Filing period nets primary opponents

The filing period for positions on the March 12 primary ballot ended Tuesday, Jan-

EMT training to be offered

The West Coke County EMS will be offering an EMT class beginning February 5th at 6:00 pm. Classes will be held on Monday and Thursday nights from 6:00 to 10:00 pm. The cost of the class will be the price of a test book and workbook. It is the policy of the EMS to reimburse the cost to anyone who serves as an active member of the West Coke County EMS for 6 months.

The EMS is at a critical point due to lack of people willing to serve as volunteers. If we don't have more people to help staff the ambulance, there is a real possibility the time will come when the EMS is no longer able to provide the personnel necessary to have an EMS service. Take a moment to think of the reality of not being able to dial 911 and know that help is available.

For more information on the EMT class, call Mary Bessent at 453-2492.

A stroke can change your life forever

Hatley celebrates 90th birthday

It was a great day for Robert Lee native Zola Hatley when she observed her 90th birthday with a party at the local senior citizens center on Wednesday, January 3.

Kelly Millican, current supervisor/coordinator of the center, and Margaret Martin, the first supervisor/coordinator of the center, and Jeffie Roberts, of the Robert Lee chapter of the Eastern Star, hosted the occasion.

Zola was born on January 3, 1906 to the late C.L. and Eva (Vestal) Hughes in Robert Lee. She was one of six children that also included Emery, A.V., Artie, and David and Bonner, who died at an early age.

They resided on a farm and attended the First Methodist Church in Robert Lee.

Zola attended school in Robert Lee where she graduated in 1924 along with six other girls.

She had the reputation of performing all the duties that men usually did, including building and repairing fences, building barns and sheds, breaking land with a disc plow pulled with four horses, milking cows, chopping and picking cotton, gathering grain and other tasks associated with farming.

After her father died in 1924, her mother had her cutting down trees, chopping and hauling wood.

She attended Nursing School at Scott and White Hospital in Temple in 1926 until 1928.

She married Ell Hatley on January 4, 1928 in Robert Lee. A son was born to the couple on March 31, 1929. He passed away on Labor Day, September 4, 1995.

They lived on a farm nine miles South of Robert Lee for 14 years. They moved to town where they operated a Co-op Locker Plant serving Coke and surrounding counties where they took care of deer, beef, pork, and poultry by dressing, cutting, packaging and freezing the meat from 1946 to 1956.

Zola became a Nurse's Aide at the Robert Lee Hospital and Nursing Home in 1958 where she worked for 15 years. Mr. Hatley died in 1975.

Zola began work with the Green Thumb program where they hired her to work at the Coke County Senior Citizens Center with Margaret Martin, supervisor/coordinator for the Area Agency on Aging in Coke County.

Her duties have included telephone duties, assisting with programs including the distribution of commodities where she probably sacked hundreds of pounds of butter, flour, meal, cheese and other items. She also worked with health screening clinics, meals programs, recreation and paperwork, and she is still continuing these duties.

She is a member of Northside Church of Christ and the Robert Lee Chapter of the Order of the Eastern Star where she has served twice as Worthy Matron in 1957 and 1977.

Cake and punch were served to guests on January 3 to celebrate Zola Hatley's 90th birthday. Hostesses for the occasion were (l-r) Kelly Millican, Jeffie Roberts, and Margaret Martin. The birthday honoree is pictured third from the left.

Her home hobbies include gardening, quilting, and carpentry work in the workshop.

She has grandchildren and family members each year as Thanksgiving and holiday guests.

Women need to lead healthy lives

Women who take care of their family and career often forget to take care of themselves.

A new brochure from Baylor College of Medicine in Houston recommends ways women can reduce their risk of disease by incorporating a healthy lifestyle into their hectic lives.

The brochure, "Women's Health: Ideas for a Lifetime of Wellness," produced by Baylor's Office of Health Promotion addresses ways women can reduce their risk of disease including breast cancer, heart disease and osteoporosis.

For example, a regular breast self-examination should be a part of a woman's monthly routine. Suspicious lumps should be examined by a physician.

"Also, few people know that heart disease is the leading cause of death in older women," said Dr. Raye C. Hurwitz, an assistant professor of medicine at Baylor.

"Menopause is one condition that not only causes physical and sexual changes in women, but also psychological changes," she said. "Trouble concentrating, memory impairment, and depressive symptoms can be frequent at the onset of menopause and can be relieved with treatment."

She suggests some lifestyle changes to increase your physical and mental well-being:

- * Eat a high fiber, low-cholesterol, low-sodium, low-fat diet, including fruits, vegetables, fish, and lean meat.

- * Drink alcohol only moderately, if at all.

- * Exercise regularly. Take walks, go bowling or do aerobics.

- * Don't smoke.

- * Get regular check-ups that include cholesterol, blood pressure, and bone density screenings.

- * Get plenty of sleep.

For a free copy of the brochure, send a self-addressed, stamped envelope to Women's Health, We Care For You, Baylor College of Medicine, Houston, Texas 77030.

In the event it is not practical to collect or remove garbage from a street as to those locations and/or sites where said street is not fully "developed", "opened", or other obstruction may exist, the owner, occupant, tenant, or lessee of the premises shall place containers at points designated by an authorized agent of the City, said point

O.H. Ivie lake report

There have been no recent reports of walleye or white bass being caught, and the catfish weren't biting much. Black and smallmouth bass conditions were recorded as fair to good, but the fishing wasn't all slow. The crappie were really hitting!

Lots of crappie were being caught on both minnows and jigs during the day and night. In water 20-30 feet deep, good areas to try were the bluff off of Kennedy Park, the highway bridge over the Concho River, and the Observation Point Bluff.

The bigger bass were hanging around the points and along deeper shoreline areas. Smaller bass were found in water 5-10 feet deep. Black bass were going for spinner baits, crank baits, and slabs, and the smallmouth were showing interest in crank baits, jigs, and slabs.

Catfish were predominantly around the upper ends of the Colorado and Concho Rivers in water 10-30 feet deep, and baited trotlines with live baits were best.

On January 2, 1996, the lake's elevation was measured at 1550.09, surface temperature was 48.5 degrees Fahrenheit, and the bottom was at 49.9 degrees Fahrenheit. The main body of the lake was clear, and the upper end was murky.

4-H members win at stock show

Shaping up our
herds for winter

With the recent rains we have received, we will be able to grow some forage for winter grazing, but we still will be below normal for total amount of available forage and the quality of that forage will be below normal protein levels as much of our grass we have grown in the last few weeks will not be cured out properly.

This is a good time to think about shaping up your cow herd to better utilize the available forage with the most productive animals we can. Even though the cow market looks like it could be down for awhile, those open cows, slow breeders, and cull cows will bring about as much now as they will later. Our cattle are probably as heavy and in good a flesh now as they will be when winter sets in. These cows will generally cost you one dollar a day to keep, whether the market is good or bad and whether the pastures are good or bad. If a cow is open or slow to breed, this delays the amount of time it takes to receive income from their calves but the cost of production goes on. If a cow is going to cost about \$365 a year, she better sell you a calf every 12 months with current prices, to pay her way.

Even though the cow market is down and is likely to stay that way for awhile, it affords us a couple of good options. First, now is the time to cull these low producing cows or older, poor quality cows and replace them with young good quality cows for close to the same money. Herds can be upgraded on a depressed market cheaper and when the market does come back you should be raising heavier, better quality calves. Second, with our available forage down, it would be a good time to cull back on our herds and let the pastures respond and heal so that when the market
