Arrest made in Putnam boating death case

CAUGHT: San Antonio man charged for failure to stop and give assistance after boat accident kills Red Raider

By Sally Gunter/Staff Reporter

A four-month investigation into a boat collision that killed a Texas Tech graduate led to the arrest of Robert Napier Corrigan III Wednesday.

Frio County officials arrested Corrigan on charges of failure to stop and give assistance after the Memorial Day boating accident that took the life of Laura Putnam and injured two additional passengers.

The accident occurred May 26 on Lake LBJ

near San Antonio when the boat allegedly driven by Corrigan hit the starboard side of Putnam's boat in a glancing blow and flew over the top, said District Attorney Sam Oatman.

Putnam took a direct blow to the head from the hit and was knocked into the water. The body of Putnam was not recovered until two weeks later, Corrigan said.

The autopsy showed Putnam died of drowning.

Corrigan, 28, is a commercial real estate agent in San Antonio at REOC Partners. He

posted a \$100,000 bail on Thursday afternoon, Oatman said.

If convicted of the Parks and Wildlife felony, Corrigan could spend a minimum of two years to a maximum of 10 years in the state penitentiary. He also could face a fine between \$2,000 to \$10,000.

"Now is when we really have to start tying up our loose ends and put the pieces together," said Texas Game Warden and lead investigator Gordon Eckert. "We believe we definitely have what we need to get a conviction, if it comes to that."

The Horseshoe Bay Police Department assisted the Texas Parks and Wildlife Service and the Texas Rangers in recovery efforts and

locating the boat.

"The case has been very trying," said Bill Lane, Horseshoe Bay police chief. "It took a lot of methodical searching. We checked all the boathouses on the lake."

There is a possibility of Oatman charging Corrigan with negligent manslaughter upon further evidence, Lane said.

"This is the kind of case you like to put to bed days after it occurs," Lane said. "But compared to others cases, we resolved this in a fairly short amount of time."

The owner of the boat that killed Putnam was Berkley Dawson, an owner of the San Antonio Budweiser beer distributorship. Corrigan was the boyfriend of Dawson's daugh-

ter, Sybil. No penalties will be brought against any member of the Dawson family, Oatman said.

"We have nothing to indicate that alcohol was a factor," Eckert said.

Authorities are unsure whether there was a passenger with Corrigan at the time of the accident. The two witnesses said there might have been another person in the boat, Oatman said.

Putnam's parents held a news conference Thursday near the accident scene at Horseshoe Bay where they addressed their feelings.

"They were going to express their gratitude

Regents to discuss possible tuition hike

By Adam Boedeker/Staff Reporter

The Texas Tech Board of Regents will meet today to discuss approval on issues such as the tuition increase for the spring and race-based admissions.

Pending the Board's approval, the tuition increase of 11 percent, likely a \$10 per credit hour increase, will take effect in the spring.

Senior Vice Chancellor Ben Lock said tuition is drawing the most attention.

"The finance and administration committee will meet," Lock said. "The first item is the report by the chief financial officers and the presidents to report what budget actions have been taken that have resulted in money savings."

Board Chairman C. Robert Black said he feels the tuition increase is necessary for the success of Tech.

"I think the administrations (Tech and Health Sciences Center) have done a good job analyzing the budget," Black said. "I think that will keep us competitive with other universities. The increase will most likely be \$10 per credit hour, which would bring the total tuition cost for both state and institutional tuition from \$92 to \$102 per credit hour."

Black said his main goal for his term as Board chairman is to focus on improving the number, quality and diversity of the university's faculty.

Board of Regents

"I think tuition needs to go for additional faculty, which is the major reason for the increase," he said. "We're required by law to set aside 28 percent for financial aid and scholarships."

He said it is important for the university to get additional faculty as well as retain those already here.

"The majority of the remaining money from the increase needs to go to hiring and retaining faculty to remain competitive," he said. "We can have all the good students we want, but if we don't have the faculty to teach them, we won't accomplish our purpose."

Black also said the Board will discuss hiring an outside consultant to help the university minimize its administrative costs.

"We want to look at hiring a consultant to review all of our initiatives to tell us some things we can do to improve the efficiency of our administrative costs," he said. "We want to minimize any future (tuition) increases we may have. We really need to improve the efficiency of costs and

Texas Tech students take part in ribbon-cutting ceremony at the newly renovated Student Union building

By Sally Gunter/Staff Reporter and photos by Craig Swanson and Andrew Weather/Staff Photographers

It is not unlikely for Texas Tech students to bump into the new university president while buying a cup of coffee.

"It is true that on my first day here, I came over, found Starbucks and have been happy ever since," said President Jon Whitmore.

The opening of the renovated Student Union was officially announced Thursday at a ribbon-cutting ceremony in the north wall basement of the facility.

Starbucks is only one of the new additions inside the remodeled Student Union. The center also features a Barnes & Noble Bookstore, 100-person theater and the offices of university personnel, such as Student Government Association President Jeremy Brown.

"My office is pretty cool," Brown said. Vice Chancellor for Facilities Planning and Construction Mike Ellicott said the planning for the project was only possible because of the agreement between students and the project team.

Brown agreed. "This is one of the greatest events we've seen in a long time since it is the center of the university," he said.

Vice President of the Division of Student Affairs Michael Shonrock said the UC is the center of the college and is traditionally considered the stone or living room of the campus.

"This is your home," he said. "Thank you for allowing us to join you in your living room."

As Tech officials expressed their appreciation to individuals involved in the process, they presented two awards during the ceremony.

Malcom Holzman, an architect from New York, was given the Excellence in Design award.

"Working with students has been very exciting," he said. "It took a lot of time and energy for them just to meet with us. After all, they are students."

The Excellence in Construction award was presented to Lee Lewis, construction company owner.

The Lee Lewis Construction Co. built the original Student Union building in the 1970s when under the ownership of Lewis' father.

Student Senate discuss Tech-A&M game issues

By Jennifer Prieto/Staff Reporter

The Texas Tech Student Government Association met Thursday night to discuss the Tech versus Texas A&M game on Saturday and issues regarding the vice president for graduate student affairs.

Jeremy Brown, SGA president, said section 14 in Jones SBC Stadium will be opened for students at the game.

He said this will provide more seats for Tech students who want to come and support their team.

"Come out to a great game," he said. "But don't rush the field."

The executive position specifically designed for graduate student affairs within the SGA was main topic of discussion.

Brown said he talked about this issue with members of the Graduate and Professional Student Government Association and other graduate students in May.

"I want this to be a great partnership with both organizations (SGA and GPSGA)," he said. "Our main goal is to represent every student in campus, and this is the best way to do it."

Brown said he has noticed the lack of representation graduate students have in SGA, and he will do whatever possible to fix the problem.

"They are Red Raider as well," he said. "So we need to represent them accordingly."

Brown said he will address the problem of housing for graduate students with the Director of Housing and Dining Sean Duggan, President of Student Affairs Michael Shonrock, and the Residence Hall Association.

"I know there is a need for graduate student housing," he said. "There are going to be some new residence halls being built, and I want to see what graduate students are going to get."

