Stores will close at 9:00

Floydada Eagles "Beat Pete"

CHANNEL 11 SPORTSCASTER PETE CHRISTY VISITS WITH FLOYDADA EAGLES BEFORE THE CHALLENGE

By Darwin Robinson

"We beat Pete" was the chant by the 2006 Floydada Tiger League Super Bowl Champions Monday afternoon, November 27, at the Whirlwind Field House. The team had challenged Channel 11 Television Sportscaster Pete Christy to a football Punt, Throw and Field Goal Kicking contest.

The 8-0 undefeated Eagles outdistanced Pete in every match. The challenge was to punt the football from the south goal line toward the north goal line. Two Eagle players out-kicked Pete by about 15 yards.

The throwing by two more Eagles put them ahead of Pete by a good 20 yards or more. Then came the most difficult part of the challenge. Two field goals were kicked from the spot where their footballs landed on their Throwing contest.

One Eagle missed his field goal from about the 5 yard line, but the other Eagle put his through the Field Goal uprights. Pete missed both of his Field Goal attempts from about the 20 yard line.

The team was promised "I Beat Pete Tee-Shirts" and they chanted as loud as they could "We Beat Pete." Many spectators were present for the challenge, along with Pete Christy and his cameraman Dusty Jonas. The Eagles Super Bowl Champions consisted of Kaden Lackey, Laron Lamb, RJ Gomez, Adam Suarez, John Angel Yannis, TK Farris, Mathew McGowen, Randy Perez, Jorday Woody, Sean Morales, Hunter Galvan, Janson Graham, Michael Cisneros, Joseph Herrera, Venturo Gonzales, Royce DeLos Santos, Emelio DeOchoa, Venturo Gonzales, Juan Nunez, Jake Graham, Ryan Chavarria, Tyler Covington, waterboys: Jaiden Blakey, Seth Nielson, Labrado Chavarria and Christopher Rosa.

Coaches for the team are: Head Coach Ray Morales, Jake Galvan, Eber Blakey and George Basaldua.

Credit cards good for utility payments

By Darwin Robinson

The Floydada City Council met Tuesday, November 21, and approved the acceptance of Visa and Mastercard for payments on utility accounts and municipal court fines and the council reduced electricity rates for City

City Secretary Karen Lawson told the council, "We now accept Visa and Mastercard only. We cannot receive debit cards or other credit cards, such as Discovery, etc. We have purchased a 'swipe' machine for this new convenience for our customers when paying their bills." •

In other matters, the council voted to reduce the cost of electricity rates to customers citywide by about \$4.00 per 1,000 kilowatt hours used.

City Manager Gary Brown said, "This new lower electricity rate will be used on our next billing cycle. The cost of fuel for generation of electricity has gone down and our consultant recommends we lower our fuel charge."

Following an executive session to discuss personnel, the council gave City employee Gary Fuller the title of Building Inspector and City Patrolman

Ruben Ramon was named Code Enforcement Officer. "These two positions will eventually eliminate the need for an outside build-

ing code inspector," said Brown. Also following the executive session, the council voted 5 to 1 "to not change" the title of Darrell Gooch to Police Chief/Assistant City Manager. Council Members voting "not" to change Gooch's title to include Assistant City Manager were: Bettye King, Jon Nielson, Sheldon Sue, Monte Williams and Ruben Barrientoz. Voting "for changing Gooch's titile" was Clar Schacht.

Brown had previously stated in a written handout, "By adding this title to Darrell might make it easier down the road to make the transition to a different city manager. It would be a good way to get by not advertising for the position if the council decided to go that way."

In another matter, the council discussed changing the number of signatures now required to pro-

cess City of Floydada checks.

Brown told the council, "It takes three signatures on our checks now, two live signatures and one stamped signature. The only ones approved to sign City

checks are the City Manager, the Mayor, the City Secretary and the Mayor Pro-Tem. We see a lot of business checks that have just one signature or a computer signature. We want to know if it is time to go to two signatures."

Council Member Nielson commented, "I believe two live signatures on the checks keeps everybody honest.'

No one made a motion to change the number of signatures on the checks.

The council approved an amendment to correct the garbage rate for customers outside the city limits to include an additional charge of \$5.00. Brown said, "When we passed the new ordinance for garbage collection rates, I missed covering the \$5 charge that was (already) estab-

lished for out of city collections."

Authorization was given by the council to Brown to apply again this year for the Chapman Forestry Foundation tree grant out of Lubbock. Brown said, "We have participated in this for several years. It is a \$2500 matching labor grant. We get about 6 or 8 trees each year that are about 4 inches in diameter.'

The council approved a re-

quest by Bill Feuerbacher to issue him a quit claim deed on an abandoned sewer lift station property located at the southeast corner of Lot 5, Blk 1, Steen Place Addition. Brown said, "We do not have any need for this little corner of his lot. I recommend we let this go."

An old structure, located at 231 1/2 W. Jackson, was approved by the council for demolition, upon Brown's recommen-

Jim Covington was appointed by the council to fill a vacant seat on the Floydada Airport Board.

