## WEDNESDAY Tech police thwart car burglary ring

### by Michael Denton

Staff Writer

The Texas Tech Police Department may have foiled what they consider an organized crime ring of car burglaries on campus.

Rojelio Reyes, 18, of Amarillo is a suspect in the crime and was arrested but was released on bail. The police believe Reyes is part of a group of men responsible for at least 11 car burglaries that occurred this weekend in Lubbock and on the Tech campus.

A description of the vehicle being used by

the suspects has been reported. At about 12:58 a.m. Sunday morning, Tech officers noticed a car fitting the description in the Z1-B parking lot near Sneed Residence Hall.

The car, a white Chevrolet Malibu, was spotted with four males in the vehicle backing out of the parking lot slowly.

"Our officers noticed a car that fit the description and at first, just proceeded toward it slowly, and only when the officers turned on their emergency lights did the four suspects bail out of the car and head toward University (Avenue)," said Sgt. Dan Hale, TTPD

public information officer.

Tech officers began on foot in pursuit of the suspects, and Tech dispatch communicated with the Lubbock Police Department for assistance. About 10 minutes later, LPD had one suspect in custody.

"Lubbock police informed us that they had in custody a Hispanic male that reportedly had also ran from them and may be one of the suspects we were looking for," Hale said

Tech police impounded the vehicle the suspects were in and found the trunk and

back seat full of stolen items. The car was believed to be rented from Enterprise Rent-A-Car in Amarillo.

"We have arrested one suspect and are currently working on identifying the other three suspects believed to be part of the crimes," said Billy Lang, TTPD investigator. "We are working on identifying fingerprints found in the suspect's car that may lead to the remaining three.'

Lubbock police said they have located the hotel room in which the men were staying, see BURGLARY p. 2

### STATENEWS ----

### 150-year-old castle damaged by fire, arson suspected

LAKE WORTH (AP) - Investigators suspect arson in a fire that damaged part of a nearly 150-year-old castle the city of Fort Worth owns.

A driver saw flames damaging the front portion of the stone castle around 6:30 a.m. Tuesday.

While the cause of the blaze is undetermined, investigators at the scene suspected arson. The long-abandoned castle, which has been boarded up for many years, often has been a target for vandals.

The castle, parts of which date to the mid-1800s, is on a hill overlooking Lake Worth, the namesake of the suburb in which it sits northwest of downtown Fort Worth. The city of Fort Worth has considered plans to sell the castle.

Lt. Kent Worley of the Fort Worth Fire Department said one firefighter suffered a twisted ankle but no other injuries were reported.

### Tech demolishes Baylor, clinches share of Big 12 Championship by Matt Muench

Staff Writer

he Lady Raiders grabbed their third straight Big 12 Conference trophy after a 105-52 blowout victory against the Baylor Bears on Tuesday at the United Spirit Arena in front of 13,724 fans. The 105 points was a season high for the Lady Raiders.

After the game, the Lady Raiders were all smiles as they hoisted the trophy in the air and cut down the nets.

"I am so proud of this team," Tech coach Marsha Sharp said while addressing the crowd after the game. "Now we can say we are the only ones in the conference to put 'three-peat' on our shirts."

## **NSF** gives **Tech grant** for wheat research

### by Kelsey Walter

Staff Writer

While scientists across the country continue their research on human genetics and cloning, the focus in West Texas has shifted to wheat for the time being.

The National Science Foundation awarded Texas Tech a \$7.4-million grant to help lead a project with the University of California-Davis aimed at studying the different genetics of wheat crop species.

Tech genetics professor Henry Nguyen said the federal government will spend \$50 million on the Planned Genome Research Program this year. Tech's portion of the grant will last for the next four years. He said the amount of the grant could possibly grow to \$100 million in the next few years.

### NATIONALNEWS **Consumer confidence slips**

after record-setting January NEWYORK (AP) - Consumer confidence slipped in February from its record-setting January mark, suggesting rising interest rates and gas prices are taking their toll.

Still, confidence remains high, at levels last seen during the boom of the late 1960s. That suggests consumer spending will continue to fuel U.S. economic growth.

The Conference Board said Tuesday its Consumer Confidence Index dipped to 141.8 in February from 144.7 in January, which was the highest figure in the 33 years the statistic has been kept. The decline was the first since October, but the reading remained above December's 141.7.

The results were lower than the 143 that Wall Street analysts had expected, helping ease worries about inflation. But economists still expect the Federal Reserve to push interest rates higher in March to keep the economy from overheating.

The Dow Jones industrial average closed up 89.66 points at 10,128.31 Tuesday, adding to Monday's gain of more than 176 points.

### WORLDNEWS -Chinese, U.S. military leaders swap warnings over Taiwan

BEIJING (AP) - Seeking to ease tensions over Taiwan, the commander of U.S. Pacific forces warned Chinese military leaders Tuesday that any use of force against the island would be regarded "with grave concern" by Washington, a U.S. official said.

Adm. Dennis Blair's appeal for restraint comes after China stepped up pressure on Taiwan ahead of the island's March 18 presidential election. In a declaration last week, China for the first time said Taiwan risked attack if it indefinitely rebuffed demands for unification talks.

Blair's talks with Chinese Defense Minister Chi Haotian and Gen. Fu Quanyou were aimed at re-establishing contacts between the two militaries that Beijing severed when U.S. warplanes bombed China's embassy in Yugoslavia in May. But Taiwan dominated the talks so much so that other issues were barely discussed.

The Lady Raiders (13-3 Big 12, 24-3 overall) came out with an explosive display of offense, outscoring the Bears (2-14 Big 12, 7-19 overall) 50-21 in the first half of play.

"It feels good, and I'm excited to get another ring," Tech forward Aleah Johnson said. "It is also good that conference play is over, and we can start to prepare for the tournament."

The game marked the last time senior guard Melinda Schmucker-Pharies and forwards Johnson and Keitha Dickerson suited up for a regular season game as Lady Raiders.

Sharp said the seniors were Tech's key to victory all season long.

Schmucker-Pharies continued to add to her all-time Tech assist record, ending the night with 11 assists.

Tech's leading scorer, Johnson, continued to score by putting up a career-high 22 points in 25 minutes.

Big 12 rebounding champion, Dickerson, grabbed 14 rebounds in the contest.

"I can never tell you in three days how much respect I have for these seniors," Sharp said. "They refused to lose and had too much heart to let anyone beat them." The Lady Raiders came out of the

locker room at the start of the second half

hotos by Greg Kreller University Dail

"It is only the beginning," Nguyen said. Tech officials originally submitted the request for the grant about a year ago.

"A genome is the total genetic makeup of a particular species," he said. "In this project, we are trying to name as many species as we can."

Determining what protein does to all the different wheat species is a big part of the study, Nguyen said.

He said wheat plants contain more than five times as much DNA as humans and that more in-depth studying must be done to help scientists understand about the genetic structure of wheat as compared to that of a human.

DNA is a chemical base that makes up different genes.

"Wheat is the second-leading food crop in the world," Nguyen said. "The plant genome project is much smaller, but it is a good start.'

He said wheat is mainly used in this area for making bread.

"A share of the money will be used to hire graduate and undergraduate students to assist in the research," Nguyen said. "It will give students the opportunity to enroll in a major national science project."

He said students could benefit from the project by obtaining knowledge that comes from participating.

The entire sum the NSF award goes to several collaborating institutions around the country including Cornell University, Kansas State University and the University of Minnesota.

## Hutchison set to speak at graduation ceremonies

### by Jennifer Bailey

Staff Writer As May slowly begins to approach, gradu-

ating seniors soon begin their fittings for their cap and gown and will mail out invitations.

This year's graduation ceremony has been scheduled for May 13 and will highlight Texas Tech President Donald Haragan and U.S. Sen. Kay Bailey Hutchison, R-Dallas, as keynote speakers.

a very great honor," Haragan said. "This will probably be my last commencement that I will participate in at Texas Tech, and I feel extremely honored to have been chosen to give one of the commencement addresses." Haragan will step down as president of

Tech in August.

"I consider (speaking at graduation) to be the graduates which is a sort of a mini-commencement speech," Haragan said. "I just think it is a great honor for me as president, and I am looking forward to it very much."

