

# Base Lake Stocked With 17,000 Fish

## USAF Reserve Officers Must Choose Future Status

Reserve officers in the Training Command must soon answer to their unit personnel offices to decide their future as indicated in the Armed Forces Reserve Act of 1952. Here at Reese, all Reserve officers have been notified by letter of the new law. Questionnaire forms were included so that the officers might indicate their choice under the provisions of the Act.

The two key words in the Act, which will affect all ATRC reserve officers, are appointment and commitment.

Appointment refers only to the commission the individual has in the Reserve Corps. Since an indefinite appointment (commission) will be the only type offered, all reserve officers whether on active or inactive duty will have to accept it when the time comes or eventually separate themselves from all ties with the Air Force.

In short, those reserve officers whose appointment expires and who have not accepted the indefinite appointment by the time they are separated from the service will lose their commissions and have no military status as reserve officers.

Those officers on active duty who accept the indefinite appointment will have no change in their separation date. When eventually separated from the service, they will retain their indefinite reserve commission on an inactive status.

Commitment is the length of time an individual agrees to serve on active duty. An indefinite commitment is one which commits the reserve officer to serve for an unspecified period of time.

The definite commitment is one which commits the officer to serve voluntarily or involuntarily for a definite period of time with a specified date for release.

## ANGLING TO START AROUND NEXT FALL

Fish — 17,000 of 'em — now swim freely the length and depth of Reese's own Lake Emhoff, the drainage lake at the southeast corner of the base.

But hopeful Ike Waltons will have to wait at least until next fall, WOJG Lowery Allen, maintenance and utilities officer, said in announcing the placing of the fingerlings in the lake Wednesday evening. The small fry — smallmouth bass, blue gill bream, catfish and

## High School Diplomas in Reach of All at I&E Office

You can finish high school in two days! And can get your diploma and start climbing the Air Force "ladder" now!

Yes, in many states, high school diplomas can be obtained by air-

men who pass the high school GED tests. Other states will issue certificates of equivalency. These tests cover five phases of high school work including English grammar and spelling, history, science, literature and mathematics.

The Air Force recognizes men who pass the test as high school graduates and thus they meet requirements for most of the technical schools, OCS, and cadet training. Many colleges will accept the GED test as meeting college entrance requirements and will permit the airman to pursue work in college.

Utilize your off-duty-time in the Air Force by continuing your education. USAFI textbooks are available in the base library for a review in these fields.

See your Education Officer for further information about the tests and the requirements for high school graduation in each state. Inquire at building T-421 or call extension 574.

## USO Will Feature 'Sock Hop' Tonight

Dancin' without shoes will be a novel feature at a "Sock Hop" dance to be held tonight at 1900 at the Lubbock USO.

Prizes for the loudest socks present will be awarded. Hubbettes will serve refreshments. All Reese military personnel are invited to leave their shoes at the door of the USO, 1311 Main, and c'mon in for a good time.

## FREE HOME STUDY COURSES

offered by the USAF Extension Course Institute are tailor made for officers and airmen of all grades. Why not see your I and E Officer, Building T-421

## All About F-102 in Latest AF Magazine

Called the "inhabited missile," the F-102 is the newest plane in the Air Force's stable of fighters. In this new development the pilot goes along pretty much just for the ride. AIR FORCE magazine says the supersonic delta interceptor may be the last stage in piloted interception.

The magazine tells what it will be like to fly an interception mission in the 102 and explains why the pilot may not know his score on enemy planes until he reaches his home field. A "substantial" production order for the supersonic delta has been placed with Convair.

AIR FORCE also takes you behind the scenes of "Operation Mainbrace," the recent NATO naval maneuver off Northern Europe, and tells why the operation flopped.

Also in AIR FORCE, now on PX newsstands — latest pictures of the Air Force in action in Korea, the "world's biggest Christmas party" at Pope AFB, N. C., and a report on the ground observer program.

## Keep Informed at The Base Library

Are you keeping up with current affairs? Do you have the facts from which to form your opinions? These days history is moving at a gallop. In America every man has a right to his own opinion, even if his opinion is wrong — but with good source material at hand, no man has a right to be wrong in his facts.

