

WELCOME KIDS!

Volume VI Lubbock, Texas, Saturday, Sept. 24, 1955 Number 45

Solution Sought For Accidents

Re-vitalizing of the traffic spotter program at Reese AFB has been quite effective in reducing accidents during the past week, Joe Lopez, ground safety technician, said Thursday.

He pointed out that Col. C. P. West, base commander, recently appointed the spotters and directed that punishment be given those drivers who violate traffic laws and regulations.

Lopez said the move was made in the light of a marked increase in accidents involving base personnel. He said five disabling injuries have occurred this month, three of them resulting from private vehicle accidents. Two driving-while-intoxicated cases were reported, he said.

"It is felt that by reducing traffic violations there will be a proportionate reduction in accidents," Lopez commented.

He said penalties for violations may be reduction in grade for violators, adding that other punishment could be a court martial or loss of promotion for 90 days, or some lesser penalty.

"Our night traffic school also will play a major part," Lopez said. "It is not intended as a punishment, although some personnel consider it such. It is our aim to save from injury the driver who doesn't know the law. If the

driver has not known or has forgotten proper traffic rules, then we must refresh his mind to protect him. Thus, he will attend a night traffic school for a week on his own time to have state and city laws and base regulations impressed upon him."

Lopez pointed out that civilian traffic violators may have their base decals taken away for a peri-

od, thus forcing them to leave their automobiles outside the gate during their suspension. He cited that the base executive officer, Col. James F. Mears, recently told the wing staff that civilians were frequent offenders, particularly during the early morning hours when they failed to heed traffic signs and rules from the entrance gate to their proper duty section.

Six Foreign Students Enter Pilot Training With Class 56-J

Six additional students of foreign lands have been sent to Reese Air Force base for multi-engine pilot training. Three are from Chile, which has had students at the base previously, while two are from Venezuela and one from Guatemala, countries new to the Reese AFB training program.

The base has graduated 53 friendly allied students, 15 of them from Iran, 10 from France and 10 from Nationalist China. In addition there have been four from Colombia, three from Ecuador, five from Thailand, one from Cuba, three from Chile, and two from Saudia Arabia.

The new allies are members of

Class 56-J, just arrived at Reese AFB. Chilean students, training under terms of the Mutual Defense Assistance program, are Enzo G. DiNocera, Rica do France, and Raul Valenquela. They are aviation cadets. Second Lt. Francisco Gonzalez is the first student ever sent to Reese AFB from Guatemala, while Cadets Benito Adolfo Tovar and Mariano de Jesus Marquez are the first Venezuelans.

Also in Class 56-J are 53 student officers of the United States Air Force and 14 aviation cadets of USAF. All but one of the officers are college graduates. The cadets

(Continued on page 5)

Base Teletype Center Rated Tops

If a report received recently by the Reese AFB communications center was interpreted correctly, the center was noted to be the best in the entire Air Force.

A pamphlet published by the 2048th Airways and Air Communications Service, operator of RJWF, switching center for the Air Force teletype network, of which Reese is a part, stated that the base center was the best of 44 stations which the switching center is responsible for and from which they receive messages.

For February-August period the Reese AFB communication center had the best record of the 44 stations in regard to correctness and handling of messages leaving the center. The pamphlet also showed the RJWF switching center network was first among the five switching centers making up the entire Air Force network.

