

# THE FLOYD COUNTY HESPERIAN

ME 36 FLOYDADA, FLOYD COUNTY, TEXAS, THURSDAY, MAY 23, 1929. NUMBER 13

## Contracts to Collect Delinquent Personal And Poll Tax of County

F. P. Henry Given Job Last Week By Commissioners.

Judge F. P. Henry was given the contract last week by the Floyd County Commissioners' Court of collecting delinquent personal and poll taxes from Floyd County delinquents, on tax rolls of past years for which the County Tax Collectors have been given credit on their rolls.

**Only Personal and Poll**  
No real estate tax collections are included in the rolls turned over to the special collector for the court, and the status of this collector is not to be confused with the work of the office of the County and State Tax Collector, which is under the direction and supervision of Sheriff and Tax Collector P. G. Stegall.

Preparations to begin the collections of these delinquents are now being made, and Judge Henry will be actively on the job at an early date.

The job of special collector of personal and poll taxes is an innovation in this county, having never been tried in recent years at least, and probably never before in the history of the county. The status of this collector, however, is not questionable, so far as the legality of his demand for taxes is concerned. He will be a bonded representative of the Commissioners' Court in the collection of the personal and poll taxes which have been allowed to become delinquent on the part of the taxpayers of the county, who have allowed the delinquencies to accrue by failure of payment. No personal property is exempt from the demand of this collector. Anything that's loose can be levied upon or taken for the tax.

An idea of the tremendous amount of money that is getting away from the county and state through failure of personal property taxpayers to "come up to the lick log" like their neighbors have to do who own real property, is indicated by a reference to the roll of personal and poll taxes for the years of 1927 and 1928. These two years, Judge Henry said, show over \$8,000 delinquent property owners with trucks and cars, household effects, and other property not in the form of real estate, having passed up the tax collector's office, in all parts of the county.

## ATTEND MEETING OF GRAIN MEN MONDAY IN AMARILLO

W. H. Edwards and Calvin Steen, of the Edwards Grain & Elevator Company, spent Monday in Amarillo, where they attended the gathering of the members of the Panhandle Grain Dealers Association.

Morning and afternoon sessions, with a final meeting Monday night, made up the day's convention business. Consensus of opinion of the better-informed grain men at the convention, was that some sort of Farm Relief Bill would be passed by the Congress in its present session, Mr. Edwards said.

## FLOYDADA ROTARY MEMBERS TO ATTEND INTERNATIONAL

D. W. Fyffe, president of Floydada Rotary Club, will attend the annual Rotary International at Dallas beginning Monday of next week, according to his plans. He was selected as the representative of the local club recently.

Other members of the club who will probably attend the meeting are G. C. Tubbs and J. M. Willson.

Announcements from Rotary headquarters indicate that clubs in the world will be represented at the gathering. The large Automobile Building at the Texas State Fair, seating 10,000 people, will be the scene of the general gatherings and group meetings will be held in a hundred other meeting places on the Fair Grounds.

These facts were brought out at the meeting of the club here Wednesday. P. B. Randolph, Plainview attorney, and Ed Bishop of this city, were guests at the luncheon.

## Explosion Wrecks East Side Bakery, Lockney

The East Side Bakery at Lockney was wrecked yesterday morning about daylight when an explosion drove bricks of the bakery oven sixty feet through the building out onto the sidewalk and streets and wrecked the plate glass front.

The explosion occurred as the operator, Lawrence Hill, son of Deputy Sheriff T. B. Hill, started to light the oven for the day's work. Hill was thrown against the wall of the building and Jim Hill, also an employe in the bakery was knocked down, but neither seriously injured, being out of the range of the flying brick and debris.

No fire followed the explosion. No definite figure had been set on the probable damage yesterday afternoon, although it is certain to be above \$1,000.

## Three Bond Elections Ordered By Co. Judge

In response to written petitions from taxpayers, County Judge Wm. McGehee ordered two school bond elections May 16, the first for Muncy Common School district No. 3 in the amount of \$4200, the bonds being serials, 5 per cent 20 year.

