

Report From Washington

The Air Force is establishing an Aviation Engineer Force under jurisdiction of the Continental Air Command, with headquarters at Wolters AFB, Mineral Wells, Tex. Aviation Engineer personnel are Army troops, assigned to and maintained by the Air Force, known as Special Category, Army with Air Force (SCARWAF).

The course of instruction in the basic school for Navy Hospital Corpsmen has been lengthened from 8 to 20 weeks, effective April 1, to permit additional hours of instruction in special subjects. The schools are located at U.S. Naval Hospitals at San Diego, Calif.; Great Lakes, Ill.; Portsmouth, Va.; and Bainbridge, Md.

Greenville Air Force Base, Greenville, S. C., has been redesignated as Donaldson AFB. The post was renamed in honor of Capt. John O. Donaldson, World War I flying ace, whose home was at Greenville.

BULLETIN

Word has been received that the United States Senate has confirmed the promotions of Maj. Gen. Robert W. Harper, CG, ATRC, to Lieutenant General, Brig. Gen. James F. Powell, CG, Keesler, to major general, and Col. Wycliffe E. Steele, deputy commander, Lackland AFB, to brigadier general.

514th Participates At Jaycee Conclave In Houston Today

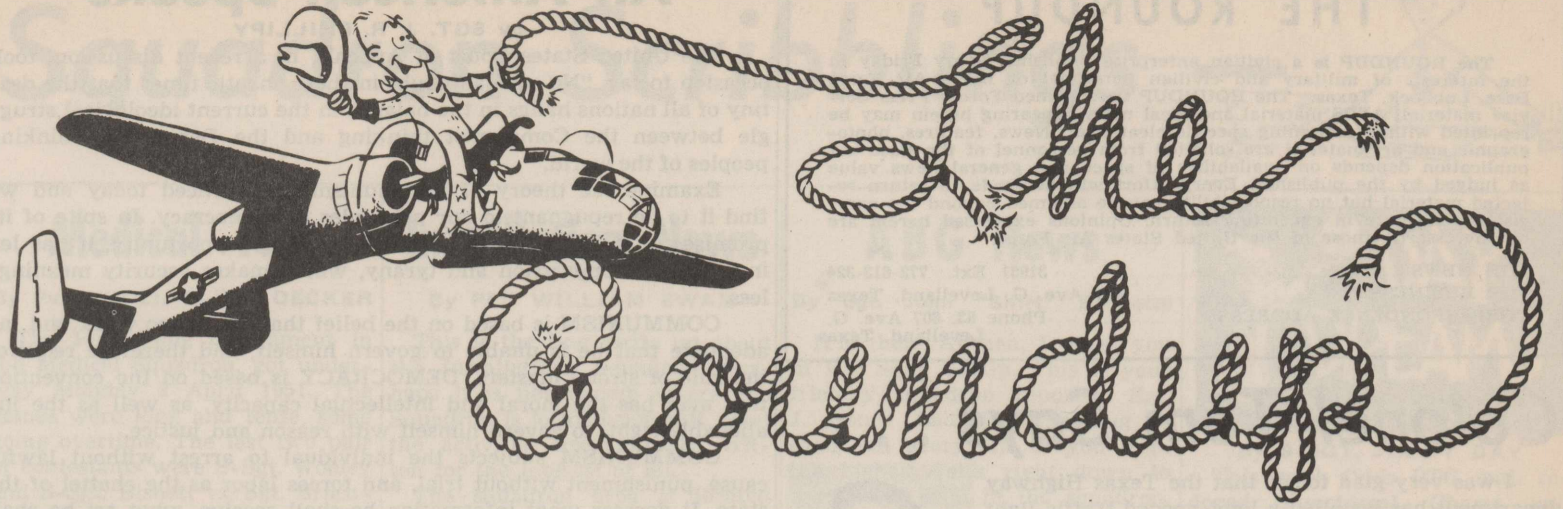

The 514th AF Band will join with the Levelland Jaycees in the presentation of an "Americanism program" at the State Jaycee convention to be held Friday, 13 April, at Houston, Tex., the Public Information Office announced this week.

Heading the group from Reese will be Maj. C. L. Land, public information officer, and Capt. Clyde W. Owens, commanding officer of the band. M-Sgt. Charles Simmons, director of the band, and the band members will make up the remainder of the party.

The group will leave for Houston on Thursday, April 12 via military aircraft and will be fed and housed at nearby Ellington AFB.

The program will follow a keynote luncheon and will feature the Reese band in a program similar to one presented in Levelland in January in connection with the March of Dimes Drive.

Headquarters, USAF, authorized the use of the Reese band for the occasion, the final confirmation being received at Reese on Friday, 6 April.

Vol. II, No. 24

Hurlwood, Texas

13 April 1951

One million (1,000,000) volts blaze from the body of George Speake during "Sermons from Science," a stage show to be seen at the base theater on 23, 24, 25 and 26 April as part of Training Command's Character Guidance program.

Group II Completes More Than 10,000 Hours Of Safe Flying To Set New Record

Servicemen Given Break at Jaycees' Stock Car Races

Servicemen—Army, Navy, Marines, Airmen and Coast Guards—in uniform—are getting a break at the regular Saturday night modified stock car races sponsored in Levelland by the Junior Chamber of Commerce.

They have been given an invitation to attend the races any or every Saturday night free. Children are admitted free also. Regular tickets are \$1 for adults.

The announcement was made this week by George C. Price, president of the Levelland Jaycees.

Training Aids has a new project on hand this week; extending Section II's flying safety chart. Major Russel E. Kline's four flights have compiled a record of over 10,000 hours of accident-free student training and have climbed past the present chart's limit.

The 10,000th hour was passed on 30 March when Capt. Bernard L. Bailey, commander of Flight 8, landed after a student training mission with student officers 2nd Lt. Morris C. Brunton and 2nd Lt. Donald B. Braun.

Section II's last mishap, a minor T-6 "wing tip," occurred on 7 October 1950. The last "major" accident happened 17 July 1950, also a T-6.

Individual flight records for Section II are as follows: Flight 5 commanded by Capt. Leonard A. Crozier, 3550:55 hours; Flight 6, Capt. James T. McElroy, 2253:25 hours; Flight 7, Capt. Donald F. Karshner, 7955:35 hours; and Capt. Bailey's flight, 8073:15 hours.

As indicated by the records Flights 5 and 6 have flown T-6's. These flights are now utilizing the new, and safer, T-28's for student training.

Major Kline credited the long safety record achieved by his section to the instructors, students and the 3501st Maintenance Squadron personnel.

"Without full cooperation between all of these groups," Major Kline said, "no safety record could be attained. It is only through working together and taking heed of each other's problems that pilots and the men on the line can jointly achieve safe and efficient flying safety records."

Not included in the 10,000 hours is approximately 3000 hours of personal proficiency, administrative and up-grading time.

Reese Resort Scheduled To Open May First At Buffalo Lakes; Season Passes Available Now

Moody Institution To Give Lecture On Science At Theatre

Sending 1,000,000 volts of electricity crashing through a human body, floating metal rings in thin air and frying eggs on a cold stove are only a few of the demonstrations included in the "Sermons from Science" exhibition to be given at the base theater on 23, 24, 25, and 26 April.