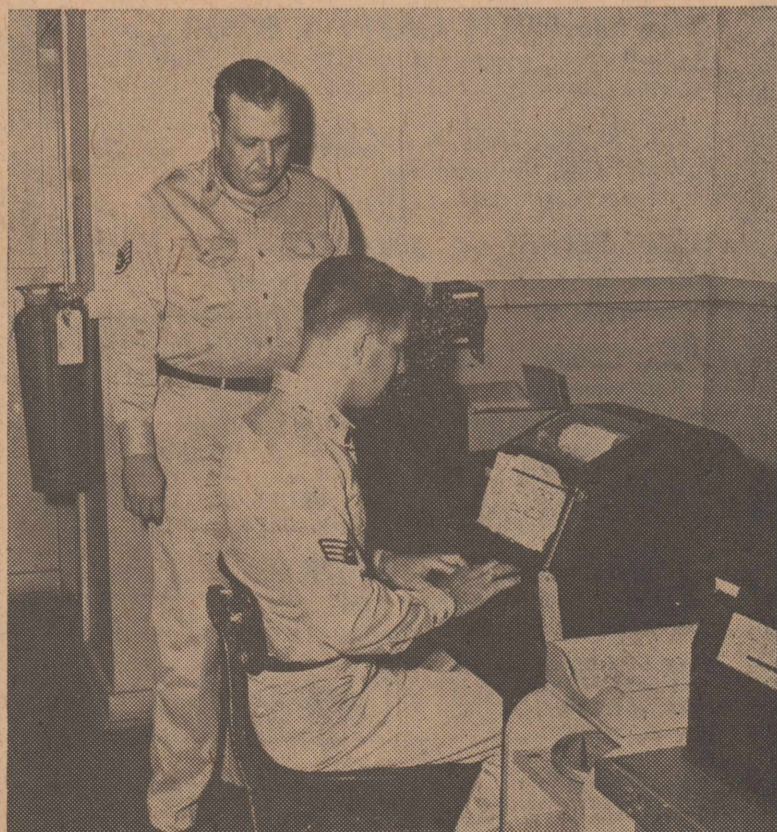

The question at Reese AFB was whether being best among the 44 stations which make up the top network of the Air Force makes Reese AFB the best of them all.

Capt. Richard J. Shawd, base communications officer, said maintenance in the communications center also is considered excellent, since there has not been a circuit outage due to maintenance troubles for over a year. The pamphlet praised the captain, S/Sgt. William C. Swafford, NCOIC of the center, and all the men at the base communications center for their superior work.

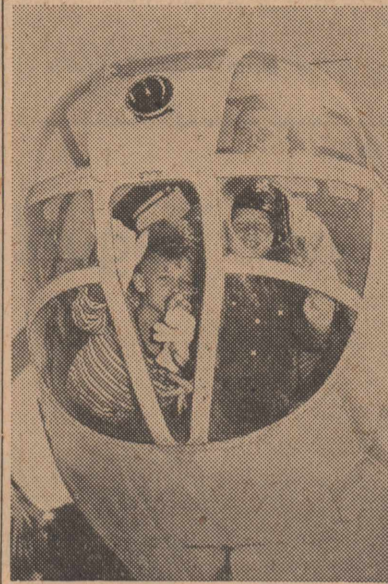

Records of the switching center show no discrepancies were noted in tapes monitored during August

from the Reese AFB center, although over 4,000 messages were sent and received.

* * * * *

COMMUNICATIONS CENTER—A/IC James F. Lawrie, is shown typing one of the 4,000 messages which are handled by the Base communications center monthly. The Reese AFB center has the best record in AF teletype centers in correctness and handling of the messages. S/Sgt. William C. Swafford, left, NCOIC of the RAFB communications center looks on. (Photo by Houchin, Base Photo Lab.)

Two Kids get "checked out" as bombardiers for the B-25 "Billy Mitchell" bomber.

A Welcome From Base Commander

Welcome to Reese Air Force Base, kids! I am happy to join with the Kiwanis Club of Lubbock in sponsoring the annual observance of Kid's Day.

We have opened the base to all kids today so that you may have an opportunity to see your Air Force in action. You'll see how we work and live at Reese and how we accomplish our mission of training young men—the kids of yesterday — to be capable pilots, the Air Force commanders of tomorrow.

Exhibits have been set up on the base to show you just how we accomplish this mission. You'll see the aircraft we fly, mechanics working on these aircraft to keep them the best and the safest planes in the world, and the Ground School, where we teach the thousand and one things a good pilot must know.

Enjoy yourselves, and we hope that you will be able to tell your friends and families that you are proud of Reese AFB and of the United States Air Force.

C. P. WEST
Colonel, USAF
Commander

On Base Classes Begin Next Week

Sufficient interest has been shown among the men at RAFB to organize on-the-base classes in English, arithmetic and algebra, J. F. Reeves, education officer, stated this week.

The classes are scheduled and will meet on the following nights: English, Monday, Sept. 26, at 6:30 p.m., algebra on Tuesday, Sept. 27, at 6:30 p.m., and arithmetic on Wednesday night, Sept. 28, at 6:30 p.m.

Present enrollment in the classes show the English with 27 enrolled, the algebra 11, and the arithmetic with 18. Only a few more may be enrolled in the English class, while the arithmetic and algebra classes have room for 15 more.