The travel funds awarded to graduate students who want to present their thesis is an issue that needs to be clarified, he said. "Everyone is on a different page on this issue," he said. "To my understanding SBS (Student Business Services) money cannot go to fund individual students' needs, so I really think we need to get on the same page about what needs to be done."

Most graduate students are very passionate about how they are being represented, Brown said. The SGA has to step up and represent gradu-

Texas redistricting dispute nearing end

AUSTIN (AP) — Sounding more conciliatory than usual, Republican House Speaker Tom Craddick indicated Thursday that the congressional redistricting dispute over West Texas may be nearing an end.

Senate negotiators, however, were far from optimistic. "I think West Texas is pretty close to being worked out if it's not done," Craddick said.

Craddick has stood firm on his desire for a congressman to represent the Midland/Odessa area, his home district. Sen. Robert Duncan, R-Lubbock, has opposed a separate district, causing a clash between Republicans in the two chambers.

"I have a very strong feel that Midland/Odessa and Tom Green County and the West Texas area out there have not had fair representation for the last 40 years and we've not had any oil and gas representation and really want and deserve that," Craddick said.

The current map pairs Midland with Lubbock and is represented by Lubbock Rep. Randy Neugebauer.

Ban on partial birth abortion clears House

WASHINGTON (AP) — The House voted decisively Thursday for the first ban of an abortion procedure since the Supreme Court's *Roe v. Wade* ruling that women have a right to end their pregnancies. Strongly supported by President Bush, the bill could be on his desk for signature within days.

The 281-142 vote culminated an eight-year drive by the Republican-led House to end the procedure that abortion opponents call partial birth abortion. The Senate could take up the bill as early as Friday and send it to the president.

Abortion rights groups, citing court rulings striking down similar state laws, say the legislation is unconstitutional and they will challenge it as soon as it becomes law.

Doctors who knowingly violate the ban would be subject to up to two years in prison. The law would not affect women having the operation.

The legislation bans a procedure, generally in the second or third trimester, in which a fetus is partially delivered before a doctor punctures the skull. The opposing sides differ on the medical necessity or the numbers of such abortions, but they agree the bill will have far-reaching ramifications.

Cardinal says Pope John Paul II dying

VATICAN CITY (AP) — One of Europe's top cardinals said Thursday that Pope John Paul II was nearing "the last days and months of his life," the first ranking prelate to say the 83-year-old pontiff is dying.

With John Paul visibly weaker in recent weeks, concern over his health has been growing. Austrian Cardinal Christoph Schoenborn was the second leading prelate this week to express alarm over the pope's health.

"The entire world is experiencing a pope who is sick, who is disabled and who is dying — I don't know how near death he is — who is approaching the last days and months of his life," Schoenborn, who is the archbishop of Vienna, told Austrian state broadcaster ORF.

Schoenborn is considered a possible candidate for the papacy. His spokesman, Erich Leitenberger, later told *The Associated Press* the comments were "to be interpreted philosophically."

Since the mid-1990s, John Paul has been battling Parkinson's disease, a progressive neurological disorder, as well as crippling knee and hip ailments.

The Vatican, which generally refrains from commenting on the pope's health, declined to respond to the Austrian cardinal's remarks.

However, two Vatican cardinals and one of John Paul's closest aides — the secretary who joined him from Poland when he assumed the papacy 25 years ago — sought to minimize concern about the pontiff's well-being.

Monsignor Stanislaw Dziwisz, promoted to archbishop by John Paul on Monday as a sign of gratitude, took the unusual step of talking to reporters about the pope's health as the pontiff was meeting with the president of Lithuania.

Putnam

CONTINUED FROM PAGE 1

towards the officials involved," said Justin Moore, fiancé of Putnam.

Moore said he plans to attend the grand jury meeting Wednesday with Putnam's family.

Moore and his cousin were in the boat with Putnam when the accident occurred. He will serve as a witness if Corrigan goes to trial.

Moore said there is a sense of relief of having someone in custody because it has been so long since the accident. "I wouldn't call it joy," he said. "It's not something to be happy about."

Putnam and Moore dated for four years before they were engaged.

"I still haven't moved on yet, especially since it's been drawn out," Moore said. "It's getting easier everyday, but it's still tough."

Lizzie Tarbox, a senior communication studies major from Lubbock, was a close friend of Putnam's and said she had goose bumps when hearing of the arrest.

"I didn't expect anything soon to happen," said Tarbox. "My biggest fear was that no one would take the responsibility for this."

The arrest is the closing of a chapter too long open to Tarbox.

"All I've been thinking about since is them finding him," she said.

Board

CONTINUED FROM PAGE 1

money in the classrooms."

Lock said the Board will also make a statement regarding the use of race and ethnicity as a determining factor in the university's admission policy.

"The Board will be directing the administration to proceed with revising the policies to incorporate

race and ethnicity," he said. "The first class to come in under the rule would be the freshman class of fall 2005. We have to publish the rules a year in advance before we start considering applications based on race."

Tech President Jon Whitmore and Health Sciences Center President Dr. M. Roy Wilson will both express their thoughts on the race-based admission policy.

"We will discuss," Black said. "But I think our sentiment will

be that the Supreme Court has allowed this, and it will let us consider race as a part of the factors in admissions. We'll tell both presidents they should move forward with the issue under the guidance of the Board's statement and develop their own policies."

Another issue is Dr. Thomas Butler's, who is facing charges of smuggling the plague into the country and lying to authorities regarding its disappearance.

Black was unable to comment directly on the issue due to pending court litigations but did issue a general statement.

"We will have an update during executive session from the general counsel on legal issues that are outstanding," Black said.

The main topic in the facilities and planning department is a new 500-bed residence hall similar to Carpenter/Wells, which would cost \$24 million.

"I think the new residence hall is very much needed," Black said. "It would be in the style of Carpenter/Wells, which I see as the growing trend for universities everywhere."

Black said there are many new projects coming up that will make Tech an exciting place to be in the future.

"We have so many projects going on right now," Black said. "I think the official bird of Texas Tech should be the construction crane."

Senate

CONTINUED FROM PAGE 1

ate students to the level undergraduates are represented.

The senators meet next week at an open forum where students are invited to come and voice their opinion about the issue. The open forum will be Thursday at 7 p.m. and the location will be announced later in the week.

Jacque Steinmetz, SGA internal vice president and Senate president, said this is the first time senators have recognized the need to get more information about an issue so they can make a more educated decision.

"They want to make sure they

know what the students want," she said. "It is important to get opinions and insights from other students so we can make a decision."

Steve Frazee, business college senator, said all the issues in discussion are important.

He said he would like to see senators go to their colleges and ask students what problems they are having and how they could be better represented.

"The people that voted for them will like to see what they are doing and how," he said. "It is so important that every senator to get in contact with their constituents."

Frazee said the tuition increase should be addressed, but it will be better if it is addressed when all the information is available.

"We are going to watch out for the fees student are going to be paying and why," he said. "The administration does a great job with making sure students are taken care of, even though they have to increase tuition."