On the same date an election was ordered for Sunset Consolidated Common school district No. 8 on the question of authorizing a \$16,000 bond issue to be used in constructing and equipping a free public school building at South Plains. Plans are to wreck the present building at Sunset and with the salvage and bond money to build a modern school plant at South Plains. Both elections will be held June 8.

May 20 a petition was presented and an election ordered for a bond issue in the amount of \$10,000 for Goodnight common school district No. 29. Trustees of that district plan to build a modern brick building for school purposes at Edging siding, a short distance west of the present school site. Election will be held June 11.

Judge McGehee is handling the proceedings for each of the school districts and states that he expects to present bond transcripts for all three districts at the same time to the Attorney General, more than he has ever presented at one time. Judging from the number of signatures on the petitions there will probably be very little opposition to any of the propositions, he said.

## A. Baker Hotel Fine Addition At Lockney

Formal opening of the Coffee Shop and other ground floor shops of the A. Baker Hotel, corner Main and Locust, at Lockney, was held the latter part of last week, and at the same time the public was given the opportunity to view the entire building by Mr. and Mrs. Artie Baker. Mrs. Baker will operate the hotel.

It is a magnificent tribute to the efforts of Lockney citizens, led by Artie Baker, to provide an excellent home in the down-town business section for the travelling public. Hundreds of people of Lockney and neighboring towns and communities visited the hotel and paid their compliments to the owner during the opening ceremonies.

## MYRTLE CLENDENNIN GETS CERTIFICATE AT SUL ROSS

Alpine, Texas, May 16.—Miss Myrtle Clendennin of Floydada will receive a permanent elementary certificate at the annual commencement exercises of the Sul Ross State Teachers College which will be held in the college auditorium on the night of May 31 when Dr. Angie Smith of El Paso will give the principal address. Besides having done fine work during the school year, Miss Clendennin has been very active in campus affairs. She is a junior this year and expects to start teaching next fall.

## BAND TO RESUME CONCERTS FOR SUNDAY AFTERNOONS

Floydada Municipal Band will resume their regular Sunday afternoon concerts Sunday at 3 o'clock. A. L. Lundgren, director, announced this week. Concerts will be held at the band stand and everybody is invited.

Rehearsals are held each Monday and Thursday nights and band drills are held on Tuesday nights. The band is now working on contest numbers for three, four and five year classes, getting ready for the Chamber of Commerce Convention, and are doing good work, Mr. Lundgren said.

## BAKER PLAY POSTPONED

"Uncle Fred," a play which was announced to be given by Baker High School students last Friday night was postponed because of the rain and will be given Friday night, May 24. A large crowd is expected.

## Miss Laura Hamner To Address Old Timers

Present Indications Are That Large Number Will Spend Day Here May 28.

Miss Laura V. Hamner, superintendent of the Potter County Schools, has accepted an invitation to speak at the "Old Pioneers" meeting to be held at the Court house next Tuesday. Miss Hamner, who for several years has been making a study of early life on the plains of Texas, has selected for her subject "Five Decades." In addition to this speaker efforts are being made to secure Pink L. Parrish, State Senator from Lubbock, to address the gathering of old timers. Mr. Parrish spent the early part of his life in Crosby County and is perhaps one of the best known men in this section.

Indications are that a large number of those who have been invited by the Chamber of Commerce to come to Floydada next Tuesday will bring their lunches and spend the entire day visiting with old time friends. Many more will come for the afternoon program and from this meeting it is likely that an organization will be perfected which will have such a meeting as an annual affair as its purpose.

Those who have resided twenty-five or more years in Floyd County are invited to attend the meeting and special courtesies on the part of the business men will be shown the pioneers. May 28 was selected for the gathering because of the fact that on that day in 1890 Floyd County was organized.

Chamber of Commerce officials are asking that the merchants put out their flags on next Tuesday and extend every courtesy to the visitors.

Jno. W. McDonald, himself one of the old-timers, with his cornhuskers stringed orchestra, will help entertain during the day. "Unless I fall down on an arrangement I have made, we're going to have one of the fiddliest fiddlers here that I have heard in a long time," he said Tuesday. "All he knows is the old-time stuff that we had here in the early days, but he knows that well."

