# Reese Sets New Record In Flying Safety

## Motto Entries Must Be Made Before Friday

Only one week remained today in the Air Training Command Motto Contest, with the deadline for entries at 4 p.m. next Friday.

ATC officials seek a motto which will "tell the world" the objectives and accomplishments of the command in supplying the Air Force with trained officers Air Force with trained officers and airmen who contribute to the Aerospace Age. The motto, to be used throughout the command in many ways, will encom-pass the mission of ATC and sig-nify to everyone its many activ-

Suggested mottos in the reopened contest may be made by anyone assigned to ATC, by civanyone assigned to AIC, by civilian employees, and by military dependents. A \$500 Savings Bond is offered as the prize for the writer of the winning motto. Final selection will be made in ATC headquraters.

Reese people have made

Reese people have made more than 150 suggestions on a motto. Many are considered worthy of the prize. Some have come from dependents, many from civilians.

All suggestions received in the Office of Information have been forwarded to ATC for consideration. Those submitted by 4 p.m. next Friday will be sent in and final judging is expected to be completed within a relatively

short time.

Contest rules and a coupon which may be used are published on Page 2. Entry blanks also are in the hands of first sergeants.

## New Instructors Assigned To Base

Five additional instructor pilots have arrived at Reese.

Captain Ralph W. Zoerlein, former B-47 pilot at Dyess AFB, has been assigned to the 3500th PTS. He is a former civil engineering student at Notre Dame University and has been in service

eight years.
First Lt. William W. Hopkins, Jr., came to Reese from Stead AFB for duty in the 3500th PTS. He is a graduate of Virginia Tech. First Lt. Fred A. Rider, former aeronautical engineering major at Auburn, recently completed BIS at Craig AFB. First Lt. Paul J. Holman, former student at Portland State College, also arrived from BIS. He has been in service 10 years.

Second Lt. William H. Brandt,

Reese graduate, has returned from BIS. He is a former elec-trical engineering major at Southern Methodist University,

hit country.

compounding the terror.

RETIRES-MSgt. Woodrow W. Lins, reparable parts inspector at Reese, receives a certificate of retirement from Col. William A. Martin, right, commander, 3500th Maintenance and Supply Group, upon his retirement from the Air Force. Looking on are Mrs. Lins and son, Roderick W., 11.

## Veteran Sergeant Retires; In Service Almost 25 Years

Air Force in ceremonies in the office of Col. L. C. Hess, Base Com-

Sergeant Lins, reparable inspector in the M&S Group, was presented with a letter of appreciation from Colonel Hess, with Col. William A. Martin, M&S Group Commander, making the presentation.

The letter, read by 1st Lt. Maurice Wachtel, Assistant Wing Adjutant, stated: "No accomplishment can be more satisfying than a long and productive career dedicated to the service of your country. Your period of active duty has been especially rewarding because it contributed to the initial establishment and continued growth of the newest of the four separate services — the United States Air Force."

Sergeant Lins plans to settle near Sacramento, Calif. He served in New Caledonia during World War II and on Guam during the Korean conflict.

His wife, the former Marjorie Jane Simmons of California, and daughter, Sharon Ann, 16, re-

### DRIVE SCHEDULED

The Air Force Aid Society, a year-'round emergency relief or-ganization, is preparing its oncea-year campaign for funds to run Trical engineering major at Southern Methodist University, Dallas.

The latter part of May, M&S Group had 91 per cent of its possessed aircraft in commission.

The latter part of May, M&S more than 300,000 Air Force to members.

A veteran of nearly 25 years ceived certificates of appreciation military service, MSgt. Woodrow K. Lins, retired July 1 from the for contributions to Chapel work, for contributions to Chapel work, especially in the Sunday School.

### SLOGAN NEEDED

More suggested slogans for Reese were sought this week from military and civilian per-

sonnel of the base.

