Tech researchers under fire

By J.D. Boswell and Greg Okuhara
Staff Writers

PETA charges campus scientists with 'cruel and useless' treatment to animals

People for the Ethical Treatment of Animals announced at the state capital Wednesday that Texas Tech is involved in "cruel and useless" research on deer and quail. PETA is an international charity dedicated to the protection of animals with more than 600,000 members, 18,000 of them in Texas. The allegations involve a study conducted by Tech on the effects of imported red fire ants on deer and quail. Two months ago, a whistleblower at Tech alerted PETA that researchers were placing fire ants on newborn bobwhite quail chicks. PETA proceeded to file a Freedom of Information Act request and was provided the results of Tech's study.

Peter Wood, a researcher at PETA, said Tech's research is not necessary. "We adamantly oppose what Texas Tech is doing," Wood said. "Not only is it cruel, but repetitive and it's already been done. It's a useless program." Wood said Tech cites numerous studies involving fire ant research, some as far back as 1931. He said people "already know the effects and there is nothing more to learn." In a letter to Gov. George W. Bush, PETA said the \$2.5 million approved for fire ant research is a waste of taxpayers' money.

Susan Combs, Texas agriculture commissioner, said she supports Tech in their research and feels the research will save Texas money. "I'm not in the position to second-guess our research institutions," Combs said. "Texas is suffering \$300 million in losses annually due to fire ant-related issues. I am very supportive of Texas Tech being a major leader in fire ant research." The research in question involves the capturing and studying of white-tail deer by Mark Wallace, assistant professor of range,

wildlife and fisheries management and his colleagues. According to the letter sent to Bush, PETA claims "25 pregnant does were chased down by helicopters and captured with net-guns. Once netted, the does were tagged, bound, had hoods placed over their heads and driven to holding pens." The letter also said eight deer died from stress and one from internal injuries. Three managed to escape. PETA also has alleged Tech researchers deliberately placed red fire ants on bobwhite quail chicks.

Tech officials gave a press conference to answer PETA's accusations Wednesday afternoon. In a press release, Tech said the allegations are "unfounded and not consistent with the facts." Robert Sweazy, senior associate vice president for research, said research was conducted within appropriate boundaries. "Texas Tech stands by the individual researcher and its fire ant research," Sweazy said. "The university has investigated PETA's allegations and has found the researcher acted responsibly, in good faith and with his research protocol." Sweazy said the deaths of deer during capture are not Tech's fault. "The deer were initially captured by a pro-

NEW GROUND Administrators, faculty break ground on English/Philosophy/Education Complex

BREAKING

By Jonathan Biles
Staff Writer

With a sound of a trumpet by Will Strieder, professor in the School of Music, the ground breaking for the \$45 million English/Philosophy/Education Complex commenced Wednesday.

Challenges for the complex began when Chancellor John Montford presented the project before the Texas Higher Education Coordination Board and its chairman, Tom Nichols.

Although this is the most expensive project ever approved by the board, Nichols said the complex is not only approved but endorsed by the board.

"We endorsed and approved the complex and hold it as a prototype for future projects," Nichols said.

The complex will allow Tech to provide the most premier teaching in education, and Jim Sowell, chairman of the Board of Regents, said the new complex will not only be a sight to see but will serve the needs of every student at Tech.

"I hope when the students use the complex in the future, they will feel the same pride that I feel today," Sowell said.

The complex is the first educational building to be constructed since Holden Hall 25 years ago. At that time, the worth of all the buildings on the entire campus totaled \$42 million, and this complex will cost about \$45 million, said Provost John Burns.

The \$45 million will provide for the construction of the 211,000 square-foot complex that will include three lecture halls, 64 classrooms, 227 offices, 16 labs and a courtyard.

The complex will prove to be a profound work of art, said Tech President Donald Haragan said.

"There are three forms of art: painting, sculpture and architecture," Haragan said. "And, this complex will be one of the most profound works of art on this campus."

The complex will set a new standard for construction on universities across Texas, Montford said.

"This building will be the premier building in the state of Texas," Montford said.

The complex will not only serve as a beautification piece of the campus but also will enhance the type of education offered at Tech, Sowell said.

"From this complex, I expect an outstanding faculty to expect many great things," he said. "I, for one, expect nothing less."

The complex will enhance the overall well-being of the campus, said Blythe Clayton, president of the Student Government Association.

"Without a doubt, the buildings will enhance the campus physically and academically," Clayton said. The completion of the complex is expected for the spring of 2001, Burns said.

\$1.25M grant to connect campus entities

By Jonathan Biles
Staff Writer

A federal grant in the form of \$1.25 million for Texas Tech gained approval from the U.S. Economic Development Administration Tuesday and paved the way for a state-of-the-art fiber optic network system to be created between the TTU campus, Lubbock Reese Development Authority and the Health Sciences Center.

The two entities were granted development funds in order to help establish the foundation for a technological research park located at the former air force base north of Lubbock.

"This grant is not only important for the growth of our campus, the city of Lubbock and the Reese Center, but its really important for the entire region," said David Schmidly, vice president of Research, Graduate Studies and Technology Transfers at Tech.

With the grant, Schmidly said the gates of technology would open limitless research possibilities in the form of a fiber optic network system between Tech, the HSC and the Lubbock Reese Development Authority.

The network would unite all three entities via Internet and connect them to the Super Computer scheduled to be installed at Reese Center.

