The victims of 9/11 have been in our prayers for the past three years.

> - GREG JONES EXECUTIVE VICE PRESIDENT FOR AMERICAN STATE BANK

Tech, Lubbock remember 9/11 tragedy

Story by Jackie Schirard and photo by Hutch Stilgenbauer/The University Daily

o commemorate the tragic events of Sept. 11, 2001, American State Bank sponsored two candlelight ceremonies Sept. 10 and 11 at Kastman Park along with the groundbreaking construction of a memorial for first responders who paid the ultimate sacrifice in their line of duty.

The candlelight ceremony was composed of 1,000 American flags raised in the park, combined Lubbock Independent School District high school choirs and a video presentation with comments from U.S. President George W. Bush.

Executive Vice President for American State Bank Greg Jones said the small flames of the candles represent the much larger torch held by the Statue of Liberty.

"We need to remember that survivors are sometimes the ones that suffer the most," Jones said. "The victims of 9/11 have been in our prayers for the past three years. This is also a tribute to people who work and put their life on the line everyday."

Jones said American State Bank started the ceremony last year as an ongoing effort to honor those who have died in terrorist attacks and those who died in the line of duty trying to save them. He said the goal is to make the public aware of the horrible tragedy endured and how easily tragedy can happen.

"It's hard to fight an enemy that we can't see in front of us," Jones said. "We're in a different world than we were in five to ten years ago.'

Jones said first responders and volunteers helped place the flags in Kastman Park. Flags will be sold for \$25 and T-shirts for \$5. The proceeds will go toward nursing scholarships for the Texas Tech Health Sciences Center, Lubbock Christian University, South Plains Community College, Wayland Baptist and Hendrick Hospital in Abilene.

Kelsey Kirkpatrick, a 17-year-old student from Lubbock, attended the ceremony. She sat with her father, a Lubbock fire fighter, and mentioned her boyfriend, a fire fighter with the Marine Corps, is in Japan

"It's hard with my dad, because when he goes to work, you worry about him not coming home," Kirkpatrick said. "When the events of 9/11 happened, I was scared, because my dad volunteered to go to New York. This ceremony is good, because everybody can see the families of first responders and see what a big help people in service are."

Lubbock Police Department Chief of Police Claude Jones said the Pledge of Allegiance at the ceremony.

Bike theft becoming a problem on campus

STILGENBAUER/The University Daily AMNIH ABOTTEEN, A freshman dance major from Houston, locks up her bike on campus Friday afternoon.

By Andrew Bell/ The University Daily

Since the fall semester began, a number of bicycles have been stolen from bike racks throughout the campus.

In order to reduce the number of stolen bikes, the Texas Tech Police Department is aiming to educate students to prevent the theft of personal property.

During the past week, five bicycles were stolen, according to the Tech Police Department. The majority of the thefts took place at residence halls, according to the department's daily reports.

As the number of bike thefts increase, Maj. Gordon Hoffman of the Tech Police Department said the force would be working harder to take care of the problem.

"We are aware of the problem, and we are trying to address it to try to reduce the number of stolen bikes," he said. From January to Sept. 10 2003,

33 bike thefts occurred, causing a total loss of \$7,838, according to the department's case log summary. However, in the same time period in 2004, 65 bike thefts occurred, causing a total loss of \$15,140, according to the summary.

In 2003, the majority of the thefts took place in the month of May. However, the thefts in 2004 have been spread throughout the year, with the majority occurring in the months of February, March and May, according to the summary.

The total loss for each year is based upon the value of each bike stolen. For 2004, individual losses ranged from about \$50 to about \$1,000, according to the summary.

Derek LaRue, manager of Paul's Parts, said a person normally spends somewhere between \$250 to \$400 for his first bike. However, after spending that amount, the person does not realize how big of an investment a good lock for the bike is, he said.

