### HOMECOMING ECHOES

**Many Ex-Teachers Register**  
Many ex-teachers in Haskell schools, including the county's first school superintendent, were among the throngs attending the 1959 Homecoming. The list of ex-teachers registering includes:  
Mrs. Irene Ballard, South Ward Elementary Principal and teacher, 1927-1945; Miss Jessie Vick, present County Superintendent; Mrs. Lela Jeanes Conner, grade school teacher, 1915-17; Eula Nell Seebach Poteat, North Ward primary teacher, 1922-25; Mrs. Ruth Chambers Cox, High School teacher, 1923-1924; Mrs. Florence Baldwin Fields; Mrs. Ed Sprowls, High School teacher, 1923-1932; Mrs. H. R. Jones; Mrs. Cretia Brooks, of Spur; Also, T. C. Williams, Cisco, first County Superintendent of Schools when the office was created in 1911; Mrs. Harriett Marlin Williams, South Ward

teacher; Miss Nevada Baker of Lubbock.  
Also, W. L. (Bill) Richey, former High School teacher and football coach; Mrs. Mary Mancill Holden, Ola Cass, Mrs. R. L. Foote, H. K. Henry, former Vocational Agriculture teacher.  
**Appreciates Homecoming**  
Gratitude to those who made the 1959 Homecoming possible was expressed by Mrs. Johnnie Morgan Bauer of Fort Worth, Class of 1925, in the following letter to The Free Press:  
To the Editor:  
I have just arrived home from the best Homecoming of all and since I am so full of memories and good times, I want to write a letter of thanks to all the dear people who made this 1959 gathering such a successful one.  
I am sure it is impossible for you who have stayed in Haskell through the years to know the thrill of coming home and seeing all the old friends and familiar places and reliving our childhood and school days for a few hours. I can hardly wait to get to the school building to register and guess who I will see first and if I will recognize people and hope that they will know me. As we live in this rushing age, it is so good for us to slow down and go home again and talk and visit with our school day friends. This town and the people and teachers in it were where we received our first impressions and first knowledge of life. We were born here, learned to read and write here, made lasting friendships, fell in and out of love, wept here, played here, went to church here, and were at our happiest time, so we come back to happy memories when we attend homecoming.  
So many thanks to Allee Payne and Allie Bell Smith, for their well planned program. It was so nice having the lovely homes of Haskell opened to us for class reunions. It is very typical of our wonderful West Texas Hospitality.

I have attended each Homecoming and it is a weekend I look forward to as something very special. I always miss seeing someone that I wanted very much to see so I will say "hello" to Miss May Fields and Hill Oates—somehow in the crowd, I missed speaking to both of them.  
Looking forward to 1961, I remain,  
Sincerely,  
Johnnie Morgan Bauer.

BY MRS. DELBERT LEFEVRE

Co. No. 4 Harrison Estate, Section 79, Block 1, H&TC survey.

Total depth is 5,608 feet in sand. Completion is to be made when a drillstem test was taken at 4,876-93 feet.  
With the tool open two hours, gas surfaced in 44 minutes. Recovery was 430 feet of oil, and 170 feet of oil and gas-cut mud.

Fletcher Oil & Gas Drilling Corp. of Abilene and Dallas has completed No. 2-B Eumice Strickland, J. McClanahan Survey 8. Location is in the Weinert, South (Zone B) Field in north Haskell County.

Daily potential was 134.61 barrels of 40.3 gravity oil. Flow was through a 24-64 choke with packer set on the casing and 130 pounds tubing pressure. It is producing from an open hole at 4,785-88 feet.

In Weinert, South (Zone B) Field, completion is underway at Fletcher Oil & Gas No. 6-A Hattie R. Norman, J. Korus Survey.

It was swabbing 10 barrels of oil per hour. Completion is being made through 16 perforations at 4,750-54 and through 56 perforations at 4,756-70 feet. Casing is set on bottom at 4,778 feet.