Now that the money has been granted, Schmidly said construction bids will need to be needed in order to get an estimate as to how much of the \$1.25 million will be needed for the initiation of the project.

Once all bids are made, the Board of Regents will have to approve the project, which Schmidly said would probably be voted on during the regents' meeting in May.

With this addition, Schmidly said the sharing of research through the latest technology available would not only make the working relationship between the three institutions more user-friendly, but would attract more high technology industries into the area as well.

"Anytime you bring state-of-the-art technology into the area, businesses obviously are going to be attracted to what you have to offer them," Schmidly said.

U.S. Congressman Larry Combest, who had been pushing for the funding to be passed, agreed with Schmidly's assessment that increased technology and research would help stimulate Lubbock's economy.

Candidates named in 1999-2000 SGA elections

By Gretchen Verry
Staff Writer

Following Friday's deadline to file an intent to run, Texas Tech's Student Government Association elections in March will see three candidates for president, four for external vice president and three for internal vice president.

In addition to three registered candidates for president, two registered write-in candidates will also vie

for the position.

Assistant Director of Operations for the University Center Dan Burns said it is unusual to see two registered write-ins for an election.

Douglas Jeffrey IV, Stefani Williams and Austin McWilliams will campaign for the office of president for the 1999-2000 school year. All three currently preside in the Student Senate.

Running for the office of external vice president are: Forrest Duke,

Ashlee Thames, Hollye Hodges and Cassius Johnson.

Candidates for internal vice president include Nicki Pollard, Loren Bell and Carey Evans.

In addition to executive positions, students also will elect senators from individual colleges, as well as senators-at-large from the entire student body in the March 4 election.

Burns said the number of students registered to run for senators from the College of Arts and Sciences

decreased this year.

The number of candidates running from the College of Business increased dramatically, Burns said.

"This is the first time that I am aware of where there are more students running from the College of Business than from Arts and Sciences," Burns said.

Internal Vice President of the SGA Ryan Lunsford said a committee is currently researching the feasibility of moving the elections online, allow-

ing students to vote for SGA representatives through a web site.

Burns said, if implemented, online voting would continue for about a week, instead of the traditional one day. One polling place on campus would remain for students without access to the internet.

SGA election codes can only be changed through a motion of the senate, and Burns said few changes in the election process are expected for this year.

Faculty advisers recognized

By Gretchen Verry
Staff Writer

Texas Tech's Leadership Tech Advisory Committee and Student Organizations Services sponsored a reception Wednesday to recognize student organization faculty advisers.

Vice Provost James Brink delivered the keynote speech, addressing the role of the student organization adviser.

"I've been speaking with alumni, and they recognize that it's an important connection that the faculty makes with students outside of class," Brink said. "Ninety percent of the role of an adviser is simply being there, showing the students that you care about them. The other 10 percent is being a role model for these students."

Brink also spoke of a student satisfaction survey conducted by the Dean of Students Office.

"By the statistics, students are very

satisfied with our university," Brink said.

"It is the role of a faculty adviser to speak with students a little bit more about what a complete university experience is and help students to develop a wider range of experiences during their college career."

Brink said this can be achieved through more involvement in cultural activities and University Center programs.

According to the 1998 survey of Tech freshmen, 63.7 percent of respondents have never attended UC programs, and 8 percent are involved in multicultural organizations.

The survey also showed 88 percent of respondents feel they 'fit well'

at Tech, and 73.4 percent spend at least one hour per week involved in extra-curricular activities.

This is the third year for the event. Assistant Coordinator of Student Activities Leann Elkins spoke of the importance of the event.

"By hosting this event, we are trying to recognize and appreciate the advisers of student organizations for their time and effort," Elkins said.

Faculty members and students representing various organizations on campus attended the hour-long event.

Feb. 26 is the deadline to submit student nominations for Leadership Tech, the organization sponsoring the event.

“By the statistics, students are very satisfied with our university.”

Texas Tech vice provost

Tech answers PETA allegations

PETA from page 1

Professional agency, not by Texas Tech," Sweazy said.

Tech's press release said the white-tail deer were placed in a 56,000 square foot study area and had plenty of room to move about as they would in the wild. The area was divided into two areas, one treated with a pesticide to remove the imported fire ant and the other left untreated.

Tech researchers claim no fire ants were placed on deer or fawns and the animals only experienced levels of fire ants which naturally occur in the wild. After one year, researchers observed no deaths of deer due to fire ants and few deer were stung.

"Researchers want to deter-

mine if the fire ant has any impact on fawns or if the deer move about more frequently to escape the ants and inadvertently make themselves prey to other predators, such as coyotes, bobcats, or (mountain) lions," Sweazy said.

In the bobwhite quail research, Tech officials protected individual nests with a pesticide that did not harm the quail.

Researchers determined the chicks survival rate was 38 percent higher than the rate for quail in unprotected nests.

State and national chapters of The Wildlife Society recognized the study as an outstanding research project.

John McGlone, Tech's Animal Care and Use Committee chairman, said the research was conducted correctly.

"When the university received the letter from PETA, we launched a professional investigation of the work," McGlone said.

"We have to make assessments in the areas of the scientific merit of the research, the technical conduct of the work, the well-being of the animals...all those individual criteria were found to be satisfactory."

"They pulled individual pieces of information to make a story that paints a negative picture when in fact the picture is very positive," McGlone said.