The problem with illiteracy is the

helps adults in the Lubbock area by offering free classes and oneon-one tutoring in basic reading skills, English as a second language, preparation for the GED as well as classes to help with dyslexia. This organization has been around since the '80s and has helped a lot of people out of poverty. Last semester, I worked for this organization and was in awe at how many people walked through the doors in dire need of service. Most of these people were just laid off from their minimum wage job that they had for decades and could not find work because they lacked the education requirements of the modern workforce. These were hardworking people ashamed of their low literacy level, but wanted to maintain a living for their family. Illiteracy is a disease for which we have the cure as long as people are willing to help those who do not yet know the gifts of reading. The Lubbock Area Coalition for Literacy always is looking for volunteer tutors. The amount of time to change someone's life through literacy can be as little as two hours a week. Call (806) 747-READ for more information.

Sounding the horn: fighting war on evil

ine eyes have seen the glory of the coming of the Lord. He is trampling out the vintage where the grapes of wrath are stored. He has loosed the fateful lightning of his terrible swift sword. His truth is marching on.

Those immortal words were penned in 1862 by Julia Ward Howe. She wrote the poem, which went on to inspire millions since then, in the midst of the Civil War, the greatest internal crisis this country has ever known.

Today, 150 years after the Civil War, the United States is in the grip of another crisis - one that is not bound by state lines, national boundaries or barriers. It is divisive in nature. This crisis has separated left from right, neighbor from neighbor, parents from children and the United States of America from the truths it once had - the inspired words the founding fathers used to create the Constitution.

I have seen him in the watchfires of a hundred circling camps. They have builded him an altar in the evening dews and damps. I can read his righteous sentence by the dim and flaring lamps. His day is marching on.

The war we are fighting today is not fought with guns, bayonets and cannons. We do not gather around campfires to stay warm and plan our strategy, hoping the next day, when we go over the top, it will not be the end. We do not have a battle plan to follow that tells us when to flank and when to fire.

The enemy we are fighting is

Now is the time for everyone, regardless of color, gender, nationality or religion, to go to war, not against Iraq, Afghanistan or terrorism, but against evil.

seen so many fingers pointed at who screwed up on Sept. 11, 2001. President Bush should have seen the signs; President Clinton should have been tougher; the CIA and the FBI should have had better sources and informants.

I have ready a fiery gospel writ in burnished rows of steel, "As ye deal with my contemners, so with you my grace shall deal." Let the hero, born of woman, crush the serpent with his heel, since God is marching on.

It is time to put the fingers down.

happened. Clinton is not to blame for what happened. Each of those 19 men who were in the planes made the decision to do what he did. Osama bin Laden and the rest of al-Qaida made their decisions as well. The leaders of our country, or any

other country, are not to blame for the choices made by these men. The entire Muslim world is not at fault for what happened in our country on that day three years ago. A few people who made a decision to end their lives and the lives of thousands of others in a horrific spectacle are to blame.

He has sounded forth the trumpet that shall never call retreat. He is sifting out the hears of men before his judgment seat. Oh, be swift, my soul to answer him! Be jubilant, my feet! Our god is marching on.

Now is the time for everyone, regardless of color, gender, nationality or religion, to go to war, not against Iraq, Afghanistan or terrorism, but against evil. The rest are battles in the actual war - the war that, if the enemy wins, will take away freedom, good and right. In this war, if the enemy wins, everybody - man, woman, black, white, Middle Eastern, Asian, European, Christian, Muslim, Jew, atheist and agnostic - lose. Fight for your beliefs, fight for freedom, fight for your rights. Never stop fighting, for this war is not won by gunfire. It is won by determination, desire and courage.

In the beauty of the lilies Christ was born across the sea, with a glory in his bosom that transfigures you and me. As he died to make men holy, let us die to make men free, while God is marching on.

The words of "Battle Hymn of the Republic" speak of God, but they are not exclusive to those who Bush is not to blame for what believe in God. They are written for all those warriors in the everlasting battle of good and evil. Never give up; keep the faith.

coming up on your digital cable or even read my column. Functionally illiterate is defined as having reading and writing skills insufficient for ordinary practical needs. The fact is, 25 million Americans lack the basic reading skills necessary to function as parents, consumers, citizens and workers. Of those 25 million, 54,077 are estimated to reside in the Lubbock Area. Texas has one of the highest illiteracy rates in the country, ranking 47th out of the 50 states.