Shelley Smith, arts and sciences senator, said tuition needs to be addressed immediately because there is going to be a quick turn around and students need to be aware of what is going on.

"An 11 percent increase is a big deal," she said. "We need to let students know what is going to happen, but we can't really do anything to change the decision that has or will be made."

She said all senators are working hard to be able to reach students and make sure their needs are being met.

Law professor to discuss water issues at UN conference

By Andrew Bell/Staff Reporter

Texas Tech School of Law professor Gabriel Eckstein boarded a plane to go to Paris Wednesday. Although he will have the time to see the Eiffel Tower, Eckstein was invited to Paris to participate Thursday and Friday at a conference of water law experts.

The conference is an invitation-only event sponsored by the United Nations Education Scientific and Cultural Organization. Thirteen experts will join the international meeting and discuss trans-boundary water issues, Eckstein said.

"We will talk about guidelines that apply to trans-boundary aquifer ground water. The rules are loose on an international scale. There's no basic understanding internationally," he said. "We can't have depletion or overexploitation of our water resources, and we can't use up our aquifers because then we would be out of water."

Eckstein is the only invitee from the United States. The law school hired him after a search that encompassed the en-

tire nation, Dean Walter Huffman of the law school said.

"We conducted a nationwide search for the best replacement. The result was Professor Eckstein. This invitation is validation that we hired the true expert of the world," said Huffman.

It was important to hire someone with Eckstein's expertise, Huffman said, because many professors at Tech have a vision for the future.

"Several at Tech have a vision for an institute of water policy and management," he said. "With an institute, we could take a comprehensive look at water in the region, the southwest, the U.S., and finally, globally."

This issue hits close to home, because Lubbock has a limited supply of water. Don McReynolds, technical director and geologist of the High Plains Underground Water Conservation District No. 1, explained where a high percentage of Lubbock's drinking water comes from.

"Lubbock has two major sources of water. A high percentage comes from Lake Meredith. The other is Bailey/

Lamb County Well Ground water supply," McReynolds said.

The city of Lubbock takes water from both sources and mixes them to give the drinking water a better quality, McReynolds said. However, things need to be done in the near future to replenish the drinking water in Lubbock.

"We are starting to be at our maximum capability to get water from our supplies. We are going to need a backup plan," McReynolds said.

For regions of the world that are in worse condition than Lubbock, the members of the conference will be discussing water management issues on a global scale. While at the conference, Eckstein will be participating in a meeting on shared ground water. He said the subject of ground water is not only important to Americans but to all people.

"Half of the world gets their water from ground water. It is the most important water source for the world population," said Eckstein.

Aquifers are on the list of ground water resources Eckstein said aquifers are

tricky because, unlike nations, aquifers have no boundaries. The members need a major effort to begin applying regulations to trans-boundary aquifers.

"We need rules and policies to apply to trans-boundary aquifers. An example would be policies and regulations between the U.S. and Mexico and water use between the two," he said. "It has been an on-going process for a couple of years, but there need to be agreements."

The problem is that water has no national, state or political boundaries, and everyone needs it to survive.

"Water doesn't respect political boundaries; it flows," Eckstein said. Although representatives from many countries will be at the conference, Eckstein said one country needs to set the standard for the rest of the world.

"The question is: What can one country do to ensure other countries can use their water resources responsibly," he asked.

Campus Crime & Security Information 2002 Texas Tech University

Texas Tech University annually makes several reports and statistics available to its community and to prospective students and employees. These statistics provide information on campus safety including several items for which federal law requires disclosure including:

- campus policy regarding the reporting of criminal activity;
- campus policy concerning facility safety and access;
- campus policy concerning law enforcement;
- information regarding safety and crime prevention programs;
- campus policy for the recording of off-campus criminal activity;
- campus policy regarding the sale, possession and use of alcohol and illegal drugs;
- information regarding drug and alcohol education programs;
- campus policy regarding sexual assault programs to prevent sex offenses;
- crime statistics for the three most recent calendar years.

Campus safety information is available upon request from the Texas Tech Police Department, Box 43041, Lubbock, Texas 79409-3041 and the Student Mediation Center, Box 45010, 250 West Hall, Lubbock, Texas 79409-5010. This information may also be found online at <http://www.studentaffairs.ttu.edu/CampusCrime/>

Top 10 reasons being bald not bad

When you look at me, there are some things you don't see. In fact, there are several thousand things you don't see — they're called hairs.

Tim Hadley

*If the blow dryer doesn't work or blows a fuse — no problem.
My bathroom cabinet contains no hairspray, mouse or gel.
I haven't worried about styling my hair since Nixon was saying 'I am not a crook.'*

to comb?

I've never been interested in combing three lonely strands across the great divide, or parting my hair an inch above one ear to try to comb a few more strands across to the other ear. (Note to others of the male persuasion: That looks really stupid.)

No. 3

Baldness is actually caused by an overabundance of testosterone (you can look it up).

If other guys want to use their testosterone growing hair, they can go right ahead.

No. 2

Believe it or not, many women like this look. Sean Connery was voted sexiest man alive — at age 73, bald as a billiard ball.

If it's good enough for James Bond (not to mention Dr. Phil) it's good enough for me.

And, the No. 1 reason why it's not so bad to be bald ...

It's me. What you see is what you get. I mean, each to her own taste, but if a woman didn't want me because I was bald, I wouldn't want her either.

Besides, how would she like it if I told her, "I find you attractive, but I can never get involved with you because your breasts aren't big enough?" If she's that shallow, she's not for me.

Not that it matters — I'm happily married to the same beautiful woman for 32 years.

She loves me, accepts me and likes me the way I am (except for the tonnage).

Life isn't fair. If I had a choice, I wouldn't have chosen to lose my hair.

But it's not so bad, and there are even some advantages.

Remember — God only made a few perfect heads; the rest, he covered with hair.

■ Hadley is a doctoral student studying technical communications. E-mail him at tim.hadley@ttu.edu

I used to have hair; I have pictures to prove it.

In fact, I used to have a crew cut — before the crew jumped ship.

I started losing my hair when I graduated from high school.

The little buggers were just as eager to get away from home as I was.

This is the way it is for many men, but it isn't our fault; we inherited this problem from our mothers (you can look it up).

It's not caused by using the wrong shampoo, eating too much chocolate or masturbation (boy, was I glad to learn this!).

Now, I admit that some of the things that have happened to me are my fault — like the tonnage that is a direct result of increased eating and decreased exercise — but not baldness.

When this process first started, I worried about losing my hair for 5, maybe 10 seconds. Then I decided it wasn't worth any heartburn.

Life is too short. I got over it.

Since then, in the intervening quarter century, I've gradually realized that there are many reasons why being bald is not as bad as most people think it is.

Here are my Top 10 reasons why being bald is not so bad:

No. 10

Washing my hair takes very little time — roughly 7 to 8 seconds, give or take. And I save tons of money on shampoo.

No. 9

If the blow dryer doesn't work or blows a fuse — no problem.

My bathroom cabinet contains no hair spray, mousse or gel.