> Haragan will speak at the 9 a.m. ceremony, and Hutchison will speak at the 1:30 p.m. ceremony.

> Dean Trammel, a senior electrical engi-

"I think it is really cool that a senator will be speaking at our graduation," Trammel said.

The ceremony will be the first spring commencement at the United Spirit Arena.

Graduates in the Colleges of Agricultural Sciences and Natural Resources, Business Administration, Education and Human Sciences will attend the 9 a.m. ceremony.

Graduates in the Colleges of Architecture, Arts and Sciences and Engineering will attend the 1:30 p.m. ceremony.

Katie Parks, who was denied admission to Tech in 1939 because of her race, signs copies of her book Tuesday at the Southwest Collection.

"I have been involved in commencement neering major from Houston, said the notofor a lot of years, and as president, I am norriety of a U.S. senator speaking at the gradumally given the honor of giving the charge to ation will be great for Tech. Local author recalls memories in new book

Parks, 70, said she collaborated on the book in hopes of showing the accomplishments of blacks in America. "When I got here in 1939, I kept hearing Greg Kreller/The University [

all the bad things about African Americans," Parks said. "I wanted this book to point out all the positive things blacks have done for

#### society."

"Remember When?" took 10 years for Parks to complete. Death in her family and illnesses caused the book to be delayed.

"When I first started, my husband grew ill and passed away," Parks said. "Then, two years later, my mother died. Then a few years later, I got very sick and didn't know if I would be able to finish.

Parks then asked people to help write a few chapters but remained the primary writer for the 300-page book. Parks said she attributes the finishing of the book to a sense of pride for her culture.

"In the 1920s and the 1930s, blacks had to eat at separate places and sit on the back of

buses," Parks said. "I felt I had to show what African Americans have overcome and maybe get people to look at us differently as a race.'

Parks is no stranger when it comes to trying to convince people; she works at the Outreach Program Wellness Center. In her job at the center, she encourages people with college degrees to pursue careers.

Parks graduated from high school but never received a college degree. Now, she is enrolled in a continuing education program.

"In my work, I find a lot of people who graduate with a degree who don't do anything about it," Parks said. "I want them to get in-

## **Governor appoints Schmidly to task force**

### by A.P. Thompson **StaffWriter**

Gov. George W. Bush may be campaigning out of the state today, but that does not mean his business with Texas, and with Texas Tech, is brushed aside.

Bush recently appointed Tech's David Schmidly, vice president for research and graduate studies, to a task force on conservation.

ored by the whole deal because I'm one of the few people named to the board that work at a public university in

Texas," he said.

Schmidly, who described his research at Tech as dealing with conservation issues along the Texas-Mexico border, said the task force is being formed to find solutions to problems that may plague Texas in the coming years.

"It's my understanding that (the task force) is going to be charged with looking at the management of Texas' natural resources and how

21st century," he said.

Tech President Donald Haragan had nothing but enthusiasm for Schmidly's appointment.

"It's a real feather in our cap at Tech to have him involved in this group," Haragan said.

"He's well known with people who know anything about conservation in Texas, and he's regarded as an expert in that field, so it's natu-

we can face those problems in the ral for him to be on this task force." Haragan said the appointment

should not take time away from Schmidly's duties at Tech.

"This is something that he will be able to do in his own time, and in fact, it is part of his charge and all instructors in general in their service to the university as educators to get involved in things not directly outlined for them," Schmidly said.

## Program links Tech, Lubbock women together

### by Adrienne Gaviglio Staff Writer

In an attempt to help link women on the Texas Tech campus and in the Lubbock community, the Women's Studies Community Connection was created to aid this effort.

The focus of the group is for women in the community to provide a mentoring program with the women on campus while working in accordance the Women's Studies program at Tech.

The Communitity Connection has assisted many women with finding jobs in their field and awarded scholarships for women in the Women's Studies program.

WSCC recently has honored Jane Winer, dean of Arts and Sciences at Tech, for her involvement with the Women's Studies program.

"Most students do not have the opportunity to view firsthand what the real world is like through a mentoring program, and I think that it is a great opportunity that WSCC has given them this opportunity," Winer said. WSCC provides a great connection for the women of Tech and the women in the community, she said.

Women who choose to be involved in the WSCC are welcome to visit any of the Women's Studies classes at Tech, attend all events for the Tech Association for the Advancement of Women in Higher Education and attend the annual conference of the Women Studies Council, said Gwen Sorell, coordinator of the Women's Studies

The researchers found evidence

Several students have been a part of the WSCC mentoring program and have thrived from its help.

Christiana Rhodes, a senior social work major from Waco, was a part of the mentoring program and has received her job as a result of their efforts.

"I started out working with a certified mid-wife from Covenant Health and then was linked with a woman who was a doula (a professional labor support person)," Rhodes said. "I did not think that they would be able to link me with a mid-wife, but they made all efforts to find me one.'

Rhodes now is a certified doula and is working on becoming certified to be a child birth educator.

"Could I have done this all on my own? Maybe. But would I have? Probably not." Rhodes said. "They really helped me make the connections I needed to get the job that I wanted." Rhodes now assists the doula she

mentored under with home births.

## Americorps signing volunteers

### by Pam Smith

Contributing Writer

The Americorps organization is looking for Texas Tech students to enroll in its program for the late summer and fall.

"Americorps is the domestic equivalent of the Peace Corps," said Louise Cumins at the Volunteer Center of Lubbock. "It is a service kind of program where people would have the opportunity to work with young kids."

According to the Web site, the last day to sign up nationally for the October program is March 15, but locally, an interested person needs to apply by September 1.

"I heard about Americorps from a friend who was involved and thought it sounded like a fun thing to do," said Annie Braudt, a sophomore communications major from Lubbock and a member of Americorps since October 1999.

"She loved it, and I loved volunteering. My experience has been amazing. I get to interact with many different groups of people and have many great experiences with the kids."

Americorps places students in either full-time or part-time positions working mainly with children in a variety of different fields. Some of the sites the organization has placed members in Lubbock include the Lubbock Boys and Girls Club, Red Raider Readers at the Tech Health Sciences Center, giving music and art lessons at the Buddy Holly Center, the American Red Cross and Women's Protective Services.

"Members receive training in a variety of different areas — getting along in the work environment, speaking and presentation skills, training in time and stress management and leadership roles that they

may not get working somewhere else," Cummins said.

Along with the job and career skills obtained, members of Americorps also receive a living allowance, benefits and will become eligible for an education award at the end of their one-year tour. The award for a full-time tour (1,700 hours) is \$4,725; for a part-time tour (900 hours), the award is \$2,363. Educational awards can be applied to existing or future student loans or toward the cost of attending a higher education institution.

Cummins said another important benefit members take from the program is that many of them leave with a more centered view of themselves and what they want to do with their lives.

"Many of the members learn a lot about what they want to do with their lives, whether or not they want to work with kids or with a literacy pro-

gram, etc.," Cummins said.

In order for a person to be eligible for the Americorps program, he or she must be 18 years old, a high school graduate and preferably have some college experience.

However, depending on the specific person, some of these requirements could be substituted.

"So much of the experience is based on attitude and a desire to spend time volunteering," Cummins said. "What we are looking for is people who possess more of a certain level of maturity, rather that having the college experience."

Americorps employs about 40,000 people in more than 500 programs each year in the United States. It is funded by the Corporation of National Service.

For more information about Americorps or for an application, contact Cumins at the Volunteer Center of Lubbock at 747-0551.

ence on Retroviruses and Opportunistic Infections in San Francisco on Feb. I suggests that 7 percent of all primary HIV infections are because of oral sex. **READER ASKS:** I have had two friends die this year while at Tech. I am really feeling down and could use some advice to help me cope.

JO SAYS: Here is a short list of things you can do that might help. Some coping skills include keeping a journal, where you write down your feelings each day. As you continue to work through your feelings, you can go back after a few weeks or a month and see how far you have come in the healing process. Confide in a stranger. Sometimes letting those feelings out to someone you don't know and might never see again helps. Plan things to do that are fun and consider renting funny movies because humor can be very healing. Check with the University Counseling Center in West Hall if you want to talk more about your grief, and most of all, don't bottle up these feelings. You need to get them out.