Wood said he is encouraged by the public's response and is hopeful about putting an end to the research.

"Protests are not out of the question," Wood said.

Montford speaks to Faculty Senate

By Ginger Pope
Staff Writer

Texas Tech Chancellor John Montford told the Faculty Senate possible renovations to Jones Stadium are not taking a precedence to academic needs.

At the meeting Wednesday, Sen. Lelaine Dornier, associate professor for health and recreation, asked Montford about the \$50 million Jones Stadium renovation proposal expected to go before the Tech Board of Regents Friday.

The proposed budget for the stadium includes \$10 million from donations and the remaining money from private funds and revenue bond proceeds.

Montford does not think this project would take away from academics and said quality sports facilities are important to competing in the Big 12.

"Normally people who give to athletics are not inclined to give to academic. No state appropriations money will be used," Montford said.

Montford also said athletic games on television provide some of the best advertisement spots to promote Tech academics.

Sen. Kimberly Boal, associate professor in business administration, asked about Tech standings as a research institute and within the state legislature.

Montford said he and other administrators are continuing to strive to get Tech known as a Tier 1-level research institute.

His ideas leading to a Tier 1 institute include offering a better faculty to student ratio, cooperating with other universities and lobbying for more research dollars from the state and federal legislature.

Montford wants to gain more attention within the Texas govern-

ment. He also wants to focus on getting dollars from the state government surplus.

"We were not mentioned in the governor's address, but we have been mentioned in the House and Senate. We'll be in Austin a lot, and we'll be in Washington (D.C.) a lot," he said.

Montford apologized to faculty senators for problems with student financial aid and said there will be an investigation as to what caused the problem.

"This should not have happened and must not ever happen again. There was so much finger pointing that I decided to take the responsibility," he said.

In other business, senators approved a nominations committee and will begin taking nominations for next year's faculty senators. Voting on senators could take place about March or April.

READER'S CHOICE AWARDS

The Readers Choice Awards are a fun spring promotion sponsored by *The University Daily*. Tell us your opinion of what you think are the best things about Lubbock by filling out the ballot. The most popular answers will be tabulated and published in a special section on Friday, April 23.

The rules are easy...Follow them and your vote will count!

1. Entries must be clearly printed or typed. To be counted, ballots must include name, address, phone & student ID number (SSN) of the person submitting the ballot.
2. Entries become property of *The UD* which reserves the right to publish ballot answers & comments.
3. Final decisions on ballots, categories & winning entries will be made by *The UD*.
4. Ballots must be filled out completely.

Colleges benefit from new building

By Melody Ragland
Staff Writer

As ground was broken for Texas Tech's English/Philosophy/Education Complex on Wednesday, a dream became a reality for the College of Education.

Interim Dean Larry Hovey said there never has been a College of Education building.

"It's deserved for the quality faculty, students and staff we have," Hovey said.

He said while the college will relocate, at this time there are no plans to begin any new academic programs.

"Many programs have grown outside of campus," Hovey said.

"Many of the current programs will continue to expand."

The college has begun a campaign to name parts of the building.

The Sitton-Burkhart Literature Collection Room was the first room named in the college.

The campaign will help commemorate what donors have given to the college.

"They've put so much planning into it, it just couldn't be a failure," said Jo Powell, receptionist in the college.

The new building also will come with new furnishings.

Hovey said classrooms, lecture halls, the student lounge and some offices will receive new furniture.

He said furniture in the current faculty offices will be moved to the new building.

"It will be great to have good classrooms to teach in," said Richard Lanthier, assistant professor of educational psychology and

leadership. Many of the students, faculty and staff attended the

groundbreaking.

Assistant professor Julie Thomas said she is thrilled about the space the new building will have.

She said she does not have enough space for her research assistants and four people share one office and one computer.

Jennifer Parrott, a senior elementary education from Odessa, said the new building is good because Tech does not get the recognition they deserve.

"I think it's wonderful," Parrott said.

"I want to come back and teach here."

Amanda Clark, a senior elementary education major from Levelland, said she is really excited the college is getting such a wonderful facility.

“Many programs have grown outside of campus.”

Larry Hovey
interim dean

Board of Regents begins meeting today in Dallas

Texas Tech Board of Regents will begin meeting today in Dallas considering \$50 million of renovations to Jones Stadium, renovations to West Hall and plans for a pedestrian mall plaza.

Besides construction proposals, regents also will look at appointing an additional investment manager and a possible amendment for Tech's debt management.

Regents decided to meet in Dallas to help promote the university in the area, said Cindy Rugeley, associate vice chancellor for Tech News and Information.

There are about 24,000 alumni

in the Dallas area and many Tech students enrolled are from the area, she said.

"Some people forget that Tech is a university for the whole state of Texas," Rugeley said. "We want to go there and remind people we're here."

The meeting will adjourn Friday.

Dartmouth ends single sex clubs

HANOVER, N.H. (AP) — Dartmouth College, the school that inspired "Animal House," plans to put an end to single-sex fraternities and sororities to foster more "respectful relations" between the sexes. Dartmouth students were in an uproar Wednesday over the plan.

"This was like a bomb," said Misha Rosoff, 23, rush chairman at Sigma Alpha Epsilon. "Everyone sort of assumed that the trustees would try to get rid of the Greek system, but this came with no warning."