Your base library has the best in news magazines and papers: The Christian Science Monitor has been running a series of articles on the men chosen by Eisenhower for his new cabinet. If you have time only for trends you can't afford to miss The Kiplinger News Letters from Washington. These letters are received every Monday at the library, a service which those interested in business forecasts consider essential to intelligent management.

INTO THE LAKE go part of the 17,000 fingerling panfish that were used in stocking Lake Emhoff Tuesday evening. WOJG Lowery Allen, left, watches as T/Sgt. Julius O. Setzer aids in dumping a can full of the little 'uns in the water.

mosquito minnows — were obtained from the U. S. Cultural station at Fort Worth through the U. S. Department of Fish and Wildlife. As far as he knew, Mr. Allen said, it was the first time that many fish had been flown from the hatchery direct to the planting place.

Stocking the lake with bass, bream and catfish will provide base anglers with three of the most popular and sought-after panfish. Equal fun in hooking these fish may be had with either cane pole or expensive fly rod. The minnows were stocked along with the larger fish to provide both feed for them and to keep down mosquito larvae which would form on the lake.

About 2,000 of the fingerlings will die, Mr. Allen said, due to climatic conditions and changes in water. However, the day after the fish had been planted, he reported only about 200 were found dead. The plane trip had no effect on the condition of the fish. Only two were "DOA" and those had been injured in loading at Fort Worth.

A rod and gun club is in the offing here as tentative plans call for a group which would help improve the recreational facilities on the base. Part of the revenue from such a club would be used to build piers and other improvements in the lake area.

Maj. Mark H. Kite, assistant air installations officer, T-Sgt. Julius O. Setzer, water and sewerage supervisor, and A-3C Rodney Harris made the plane trip to Fort Worth to pick up the fish. Assisting them in the planting here were A-1C Joseph A. Cassidy and A-3C's Richard Metzger, Wan Cybulski, James E. Gormes, Robert A. Douglas, Myron E. Gadow and Howard L. Gardner.

## New Landing Control Device Provides Inexpensive Substitute for Radar Unit

By S-Sgt. Jack S. Gibson

All pilots, in fact, all persons connected with the Air Force have heard the GCA — Ground Control Approach — used to "talk down" aircraft in bad weather with the aid of radar and radio.

But there are few who have heard of a GCA without the use

of radar. It sounds impossible but such a system is in operation right now at Miami International Airport at 14 other Tactical Air Command Bases and is being service tested for Flying Training Air Force here at Reese.

The system, called the "Fisher Control Approach System" after

its inventor, 1st Lt. Martin A. Fisher, a pilot in the 435th Troop Carrier Wing, Miami, employs an eight-channel VHF set and a sighting device. The device consists of a slot and a multiple grid on opposite ends of a 60-inch stand. The grid has several cross wires which are spaced in ratio to elevation at a measured distance and to wing spread at a measured distance.

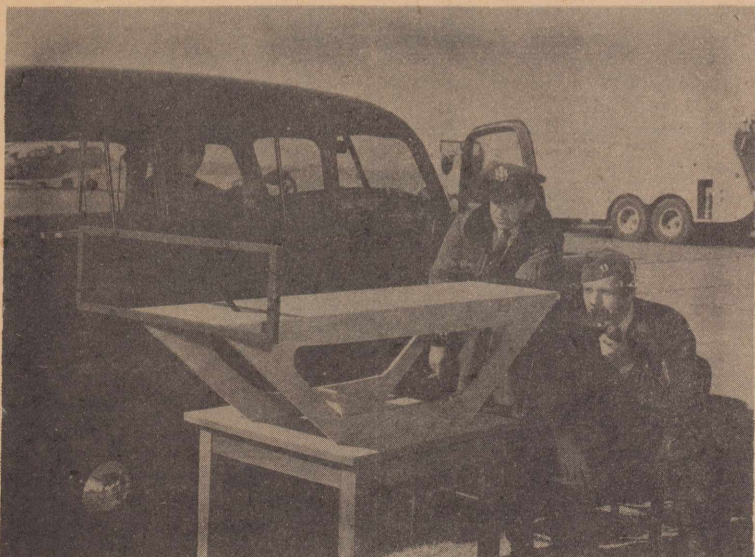

Other than these mechanical fixtures, all that is needed to complete the system is six to ten miles of visibility and the controller can bring in the ship exactly as though he were using GCA.