Jo Henderson is the health education coordinator for Student Health Services.

Drop boxes for Reader's Ask are located in the University Center and Student Health Services in Thompson Hall, or questions can be e-mailed to sthjwh@ ttu.hsc.edu.

TripHub.com

CALGON

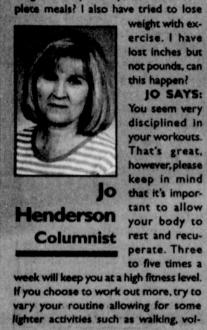

DALLAS (AP) — The parents of two of the four Prairie View A&M students killed in a van crash earlier this month have filed a defects lawsuit against the van's manufacturer, Ford Motor Co.

In a lawsuit filed Monday in Marshall federal court, the families of Samuel Sturns and Jerome Jackson accuse Ford of design and marketing defects in its 15-passenger van, as well as breach of warranty for selling an allegedly defective vehicle.

Ford spokeswoman Susan Krusel, who said she had not seen the lawsuit, would not comment Monday afternoon. However, she said the van model's rollover performance "is as good or better than peer vehicles in its class."

**Reader's Ask** A Service of Texas Tech Student Health Services

READERASKS: I work out everyday doing cardio for about an hour.As long as I keep this up, can I eat com-

leyball, etc. If you have specific questions about exercise, two great sources are the Wellness Center at the Student Recreation Center (742-3828) or the Lifestyle and Weight Management Consultant at Student Health Services (743-2860). Also, be sure to keep up your complete meals to fuel and nourish your active body. As far as the lost inches but not pounds, that can happen. First, celebrate those lost inches and then keep in mind that muscle weighs more than fat.

**READER ASKS:** My husband cracks his knuckles so much that he is now doing it in his sleep, and it is driving me crazy. I told him it would give him arthritis, but he doesn't believe me. Will you tell him because he reads your column?

JO SAYS: Sorry that I can't stand up for you, but knuckle-cracking does not cause arthritis, enlarged joints or any other harm. It can, however, cause some loud battles between spouses that have to sleep with noisy partners. The sound that is waking you up comes from the two opposing bones in the knuckles pulling apart thus creating a vacuum within the joint. A small amount of gas dissolved in the joint fluid is quickly released, forming a bubble that almost instantly collapses and produces the noise. If you want him to quit, try saying "quit" when he starts it up and maybe he will comply in his sleep and all will be quiet. **READERASKS:** I plan to travel south

of the border for Spring Break. Is the old "don't drink the water" advice true or not?

JO SAYS: Don't drink the water! Also, don't brush your teeth or wash your face with the water. Don't put ice in your drink and limit drinking to soft drinks out of a bottle or can (no fountain drinks). Don't drink tea, but coffee is OK if you know the water came to a boil. Don't eat raw veggies or fruit that might have been washed with the local water. You can eat fruit that you peel yourself and cooked veggies. Don't buy anything from a street corner vendor unless it is a bread product. Eat a Pepto Bismol tablet before each meal and one at bedtime not exceeding four tablets in a 24hour period. Finally, if your family is springing for you to go to a really upscale resort and they advertise that the water is potable, then you can drink it. And by the way, do have fun. A pleasant experience improves the function of the body's immune system for three days, the day of the fun and the two days afterward.

READER ASKS: Can you get HIV from performing oral sex?

## Gotcha by the nose, Dubya

h, come now, Gov. Bush. None of us minds a little exaggeration; a little polishing of the positive when it comes to your record here in Texas. But now it's "liar, liar, pants on fire." Your nose is growing, governor.

George W. Bush now is running a television ad around the country that claims: "While Washington was deadlocked, he passed a patients' bill of rights. Under Gov. Bush, Texas enacted some of the most comprehensive patient-protection laws in the nation."

> Excuse me, but if anyone is interested in the truth, George Dubya vetoed the patients' bill of rights in Texas when it was first passed by the legislators in 1995; and when they passed it again, over his opposition, by a veto-proof majority

their patients. Two weeks after his maiden session of the Lege was over, Bush vetoed a bill by Sen. David Sibley, R-Waco. Bush vetoed the Patient Protection Act that would have allowed patients greater freedom in choosing health care providers and allowed doctors more latitude in prescribing treatment.

In 1997, there was a happy harmonic convergence of political forces. Lt. Gov. Bob Bullock (remember, in Texas, the lite guv has more power than the guv) had appointed a special interim committee to study the growing problem of patients being extremely unhappy with their HMOs.

Bullock named Sibley - the only member of the Lege who happens to be both a doctor (oral surgeon) and a lawyer - as chairman of the interim committee. The R's on the committee, most notably Sibley and Sen. Chris Harris of Arlington, led the charge on patient protection.

They took the ball that Bullock handed them and ran with it. They listened to all the witnesses who came to complain about lousy treatment from their HMOs and were out-

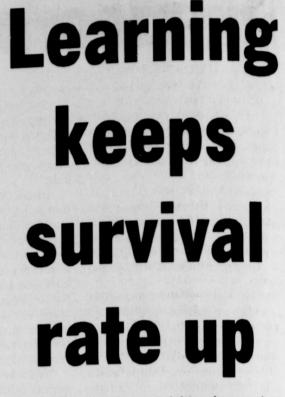

suits would result.

They particularly were frantic about the possibility of legal liability, and they proposed instead that there be an "independent review" of denials of care. Except, naturally, in the HMO version, the review would not have been independent - the HMOs would choose who did the review.

Instead of getting into a bloody battle over legal liability versus "independent review," the reformers said calmly: "Why not do both? We'll take it." And so they did. They put a truly independent review in place to deal with patient complaints - and that has solved almost all the problems - and they put in the option to sue, too. Last time I checked, exactly two lawsuits had been filed in the three vears since.

From state newspapers during that battle: The Dallas Morning News, Feb. 19,

1997: "Steve Montgomery, manager of government affairs for Harris Methodist (HMO), said HMOs still have Gov. George Bush in their corner but are not counting on his sup-

Thy should you read this column today? Because breast cancer is the most common form of cancer among women and more women die of breast cancer than any other cancer except lung cancer.

In 2000, the American Cancer Society estimates that 182,800 new cases of breast cancer will be diagnosed in the United States, and 40,800 women will die of the cancer.

With occurrence and death rates this high. breast cancer should be of interest to all women. Some risk factors are not under our control. For instance, women with first-degree relatives (sister, mother, daughter) with breast cancer are two times more likely of developing the disease. Other risk factors out of our control are age of first menstruation (higher risks for those starting before 12) and age of menopause (higher risk for those starting after 50).

Race is another risk fac-

tor. White women are more

than blacks, and both of

these groups are more likely

to have it than Asian and

Hispanic women. However,

and unfortunately, accord-

ing to a recent study, black

women are 67 percent more

likely to die of cancer than

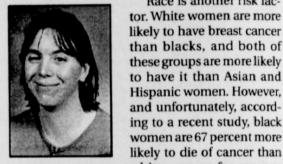

white women for reasons

that are unclear but prob-

ably include socioeconomic

status that controls access to

mammograms and treat-

### Heather Sehmel Columnist

ment, as well as cultural reasons. The result is that breast cancer is the leading cause of cancer death among black women.

One the other hand, risk factors we can control include alcohol use, weight and exercise. Alcohol use, for example, is linked to breast cancer, with women having two to five drinks a day being about 1-1/2 times more likely to have breast can cer than non-drinkers.

without his signature Columnist because a veto wouldn't hold.

He never even signed the patients' bill of rights, and you can look it up. Claiming that "he passed" or "delivered" the patients' bill of rights is turning the truth on its head.

Let us return to those thrilling days of yesteryear in the 74th and 75th sessions of the Texas Lege.

As you recall, Bush's sole legitimate claim to be a "reformer with results" rests entirely on "tort reform," if you happen to consider that reform.