No. 6A Norman when completed will make the 30th well Fletcher has completed in the pools.

Fletcher discovered both the Weinert, South Zone A and B pools in late 1958.  
The wells, on a 40-acre spacing, each have a daily allowable of 73 barrels.

A proposed 5,000 foot wildcat 3 1/2 miles northwest of Weinert was drilling below 4,332 feet with no test taken.

It is Fletcher No. 1 Bert M. Davenport, A. M. Robertson Survey 2.

Sands Drilling Co. of Throckmorton No. 1-A S. A. Scott, et al, is a proposed 3,000 foot rotary project in South Haskell County.

Drillsite was staked 330 feet from the north and 770 feet from the west lines of John Harvey Survey.

Site has been staked for a new wildcat in the area three miles northeast of Rule.

It is Fletcher Oil and Gas Drilling Corp. No. 1 Willie Mae Greer, slated for 5,150 feet with rotary.

Mrs. W. Z. Summers entertained with a birthday party Friday, Oct. 2, in honor of her son Mike. Those present were Steve Clark, Martha Kay and Rickey Letz, Kent LeFevre, David Sellers, Mike and Rita Baldree, Kenneth and Terry Stremmel, Sammy Bell, Patsy, Ray and Peggy Clark, Phyllis Kay Stanhope, Debbie Plunk, Martha Seliers, Gary Spitzer, Gary Moore, Jimmy Leverett, Kenneth Jones, Yvonne Ross, Lyndell Quade, Clifford Gholson, Clayton and Calvin Stegemoeller and the honoree. The following mothers also attended: Mmes. Jack Jones, Joe Clark, Oran Baldree, Leon Stegemoeller and the hostess.

Mrs. Edwin Stremmel celebrated her birthday Sunday in her home. Guests were Mr. and Mrs. Jack Monse and Diane, Mr. and Mrs. Adolph Helm, Mr. and Mrs. Herbert Stremmel and Linda, Jeanette Helm and George Mullins of Stamford, Mr. and Mrs. August Stremmel, Mr. and Mrs. Leland Thane and Kerry, Emil and Hilda Stremmel, Mrs. Fred and daughter and grandson of Stamford.

Mrs. C. W. Scott and daughter of Eddy visited with Mrs. G. A. Leach and Mrs. Ethel Laughlin last weekend. Mrs. Polk, who is Mrs. Leach's sister, stayed for a longer visit.  
Bill Tabor, a junior at Texas Tech, was home last weekend with his mother, Mrs. John L. Brooks.

Winston Ulmer, a junior this year at Texas Tech, was home last weekend with his parents, Mr. and Mrs. F. A. Ulmer.  
This community received around five inches of rainfall the latter part of last week, and every one is now ready for some fair weather again.

Work was resumed the latter part of last week on the sidewalks at the Zion Lutheran Church.  
Mr. and Mrs. Fred Kupatt and their infant son, Kraig, came home Sunday. They had been staying with the Hewitts in Stamford since Mrs. Kupatt and Kraig came home from the hospital.

Mr. and Mrs. Herbert Nierdieck are the proud parents of a daughter, Melissa Ruth, born Friday, Oct. 2, at the Stamford Hospital. She arrived on her father's birthday, incidentally.

Ladies Missionary Society of the Sagerton Methodist Church have resumed their regular weekly meetings. They meet each Monday afternoon at 2:30, except on the third Monday of each month when they have a night meeting. They have taken up the study of "Contemporary Man and the United Nations." Mrs. Barney Ross is the president for the coming year and other officers are: Mrs. J. C. Harwell, study leader; Mrs. M. Y. Benton, vice president; Mrs. Cox, spiritual life leader; Mrs. J. C. Harwell, Missionary Education; Mrs. Leland Thane, treasurer and promotional secretary.

Drillsite is 425 feet from the south and 1,263 feet from the west lines of Lot 4, Coryell CSL Survey 72.