## Valuable Training Aid

Capt. W. W. McDannel, of TA&D section and project officer for the testing of the system, calls it "one of the most useful training aids in the whole (training) program." Captain McDannel pointed out also that the economy of such a device is almost unbelievable due to the fact that FCA only involves one man for the work done by the one officer and twenty men used to operate and maintain the standard mobile radar unit.

Captain McDannel continued to explain that with FCA equipment costs were drastically reduced. The device shown in the photograph costs a little under two dollars to construct; the permanent aid, of metal tubing, will only amount to fifty dollars, including manpower costs. Equipment costs for the standard GCA are not

(Continued on Page Three)

TALKING DOWN an aircraft with the new Fisher Control Approach apparatus is demonstrated by Capt. W. W. McDannel, (right), TA&D officer and project officer for the service testing of the new system now in progress at Reese. Capt. Michael J. Melendez, OIC of the Instructor's School looks on and will act as monitor of the project during the tests for FTAF. The new FCA enables pilots to receive training in GCA's without the use of expensive radar mobile units and without the need of extra personnel.

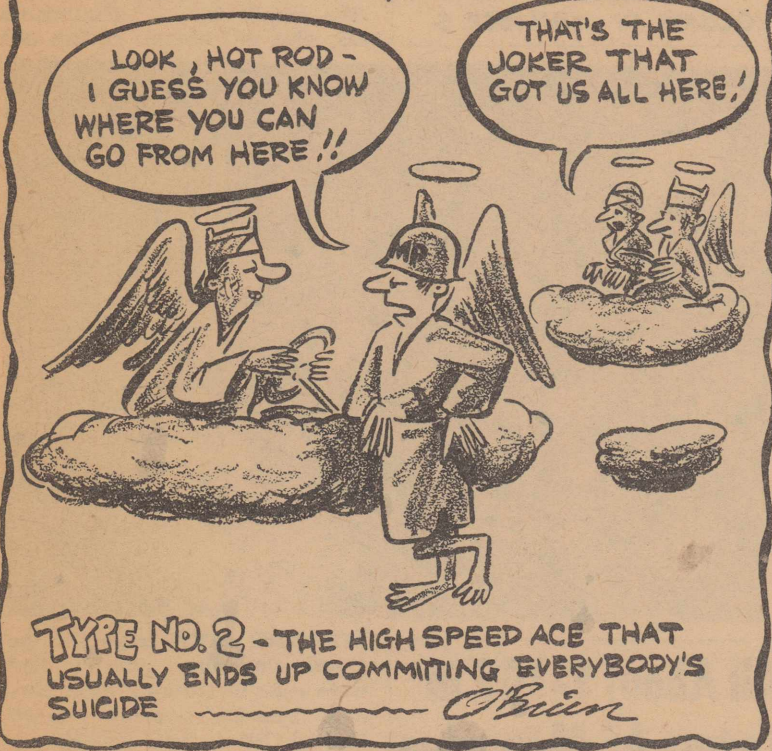

## THE ROUNDUP

The ROUNDUP is a civilian enterprise published every Friday in the interests of military and civilian personnel of Reese Air Force Base, Lubbock, Texas. Local news appearing here may be reprinted without obtaining specific clearance. News, features, photographic and art material are solicited from personnel of the Base but publication depends on availability of space and general news value as judged by the publisher. Every effort will be made to return rejected material but no responsibility can be assumed beyond the exercise of due care in expediting return. Opinions expressed herein are not necessarily those of the United States Air Force.

AFPS material appearing herein may not be reprinted without written permission of 'Armed Forces Press Service.'

### SERVICE TINTYPES

## Howe Leaves Soon, Rest Looking Toward Holiday

Because of the inactivity around the base over the long Thanksgiving holiday, comparatively little has happened that would be worth noticing here. Most of the cadets enjoyed the brief vacation at home or at the homes of friends. However, there were left a few luckless individuals who spent the time close to their rooms, serving restriction, pondering the freezing rain, and judging the future of the

Air Force. Not that they were disgruntled; they were merely far from grunted.