The package of bills called "tort reform" passed in 1995 with Bush's strong support, makes it much, much more difficult to sue corporations for almost any variety of misfeasance, malfeasance or nonfeasance. Of course, Bush was opposed to letting patients sue HMOs. As he said repeatedly, he wanted "to make sure we don't create more reasons for lawsuits."

The first version of the patients' bill of rights passed in 1995 for the following quaint reason: In Texas, the doctors' lobby has more clout than the health-insurance lobby.

The doctors were unhappy with HMOs, both on their own behalf and on behalf of

Bravo

The interim committee drafted six pieces of legislation that came to be called the patients' bill of rights. The most controversial was holding HMOs legally responsible for injuries caused if they deny or delay payment for needed medical treatment.

The other parts of the package were: - A report card allowing consumers to compare health-care plans.

- Repeal of the "gag rules" so that doctors can freely inform patients of treatment options without fear of reprisals from the HMOs.

More stringent protection for the confidentiality of patient records.

Requiring that managed-care officials who decide what care would be covered must be licensed physicians, nurses or physician's assistants.

- Prohibition of retaliation against patients or doctors who file reasonable complaints.

Calls for a "prudent layperson" definition of emergency care.

Terms stating that patients could not be forced to pay for services that are covered under a plan, even if the HMO fails to pay.

Of course, the HMOs all screamed and yelled and claimed that costs would go through the ceiling and that floods of lawport since he has not taken an official stance on the issue.'

- Austin American-Statesman, May 11: "A battle over lawsuits against managed-care organizations for treatment decisions that harm patients has prompted two Republican lawmakers (Sibley and Harris) to take on GOP Gov. George W. Bush's office. ... Bush has supported the idea of an independent review of the insurers' decisions. But a proposal to establish such a procedure was voted down 120-21 in the House. ...

"Republican Sens. David Sibley of Waco and Chris Harris of Arlington accused a Bush staffer of working against the bill when an effort to win final approval for it was sidetracked Saturday. 'I can't make some staff member in the governor's office happy, and I can't make them happy no matter what I do, unless I completely gut the bill,' said Sibley. ...

"Vance McMahon, Bush's policy director, has been dealing with lawmakers on the issue and represents Bush's wishes, said Bush spokeswoman Karen Hughes. 'The governor is concerned about opening a Pandora's box of new lawsuits,' Hughes said. ... Hughes said Bush hasn't decided whether he would sign or veto the bill if it reaches his desk.

And this is the guy now claiming he "passed" the patients' bill of rights?

Molly Ivins is a columnist for the Fort Worth Star-Telegram.

Being overweight also is linked to breast cancer rate, but in complex ways. A new study suggests that women who have more fat in their abdominal area are at a higher risk for breast cancer. More specifically, women with waistlines more than 36 inches have a 34 percent greater risk than those with waistlines of 28 and below. The good news is fat in the hips and thighs does not significantly raise breast cancer risk. Other good (or bad) news is that waist fat is a higher risk in post-menopausal women.

Finally, exercise lowers breast cancer risk, both when women are young and as they grow older.

On a side note, although recent Internet rumors indicate that underwire bras and underarm antiperspirants may contribute to breast cancer, the ACS states there is no evidence to support this information.

Most college women do not need to worry excessively about developing breast cancer, since the majority (more than 75 percent) of women diagnosed are more than 50 years old. Still, some of the risk factors are things that we can tackle now. For instance, college women can exercise, maintain a healthy weight for their body type, as recommended by health care professionals, and avoid alcohol.

Furthermore, since more than 70 percent of breast cancer cases occur in women with no known risk factors, we can all become familiar with our bodies so that we can join the effort to diagnose breast cancer early. After 40, the ACS suggests women have a mammogram annually. Between 20 and 39, it is suggested that women have a clinical breast examination with a health professional every three years. The North American Breast Cancer Organization recommends that women more than 20 years of age have a clinical exam every year.

The ACS also recommends that after 20, women should perform a self-breast examination every month. NABCO and the ACS agree that starting at age 20, women should be familiar with their breasts so that they will be likely to notice changes such as lumps, swelling or thickening of the breast or underarm tissue, skin irritation, nipple pain or retraction, redness, dimpling, puckering, itch or rash on the nipple, scaling of the nipple, discharges from the nipple, sores that do not heal and other unusual pains or changes in the skin, size or shape of the breast. You can learn how to do a self-breast exam by asking your health care provider at your next appointment.

If you detect any of these changes, you should see a health professional. The good news, however, is that the majority of these symptoms are not cancerous. In fact, more than 80 percent of removed lumps are benign, and most nipple changes and discharges are not because of cancer.

In the event that a symptom is cancerous, most women will have an operation to remove some lymph nodes and the cancer, but not the breast, followed by radiation therapy and often also chemotherapy or hormone therapy. Women diagnosed with the disease early have a five-year survival rate of 97 percent.

## Six-year-old boy fatally shoots schoolmate

MOUNT MORRIS TOWNSHIP, Mich. (AP) - A 6-year-old boy pulled a gun from his pants and shot a little girl to death Tuesday in front of their horrified first-grade teacher and classmates. One child said the boy loaded the gun with a single bullet and opened fire after the girl yelled at him for spitting on her desk.

"I don't like you," the boy was quoted as telling 6-year-old Kayla Rolland, who was struck in the neck and died a half-hour later.

The boy, whose name was not released, was taken into the custody of the state child welfare agency after the shooting at Buell Elementary near Flint, 60 miles from Detroit.

It was the latest in a series of school shootings around this country - this one made especially disturbing by the age of the youngsters.

Prosecutors did not say how they think the boy got the .32-caliber gun, though they said it had been reported

stolen in December and was in the boy's home.

Genesee County Prosecutor Arthur A. Busch said there may have been "some sort of scuffle or quarrel on the playground" between the boy and girl a day earlier.

However, a classmate, 6-year-old Haili Durbin, told The Associated Press that Kayla had yelled at the boy because he spit on her desk and stood up on it. She said the class was getting ready to go to the library when the shooting occurred shortly afterward.

"He was pointing it at me then at Kayla and it went into her," Haili said in an interview with her father present. "He said, 'I don't like you.""

Haili said the bullet was in the boy's pocket and that she heard another boy tell him to put it in the gun.

She said the boy who shot Kayla "spit on people, he hit people and cursed and stuck up his middle finger." She said the boy didn't like Kayla

"Obviously, he has done a very terrible thing today, but legally, he can't be held criminally responsible."

### **Arthur Busch**

### **Genesee County prosecutor**

and can't form an intent to kill. Obviously, he has done a very terrible thing today, but legally, he can't be held criminally responsible," the prosecutor said. "We will get to the bottom of how that gun got into that little boy's hands."

The boy is by far the youngest gunman in a series of deadly school shootings that have rocked communities around the country over the past three years. In 1998, two boys, 11 and 13, opened fire at a middle school

in Jonesboro, Ark., killing four girls and a teacher.

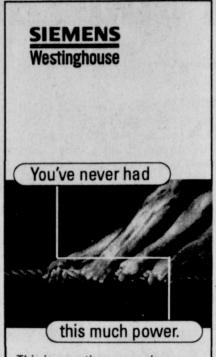

"Where does it stop? First-graders shooting first-graders. The culture of violence is manifesting itself here with what occurred," said Sam Riddle, a spokesman for the family of Isaiah Shoels, who was among 12 students killed by teen-age gunmen Dylan Klebold and Eric Harris in their attack on Columbine High School in April. Riddle grew up in Flint.

At Buell Elementary, Freddie Booth arrived after the shooting to look for his 8-year-old daughter, Fredricka.

"I don't believe this is happening," Booth told The Flint Journal. "A firstgrader shoots another first-grader. First-graders shouldn't be able to get a gun. I just want my daughter out of here. She has been traumatized, I'm sure."

About 500 children attend Buell Elementary, which is in an area of neat, small single-family homes.

Other parts of the Flint suburb, which has a population of about 25,300, are more run-down, with dilapidated homes and boarded-up storefronts.

This is your time, your chance to pull ahead. You've never had this much power before. Here's how you can make the most of it ...

## Fund-raiser keeps station on air

### by Amy Curry Staff Writer

TXT-TV, Lubbock's Public Broadcasting System affiliate, is conducting its annual fund-raiser, "Festival 2000." The fund-raiser will remain on air until March 12.