The slogan will be used to signify the training mission and will be posted at the main gate, at the intersection of War Highway 5 and Texas Highway

116, and at other places.
Slogans have been used by business firms and other organizations for years. They have helped publicize and sell prod-

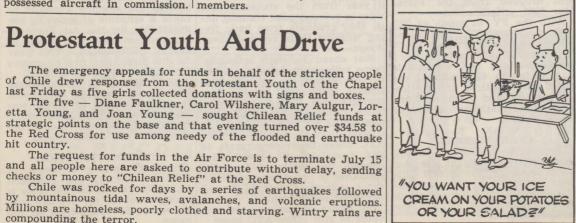

A slogan for Reese will make it better known, will intensify knowledge of its mission, and will expand the already strong confidence in it.

Base people are urged to send suggestions to the Office of Information at once

### REPAYMENT EXTENDED

For certain members of the Air Force repayment of advance pay collected on permanent change of station can be portioned out in 12 monthly installments, instead of the customary six months. The extension is authorized in a change in AFM 177-105, now at the printers.

YOU WANT YOUR ICE CREAM ON YOUR POTATOES OR YOUR SALADE

## Ten Months Without Major Accident Marked Up On Base

Reese has completed 10 months of flying without a major aircraft accident and this week headed for a higher record.

The last major accident was last Sept. 7. Safety officials said the

record resulted from complete cooperation of all people on the base and "is more remarkable because we have had a change of mission."

During the 10 months, 187 stu-

dents were graduatde from basic pilot training and about 120 instructor pilots participated in training. In addition, students of three other classes, yet to be graduated, also performed training flights. ing flights.

"Efforts of the entire instal-lation have permitted Reese to write into the record that best flying safety record it has ever had," Maj. Frederick F. Shrin-er, flying safety officer, said.

Colonel L. C. Hess, Base Commander, gave members of the Pilot Training and Maintenance and Supply Groups an extra two days stand-down in connection with the July 4 holiday in appreciation for the safety mark.

He said it was impossible to

establish the record without cooperation of everyone on the base and he would have liked to give everyone the two extra days. However, he added, it was impossible to have a complete stand-down because support troops were required to compile all records for the end of the fiscal year. He was high in his praise particularly of the PTG pilots and the M&S workers who kept planes in condition for flying.

## Work Slowed At Auxiliary

Weather has slightly delayed work on the Terry County Auxiliary Field, west of Ropesville, but construction is expected to be completed by early fall, Army Corps of Engineers men at Reese said Thursday.

All concrete has been poured and asphalt will be spread soon, it was said, with the start about July 15. About 40,000 tons of asphalt will be used by Nolan Brothers of Wichita Falls, the contracting firm.

Work is expected to be completed before the middle of Sep-

Reese students will use the field for landings and takeoffs to reduce the number of aircraft using Reese facilities in required training.

## USAF Buys JetStars

For Use By AACS
An order for purchase of five Lockheed Jetstars have been announced by USAF headquarters with delivery expected in mid-1961. the aircraft will be used by AACS for in-flight inspection of world-wide military navigational

FLYING CEASES
Flying activities at Ladd AFB,
Alaska, will be transferred to other locations and the flying portion of the base will be closed

## No Accidents Marked Here For Holiday

Reese came through the second holiday weekend of "Operation Summersafe" without a reportable ground accident.

Base people traveled hundreds of miles on highways without mishap for the July 4 holiday period. Many personnel remained on base and 'travel was not as ex-

base and travel was not as ex-tensive as in previous years. Credit for the accident-free holiday period was given to brief-ings by unit commanders, base-wide safety meetings, and close attention to proper practices by

Pre-holiday emphasis was placed on remaining on the base for recreational purposes, with a variety of athletic programs of-fered. Special dances also were held at the clubs.

held at the clubs.

"Our people showed again that they are safety-minded," Joe Lopez, ground safety director, commented. "Reese throughout the years has been able to write into its history high points our people wanted. It has been proven that everyone wanted a again that everyone wanted a good July 4 holiday safety record. All are to be complimented."