The gathering of the pioneers here will be the first specially arranged for them in Floydada in a number of years.

## REV. O'BRIEN SPEAKS AT WAYLAND COMMENCEMENT

Rev. P. D. O'Brien delivered the principal address at the Commencement exercises of the Wayland Baptist College at Plainview Wednesday morning at 11 o'clock. Rev. O'Brien was accompanied to Plainview by Mr. and Mrs. P. G. Stegall, Mr. and Mrs. E. Ray Smith and Rev. and Mrs. R. E. Bost. They returned home Wednesday afternoon.

At the commencement exercises, J. Lindsey Nunn, of Amarillo, prominent newspaper man, announced that he would donate \$20,000 for the construction of a modern gymnasium for Wayland College this summer. Plans for the building were submitted and accepted by the directors of the college, and construction of the gymnasium will start immediately so that it will be accessible by the Fall term.

Rev. O'Brien also delivered the main address at the annual alumni and ex-students banquet of the college last Saturday night. He was accompanied Saturday by Dr. I. W. Hicks.

## 'Better Homes Tour' To Be Made By Clubs

Under supervision of Miss Marie Strange, home demonstration agent, representatives from the Floyd County Home Demonstration clubs will make a "Better Homes Tour" Wednesday, afternoon, May 29, starting from the court house at 1 o'clock.

Visits will be made to the homes of two club members who have been outstanding in their accomplishments, Mrs. G. C. Collins of Sand Hill club and Mrs. O. W. Fry of the Pleasant Valley club.

Mrs. Collins who is a winner of the state canning contest, has a model cellar in which her canned products are placed. The women will make their first visit there.

The home, equipment and general surroundings of Mrs. Fry's master farm home will be the other place visited.

Similar tours are made over the county each year so that each club member can get a personal view of outstanding achievements and an inspiration for making better homes.

## MRS. J. H. POORE INJURED IN ACCIDENT WEDNESDAY

Mrs. J. H. Poore, of the Lakeview community, suffered a severe cut on the right leg and several minor bruises last Wednesday noon when she was injured in an automobile accident in this city. Her condition is not thought to be serious, although the bruises are very painful.

Mrs. Poore was injured when a car parked in front of the Baker-Campbell Company store backed into her. She was starting to enter the Poore car, which was parked behind the other automobile, when the car backed from the curb. She was rushed to the Smith and Smith Sanitarium where she is under treatment.

## Make First Sales To Creamery Wed.

The first two customers of the Floydada Creamery when it opened for business Wednesday morning were W. T. Stiles, who sold the first cream to the concern, and D. S. Battey who sold the first lot of eggs.

## Royal Theatre Closed; Olympic Is Continued

Indicating the expected early completion of their new \$50,000 Theatre on West California Street, the Royal Theatre at the southwest corner of the square, was permanently closed down Saturday night, and the announcement made by J. G. Deakins, manager of Floydada Theatres, that the Olympic Theatre, West Side cinema emporium, would be run every day until such time as the new theatre building is finished, or until further announcement is made after that date.

The Olympic, during the past winter and spring season, has been operated only on Fridays and Saturdays. It will be continued hereafter as one of the show enterprises of the firm of Nelson & Simpson.

Workers will begin soon putting the Royal building back into its original condition as a store building. It is understood that it will be occupied by a retail business as soon as it is re-conditioned, but the owner, W. L. Boerner, had no announcement to make relative to the matter this week.

## Heavy Rainfall Adds 2.82 Inches For May

Rainfall last Friday, totalling 2.82 inches at Floydada, and in portions of the county exceeding this mark by a very considerable amount, has brought the total precipitation for May well above five inches practically all over the county and put much water in the lakes.

Further showers during the week and cloudy weather have kept the ground from drying up, and as a result all farming operations so far as the row crop is concerned have been completely halted, with all crops already in the ground to be re-planted on account of washed beds that covered up the small plants of early planting.

Rain began falling in torrents Friday morning and by ten-thirty twelve-thirty and one-thirty another eighty-two hundredths of an inch fell, bringing the total for the day up to 2.82 at Floydada. Reports from over the county range from 1.50 in the vicinity of Dougherty to three or four inches in the southwest part of the county.