During Public Hearing, Council Member Ruben Barrientoz asked Police Chief Gooch, "What is considered a vicious dog. Who locally decides this and who needs insurance for their

Palo Duro Basin Oil and Gas Update

Courtesy of Tom Musser

Tyner Resources Ltd.: On Monday, November 27, 2006 Tyner Resources Ltd. of Canada issued a News Release on their Tyner Texas Operating Company Palo Duro Basin Operations, updating their operations and plans on the R.G. Stephens Lease (68972) Well #1, the Kenneth

Broseh Lease (68969) Well #1, the Foster Lease Well #1, and plans to consider drilling a well near the PetroGlobe Energy McIntosh Lease Well #1077. On the R.G Stephens #1, Motley County, a six month production test has been started which includes venting the Gas and pro-

ducing the condensate. On the Kenneth Broseh #1, Floyd County, Tyner Texas Operating is evaluating possible additional work on the well. On the Foster #1, Floyd County, which the horizontal completion is a joint venture with the operator BASA Resources and Apollo Energy Operating, the well continues to be pumped. Tyner Resources additional stated they were considering drilling a Well near to the PetroGlobe Energy USA Ltd. McIntosh Lease Well #1077. In March of 2005 Tyner Resources Ltd. acquired lease acreage from Bankers Petroleum (US) Inc. in the Palo Duro Basin.

Tank repair expensive

Continued From Page 1

thority, or does each city, or a combination of cities?"

In October the council looked at bids to repair and paint three water storage tanks maintained by MMWA. Brandt Engineers of Amarillo presented probable total costs estimates at \$1,008,550.00. Estimated repairs at the Tulia water storage tank was at \$358,550.00, while repair estimates at the Lockney water storage tank was at \$433,450.00 and at the Rock Creek water storage tank was at \$216,550.00.

"How much more dollars can we put into this project, when we council.

are getting very little water from them? The three towns involved are not interested in spending any more dollars on this. If we bypassed Rock Creek, it would reduce our cost down to \$775,000.00," Brown added.

Council Member Monte Williams commented, "I can't see spending dollars on this (project) without searching all options

Mayor Bobby Gilliland added, "I believe we should apply for a grant as one entity under the MMWA."

No action was taken by the

CHD approves Ahmad's contract

By Darwin Robinson

The Caprock Hospital District Board met Tuesday, November 21, and approved two medical contracts. One was with Dr. Salman Ahmad and the other one was with PNS Cogdell Clinic. They were both from January 1, 2007 and to December 31, 2008, according to Board Member Tom

In other matters, the board discussed the health insurance costs for Floydada Emergency Medical Service employees. "The board was informed that the EMS

health insurance costs would be going over budget this year," said

The board approved advertising for at least two bids to install new carpet at the Cogdell Clinic and they approved a request by the City for the demolition of a structure at 231 1/2 W. Jackson.

The EMS made 54 runs in October, giving a total of 513 runs this year to date, according to Farris.

The PNS Cogdell Clinic showed a profit of \$37,057.29 for the month of October.

LOCKNEY ROTARY CLUB PRESIDENT CARL MOMAN (left) holds the club's bell as Rotary International Club President Bill Boyd (right), of New Zealand, rings it at the District Foundation dinner in Amarillo this year.

Rotary Club highlighted

The Lockney Rotary Club was highlighted in the Rotary Club Showcase in the October issue of the District 5730 newslet-

Chartered March 6, 1929, the club is still going strong with 16 members.

Recently 8 club members attended the District Foundation Dinner with Rotary International President Bill Boyd. Boyd rang Lockney's club bell which was held by Club President Carl

Lockney Rotary has maintained high attendance and is credited with one of the highest attendance records in the district.

The Club has claims Dee Copeland, 98, as the "oldest song leader in Rotary"

The Club has supported numerous local and area projects and two members were named Paul Harris Fellows this fall. The club now has 11 PH Fellows.

Lockney Rotary has received a district simplified grant of \$500 for Rotary benches for the downtown Lockney beautification project to be completed in 2007 and has applied for the RI Public Relations Grant for new signage for Hwy. 70 leading into Lock-

ney to promote Lockney and Ro-

Through a matching grant, the major project for 06-07 is a Water Well Project in Kenya, West Africa. The club has teamed up with the College Rotary Club of Fairbanks, Alaska and the Homo Bay Club in Kenya on a \$35,000 plus project for February 2007.

The club has already raised over \$3,000 for the project through fundraisers, club members, and an anonymous donor.

Rotary International and District 5730 have committed \$5,000 for a travel grant for Project Team Member, Buck Ford, of the Lockney Club, to participate in the water project.

First Baptist Church, in Lockney, has also committed \$1,000 to help with a small Baptist Church close to the well project.

RI and District 5730 have also committed over \$15,000 for this International project.

"The Lockney Club may be one of our smaller clubs," said Club President Carl Moman, "but it thinks big when it comes to 'Service Above Self and to Leading the Way'. We believe the best days for Lockney Rotary are still

Lockney Senior Citizens

By Vera Jo Bybee

Grandson J.W. McPherson, who is the main reason I am now writing this news article, came by before he had to go back to W.T after being home for the Thanksgiving holidays. I asked him for his mailing address and if he ever got any mail. He said "not much" but is sure nice when I do.

So I think it would be nice if all you readers out there would fill his mail box full of letters and cards. Christmas is coming up and his birthday is Dec. 24. Mail them to J.W. McPherson, WTAMU Box 61018, Canyon, 'Texas 79016.

My dear friend Nina Teuton called me with some great news. She had two great grandchildren in one week. Her daughter Rhea's son Spencer Offut and wife Hope are the parents of a little boy, Camdon born 11/20/06. He has a 3 year old brother Devlin. Then 5 days later on 11/ 25/06 Nina's son Bruce's daughter Syndee and husband Tom Unger were the parents of a little girl, Madison. Congratulations goes out to all them!

Ike Johnson spent Thanksgiving in Plainview with his grandson Steve Johnson and family. Other guest were Tom and Dixie Johnson, Orland Gilbert and his sons Gavin and Gregg and his

Lucy Dean Record spent Thanksgiving Thursday with her daughter Donna and husband Guy Roberson. Donna's other guest was their daughter Crystel and family and son, Charles and his family.