### Relaxed Regulation Grants Airman Reup

Airmen in grade E-4 and be-Airmen in grade E-4 and below completing a second or subsequent enlistment who fail to measure up to mental qualifications
for reenlistment now have a
chance to qualify for additional
terms of service.

In a message relaxing the stiffness of the regulations relating

ness of the regulations relating to reenlistment of career airmen, Headquarters delegated to field commanders authority to approor disapprove a waiver of mental qualifications provided the indi-vidual is otherwise qualified.

Headquarters spokesmen said the waiver authority was grant-ed as a demonstration of good faith and to protect men whose

service has been effective and a contribution to the Air Force.

The ruling recognizes that some men, good on the job, just can't prove themselves with paper and propel and pencil.

INSECTIONS MADE

The Periodic Section of the 3502nd Flight Line Maintenance Squadron has completed nearly 400 major T-33 aircraft inspections in the past year with a zero personnel and aircraft acident

## High Grades Made In College

Reese men enrolled in Texas Tech for the spring semester made the highest grades in base history, J. F. Reeves, educational special-ist, reported Thursday.

Sixteen of the 70 men who started classes received grades of A, percentage of 22.85. The same number made grades of B, while or 24.3 per cent, had C grades. Four men received passing grades D. No failing grades were recorded.

Four men were transferred before completing courses for which they were enrolled, and 13, or 18.6 per cent, withdrew prior to the end of the semester.

"This is a commendable record on grades, one of which all of us should be proud," Reeves said.

### From The COMMANDER'S DESK

By Col. L. C. Hess, Base Commander

The 10-month period free of major aircraft accidents which we have just experienced is commendable. It could not have been accomplished without the support and cooperation of all. I sincerely thank each individual who helped Reese achieve this fine record.

The accident-free period did not just happen! It was made through the many efforts and continued attention of many people to this important area. To prevent accidents requires that each individual and supervisor maintain a high state of safety consciousness at all times. By doing this we can maintain and carry on into the new fiscal year this fine

We can not become complacent with the record we have established and let down our guard for one fraction of a second. Keep up the good work and continue to make safety consciousness a habit. 

### Drive Should Be Successful

The Reese Credit Union, proud of its standing and its record, has started a membership drive which should be highly successful.

A good Credit Union — and Reese has one of the best — must provide its members with a source of low-cost personal loans, as well as a safe place to save. At the same time it must earn dividends. It must provide both a place for deposits and have money to loan to be successful. If savings deposited are not sufficient to maintain the loan service needed, then some members must secure loans,

elsewhere, at higher rates.

Reese Credit Union shares are an excellent form of saving and a superior investment because the money is safe and insured.

The money is available and convenient for loans to members.

Dividends are good.

Ownership of shares increases borrowing power and improves credit ratings. Money saved is power put away for future use.

The Reese Credit Union membership drive should prove highly successful. Base people who do not become a part of the Union are missing opportunity for a stronger financial standing.

### What Is A 'Normal' Home?

Not too many studies on military family life are available, although there are literally thousands of books on family life obtainable in the libraries. These books are concerned for the most part with "normal" family life as lived by average civilians or "abnormal" situations where some of the family members are a bit on the odd side. There are many facets of family life that military people regard as normal, whereas, the same circumstances might well be abnormal for a civilian family.

Take, for example, the establishment of a "home." Career military people expect to move about quite frequently. The very nature of the breadwinner's job demands this. There are training periods in one section of the country, school sessions in another, operational duties in still other areas. Then there are the inevitable "overseas" tours in the Far East, Europe, Africa, or in the Arctic. The military family doesn't have the same opportunity as its civilian counterparts to "put down roots."