Officials at the Ivy League school refused to say whether the plan means requiring fraternities and sororities to go coed or phasing them out altogether, but college President James Wright said it will be the biggest change in social life at Dartmouth since women were admitted in 1972. The move, announced in a letter to students, is aimed at encouraging "respectful relations between women and men." College administrators said they are concerned about problem drinking and the social fragmentation that sometimes accompanies the Greek system.

The college did not say specifically when the changes would be put into effect. The details are to be worked out in consultation with students and backed with tens of millions of dollars for construction of new housing, dining and social areas to replace the Greek houses.

POLICE BLOTTER

University Police Department • Texas Tech University

Feb. 1

- 10:52 a.m. Officers investigated a hit and run accident with no injuries in the United Spirit Arena construction site.
- 2:24 p.m. Officers investigated harassment which occurred at the Red Raider Club.
- 2:27 p.m. Officers investigated burglary of a motor vehicle, which occurred in the Z1-C parking lot.
- 4:08 p.m. Officers responded to a 911 medical emergency call, which occurred in 201 of the architecture building. A staff member fainted while teaching a class and was transported to St. Mary's Hospital.
- 4:44 p.m. Officers investigated a traffic accident without injuries, which occurred in the 3300 block of Main Street.
- 9:10 p.m. Officers investigated a traffic accident, which occurred in the entrance to the R-15 parking lot.

Feb. 2

- 12:20 p.m. Officers investigated a hit and run accident without injuries, which occurred in the C-1 north parking lot.

- 12:34 p.m. Officers responded to a medical call in the business administration building. A student fell and injured her hand.
- 5:05 p.m. Officers arrested a student at the University Center for public intoxication.
- 8:45 p.m. Officers arrested a student for outstanding Dallas Sheriff's Office warrants following a traffic stop in the 1400 block of Flint Avenue.

Feb. 3

- 3:14 a.m. Officers responded to an emergency medical call in 202 of the Student Recreation Center.
- 4:50 a.m. Officers investigated an aggravated kidnapping, which occurred in the R-7 parking lot.
- 8:45 a.m. Officers investigated criminal mischief, which occurred in 1C282 of the Health Sciences Center.

The United States Marine Corps Officer Programs has guaranteed ground, law and flight contracts available. Program is open to all qualified men and women (freshmen-graduate).

These are not ROTC programs. All training is conducted during the summer, and there are no classes or uniforms required while at school.

There is no obligation. If, after the summer training you should decide that the Marine Corps is not for you, you may cancel your enrollment at any time.

College credit and financial aid available.

Starting salaries range from \$28-\$30k.

Captain Springer will be on campus March 3. If you think you're up to the challenge, call (505)248-5284 for appointment, or stop by and see him in the Student Union.

VIEWPOINTS

Input needed on Campus Master Plan

When contractors, carpenters, plumbers and other skilled workers put their time and effort into building a house, they don't just plan how the house will look as they go.

Andrew Schoppe
Columnist

The owners of the home tell them what they want their house to be like and share their thoughts with the experts so anything that could be a bit impractical can be altered to the owner's liking.

Can you imagine what would happen if a couple simply purchased a plot of land, called a contractor and without giving the contractor any idea what they wanted the house to be like, said just one thing "Build us a house?"

Nine times out of 10, there would probably be a little bit of disagreement and bubbling tempers when the house was done because the contractor certainly can't read the minds of the couple.

There has to be some input from the couple for things to turn out right. Texas Tech officials have been making several attempts to make a projection of what Tech's future needs will be.

The outcome of their projections is being manifested into the Texas Tech Master Plan.

Everyone at Tech has seen or heard information about the Master Plan, sometimes in a presentation and sometimes in discussion among friends and fellow students.

It is obvious that in about 10 years from now the face of Texas Tech will be quite different than it currently is.

With so many proposed changes, it only seems logical to welcome and want more input from the owners of Texas Tech — the students — so when all is said and done, all parties involved can sit back and be ecstatic about the end result.

At the present moment, the strongest representative voice of the students in issues regarding the Master Plan comes from the elected officials in the Student Government Association. The opinions voiced by the elected officials of the SGA are intended to represent the student body, but sometimes it's a little bit better

to hear the views of students straight from the horse's mouth.

This is why the creation of two student committees made of everyday students from the various colleges on campus should be created to advise the administration and take part in the decision-making process which will determine the final draft of the Master Plan.

Why two committees? Simply put, there is a need for student input not only on the overall Master Plan but also on the campus beautification campaign which is a part of the Master Plan.

Student input on the campus beautification campaign would make it much easier to reach decisions that would be acceptable to students on issues such as the proposed fountains in the center of Memorial Circle.

The administration also would find that by having student committees taking part in these decisions, they will have another avenue to convey their plans to the entire student body.

The students on the committees could write letters to the editor in *The University Daily* in an effort to update the progress being made.

A better informed campus is definitely something that is needed for all of these plans to succeed and be well received.

To this point, the focus of this column has been solely on garnering student support.

Yet, it's also important that the faculty and staff be represented in these decisions if they aren't sufficiently involved in the process already.

The new Staff Senate should consider pushing for committees of staff members to convey their views on these issues before the administration.

Everybody who will be affected by the plans being made for Texas Tech needs to have their comments and views about the Master Plan and the campus beautification campaign heard.

The students, staff, administration and students make up a huge family of Red Raiders.

It's time for all members of the Red Raider family to pull their chairs up to the dinner table so everyone can have a say in the decisions that need to be made.