Friday Crystel and family came to Lockney. They got to tour D & J gin. They thought that was really something to see. They then visited Ike Johnson and saw all his beautiful handwork, cross stitching and

On Saturday night Lucy Dean and Ike attended a surprise birthday party for her daughter Donna at the Lubbock Club. Attending were all of Donna children. Daughters, Crystel, Julie, Amy and son Charles. Also most of their children too.

Marjorie and Mel Holcomb spent Thanksgiving in Canyon with their daughter Charlotte Rhoderick and daughters Kendra, Charla, Kimmie and son Chance.

Sunday Charlotte, Kendra, Charles of Canyon and Bruce's daughter Megan Cooksey of Amarillo attended church with Marjorie and Mel and stayed for

Our niece Debbie Bybee Stennett of Plainview wrote me about her aunt Rita Griffith Coats who passed away one day after her 68th birthday on Oct 9, 2006 having a little granddaughter Hanna Grace Coats born 6 weeks after her granny Rita died. I know Rita really wanted to live to see that little girl but just didn't make it. Hannah Grace's parents are Rita and Charles Coats only child Matt and wife Jennifer Coats. It's such a shame that Hannah Grace won't know what an incredible lady her grandmother was.

Mason to appear at Trinity

International T.V. and recording artist, Lowell Mason will be appearing at Trinity Assembly, 500 West Houston in Floydada on Sunday, December 3 at 5:00

Lowell Mason has been called the World's Smallest Gospel Singer because of his unique height of only 46 inches. His melliferous voice, however has no comparison to his size. When he sings, his booming voice brings a thrill to everyone who

During his program, you will hear a variety of "Old Time" songs. The mood can change from a deep moving hymn like "Peace In The Valley" or "The Old Rugged Cross" to a rousing, hand clapping gospel favorite like "Daddy Sang Bass" or "Put Your Hand In The Hand Of The Man From Galilee.'

The experience of many years of performing to audiences around the world accredits this very talented gentleman with being truly a professional in his chosen field.

Lowell Mason began his singing career at the early age of only 9 years. At that time he joined the staff of "Childrens Bible Hour" radio broadcast out of Grand Rapids, Michigan. For seven years, he was a regular feature on that weekly program which was, and still is, heard from coast to coast. During his teenage years, Lowell sang for Youth For Christ in the United / States, and Victorious Christian Youth, in Canada.

After completion of High School in 1955, Lowell Mason joined the Cecil Todd Evangelistic Team of Joplin, Missouri. This association produced a week television program called en on vival Fires", which was stations more than 150 televir mason was each week. Low Mason was featured solo; on that program during the s and the 70's.

Obituaries

ESTELLE GILBREATH
Jossie Estelle Gilbreath, 72, a
resident of Floydada since 1952,
died on November 26, 2006 at
W. J. Mangold Hospital, Lockney, TX.

Mrs. Gilbreath was born January 13, 1934 in Paden, Oklahoma to the late Harley and Clarice Bradley. She married Bill Gilbreath on January 28, 1951 in Lockney. Mrs. Gilbreath was a manager of the school cafeteria for FISD until retirement. She was a member of the Retired Teachers Association. She was also a very active, involved member of Calvary Cornerstone Fellowship Church in Floydada.

She is preceded in death by her parents, and one daughter, Beverly Gilbreath Anderson.

She is survived by her husband, Bill Gilbreath of Floydada; 2 sons, Garry Gilbreath and wife, Wanda of Terrell, TX; and Wayne Gilbreath and wife, Ann of Lubbock, TX; 9 grandchildren, 13 great-grandchildren, and 4 sisters.

The family greeted friends from 6:00 - 8:00 PM, Wednesday, November 29, 2006 at the Moore-Rose-White Funeral Home of Floydada. Funeral services were held at 10:00 a.m., Thursday, November 30, 2006 at Calvary Cornerstone Fellowship Church in Floydada. Reverend Armando Morales, Pastor, and Claude Porter officiated. Burial was held at the Floydada Cemetery in Floydada, under the direction of Moore-Rose-White Funeral Home of Floydada. The family suggest memorials to Calvary Cornerstone Fellowship Church, 505 North 2nd, Floydada, TX 79235.

THIS WEEK'S

FLOYDADA BOY SCOUTS TROOP 357

Floydada Boy Scouts Troop 357 will Scout for Food, Saturday, December 2nd, 9:00 a.m. -1:00 p.m. You may leave food on doorstep if not at home.

AMERICAN CANCER SOCIETY CHRISTMAS BRUNCH

The Floyd County American Cancer Society Relay for Life Annual Christmas Brunch will be held Saturday, December 2nd from 9:30 until 11:00 a.m. in the home of Marty and Sherese Covington, 907 W. Missouri, Floydada.

Tickets can be purchased at the door or from any board member or at the First National Bank of Floydada and at Thayer and Washington CPA for a \$10 donation to Relay for Life.

GRADY MITCHELL

Funeral services for Grady Mitchell, 82, of Loraine were held at 2:00 p.m. Sunday, November 26, 2006 at the First Baptist Church in Loraine. Revs. David McNary and Dale Hartley officiated.

Burial was held in the Colorado City Cemetery under the direction of Kiker-Seale Funeral Home.

Mr. Mitchell died Wednesday, November 23, 2006 at his residence.

He was born July 30, 1924 in Lamar County, Texas to Burrell and Fannie Mae Brymer Mitchell.

He had been a resident of Mitchell County since 1942. He married Anna Elnora Miles on October 30, 1946 in Anson. He was a retired farmer and a long-time member of the First Baptist Church in Loraine.

He is survived by his wife, Elnora Mitchell of Loraine; a daughter, Judy and husband, Ray Macha of Lockney; two sons, Herman and wife, Penny Mitchell of Loraine and Henry and wife, Kelly Mitchell of Roscoe; eight grandchildren and ten great-grandchildren.