Men who are planning to enter college and are deficient in high school algebra should enroll in the class, while the men with 010 classifications can surely profit from the arithmetic classes, Reeves said. All classes will meet in the drivers school classroom with registration up to September 30.

Reese Opens For Area Youngsters

Reese Air Force Base is wide open today for inspections by kids of all ages—the future jet and bomber pilots of tomorrow. Youngsters who wish to learn more about the men and equipment of the finest air force in the world, and enjoy themselves while doing it, will find ample opportunity to do it today.

Kids Day, an annual event sponsored by the Kiwanis International and supported by the United States Air Force, is being observed in towns and at Air Force bases throughout the United States and in Alaska and Hawaii. Kids everywhere will be seeing first hand the planes and men who are working around the clock to keep our country safe and free from aggression.

Reese AFB, home of the 3500th Pilot Training Wing, is playing host to kids from all over the South Plains. The whole base will be open for the kids' inspection from 8 a.m. until 1 p.m., with exhibits and displays all over the base. The Wing Commander, Col. C. P. West, has expressed the hope that visiting youngsters and their parents will see everything there is to see and have a good time doing it.

Start With Parade

The day will start with a Wing parade and review at 8:30 a.m., on the Wing parade grounds, with the men of Reese AFB marching in review for the benefit of the youngsters. Honored guests in the reviewing stand for the parade will be a boy and girl from Lubbock who will be selected by the Kiwanis Clubs of Lubbock as Kids Day Commanders and Kids Day Executive Officers, respectively. After the parade there will be exhibits and demonstrations at many places around the base. (SEE MAP ON BACK PAGE FOR LOCATION OF EXHIBITS.)

Aircraft On Display

The B-25 aircraft that Reese students use in training will be on display in front of base operations on the flight line for inspection by future Air Force pilots. For kids who are interested in mechanics, a large maintenance hangar will be open to show them how our aircraft are inspected and repaired to keep our pilots safe while flying their missions.

The base theater will show free movies from 9 a.m., until 12:30 p.m., including some exciting shots of fighter plane "kills" and dog-fights during the war. The ground school will have classroom demonstrations of engines, radio equipment and other things used to train our students to be first class pilots and fighting men.

See Parachutes Packed

Kids will see parachutes being packed, fly the link trainer, go through the altitude chamber used to train pilots for high altitude flying and lots of other things the kids will find interesting and entertaining.

THE WEATHER

Saturday
Cloudy to partly cloudy with scattered showers in the afternoon and evening. Warm southerly winds.

Sunday
Cloudy and cooler in the afternoon, with moderate winds from the north. (Courtesy of Reese AFB Weather Station.)

(EDITORIAL)

His Fight Has Just Begun!

The services' new Code of Conduct for prisoners of war is now making its way to the field. Each command has made arrangements for it to be read, explained and discussed—obviously, the more of each, the better. But that is only a start.

No serviceman, no matter how many hash marks, can ever be satisfied that he is completely trained. He must constantly refresh his combat skills.

We must realize that to know and to understand the Code of Conduct is now one of the combat skills demanded of all of us. One reading isn't enough. As with other combat skills, we must repeatedly refresh ourselves.

The Korean War brought home to us that a fightingman's job doesn't end if he is captured. In fact, it becomes, in many ways, more important and more difficult.

A prisoner of war must have faith, integrity, patience, and endurance, all in full measure. But he should acquire these qualities long before he is ever faced with the possibility of becoming a POW. Afterwards, it could be too late.

That is what the Code is trying to help us do. That is why we must be steadily conscious of its meaning and of the responsibility it places on us—just as we are steadily conscious of our skills as marksmen, mechanics, or seamen. (AFPS)

Chaplain's Chat

A GOOD CONSCIENCE

By Chaplain (Major) Wilbur J. McDaniel

I trust each of you will take particular note of the cartoon appearing on this page, which is entitled "One Fight God Endorses". Commercial and military planes use the radio beam for navigational purposes. When a plane veers off to the right, the pilot gets the signal "N", or dash and dot; when he veers off to the left, he gets the signal "A", or dot and dash. When on the beam he hears a constant hum. If he stays on the beam he will be led home safely.