A Caddo well was plugged back and re-completed in the Zone A. Strawn pay in the Weinert Southwest pool five miles west of Weinert.

It is Humble Oil & Refining Co. No. 1 H. D. Gammill, Lot 6, J. McClanahan Survey.

Daily potential was 159.85 barrels of 35.1 gravity oil, plus 38 per cent water. It is pumping from 29 perforations at 4,772-87 feet.

mer Credit." This publication discusses the many phases of credit.

A few of the many reasons for using credit are: convenience, emergencies, savings, consolidation of debts and establishing a credit rating. Credit can be used at times to take advantage of special sales when cash is not available and also it is easier to return charged purchases than cash ones.

The specialists add that when using credit you should be cautious. When a person signs a credit contract, he mortgages his future income. The use of too much credit will lower the level of living. Research shows that people usually buy more when they can use credit. Also, goods bought at a store with charge accounts are usually more expensive because of the costs of investigating each person's credit rating and keeping records of payments; loss through non-payment of accounts; and difficulty of collecting from some customers.

This cost of credit is hidden, although included in the price of goods bought.  
The publication also discusses types of sales credit available, where to borrow cash, decisions the individual or family should make before using credit, and an explanation of legal contracts.

**PRESENTING FOR 1960... BUICK'S ALL-TIME BEST**

**THE TURBINE DRIVE BUICK '60**

A car with major advances in transmission, suspension, brakes, and engines which are Buick's alone today  
A solid, substantial car • A car of superb comfort, quiet, reliability • A car you should drive soon

 <b>New comfort, quietness, and quality</b> Doors that open wider—easier to get in and out. Family-size interior. Seats that are higher, more deeply cushioned, and repositioned to provide more room for feet and legs. Perhaps the quietest running car in America due to Buick's high use of insulation and torque-tube drive. Buick's quality control program comes to a peak in the Turbine Drive Buick '60.	 <b>New interior decor and convenience</b> An entirely new "Mirromagic" instrument panel. It lets the driver see speed, gas gauge, and other necessary readings at a glance in a mirror he tilts to suit his own eye level. And a new exclusive safety option—the Twilight Sentinel—that turns headlights on automatically at sunset... off automatically at sunrise. All-new colors and fabrics. Richer appointments. *At slight extra cost.	 <b>Outstanding performance with economy</b> 1. Buick's Exclusive Turbine Drive Transmission is jet-smooth, responds faster, more economically than ever. No gears ever shift while the car is in motion. 2. Buick's Exclusive Air-Flo Aluminum Drum Brakes—found on no other American car. Fin-cooled drums front and rear for faster cooling. Fast cooling means safer stopping, longer brake life.	 Slotted wheels pass a current of air from under the car constantly over the brakes for added cooling efficiency. (Wheels are 15" size which gives you up to 1/3 more tire life.) 3. Buick's exclusive Wildcat Engines give high efficiency with high economy. (An optional new LeSabre Engine is designed to give Buick performance on regular grade fuel.) <small>*Optional at extra cost on LeSabre, standard on Invicta and Electra.</small>

there is a heavy demand but remains constant and sure in hotness and plentifulness all the time. Soft water at the Laundromat is equivalent to filtered water for this reason: it will test not even one grain of hardness when regenerated. Ask to see it tested—compare it with your water or any other.

Because it is our business to see that you get 25 gallons of rain-soft water for each wash (and it is we who pay the gas, light and water bills for these washes you do) and because you can wash 8 to 10 pounds in a Laundromat for 20¢ actually 2 to 2½¢ per pound is all you are out when you wash at the Laundromat in town. You also save money on soap because you use (since you need) just half the amount of soap you are used to using in hard water. It is logical to reason out that your clothes are cleaner, brighter and softer. Why? Because there is no grit and residue left in the clothes nor will there be any in the bottom of a Laundromat washer, settled there for some one to clean out. They rinse beautifully leaving no lint clinging to your clean clothes or grit in them.