I haven't worried about styling my hair since Nixon was saying, "I am not a crook."

No. 8

I never had to spend money on a toupee (those things are expensive).

Once, years ago, I asked my wife if she would like me to wear a hairpiece.

Her response was something like, "The devil, you say!" I think that's sort of, more or less, the same as "Hell no!"

No. 7

Haircuts take less time. My barber saves so much time cutting my hair he ought to be paying me.

No. 6

Windy days messed-up hair not my problem.

No. 5

Wearing a hat doesn't mess up my hair. When it's cold, I like to wear a hat to keep my head warm.

Heck, I need to wear a hat — I've got no insulation up there.

Have you ever noticed how many men risk colds, flu and pneumonia on cold days because they're afraid of mussing their hair?

No. 4

I never need to carry a comb. What's

Editorial

Practice good sportsmanship; stay off the field during Tech vs. A&M game

In the past week, the Big 12 no-tolerance policy concerning fan interaction on the field has become a hazy issue.

Big 12 Commissioner Kevin Weiberg said Kansas will not be punished for fans' running onto the field and tearing down the goalpost after the Jayhawks' win against Missouri on Saturday.

Texas Tech athletic director Gerald Myers told *The University Daily* on Thursday that the Big 12 initially decided to institute a no-tolerance policy with possible punishments enforced against a university if fans stormed the field.

He also said because of requests by some Big 12 schools, the Big 12 commissioner decided not to punish schools if its fans charge the field.

With one day remaining before Texas Tech plays Texas A&M in the two schools' annual early season rivalry game, some confusion remains about what behavior will be tolerated.

Myers told reporters at a news conference Monday that arrests will be made if any fans run onto the field, and more security personnel will be on duty to guard against fans celebrating a vic-

torily irresponsibly by charging the field.

Despite the fact that Tech will not face sanctions from the Big 12 if fans do go out onto the field, the opinion of *The UD's* editorial board is still that fans do not belong on the field.

The Big 12 policy came as a result of unfortunate incidents involved with post-game celebrations, most notably the "goalpost fiasco" that occurred the last time the Raiders and the Aggies played in Jones SBC Stadium in 2001.

Tech has received a bad wrap throughout the state and the nation as bad fans because of what transpired at Jones two years ago. Since the incident, Tech students have had to fight the characterization of being drunks who like to brawl after football games.

Although there have been instances when fans have run onto the field without a fight or some other unfortunate situation breaking out, being out on the field is still not safe for fans.

There are bad apples everywhere, just waiting to spoil a good time for everyone.

Tech students should go to the game, have a good time and cheer the Red Raiders to victory.

But they should also remain in the stands, not because the university's athletic director has gone to any measure to keep them there, but because it is the right thing to do.

Don't give the other institutions another opportunity to snicker at Tech. Be a proud representative of Tech and let the football team handle what happens on the field.

Letter to the Editor

Citizens of Lubbock should invest in future

This letter is in response to the article published in *The UD* on Tuesday about the economic development plan proposed by the City Council and the Chamber of Commerce.

The future is what the individuals we elected into leadership were thinking about when they proposed this plan.

For many years, Lubbock has grown in both population and in recognition throughout the state and nation.

But we have to realize that we cannot continue to grow and prosper if we keep all of the same practices.

Jobs in Lubbock are limited.

There is no other way of saying this.

In order for Lubbock to have a chance at recruiting businesses that will offer competitive salaries and room for advancements, we need the backing of tax dollars to do so.

Each year more and more students are graduating from Texas Tech, Lubbock Christian University, Wayland and South Plains.

Some students hope to stay in Lub-

bock but are unable to because of the limited job opportunities.

It is time that the citizens of Lubbock take ownership in their community and invest in its future, not just for the students but for all of the Lubbock community.

With the current situation the state is in, all public areas have been negatively affected.

— Kelli Stumbo, senior public relations from Flower Mound

The UD should keep Ben Sargeant's cartoons

In reading the letter to the editor concerning the three Texas Tech law students who called for *The University Daily* to censor Ben Sargeant's cartoon, I was shocked by three academicians who could be so closed-minded and ignorant. Simply, as students of the law they wrote a plea to ask *The UD* to turn a blind eye to the right granted in the U.S. constitution concerning free speech instituted in 1791.

Granted, the cartoons do depict some political figures in a negative light, it is

Sargeant's constitutional right to draw the cartoon, as it is *The UD's* constitutional right to print the cartoon.

It is amazing that *The UD* has the courage to offer many points of view in its publication, some favorable of public figures and some not so favorable.

To the three law students with cars parked near 19th Street, I encourage them to study their law books as well as a few famous documents in U.S. history, namely the U.S. constitution.

If they find it difficult to find, I will gladly loan them my pocket version, which I carry in my school book bag at all times.

It is unfortunate that those studying the law to preserve it and do it justice would stoop so low as to undermine it in the course of their study.

Further, although Tech is a conservative leaning town, it does not mean that close mindedness should be practiced based on location.

Good luck in law school, and I hope you make it to your second year.

— John A. Barclay IV senior history major and chairman of the Supreme Court for the Student Government Association

Tech selects dean for College of Engineering

By Andrew Bell/Staff Reporter

After more than a year without a permanent dean, Texas Tech's College of Engineering is about to get one.

"The decision was made this week, but there will not be an announcement until later," Provost William Marcy said.

Marcy said the interview process has been going on since the last academic year.

"They continued in the summer, and the last ones were finished about two or three weeks ago," he said.

The interview process required the candidates to make two trips to the university, Marcy said. During the visits to campus, the candidates met with students, faculty and the president.

"It was an exhausting interview process. Then we took the feedback from the people who have a take on the subject," he said.

Fontenot said the faculty and staff of the college have met with the candidates applying for dean. Although they do not know who will be their new dean, the faculty is pleased with the candidates.

"We would be pleased with any of the candidates. I haven't talked to anyone who doesn't feel it was a great experience to meet them," Fontenot said.

The new dean will replace Jim Smith, interim dean of the College of Engineering. Smith has had the position for a little more than a year, said Dean Fontenot, senior director of the Engineering Outreach and Literacy program for the College of Engineering.

During his tenure as interim dean, Fontenot said Smith has done many things to improve the college. She said one of the best things Smith accomplished was to follow in the footsteps of the former dean, Marcy.

"He has continued to make the

College of Engineering a prestigious college but an approachable college. Approachable not only to other colleges, but to the community as a whole," Fontenot said.

Many of Smith's efforts to reach out to the community are through the schools in the region, she said.

"He has been very active in the outreach to the public schools, the two-year institutions, and the four-year institutions. Because of his support, the engineering relationship with the community has grown," Fontenot said.

Administrators hope in the future to make the college bigger in research. Fontenot said Smith's connections with NASA and his support of the engineering departments and research has helped sup-

port the plan.

The work Smith accomplishes in regards to research and support of the departments helps give the college a new reputation, Fontenot said.

"Smith's support of the projects and outreach makes a difference. People on campus and in the community see him as someone who cares about the educational process," she said.

Marcy said the new dean, once appointed, will be able to advance the college.