Andrew Schoppe is a junior broadcast journalism and business management major from Houston.

LETTERS TO THE EDITOR

Racism exists in Hub City, Tech

To the editor: Is racism a problem in Lubbock? Many would say no, but I have a different opinion. The words "gooks," "spicks" and "wetbacks" were yelled out to me and some friends after leaving a party last weekend.

We walked to a party we thought was the right address, and when we found out it was not the right address, we left. We just asked if we were in the right place. While leaving we had bottles thrown at our cars with the words "Get out of here you f—wetbacks." It was me, my friend from India and another buddy from Korea — an ethnically diverse group, I suppose. Now if this does not indicate a tinge of racism in this community, I don't know what does.

This was an address within walking distance from campus. It is not like this only happens in third-world countries or in Arkansas. It is just down the street. They were aiming for our cars and laughing. When we got

home, it really made me think. Could Lubbock have a racism problem?

I thought about the incident concerning the case against Lubbock by the Hampton coach, which Johnny Cochran will represent, and the overall atmosphere of the campus. Here are my thoughts.

I am a 20-year-old Hispanic male junior biology major, and I come from a predominantly Hispanic community. When I was looking over schools to attend, I noticed that Tech had a large white population. That did not bother me at the time. I never thought the racial difference would bother me. After I got here, I found it was going to be more different than I had anticipated. I remember sitting in the library looking around, and I would be the only Mexican. It felt awkward then and now. I have noticed the people who hang around together on campus, and it is without a doubt segregated. Even the fraternities are segregated in such a way.

In *The UD* the other day there was an advertisement for a new hispanic fraternity. Nothing against it, I am sure all fraternities intentions are

good, but why segregate? I am not claiming that there is anything that can be done concerning the ethnic ratios in this city. I just want to know why we can not see beyond color. We all come from different backgrounds, but that does not mean that we should segregate because of the cultural diversity. It is more the reason to bind together. I would love to visit my friend's family in India. The experience would be better than any book or show you would read or watch. Many minorities can relate. I am not saying that everyone looks or talks to me differently, but a majority of the people I interact with emit an attitude of superiority or ignorance or presence. Easy solution.

I move to a different school is what you say, but that would be too easy. And, what would change around here? Nothing. I am sure nothing will change for a long time to come, but it should be documented that it is a problem. Maybe Johnny Cochran will win his case against the city of Lubbock. And if he does win, what will that do? I predict absolutely nothing. I guarantee that there is a

different feeling you get when communicating with different ethnicity. You shouldn't even have to think about it. We have goals, aspirations and dreams. These dreams do not consist of black, brown or white but the color of success and happiness, remember that. With that mentality, we wouldn't even have problems like this. So nobody should burn crosses or show posters of Mexicans swimming the Rio with words like "Social Security" in front of the UC. I mean when I am around my friends we joke about camels and elephants in India, but these are my friends. And, they know me. People like those from this weekend have nothing to discriminate us with besides the color of our skin. I will probably buy my coffee from these people on my way to the office someday. Maybe one day, the words "racism prejudice, discrimination, stereo type" would yield questions like "What does that mean?" One day.

Key to life: simplify, students still have time to grow

Thomas D. Tucker
Columnist

Remember grade school when you played with blocks, and the single most important thing in your life seemed to be getting home in time for afternoon cartoons?

What do you think about when you look back at your life? How do you remember the world as it was when you were young?

As we students grow up and mature in college, things get a lot more complicated. The onset of being self-supportive and acting like an adult hits pretty hard after we have been in college for a while. Now, we have credit card bills, part/full time jobs and all kinds of classes and assignments to keep up with. Everything seems kind of jumbled and confusing. Many of us go out and get planners and try to organize our lives so that we can make it through the day-to-day with greater ease. To me, this seems to be complicating things even further. Why don't we just simplify?

The hard, cold truth of the matter is that everything is not nearly as complicated as many people would have us believe. Your future is not imminent, no matter what your parents say. If we start worrying about our futures, getting married, bills and other such nonsense now, how can we expect to ever have the energy to do schoolwork?

The answer to all of this is very easy: simplify. Everyone is telling you to look ahead and prepare for tomorrow. Well, today I am telling you to look back and find where you are first.

Have you ever heard someone babble on and on about something called an inner child? Well, forget that. As I said last week, you are still a child.

This is not a bad thing though. It means that we can still change and make our lives whatever we can dream possible. You see, all of us are children, but we have just complicated our lives way too much way too early with things that

really aren't important. We are like little girls that get caught plastering our faces with mother's make-up, or little boys that get caught wearing daddy's big shoes around the house. Just pause for a moment and think about finger paints, sand boxes and playgrounds. Think for a moment about innocent kisses on the cheek, playing tag, and waking up early every Saturday morning for cartoons.

Remember how you couldn't believe that your older sibling could sleep so late and miss those great cartoons? Now, look inside and answer me this: "how old do you really feel?" This is our time in Neverland; our Goonies time underground looking for pirate ships. Let's take a look at what is really important in our lives: where we came from, and who we once were.

As children, we used to wake up early everyday and be the first one to hug our teachers at school. We loved story time, and we sat enthralled by cartoons. We all

loved to build in the sandboxes, and we always shared the toys. What happened to those days? How much knowledge have we lost by cluttering up everything in our lives with social laws and silly contests of popularity?