The problem with illiteracy is the disease is not as apparent as others such as cancer, AIDS or multiple sclerosis. You cannot see the harm to the person. Most illiterate people mask their symptoms out of shame, which is how they reach adulthood without getting the help they need. Multiple side effects to illiteracy exist, but the impact on the economy and to future generations is one felt by all. Illiteracy is an inherited disease; children of functionally illiterate parents are twice as likely as other children to be functionally illiterate.

For a child to be a successful reader, he must have his parents read to him at an early age. International studies have shown a 9 percent decrease in childhood mortality for each year of maternal education completed. Mothers who are liter-

ate are more likely to receive the healthcare needed to bring a healthy baby into this world than those who are illiterate.

Educational level of adults is important for successful workforce development and productivity. Functionally illiterate people can qualify only for minimum wage jobs with no health or other benefits and therefore remain below the poverty level. Low literate individuals are more likely to be on Welfare and have Medicaid. How many jobs can you think of that do not require you to read or write?

Currently, Lubbock does have an organization fighting the spread of illiteracy - the Lubbock Area Coalition for Literacy. I know the name is a mouthful, but this organization

selves for the most part, and sadly,

the truth is we live in a country

where the notion of self-govern-

ment is laughed at and mocked

as being idealistic and simple

minded. When did America turn

into a semi-fascist military state

concerned with governing other countries rather than granting its

own citizens the freedom they are

guaranteed? Therefore, is not vot-

ing more patriotic? Let us all stand

up, as the youth of this country,

and try to change things. Change

all begins by tearing up those

voter registrations and trying to

not clear; it does not have a face, a flag or a battle march. The battle wounds cannot be healed in the traditional methods; new ways that get to the very core of the problem must be found.

In the last three years, I have

In a continuing theme from last year, the Texas Tech Athletic Department is planning a wave of announcements encouraging respectful fan behavior at Red Raider sporting events.

Last year, the athletic department contacted The University Daily to map out its plan to quell fan behavior that has resulted in a bad reputation for Tech fans throughout some of the nation's universities.

At that time Athletic Director Gerald Myers said the Big 12 Conference athletic directors had voted for a new policy that denounced fans' entering the playing surface after games. He said he understood the policy to be binding, with the possibility of fines for the athletic department if Tech fans ran onto the field after a game or engaged in an incident with opposing players.

However, later that season, the University of Kansas and University of Missouri had incidents at their stadiums when students entered onto the field after victories. When The UD contacted Big 12 commissioner Kevin Weiberg, he said Kansas and Missouri would not be punished, and fines for breaking the policy had not been approved.

On Thursday, Myers spoke to The UD editorial board and said

said the notion best in his groundbreaking essay "Civil Disobedience:" "I think that we should be (men) first, and subjects afterward. It is not desirable to cultivate a respect for the law, so much as for the right. The only obligation which I have a right to assume, is to do at any time what I think right."

Brandon Hernsberger, graduate student from El Paso studying English.

Toth is a graduate student from Roswell, N.M., studying business and editor-in-chief of The UD. E-mail her at ud@ttu.

sidelines but has now made the sideline available only to those with credentials.

These people are not allowed on the playing surface and neither should fans be.

Throughout the last decade, incidents of injuries have occurred because of out-of-control fan behavior. A woman at a University of Toledo football game was trampled and paralyzed. A Nebraska football player punched a Missouri fan after heckling him on the field after the game, and Ohio State football fans started a riot after a victory against Michigan.

Fans must learn a new role in the world of athletics. Tech fans must stay off the field to protect themselves and those who are supposed to be on it.

The university is not trying to ruin the game day atmosphere. Myers reiterated throughout our meeting he thinks Tech has the best student section in the nation.

Now it is up to that fan base to remain the most rowdy fans in the country and also be the most respectful by staying off the playing field, staying in control of their actions and allowing those playing and coaching the game to remain protected.

Integrity Matters

NEW to Texas Tech this Fall will be the opportunity to voice your opinion on academic dishonesty issues at Texas Tech! Your opinions will help make changes happen on our campus. It's confidential and anonymous. Your input will actively be used in decisions made at the university.

The survey will be sent through your TTU email account. This survey is open to all Sophomores, Juniors, Seniors, and Faculty.

Keep watching your TTU email account, take the survey, and tell us what you think You taking this survey will make a positive difference!