George Speake and Keith Hargett, representatives of the Moody Institute of Science, West Coast branch of the Moody Bible Institute in Chicago, will perform the unusual feats. Currently on tour of 20 Air Force bases, the "Sermons from Science" team is sponsored by the chief of chaplain's office, U. S. Air Force, as part of the Character Guidance program for airmen.

Using more than two tons of specialized laboratory equipment, the demonstrations are based upon the thesis that religion and science complement each other, and that scientific advancement today tends to confirm Biblical truth.

RAFB Organizations To Sponsor Entrants In Soap Box Derby

Reese will have at least six entries in the Soap Box Derby which will be run in Lubbock late in July, according to the latest information. There is still time for other registrations as the deadline for entries is not until tomorrow.

Any boy between the ages of 11 and 15 years of age, inclusive, may enter the Derby, winner of which will represent the South Plains in the All-American Soap Box Derby at Akron, Ohio on 12 August.

A boy may be sponsored or not sponsored. To date the entries from Reese are all sponsored by one of the organizations on the base. The general plan is for the sponsor to pay the \$14 required for axles and steering gear assembly for the tiny, motorless cars. No more than \$7.50 may be spent on additional materials used.

Entry blanks and rule books are on hand at the Public Information Office, Building T-1.

The Reese resort area at Buffalo Lakes will officially open on or about May 1st, Capt. Robert E. Englebretson, personnel services officer, announced this week. Open seven days a week, the area is located adjacent to the Buffalo Lakes boathouse on the north side of the lake above the dam.

The area will be fenced in and six barbecue pits built. Picnic tables with shelters are to be erected and modern latrine facilities installed. A wading pool for children and sand boxes were constructed and Mr. W. H. Rogers, owner of Buffalo Lakes, announced that a modern playground would be erected adjacent to the area in the near future.

Continued on Page 7)

Promotion Of 44 Airmen Announced By Wing Personnel

Promotions for 44 Reese airmen were announced this week by the Wing Personnel Office with six airmen attaining master sergeant, eight to technical sergeant, 14 to staff sergeant, and 16 to sergeant.

Promoted to master sergeant were Ira A. Thorla, Jr., of PTW, Albert W. Jones of ABG, Clinton E. McCoy, John R. Burkett, Homer E. Pratt and James L. Steele of M&SG.

The new technical sergeants are Rhonda H. Hinnant and Thomas C. Smith of ABG; Leland L. Brigham, Jr., Adolphus A. Bowen, John M. Burdue and James F. Roswell of M&SG; Sebe Perkins, Jr., of PTG; and George B. Bickett Jr. of Med. Gp.

Heading the list of new staff sergeants was Eldred DeRosier, William G. Willett, R. L. Wells, William T. Dawkins and James Cherry of ABG; Alonzo H. Jonsen, Howard E. Galpin, Gordon A. Messall, Alfred L. Walker, George J. Brown, Albert T. Winn, Vernie E. Witten Jr. and Herbert C. Lankford of M&SG; and Louis P. Brientensky of Med. Gp.

William L. Myles, Hival Forrester of ABG were promoted to sergeant along with Glenn A. Powell, Robert L. Johnson, Lorenzo B. Francis, Bradas L. Simmons, Gerald E. Fossey, David D. Matarazzo, Homer B. Haddock, Blake H. Gregston, Garnet H. Jones, Billie J. Jordan and Robert E. Dewar of ABG; Floyd E. Overbey and Ronald J. McCormick of M&SG; and John H. Zeno Jr. of PTG.

CAPTAIN B. L. BAILEY, instructor in Section II (center) and Lts. D. V. Braun and M. C. Brunton, are congratulated by Major Krantz, assistant CO of Section II upon completion of the ten thousandth hour of safe flying by the section.

THE ROUNDUP

The ROUNDUP is a civilian enterprise published every Friday in the interests of military and civilian personnel of Reese Air Force Base, Lubbock, Texas. The ROUNDUP uses Armed Forces Press Service material. AFPS material and local news appearing herein may be reprinted without obtaining specific clearance. News, features, photographic and art material are solicited from personnel of the Base but publication depends on availability of space and general news value as judged by the publisher. Every effort will be made to return rejected material but no responsibility can be assumed beyond the exercise of due care in expediting return. Opinions expressed herein are not necessarily those of the United States Air Force.

FOR NEWS 31951 Ext. 772-613-324
FOR BUSINESS 607 Ave. G, Levelland, Texas
CORRESPONDENCE ADDRESS Phone 83, 607 Ave. G, Levelland, Texas

Colonel Tom Says . . .

I was very glad to see that the Texas Highway department has installed a long-needed traffic light at the intersection of War Highway and the Levelland road. I sincerely urge all military and civilian personnel to strictly observe this signal since it is primarily for their benefit.

There still is a lot of careless and reckless driving on the highway into Lubbock. Some of this is by our personnel and some by outsiders. Traffic lights will not take care of such things as unsafe passing practices or excess speeds. Those things are up to the individual, who, after all should be the one who is the most interested in his own welfare. Of what good is a few minutes saved by speeding on the highway, if it results in hours spent in a hospital?

Reese will have a particular interest in the Soap Box Derby in Lubbock this year, as we expect to have at least six boys entered and sponsored by various organizations on the base. This is one of the opportunities offered us to take part in community affairs in Lubbock and I am very glad that the response has been so satisfactory.

The sponsoring organizations will, no doubt, get much enjoyment as they watch the boys working on the construction of the tiny, motorless cars.

The boys who take part will get good training in handicraft and sportsmanship. They will be the drivers of the future.

An American Speaks

by SGT. J. R. PHILLIPY

The United States Court of Appeals, in a recent discussion, took occasion to say, "No one can doubt in these chaotic times that the destiny of all nations hangs in the balance in the current ideological struggle between the Communist thinking and the Democratic thinking peoples of the world."

Examine the theory of Communism as practiced today and we find it to be repugnant to our principles of Democracy. In spite of its promises of freedom, security, and the greater opportunity, it has led invariably to oppression and tyranny, which makes security meaningless.

COMMUNISM is based on the belief that man is so weak and inadequate that he is unable to govern himself, and therefore requires the rule of strong masters. DEMOCRACY is based on the convention that man has the moral and intellectual capacity, as well as the inalienable right, to govern himself with reason and justice.

COMMUNISM subjects the individual to arrest without lawful cause, punishment without trial, and forces labor as the chattel of the state. It decrees what information he shall receive, what art he shall produce, what leaders he shall follow, and what thought he shall think. DEMOCRACY maintains that government is established for the benefit of the individual, and is charged with the responsibility of protecting the rights of the individual and his freedom in the exercise of his abilities.

COMMUNISM holds that the world is so deeply divided into opposing classes that war seems to be inevitable. DEMOCRACY holds that free nations can settle differences justly and maintain lasting peace.

These differences between Communism and Democracy do not concern the United States alone. People every where are coming to realize that what is involved is material well being, human dignity, and the right to believe in, and worship God.

The actions resulting from Communist philosophy are a threat to the efforts of free nations to bring about world recovery and lasting peace.

Character Guidance Creates Sense Of Responsibility

by SGT. R. C. CAMPBELL

Since the entire Character Guidance Program is aimed at developing a sense of responsibility in the individual, one of the problems involved in developing this sense, is understanding that man is a moral being. This means that the individual has a general knowledge of what is right and wrong, and is, therefore, under obligation to his fellow man to choose the right, and to reject the wrong.