In the breast of every living man and woman is something more wonderful and mysterious than that of the radio beam. It is the beam of divine lights and guidance which we call conscience. Immanuel Kant, philosopher, said there were just two things that filled him with awe—the starry heavens and conscience in the breast of man. Conscience is our wisest council and teacher, our most faithful and patient friend, and our worst enemy. There is no punishment so severe and inexorable than that of conscience. There is no reward comparable to the reward of a good conscience. The "well done" of conscience is our most pure joy; its condemnation our deepest misery.

In John Milton's *Paradise Lost*, at the Creation of man the author puts into the mouth of the Creator these words: "I will put mine umpire, Conscience, in his breast." The ancients once talked of a mystic ring; when evil or temptation came, the ring pressed painfully on the finger. You and I wear the magic ring of conscience and woe betide us if we run rough-shod over our conscience. On the other hand there is no reward like the reward of a good conscience. No military declaration; the Congressional Medal of Honor, or the Victoria Cross; can compare to the reward of a good conscience. In the time of tribulation or persecution or slander, there is no friend like the answer of a good conscience. To all of you I challenge, "be loyal to the royal in thyself."

Three Top NCO'S Leave For Overseas Assignments

Ranks of the "old-timers" at Reese Air Force Base will be lessened next month when three master sergeants—Harry J. Fain, James L. Barger, and Peter J. O'Keefe—leave for overseas assignments. Fain is going to Japan, Barger to French Morocco, and O'Keefe to Tripoli.

Sergeant Fain helped re-activate Reese AFB in the summer and fall of 1949, carrying on as sergeant major of the 3500th Pilot Training group when it moved over from Barksdale AFB, La. Native of Louisiana, he has been in service since 1941, serving in Europe during World War II.

Sergeant Barger, also a resident of Louisiana, has been assigned to the wing inspector's office since the base was re-activated. He, too, came from Barksdale AFB to help re-open Reese AFB. He has been in service since 1935.

Sergeant O'Keefe has been at Reese AFB since August, 1951, coming from Alaska. He has been in service since 1942, serving in Italy during World War II. His home is in Rye, N.Y. At Reese he has been in the wing inspector's office and first sergeant of the Supply Squadron, Headquarters Squadron section of Pilot Training group, and the pre-cadet detachment.

Also being re-assigned is S/Sgt. James N. Wright, motor vehicle supervisor, who has received orders to report to Hickam AFB, Hawaii. He came to Reese AFB a year ago from France. He has been in service almost 14 years.

Tech Museum Opens

The Texas Tech Museum has opened its 1955-56 season with the long-awaited exhibition, "Saga of the South Plains", which will continue through October 25. This display of pictures and objects depicts the first 40 years of settling the prairie, from 1879 to 1919.

Paintings by Robert Hartman will also be featured in the Rotunda Gallery through September 30. The paintings are sponsored by the Art Institute.

All Reese AFB personnel and their families are invited to get acquainted with South Plains history by attending these complimentary exhibitions.

The museum hours are from 8 a.m. to 5 p.m., Tuesday through Friday, from 8 a.m. to 12 p.m. on Saturday and 3 p.m. to 6 p.m. on Sundays. The museum is closed on Mondays.

3501st Pilot Training Squadron

Officers Re-Assigned To New Squadron Slots

Capt. Leo D. Putt has been re-assigned as squadron adjutant Maj. Sam L. Osver, 3501st Pilot Training squadron commander, announced this week. 1/Lt. John M. Herda was transferred from Flight Four to Capt. Putt's former position as flight operations officer for Flight Three.

Capt. Putt was assigned to Reese in October 52 from Scott AFB, Illinois, where he served as personnel officer. He has been a flight instructor and assistant

flight commander here until his new assignment as adjutant.

Lt. Herda came to Reese in July 53. He was previously assigned to Lackland AFB, Texas, when recalled to active duty in March 53.