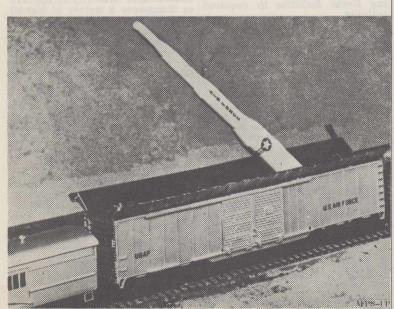

Yet we are far from being "homeless" people. Only those who confuse "house" with "home" are upset by these many necessary moves. A story is told of a youngster from an Air Force family who was living in a base Guest House with his family while his newly-assigned father was getting settled. Someone said to him, "It's too bad your family doesn't have a home." "Oh, we have a home, all right," the little fellow said. "We just don't have a house to put it in!"

"Home," then, involves more than a dwelling place. Wherever a family unit—father, mother, and children—dwell together in love, peace and harmony that is "home." There are thousands of people in the world who live in elaborate houses but who are nevertheless "homeless" because this happiness is absent.

If you cannot choose your way of life without fear of arrest, the concentration camp or the firing squad, you are left with the grim choice between moral and physical bondage. If you are spared the choice, it is because you live in a free country.

You are free when you are guaranted the right to express your opinions without fear, profess the faith you choose, leave and reenter your country, inform yourself as you please, choose your work and go on strike, be legally defended and impartially judged.

The North Atlantic Treaty Alliance (NATO) has three main characteristics: NATO is a defensive alliance to preserve peace by discouraging aggression; NATO is building a community of likeminded nations; NATO is for disarmament subject to international

RAIL MIGHT-Although still in the experimental stage, this is a model of the first Air Force Minuteman mobile missile-train which is undergoing a series of tests over portions of the United States' far-flung railroad network. Originating at Hill AFB, Utah, the missile-train tests are being conducted by an Air Force-industry railroad team to coordinate communications and perfect control equipment and procedures.

## Living Properly Leaves Memories Without Grief

By Chaplain George J. Worner Some of our most unhappy thoughts are the memories, the incidents of the past that we wish we could undo or do other than we did.

Many of these unfavorable memories which produce present grief and regret can be avoided by setting one's course in the direction of the Right.

For example, you will NEVER be sorry for telling the truth, for living a pure life, for doing your best, for thinking before acting, and for hearing and thinking be-

and for hearing and thinking be-fore speaking and judging.

One can spare himself future regret by presently helping the needy, being honest in bus-iness or in other human rela-tionships, stopping one's ears to gossip, and the killing of a

slanderous tongue.

One will NEVER be sorry for one will never be sorry for being courteous and kind to all.

One will never be sorry for faith put in Christ and for energy

invested in His cause; for loyalty to His Church; and for the devotion given to His will.

These things most persons are aware of. To become determined to live by these ideas and convictions will produce the creative dynamic, and wholesome individ-

Live to avoid regret and to sow righteousness.

### Command-Trained Men Always Ready

High in Alaskan skies a large MATS transport is having engine trouble. As the flight engineer feathers the propeller, the pilot heads for the nearest U. S. Air Force Base. On the ground, the pilot is met

by a maintenance crew chief. Rolling the aircraft into the maintenance hangar, a crew of mechanics swarm over the ailing engine and, in a matter of hours, the plane is ready to continue its flight.

In other parts of the USAF world, other things are happening. A truck breaks down, a typewriter carriage jams, a camera at the photo lab needs adjusting or a helicopter engine won't start. A phone call or report soon brings qualified mechanics to the scene to make on-the-spot repairs or to haul the equipment in for a major overhaul job.

These mechanics don't just happen to know how to repair the malfunctioning parts or equipment. They are specially trained at one, and in some in-stances, several ATC technical training centers.

ATC is actively engaged training repairmen for practically every piece of equipment in the U. S. Air Force inventory and annually screens thousands of airmen to find those best suited for mechanic training and repairmen.

In thinking up a motto for the Air Training Command, remember this: Without trained support people, every item of equipment in the U.S. Air Force would have to be discarded or returned to the factory after its first malfunction or breakdown. The Aerospace Force is helpless without

### OTS Requirements Changed By Need

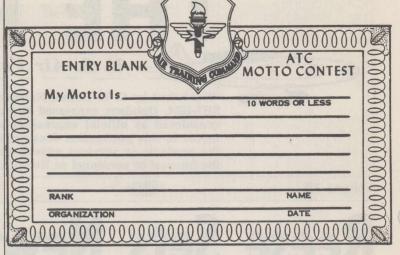

A USAF revision in Officer Training School requirements has Air Training Command looking for applicants in technical and scientific career fields.