The rain was probably the heaviest that has fallen generally over the panhandle area in a number of years, the reports indicating that while it was raining at Floydada rain was also falling fast at Clarendon a hundred miles northeast, at Haskell more than 150 miles east and at intermediate points, also west and north at points including Plainview and Lubbock.

At Blanco Canyon the rain was heavy enough that it washed probably 1,000 yards of dirt out of the big cut and fill where the new road is planned up the north side of the hill. In Motley County, coming after the tremendous rains the previous week in that section the water carried out a tank dam and disrupted service over the Q. A. & P. for nearly twenty-four hours.

This mid-week planting had started on few farms in the county, according to reports, work being delayed until ground is sufficiently dry for efficient operations.

Farmers generally are rigging up machinery and tools, assembling planting seed and otherwise busy-ing themselves with preparations for the planting season, now nearly two weeks late. Planting will start all over the county by the first of next week, if no further moisture falls.

## FORMER CALIFORNIA CAFE MAN OPENING RESTAURANT

Ted Owen, former resident of Texas but for the past six years at Exeter, California, where he engaged in the cafe business, is opening a restaurant on south side. He has a term lease on one-half of the Montgomery Building adjoining the Watson Variety Store.

Mr. and Mrs. Owen have moved to Floydada to make their home. The new place of business will open for business Saturday, Mr. Owen said this week. The new cafe man began work of installing counters and fixtures some two weeks ago.

## SUCCEEDS E. L. ANGUS AT ANGUS PRODUCE COMPANY

B. E. (Barney) Wilson, accompanied by his wife, of Slaton, are in Floydada to make their home and Mr. Wilson will have charge of the Angus Produce on east side of the square, heretofore operated by E. L. Angus, who this week began work as manager of the Floydada Creamery.

## District Court Starts 5-Week Grind Monday

First Petit Jury Summoned to Appear Monday.—Non-Jury Cases This Week.

District Court for Floyd County, spring term, the first in the county since the creation of the 110th Judicial District of Texas, opened its five-week grind Monday morning with District Judge Kenneth Bain presiding, and the other two new officials of the court, District Attorney A. J. Polley, and Court Reporter H. A. Sams, also in attendance.

When the new judge sounded the docket, non-jury cases were set for this week, criminal matters were set over into the fourth and fifth weeks, and the third week of the term was set for the hearing of cases in which Judge Bain is disqualified. District Judge Charles Clements, of the Sixty-Fourth District, will preside the third week while these cases are being disposed of.

The grand jury empaneled has A. C. Goen as foreman, with Ed Kelley, L. E. Williams, M. J. Smalley, Edd Thornton, Will Sims, W. C. Wright, C. R. May, W. F. Weatherbee, A. S. Cummings, G. M. Tate and A. S. Greene as the other eleven members.

Cases disposed of this week include only civil matters. They are: G. R. May versus R. E. L. Montague, suit on note. Judgement was entered for plaintiff as prayed for; Ruth Jones versus Fred Jones, decree of divorce granted, with restoration of maiden name;

Guaranty State Bank of Plainview versus J. W. Mullins, suit to clear title to half section of land in north Floyd County. Judgement for plaintiff granted; T. P. Collins versus H. N. Porterfield, suit to foreclose lien on forty acres land. Judgement for plaintiff; J. A. Nall and others versus C. W. Smith and others, suit to clear title to Lockney Christian College property at Lockney. Judgement granted plaintiff.

The grand jury had returned no bills of indictment yesterday afternoon at 4 o'clock.

## Petit Jury List

Petit jurors who have been summoned for the week beginning Monday, May 27, are:

W. H. Smith, J. R. Terry, L. C. McDonald, Hamilton May, N. R. Austin, L. C. Wheeler, Efford Parrish, W. C. Cates, Ray Griffith, E. R. Harris, Mit Bullard, Roscoe Snider, J. C. Bolding, R. F. Hall, D. C. Day, D. H. Widner, E. G. Foster, W. S. Poole, Raymond Blunt, A. F. Dickert, M. L. Williams, W. L. Street, T. S. McGehee, Henry Willis, J. C. Raley, O. Z. Smyth, J. H. Newberry, L. D. McReynolds, Bob Reeves, A. T. Pratt, H. J. Nelson, C. Alexander, A. P. Shuggert, W. E. Taack, John A. Lloyd, J. M. Harrison.