This year's theme, "If PBS Doesn't Do It, Who Will? And We Can't Do It Without Your Support," encourages viewers to call and make a monetary pledge.

Tim Chambers, director of TV Development at KTXT-TV, said the station's goal for "Festival 2000" is \$100,000. In 3-1/2 days, however, the station already has raised more than \$14,000.

"The money that we generate goes toward the programming we purchase," Chambers said. "It costs \$170,000 to \$195,000 a year for programming. We do the fund-raiser to call attention to the viewers because they are the ones who make our programming possible."

During its 16 days of on-air fundraising, the station will include musical specials from Garth Brooks and Clint Black on Austin City Limits; Paul McCartney's Working Classical; and Steely Dan: In the Spotlight.

Unlike other local television stations, KTXT-TV does not allow commercials. Local businesses only can purchase 15-second underwriting spots.

Since KTXT-TV operates solely off of fund-raisers and donations, Leslie McRae, a senior telecommunications major and KTXT-TV intern from Midland, said student services at the station are a vital part in keeping the sta-

Joe Mays/The University D.

Alfonso Guzman, a junior pre-medical major from El Paso, and Xavier Rangel, an exercise and sports science major from Lubbock, help answer phones at the KTXT-TV phone-a-thon. Student volunteers are vital to keeping the station on air.

students," he said.

tion up and running.

"It helps when Tech students can volunteer their time at the station for free," she said. "Fund-raisers and volunteers are very important because they help get money so that we can continue to have good programming on PBS.

Chambers said the station moved up the two-week event so it would not conflict with the NCAA basketball tournament or Spring Break.

"We wanted to be able to involve

filiated with PBS until 1969, the sta-Student volunteers engage in a tion has been on air and a part of conglomeration of activities that are Texas Tech since 1962.

Chambers said the station, with the help of its fund-raisers and student volunteers, has been able to maintain quality television programming for more than three decades.

"Public television is a unique cultural and educational resource that can never be replaced by commercial television, neither broadcast or cable," he said.

### **StaffWriter** Ahn Trio, made up of three sisters from the Juilliard School of Music, will perform at 8 p.m. Thursday in the University Center Allen Theatre. The threesome has entertained

Ahn Trio to present

diverse array of talent

audiences in Chicago, Singapore and Moscow, among many other places. From their birthplace in Seoul, South Korea, to CD labels in the states, Lucia, Maria and Angella have distinguished themselves from many other groups with their unique style and authentic talent.

by Alicia Field

The Tech Student Activities Board has been planning for this event for a year.

Joey Taylor, fine arts chairman, said this particular event will be an asset to Tech students because of the wide variety of music styles the trio will be presenting. He also said, since the number of instruments is limited to three, students will be able to take in the performance at a more intimate level.

"We want to bring a diverse array of shows to meet all students' needs," Taylor said.

Ahn Trio has won many distinguished awards such as the Kentucky Colonels Award (previously won by the late Bing Crosby) and the high German recording distinction, the ECHO award.

The sisters also have been recognized in Vogue, The New York

Wednesday, March 1, 2000

Times, The Washington Post, TIME Magazine and GQ, to name a few.

AHNTRIO · Courtesy Photo

Future destinations for the trio include New York, Stanford and Columbia Universities.

"They want to change the image of classical music for students," Taylor said.

Sara Birdwell, fine arts committee member, said Ahn Trio represents the best of classical music with new-age style.

Tickets can be purchased at the door, at the UC ticket booth and at all Select-A-Seat locations.

Tickets cost \$6 with a Tech ID, with a limit of two per ID, and \$12 for the general public.

Additional information can be found at www.ahntrio.com or by calling Student Activities Board at 742-3621.

### 'Multimillionaire' bride criticized

YORK (AP) — The woman whose televised wedding on "Who Wants to Marry a Multimillionaire" is headed for annulment is being criticized for claiming that she is a GulfWar veteran. Darva Conger, who served in the Air Force as a medical services spe-

cialist, wed Rick Rockwell on the Fox television special Feb. 15 after Rockwell picked her from among 50 contestants.

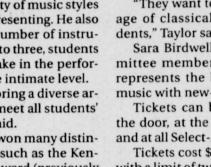

She later said she participated in the show on a lark and wanted out of the marriage.

### People News

### Production loses battle to film on Sunday

BURGAW, N.C. (AP) - Hollywood ran smack into the Bible Belt, and Hollywood lost. Town commissioners rejected a request to film part of "The Angel

Doll" downtown on a Sunday. It's unclear whether the filmmakers will switch locations.

Based on the 1996 novel by North Carolina native Jerry Bledsoe, the movie is the story of a 10-year-old boy who wants to buy an angel doll for his 4-year-old sister during the polio epidemic of the early 1950s. Filming began Friday in Wilmington, where most of the movie will be shot.

Film production manager Ron Servicky had asked for a waiver of the company's permit from the small town of Burgaw that forbids shooting on Sundays.

Servicky said the film has a \$1.2-million budget, and forcing the production to shoot on a different day of the week could add \$20,000 to the cost.

But Commissioner Gene Brown said the town clearly opposed the request.

"All the people I've talked to say they don't want any movies filmed on Sundays, period," he said.

The film, directed by Alexander Johnston, stars Betsy Brantley, Pat Hingle and Diana Scarwid.

### Prince visits city ravaged by gang wars

KINGSTON, Jamaica (AP) - Thousands of residents of poor neighborhoods torn apart by gang wars last year welcomed Britain's Prince Charles on Tuesday, and he joined in the spirit by sporting fake dreadlocks.

Charles visited Trench Town, the neighborhood of late reggae legend Bob Marley, and was greeted by Marley's widow, Rita, and former bandmate Bunny Wailer.

More than 2,000 people gathered to catch a glimpse.

Marley gave Charles a red, yellow and green Rastafarian knit hat with false dreadlocks, and the prince put it on.

"I'll tell you who would really love that - my children," Charles said.

Marley said her husband would have been amazed by the royal visit to the neighborhood.

"Boy, he'd burn a spliff to this — a big, big spliff," she said, referring to the slang for a marijuana cigarette. "Rastafari lives!"

Followers of the Rastafari religion, which has its roots in Jamaica, consider marijuana a holy herb.

### Dion suing *Enquirer* for false claims

LOS ANGELES (AP) - Celine Dion is suing the National Enquirer for \$20 million over the tabloid's claims that she's pregnant with twins.

Citing "a source who knows Celine," the Enquirer's Feb. 1 story on the pop singer said she was "overjoyed her greatest dream has come true." Its cover sported a photo of Dion with the headline: "Celine ----I'm pregnant with twins!'

"The story is absolutely false," said Martin Singer, her lawyer. He said no one had attempted to verify the story with Dion or her publicist before it appeared.

Singer read a statement from Dion in which she told of being repeatedly congratulated on the reported pregnancy.

"I only wish it was true, and I hope and pray that some day it will be," she said.

The Superior Court lawsuit, filed Monday, accuses the tabloid of invasion of privacy, unfair business practices and intentional infliction of emotional distress.

In a statement released Tuesday, the Enquirer said it "will vigorously defend" the article.

"Ms. Dion's efforts to become pregnant have been the subject of widespread publicity, much of it created by Ms. Dion herself," the statement said. "The Enquirer has every reason to believe that, at the time it published the story now at issue, Ms. Dion had succeeded."

## **Events show 'power' of music**

### by Eric Shaw **Contributing Writer**

The power is in the music. More than 200 people came together Tuesday night to celebrate Black History Month through mu-

sic. The program, Exousia, which means "power" in Greek, featured a variety of Texas Tech song and dance groups.

"Our whole purpose is to celebrate," said Diedra Hader, complex director for Horn/Knapp Residence Complex and Doak Residence Hall. "The power of music has been phenomenal."

Different forms of song and dance, such as a step show, was performed by sororities and fraternities Omega Psi Phi, Alpha Phi Alpha, Alpha Kappa Alpha and Delta Sigma Theta.

Each organization also gave a brief history of its founding and what it represents.