One day, we woke up, and it wasn't cool to love your teacher anymore, so we made fun of them.

Then, we stopped reading and started watching daytime dramas and "ER." One day, we all got selfish and started calling things "mine" instead of "ours."

What happened, and did it happen for the better?

I think that perhaps we have all gotten off on the wrong foot as we tried to grow up too quickly. Let's face it, daddy's shoes didn't fit then, and his ideals don't fit now. Our generation has to remember that child-like innocence that we once had before it is too late, and we really have gotten "old." Soon there will be no more Toys-R-Us trips or Peter Pan

flights. What will we have to build the rest of our lives on besides a whole bunch of silly rules that no one understands or can point to the origins of?

So, today, I encourage you, I plead you, to call up that old elementary school teacher, drop by that old high school or look at your old scrapbook.

You can sit under a tree and think about things for a while, or watch an old family movie and laugh your head off. Just for a day, let's all try to remember who we were, who we are and what is really important.

You guys that had easy-bake ovens and you girls that had naked Ken dolls, who cares. You knew how to love then, and you knew how to live. I guarantee that you would probably be happier if you tried to live that way again. Give it a try.

Thomas D. Tucker is a junior general studies major from Midland.

Guest speaker not letting accident slow him down

By Sebastian Kitchen
Staff Writer

No legs. That is no obstacle for Dana Bowman. Bowman lost his legs in army parachuting accident in 1994 when he collided with a teammate. It was a routine training exercise gone wrong. His partner died, and he lost his legs.

Many people would give up activities they participated in, but not Bowman.

"If you have persistence, you can do anything," Bowman said. "It's not the disability, it's the ability."

He continues to make the most of his life.

Bowman will speak of his experiences at 8 p.m. tonight in the University Center Allen Theatre.

Tickets for the event cost \$3 for Texas Tech students and \$6

for all others.

The routine training exercise featured the teammates flying past one another for about a mile, turning 180 degrees and flying back toward each other in a criss-crossing pattern.

Bowman and his partner slammed into each other at a combined speed of 300 miles an hour.

After the collision, Bowman's parachute was released and upon landing on the ground, he was taken to the hospital.

"I had a choice to make," he said.

"I could get out of my wheelchair, or I could stay in my wheelchair."

Nine months later, as a double-amputee, Bowman skydived into his own re-enlistment ceremony.

He was the first double-amputee to re-enlist in the Army.

He recently became the first double-amputee to become a commercial helicopter pilot.

He did not allow the accident to slow him down.

"It sped up my life," Bowman said.

"I did a lot of things before my accident. I do more now."

Some people did not think Bowman could do it

or that he belonged back in the military.

"They looked at me like I had a disease," Bowman said.

"I didn't lose my brain."

He could have taken his disability money and rolled back home to stay.

"If I did that, you would have never heard of me again," he said.

Bowman does not let his accident keep him from enjoying life to the fullest.

"I wasn't ready to give up," he said.

"There's a place for me. There's a place for everybody."

He still manages to water ski, bike, sky dive, scuba dive, go back to college and fly helicopters.

He is a retired Sergeant First Class with the U.S. Army, a Spe-

cial Forces soldier and a member of the Golden Knights Parachute Team.

Recently retired from the Army, Bowman now tours the country sharing his inspirational story and talking to children.

"I can honestly say I am making a difference," Bowman said.

NASA is even helping Bowman with plans for a future attempt to perform the highest skydive ever.

He will be featured on Fox's show "When Good Times Go Bad" Thursday night, when he will jump onto the set during Hollywood's Second Annual "Salute to the Easter Seals" and the movie industry is preparing a film about his life story.

"There's a lot of exciting things going on out there," he said.

Bowman has taken the event that almost claimed his life and turns it into his pastime and passion.

Tech throttles Aggies, 74-52

By Brent Dirks
Staff Writer

The Texas Tech Lady Raiders went back to the familiar one-two punch of Angie Braziel and Rene Hanebutt to help pound Texas A&M 74-52 Wednesday night at the Lubbock Municipal Coliseum.

Braziel scored 25 points and pulled down 10 rebounds, while Hanebutt added 20 points to help the No. 13 Lady Raiders (20-3 overall, 9-2 Big 12) bounce back from their loss to Texas on Saturday.

"Our post players did a really great job of scoring at the beginning of the ball game, which really made them change their defense a little bit ...," said Hanebutt, who was 7-of-12 from the floor and 5-of-9 from three-point land. "That really opened it up for us."

With Tech up only 31-27 at the half, the Lady Raiders caught fire during the early part of the second half to help blow the Aggies (7-14 overall, 2-9 Big 12) away.

The Lady Raiders, or more precisely Hanebutt, went on a massive 21-6 run to start the second half that helped ice the game. Hanebutt, in a seven-minute run, scored 14 points off of four three-pointers and a layup.

"I really got some great looks off picks," Hanebutt said. "Our post players did an unbelievable job of getting me open. The ones that were out there setting picks and getting bruises did a great job of getting me

some good looks."

After Texas A&M tried to slow down the pace of the game in the first stanza, the Lady Raiders were able to up the tempo in the second half and run by the slower Aggie defense.

"We really executed better on both ends of the floor, and we really got after it and ran after them, especially in the second half," Hanebutt said. "We got a lot of fast-break points. They were kind of struggling to matchup on the breaks, and we got some good looks off that. When our post players get out and run like they did tonight, that really puts defenses in a bind."