This survey is sponsored by the Student Mediation Center/Judicial Programs, Student Government Association, Office of the Provost, and the Division of Student Affairs. Texas Tech is also working with the Center for Academic Integrity at Duke University to make this

It was mentioned at New Student Orientation, but now is the time to really know it! All NEW and RETURNING students should visit the following website to view the Code of Student Conduct: http://www.studentaffairs.ttu.edu/

Click on "Student Handbook 2004-2005" and go to the Code of Student Conduct once the document opens.

Following the rules are easy. It's just a matter of knowing what they are so you can make good decisions.

> Student Mediation Center (Legal Services and Judicial Programs) 250 West Hall • 742-1714 / 742-3289 • http://www.depts.ttu.edu/studentmediationcenter

Big 12 North turned upside down

OMAHA, Neb. (AP) - Some flipping and flopping is going on in the Big 12 North.

The flipping? Kansas and Colorado. Those two were picked to finish in the lower half of the division, but they are off to 2-0 starts and are the only unbeaten sissippi. The Golden Eagles converted three Joe Dailey interceptions and a Dailey teams in the North.

The flopping? Kansas State, Missouri and Nebraska. The three were predicted to finish 1-2-3 in the division, and each suffered embarrassing losses in the second nearly doubled the Eagles' offensive yardage (476-239). week of the season.

ranked this week in The Associated Press Top 25 - the fewest since the league and unfortunate to see our players have a game taken away by themselves." started in 1996.

The only ranked teams are No. 2 Oklahoma and No. 6 Texas.

Previously, the fewest number of ranked Big 12 teams was three. Last week, there were four in the Top 25, but Kansas State and Missouri are no longer among suffered a major setback in losing 24-14 at Troy on Thursday. The Tigers return the elite.

Kansas followed its easy season-opening win against Tulsa with a 63-14 rout of Toledo. The Jayhawks go for three in a row this week at Northwestern.

Colorado, coming off a spring and summer of sex and recruiting scandals, struggled on offense but parlayed touchdowns off an interception return and blocked punt into a 20-12 road win over Washington State. The Buffaloes will try to extend their win streak at home against North Texas.

Defending conference champion Kansas State (1-1) is reeling after its 45-21 loss at home to Fresno State. That loss followed a harder-than-expected, 27-13 win over Division I-AA Western Kentucky in the opener.

The Wildcats can take solace in knowing that they struggled to a 4-3 start last year - including three straight losses - before winning seven in a row to claim their first Big 12 title.

Senior tight end Brian Casey said he would remind his younger teammates about how last season played out.

"We did the same thing last year and, like coach (Bill Snyder) said, we still have our destiny in our hands," Casey said. "We can still go all the way. The teams in the national championship game last year had a loss, too."

Like Kansas State, Nebraska lost a home nonconference game for the first time since 1991.

The Cornhuskers fell victim to five turnovers in a 21-17 loss to Southern Misfumble into 18 points.

What frustrated the Huskers most about the loss to Southern Miss was that they

"There were a lot of good things done on the field," Nebraska coach Bill Callahan The turnabout in the North has led to the Big 12's having only two teams said. "I felt we improved in certain areas of our play, and it's just really disappointing

> Nebraska, which visits Pittsburgh on Saturday, is off to a 1-1 start for only the second time since 1985.

> Missouri (1-1), which many had predicted to be set for a breakthrough year, home to play Ball State on Saturday.

> Iowa State, which ended a 10-game losing streak with last week's shutout of Northern Iowa, played then-No. 12 Iowa tough before losing 17-10 on the road. The Cyclones rushed for only 66 yards against the Hawkeyes.

A LOOK AT THE BIG 12 SOUTH

- · Oklahoma's Jason White threw for 257 yards and two touchdowns, and Antonio Perkins tied the NCAA record with his eighth career punt return for a score in the Sooners' 63-13 win over Houston.
- · Cedric Benson rushed for 188 yards and scored two touchdowns in a Texas 22-20 victory against Arkansas.
- · Oklahoma State's Vernand Morency rushed for 184 yards and a touchdown and Donovan Woods ran for two scores and passed for another in a 38-21 win against Tulsa.
- Texas A&M rebounded from a 20-point loss at Utah to win its 17th straight home opener 31-0 over Wyoming.