But the overcast has lifted with the nearing of Christmas leave. Instead of the usual ranting about shopping days, it's ten more flying days until the 19th of December. Howe Class graduates that day, and leave for the Cadets will begin with the completion of duty then until 4 January 1953. For Howe Class it means new horizons; for the rest it will be a welcome respite from the rigors of the program.

Last Monday night the Cadet 'B' football team, consisting of members of Squadrons C and D, lost to a strong First Maintenance squad to wind up third in the base league. Showing surprising strength the Cadets held the unbeaten and untied Champs to a lone tally in the third quarter, which finally told the story of the game.

The Cadet Choir, directed by Lew Raines, has cut some tapes of Christmas songs for station KFYO, to be used in the near future. Featuring tenor soloist James Douglass, 53-Baker, most of the numbers are Fred Waring-arranged.

## Your Chapel

### THE WORD OF LIFE

Perhaps all of you have seen a new poster around the base recently. It is the open Bible with the caption "The Word of Life." Truly it is well named for whether the Book that you read is the Protestant, Catholic or Jewish version it contains truth, wisdom, faith and hope.

You will notice that the Bible is opened to one of the Psalms, which reminds me of an incident that happened one time in California. It was at a fashionable party given at one of the ritzy restaurants. A whole host of notables in the entertainment field were there as well as outstanding citizens of the community. After all had eaten a delicious meal it was decided that each one there would present a skit, talk or stunt of some kind that would reflect the individual's special talent. I am not going to list all that happened except for two specific incidents. The first concerned one of the outstanding actors of Hollywood. When his turn to participate came, he stood before the group and in clear, concise, perfect English diction recited the well-known Twenty Third Psalm. When he had finished there was a thunderous ovation.

The second incident that I would mention came later in the program when an old priest took his turn. Also standing before the group he opened his well-worn Bible and also read the Twenty Third Psalm. Yet when he finished there was no applause. Everyone in that room had been deeply touched. What was it that had made the difference in the reading of that Psalm? I think the answer lies in the words of the actor, who while the old padre still stood there, came up to him and putting his arm on his shoulder said, "Father, I know the Psalm, but you know the Lord."

May each of us on our journey through life not only get to know the Psalms, or the Word of Life, but the Lord of Life Himself.

ELMORE P. NELSON  
 Chaplain (1st Lt USAF...)

## Chapel Schedule

### PROTESTANT SERVICES:

Bible School 1000 hours, Sunday  
 Morning Worship 1100 hours, Sunday

Choir Rehearsal 2000 hours, Wednesday

Sunday, 7 December will be the event of the White Gift Service. It is requested that all who attend Sunday School and/or Morning Worship bring gifts of canned foods, wrapped in white paper, to be used for those who are less fortunate, and in this way the spirit of Christmas will be felt throughout the year.

### CATHOLIC SERVICES:

Sunday Masses 0900 and 1215 hrs.  
 Weekday Mass 1145 hours  
 Novena Devotions 1830 hours Tuesday  
 Rosary Devotions every evening at 1830 hours  
 Confessions 1900 to 2100 hours Saturday

"Svoda!" I hollers, running into the barracks, "Didja hear, they're not makin' Cadillacs any longer."

Joe jumps up like he's been shot. (He keeps telling me about the '54 model Cad he's gonna buy when he gets out.) "Waddaya mean, they're not making Cadillacs any longer?" Joe fairly screams.

"That's right," says I calmly, "they're long enough already."

Next thing I know I'm flat on my area looking at the roof of the barracks with a knot pushing its way out of my hairline. "You don't have to get so sore."

"Okay," Joe says very pseudo-apologetically, "c'mon up to PX toyland and we'll pick out your Christmas toy."

"Very funny, Mr. Wiseguy," I answers, "but I awready know what I want for Christmas."

"Want, want want," Joe says. "that's the way with everybody these days. Don'tcha ever think about giving anything? Like what you're gonna give me this year, for example."