"We want to take the college to a high level of visibility and bring in research grants. It is a very strong agenda for the college," Marcy said.

He also said to expect a new emphasis on education and building.

"Expect the graduate program to get a lot of emphasis. They will hire on new faculty to the college and there will be some renovations," Marcy said.

Currently, the college is in the planning stages of building another facility.

The plan started about five years ago and has now made it to

the top of the list.

"The new building will be a multi-purpose building to serve all of the departments. The college doesn't have a building that serves all of the departments of the college. Once they get the go-ahead, they will begin the planning and

the construction," Marcy said.

Smith could not be reached to comment on his future plans, but Fontenot hopes he stays close.

"I haven't talked with him about what he has planned next, but I hope he sticks around in engineering," Fontenot said.

"It Pays To Be The Top Dog"

Newby discusses diversity with law students

By Beth Aaron/Staff Reporter

Students from many minority organizations at Texas Tech met for a discussion sponsored by the Black Student Association and the Black Law Student Association.

The discussion was led by Regent Brian Newby in the Law School Forum Wednesday afternoon.

Richard Baker, special assistant to the chancellor, said Newby asked him to bring people together to discuss minority representation on campus.

"Basically, Regent Newby asked me to help bring folks together to engage in dialogue about diversity that should occur throughout the university," he said. "It is important that students be a part of the process of how we can enhance the university's environment."

Newby said he wanted to find out from students what the administration could do to help minority students feel at home at Tech.

"We want to recruit and retain minority students," he said.

Daniel White, president of the Black Students Association, said the discussion intended to promote diversity throughout the university

system by way of the administration.

"It's about diversity in the system," he said. "We wanted to educate students and get opinions from top administrators in the system as far as a minority recruitment and what Tech's commitment is as far as admission standards."

White said the tuition hike is a concern for minority students.

"With tuition on the rise, minority students are in a catch-22, because they might not be able to afford their education," he said. "Without an aid increase, they are left with a deficit."

White said he hopes the Board of Regents' goals include making sure there is equal access for minority students, even with the tuition hike.

"We are trying to make the climate at Tech one that's conducive to minority students," he said. "We want to find out the Board of Regents is doing that is filtering down into the system," he said.

White said he was happy to have Newby as a speaker because he looks to Newby as a personal role model.

"For me as a black student, when I look at him in his position

of power, I see him as a representative in those conferences," he said. "He is making sure we are represented in those meetings."

Shawn Smith, president of the Black Law Students Association, said Newby spoke volumes for the cause by agreeing to come to the forum.

"I think for one it says a lot about Regent Newby," he said. "The best outcome from this is that Regent Newby can access what Tech administration needs to do to promote diversity. Hopefully, that's what will be achieved."

Newby said he wanted to spend time talking to students to figure out how to help minority students deal with issues that are not necessarily heard or recognized by administration.

"The issue really is going to be what Tech can do outside of handing you a check," he said.

Smith said various student groups were invited to come out, but there was limited attendance so Newby could facilitate discussion.

The smaller group was also to make sure everyone in attendance would have a chance to voice their concerns.

Rogelio Ortiz, a third-year law student from Brownsville, said he attended the discussion because he thinks the diversity issue is of utmost importance.

"I think diversity is a very important topic that should concern the whole nation," he said.

Now that race is allowed to be a factor in admission consideration, Ortiz said the meeting was especially appropriate.

"The number of minority students is terribly low and doesn't reflect the actual number of minorities out there," he said.

Ortiz said he thinks Tech stands out with a diversity problem.

"I still wait to see if public universities like Tech will improve, but it is stagnant," he said. "It's a problem, it really is."

Ariya McGrew, a second-year law student from Houston, agrees Tech needs to catch up with the times.

"It is a problem because it's 2003, and it's long past time for the issue to be resolved," she said.

TYSON JEFFREYS/Staff Photographer

TEXAS TECH REGENT Brian C. Newby fielded questions Thursday evening regarding diversity within the Tech community. The meeting, held in the law school forum, took place on the eve of the Board of Regents meeting.

Read The UD online at www.universitydaily.net.

Ribbon

CONTINUED FROM PAGE 1

The Board of Regents requires that 1 percent of funding go to public art. This money has been spent on two pieces of art.

"Red Reader" is a statue of a man created out of books. It is outside of the UC facing the library. At the end of the year, a tornado of ideas sculpture will be added to the interior of the building.

The first floor of the original Student Union building will be demolished next week.

The renovation project has two stages, one of which is completed. The building's square footage will equal 245,000 square feet upon completion of the final stage.

A fast-food area with seven vendors, a dining pavilion, a branch bank, convenience store, and 25 meeting rooms will be built during the second stage of the project. A plasma television will also be added in the basement, Shonrock said.

'School of Rock' has Black, students jamming out

The first time we see Jack Black in "School of Rock" he is playing a gig with his rock band and diving head first into a mosh pit, landing flat on his face.

James Eppler

Luckily, the movie doesn't follow his example.

Black is certainly an actor whose time has come. "School" will be his second leading role in a film, but it's really the first time he's been the center of attention.

Here, the spotlight is on Black as he is given full range to be himself. That makes sense, as writer Mike White wrote the character for Black.

Black plays Dewey Finn, a rock guitarist who has just been kicked out of his band before a Battle of the Bands contest. He's been living with his best friend, Ned (Mike White), who works as a sub-

stitute teacher, and Ned's ice queen girlfriend Patty (Sarah Silverman) for months, and hasn't been able to pay rent. Patty wants him out, and Ned is too spineless to stand in the way.

So when Dewey intercepts a call for Ned from a prestigious private school looking for a sub, he decides to take the job himself.

The principal of the school is Rosalie Mullins (Joan Cusack), who instructs Dewey on the rigid rules of the school. Dewey says he has his own methods of

discipline — e.g. verbal abuse and "smackin' 'em in the head."

Dewey is given a class of fifth graders, most of whom are stereotypes of kids we all remember from elementary school: the overachieving princess, the two boys who goof off in the back of the room, the out-cast and the quiet intellectual.

But Dewey soon finds these kids might have some musical talent. He straps on a guitar and assigns everyone either an instrument or a job such as lighting, sound, security, etc.

But there's always the possibility that Dewey will have the whistle blown on him any minute. In fact, one of the funniest scenes in the film has Black talking Cusack into a "field trip" for the class as she guzzles beer and grooves to Steve Nicks.

This being a PG-13 rated movie,

there is a bit of a harness put on Black in terms of vulgarity. Keep in mind that this is the guy whose band, "Tenacious D," sings songs about rough sex, smoking hash and doing penis pushups. Not that his performance isn't hilarious, but Black shows in this film that he doesn't need vulgarity to be funny.

Scenes in the classroom with Black and the kids are often hilarious, since he is so persistent in teaching them his kind of music. It also should be said that the kids are talented too, each of them being somewhat talented musicians in their own right.

But even though there are kids in the movie, this is not a children's movie per se. It is a showcase for Black, and the fact that there are talented kids involved makes the film even more fun.