## CAMP FIRE WORKERS TO MEET AT FORT WORTH MAY 29-30

First Convention of the Southwestern District of Camp Fire executives will be held in Fort Worth May 29 to 30 according to information given out by Mrs. George Smith of this city.

Camp Fire workers and friends of Camp Fire are invited to attend this convention; this includes guardians, assistant guardians. Executives, members of Councils and boards of sponsors, and all who are interested in programs for girls. There will be a banquet the evening of May 29. Lester F. Scott, National Executive, will be the main speaker.

In addition to Mr. Scott, there will be in attendance at this meeting Miss Edith M. Kemphorne, National Field Secretary, Miss Ruby Lattimore, associate Field Secretary and Miss Helen Biggart of the Art Department of National Headquarters, it is announced.

Mrs. George Smith, guardian of the Nctopew group, of Floydada, is planning to attend both days of the meeting.

## TIME EXTENDED ONE WEEK FOR DOUGHERTY CONTRACT

Because of delays in getting out plans, and contractors could not get bids in, contract for a school building at Dougherty was not let Tuesday, the date announced. The time was extended to Tuesday, May 28, at 2 o'clock at Edwards Elevator, Dougherty.

## C. M. WILSON LOCATES AT HUNTINGTON PARK, CAL.

C. M. Wilson, former resident of Floydada and Floyd County for many years, has located at Huntington Park, California, after being in that state since shortly after Christmas.

He has bought a studio in that city, which he has re-named "The Wilson Studio." It is located at 6339 1/2 Pacific Boulevard.

## LOCAL LUMBER YARD MANAGER

D. H. Alexander, formerly with the Panhandle Lumber Co. of Miami was employed last week as manager of the South Plains Lumber Co. of Floydada. He will be manager of the local yard. W. I. Cannanay is general manager of the company. Mr. Alexander's wife and son will move to Floydada the first of next week.

## G. W. Brewster, Pioneer Plainsman Succumbs To Heart Trouble Tuesday

## Floydada Has Three In Normal Class Of 1929

Canyon, Texas, May 21.—Floydada has three representatives in the class of 1929 at the West Texas State Teachers College. They are Misses Vera Fry, Emma Lou McKinney and Lela Frank Swain.

There are 110 members of the class receiving bachelor's degrees this year; they come from 46 different communities of Texas and from the states of New Mexico, Kansas and Oklahoma.

Commencement week will begin for these young people on May 26 when Bishop Irving Johnson of Denver, Colorado will preach the baccalaureate sermon, and will end with the Commencement address by Dr. J. D. Sandifer and conferring of degrees by Dr. J. A. Hill, president of the college.

## Graduation Exercises Mark Close Of School

1928-29 session of the Floydada Public Schools came to a close last Friday night, May 17, when the High School graduation exercises were held, Gus L. Ford, department head of Texas Technological college, making the graduation address to the members of the class and to an audience that packed the high school auditorium.

The processional, "Triumphal March" from Aida was played by Lois Sitton as the forty-one graduates marched through the auditorium to the stage. Following the invocation which was said by Rev. A. A. Collins, Margie Norton gave the salutatory address. She chose for her subject "The Need for the Choice of a Vocation." A song "Greeting to Spring" by Strauss sung by the girls sextette and the boys quartette was well received.

Bernice Gresham was honor graduate and gave the valedictory address, the subject being, "power." W. E. Patty, superintendent, presented the diplomas and W. H. Scoggins, principal of high school, awarded scholarships.

Rev. G. T. Palmer said the benediction. Following the exercises the graduates were honored with a reception by the mothers of the class in the Home Economics room of the High School.