Man is a moral being in that he does not live from instinct to instinct, as does a dog, but rather, from choice to choice. Almost all of his actions involve an act of will, and he is able to retain a central loyalty. Both of these factors make the development of character possible. A sense of responsibility can, therefore, be developed only when the basic principles of life are understood.

Every individual is under obligation to exercise a sense of responsibility, as was stated before. There arises the question, What is he responsible for? The terms of responsibility are set forth in what is called Moral Law and Natural Law. Moral Law has to do with attitudes toward life, property, reputation, authority, and sex. Natural Law has to do with our natural rights and duties. It consists primarily of life, liberty, and the pursuit of happiness, as set forth in the Declaration of Independence.

These Moral and Natural Laws must be understood by the individual if he is to develop a sense of responsibility which is so important in bettering the moral and material life of the nation, as well as strong character.

The Character Guidance Program is working toward this development of character. As Woodrow Wilson said, "Character is a by-product; it is produced in the great manufacture of daily duty." Daily duty, with a sense of responsibility, will do more than all the programs or plans of a Character Guidance Council can ever hope to do, in attaining the goal of moral responsibility, character, and good citizenship in the armed services, and the rest of the nation as well. Only through constancy to purpose can success be achieved in this character building program.

Beavers were able to build a watertight dam in the Ottawa River where one built by atomic scientists failed.

by Armed Forces Press Service

The great-grandson of Sitting Bull, famed Sioux leader, was killed in action with the U.S. Army in Korea. His name was Charles Walking Bull Jr.

The reason dogs turn around and around before lying down for the night goes back to the days when the animal was wild. His turning is a habit once used to mat down the grass to form a bed, meanwhile, testing the wind's direction to catch any scent of danger.

Squadron Scribblings

Hq. Sq. News

By CPL. DICK McCUNE

Here goes, as we toss around a few of Conrad's favorite clichés and make with the platitudes in an effort to imitate the inimitable quips of Milwaukee's favorite son while he basks in the shade of the breweries.

Congratulations to Sgt. Sam Burnett go two-fold. He did such a fine job for the Character Guidance program put on by the M & S group, that Colonel Walter Kerbel sent him a Letter of Appreciation for the off-duty time he spent on their posters. The squadron was so proud of Sam that now they've drafted him for a similar job in his own outfit.

Which brings that matter to light . . . Wing Hq. Squadron has been doing some research for its own Character Guidance program. This week Captain Owens, Lieut. Boydston and the entire committee visited the day room at 3501st Maintenance Squadron, aforementioned, to gather a little first-hand poop on a system of character guidance already in practice in that squadron. They tell me that soon, if not by the time this goes into print, our squadron day room will be equipped with bulletin boards and posters, part of the results of this hard-working committee.

Candidates for NCO Club membership department. . . Six new two-strippers were added to the squadron roster this week. You'll see smiles on latest Corporals: Frank Griffin, Eldon J. Kitrel, George E. Morris, Aubrey J. Blissett, Charles R. Seaburg, and Dick McCune.

Home again, after a "smartening up", are Sgt. James D. Carroll, who attended the Armed Forces Public Information School, and Cpl. Lewis J. Konze, who was at Lowry AFB for the Budget and Fiscal School there.

Three new men have been added to our squadron this week. Pfc. Gene E. Hinkle, just up from Lackland, will work in the Manpower and Management section. Cpl. Thomas G. Mann, a recent graduate of Supply School at Lowry, will go to squadron supply. A new Chaplain's assistant is Pfc. Francis M. Graff, who comes here from Ellington AFB.

Chords & Dischords

SGT. JOHN F. CORNELL

Congratulations to Clady, Taquard, Fox, Werner, Alvis, Gore, Garner, and Hill and Hill upon their appointments as Senior Instrumentalists.

CAN ANYONE EXPLAIN why the number of suitcases intended to be taken to Houston decreased by 50 per cent the same day the package store at the NCO Club re-opened?

A few of our dollar conscious musicians have been trying to figure how to purchase \$73.70 worth of uniform with a \$60.00 clothing allowance. Others are asking, "what sixty dollars?"

Three cheers for those brave men of our outfit who will attempt to pass the Staff test this summer. A fourth cheer for Sgt. Jules who is tutoring the group.

Sgt. Clady, after several years of miserly deliberation, allowed a car dealer to talk him into purchasing a "sacrifice." George immediately invested all his available funds, including his clothing allowance, leaving naught for gasoline. He reports his auto averages two and one half miles per bottle of after-shave lotion.

Medical Talk

By Pvt. WILLIAM WALDECKER

The Ping Pong tournament in the Medical Squadron, got underway Monday 2 April 1951. The games were long and tense, some going overtime. The last two pair of contestants were S-Sgt. Wooley and S-Sgt. Bisnett vs. Sgt. Briestensky and Pvt. Finlayson. The games were about as tight as a size 12 foot in a size 10 sock. The last game went overtime 23-21. Somehow or other the champs always win, and Sgt. Briestensky and Pvt. Finlayson took the crown in Ping Pong for doubles.

In the tournament for singles the games were not as tense as the others. Sgt. Bisnett beat out Pvt. Finlayson for the singles championship.

The Hq. & Hq. Sq., 3500th Medical Group softball team got underway in the latter part of Mar. The first week the men concentrated on loosening up. Then when the week rolled around the men were ready for chasing ground balls, fly balls and sharpening their batting eye. It looks like the Medical Squadron might be the team to beat this year.

That rounds up the Medical news for this week, but remember the Medics will be fighting for the Softball honors all the way.

Supply Sayings

By CPL. JOHN F. SWATEK

This is the first opportunity we've had to welcome two new Officers to our Squadron, 1st Lt. Earle Wolfe as our new Squadron Adjutant, and 1st Lt. William Brandt who will be assigned to the Warehouse Section. Here's hoping your new assignments will be pleasant ones. M-Sgt. Winfield Starnes and Henry Dowden have been recalled as 1st Lt. and Captain respectively. 1st Lt. Starnes has been assigned to Vance AFB and Captain Dowden to Lackland AFB. We regret to see them leave but wish them luck in their new duties. Our former Adjutant 1st Lt. Stephen Danilavéz has been reassigned to Warren AFB.

The Soap Box Derby will be held on the 4th of July. The Supply Squadron will be represented by "Benny", son of S-Sgt. Murray. S-Sgt. Murray can be currently seen saying his daily prayer that the 4th of July will provide a good strong tail wind.

Barracks 443 has been making very good use of the horseshoe pit. It seems the barracks "Chump pit. It seems the barracks "Chump", Cpl. Lloyd Davis wore the skin off his hands last Sunday trying to make that first ringer. "Hit 'em a lick", Dave. Of course his closest competitor S-Sgt. Emerson (with only one "M") is really developing his "Blooper" shoe. Those aren't flying saucers you've seen lately, merely Emerson's horseshoe coming on for a landing six feet from the stake.

The softball team has really been looking sharp as of late. The boys no longer have to chase after the balls they have missed. They have all learned the manly art of batting them down with their feet. At the rate they're going now, the base championship looks like a sure thing. The team's manager, S-Sgt. Emerson tells me all positions are still open, so if any of you ground or fly chasers want to come out and give it a whirl, don't be bashful.