The family received friends from 6-8 p.m. Saturday, November 25, 2006 at the funeral home.

Family suggests memorials be made to the First Baptist Church of Loraine and Home Hospice of Big Spring.

ELMER SWAFFAR

Elmer Benjamin Swaffar of Lubbock passed from this life on Monday, November 27, 2006 at the age of 86. Mr. Swaffar was born on November 10, 1920 in Altus, Oklahoma to Benjamin and Pernie (Ray) Swaffar.

He married Johnnie J. Smith on July 1, 1941 in Lubbock. She preceded him in death on April 12, 1984. Before retiring in 1980, Mr. Swaffar was a manager of Barwise Fertilizer and Butane. He is preceded in death by his parents, wife and one brother,

"Red" Swaffar.

Those left to mourn his passing are one son, Gene and his wife, Gayle Swaffar of Lubbock; two grandchildren, Brad and his wife, Mikki of Southland and their two children Brooke and Rendall; Regina and her husband, Toby Brooks of Abilene and their two children Stormie and Cutter and one sister, Edder Love of Bridgeport, TX.

Family greeted friends from 6:30-8:00 p.m., Wednesday, November 29, 2006 at Moore-Rose-White Funeral Home in Lockney.

Graveside Services were held at 10:30 a.m., Thursday, November 30, 2006 at Floyd County Memorial Park. Rev. Carl Moman, Pastor of First Baptist Church in Lockney, officiated.

Memorials may be sent in Mr. Swaffar's name to VistaCare Hospice, 1010 Slide Rd., Lubbock, Texas 79416.

Arrangements are under the personal care of Moore-Rose-White Funeral Home of Lockney. To register or send condolences online, please visit:

Public Notices

NOTICE OF

SOUTHWESTERN PUBLIC SERVICE COMPANY'S APPLICATION
TO AMEND ITS CERTIFICATE OF CONVENIENCE AND
NECESSITY FOR A PROPOSED TRANSMISSION LINE WITHIN
FLOYD AND HALE COUNTIES, TEXAS
PUCT DOCKET NO. 33456

Southwestern Public Service Company (SPS), in accordance with the rules of the Public Utility Commission of Texas (PUCT), hereby gives notice of its intent to obtain a Certificate of Convenience and Necessity (CCN) to build a new transmission line in Floyd and Hale Counties, Texas. These facilities include approximately 21 miles of new 115 kV transmission line. The estimated cost of this project is \$9,898,838. The locations of the routes, which are comprised of different line segments, are described below and shown on the attached map. The PUCT will approve only one of these routes.

The proposed project includes the construction of a 115 kV single-pole transmission line between the Floyd County and Cox Interchanges in Floyd and Hale Counties, Texas. Route 1, which is the Preferred Route, consists of Segments A, B, C, E, and G. Starting at Cox Interchange the route goes east 4.5 miles (Segment G). From there it turns south and continues approximately 3.5 miles to US 70, turning west along US 70 (but outside the right-of-way) for 0.5 miles and then south to cross US 70 (Segment E). On the east side of FM 2883, it continues 2.2 miles south (Segment C) and then turns west for 0.5 miles (Segment B), south for 8.3 miles, west for 1/4 mile, and then south for one mile. The route then turns west and goes 1/4 mile, and then south to the Floyd County Interchange (Segment A). Route 2, which is an alternative, consists of Segments A, B, D, E, and G. This route is the same as Route 1 except that Segment D is on the west side of FM 2883. Route 3, another alternative, is made up of Segments A, H, I, L, and M. Starting at Cox Interchange, it goes south 1.8 miles to US 70 (Segment L). At US 70, it turns southeast along US 70 on the south side for one mile (Segment M), then another 1.3 miles southeast along US 70, and turns south for 1.8 miles (Segment I). It then turns east for 0.6 miles, south for one mile, and then east for one mile (Segment H). From there it turns south following the same route description as described above for Segment A and terminates at the Floyd County Interchange (Segment A). Route 4 consists of Segments A, H, J, L, M, and N. Starting at the Cox Interchange, it goes south 1.8 miles to US 70 (Segment L). On the south side of US 70 it turns southeast (Segment M) for 1.2 miles, then turns south for 0.8 miles. The route then angles southwesterly across the county road and continues south for 0.5 miles (Segment N). From this point, the route continues south for one mile then turns east for one mile (Segment J). From there the route continues east for 0.6 miles, turns south for one mile, and then east for one mile (Segment H). At this point, the route follows the same route as described above for Segment A and terminates at Floyd County Interchange. Route 5 consists of Segments A, H, J, K, and L. From the Cox Interchange, this route goes south 1.8 miles to US 70 (Segment L). It continues south for 1.8 miles and turns east for one mile (Segment K). It then turns south for one mile, and then east for one mile (Segment J). The route continues east for 0.6 miles, turns south for one mile, and then turns east for one mile (Segment H). The route then turns south following the route as described for Segment A above and terminates at the Floyd County Interchange (Segment A).