## Bachelor Of Science Degree For Hopper

Alpine, Texas, May 15.—D. Madison Hopper, senior student in Sul Ross State Teachers College from Floydada, will receive his Bachelor of Science degree at the annual commencement exercises of the college which are held in the auditorium on the night of May 31. Hopper will also receive a permanent high school certificate, and he has majored in history during his stay here.

He came to Sul Ross last summer after he had finished most of his work in the West Texas State Teachers College, the University of Colorado, and the University of Texas. He has been active in student affairs and he and his wife have aided the faculty supervisors with their work at the girls dormitory, Berkely Hall.

## SEVENTH GRADE GRADUATES HAVE EXERCISES MAY 16

Rev. G. B. Schmid gave the commencement address when seventh grade graduates from Andrews Ward school received their diplomas Thursday evening, May 16 at the school auditorium.

Rev. P. D. O'Brien gave the invocation and the program was opened with a song, "Leaving the nest" by the class.

Addresses were given by Mary Ann Kimble, valedictorian, and Louise Conner, salutatorian.

The class was welcomed to high school in a talk by Supt. W. E. Patty. A. D. Cummings, principal of the school presented diplomas to 46 graduates.

## EDWARDS IS CO-CAPTAIN

John Edwards of Floydada who is attending school at Baylor University, was chosen recently as a co-captain of the Baylor freshman club, according to an article in the school paper.

The paper stated further that: "Edwards is the leading weight man and is also a member of the Frosh relay club. He is laying off of his job with the fire department in the afternoons in order that he will be in trim to throw the discus and the shot all around the athletic field."

## LIONS-ROTARY BASEBALL GAME AT SIX O'CLOCK TODAY

Wet grounds caused the postponement of the Lions-Rotary inter-club baseball game from Tuesday afternoon at 5 o'clock until this afternoon.

The hour set for the diamond classic is six o'clock, and the game is Floydada Baseball Park.

## Old Timers From Several Counties Attend Funeral At Lockney

Geo. W. Brewster, resident of the plains since 1890, and of Floyd County since 1896, succumbed to an attack of heart failure at his home in Lockney Tuesday night about ten o'clock, and old-timers and friends from over half a dozen counties attended the funeral held late Wednesday afternoon from the Church of Christ.

Home From Mayo Brothers Elder Early Arceaneux, minister of the Church of Christ, conducted the funeral services at the church, and the Lockney Masonic Lodge had charge of the burial rites at the graveside in Lockney Cemetery.

Mr. Brewster had just returned home from a trip to Mayo Brothers Clinic at Rochester, where he had undergone an examination. He was found to be suffering from leakage of the heart. He was in reasonable health during the day Tuesday, however, and his last illness developed suddenly Tuesday evening.

Friends in Floydada who attended the funeral, said the gathering for the funeral had among it residents of half a dozen or more counties, including many former residents of Floyd County from Hale, Lamb, Lubbock and other counties. Deceased was 72 years of age on February 22 last. He moved to Hale County from Central west Texas in 1890, and from that county to Floyd in 1896, taking up his residence in Lockney. For years he was a leading real estate man and conveyancer of the county and for more than twenty years has been in the hot business at Lockney.

The surviving children, all of whom were present for the funeral are: Will and Clarence, and Miss Ethel Brewster, of Lockney; Mrs. Ben Dodson of Oltom; Mrs. V. N. Dillard, of Lubbock; and Grace Brewster of Dimmitt. His wife at survives him.

Among the Floydada friends who attended the funeral were Mr. and Mrs. E. C. Henry, Judge and Mrs. Wm. McGehee, Mr. and Mrs. R. E. Fry, F. P. Henry, Tom W. Deen, Mr. and Mrs. Fred Bell, Mr. and Mrs. Sullivan. Several others from communities over this county also attended. Among the out-of-county friends of the family present were S. A. Henry and family of Lubbock, and Logan Kennedy and wife of Oltom.

## COMMISSIONERS TO MEET AS BOARD OF EQUALIZATION

Members of the Commission Court of Floyd County will meet Monday of next week as an Equalization Board, when it is expected will be set in motion by court to make sweeping changes in valuations of property in county other than farms. Not definite in this connection has been arranged, but such a change is forecast by the employment recently of a valuation expert who will serve the court as counsel in the valuation of corporate and industrial property.