People and babies who suffer from skin allergy or diaper rash or other water maladies find they can substitute mild soap flakes for a detergent. They find it is beneficial and successful in a soft-water Laundromat wash. HAVE YOU EVER WASHED AT THE WESTINGHOUSE LAUNDRY-MAT STORE? It has many fine features you cannot find elsewhere that you will just love. Try it your next wash day—be seein' y'u !!!

Highlights and Sidelights From the State Capitol

BY VERN SANFORD  
Texas Press Association

Austin—This time three years ago nearly every newspaper in the state was writing about "the water problem."

Ranchers were hard hit. In many cases, due to lack of feed, they sold their breeding cattle, lost their land or went heavily in debt.

It was the climax of the most widespread drought ever recorded in this region. Average rainfall for the year dwindled to 16.2 inches, second lowest figure since 1888.

Office seekers in the campaign year of 1956 had a good deal to say about how hard they would work to "solve the water problem." Many did work hard.

But three years later the water problem is still far from "solved."

By the time the Legislature met in 1957, the rains had begun. It rained so much that many people, of necessity, became more interested in flood relief than drought relief.

Three major water measures were passed in 1957, however. These measures:

1. Set up the Texas Water Development Board with a \$200,000,000 fund to make loans to help pay for local water projects.
2. Established a planning division in the State Water Board to do research on water needs, but without authority to recommend an overall plan. Appropriation was \$900,000. Instead of the \$1,200,000 recommended by the governor.
3. Gave the Water Board authority to contract for water storage space in federal reservoirs, with legislative approval.

Last two of these were passed only after Gov. Daniel re-submitted them at a special session. And then they almost went under when a city-farm fight developed on the side issue of whether farmers should be able to dam up small lakes and use them for irrigation.

This year the legislature inched up the Water Board budget by \$200,000. But the \$2,037,000 appropriation was \$800,000 less than requested by the governor.

As yet, the Water Development Board has made no loans for construction. Engineers in the State Water Board's planning division are working on a statewide report due in 1963, and a federal commission is also making a study. But legislators are skittish about having anything that might be called a definite state plan for fear it will set sectional jealousies aflame.

So dear is water to most Texans' hearts that almost any move by anyone to do anything with some of it is sure to be interpreted by a neighbor as "grabbing."

Guadalupe-Blanco River Authority and the City of San Antonio had a long, bitter hassle over the Canyon Dam project.

Right now, the biggest fight is on the Trinity. After months of bickering, the City of Houston and the Trinity River Authority agreed to cooperate in building a dam at Livingston.

Now the San Jacinto River Authority is protesting. SJRA officials are telling Houston people that Trinity water is of

Midwestern U. Homecoming Set For Nov. 6-7

N. A. Moore Jr., president of the Midwestern University Ex-Students Association has announced the 1959 homecoming dates for November 6-7. All former students of Wichita Falls Junior College, Hardin Junior College, Hardin College and Midwestern University are urged to attend.

According to Moore, many events have been planned beginning with registration on Nov. 6 followed by the traditional bonfire and the presentation and crowning of the homecoming queen.

All former athletes and their wives will breakfast together at 7:30 a. m. Nov. 7 in the University Center. The homecoming parade will follow at 10 a. m. and the ex-student luncheon will be at noon in the University Center.

Evening events on Nov. 7 will get under way at 7 p. m. with MU Varsity basketballers playing a team composed of exes. This will be followed by the traditional dance for students and exes.

Many farm pond drownings can be avoided if safety equipment is provided and if children are taught to swim and at the same time respect water, says the Texas Farm and Ranch Safety Council.

Man From Mars?

Nope—this isn't a visitor from outer space, but "Tracto," a mechanical man fashioned from different parts of an International Harvester farm tractor. Eight-foot robot moves hand up and down, turns its head and is wired to talk back. Apparently, it likes children, too. Harvester is exhibiting "Tracto" at various state fairs throughout the country.

