... Eric Strong

**Telephone** ..... 742-3616

**Location** ..... 304 West Hall

**Hours** ..... 8 a.m. - 5 p.m.

**e-mail** ..... a1tlm@ttuvm1.ttu.edu

necessary to achieve success in college. Sponsored by Tech, the program is offered at no cost to qualified students.

Upward Bound students receive information regarding financial aid, college enrollment procedures and career planning. The staff works with college admissions officers, financial aid personnel and others to provide individualized services to the Upward Bound student.

Basic skills instruction and college-level courses are provided for eligible students. Additionally, Upward Bound provides students with information regarding financial aid, college enrollment procedures and academic and career advisement.

The Career Exploration component provides classroom instruction

and observatory experiences that help prepare students for academic career choices and employment opportunities.

Upward Bound students are admitted during their sophomore or junior year. Students are recommended by high school teachers and counselors and are selected on the basis of having academic potential and a desire to pursue higher education.

The program seeks to help youth who have academic potential, but have not had the preparation, motivation or opportunity to realize and demonstrate their abilities. Prospective students are selected from schools within a 50-mile radius of the Lubbock area.

The Upward Bound program at Tech consists of two major compo-

nents: the academic year program and the summer residential program. During both components, students receive academic tutoring and counseling services and may participate in a variety of social and cultural activities.

The academic year program consists of 24 to 27 academic sessions conducted on a weekly basis on the Tech campus. Instruction is provided in mathematics, English, science, foreign language, literature and college readiness.

The summer program provides an opportunity for enrolled students to

live in the university's residence halls for one summer session. The program provides the bridge students, or high school seniors, with an opportunity to implement what they have learned during the program.

Bridge students are enrolled at Tech as freshmen and may earn up to six hours of college credit during the summer program.

Non-bridge students, sophomores and juniors, attend academic classes taught by Upward Bound instructors and live in the residence halls during the six-week summer session.

▲ Upward Bound students are educated in cultural activities at Tech. The program gives students the opportunity to learn about other facets of life. The Texas Tech Upward Bound program is designed to develop creative thinking, effective expression and positive attitudes toward learning.

▲ A member of the Upward Bound staff aids a student in her studies during the annual summer program sponsored by Upward Bound. The program provides an opportunity for enrolled students to live in the university's residence halls in addition to the all-around university experience.

◀ Upward Bound students nail up plywood and help out with the Habitat for Humanity project for a local family.

# Texas Tech Bookstore

The Texas Tech University Bookstore continues to expand its services. The bookstore now does film processing and carries a full line of convenience items and snacks.

The bookstore even has its own website where students can order their books so that they are ready for them when they go into the store. On the website, students also can order Tech memorabilia and clothing, look at what books are available by Tech authors and check out software pricing! Students even can advertise an event their campus organization is having!

The website address is: [www.ttubookstore.com](http://www.ttubookstore.com).

The bookstore has expanded its line of clothing and gifts. Customized gift baskets are available to be shipped anywhere a student chooses.

Textbooks are what make the Texas Tech Bookstore what it is. The bookstore is the source for students for all textbooks and required materials for class. The bookstore places an emphasis on used textbooks and has the largest selection of used books. Used books represent a savings of at

Ilena Delorso, director

least 25 percent off the cost of new books.

The bookstore carries study guides and reference materials in addition to one of the largest selections of popular fiction, mysteries and self-help books. The bookstore carries *New York Times* bestsellers, too. Any book not in stock can be special ordered.

The bookstore will pay half of the original price for any books that are used during the following semester, as long as the store is not

overstocked. Books that are not being used still may be sold at the national wholesale value. The best time to sell your books back is during finals week.

The bookstore also offers services such as UPS and Federal Express shipping. Simply bring in your packages, and the staff will handle all the paperwork. The bookstore accepts VISA, MasterCard, American Express, Discover and Tech Express.

# Red Raider Robot

**R**ed Raider Robot is a computerized telephone service designed to de-hassle students' lives.

By dialing 74-CHECK or 742-4325 on any touch-tone phone, whether on or off campus, students can utilize the two primary functions of Red Raider Robot: to detect administrative holds on their records and to issue personal test numbers.

When students begin preparations to register for classes, they can call Red Raider Robot to find out if there are any administrative holds on their records that would prevent them from registering.

Students could have an administrative hold on their records for things like unpaid fees, parking fines, or in-

complete admission or test score records. By calling Red Raider Robot, students can find out about any holds and take care of them before they go to register — it could save them a lot of time. These records are updated twice daily at 11 a.m. and 3:30 p.m.

Students can call Red Raider Robot at the beginning of every fall semester to find out their personal test number. Professors use the Personal Test Number to post grades anonymously.

The Family Educational and Privacy Act of 1974 makes it illegal for grades to be posted by name or social security number. Students' numbers change every Sept. 1, so remember to call every year.

Red Raider Robot is available 24 hours a day, seven days a week.