Receives Promotion

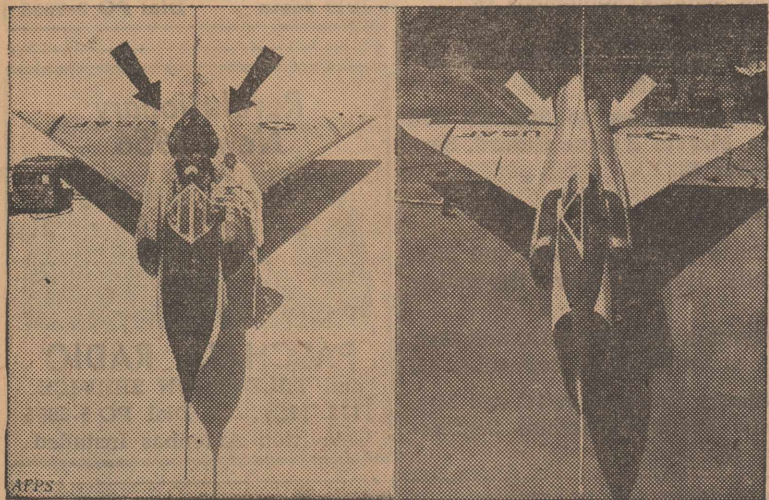

Lieutenant William E. Brown, instructor pilot in Flight Three, received his promotion to First Lieutenant last week.

Lt. Brown was commissioned upon graduation from pilot training at Bryan AFB, Texas in 53.

He has attended instructor school at Craig AFB, Alabama, and was an instructor pilot at Williams AFB, Arizona, before his assignment to Reese in June 54.

Returns From TDY

Capt. Robert C. Anderson, operations officer for the 3501st Pilot Training squadron, returned to Reese this week. Capt. Anderson has been on a short leave following the completion of his TDY assignment to supervisor's school at Craig AFB, Alabama.

MODIFIED F-102A — By the time the Kids visiting the base today are old enough to join the Air Force this and probably newer types of aircraft will be flown. Each year many new advancements are made in the speed and design of aircraft.

New Design Is Revealed As Plane Speed Secret

WASHINGTON (AFPS) — The government has revealed that "pinching in" the waist of aircraft increases their supersonic speed by as much as 25 percent and makes it easier for them to hurdle the sound barrier.

Previously a closely guarded military secret, this relatively simple, but far-reaching, innovation in design was announced here by the National Advisory Committee for Aeronautics.

The aircraft's fuselage is pinched inward in the area where it is joined to the wings. This change, as tested on modified navy Grumman F11F-1 and the air force Convair F-102A jet fighters, was found to reduce very greatly the sharp drag rise which occurs during the severe buffeting interval between 600 and 800 mph.

Richard T. Whitcomb, research scientist for the NACA, is credited with the discovery. He began work on it in 1951.

He found that the drag rise was vitally related to the amount of cross section area of a plane's fuselage and wing. By sucking in the plane's waist, it was learned that the cross section area of fuselage and wing combined becomes the same as it would be for streamlined fuselage alone.

Tour Of Lubbock Is Scheduled For Officers, NCO Wives Club

A "Follow-Your-Dollar" tour of Community Chest activities in the city of Lubbock has been planned for members of the Officers Wives Club and NCO Wives Club, Mrs. Richard L. Boulware, OWC president, announced this week.

The tour, scheduled for Tuesday, September 27, will leave the Public Library at 2001 19th Street in Lubbock shortly after 9:15 a.m., and will last approximately two hours. A short film will be shown at the Library, depicting scenes in Community Chest activities, followed by a bus tour of several of the activities. Members of the Junior League of Lubbock will act as hostesses and guides for the tour.

Members of the two clubs are urged to make reservations for the tour, Mrs. Boulware said. Reservations may be made by calling Mrs. Byrne P. Whalen, Hurlwood 3241, in Reese Village, or Mrs. Paul E. Pohl, SWift 9-3312, in Lubbock. If enough reservations are made, a special bus will be

SAFETY . . . is no accident

scheduled for the group, it was stated. Wives Club members are urged to make reservations immediately, Mrs. Boulware said.

Newcomers Reception To Be Held Saturday

A reception for all officers and wives who have arrived at the base since May 28, 1955 will be held in the Officers Open Mess from 7 to 8 p.m., on September 24.

Dress will be informal, with coats and ties or class A uniforms with blouse.

Immediately following the reception, dinner will be available from the a la carte service and Jake Miller and his orchestra will play for an informal dance.

FOR SALE or Trade
3 Bedroom Home, 2 tile baths, and den, attached garage, central heating, hardwood floors, drapes, air-conditioner. 2320 - 48th Street on paving. Phone SH 4-2965, Hugh O'Gwin. Will take trailer house in on trade.