In addition to the laughs, surprisingly,

the film has a little touch of sentimentality, but in small doses. Those moments are injected periodically like little shots of cheese into a giant meatball.

Although it is about 20 minutes longer than it needs to be, the movie is still lots of fun for those wanting a Jack Black attack.

EPPLER'S RATING:

Eppler is the UD's movie critic. E-mail James.D.Eppler@ttu.edu.

Ambush Aggies Run an outlet for fans from both sides

The Ambush the Aggies Fun Run will happen at the Robert H. Ewalt Student Recreation Center at 9 a.m. Saturday. Participants may choose to run 2 or 4 miles. Both courses will begin at the Student Recreation Center and go through campus.

Those in town for this weekend's football match-up between Texas Tech and Texas A&M are invited to participate, including students, parents, faculty, alumni and guests.

The Department of Recre-

ational Sports is in charge of organizing and promoting the event.

"We've done this for over 20 years," said Director of Recreational Sports Joe MacLean. "We're trying to be a part of the spirit of the weekend, and we want to promote fitness and running with a fun activity."

There is no sign-up fee.

The fun run tradition takes place yearly in one of two forms. Last year it was "Stampede the Longhorns" as Tech faced the University of Texas at home. Each year

Tech faces either UT or A&M at home; depending on which team is in town, the run is called "Ambush the Aggies" or "Stampede the Longhorns."

MacLean invites students, faculty, and alumni are informed so that they may participate each year.

Those who want to participate in the fun run can submit entries at the Recreational Sports Office Room 202 or in the Fitness and Wellness Center in the Student Recreation Center through Friday. Late entries will be accepted one hour prior to the start of the fun run on Saturday. For more infor-

TAKE NOTES. OCTOBER 3.

RaiderGate, car bashing to show Tech spirit

By Nikki Siegrist/Staff Reporter

Red Raiders have a variety of options to show their spirit Saturday of Texas Tech's game against Texas A&M. Students can attend a car bashing, RaiderGate or take place in the Hastings's parking lot from noon to 6 p.m. on 4th Street and University. The event is to help raise money for Tech's Habitat for Humanity.

Chapter President Jocelyn Knochel, a junior nursing major from Plano, said she hopes the fundraiser will be a success. The money is going to help fund the \$30,000 playground Tech Habitat is installing in the Habitat for Humanity neighborhood.

"The car will be painted maroon, and we will be there with sledge hammers for everyone to hit it with," she said.

Everyone wanting to take a whack at the car can pay \$1 for five swings.

Knochel said Tech Habitat has no goal to meet for the event but hope many game-goers participate.

"We are trying for \$30,000, and I don't expect to raise it all in one day," she said. "But anything can happen."

After students have taken any frustration or pre-game anxiety out on the Aggie-colored car, they can relax and have fun at the student-run tailgate party, RaiderGate. The festivities will take place in the R-1 parking lot west of the chemistry building.

Jeremy Brown, Student Government Association president, said he realizes there is a potential for students to be intoxicated or rowdy at RaiderGate but does not believe it will be a problem.

"Not much will be different,"

Brown said. "Students like to keep it the way it's already been done. We will try our hardest to open 30 to 45 minutes early, but that's the only thing that will be different."

As a precautionary measure, Brown said there will be more police attendance than usual, mostly because of the anticipated increase in crowd size.

"If we have a student at the gate and we can tell he's intoxicated, we'll ask them to leave," he said.

Brown said he has confidence in the students and believes there will not be many problems.

"I think the students are responsible," he said. "Normally students behave. We know A&M students are going to be there, and we're not looking to fight but to have a good time with them."

The band Vallejo will be playing at RaiderGate and games are scheduled to open at 5 p.m.

If students would prefer to listen to country singer Cooder Graw, they can walk over to Raider Alley. Raider Alley is a tail-gate party run by the athletic department held by the Frazier Alumni Pavilion.

The party is free for students, faculty, and alumnae, said Rich Leach,

a graduate assistant with external operations.

"We are definitely not in competition with RaiderGate," Leach said. "We are more geared toward everybody."

Thirteen local food vendors will be on hand to sell numerous foods like sausage-on-a-stick and popcorn, he said.

Bo Garza will open for Cooder Graw at 6 p.m., and Raider Alley will close at 9 p.m. for kick-off.

Leach said he doesn't think there will be many more problems than normal this weekend.

"Any time you bring in a team like A&M, there is a potential for a more rowdy crowd and definitely a bigger crowd," he said. "The entire game operation is stepping up for more people. I don't think there will be anymore problem than normal."

Kalf Fry offers night of music, cooking

By Nikki Siegrist/Staff Reporter

About 2,300 pounds of calf fries will be prepared for the 23rd annual Kalf Fry on Friday.

Kalf Fry is a fund-raising concert put on by Kappa Alpha and Phi Delta Theta. Shane Rogers will open the concert, followed by Robert Earl King and Dwight Yoakum.

The concert is located at the Lubbock Municipal Auditorium, and doors will be at 7:30 p.m. The concert starts at 8 p.m.

Chris Howard, chairman of Kalf Fry for Phi Delta Theta, said the goal of the ball game Saturday and raising funds for

the Muscular Dystrophy Association.

Last year the concert raised \$10,000, Howard, a junior public relations major from Midland, said.

Money raised comes from ticket and merchandise sales. Floor seats are sold out. General Admission tickets are on sale for \$22 at the Student Union building along with Kalf Fry T-shirts for \$15. Tickets will be on sale at the door. The show is expected to sell out the 7,000 seats by show time.

The concert had humble beginnings, but has grown throughout the years.

"It started as just a small concert, and it has just grown bigger and bigger every year," Howard said.

The headlining act, Dwight Yoakum, is expected to put on good show, said assistant chairman Travis Roby.

"I'm excited to see Dwight Yoakum. I've never seen him before," said Roby. "I've never marketed major from Katy. Robert Earl Keene has played in Lubbock before. College kids like him."

The Shane Rogers Band is a local band that usually plays at the Blue Light Cafe, he said, and students can expect to have a good time.

"It's going to be crazy," he said. "(Students) come to raise money for MDA and a real good show."

Kalf Fry arranges its lineup by going through a list from producers and figuring out what musicians fit the budget and schedule.

While the music is a big draw for the crowd, the calf fries are a well-known part of the event. Calf fries are deep-fried calf testicles.

"It takes about three to four days of cutting, about 10 hours total," Howard said. "It's always good times there. It's tradition."

Howard says he likes calf fries and has eaten them since he was young.

Hunter Lord, chairman of Kalf Fry for Kappa Alpha, is excited about the event and being able to eat calf fries.

"They taste like chicken nuggets," said Lord, a senior finance major from Austin. "I like them with ketchup."

The calf fries are going to be prepared by Danny's Fins and Hens restaurant at the event and will be available for purchase at concession stands.

The money not needed for next year's concert goes to charity, and the rest is kept to put on the show again. It costs more than \$100,000 to pay for the show, Lord said, so students should come out for the good time to be had.

"Students should come for calf fries, beer and dancing," Lord said.