Installation News

By PFC WILLIAM EWAN

This is the first write up about the Installations Squadron. Perhaps it is not known where the Squadron is located nor just what the activities are. This is written for the interest of all.

The squadron area is located south of the water tower on Avenue B and 5th street. The work of the squadron, however, can be witnessed on the base in spots where shrubbery and landscaping is done. The maintenance of the roads and runways is another prominent chore of the squadron men. The fire department is under Air Installations and maintains the highest standards of efficiency in fire fighting and crash rescue work. The shop section's qualified men master the construction and base maintenance. The water and sewage department complete the list of Installation activities.

We of the Installations Squadron extend our welcome to 2nd Lt. Taylor, assistant adjutant; 2nd Lt. Pratt, assistant air installations officer, and Captain Setliff, assistant air installations officer, also Pfc. Billy Jones and Sergeant Jose' Alecia. Good luck men.

Congratulations to Cpl. Bernard Hoitenga. Cpl. William Mesarosh, and Cpl. Floyd Simpson Jr. for their from Pfc. to Cpl. We also "shake hands" with Cope-land Ewan, Gomer. Mahan, Roach Sweet, Stenniak. Barton, and O'Connor for their promotion to Pfc. from Pvt. Best wishes men. Many of the Squadron are missing Lt. Tom, our Adjutant. He will be absent for part of this month to attend school at Lowry AFB. Colo. Lt. Taylor is now filling Lt. Tom's position.

3501st News

By SGT. DUANE F. HAMMER

This week finds us with several new Officers and Airmen assigned to the 3501st. 1st Lt. Omer E. Graham and 2nd Lt. Spencer N'-Neal joined on 9th and 10th of April respectively. New Airmen are S-Sgt. James B. Morris, Sgt. Frank D. Foster. Pfc. Paul L. Graham. Pfc. Thomas G. Hightower, Pfc. Margent C. Hurst. Pfc. Patrick C. McCarthy. Pfc. Charles W. Miller, Pfc. James R. Lee Jr., Pvt. Max R. Dooms, and Pvt. Charles M. Robertson. S-Sgt. Morris and Sgt. Foster are reservists who were recently recalled to active duty at this station.

The 3501st sincerely hopes that the new arrivals will enjoy their stay with the organization.

T-Sgt. Vernon S. Howell is back with us again after a brief stay at Group Hq. replacing S-Sgt. Charles E. Mabry who left for Group Hq. on Monday. Next Sunday Sgt. Howell takes the "fatal step" and is going "altar bound" with Miss Catherine Hooker of Muskogee, Oklahoma at Muskogee.

M-Sgt. Otho K. McReynolds, coach of our Squadron softball team, informs me that by this weekend the team will be "whipped into shape" and is ready to take on all comers for practice games.

Sure would appreciate any items of news that the members of the '01st could bring into me for publication in this column. I'm sure that plenty of unusual incidents are happening everyday on the line and elsewhere that are of interest to the readers.

ABG News

By Sgt. John "Shirt" Badgette

H'llo there Airmen, I mean you in Hq. Sqdn ABGp. This is your friendly squadron reporter, Sgt. J. Henry Badgette, speaking to each and every one of you from the highest rank right down to the lowest peon in the squadron. We have a squadron column to write every week, and I'm depending on you to help me write it. What do I mean? Well, I need lots and lots of gossip, facts, and any kind of news that would make good reading. How about a little help, huh??

The squadron received several new arrivals in the past week or so. They are Captain Francis W. Balshaw, 1st Lt. Maury Hill, 1st Lt. Louis E. Nysewander, and 1st Lt. Lester A. B. Tapper. Captain Balshaw and Lt. Hill are assistant Base Operations Officers. Lt. Nysewander is assistant Personnel officer of Air Base Group, and Lt. Tapper is assistant Personnel Services Officer. Welcome to a good squadron!

The coffee drinkers at the PX were shocked clean out of their wits last Tuesday when who should be sitting at the cash register but Sgt. Bill Wright. Yes, Sgt. Wright has been driven to work. Steady there boy! I know these dust storms are bad, but I never thought they they would effect a man that much.

Sgt. W. O. Milam was elected as team captain of the squadron volleyball team at a meeting held on Monday, the 9th of April. The volleyball team won their first game that they were scheduled to play by forfeit.

The bowling team is still in about the 4th place, and had a tough break when S-Sgt. "Bull" Lewis wrenched his back, and will not be able to bowl for awhile.

In & Around AACs

By CPL. JEFFERSON D. KELLEY

It appears as if Sgt. Vanover, the Saudi, Arabia fellow, is not the only Airman, within our Detachment, that has been immensely impressed by the attractions of the local Texas females. I say that because Sgt. Harry L. Ervin, Control Tower Operator, married a localite within seventy-two hours after Vanover took the plunge.

Sgt. Robert I. Martin, was alerted today for oversea duty. Thus far Sgt. Martin's destination is unknown to himself as well as the remainder of the fellows in and around the detachment. We do know that from here Martin will head for Camp Stoneman, California. From there your guess is as good as Martin's. Martin has been with the detachment here for approximately 15 months. When Martin joined the Detachment he was assigned duties in Radio Maintenance but since then has changed career fields. He is presently performing duties as Senior Organizational Supply Specialist and has been frequently commended on his efficiency by various inspecting officers.

S-Sgt. Edward J. Hencinski, Control Tower Operator, received order today transferring him to 1900-4 AACs Sq., Walker AFB, New Mexico. Sgt. Hencinski has been with the Detachment for approximately 14 months. We're hoping that Hencinski will prove himself as good a GCA man at Walker as he was Control Tower Operator at Reese.

NEWS FROM THE 3500TH PTG

By S-SGT. JIMMY DAY

This week finds PTG with redooed Functional Charts and phones back on the hook. In case you haven't heard the Training Command Inspectors are in the area, so as a result, any resemblance to the hustling on a baseball team and the actions of the supervisors is purely coincidental. (Wonder if them thar inspectors will find the reason for the silverware shortage at Consolidated Mess.)

The welcome mat is out for Lieutenant Jack Leland Folkins, Lieutenant A man, Lieutenant Slay, and Capt. Padgett. These officers have just completed Pilot Instructor School at Craig Air Force Base, Alabama.

Did you know that Richard Harry Doxee, recently assigned to the Pilot Training Group, that Saxophonist from the 514th Air Force Band, is becoming quite the cartoonist. The Dox, doing duty in the Training Aids Section, had his first cartoon published in the Air Force Times last week. Sergeant Doxee (depicted below) is

being very well supervised in his cartoon and sectional work by the experienced cartoonist and recently recalled officer Lieutenant Jack (Tipitoons) Tippit, Officer-in-charge of the Training Aids Section.

Congrats to the following Privates for having taken their first steps in the promotion world: Ray C. Mathison, Gerald E. Sanders, Robert L. Fraley, Edwin D. Kirpatrick, Huey L. Tomlinson, Charles E. Brown, Cecil R. Argabright, Donald Lee Edwards, Paul D. Dodson, and James N. Keller. Have noticed Corporal Onez (That's Zeno spelled backwards) going around Group rubbing his hands and repeating "e pluribus unum, e pluribus unum," why Onez are you being promoted.