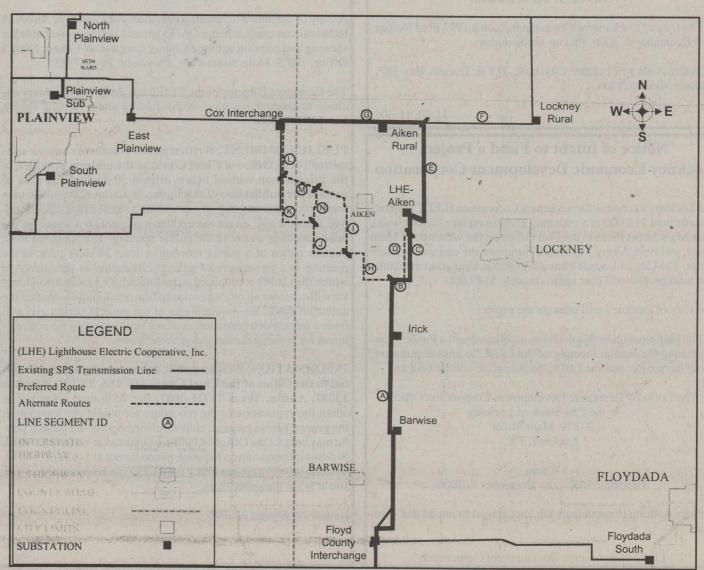

Maps showing the foregoing preferred and alternate routes may be reviewed at SPS's office, 601 S. Tyler, Amarillo, Texas, by contacting Lance Kenedy at 806-378-2435. Persons wishing a copy of these maps should contact James Bagley at 806-378-2868.

Persons with questions about PUCT Docket No. 33456 should contact Brad Sparks at 806-378-2132 or James Bagley 806-378-2868. Persons who wish to intervene in the proceeding or comment upon action sought, should mail their requests to intervene or their comments (along with 10 copies of the letter) to:

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Avenue
P. O. Box 13326
Austin, TX 78711-3326

The deadline for intervention in the proceeding is 45 days from the date this application was filed, and a letter requesting intervention should be received by the PUCT by that date.

The PUCT has developed a brochure titled "Landowners and Transmission Line Cases at the PUC." Copies of this brochure are available from SPS by contacting Brad Sparks at 806-378-2132 or James Bagley at 806-378-2868 or may be downloaded from the PUCT's website at www.puc.state.tx.us. To obtain additional information about this case, contact the PUCT at 512-936-7120 or 888-782-8477. Hearing- and speech-impaired individuals with text telephones (TTY) may contact the PUCT at 512-936-7136 or toll free at 800-735-2989.

Public Notice

Texas Commission on Environmental Quality

NOTICE OF CONCENTRATED ANIMAL FEEDING **OPERATION APPLICATION** General Permit Authorization NoTXG920757

APPLICATION. Larew Farms Inc., P.O. Box 1554, Plainview. Texas 79073, has applied to the Texas Commission on Environmental Quality (TCEQ) under General Permit No. TXG920000 for authorization to operate a new dairy cattle facility at 4,400 total head, of which 3,600 head are milking, in Floyd County, Texas. The notice of intent was received by TCEQ on May 9, 2006. No discharge of pollutants into the waters in the state is authorized by this general permit except under chronic or catastrophic rainfall conditions or events. All waste and wastewater will be beneficially used on agricultural land.

The proposed facility will be located on the south side of Farm-to-Market 1782 (County Road 110) and 0.5 mile west of Ranch Road 2301, said intersection is three miles north of the intersection of Ranch Road 2301 and U.S. Highway 70, Floyd County, Texas. The facility will be located in the drainage area of the White River Lake in Segment No. 1240 of the Brazos River Basin.

A copy of the notice of intent, application, the Executive Directors technical summary, and the CAFO general permit is available for viewing and copying at Floyd County Courthouse/County Clerk's Office, 105 S. Main Street #101, Floydada, Texas 79235.

The Executive Director of the TCEQ has made a preliminary decision to approve coverage of this facility under General Permit No. TXG920000.

PUBLIC COMMENT. Written public comments may be submitted to the Office of Chief Clerk, at the address provided in the information section below, within 30 days of the date of newspaper publication of this notice. In addition, the public may request a public meeting. If significant interest exists, the Executive Director will direct the applicant to publish a notice of the public meeting and hold the public meeting. The applicant must publish notice of a public meeting at least 30 days prior to the meeting in a newspaper of general circulation in the county in which the CAFO is proposed to be located. The Executive Director will consider all relevant information pertaining to whether the applicant meets the requirements of the general permit and will issue a written determination as to any final action on the notice of intent for coverage under the general permit.

INFORMATION. Written public comments should be submitted to the Office of the Chief Clerk, MC 105, TCEQ, P.O. Box 13087, Austin, Texas 78711-3087. For additional information, about the application or the procedure for public participation in the general permit process, individual members of the general public may contact the Office of Public Assistance at 1-800-687-4040. Si desea información en Español, puede llamar al 1-800-687-4040. General information regarding the TCEQ can be found at our web site at www.tceq.state.tx.us.

At the end of a lackluster, sunny weather urgently is needed four-day trading week shortened by the Thanksgiving Holiday, cotton futures on the New York Board of Trade settled higher above a key area of resistance, traders said.

USDA's weekly export sales report was released one day late as government offices were closed for Thanksgiving on Thursday. The department reported net export sales of U.S. cotton totaled 233,400 bales in the week ended Nov. 16, 39 percent more than the previous week and 46 percent more than the four-week average. Major buyers included Turkey, Indonesia, and South Korea. Sales of 7,500 bales for delivery in 2007-08 were for South Korea and Indo-

Export shipments of 146,100 bales were equal to the previous week and 11 percent more than the four-week average. Primary destinations were Turkey, Mexico and China.

On the spot cotton scene, online trading by producers in Texas, Oklahoma, and Kansas in the week ended Nov. 23 totaled 10.569 bales compared to the previous week when 6,081 bales were sold. Average prices received by producers in the most recent week ranged from 42.88 to 47.00 cents per pound compared to 43.48 to 48.02 cents per pound the previous week.