"On the level, Dusty, I get stumped every year at this time. How'm I supposed to know what anybody wants for Christmas presents?"

"How many guesses do I get?" I says. "I got the same problem. And all I can figure to do is look around and hope I pick the right ones."

So we mosey on up to the base exchange and Joe and I picks out a couple a items for various members of the family, when Svoda sees a copy of THE ROUNDUP lying on a counter so he picks it up and says to me "Look here, just what I was looking for," pointing to an ad in the paper.

"Sure," says I, "I forgot. THE ROUNDUP always carries advertisements about Christmas gifts this time a year. We oughta check all these places that got ads in the paper."

Which we did later, and me and

A be-bopper was standing in the middle of the Mojave Desert when a man crawled up to him on bloody hands and knees crying, "Water, water."

"No water, man," the cool one replied, "But pick up on this crazy beach."

## dusty

Svoda got a lot of our shopping done ahead of time. Not only that, Joe almost traded off his '25 model Hupmobile for a brand new car. He would of, but he was broke by this time.

1016 BROADWAY

Dear Mrs. Shea:

What qualities do you consider essential in making one a good Air Force wife? The Air Force is a new life to me but since my husband plans to make the Service his career, I am eager to do what I can to improve myself hoping in that way to help my airman husband in his work.

an Airman's Bride

Dear Airman's Bride:

It was a real pleasure to receive your warm, sincere letter and already I can tell you are off to a good start because you are mentally in the right groove by wanting to improve "yourself" first. So many wives start out by trying to improve their bridegroom. Well, you are a smart gal to want to start on yourself first in acquiring a good Air Force background, but it will be easier if you and your young airman learn together. I assure you that no business, no career and no marriage can be successful unless there is cooperation. And I believe that it should be more than a 50-50 deal.

I should list the essential qualities of a good Air Force wife in this fashion: cooperation, adaptability to any and all situations with a keen sense of humor. Strive to be alert, well-informed on world affairs, on national affairs but particularly get to know your own base, familiarize yourself with the names of the key people, what they do, your husband's work and how you fit into the Air Force picture.

Then just for you, I might add LUCK and for an Air Force bride it is spelled this way:

- L is for love
- U is for understanding
- C for courage (you'll need it)
- K is for kindness

Thanks for writing me and I predict that you and your husband will go far and high if you follow through. Never forget that every airman is a potential general. . . there's no limit or ceiling in the Air Force you know, so continue to air high!

Nancy Shea

Two be-boppers were walking along a railroad track. One said, "Man, this is the longest staircase."

"Yeah," replied the other, "But dig these crazy low bannisters."

# Over 500 Have Finished Base Management School

Flanked by their instructors, Lt. E. E. Morrison, standing far left, and C. C. Galbraith, standing far right, students of the Personnel Management School at RAFB pose for their "graduation" photo. Seated left to right are: T/Sgt. E. L. Lewis, T/Sgt. E. L. Lewis, T/Sgt. H. P. Gibson, S/Sgt. J. F. Cotton, Mr. H. R. Maddux, S Sgt. R. J. Gerschefske, A/1C D. R. Keister, S/Sgt. J. E. Johnson, S/Sgt. A. L. Mackey, S/Sgt. J. C. Nichols, S/Sgt. C. A. Benchoff, S/Sgt. J. Cook, T/Sgt. C. C. Hurd, T/Sgt. V. G. Kassabaum and S/Sgt. R. D. Stainbrook. Standing: Lt. Morrison, A/1C C. D. Allred, A/1C L. M. Brown, A/1C D. E. Doyle, A/1C H. A. Gunn, Jr., Mr. R. F. Bird, A/1C Skinner, Jr., A/1C B. J. Montgomery, M/Sgt. W. J. Kneipp, Mr. G. C. Brook, T/Sgt. W. E. Brooks, A/1C T. A. Warr, M/Sgt. B. K. Lomax, T/Sgt. J. E. Boyd, S/Sgt. F. M. Sheppard, A/1C D. A. Key, Mr. Galbraith. Not present for the picture, S/Sgt. D. W. Dobbs (Official Photo—Air Force).

Thirty men completed the Personnel Management course at Reese this week, bringing to more than 500 the total number who have attended the school since 1949 when Reese was reactivated.