University Symphony Orchestra to play Sunday

By Megan LaVoie/Staff Reporter

After a late night watching Texas Tech face off against Texas A&M, some students might enjoy taking a moment to relax and recuperate Sunday afternoon by attending the Texas Tech University Symphony Orchestra concert.

The concert is free and will be held at 3 p.m. Sunday in Hemmle Recital Hall.

The University Symphony Orchestra comprises of more than 90 members, ranging from freshmen to doctoral students. The University Symphony is a full orchestra including strings, woodwinds and percussion.

"The University Symphony Orchestra is made entirely up of Tech students and a lot of the students are also in the Lubbock Symphony Orchestra—these are the best musicians in the city," said Liza Muse, information specialist with the school of music. "This concert will be more standard than the other concerts the symphony puts on throughout the year, such as the Halloween or April Fools concert, but the music being played and the concert as a whole will definitely be a great experience."

Gary Lewis, conductor and director of the University Symphony Orchestra, said the music played will be of high caliber and importance.

"The orchestra will be playing three pieces: 'Overture to the School For Scandal' by Samuel Barber, 'Holberg Sweet' by Edward Greig and 'Symphony No. 1' by Johannes Brahms," he said.

Lewis said 'Symphony No. 1' is a monumental work.

"Being able to play that piece and play it well requires a lot of maturity and discipline from the orchestra," he said.

Rueban Gonzales, a double bass player with the orchestra and a senior music education major from Oklahoma City, Okla., said people who attend the concert will be enriched and gain a better appreciation for the music, Johannes Brahms in particular.

"Just the opportunity to experience Brahms is worth coming to see," he said.

Gonzales said most students don't know who the famous composer is.

"I have told people about the composer Brahms and people say—oh yeah, the ice cream brand. People just don't know how amazing his symphony is," he said.

Gonzales said he expects the turnout to the symphony to be a mixed crowd.

"This concert is more serious than some of the other concerts the symphony puts on; it is definitely a harder concert and won't have the jovial feeling of some of the fun concerts such as the Halloween and pop music," he said.

Lewis said the orchestra has been practicing three times a week for an hour to two hours each session since the beginning of the year.

Lewis said he anticipates a great turnout and several hundred people attend the concerts.

"Many people aren't aware that Tech has a high quality music department and a high quality orchestra—when people attend the concerts they are pleasantly surprised," he said.

Injuries force young netters onto court

By Jason Lenz/Staff Reporter

If life has handed the Texas Tech volleyball team a lemon, the Red Raider players haven't yet found the recipe for lemonade. After losing their sixth consecutive match against Iowa State Wednesday, the Red Raiders (8-6 overall, 0-5 Big 12 Conference) go into Saturday's match against the Kansas Jayhawks (10-5, 2-2). It is scheduled for 1 p.m. in the United Spirit Arena.

The Raiders have been plagued by injuries. Assistant coach Doug Babington said senior outside hitter Angela Mooney will not play; sophomore setter Abby Schukman might be out for the season; sophomore outside hitter Bre Pursley is doubtful, and redshirt freshman Nina Miller is probable.

With the older players out, the responsibility has fallen on the shoulders of three true freshmen, who started Wednesday. Babington said, even though Tech lost, the newcomers gained needed experience.

"I think the experience they gained last night will help," he said.

"We didn't win, but we played good in game one, and that's a positive experience to build on. We've just got to put a couple more of those games together, and I think we can do it. I know they want to do it; they want to be successful, and they want to win."

One of those freshmen is middle blocker Raven Garrett, who said playing time is necessary.

"I think the only thing that's going to get us used to it is the experience and repetition of getting in the game," she said. "Practice is a lot different than actually playing."

Practicing with teammates, Garrett said, is a different experience compared to game time action.

"I think mostly you feel comfortable with your teammates in the gym, and then when you step out onto the court and play against different opponents, you've got to know how they're going to react and try to learn what they're doing as well as try to play on your side," she said.

Junior setter Laura Grote said the team has been spread thin by injury.

"Not that I have any lack of confidence in the freshmen, but it's hard

when you have no one else to put in," she said. "When someone's having a bad day, you have no one to put in for them."

Injuries are part of the game of volleyball, Grote said, but they are usually spaced out better.

"That happens in volleyball," she said. "People get hurt, but it just happened to us all at once, and that's frustrating."

Playing Kansas Saturday will be tough, Babington said, especially with the Jayhawks' addition of players like freshman outside hitter Janaina Correa. "Kansas is a good team," he said. "They've got a couple of Brazilians that look to be pretty good, and they always have their normal group. Every team in the Big 12 is good."

For Tech to win, Grote said the Raiders have to repair the hitches in communication.

"If you watch our matches, when we're talking, and we're moving, we do fine; we play great," she said. "But as soon as that breaks down, then our level of play breaks down, too."

Though it is still early in the season, the Raiders need a victory, Grote said.

"I think basically any match at this point is a must-win," she said. "We're at home again, and we're 0-2 at home right now. It would be nice to get a win against a pretty good team at home."

Oklahoma State punter Farden following footsteps of Cowboy legend, grandfather

(U-WIRE) STILLWATER, Okla. — Safe. That's how the Oklahoma State Cowboys feel when Cole Farden steps on the field.

A junior from Grapevine, Texas, Farden averaged a little over 41 yards per punt last year.

Farden, the grandson of former OSU great Neil Armstrong, said his grandfather had a big impact on his decision to come to OSU.

"Growing up in Texas, I didn't really know much about OSU," Farden said. "Knowing that he played here and was successful really helped me to make the right choice."

Armstrong was an All-American for the Cowboys in 1946 as a defensive end, but played both ways as was customary when he played.

Armstrong served not only as a grandfather but also as a role model for young Farden.

"He was my big role model growing up," Farden said. He coached at Oklahoma State and played in the

NFL for five years for the Philadelphia Eagles.

"You just got to respect him," Farden said. "I just tried to take in everything he taught me and apply it to my game."

Even though Farden has gotten

off to an excellent start, averaging just over 46 yards per punt with only one blocked, he still knows there is room for improvement.

"I don't think I'm even close to where I want to be yet," Farden said. "I still have a lot of areas I need to improve on."

Raiders hoping momentum will continue

By Joey Kirk/Staff Reporter

Reconstruction of the Texas Tech soccer team's confidence has already begun but two major road-blocks might pose problems in its progress for success.

Tech hosts two Big 12 Conference opponents, which are nationally ranked teams this weekend at R.P. Fuller Stadium. The 15th team in the nation, Colorado, will face the Red Raiders on Friday, and No. 16 Nebraska will face the Raiders Sunday.

Tech begins play at 7 p.m. Friday against Colorado and again at 1 p.m. Sunday against Nebraska at R.P. Fuller Stadium.

Tech is entering these games with a Big 12 record of 1-1 while Colorado and Nebraska are both 2-0.

Head coach Kevin Oskam said like the Tech-Texas A&M football game, the two matches will be a major factor in their season.

"With the A&M football weekend, it's gonna be huge for us. We have to take Colorado, and they are going to be very, very good," he said. "And it's going to be tough to face Colorado."