Meanwhile, the U.S. cotton harvest continues. Some areas of the Southeast experienced scattered rain and temperatures 20 degrees below normal for this time of year. Snow flurries were reported in isolated locales. Although more than three-fourths of the crop already is off the stalk, the precipitation likely will have an adverse affect on the quality of lint in remaining open bolls. A prolonged period of warm,

Oil & Gas Report

to help bleach any discolored fibers and to allow picking to re-

Harvest is progressing at a Wednesday but failed to rise rapid pace on the Texas High and Rolling Plains under favorable conditions. Above-average temperatures prevailed this week, and the harvest progressed without interruption. Seed cotton supplies are increasing, and gins are operating at full capacity.

Near ideal conditions persist in the Far West and fieldwork is quickly advancing. In fact, record-setting daytime highs were reported in parts of Arizona this week. Approximately twothirds of the crop was off the stalk in the Far West as of Nov. 19. Ginning, however, will continue. well into January.

In other cotton news, scientists at Texas A&M University reported this week they have genetically engineered cottonseed that contains virtually no gossypol, a compound which is toxic to single-stomached animals such as poultry, hogs, and humans. Cottonseed has long been a tremendous source of protein only for ruminants (animals with four stomachs) such as dairy cows. However, according to analysts, if this new cottonseed is viable, it could be used in much wider and more varied applications.

"Of course the quality of the fiber produced from the new seed needs to be of adequate length, strength, micronaire, uniformity, and color in order to ensure widespread commercial acceptance," one market observer explained. "However, the fact that a vastly larger market would exist for the seed, which heretofore has only been able to be used for cattle feed and/or oil extraction, could bring another stream of income to those farmers who choose to plant the new variety," he con-

Texas A&M University Crop and Ag Report

Local Conditions

High winds throughout the state knocked some row crops to the ground and delayed the harvesting of others. In some parts of the state, relief-giving rains came, while other regions remained dry, Texas Cooperative Extension agents reported.

"Significant weather events in Lubbock County over the past week included high winds reaching 44 to 45 mph on both Nov. 14 and 15," said Mark Brown, Extension agent agriculture."These winds hampered harvest and caused minor structural damage, but did not appear to cause significant damage to cotton or sorghum still in the field.

"High winds are drying out the soil moisture levels, reducing the wheat growth," reported Justin Scott, Extension agent for agriculture and natural resources in Cochran County. "Dry weather has allowed cotton and sorghum harvest to continue, although the wind has been a factor in the ability to harvest numerous acres. The harvest reports have been good, with cotton doing well in yield and quality.

"Winter grazing at this early stage is better than it's been in a few years," said Jon Green, Extension agent for agriculture and natural resources in Parker County. "Some haven't turned in vet, but growth has been good. We are still in great need of runoff rainfall in stock tanks.'

'The area has received sufficient rains to lower the Keetch/ Byram drought index into the hundreds," said Jack White, Extension agent for agriculture and natural resources in Cherokee

Based on 100 years of weather data, the Keetch/Byram drought index is primarily used to predict the chance of forest wildfires, said Dr. Eric Taylor, Extension forestry specialist. However, the data shows a 25-year cycle. One 25-year period shows wetter and cooler than average summer conditions; the next hotter and dryer, which has an impact on all agriculture. According to the index, the state is currently about seven years into one of the hotter and dryer 25-year periods.

More information on the Keetch/Byram drought index can be found on the Texas Weather Connection Web site at http:// twc.tamu.edu/kbdi.aspx

The following are reports from Extension districts around

PANHANDLE: Temperatures were variable during the week with a few days slightly above and a few days slightly below average. High winds over several days caused some soil erosion and crop damage. No significant moisture was received during the week. Soil moisture is rated very

short to adequate, with most areas reporting short. Open weather has allowed cotton harvest to make good progress. Windblown tumbleweeds caused harvesting difficulties in some fields. The cotton crop was about 65 percent harvested, and yield and grade reports are good. Peanut harvest is nearly complete. Sorghum harvest was about 50 percent complete. High winds caused some crops to fall down in many fields. Soybean and sunflower harvests were almost completed. Wheat is rated mostly fair to good. High winds caused some damage to recently emerged wheat fields. Range conditions are rated mostly fair. Abundant dry grass, no precipitation and high winds have created a high fire-danger potential. Cattle are in good condition. Supplemental feeding is under way in most ar-

SOUTH PLAINS: Most of the region received its first hard freeze. Mild days and cold nights prevailed with no moisture and two days of 45-55 mph winds. Cotton harvest was about 60 percent complete. High winds shut down cotton harvest and other field operations for two days. Peanut harvest is winding down with an estimated 90 percent harvested. Grain sorghum harvest was 70 percent complete. Winter wheat stands continue to be excellent, but dry windy days were rapidly decreasing the available soil moisture for all cool-season small grains. Forage availability for livestock was still good, and livestock are in mostly good condition. Supplemental feeding of livestock continues in most counties

ROLLING PLAINS: Cold nights, warm days and very high winds throughout the week dried top moisture. Surface tank water is short to dry; good runoff is. needed to fill dry lakes and ponds. Cotton harvest continues; yields are average to a little below average on irrigated land and will be below average on the dry land. However, the majority of farmers are starting to get harvesting equipment ready. Wheat planting continues to progress; most producers have enough moisture to get a stand. Ranges are going dormant, and some producers getting ready to start feeding livestock. Some ranches are already supplementing bulls. The region still has not had a major killing frost or freeze.

NORTH: Soil moisture ranges from very short to adequate. Winter wheat and winter annual pastures are doing better after recent rains. Producers continue to plant winter pasture and look for hay. Sorghum, soybeans and cotton crops are 100 percent harvested. Oats are 90 percent to 100 percent planted. Winter

wheat is in fair to good condition, with 50 percent to 80 percent emerged. Pecan harvest is under way with 30 percent harvested. Livestock is in fairly good condition. Supplemental feeding of livestock is in full swing. Runoff for livestock water is still needed.