Officers, airmen and civilians who hold supervisory positions are eligible for the course which deals with problems in organization, functions of the supervisor, a study of methods engineering, the technique of instruction, and problems in human engineering.

Economy of operation is stressed throughout the course. Although the Air Force is not a "money making" organization, those responsible believe it possible to operate on sound management principles and thus effect appreciable saving in the operations costs which are carried by the taxpayers.

During the past two years improved methods brought about by applying principles learned in the management course have resulted in a cut of more than \$250,000 in operating costs at Reese.

It is the ultimate goal of the Air Force to train all supervisory personnel in the techniques of good management and a management improvement and economy program is being particularly stressed at Reese.

## Fisher Control Unit . . .

(Continued from Page One.)

known but the savings involved in the use of the new system are measured in the thousands of dollars.

### USAF Approved

"For training," Captain McDaniel said, "it's perfect. There is absolutely no variance in procedures from regular GCA as far as the pilot's concerned." Captain McDaniel also noted that Headquarters USAF had approved the use of FCA for credit in the logging of GCA runs.

Obviously the equipment is only used as a training and practice aid under VFR conditions and when GCA units are not available for use. It can be invaluable to any base that has no GCA unit, as a trainer and to save time. The many advantages of this unit on training bases such as those in FTAF are innumerable especially from the standpoint of economy and ease of operation.

### THOSE LIBRARY BOOKS!

Please don't fail to return them before going on holiday leave. If you want to keep a library book beyond the date-due period you can make special arrangements at the library by which your book will be renewed while you are gone. Otherwise you run the risk of incurring the displeasure of your CO by having your over-due books called to his attention.

## Nob Hill "O" Club Plans Yuletide Dance

A formal Christmas party for commissioned officers of the Armed Forces is scheduled for 6 December in San Francisco. Sponsored by the Nob Hill Officers club, the party will be held in the Terrace Ballroom of the Fairmont hotel.

Festive holiday decorations will adorn the entire ballroom, and everyone will participate in the traditional carols. Entertainment will be furnished by the renowned Paul Desmond. There will be no admission charge for the affair. Officers in civilian attire must present identification cards.

# The Roundup of SPORTS

## 01st Maint. Cops Mural F.B. Crown

Emerging undefeated from regular season play and blasting all rivals in the "sudden death" playoff, the 3501st Maintenance squadron is the new intramural touch football champion.

In the first round the Supply squadron team romped through the Air Base Group squad 24 to 6. In the same round the '01st men outfought a determined Cadet B eleven 6 to 0.

The final and championship teams of the base together. Again the '01st team proved its caliber in rolling over Supply by a 18-6 score to win the crown.

# Rattlers Face Phillips Team Tonight

By Lloyd Saulsbury

Tonight and tomorrow night the Reese Air Force cagers again take to the floor in an attempt to break their nonconference losing streak.

The first of the two games will pit the Rattlers against the Phillips 66 Oilers from Midland, Texas. This encounter should prove highly exciting and display some fine basketball talents.

On the Oilers squad and one of

the probable starting five is a Texas Tech graduate, Don Groves. An All-Border conference center in the seasons of '47-'48 and '48-'49, Groves starred four years with the Red Raiders.

Other probable starters will be Tucker, University of Oklahoma; Line, University of Kentucky; Watson, University of Texas; and Mitchell, Cameron J. C., Okla.

The Midland Oilers are a comparatively new team and not too much is known of their potentialities. Some of their players have

seen action with the great Phillip 66 Oilers from Bartlesville, Okla.

In the game Saturday night, the Rattlers take on the hoopsters from Webb AFB. In a previous encounter the Webb team eked out a 68-66 win over the Reese men.

Expected to star again for Webb will be William K. Heater who hit the bucket for 24 points in the earlier game. Cadet Hunt was run-ner-up in the scoring race in contributing 20 points for the Rattlers.

Game time, for both nights will be 2000 hours.

## Dummy Mural Schedule Opens Basketball Season

A dummy intramural basketball league is scheduled to get underway Monday, 8 December and continue until 18 December.