The Link Trainer Section is having an increase of five airmen, having recently arrived from Keesler Air Force Base, Mississippi are William C. Stephens from Pisgah, Ala, Donald W. Eberhart from Ft. Payne, Ala., Baskum E. Morris from Scotsborough, Ala., Elmo M. Litts Jr. from Moboy, Ill., and Jerrold J. Sheaf from Billings, Montana.

Sergeant Charles Gimbel has bought a car; a 1943 (that is no misprint) Ford, complete with daffodill yellow dash-board and four (4) good tires—any resemblance to a hybrid bovine draft animal is purely coincidental.

Ladies Fellowship Elects New Officers

The True spirit of fellowship was shown at the last meeting, Tuesday, when the Ladies Christian Fellowship met in the Chapel Annex. A luncheon was served by Circles 1 and 3, with Mrs. Hilton Gauthier and Mrs. Maurice R. Holt as hostesses.

The new officers for the next six month term submitted and voted for were: Mrs. Ralph Ranson, president; Mrs. Leroy Gregory, vice-president; Mrs. Emil Snyder, 2nd vice-president; Mrs. Maurice R. Holt, 3rd vice-president; and Mrs. J. B. Powers, secretary and treasurer. The installation of the new officers will take place Sunday, April 22, with Chaplain Holt conducting the service.

Mrs. Leo Hess, chairman for the next Potluck supper, reported that it would be held Wednesday, April 18, in the Chapel Annex at 1800 hours. The next bake sale will be held in the Commissary May 1, beginning at 0900 hours, with Mrs. Roy Garrison in charge.

The Ladies Christian Fellowship Circles will meet Tuesday, April 17, at 1300 hours as follows: Circle 1, with Mrs. T. C. Smith, Bldg 247, Apt. 103; Circle 2, with Mrs. Bailey Shrum, Bldg. 345, Apt. 104; Circle 3, with Mrs. A. J. Knudsen, Bldg 634, Apt. 202; Circle 4 will meet Monday, April 16th at 1930 hours with Mrs. E. J. Bozik, Bldg. 141, Apt. 202.

Since television has been installed in the prison at Raleigh, N. C., the monthly attempts to escape have dropped from four to one.

50 TEXAS TECH BEAUTIES came to Reese Tuesday to participate in a birthday party held for Reese airmen who had had a birthday within the last three months. After putting on a skit portraying the months of the year, the girls got in some audience participation with dancing the rest of the evening.

Graduate Programs Set Up By USAFIT

Wright-Patterson Air Force Base, Ohio—The USAF Institute of Technology this week outlined eligibility criteria for five new graduate programs to be conducted in its resident school at Wright-Patterson beginning in September.

Any regular or reserve officer of the Air Force, under 37 years of age, may make application if academic requirements are met, the announcement stated.

Officers holding USAFIT engineering diplomas will be eligible for new graduate courses in armament engineering, automatic control engineering, aeronautical engineering or electronics. Non-graduates who apply for these courses must have BS degree with a major appropriate to the field applied for.

Officers applying for entrance to the aeronautical engineering course must have a major in aero or mechanical engineering. Those who have majored in electrical engineering or physics will be eligible for the automatic control engineering program.

Requirements for the armament engineering program include a degree with major in electrical, aeronautical or mechanical engineering or physics. For electronics the bachelor's degree with major in electrical engineering or physics will be necessary.

An additional graduate program—advanced engineering management—will also enroll officers in September. For the advanced engineering management course it is preferable that the applicant have a master's degree in some field of engineering or science, but those who have some graduate work in these fields will also be accepted. Officers for this course must be of field grade and under 45 years of age.

Undergraduate engineering programs will continue as usual, USAFIT, requesting evaluation of their educational background and experience with a view to early application. All requests should be prepared and forwarded as directed in AF Regulation 50-15.

Ladies Auxiliary To Hold Style Show

A Family Style Show, sponsored by the Ladies Auxiliary, will be held Sunday afternoon, April 15, in the NCO Mess from 3 to 5. Dunlaps, of Lubbock, will furnish the clothing to be presented at the show.

The show will feature 20 models including men and children as well as women. Tickets may be purchased from any member of the Auxiliary, or at the show, for \$1.00. Door-prizes will be given.

Nero did not fiddle while Rome burned. The violin was not invented until the 16th Century.

THE CHIEF ENGINEER for Air Installations, Mr. Hal T. Spencer, shows M/Sgt. Tom E. Toms, NCOIC of the Photo Lab, a copy of the plans he wants photographed. In the background, T/Sgt. Ike C. Lowe, assistant lab chief and Capt. John E. Wilson, Jr., photo officer, look over a photo supply catalogue.

CAPTAIN WILSON demonstrates the use of a photo flash-gun to (l. to r.) Pvt. Donald B. Holsten, Pvt. Wayne E. Underwood and Pvt. Ernest E. Douglas, new men recently assigned to the Photo Lab for training as photographers.

ADJUSTING THE LENS on an enlarger is T/Sgt. John S. McDougall who is in charge of the printing department. The use of the enlarger makes it possible to make a good print out of a negative that would be almost unusable through contact printing.

S/SGT. ELMER C. GAHAGAN and S/Sgt. L. Troglin complete the processing of prints in the darkroom. Sergeant Gahagan is shaking a pan of hypo to make sure that the solution gets to every portion of the print immersed in it. Sergeant Troglin is preparing a print for enlarging.

R E E S E P H O T O L A B

We've Had It!

Book Blurbs

A HUNDRED BRIDGES TO GO, by Agnes Danforth Hewes, is a thrilling adventure story about the building of the Alaska Highway. The task, made more stupendous by the inaccessibility of the country through which the road was to run, the snowy vastness, the wilderness wastes, the desolation, the isolation beyond imagination, the host of hardy workers battling against dangers and insurmountable obstacles, are all woven into a tale of breathless interest.

NIGHT WITHOUT STARS, by Winston Graham, is a tense, taunt and compelling novel of life in the southern part of France as lived by the half blind American war veteran, Giles Gordon, and the mysterious young French girl whom he loved.

SPORT FOR THE FUN OF IT, by John Tunis, is a handbook of information (including official rules) on nineteen different sports.

Ashburn's AUTOMOTIVE TROUBLE SHOOTING is a simply stated, easily understood and completely illustrated book for the man who wants to diagnose and cure his own automobile troubles.

In FIFTY FABULOUS YEARS, H. V. Kaltenborn, the Dean of radio commentators, gives an entertaining and stimulating account of a life rich in first hand experience of men and events.