EAST: Calf prices were steady to \$3 lower this week, and demand was good on quality calves. Good quality bred cows saw prices steady to higher. There no real choice pairs this week to test the market. Pecan harvest was near completion. Producers were trying to finish baling hay.

Winter pastures were in good condition with some small grain plantings being grazed. Ample moisture, along with cooler temperatures, has provided

forages. Cattle were in good condition, and prices still holding. Hay supplies are limited, but few producers have had to feed yet. There was no rainfall this week progress. Hay supplies were extremely short. Calf weaning was nearly complete. Stock water rewas in progress. Winter pastures showed promise. Cooler temperatures will not stay long and no rainfall was reported this week. Hay harvest continued in moisture was short with most arsome places prior to the Friday

ranged from very short to adequate. Ranges and pastures varied from very poor to excellent. Winter wheat ranged from very poor to good. The first freeze was reported, and there was no precipitation.

WEST CENTRAL: Temperatures have remained cool and dry. High winds at midweek caused soil moisture to rapidly decrease. Low temperatures dropped to freezing in most areas. Producers continued to harvest cotton crops. Yields have been good. Field preparation and planting of small grains continued. Fields that have emerged need rain for increased growth. Final hay cutting was harvested. Livestock remained in fair to good condition. Supplemental feeding continued. Stock tanks were very low to dry, and hay was in short supply. Pecan harvest is under way. The pecan crop was very

CENTRAL: Small grains needed rain. Many fields began to show moisture-stress. Nights have been cool with some areas having had a light frost. Warm-

season grasses continued to give short grazing but were pf high quality. Concerns increased over limited stock water supplies.

SOUTHEAST: No rain fell this week. The last hay fields were cut and baled. A few last sites had armyworms. Producers were treated to a beautiful week with no rain, just cool dry weather. Cattle feeding was the No. 1 agricultural activity in Lee County. The peanut crop is still in the ground as producers hope for a little more nut filling for poundage. Deer hunters are busy looking for that trophy buck. Ryegrass and other winter pasture continued to be planted. Fertilizer was applied over early planted winter forages. The ratoon rice crop has been harvested. Livestock are doing well.

SOUTHWEST: Most of the good growth of cool-season region has been completely dry since Oct. 25. Year-to-date cumulative rainfall is now less than 29 percent of the long-term average. Cool weather this week will help Conditions are getting dry again, winter vegetable crops and conand winds have dried soils out. serve water. Forage availability is very limited. Some stock tanks and none is forecast for next are almost dry. The peanut harweek. Some winter pasture con- vest continues but yields are tinues to be planted. Beef cattle down. Fall sorghum harvest is are in good to fair condition. complete. The cabbage harvest is Winter pastures making fair gaining momentum. Spinach, green beans and cucumbers for pickling are making progress under heavy irrigation. Hunting mained very low. Fall calving and hunter activities are the dominant rural activity, especially during weekends.

COASTAL BEND: Cooler, drier weather moved in. Soil eas in need of rain for winter forage. Fieldwork progressed. FAR WEST: Soil moisture Ranges and pastures were in fair condition

SOUTH: Dry weather in some areas of the region is causing difficulty for growers of dryland oats, wheat and ryegrass. Cooler weather significantly reduced warm-season native range and pasture forage production. Most fall vegetable crops have progressed well. Spinach production was doing well under irrigation. Fieldwork was active, with the harvesting of cabbage, citrus and sugarcane. Supplemental protein for livestock has been

Perennial Wheat research looks at options for producers By: Kay Ledbetter

BUSHLAND-Perennial wheat? The possibility is being looked at by a Texas Agricultural Experiment Station researcher. Annual wheat, which is traditionally grown in the Great Plains, is planted in the fall and dies after harvest in mid-summer. But Dr. Charlie Rush, Experiment Station plant pathologist, is testing some perennial lines of wheat bred in Washington state.

These perennial lines regrow after harvest and may survive for up to five years, Rush said. And eastern Washington is climatically similar to the Texas Panhandle, except it has harsher win-

"This wheat, if it works here, will start growing back as soon it rains or is irrigated after harvest," he said. "Right now, we don't know if it will work in our area or not. But there definitely could be some applications for it

The perennial wheat could be used as a ground cover for highly erodible lands, wildlife habitat and an alternative crop for Conservation Reserve Program lands, Rush said. However, primarily he is interested in evaluating use of perennial wheats in dual purpose grain-grazing cropping systems that are prevalent in the southwestern Great Plains.

Over the years, different breeders have crossed bread wheat with wild wheat grass in order to acquire a variety of de-

sirable traits, such as drought tolerance and resistance to diseases and insects, Rush said. In making these crosses, some of the resulting lines inherited the perennial trait.

Perennial wheat programs are already underway in Kansas and Washington. But it was work on disease resistance by Dr. Tim Murray, professor and chair of the plant pathology department, and Dr. Stephen Jones, wheat breeder, both at Washington State University, that first gained Rush's interest.

"For perennial wheats to have a place in our dual-purpose cropping systems, they must have good resistance to disease and insects," Rush said.

For this reason, his primary concern is determining how the 20 experimental lines will hold up against wheat streak mosaic and greenbugs, something both Jones and Murray also are researching.

In addition to screening for disease and insect resistance, Rush is also evaluating the perennial wheat lines for forage quality and yield, water use efficiency and drought tolerance.