Two tilts are set for the opening night with the first starting at 1800 hours. Approximately 18 teams are expected to compete in this dummy schedule.

Reports from the gymnasium reveal much activity in pre-season practice sessions. Regular league play will commence about 15 Jan. 53.

## Intramural Football Results

MEET . . .

# The Men Who Teach 'em How

By Lt. Charles R. Wood

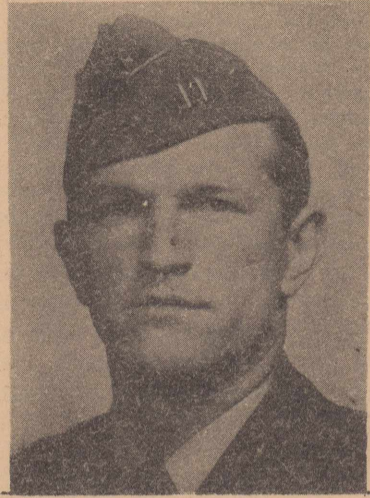

This month we take pleasure in introducing Captain W. W. Chrisman. While Capt. Christman is a comparative newcomer to Reese, he brings with him much know-how and experience. This is the type of man that Reese is always glad to welcome as a member of its organization.

Chris was born in Los Angeles in September, 1922, and stayed in the sunny state of California through high school at El Hambre and two months of college at the University of Southern California in 1940. He then went to the Panama Canal Zone, with Civil Service, until 1943, when he volunteered for military service.

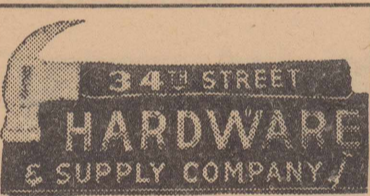

Captain Chrisman entered cadets and graduated as a navigator from Ellington Field in January, 1945. He then went through Radar Observer school at Victorville, graduating from this course in July. After this, he went to a SAC-con-

ducted tour, spending TDY-time in Germany, setting up SAC bases. Chris entered pilot training in 1947 and received his wings at Barksdale in January, 1949.

After graduation, he went to Mather Field as a mission pilot and was a flight commander there

before journeying to the "Cold War" in Korea for eight months. Completing his tour in Korea, he returned to the states, where he went through the Instructor's School at Craig Field and then reported to Reese. For all of his military work, Captain Chrisman has been awarded the Distinguished Flying Cross, Air Medal with two clusters, Commendation Ribbon, U. N. Medal, Occupation Ribbon (Germany), Korean Service Medal, with two stars, American Theatre Ribbon, and the Victory Medal. He is at present serving as an instructor with flight two, Section One, helping to "teach them how."

 NCO Club—Ladies Auxiliary dance, music by Bob Lamont.  
 Service Club—No dance, payday week.

As the saying goes, we hope you had a fine Thanksgiving holiday, that the turkey wasn't too much for you, that you're rested up for the coming Christmas siege of buying presents and — wonderful thought — having a furlough. Too, it's time for thinking of some of the best entertainment of the year from both radio and TV.

**PIGSKIN PASSING PARADE:** The death throes, so to speak, of this season's football happenings, are now in the process of beginning. KSEL, KFYO-ABC, and KCBD-MBS-NBC have notes of these events. The initial station latches on to the playoff games of the mighty mites of Lubbock High, with the quarter finals' tussle against Austin High at El Paso aired tomorrow afternoon at 2:45. The rest of the playoffs, including the championship battle, will all be on the 950 spot.

The dubl-net station gets "dubl-Bowl" airings come New Year's Day. Because of time differences in Dallas and Pasadena clocks, local listeners will be able to hear the Cotton Bowl clash between Texas and Tennessee early in the afternoon, and the Rose Bowl battle between Southern California and Wisconsin later on in the day. Some doin's, huh?

Tomorrow you'll be A-B-C-ing the Texas Tech-North Carolina State go at Jones Stadium in the final game of the season for Tech. Bob Izzard and John Kennedy will handle the talking part which begins at 1:50 p. m. (Note: After the way Tech has played the past three week ends, don't be surprised at the outcome, nor at the performance of the too often under-rated club).