Earlier in the game, the Lady Raiders had a hard time getting past the Aggies, who are in last place in the Big 12.

Slowing down the pace, Texas A&M was able to storm out to a 12-7 lead with 13:29 left in the first half. Leading the Texas A&M charge was Kera Alexander, who finished with 17 points and 11 rebounds.

Even so, the Lady Raiders were able to slow down one of the conference's top scorers, forward Prissy Sharpe, who finished with 11 points, nine off her average.

But to get back into the game, Tech took it into the inside with Braziel scoring 12 of her points in the first half.

But Texas A&M couldn't withstand the Tech run to start the second half and couldn't mount a comeback to make the game close.

Wade Kennedy/The University Daily
Easy Duce: Tech post Angie Braziel goes for one of her 20 shots during the Lady Raider's 74-52 win over Texas A&M Wednesday night.

Ferrari back for Formula One

MARANELLO, Italy (AP) — Ferrari's boss won't predict where Michael Schumacher will finish in the Formula One standings, but he does guarantee there won't be another heartbreaking defeat at the end of the season.

Schumacher lost the title in the last race in the last two seasons, disappointing anxious fans of the Italian team that hasn't had a champion since Jody Scheckter in 1979.

"I can't promise fans that we are going to win the world championship this year," Ferrari boss Luca di Montezemolo said. "But I can tell our supporters, who have been very patient with us during the bleak years, that we are not going to lose the title once again in the last race."

Schumacher, an idol to Ferrari fans for his aggressive driving and some unexpected wins, lost the title in 1997 after a collision in the European Grand Prix with Jacques Villeneuve, who won the championship for Williams.

Last year, Schumacher lost the title to McLaren's Mika Hakkinen at the Japanese Grand Prix when a rear tire exploded, knocking him out of the race.

Schumacher joined di Montezemolo in refusing to make predictions. He promises nothing beyond intensity when the season starts March 7 in Melbourne, Australia.

"I'm very motivated after being so close to the world title in the last two years," Schumacher said of this year's chances for a title. "I will do my best, but I can't say now if we are going to win."

"For sure we will battle for it, but only tests will say if we are competitive. I'm confident, of course."

Besides the enthusiastic fans, no one is putting any pressure on Schumacher, not even outspoken Gianni Agnelli, honorary chairman of Fiat, Ferrari's parent company.

"He knows that these things can be hoped for, not imposed," Schumacher said.

Schumacher and teammate Eddie Irvine expect a tough challenge from McLaren and a possible rebound of Williams following a disappointing season.

McLaren beat Ferrari last year for the drivers' and manufacturers' titles.

Schumacher said the new Ferrari — 44 pounds lighter than last year with a lower center of gravity and new suspension — is definitely an improvement.

"Reliability and speed should be our winning combination," team manager Jean Todt said.

"I have high hopes that we can be very competitive from the first race of the season in Melbourne."

"I'm also anxious to see McLaren's potential. I'm sure it will be a strong car."

McLaren won nine of 16 races last year, with Hakkinen taking eight and teammate David Coulthard one.

Five of the first six races were won by McLaren, and Schumacher thinks that was the biggest factor in the race for the championship. He's optimistic this time around.

"We do not expect big problems from the new car, but we certainly have little time to solve them should problems arise," he said.

Saints' Ditka undergoes heart tests

NEW ORLEANS (AP) — New Orleans Saints coach Mike Ditka wants to be sure the fluttering of his heart was not an indication of anything more serious than an irregular heartbeat.

Ditka planned to have further tests to follow up on the emergency treatment he received last week.

"I want to get an angiogram, and

then make sure I don't have any blockage," Ditka said.

Ditka, 59, had a heart attack in 1988. A mild electric shock was administered to his heart on Feb. 2.

"It went out of rhythm, and I had to get it shocked back into rhythm," Ditka told Chicago reporters before returning to New Orleans on Wednesday. "But I feel pretty good.

I've been working out every day."

Ditka has also been working every day, Saints general manager Bill Kuharich said.

"That happened last week and he's been in here every day same as always," Kuharich said on Wednesday.

"It hasn't had any affect on him that I can see."

Ditka said the experience of his old friend, Dan Reeves, head coach of the Atlanta Falcons, made him cautious despite his lack of problems. Reeves had quadruple bypass surgery Dec. 14, one day after experiencing unusual sensations in his neck and chest during a game against Ditka and the Saints in the Superdome.

TMA set for spirit shirt sale

The Sports Marketing Committee for The Marketing Association is showing its commitment to Red Raider athletics by sponsoring an "All I Can See is Red and Black" theme for upcoming Texas Tech basketball games.

T-shirts with the aforementioned logo will be sold at cost for \$5 in the University Center by the food court entrance today and Friday.

The "All I Can See is Red and Black" shirts will be worn at the men's basketball game against Kansas at 3 p.m. Saturday and for the Lady Raider game against Missouri at 7 p.m. Both contests will be at the Lubbock Municipal Coliseum.

"We want to get more student involvement in the basketball games and we thought this would be a great way to start," said Cherri Hollis, TMA sports marketing committee chairwoman.

Tennis ready to strike gold against Miners

By Jeff Keller
Staff Writer

After a 10-day break between matches, the Texas Tech women's tennis team (1-2 overall 0-1 Big 12) will take the courts for three matches this weekend.