Officers Wives Club Plans Bridge-Canasta Party For Next Meet

The Officers Wives Club Council meeting was held yesterday afternoon in the TV Room. Reports were given by officers and committee chairmen.

Due to the extra Thursday in the month there will be a bridge and canasta party next Thursday. Mrs. Ira H. Shick is senior hostess. Junior hostesses will be Mrs. Tobias Shcindler, Mrs. John F. Lippincott, Mrs. R. L. Savage, Mrs. Homer L. Parsons, Mrs. Charles L. Stokes and Mrs. Lloyd R. Sparks.

Little blue cradles hanging from a pink tree, decorated the table for a baby shower last Friday evening honoring Mrs. Charles O. Smith. Mrs. Edgar W. Guy and Mrs. DeWitt R. Bunn combined to give the shower at the Edgar Guy home.

Credit Union Urges Saving For Future

The local credit union has urged base personnel that now is the time to begin saving for that Christmas shopping, and also to be able to get a loan when extra money is needed.

By joining the credit union, a member may receive a loan of \$100 simply on his signature, but all new members must wait 30 days before a loan will be granted, M/Sgt. Claud Rushing, RAFB Credit Union President, pointed out.

The local savings and loan organization has increased its assets \$20,000 in the past 12 months and has a total in assets of \$72,000, and has 1100 members.

To join the credit union a person buys a \$5 share in the union, pays a \$.25 entrance fee, and then is entitled to all the privileges of the union. Each member of the union receives free life insurance to the amount he has in the credit union.

The Reese Credit Union is located in the Civilian Personnel Bldg., and is open from 11 a.m. to 1 p.m., Monday through Friday.

New Class

(Continued from Page 1)

include three college graduates, seven other former college men who did not graduate, and four high school graduates who did not go to college. Forty college and 30 states are represented among students of the class. Pennsylvania and Washington have seven students each, while Ohio, Illinois, and New York have five each. Ohio State and Pennsylvania State lead colleges with five each.

WHAT IS DEMOCRACY? A Picture Survey of World Democracy, edited by Richard M. Ketchum.

The living faith which is contained in the word DEMOCRACY is here provided an authentic and detailed record. Many who embrace a democratic way of life admit that democracy is a vague and remote term. The editors of WHAT IS DEMOCRACY? have brilliantly succeeded in giving concrete illustration to the varied concepts embodied in the term. Here the primary meaning and true record of democracy are shown, and shown at work, in the United States and throughout the world. This is a volume designed to make history throughout the world.

WHAT IS COMMUNISM? A Picture Survey of World Communism, edited by Richard M. Ketchum.

Here, in one of the most important and significant publications of many years, is a detailed, authentic record of communism in the United States and throughout the world. This book contains information never before made public and more which has never appeared in book form. The record of communism itself is clearly revealed: a stream of empty promises and positive threats.

These are two timely books that any person connected with the Air Force should read for profit and pleasure.

3502nd Team Base Softball Champs

In the championship game of the Reese intramural softball tournament, the 3502nd Maintenance Squadron team combined timely hitting and good pitching to beat the Air Police 8 to 2 and

The maintenance team was undefeated in the double elimination tournament play.

The Air Police started the first inning with a base hit by Landy, Missman drew a walk and both

scored as O'Neill singled.

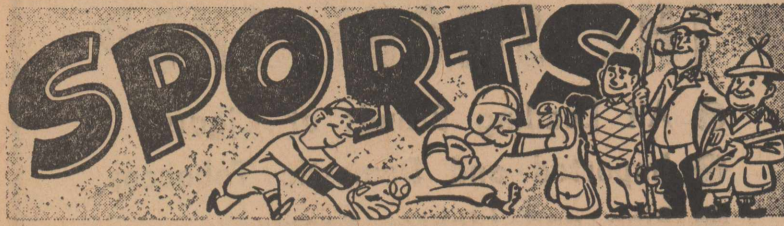

The maintenance team tied up the ball game in the third inning as Ragsdale singled and Sturner homered. They continued to score in the inning on singles by Leonard, Spooner, Forrester, and Scire, plating three runs.

Lefty Forrester, on the mound for 02nd, settled down in the remaining innings and allowed the Air Police only two hits after the first inning, and only one runner went past second base after the first frame.

02nd added two more runs to their cause in the fourth inning and another in the sixth.

O'Neill, who pitched a no-hit game in semi-final play, allowed the winners 10 hits.