Krystil Smith, a sophomore public relations and marketing major from Houston, said music has been important to blacks since they first came to America.

"(Music) has been a form of expressing ourselves and something that we still hold onto," she said.

"The variety of different music that African Americans have started in this country is still as perpetual today to America as apple pie."

Zelvis Applin, program coordinator of Exousia and a senior music major from Houston, said he hopes students learned something from his performance of "I Believe in You," a song he wrote his freshman year.

"I want students to use their mind to be creative," he said. "Whatever you put your mind to, you can do it if you believe it."

Men of God, a performance group, presented a group of skits

Woman's bra leads police to drug-

### filled compartment ENON, Ohio (AP) - A magnet

hidden in a woman's bra led state troopers to 22 pounds of cocaine hidden in a van.

The State Highway Patrol said the an had been stopped for a traffic

called "A Walk Through History." Each skit depicted the actions of different black leaders, such as Rosa Parks

Essence, a dance group, and the Visions of Light Gospel Choir were among other groups who helped celebrate Black History Month.

Music is one of our most powerful ways of expression, Applin said. "A lot of our inner feelings are expressed through our movements

and words," he said. "It's awareness for blacks and whites, and it's a celebration of culture.'

Applin said he hopes Exousia can become an annual event.

The date and place for next year's event should be decided by the end of this week.

For more information about how to get involved with Exousia, call 742-2257.

### Combs seen escorting mother to party

NEW YORK (AP) - Who needs Jennifer Lopez? Sean "Puffy" Combs has found an even better date: Mom.

Combs, trying to keep a low profile since his indictment on weapons charges, escorted his mother, Jan Combs, to a party recently.

The New York Times reported Tuesday that, as midnight approached and Combs mingled with Matt Dillon and other celebrities, he was asked if his mother had said anything about a curfew.

"Oh, no," he replied. "She can stay out as late as she wants tonight."

violation on Interstate 70 on Friday, and a police dog smelled drugs. Where were the drugs?

A female officer found a magnet in Eunice Santana's bra during a patdown search.

The magnet aligned with a device in the van's center console, providing access to a secret compartment holding the drugs.

Santana, 24, of New York City, and the driver, Giberto Nunez, 32, of Fairview, N.J., were arrested.

### Spring Break Adventurers

Reservations are not being taken for snowboards and camping equipment for the Outdoor Program rental shop.

The Outdoor Program in the Recreation Center has all your camping and snowboarding equipment.

The rental prices are reasonable and allow you to get outside and enjoy nature.

Equipment includes: tents, backpacks, stoves, lanterns, sleeping bags, coolers, and snowboards.

Equipment can be reserved up to two weeks in advance by filling out the necessary paperwork and paying the rental fee.

Do not be left behind this spring break, get out and enjoy scenic America.

The package price for snowboards for the spring break week is \$75. Stop by our office in room 206 in

the Student Recreation Center or call 742-3351 for more information.

### Spring Break Ski Sale

Never rent skis again. The Outdoor Program is selling all their skis right in time for your spring break ski trip. Packages for skis, boots and poles start at \$50.

The sale begins March 6 at 12 p.m. and ends March 10.

Come to the sale early for the best selection of equipment.

Stop by our office in room 206 in the Student Recreation Center or call 742-3351 for more information. Do not miss this opportunity!

**Aquatic Briefs** 

#### 5000 meter swim

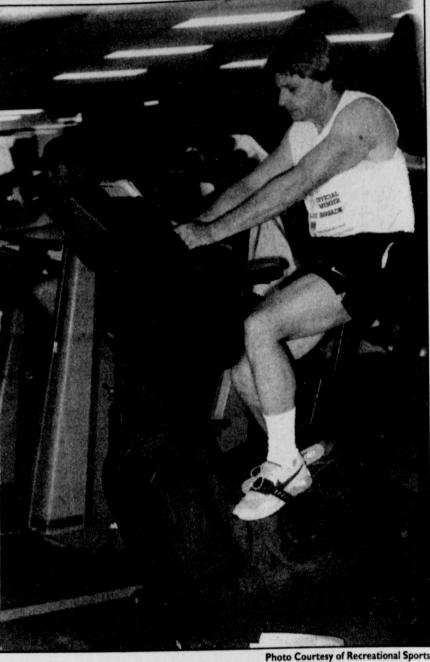

The 5000 meter is a long course event which requires the swimmer. to swim 100 lengths of the pool. Register through Friday March 3. The swim is free and there will be t-shirts available for purchase. (And YES, we will count your laps for you.)

Saturday March 49 a.m. - noon

## Raider baseball clubs Lobos, 13-1

### by Patrick Gonzales Sports Editor

Facing the same team twice in one season can be tough for a pitcher.

Not only do opposing batters know what to expect, but in some cases, revenge also might be in store.

None of that seemed to bother Texas Tech pitcher Chad Reynolds, who won his second game in as many tries against the Lobos, pitching Tech to a 13-10 victory Tuesday at Dan Law Field.

Reynolds made only his second career start, his first at home, and pitched five innings allowing two earned runs on eight hits while striking out two.

"Any time you get a chance to pitch, it's exciting, but this feels great. I've been looking for that one for a long time," Reynolds said about his first career start at Dan Law Field.

Reynolds said his strategy in facing batters he saw just seven days ago was centered around relying on his teammates.

"I just wanted to go out there and compete and throw strikes," Reynolds said. "Our offense is coming around right now, and they're going to score runs, so I just wanted to keep us close."

The Red Raiders (9-8 overall, 1-2 Big 12) were out-hit by the Lobos (8-10) but used six wild pitches and 12 walks to pick up the win.

Overall, Tech finished with nine hits and were led offensively by second baseman Shaun Larkin, who went 2-for-4 with two RBIs and two runs.

Larkin's biggest hit came in the bottom of the third when he hit a two-run home run with two outs left in the inning.

His blast continued the inning, and the Red Raiders went on to add two more runs.

"With two outs, I was just battling to get the hit in that situation," said Larkin of his homer. "Fortunately for us it went out."

After falling behind from the beginning of the contest, the Lobos got within one run in the fifth inning at 6-5.

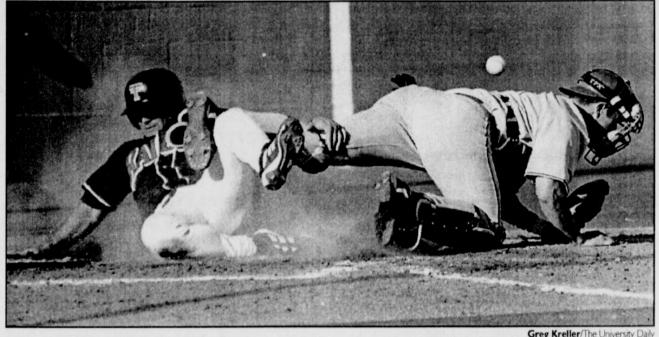

However, the Red Raiders, aided by four walks, four wild pitches and one passed ball, responded with five runs in the bottom half of the inning.

New Mexico added five runs in the top of the ninth, but its late-game rally ended when Tech hurler Clancy Fossum struck out Dee Dennis for the final out.

Altogether, the Red Raiders used three relief pitchers to solidify the vic-

The Lobos' Brandon Wells got the loss, giving up three earned runs on two hits in 2-2/3 innings of work.

The Red Raiders will return to Dan Law Field on Friday as they begin a three-game series against San Diego State. Tech's next conference contest will be at Texas A&M on March 10.

The Texas Tech baseball squad picked up its ninth win of the season with a win over New Mexico on Tuesday at Dan Law Field. The Red Raiders will next face San Diego State at 7 p.m. Friday in the first contest of a three-game-series.

### CHAMPS, from p. 1

just as explosive as they were in the first stanza, going on a 26-7 run to begin the second period.

"We just wanted to get out to an early lead and extend that lead in the second half so we could give our starters some rest," Dickerson said.

All of the Lady Raiders saw playing time, with the starters sitting down the last eight minutes of the game.

"It was nice to be able to sit and watch," Schmucker-Pharies said. "It was good because we could get that rest and prepare for next week's games.