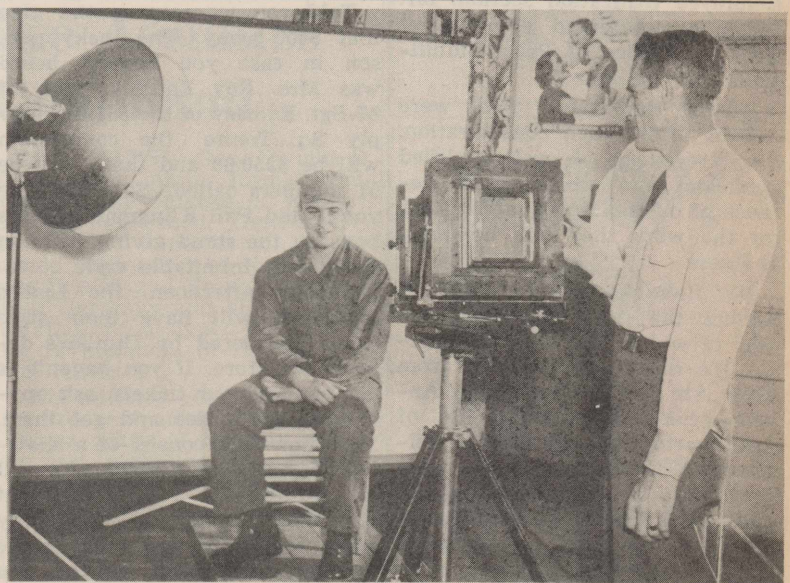

George Orwell admirers will want to read his last work, SHOOTING AN ELEPHANT and other essays, published posthumously.

For the children's book shelf we have a new book of Fairy Tales compiled and illustrated by Arthur Rackham, and a fresh copy of the old favorite, ALICE IN WONDERLAND, by Lewis Carroll.

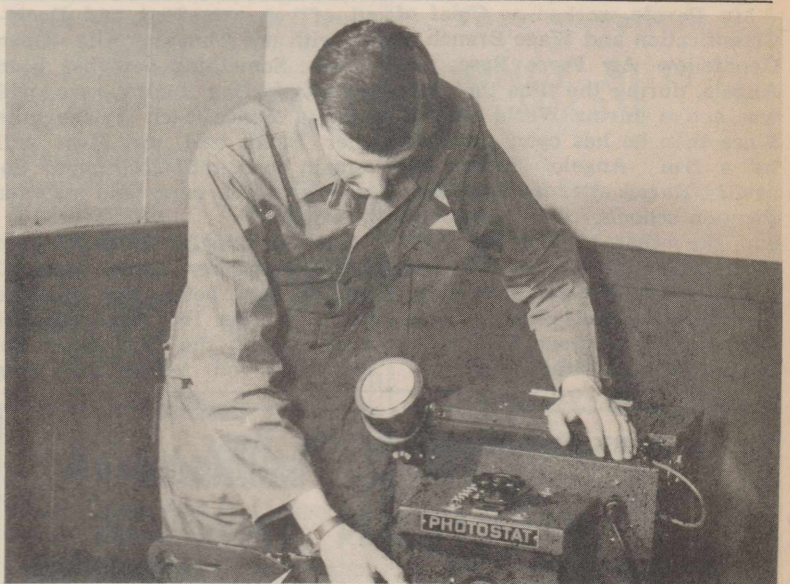

Your Base Library has copies of these and other new books, as well as a good supply of paper bound pocket books.

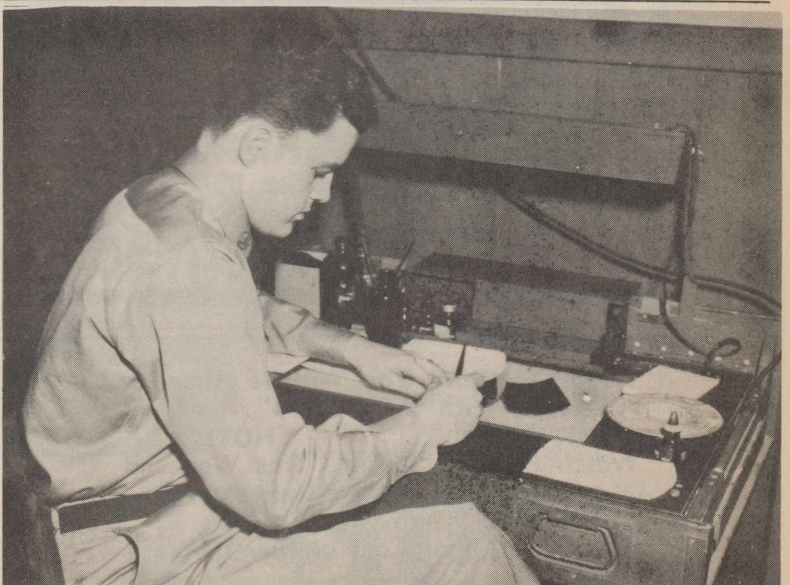

ADJUSTING A PAGE of material to be copied is Sgt. John F. Massie who works in the copying section. Copying of manuals by camera aids the distribution of copies of publications.

S/SGT. JOSEPH R. KENT, chief photographer, prepares to take a portrait of Private Underwood. In addition to his duties as photographer, Sergeant Kent is in charge of all portrait work for the lab.

ANOTHER IMPORTANT JOB of the Base Photo Lab is the copying of documents, regulations, and other important papers through the use of the Photostat machine. Here, Pvt. Donald B. Holsten prepares to make a copy of a document.

ESSENTIAL TO THE MAKING OF A GOOD picture is the retouching of a negative to remove blemishes and other defects that would show up in the picture. In charge of the retouching work is Pvt. Ernest E. Douglas who is shown retouching a negative before it is put on the enlarger.

New Officers Appointed For Civilian Personnel Office

John E. Boltz of San Antonio, Texas, arrived at Reese this week and in the near future will take over the position of Civilian Personnel Officer, replacing Debs B. Hensley who will go to a similar assignment with the new Flying Training Air Force at Waco.

This is the third change in the administrative section of Civilian Personnel in recent weeks.

R. C. Pevoto of San Angelo is the new Chief of Classification and Wage Branch, replacing Joe H. Baker who has transferred to the Civilian Personnel section at Sheppard Air Force Base, and Don Jones, former Chief of Production Control of the local Field Maintenance section, has replaced John Webb as Chief of the Employee Utilization section. Mr. Webb has accepted employment with the Office of Price Stabilization in Dallas.

All of the new men were chosen, after much consideration, from registers of well-qualified personnel and were picked because of outstanding qualifications for the work they will be doing at Reese.

Mr. Boltz has worked in Civil Service the past ten years, one year of which was spent in Alaska. He comes to Lubbock from Kelly Air Force Base in San Antonio where he has been Chief of Headquarters Supply and Miscellaneous Utilization for the past five years. He has completed the course for USAF Administration for Personnel with a rating of superior. His family which consists of a wife and two daughters, ten and four, have moved to Lubbock and are at home at 2712A Forth-Fourth street, in the Modern Manors addition.

Mr. Pevoto worked as Chief of Classification and Wage Branch at Goodfellow Air Force Base, San Angelo, during the time that base was active during World War II. Since then he has been employed by a San Angelo Automobile agency. He has attended two Classification schools, one at Randolph and the other at Maxwell AFB. His family consists of his wife and a 19-year-old son, now a student at San Angelo Junior college. They expect to move to Lubbock in the near future.

Don Jones needs little introduction to Reese personnel. He started to work at Barksdale when the sub-depot was activated there in 1941. In September 1949, he transferred to Reese to become Chief of Production Control in the Field Maintenance section and assumed his new duties in the Civilian Personnel section approximately a month ago. He is a member of the Board of United States Civil Service Examiners. Mr. and Mrs. Jones reside at 1507 Fortieth street in Lubbock. They have one son, seven years old.