Requirements for selection of Requirements for selection of OTS hopefuls in administration, personnel, supply, air police, transportation, guided missile maintenance, and armament have been dropped from the Fiscal Year 1961 program

Year 1961 program.
With the FY '61 quota of 200
OTS graduates, ATC lists main-OTS graduates, ATC lists maintenance engineers as "most needed" with 63 openings available; communications and electronics is second with 42 graduates required; aeronautical, architectural, electrical, and mechanical engineers and mathematicians will gineers and mathematicians will fill 40 posts.

CLASS ENTERS

Class 1964, with 772 members, has started training at the Air Force Academy, the second full-sized class to enter the institution. The Cadet Wing will reach its full strength of 2,512 in the summer of 1962.

New ATC Motto Contest rules make many more members of the ATC family eligible to compete for the \$500 U. S. Savings Bond

first prize.

With thousands more potential entrants, contest officials predict vigorous activity at all bases in support of the new motto

Other changes in the contest rules do away with the tie-breaking 25-word explanation and preliminary base judging. The contest runs from June 15 to deadline at 4 p.m., July 15. All entries must be in the base information office by that time.

Contest officials emphasized that all entries must be submitted

on the clipped coupon found above or a reasonable facsimile. Entries will be judged on the basis of aptness, originality, neatness and compliance with contest rules.

The official ATC Contest rules are:

WHO CAN ENTER: All military personnel and Department of the Air Force civilian employees of the Air Training Command, and their dependents. Personnel entering the contests event he essigned

their dependents. Personnel entering the contest must be assigned

to the Air Training Command within the contest flux be assigned to the Air Training Command within the contest period. Personnel from other Air Commands on TDY to ATC are not eligible.

CHOOSING MOTTO: Foreign language words or phrases will not be accepted. The motto should express a complete thought or group of thoughts in 10 words or less. Groups of isolated nouns will not be accepted; i. e., INTEGRITY - VALOR - DEDICATION. The motto will not duplicate these generally received to other Air

motto will not duplicate those generally reserved to other Air Commands or service arms through usage and custom. Known slogans and heraldic phrases will not be acceptable.

HOW TO ENTER: Entries will be submitted to the base Office of Information. The clipped coupon from the Base Newspaper or a reasonable facsimile must be submitted with each entry. Entry must include the suggested motte and entreatile must be submitted. reasonable facsimile must be submitted with each entry. Entry must include the suggested motto and entrant's complete name, rank and organization. Individuals may submit as many mottoes as desired, but each entry requires a separate coupon or facsimile. Your entry must be your original work, submitted in your own name. All entries become the property of ATC and none can be returned.

JUDGING: Selection of the winning entry will be made by a board of senior officers at Hq. ATC under the chairmanship of the commander, vice commander, or chief of staff, ATC. Entries will be judged on aptness, originality, neatness and compliance with the rules of this contest. Judges will determine method used to break a tie, if necessary. Decision of the judges is final.

PRIZE: The winner will be awarded a \$500.00 U. S. Savings Bond.

Bond.

CONDITIONS OF ENTRY: Submission of entry by any individual constitutes agreement to participate in publicity pertaining to the announcement of the winner's name and the winning motto.

CONTEST CLOSES 4 P.M., JULY 15: Entries must be received by the base Office of Information by that time. Entries arriving at the base Office of Information after 4 p.m. will not be considered.

## ATC Aids Aerospace Assault

HQ. ATC — Historians have given the U.S. Army much of the credit for exploring and settling the western frontiers of our nation. Infantry posts beyond the fringes of civilization were a haven to westward-bound wagon trains. Cavalry patrols searching out marauding bands of Indians and whites slowly brought law and order to the west.