Nine out of the 10 Lady Raiders scored, with Johnson leading the way and Tech center Plenette Pierson right behind her with 16 points.

Off the bench, Tech forward Tanisha Ellison had 14 points and 11 rebounds to capture her second double double of the year. "Our bench play is so important," Sharp said. "We hope Tarr (Amber) and Ellison can continue on with the strong play during the tournament."

field goals the entire game. The Lady Raiders' defense allowed only six points in the paint and forced 20 turnovers, scoring 29 points off Baylor miscues.

'We knew our defense was the key to make our offense go all year," Dickerson said. "I think that is why we scored 105 points tonight.'

The Lady Raiders now will have to wait and see if they will share the title with Iowa State or Oklahoma.

Both teams play today with the Cyclones traveling to Texas and the Sooners playing at home against Oklahoma State.

"I am really proud that we at least got a share of it (the trophy)," Sharp said. "We hope that Oklahoma and Iowa State run into some bad luck because the less teams we share the title with the better."

The Lady Raiders get two days

## 76ers take it to Mavericks

PHILADELPHIA (AP) - A par- mind with the diagnosis." tially torn rotator cuff didn't stop Allen Iverson from regaining his shooting touch.

Iverson made 15 of 18 shots and scored 35 points Tuesday night as the Philadelphia 76ers beat the Dallas Mavericks 106-87.

The All-Star guard had been listed as day-to-day with the right shoulder injury, but he had no doubt he would be able to play.

"I've been playing with this injury but I don't make excuses," said Iverson, who wore a bandage on his shoulder blade. "I didn't want to tell anybody about it because I didn't want to risk someone telling me I can't play."

Iverson scored on his first shot, a driving layup, and was 7-for-9 in the

first quarter for 15 points. His 83 percent shooting was a ca reer best, surpassing a 13-for-19 (68 percent) performance against Denver in December 1996. Theo Ratliff added 19 points on 9for-10 shooting and the Sixers shot a season-high 63 percent (46-for-73). "Allen was phenomenal on both ends of the floor," Sixers coach Larry Brown said. "I don't look at today, but the last three games. He's been playing hurt without saying anything. That's more impressive. Maybe he had peace of

Iverson, who originally injured his shoulder in an 87-84 loss to the Los Angeles Lakers on Feb. 20, had struggled in his last five games,

shooting 40-for-121 (33 percent). He refused to blame his shooting slump on the injury.

"It's tough because the people with the cameras and the power of the pen don't expect you to have bad games," Iverson said. "I've been playing bad, but I'm only human. Just like reporters can write a bad story or baseball players can go into a slump, I'm human."

Philadelphia never trailed after a 6-0 run erased a 30-29 second-quarter deficit.

A 16-5 run later in the quarter gave the Sixers a 53-42 lead at halftime.

ing a nifty behind-the-back pass on a fast break to George Lynch who scored on a layup to give the Sixers their biggest lead to that point, 51-38.

Iverson scored seven straight points on a 3-pointer and two driving layups to give the Sixers a 71-48 lead with 5:01 left in the third quar-

He went to the bench with 5:41 left in the game and did not return.

"I don't want to see him get hurt, but he's a warrior and he wants to play," Ratliff said about Iverson.

Toni Kukoc had 13 points on 5-for-9 shooting, and Eric Snow had 11 assists, seven rebounds and six points.

Michael Finley led Dallas with 15 points. Sean Rooks had 12 points and 11 rebounds.

Dennis Rodman played just 19 minutes, grabbed three rebounds

### San Antonio extinguishes Heat

The University Daily

SAN ANTONIO (AP) -David Robinson scored 19 points as the San Antonio Spurs took control early and cruised to a 93-69 victory over Miami on Tuesday night, holding the Heat to a season-low point total.

Terry Porter added 15 points and Avery Johnson 14 for San Antonio, which played its third straight game without the injured Tim Duncan, who is sidelined with a lower abdominal strain.

San Antonio has won three of its last four games.

Miami, which had a fourgame winning streak snapped, was led by P.J. Brown's 16 points.

TUITION FINANCING

account

The Lady Raiders' defensive effort was no different from the rest of the season as they held the Bears to 30.2 percent shooting from the field and only allowed 19

off but will begin to prepare for the Big 12 Tournament on Friday. The Lady Raiders will be

seeded no lower than No. 2. A loss by Iowa State will put them as the No.1 seed.

Schmucker-Pharies said out of the three championships, this is the best because the Lady Raiders worked so hard to get to the top after dropping their first two conference games of the season.

verson added five assists, includ-

## **Red Raiders look to weather Cyclones**

### by Jeff Keller

Assistant Sports Editor

Rayford Young, Mario Layne, Brodney Kennard and James Ware will step onto the floor of the United Spirit Arena as Red Raiders for the last time as the Texas Tech men's basketball squad (12-13 overall, 3-11 Big 12) battles No. 14-ranked Iowa State at 7 p.m. today.

The four seniors will be playing their last home game of the regular season against the Cyclones, and Ware said he is excited about the contest.

"I'm very pumped," Ware said. "Iowa State is in the top 25, and they're playing really well. They're the highest team in the Big 12, and I'm excited to play my last home game against them.

The Cyclones hold the top spot in the Big 12 with a 24-4 overall record and a 12-2 conference mark.

Iowa State has the Big 12 Conference's leading scorer in forward Marcus Fizer who is averaging 22 points-per-contest.

Fizer has been named Big 12 Player of the Week twice this season and has had four double doubles.

Kennard said Tech will need to fo-

it is going to pull off the upset victory. "Fizer is probably going to get the

player of the year in our conference," Kennard said. "He's a big guy, but he's very mobile, and he has tremendous

and stay in front of him and keep the ball out of his hands and try to keep him off the glass."

The Cyclones rank second in the Big 12 in rebounding margin, out-rebounding their conference foes by an average of 6.2 boards-per-game. Red Raider forward

Moses Malone Jr., said Tech will not be intimidated by Fizer or the rest of the Cyclones heading into the contest.

'We're not intimidated at all," Malone said. "That's a challenge for us. Each one of us has to step up and play as well as we're capable of in order to win this game. This team cus on limiting Fizer's production if doesn't intimidate us at all, and they

shouldn't."

Malone, one of six underclassmen who are active on this year's squad, said the younger Red Raiders will battle hard to make sure the seniors skills. We're just going to have to try get a win in their last home game. "We know

this is the last

game for the se-

niors, so we have

to come up and

play with the in-

they're going to

Malone said.

"We want to

send them out of

help them get

this win."

that

with,"

tensity

play

"We want to send them out of here with a win. We will do anything possible to help them get this win."

> Tech this season, averaging 16.8 points-per-game.

Young said he is surprised that his four years as a Red Raider are almost over.

"I didn't think that my last home game would come so fast," Young said. "My career here has really flown by, but I am looking forward to playing and getting the big upset against Iowa State."

Young is coming off of a 25-point scoring performance in Tech's win over Kansas State on Saturday. He is averaging 19.6 points-per-game in Tech's last five outings.

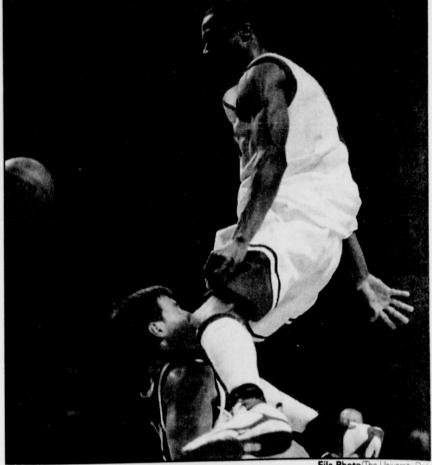

Young said he is anticipating having a strong effort against the Cyclones.

"I'm looking forward to it," he said. "I'm not going to try and go out there and do too much. But I'm going to try and do something to give the fans something to remember me by.

With closing out his career with a win at stake, Ware said emotions will be high come game-time.

"Since it will be our last home game, there will be a lot of emotions," Ware said. "But the bottom line is focusing in on the game. And if you can win a game like that as your last game on your home court, it just feels that much better."