The 3502nd Maintenance team members will be presented jackets for winning the base championship and also received a team trophy for being the top team in squadron league play.

By A/2C Maurice B. Ziegler

Sports activity at Reese has quickly turned to football with the squadron intramural football league scheduled to start October 3 with 12 teams entered into the play. Practice sessions have been scheduled throughout the past week as squadron teams get in shape for the season.

Other interests are centered on national football as a whole and on Texas Tech's Red Raiders, who quickly capitalized on the University of Texas' mistakes and won last week by a 20 to 14 margin. The question now is whether the Red Raiders can do the same to the TCU gridders in their game at Lubbock Saturday afternoon. In past team rivalry Texas Christian University has won 7 games and Tech 5.

The Tech-TCU clash will also be a revisit for Hugh Pitts and Carl Rose, who are the big men in the TCU line. Both of the men took the 1955 AFROTC summer training at Reese, and have looked forward to the meeting with Tech.

Pitts was chosen first string center for the Southwest conference all-star team last season and is co-captain this year.

Also expected to be watching the Texas Tech-TCU game is Lt. Gen. Hubert R. Harmon, superintendent of the United States Air Force Academy. He is scheduled to arrive at Reese Saturday morning. Does this mean that plans for a meeting of the Academy gridders with Tech might be in the offing?

The New York Yankees increased their lead in the American League pennant race to two and one-half games over the Cleveland Indians this week. Cleveland led in the race last week. In Cleveland, tickets were already on sale for the World Series, with Cleveland against Brooklyn. Seems like they were counting their wins a little before they were hatched.

The second round of play in base badminton has been completed with Lt. William Mohr, Lt. John P. Lee, Lt. Thomas French, S/Sgt. Joe Bauwens, S/Sgt. Charles McKinney and A/2C Curtis Davis left in the winners bracket of the singles competition. In the doubles, Lt. Mohr and Sergeant Bauwens are left in the winners bracket.

Reese AFB will host the Southeast Cadet Conference tennis tournament on Saturday, October 8. Entered in the tourney will be Hondo Air Base, Ellington AFB, Harlingen AFB, Bryan AFB, and Reese.

Lackland AFB Cops AF Softball Title

Lackland AFB, Texas, representing the AF's Southwest Sports Conference, won the fourth annual AF-wide men's softball championship by defeating Ardmore AFB, Oklahoma, of Great Plains Sports Conference, 4-1, in the finals at Keesler AFB, Miss. Pepperrell AFB, Newfoundland, representing the Northeast Oversea Conference, was third. Lackland next represents the AF in the Amateur Softball Association World Tourney at Clearwater, Fla., Sept. 18-24.

scheduled Sept. 26-30 at Donaldson AFB, S. C. Defending champion is the team from Francis E. Warren AFB, Wyoming, representing the AF Great Plains Sports Conference.

Another One?

HAVERTOWN, Pa. (AFPS) — The name's the same, but the frontier has changed somewhat. An applicant for a hunting license here signed his name. Daniel

AF-Wide Baseball Tourney is Boone.

MISS AMERICA — Sharon Kay Ritchie, 18, (seated) is crowned "Miss America of 1956" by former queen Lee Ann Meriwether at Atlantic City, N. J. Sharon, who beat 49 other contestants, says she will nix cheesecake photos because "I don't think there's anything queenly about bathing suit posing." Vital statistics: 35-23-35.

Saucer Expert Denies 'Green Men' Reports

WASHINGTON (AFPS) — Want to know what the average visitor from outer space looks like:

He's a little green fellow whose best friend apparently hasn't given him the word, according to people who say they've seen one, because he smells bad. And when he gets excited, he glows.

The authority for this description is Capt. Robert C. White, the Air Force's official "flying saucer expert."

In the past three years, he has answered well over 2,000 letters from people who say they've seen flying saucers or their occupants.

He has heard all kinds of descriptions, but the most frequent are of small green, luminous, smelly types. Despite all the stories, Capt. White is convinced that no space men have landed on the earth.

"Still people keep insisting that they've seen little green men," he says. "Some folks believe we actually have a little green man pickled in alcohol out at Wright Patterson AFB in Ohio."

"Our position is this: Given enough information about any sighting, we believe we can explain it in a natural and unsensational manner—that is, prove that it was a weather balloon or something."