NCO Club Notes

Told you we were gonna give that \$500 away....The lucky person in case you haven't heard was Mrs. Roy Endsley, wife of M-Sgt. Endsley of the 3500th Supply Sq....Tonight the consolation will be \$250.00 and there will be 51 numbers called....Saturday nite you'll find Phil Klingman and his boys on the stand giving forth in their own inimitable style....

Sunday afternoon, the Ladies Auxiliary will have their style show, sponsored by Dunlap's department store. If you haven't as yet bought your tickets, ask anyone of the ladies and get them. The show will consist of a showing of different styles for all the family and I am sure that you will be able to, not only learn something that will make you clothes conscious but that you will thoroughly enjoy yourselves....Monday and Tuesday — Open House....

Wednesday nite of course, we will be square dancing again, so all of you come out and Docie-Do with us....Thursday nite—Open House....Something new has been added starting tonight; we will have a dance each Friday nite after Bingo and the Mess will remain open until 2400 hours. So, get together a party and stay for the dance.

Say, speaking of Bingo, how do you like the new cards? Let's all try and take better care of these cards in order that they will last longer than the last ones....So, don't lose your temper and bang

Bulldog With a Bite

THE LIGHT T-41, or Walker Bulldog, first tank produced by a civilian company since World War II, has begun rolling off the assembly lines at the Cleveland Airport Bomber Plant, three months ahead of schedule. Named for the late Gen. Walton H. Walker, 8th Army Commander, the 26-ton tank sports a new type high muzzle velocity 76 mm. gun.

Your Chapel

Your Chapel in the service tries to provide for you a real church home wherever you may find yourself stationed. During combat or in an overseas area the church atmosphere sometimes seems quite different from the church back home, because of the necessities involved in the situation. However, on a base in the United States it is impossible to provide almost all the services and means of fellowship that one would find in any church.

Here at Reese Air Force Base the Chapel program is maintained on the basis of a full church schedule, including a Religious Education program for children and adults, sponsorship of the scouting programs for the base, and the setting up of a fellowship and action group for the ladies of the base.

This latter group has been called the Ladies Christian Fellowship and has become very active since organized a few months ago. The Ladies Christian fellowship has many different interests and activities, on the list of which is the sponsoring of a monthly potluck supper in the Chapel Annex. This potluck supper is not just for the families of the base, but is designed to provide fellowship and home cooked food for Officers and Airmen as well.

Our next Potluck Supper will be held at the Chapel Annex, Wednesday, 18 April 1951, at 1800 hours. If you have not taken any active part in the fellowship activities of the Chapel, consider this a special invitation to you to attend this Potluck Supper and join in the good fellowship of this evening. A special program with all kinds of fun and excitement has been planned for this occasion by the Ladies Christian Fellowship, and you are guaranteed a most interesting evening.

them on the table....Maybe you will have better luck on the next game.

Just got word from the board of governors that the Mess will remain open each Saturday nite until 1:00 a. m. I know that will make certain people happy, especially, those who are reluctant to leave at midnight....Now, doesn't that make you all happy??

By the way, you members who have not visited the dining room lately, oughta make a showing—it's really snazzy! So for now until next week, I'll be seeing you.

People may be judged by the way they sugar their coffee. The careful persons pours sugar into a spoon to measure it. The careless person just pours it into the cup.

Flying Fortresses Acquire New Role In Korean War

They may be aged and beaten up, but a group of World War II Boeing SB-17 Flying Fortresses is turning in an outstanding job in the Korean zone, the Boeing Airplane Company has been advised by the U. S. Air Force from "an air base somewhere in Japan."

The oldsters are the search and rescue planes of the Third Air Rescue Squadron, converted to new uses after retiring from the bombing runs.

In addition to their search and rescue duties, the converted "Forts" have served as radio beacons during bad flying weather, as a runway control "tower" when a radio jeep failed to operate, and as weather reconnaissance aids to the bombers.

Sea search radars have been installed in their chins. Belly gun

turrets were removed to make room for 27-foot rescue boats, which can be dropped to sea survivors. Original bomb racks are used as anchors for the cables that hold the boats in place.

The old Boeings have, the report said, been "in on the fighting and rescuing since the start of the war. It's a good bet they'll still be in there doing an outstanding job when peace comes back to a battered world."

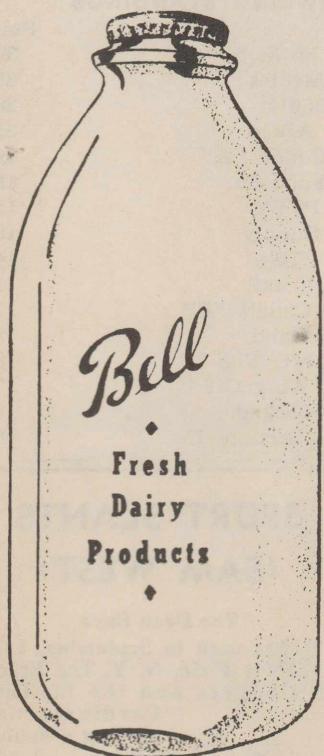

The largest racket in Rangoon, Burma is elephant rustling. The animals are driven across the India-Burma border and sold at high profit.

"Broadway Beckons" a talent show for and by personnel of Reese Air Force Base will be presented at the Service Club on Friday, April 20 at 2000 hours. Anyone wishing to take part in the show is urged to contact the Service Club. Prizes will be given.

Tippitoons

"Did you see the stork that brought me, daddy?"
"No, son, but I did see his bill!"

Definition of a split second: From the time the light turns green until the guy behind you blows his horn.

Old lady: "And what's your name, my good man?"
Convict: "999989"
Old lady: "Oh, but that's not your real name."
Convict: "Naw, that's only my pen name."

Hay: Grass a la mowed.

Ike Assumes Command

Paris (AFPS)—Gen. Dwight D. Eisenhower, taking formal command of the defense of Western Europe, has issued "General Order No. 1," under which he assumed leadership of the American, British and French forces in West Germany and all units and installations assigned to him by the 12 members of the Atlantic Pact Alliance.

His military responsibility is an area extending from Arctic waters north of Norway south to and including the French possessions in North Africa.

At the same time, the General converted his headquarters from a planning group to an operational unit charged with such tasks as administration, training, organization, plans, intelligence and supply.

Buffalo Lakes

(Continued from Page 1)

Plenty of parking space is available at the area and plans have been made to arrange night lighting.

Captain Englebretson also announced that equipment for playing volleyball, softball, and other group games would be installed. Also facilities for boating, swimming and water skiing are available. The lake was stocked in October of 1949 with 30,000 Bass, 30,000 Crappies, 30,000 Channel Catfish, a number of Bluegill, Brim, and Goggle Eye.

Later on in the season, Mr. Rogers will place a number of large, tagged bass in the lake and fishermen catching them will be eligible for prizes. Rules for the contest will be announced later.

Reese personnel wishing to use the base area will present their Class A pass at the main gate and upon the payment of 10c per person be admitted to the grounds. Swimming will cost 20c per day (children 6-12 swim for 10c) and 50c for fishing for a 24 hour period. Anyone using artificial fishing bait will have to secure a valid Texas fishing license which are available at sporting goods stores in Lubbock for \$1.65.