The first contest will be against Texas-El Paso at 1:30 p.m. today at the Athletic Training Center.

Friday, Tech will take on New Mexico State at 2 p.m. in the ATC, and Sunday the Red Raiders will battle Colorado State at 9 a.m. in the ATC.

The break from match-play gave the Red Raiders a chance to get some much needed practice, said sophomore Zana Zlebnik.

"I think we really benefitted from the break," Zlebnik said. "We worked on areas that needed improvement since our last matches. I think that we are much more confident and prepared than we were 10 days ago. Every individual had their own thing that went bad in our last matches. So we did a lot of individual work."

Tech faced Texas-El Paso a year ago and defeated the Miners 5-4, and that match served as a turning point in the Tech season, said assistant coach Mary Dailey.

"We went out and played well at Texas-El Paso last year," Dailey said. "We did play a lot better after that, and it was a real turning point for our

season."

Tech has managed only two wins against seven losses in doubles action this season, and that has been an area of focus in practice, Dailey said.

"We've been working on doubles, and I am looking to see improvement in doubles this weekend," Dailey said. "Doubles will be key in these three matches coming up."

Junior Amanda Earhart and freshman Ana Serrot have teamed to win the only two doubles matches for Tech this season compiling a 2-1 record in the first three matches.

"This season is the first time we have ever played together," Earhart said of her doubles partner Serrot. "We're really surprised with how we did. But there is still room for improvement, especially with all of our doubles. We need to improve big time."

The spring season is only three matches old, and the Tech team is still getting used to each other. Earhart said the break between matches has helped improve team chemistry.

"I think we weren't used to what each one of us were going to do, and we were nervous about going out on the court last time," Earhart said. "I think now we are used to each other, and our nerves have kind of gone down a little bit."

Wade Kennedy/The University Daily

Follow Through: Tech women's tennis player Zana Zlebnik will help lead the Red Raider tennis squad into action when they take on Texas-El Paso at 1:30 p.m. today at the Athletic Training Center.

Tech escapes Baylor scare

WACO (Special) — The Texas Tech men's basketball team (11-13 overall 3-8 Big 12) snapped its six-game losing streak with a 75-66 defeat of Baylor (6-18 overall 0-11 Big 12) Wednesday night at the Ferrell Center.

Tech outscored the Bears 30-15 in the first 13:27 of the first half, but Baylor scored 16 unanswered points to take a one-point lead with :25 left in the first half.

Guard Stan Bonewitz was fouled on a three-point attempt with :11 left in the half and hit two of the three foul shots to give the Red Raiders a one-point lead at 32-31 going into the locker room.

Tech shot 46 percent from the floor, and Baylor managed a 48 percent shooting percentage in the first half.

Bonewitz started things off on the right foot for Tech in the second half connecting on a three-point shot to give Tech a 35-31 lead.

Baylor would get within one point at 53-52 but could not overtake the Red Raiders as Tech handed the Bears their 11th consecutive loss.

Tech was able to close out the game with a win by going 11-of-12 from the charity stripe over the last 2:32 in the game.

Tech went 25-for-28 from the line for the game and outrebounded the

Bears 39-29.

Center Andy Ellis started his first game as a Red Raider and made the most of his opportunity scoring 16 points and going a perfect 8-for-8 from the free-throw line to help the Red Raiders to victory.

Tech finished the game with a 50 percent shooting percentage and a 61 percent mark from beyond the three-point line.

With the win, the Red Raiders end a six-game losing streak. Tech's last victory came as an 82-68 decision over Texas A&M in Lubbock.

The Red Raiders will next face Kansas at 3 p.m. Saturday at the Lubbock Municipal Coliseum.

Ex-Baylor rusher sentenced

CUERO (AP) — Robert Strait, a record-setting running back in high school who fizzled at Baylor, was sentenced Wednesday to six months in state jail and five years probation for helping undercover officers buy \$40 worth of crack cocaine.

District Judge Joseph P. "Pat" Kelly gave Strait the maximum two years behind bars, but suspended that sentence and ordered the combination of six months and probation. Kelly also ordered Strait, 29, to serve 400 hours community service and to pay a \$4,000 fine plus court costs.

A DeWitt County jury needed just 40 minutes Tuesday to convict Strait of delivery of a controlled substance. He was accused of delivering less than one gram of crack cocaine to

officers on Sept. 18, 1997.

Strait earned multiple all-state honors while rushing for 8,411 yards during his career at Cuero. He helped lead the Gobblers to the 1987 Class 3A state championship.

He never reached expected stardom at Baylor and was suspended from the team before the final game of his senior season for missing a practice. The Cleveland Browns took him in the sixth round of the 1994 NFL draft, but he didn't last very long in training camp.

In June, Strait was among 31 people from DeWitt and Goliad counties arrested on cocaine and marijuana charges as part of Operation Summer Slam.

Prosecutors said Strait met three

undercover agents in a DeWitt County bar and helped them buy crack. Defense attorney Tali Villafranca said Strait had been helping the agents and was charged only after he refused to arrange other sales.

"They abused him and he refused to help them," Villafranca said during closing arguments Tuesday. "So they threw him to the dogs."

Prosecutor Terry Breen said mistakes in the police report had nothing to do with Strait's case.

"The question is not whether the police report is up to snuff," Breen said.

"The question is did this man (Strait) commit the offense. The evidence is overwhelming that he did."