"If they have drought tolerance and natural resistance to diseases and insects, it opens up real possibilities," he said. "Producers could save the cost of replanting at the very least. But it could also allow cattle to graze later in the spring and earlier in the fall, and still allow farmers to harvest for

Also, Rush said, producers that some of the lines will be diswould be able to avoid the fal- ease-tolerant, because some of low period that sets fields up for erosion. If the perennial wheat is rained on or irrigated in July, it is possible that cattle might be able to start grazing as early as August.

"Since perennial wheats typically yield only 70 percent of the best bread wheat cultivars, I don't see this as competition for the saic virus and tested for resisgrain crop, but primarily as another option on forage," he said.

Lower yields are the primary reason researchers have not been very interested in perennial wheats, Rush said. But with increasing energy costs and environmental concerns, perennial wheats are worth a new look, especially for the dual-purpose sys-

three replications of 20 lines of rennial wheat seed available," perennial wheat in September, Rush said. plus seven non-perennial varieties already in commercial production in the High Plains for comparison. Additionally, he bordered the plots on one side with a variety highly susceptible to wheat streak mosaic virus and on the other side with a highly resistant variety.

"One of the things that could quickly kill this project is if all the perennials are highly susceptible to wheat streak mosaic," he said. "We don't want to have that bridge for the virus and mites to over-summer and threaten the fall wheat crop.

"However, we are confident Dr. Murray's preliminary findings on resistance to wheat streak in Washington state," Rush said.

Additional testing for insect and disease resistance will be conducted in the greenhouse with the perennial lines being inoculated with wheat streak motance to greenbug and possibly bird cherry oat aphids, which also vector barley yellow dwarf virus, he said.

All the insect screening will be conducted by Dr. Jerry Michels, Experiment Station entomologist at Bushland.

Because this whole research is so brand new, we're limited in the number of treatments we can In September, Rush planted do until there's more of this pe-

> Disease screening and forage quality sampling using remote imaging techniques to measure the biomass, instead of clipping it, has already started and "we're getting good data," Rush said.

> In the first sampling, some of the perennial wheat lines yielded roughly the same amount of forage as the bread wheats and also exhibited good resistance to wheat streak, he said.

"I can hardly wait until our next field day to show our regional wheat producers these new wheat lines," Rush said.

Cornbread Cobbler

CHRISTMAS BRUNCH CANCER BENEFIT will be held Saturday, December 2, from 9:30 a.m. to 11:00 a.m., in the home of Marty and Sherese Covington, 907 W. Missouri, Floydada. Tickets can be purchased at FNB, Thayer & Washington, or at the door for \$10.00. Come and join us for food and fellowship and help promote a worthy cause. Shown are: Sherese Covington, Brianne Glasscock and Amanda Hinsley, representing Relay for Life.

Reflections of Love accepting items to give to Senior Citizens

Reflections of Love is gathering items and filled baskets for some of Floydada's Senior Citizens. "In this day of rising fuel cost, many of our senior citizens find they are having to do without in order to stretch their limited incomes," states Sally Bradley, President of Reflections of love. The gift baskets that Reflections of Love delivers, annually, is our community's way of saying "Thank You" and expressing our love and concern to

many of our senior citizens.

Reflections of Love needs your help in accomplishing this task. "This year we find our organization short on funds," says Fred Thayer, treasurer. We need the community to help out in any way that they can in order for us to fill the 65-70 baskets.

Floydada Junior High has taken 17 of the baskets to fill. These students are showing their care and concern by helping in this project. Floydada High School National Honor Society is filling five of these baskets also. The young people of Floydada are leading by example during this time of Thanksgiving and sharing.

You can help by bringing items to fill the basket at your place of business or your child's school. You can also help by making donations to: Reflections of Love c/o Fred Thayer, P.O. Box 9, or contact Sally Bradley 983-6390.

WORLD TRAVELING BIKER, MICHAEL KILPATRICK, PASSING THROUGH DOUGHERTY

War veteran bikes across America

By Darwin Robinson

Crossing the country by bicycle is not how most people dream of seeing America. But Vietnam veteran Michael Kilpatrick, age 54, of Russellville, Alabama has been pedaling across America by 'extreme distance bicycling' since July, 2000.

According to Kilpatrick, he holds the unofficial world record for the longest single bike ride. He says he has traveled 47,168 miles by bike since 2000.

His bike travels has taken him from coast to coast 7 times, from border to border 6 times and he has crisscrossed America twice, according to Kilpatrick. "I have been in every state, including Alaska, Quebec and New Brunswick, Canada and Nova Scotia. I hope to get a passport and go to Europe and ride my

bike, and hopefully back to Vietnam and ride there.'

Kilpatrick served time in Vietnam in the early 70's and he was discharged from the armed services in 1983. His wife of 13 years died in 1998.

His grieving was more than he could bear, according to Kilpatrick. He quit his job at a nearby factory of "sawing limestone slabs for building materials and tombstones" and headed out across country on his bicycle.

He has a one-wheel trailer, which he pulls behind his bike. It is full of supplies, a tent with poles, a small mattress, a spare bicycle tire and trailer tire, his Bible and a new book called 'A Purpose Driven Life.'

"I read my Bible every day and trust Him to take care of me. I've been trusting Jesus ever radio stations and 6 television since Vietnam. People along the stations on his journeys.

way have been real good to me. I keep a daily journal and I hope to write a book someday of my

travels," said Kilpatrick. Two years ago, Kilpatrick fell and shattered his hip. He spent 9 months and 8 days in the veterans hospital in Los Angeles, California, while they replaced his

Spirit of Sharing (S.O.S.) of Floydada donated some canned goods and a box of crackers to

help Kilpatrick on his journey toward California.

According to Kilpatrick, he is financed by his veteran's check back home in Russellville, Alabama and he has been interviewed by 103 newspapers, 74