**CHANGES:** The 5:30 p. m. slot on KSEL now boasts "Sunday in Vienna" with music ala Viennese style. . . Earlier at 3:45, Gunnar Back emcees (if that's the proper word) the "Lonesome Road" series about the problems of alcoholism from "Skid Row" to Park Avenue and back again. . . Monday through Friday for the next two weeks, top shows will grace the 5:30 p. m. quarter with public service presentations of easy and laugh-filled listening. Included in this series are such artists as Paul Weston, Guy Lombardo, Bob Hope, Sammy Kaye, Curt Massey and Martha Tilton, to name a few reasons why you'll enjoy tuning in.

At the top of the dial, KCBD has "Dial Dave Garroway" 15 minutes earlier — at 1:30 p. m., Monday through Friday. . . Paula Stone has since moved her interviewing quarter to 4:30 p. m., same days. . . "The Big Story" airs at 8:30 p. m., Wednesday, with dra-

matizations of authentic experiences of newspapermen on their most outstanding assignments.

"Cafe Istanbul," with star, Marlene Dietrich, returns to the air Sunday night at 9:30 p. m., moving "Piano Playhouse" to 10:30 the same night. Earlier the same evening, the schedule reads like this for good listening: 7:00 — "This Week Around the World;" 7:30 — "The Hour of Charm;" 8:00 — Walter Winchell; 8:15 — Taylor Grant and the News; 8:30 — "Freedom, U. S. A.;" and 9:00 — Paul Harvey. . . Monday through Friday's late night offering of "Moonlight and Shadows" takes on a new hue beginning Monday night with the advent of "The Frank and Jackson Show" at 11:15 and "Dream Harbor" at 11:30. Final quarter hour will sustain the mood set by "Harbor" for your enjoyment. Bob Lamont's orchestra, with Norma Raine featured in the vocal spotlight, airs Wednesday night at 9:30 with music styled to please everyone. If you'd like to hear KFYO's scintillating 1000 watt tone signal after midnight, tune to 790 kc. In the future, that's the spot from which will emanate all

KFYO shows with a 5000 watt daytime voice and a night-time strength of 1000 watts. Come in, Amarillo!!!

**SCREEN SCANNINGS:** KDUB-TV, now an "old-timer" in the local area,, continues to latch onto the CBS shows and pass them on to you via the 'tele-waves' (I think that's how you get 'em). Last Sunday's debut of "Omnibus," the hour-and-a-half composite of a little bit of everything, was just a sample of forthcoming happenings on the show. View-time is 3:30 p. m. — check Channel 13. . . Monday night's 9:00 o'clock thirty will soon be devoted to the CBS produced, "Studio One," — renowned dramatic presentation with a "reel" punch. . . What with beginning a half an hour earlier than last week Monday through Saturday, the time is being filled with "The Band Stand" — featuring top bands of the country — every day but Tuesday. "The Duke" was on Monday evening, just to give you an idea of what's in store for you.

Next week more hot news from both types of home entertainment. See you!

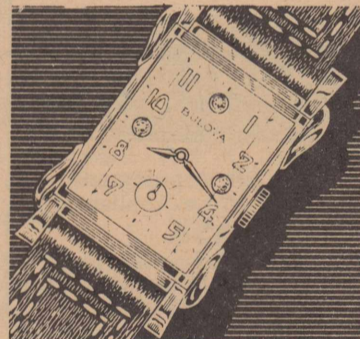

JACK

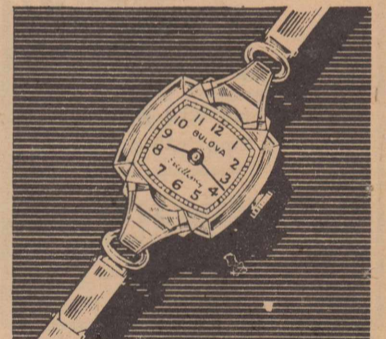

**BATTLING FIRES** will be the job of these airmen who have received instruction in fire fighting. Shown above is Chief Truett C. Cranford and seated on his right is instructor S/Sgt. James Bolin. The men have learned the techniques of fire prevention and aircraft rescue work in their on-the-job training.