Now another frontier is under assault — the aerospace. Future historians may credit another military service — the U.S. Air Force — for this exploration.

highly instrumented aerospace-craft. To fly and guide these supersonic craft requires the ap-plied skill of trained pilots and navigators — another product of ATC.

Flight training is accomplished at 19 bases and varies from the basic rudiments of piloting and navigation through advanced courses in these skills.

At pilot training bases, ATC instructors take their students from virtual ignorance of things aeronautical to full professional standing in the ranks of Air Force rated pilots. It takes about a year from the student's first rides in primary pilot training until they graduate from basic flying wearing their coveted silver wings.

But ahead lies more schooling. Some will continue their training in the interceptor or instructor schools, Others will receive their post-graduate flying from the using commands like SAC, TAC and MATS.

Navigators are trained at three ATC bases to guide aircraft to any point in the world. But beyond this basic skill, many specialize in operating reconnais-sance equipment, defense gear or advanced radar bombing devices. This advanced training is pro-vided at still other ATC bases.

Graduates from these specialized schools are usually assigned to SAC and TAC for berths aboard supersonic bombers and fighters.

Those not tagged for immediate advanced training are sent to operational units upon completion of the basic course. They fly as navigators on transport, carrier and other noncombat air-

ATC, through its flying training schools, provides a constant flow of trained people to fly and guide the aerospace vehicles any-Equipment and weapons systems used by the Air Force in probing space are complex and highly instrumented and provided in the aerospace vehicles anytime, anywhere to defend the free world or assist in exploring the new frontier.

## Freedoms Winner Named Speaker

The top priez winner of the re-cent Freedoms Foundation of Valley Forge letter writing contest is among the 16 Air Force offi-cers named as principals and al-

ternates for the USAF Speakers
Program for 1960.
Six outstanding graduates of
the USAF War College and six
from the Command and Staff
College are selected annually to fulfill a schedule of speaking en-

fulfill a schedule of speaking engagements for the Air Force at bases in continental U. S. and at nearby communities. This year for the first time two alternates from each class were chosen.

Maj. Rodney L. Cron, whose Freedom Foundation letter won first place award of \$1,000, was one of the six principals picked from the graduating class of the Command and Staff College.

CONSUMPTION HIGH

Student training at Reese in T-33 jet aircraft has expended 11,216,300 gallons of fuel. This is enough fuel for the average auto to make 355 round-trips to the

IGLOO UNDER SUN - These igloos at Cape Canaveral, Fla., will house the men and equipment being used to test the newest U. S. intercontinental ballistic missile, Minuteman. The test will begin late in the year.

## Sports Report

By A/2C Roger J. Gillard

Four of Reese's top swimmers from the meet held at the Airmen's Pool recently, are scheduled to participate in the ATC Swimming and Diving Meet at Chanute AFB, Ill., soon.

They are: 1st Lieutenants Antonio Lopez and Nelson Sprague and 2nd Lieutenants Richard Hilbert and Thomas Stack. All four swimmers are to participate in a medley relay to form the Reese team. Lt. Lopez will do the 1 and 3 meter dives.

REESE ENTRIES IN the ATC men's and women's tennis tournament were due last Wednesday at the base gym.

The tournament will be conducted July 9-13 at Lowry AFB, Colo.

There, the ATC championship and runner-up teams in both the men's and women's divisions will be chosen.

Teams also will be selected to represent ATC in the USAF World-Wide tennis tournament Aug. 1-5 at the U. S. Air Force Academy, near Colorado Springs, Colo.