The Personnel Services Officer has a number of seasonal passes, selling for \$5.00, that will permit the airmen or officer and members of his family to use the facilities of Buffalo Lakes or the entire year. This includes fishing (with live bait), swimming, entrance to the Lakes, and duck hunting. No quail hunting is permitted.

Arrangements for group parties and picnics at the Reese area will be handled through the Personnel Services Office to avoid the scheduling of large groups on the same day and time.

The work in preparing the Area is being done through the coordination of Air Installations and Personnel Services.

CAPTAIN JOHN SORENSON, judo instructor, prepares to club Lieut. Richard Grayson who moves into a defensive position. Defense against club wielders and other types of attacks are taught in the judo classes held each Thursday and Saturday at the base gym. A new class will start soon for those wishing to learn judo.

Civil Service Announce New Wage Program

A new 4-Step Schedule for Wage Board Employees at Reese will go into effect on 15 April. This new schedule applies to approximately three-fourths of the civilians now employed on the base and for some will mean immediate advancement.

All the available information on the new schedules and the changes in within grade advancement plan as outlined this week by the Civilian Personnel Office, follows:

1. GENERAL:

a. As recommended by the military departments, the Personnel Policy Board of the Department of Defense has approved the use of four step rate wage schedules and uniform general rules for granting step increases to wage board employees in wage board positions in the Air Force, Army,

and Navy. This action was taken to bring about greater uniformity in the wage administration plans of these departments.

b. The following changes affect all regular and special five step rate wage schedules issued by the Army-Air Force Wage Board, except those issued for non-citizen employees in oversea areas.

2. **EFFECTIVE DATE:** These revisions to the Air Force Wage Administration program will be effective beginning of business 15 April 1951.

3. **ADAPTING CURRENT SCHEDULES:** Use of step one rates on five step rate schedules will be discontinued. Employees at step one rates of the present five step schedules will be advanced to step two rates (new step one, four step schedules). Periodic pay increases earned under the existing provisions of paragraph 2, Section 4, AF PIO through the day prior to the effective date of application of the new four step rate system will be processed in accordance with those requirements. Employees occupying step one rates of the present five step schedule whose pay is adjusted as a result of advancement to step two rates (new step one, four step schedules) will begin a new waiting period for advancement to the next higher step rate from the effective date of the pay adjustment action.

4. **PERIODIC STEP INCREASE:** Periodic step increases are mandatory from step one to two, and step two to three upon compliance with established criteria. To qualify for a periodic step increase, an employee must meet the following requirements:

a. An employee must have a record of satisfactory service and conduct in the position held.

b. Service in a step rate of the

grade as follows:

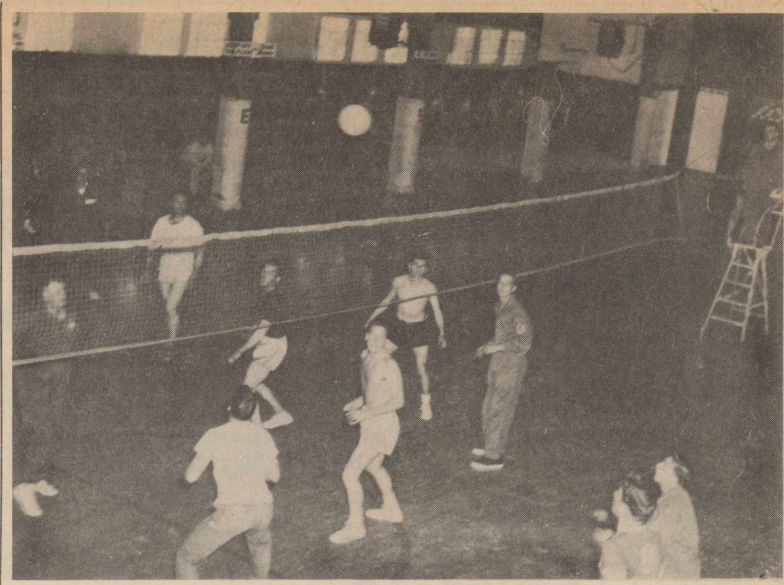

(1) For advancement to step 2-26 calendar weeks service in step 1.

(2) For advancement to step 3-78 calendar weeks service in step 2.

(3) An employee who fails to receive a periodic step increase because of an unsatisfactory service and conduct report will be considered again at intervals of four work weeks. If his service and conduct have not improved within twelve work weeks after the step increase was originally withheld, consideration will be given to reassigning the employee or separating him from the service under applicable regulations.

5. **ADMINISTRATIVE PAY INCREASES.** Administrative pay increases are not mandatory, but are based on the individual employee's performance. They may be given for advancement from step two to step three and from step three to step four.

a. Advancement to Step 3. An employee in step two (four step schedule) who has proved fully satisfactory, and provided his performance is recognizably better than the normal performance requirements of the job currently held, may be advanced to step three after a minimum of fifty-two weeks rather than seventy-eight weeks as stipulated in the mandatory provision. Recommendation for increase to step three will be made by the immediate supervisor, subject to approval of the commanding officer or his designated representative. The recommendation on SF 52 "Recommendation for Personnel Action" must include a statement by the supervisor outlining the special

THE VOLLEYBALL TOURNAMENT at Reese has gotten underway with teams vying against each other for the base title. Here, Hq. Sq. PTWg plays 3502nd Maint. Sq. 3502 won the game to score its first victory of the season.

factors in the employee's service record which reflect the qualifications which merit the recommendation.

b. Advancement to Step 4. Advancement to step four (four step schedule) from step three will be restricted to the most capable employees whose performance and conduct records clearly indicate their qualifications for the highest step rate. These advancements require a minimum of fifty-two weeks of service in the third step rate. Satisfactory performance alone, or length of service, is not adequate justification to support recommendation for advancement to this premium rate. Only employees whose performance is distinctly above the normal performance requirements of the job currently held may be recommended for increase to the fourth step rate. The supervisor's recommendation, made on SF 52, must include a statement outlining the special factors which indicate the higher level of performance. Advancement to the fourth step rate is subject to approval by the commanding officer or his designated representative after considering the recommendation and all pertinent factors of the particular installation.

Towns of northernmost Mississippi, Alabama, and Georgia are closer to the North Pole than Africa's southernmost tip is to the South Pole.

Poise is the knack of appearing cool even though one may be all burned up inside.

The Dean Boys

It was back in September, 1934, at Ebbets Field, N. Y. The Brooklyn Dodgers and the St. Louis Cardinals were playing a double-header.

Ole Diz Dean had made himself look like a million dollars by pitching the Cards to a 13 to 0 victory, allowing only three

hits, and getting two of the seventeen Cardinal hits.

But this is just the beginning of the "Dean Story." For the second game, along comes none other than little brother Daffy Dean to do the pitching chores for the Cardinals. And the kid brother, if you remember, went the nine-inning route to pitch a no-hit no-run masterpiece that stunned the crowds. It would have been an absolutely perfect game, except for one walk in the first inning. It was the first no-hit game at Ebbets Field in many years, and a real climax to this eventful day for the Dean boys. The Cards won the second game 3 to 0, with Daffy himself scoring the first and winning run in the sixth after a two-base hit. Those Dean boys really had themselves a picnic that day, and it will be long remembered, especially by the Dodger fans.