# OUTDOORS IN TEXAS

**BY VERN SANFORD**

Hang around a bunch of Texas fishermen long enough and you'll hear them talk about "when the lake turns over." Invariably they will tell you that "that is the time for the best catches."

They will explain to you that the lake turns over in the spring and fall because of the changes in air temperature . . . and corresponding changes in water temperature. "Heat rises, you know, and when the water at the top of the lake becomes colder than the water at the bottom, the layers of water just naturally change positions."

Actually, what happens is not quite as simple as all of

that. To begin with there are not always two or more layers of cold and warm water.

In the winter and early spring, water circulates at all levels of the lake. Temperature is the same at nearly all depths. Wind and wave action keeps the water moving. This situation continues as long as air temperatures are low and there is a fair amount of wind. The big change begins to occur, usually in the late spring or early summer.

Actually, there is no "turning over" of the lake's water. What happens, the formation of an upper layer of warmer water (Epilimnion), and a lower layer (Hypolimnion), divided by a thin layer (Thermocline), in which there is a sharp change of temperature.

As summer heat increases, the Thermocline goes deeper. In other words the top layer of warm water becomes thicker as the sun warms the water to greater depths.

Stagnation occurs in the bottom layer when it loses its oxygen, due to lack of contact with the air. Gases then form, with the decay of fish that die and sink to the bottom.

There being no circulation, these gases remain in the Hypolimnion. By late summer this bottom layer is full of poisonous gases and is almost completely lacking in oxygen. No fish can live there. Hence the fisherman doesn't want to work his bait at the bottom of a very deep lake in late summer.

Sometimes fish do venture into the bottom layer. They will do so only because they are pursuing food; chased by predators; or out of pure obstinacy. When this happens the fish are poisoned by the gas, or suffocated by the lack of oxygen, or both. Then they rise to the surface quickly.

Some times they are found on or near the top, still fresh, but bloated and with eyes bulging because their swim bladders expanded with sudden rise.

Fishermen take large numbers of such fish in nets. Usually they declare that their appearance on top was caused by the lake "turning over." But you now know the real reason.

It is also said by those fishing in the late summer or early fall, that an unpleasant odor on the lake is caused by its "turning over." Again, this not so. The odor comes when the gases from the bottom layer are released through the tail races of dams.

At these periods the Epilimnion may extend down to 60 feet. Texas scientists have shown by tests exactly what you would expect . . . the longer and

Mrs. Kenneth Baker was honored at a surprise stork shower Thursday morning in the home of Mrs. E. D. Earle. Guests were greeted by Mrs. Dorse Collins.

Refreshments of coffee and

hotter the summer, the thicker the top layers of warm water. Being a fisherman, you will be guided accordingly. You may not want to fish as deep as 60 feet, but you are safe to conclude that fishing just above the Thermocline will be productive.

It is important to repeat that if you're fishing below the Thermocline you're not going to catch anything.

Okay then . . . how do you find the Thermocline?

There are several ways. First ask your local game warden. He may know. Or when you go to the dock ask the operator if he can tell you how deep the successful fishermen have been working their lures. Or ask your buddy, who caught fish there yesterday. Or use your thermometer.

The thermometer method may be a little trouble, but it will assure you that you have the right depth. Find the level where there is an abrupt change from warm to cool temperature. Then fish above that depth.

cake squares were served from a table laid with an imported white lace cloth over green satin. Centerpiece was an arrangement of yellow daisies in a ceramic baby boot. Favors were tiny pacifiers of jelly beans.

Mrs. Floyd Patton assisted Mrs. Earle as hostess. Hostess gift was a baby book.

Guests were Meses. E. P. Baker, Tom Martin, L. B. Patterson, Bill Lemley, Rex Mauldin, Ed Johnson, Joe Lane, Floyd Bowman, W. B. Guess, Miss Ruth Baker and the honoree, Mrs. Baker.