### Golf Notes

Winners in four flights were crowned in the 36-hole golf tournament held last weekend on the Reese course. Three days were

set aside for play.
SSgt. Chuck Shobe won the
Flight A competition, with A/3C
Tony Nye second and Maj. John
W. Arnett third. MSgt. Carleton
Wilshere took Flight B, followed by 1st Lt. Carlos Gonzales in sec-ond spot and 1st Lts. Nelson prague and Jack Doan, tied for

Flight C winner was Capt, William Litle, trailed by Capt. Robert Carlin and Lt. Col. Quinn Oldaker. MSgt. Lewis Sanders won Flight D play, followed by SSgt. John Weaver and MSgt. George

Special prizes of a dozen golf balls were offered for first and second day driving. Major Thomas Manjak won the first day for his lie closest to the pin from the tee drive to No. 6 hole. Captain Douglas Ramsel won the second day for his No. 6 hole drive.

He graduated from Pilot Training at Reese in Class 60-F in March. He was given his wings and commissioned as a second lieutenant upon graduation.

## Bowling Results

### **Mixed Couples League**

At the halfway mark of the Officers' Mixed Couples League, the first place team of Capt. G. Freeman and 1st Lt. Howard H. Geddes and wives hold 21 wins and 7 losses.

Second: 1st Lieutenants and Mmes, Don Brown and Charles Burns team has 20½ wins and 7½ losses to likely give the first team more competition next week.

Maj. Alex Goodkin and Capt John Erdmann and wives made the slot for third place position with  $19\frac{1}{2}-8\frac{1}{2}$ .

High team series Wednesday night went to the Lt. Geddes and Capt. Erdmann couples with 1,995 for first, and closing in for second in team series—Maj. Joe Set-

ond in team series—Maj. 50e Set-nor and Maj. Thomas Manjak pairs with 1,885.

Taking first and second place positions for high team were the Lt. Geddes and Capt. Freeman team. It scored 683 and 675.

High game for men went to

team. It scored 683 and 675.

High game for men went to Maj. Setnor, 235 pins, and rolling the second high was Capt. Bernard Nelson, 226. The men's high series was taken by 1st Lt. Richard Corbin, 599; and second by Lt. Geddes, 591.

Mrs. Marty Freeman topped the list in high game for the women's play. She totaled 185 for first to Peggy Wachtel's 175 for second. Jean Setnor saw plenty of competition while rolling high series of 464. Peggy Wachtel was only one point behind with 463.

AIR BRAKES - A Lockheed Hercules C-130 eases down into an extra-short landing in a demonstration at Dobbins AFB near Atlanta. The huge transport, equipped with a Boundary Layer Control system prevents stalls at slow speeds, can land in less than 4½ times its own length—a shorter distance than the landing space required by a small, single-engine plane.

First Lt. Pat Mullins, Hospital has been reassigned to France for duty in a hospital.

Turbojet engines have a tremendous growth potential designed into them by aerospace engineers. A turbojet engine developed in 1951 produced 8,700 pounds of thrust. Today this engine, basically the same, produces 13,500 pounds of thrust, weighs less and uses less fuel. This same engine, with a turbofan modification, can produce 17,000 pounds of thrust, almost double the power of the original model.

## Retirement Manual Clears Directives

A new manual, 35-7, dated July 1, has been ordered by the Personal Affairs section to aid persons eligible for retirement now

or soon.

The manual, Service Retirements, is aimed at straightening out regulations, letters, messages, and pamphlets which have accumulated. It has 95 pages and has numerous specific and hypothetical cases to assist the retiree to understand his own case.

Sample letters concerning retirement cover 34 pages and benefits are explained. Individuals with 14 or more years of service

may obtain a personal copy.

When the supply of manuals is received, Personal Affairs people of pickup. will give notice of time and place

In our time, complexity has become a standard of life. It is not surprising, then, that many people find it increasingly difficult to know exactly how they stand in relation to their own investment and insurance needs. Substantial, ethical companies with long experience in the field of life insurance are aware that it takes experts to be able to chart a sound profitable program to suit individual needs, and knowing this, train men in insurance counseling to high degrees of expertness. One of America's long established insurance companies, New York Life Insurance Company, has just such an expert, Marshall Camp, to service Reese Air Force Base. No matter who carries your present life insurance, no matter what your coverage, Marshall Camp is eager to meet you, answer your questions and help you in any way. Won't you let him be of service to you? That is his occupation.