The Buffaloes have several characteristics that Tech lacks, Oskam said, and the Red Raiders have to find a way to make up for it.

"They have team speed. They have very technical players," he said. "They play off the ball very well. We just need to find a way to contain them."

Colorado has progressively gotten better throughout the years, Oskam said, but this year is its best yet.

"Colorado's a much-improved team. They're already a much better this year. Look at the rankings," he said. "For them to be in the top 25, Ne-

braska is always in there, but for Colorado to be in the top 15, that's awesome. It shows you the strength of our conference really."

Senior midfielder Kerri Campbell said Colorado's sophomore midfielder Fran Munnell will be Tech's toughest challenge.

"Colorado has an awesome center-mid," she said. "(Munnell) was Freshman of the Year last year, and she was just voted as Big 12 player of the week last week. She's gonna pose problems for us."

Senior forward Katie Arsenault said to keep up the morale of the team, Tech has to be able to win one this weekend.

"I think that it's imperative that we have to at least take one for our confidence especially going into such a big weekend at UT and A&M next week," she said.

Aside from Colorado, Oskam said Tech is looking for its first ever victory in soccer against the Cornhuskers.

"They're athletic. They're fast. They're strong. They're Nebraska," he said. "All of their athletic teams are like that. We've never beaten Nebraska, ever."

In the Big 12, Campbell said all matches, including Colorado and Nebraska, will be difficult because the teams have many similarities.

"All of the teams are equally good in my eyes," she said. "Both Nebraska and Colorado are quick, strong teams. They can play."

In order to be successful against these two national ranked teams, Oskam said the team has to keep their confidence high and leave with a win.

"We have to continue working hard and keep our morale up," he said. "Hopefully take a win again somehow."

Arsenault said the importance of these two games is beneficial to the team's well being.

"We have to keep our confidence up," she said. "We can't afford to lose these."

Although the team members said the Big 12 is one of the hardest conferences, Campbell said the team that wants to win more will take home the victory.

"Every game is going to be extremely hard," she said. "Who ever shows up to play in our conference is going to win."

Longhorns content with two quarterback situation

(U-WIRE) COLLEGE STATION — ESPN's "College Gameday" will be in Austin, Texas Saturday to watch the No. 13 Texas Longhorns host the No. 16 Kansas State Wildcats.

The last time the "Gameday" crew visited Austin was in 1999, when the Longhorns upset No. 3 Nebraska on their way to a Big 12 South title. The Longhorns hope to duplicate that success in a game that should be this year's first marquee matchup between two Big 12 teams.

Texas enters this game with the quarterback collaboration of Chance Murray and Vincent Young. UT coach Mack Brown is quick to point out that this time around there is no controversy in Austin.

"We like the fact that both quarterbacks are playing well,"

Brown said in his weekly press conference. "Right now, we like the one-two punch they bring us."

This one-two punch is making game planning harder for opposing defenses. While the Longhorns are working

on the collaboration of two quarterbacks, Kansas State is just happy to have starting quarterback Eli Roberson back. After missing two and a half games, Roberson will be ready to suit up Saturday.

Roberson's return can only mean trouble for the Longhorns.

"He can beat you with the quarterback draw, the quarterback counter, with the option and scrambling," Brown said. "Then he can beat you with his arm. He's a guy that will give us as big a challenge as we will have the rest of the year."

GAMEDAY: TEXAS A&M (2-2) AT TEXAS TECH, (3-1)

9 p.m. Saturday at Jones SBC Stadium. • KKAM 1340-AM • Line: Raiders by 5.5 • Series: A&M leads 33-27-1 • Gametime weather: Rain, 64 degrees

Red Raiders anticipating a tough Aggie squad

By David Wiechmann/
Staff Reporter

The Texas Tech Red Raider players did not have any trouble finding motivation to talk about Saturday's

game against Texas A&M this weekend. In fact, they could not stop coming up with reasons to be excited.

"Naw, it's A&M," said wide receiver Nehemiah Glover about getting pumped up for the game.

The Red Raiders and the Aggies will square off in a matchup that has been debated between both sides as a rivalry, and offensive lineman E.J. Whitley said he is ready to face the Aggies and is tired of having to prove

Tech's worthiness.

"There's nothing like going on the field knowing you're about to play A&M," he said. "I can't really explain it. I think it's the fact that we've beat them six out of the last eight years, and they continue to think they're better than us."

Whether it's a rivalry or not will not matter after kickoff at 9 p.m. at Jones SBC Stadium because the Raiders have one thing on their minds — a win.

"It's a different game," receiver Mickey Peters said. "We gotta go and play hard and fight for the win. Most people think it's a game of rivalry, but I don't think so. You've got to go in and play the same type of game that you played last week and the week before."

Last season the Raiders came from behind to force overtime in College Station, and the players said they know the Aggies have a bad taste in their mouth from that loss.

A&M may also have a bad taste from its current two-game losing streak, and Peters said Tech better be ready for an Aggie team that believes failure is not an option.

"They're coming off two losses, and they feel that they can't lose again," he said. "We're gonna see their best

play, and we're gonna have to step it up; and we're gonna have to show them our best play."

Tech is coming off a fourth quarter come-from-behind win on the road at Mississippi, and Glover said it was the best game he's been a part of, but hopefully it will be outdone this week.

"That was one of the most exciting games I've ever played in," he said. "I wouldn't trade it for nothing, except this Saturday."

A win this Saturday would mean the Raiders open Big 12 Conference play 1-0 and would be 4-1 on the season. A loss for the Texas A&M would drop them below .500 at 2-3 on the year.

Peters said he believes an opening win for either team may be crucial to setting a tone for conference play.

"The Big 12 Conference is one of the best in the nation; I think it might be the best in the nation, and when you win on the road in the Big 12 Conference it's a big deal," Peters said. "So we know they're going to come in here fighting hard, and they're gonna give us their best game."

Linebacker John Saldi said when you add the rivalry aspect to the game it makes it even more intense.

"First off, it's a conference game, both teams are looking for a win, but also it's a rivalry so we're really looking for a win," he said. "It's really about who has bragging rights after the fourth quarter."

The two teams matchup as an offensive powerhouse that throws the ball all day in Tech and a nearly balanced attack that features two quarterbacks at A&M. Tech averages 571.8 yards per game compared to the Aggies' 360.2. And Tech has the edge in scoring by almost 28 points a game.

Tech has been able to produce on offense this season, but Leach said he is looking for more from the unit. He said despite B.J. Symons' record-setting 661 passing yards things at Tech could be better.

"It's not as good as 662, but it's better than 660," he said. "I was happy that he threw for that many yards. If he played a little sharper, maybe he'd

GAME NOTEBOOK

■ 50,100 tickets have been sold for the game. Almost 2,500 tickets are still available at \$75 per ticket. The ticket office will be open from 8:30 a.m. to 5 p.m. today and will open at 2 p.m. Saturday.

■ There will be an overflow section for students at the game. Tech athletic director Gerald Myers said Section 14 will be available and possibly areas in the North end of the stadium.