Tech will close out its regular season on the road at 3 p.m. Saturday against Colorado.

Tech forward Mario Layne is one of four seniors who will play their last home game of their careers today against Iowa State.

## Tech will win; I personally guarantee it

Then I woke up Sunday morning, I limped outside my apartment (limping because I destroyed my right ankle attempting to play basketball at the

stockyards, well, leff Keller there was that Assistant too, but this was Sports Editor something dif-ferent. This was

something strangely familiar. At first, I couldn't

hit me; this was the stench of upset. The upset I am referring to is the

upset victory the Texas Tech men's basketball team will achieve against Iowa State on Wednesday. I know what you're thinking, "Isn't this the same bozo who picked A&M to win the Big 12 Championship in football?" Well, guilty as charged, but listen to my case for this upset victory and maybe you will agree with me.

My first reason why Tech will win this game is because it will be the last home game for four seniors on the Tech squad. One of those seniors is guard Rayford Young, and I think we all know how he plays in big games. If you don't know, check out these examples. In high school, he scored 33 points in the state championship game to lead Pampa to victory. He scored seven points in overtime quite put my finger on it, but then it against Oklahoma State his freshman

year to help lead Tech to the victory. Last season, he scored 25 points, including the game-winning basket against Nebraska, and who can forget his 41-point output in Tech's win against Kansas last season?

Young shines in big-time games, and with Iowa State holding the top spot in the Big 12 Conference, that is what this game qualifies as.

The second reason is that Tech has never lost to Iowa State at home in Big 12 Conference play.

I know that sounds like just a meaningless statistic, but sometimes, it is the smallest of details that can stick in a team's head and cause them to not totally focus on the task at hand.

The third reason is this will be Iowa State's first trip into the confines of the United Spirit Arena. Tech is 8-6 at home this season, and with all of

the emotions of senior day and the fact that it will be the last chance for Tech fans to see Mario Layne, Young, James Ware and Brodney Kennard play at home, the place should be jumping.

The fourth reason is Tech has yet to collect its big upset win this season. Each season, the Red Raiders pick up at least one upset win. Last season, they upset Kansas.

The season before last, Tech upset Oklahoma on the road. Iowa State will be the last chance for Tech to upset a top team in the regular season this year.

The fifth and final reason is plain and simply - the Red Raiders are due. After the events that occurred at the A&M game earlier in the season, after losing one of the best centers in the Big 12 to an injury on a play that had already been blown dead, it is time for some good stuff to happen

Houston readies for NFL franchise HOUSTON (AP) --- It turns out

there are two Charlie Hustles. They're just spelled differently. It's Pete Rose from baseball and Charley Casserly from football.

Football's Charley Hustle leaped at a chance in 1977 to work free for George Allen and the Washington Redskins just to get into the league. Casserly's friends told him he was crazy. Casserly said he knew what he was doing.

Know what? He did. "It was a million-to-one chance that happened all because I wrote a letter," Casserly said. "George told me he wanted someone exactly like he was 26 years earlier. I took that literally. I knew it meant that I'd be the gofer.

"He wanted me to be in the office before he got there and to stay after he left. I got to get milkshakes for George, and I learned a lot along the way."

said. "He would probably describe me as disorganized to the point that it bothered him, and I'd describe him as someone overly organized, but I guess the two of us worked out together.

"He's very detailed. I would describe myself as flying by the seat of my pants. I know what's going on but I'm not as structured as Charley. He takes everything

Casserly was head football coach, assistant track coach and biology teacher at Minnechaug Regional High School in Wilbraham, Mass., when the urge to leap into the unknown of the NFL became overpowering.

He wrote letters to all the NFL teams. Twenty-two responded. Casserly interviewed with two: Chuck Fairbanks and the New England Patriots, and Allen and the Redskins.

"I knew I could always get an-

Young is the only senior on Moses Malone Jr. the squad who Tech forward has been a Red Raider for four years. He is the leading scorer for

## Anderson, company inducted into Hall of Fame

TAMPA, Fla. (AP) - Sparky Anderson probably made at least a million decisions while he was a major league manager, and on Tuesday he announced what might have been his toughest call yet.

"The Hall of Fame rules say you can wear only one hat," he said, "and I will wear a Cincinnati Reds hat."

The Veterans Committee put Anderson in the enviable position of picking a cap for his plaque, easily electing the popular Cincinnati and Detroit manager.

It also selected Negro Leagues outfielder Turkey Stearnes and 19th century infielder Bid McPhee.

But Ted Williams, Stan Musial and the rest of the 14-member panel had a lot more trouble deciding which former big leaguer to elect - be it Bill Mazeroski, Gil Hodges, Dom DiMaggio, Mel Harder or Tony Oliva. burgh and by the Pirates, and I ap-So for the first time since 1993, it

did not choose anyone in that category.

"We hoped someone would be there, we really did," first-time member Hank Aaron said. "It just got too hard. Maybe next year."

Afterward, the chewed-up pens and half-eaten cake in the meeting room told the story.

Despite five hours of discussion and two tough ballots, it was a shutout - it took 11 votes for election, and Mazeroski just missed with 10.

"It built my hopes up, but not to the point where this is a big letdown," said Mazeroski, working as an spring training instructor for the Pirates in Bradenton, about an hour south of Tampa.

"There was a lot of push in Pitts-

preciate all that. It just didn't happen," he said.

Anderson, who turned 66 last week, was elected in his first of eligibility.

Third on baseball's career win list, he is the only manager to win World Series titles in both leagues.

"I never wore a World Series ring, but I will wear this one every day until I die," he said from his home in Thousand Oaks, Calif. "That, to me, is how much difference there is between the World Series and Hall of Fame.

Anderson guided Cincinnati from 1970-78 and the Tigers from 1979-85. He picked his hat as a way of thanking former Reds general manager Bob Howsam.

"He hired a 35-year-old nobody ducted.

knew and he had the courage and fortitude to do that," Anderson said. "Had he not done that. I doubt very much in all honesty that I would have

manager inducted into the shrine at Cooperstown, N.Y., on July 23. He has been to the upstate New York village, but has never set foot inside the Hall "I didn't ever want to go into the

Red Machine first baseman, Tony Perez, and Boston catcher Carlton Fisk, both elected in January by the Baseball Writers' Association of America. Longtime Reds broadcaster Marty Brennaman also will be in-

"It will be a tremendous thrill," Anderson said.

Anderson was 863-586 with the Reds and led them to Series titles in 1975-76.

He was 1,331-1,248 with the Tigers and guided them to the 1984 championship.

Anderson, who made two other Series appearances, is the only manager to lead two teams in career wins. He victory total ranks him behind just Connie Mack (3,731) and John McGraw (2,784).

McPhee spent his entire career in Cincinnati, batting .271 from 1882-1899. A second baseman, he resisted wearing a glove until late in his career.

Stearnes hit .359 over 18 seasons in the Negro Leagues. He began his career with the Detroit Stars in 1923 and led or shared the league lead in home runs six times.

### Bowe sentenced to prison term, brain treatment for kidnapping

CHARLOTTE, N.C. (AP) - Former heavyweight champion Riddick Bowe was handed a 30-day prison sentence Tuesday for kidnapping his wife and five children and ordered to get treatment for brain injuries he suffered in the ring.

Bowe, 32, could have been sentenced to 18-to-24 months in federal prison for the abductions on Feb. 25, 1998

But U.S. District Judge Graham suaded him to be lenient.

Without this brain injury and substantially reduced capacity, this matter would not have happened," Mullen said. He also said testimony by family members convinced him Bowe never intended violence. Bowe had pleaded guilty in June 1998 to a federal interstate

domestic violence charge as part of a plea bar-

napping charges. Besides the 30 day sentence. tinue treatment for his brain injuries. Bowe will remain free until a place at the federal penitentiary at Butner, N.C., becomes available.

Two years ago, Bowe went to Judy Bowe's Charlotte home and threatened her with a knife, handcuffs, duct tape and pepper spray. He forced her and the youngsters into a vehicle and set out for his Fort Washington, Md., home.

At a restaurant in South Hill, Va., Mullen said Bowe's head injuries per- Judy Bowe called her sister in North Carolina, who