Gin, elevator, railroad, gas, telephone, telegraph, oil mill sand and gravel properties, as well as city real estate in the county are included in the list of valuations which the court will give particular attention and study.

## Hundred Boosters On Wichita Falls Train

The Singing Ex-Mayor of Wichita Falls, R. E. Shepherd, extended to Floydada folks an invitation, in song, to visit the "City that Faith Built" last Wednesday afternoon when the Wichita Falls special excursion train arrived in this city. With a delegation of approximately one hundred business and professional men of Wichita Falls aboard the train arrived at 4:30 o'clock and remained here for thirty minutes.

Rev. G. T. Palmer extended a welcome to the Wichita Boosters at W. C. Harris responded to the welcome address.

Accompanied by the Wichita Falls Municipal Band, Shepherd sang "I'm Glad that I'm Here," "We Meet Again," and "Good-bye" large delegation of local people, the train at the Santa Fe station and wished them good luck on departure from the Q. A. & P. station.

## Local Fire Department Names State Delegate

G. R. Strickland, City Fire Marshal, John Buchanan, fire chief, Burl Bedford, secretary of the department, and E. S. Price, one of the company's firemen, are delegates recently selected by the Fire Department to represent them at the state convention of the Firemen's Association to be held in Galveston, Texas, May 13 and 14.

## THE FLOYDADA CREAMERY

A logical development in the growth of the country and of the dairying industry in this section is the establishment of the Floydada Creamery. What it will mean to have a factory almost at the door of the Floyd County farms and even more distant farms, is only for the future to tell. Surely, this country has reached the point that a creamery may enjoy enough volume to make itself worth something to the operators and patrons alike. And when a thing comes along that helps the country it most certainly helps the town.

The new creamery is only one of four or five that are getting under way in the south plains area. Every one of them will help keep a little of the labor that manufacturers the raw product in the area to land that much to building up the country, besides reducing the distances to which cream must be sent to market and thereby raising the quality.

It is with considerable pride that we record this week the fact that Floydada Creamery is having its opening on Saturday. It epitomizes our hope and belief that dairying has come to this section as part and parcel of the farming program.

## JUNE FEED AND COTTON

The tremendous rain of last Thursday, practically all over Floyd County, means June cotton and forage crops this year. Probably ten per cent of the cotton crop of the county was in the ground and maybe the same amount of maize, alfalfa and hedges planted, when the rains began to fall ten days ago. A much of the county the "dry lanted" crops had plenty of moisture from the first rains to get them up good, although in some parts of the county the ground washed into the furrows too much to expect such good luck. Farmers who expected to have some cotton and feed in the ground in time for it to begin coming through the soil this week are going to be disappointed, and there'll be little, if any, that can be counted on before the first two or three days of June.

This fact doesn't mean anything particularly good or bad; any number of years the major portion of the row crops of the county are June crops. Sometimes the June planting is better, in yield, sometimes not so good, as the earlier planting, all depending on conditions during the growing season and the date of the first killing frost.

## EVERYBODY A WINNER

The growth of the cream and produce business in Floyd County, and in a more pronounced growth in other sections of the plains and hilllands have proved most invariable in dollars and cents to the people of the section. Money all the way around, something coming in to counter-balance the eternal outgo helps mightily to overcome the deficits that often arise from the crops that we intended to get surplus from, but somehow got disappointed.

We know little of industries and the art of distribution connected with cream, poultry, produce and similar things. However, it seems logical that the county which is the heaviest producer of poultry and eggs in a wide section, should also be the county where a wholesale distribution concern would locate. For that reason, it seems to us, that the butter-making establishment announced this week, should have a counterpart here in a wholesale produce house. That may be all bologna, but it seems good logic.

Everybody stands to win if the new creamery is found to fill an actual need and serve the people in a worthy way. The poultry producers could also be aided greatly by a wholesale poultry house and then everybody, indeed, would be winners.

## NEGROES ARE ARGUING

A debate between two negroes of different religious faiths has been in progress in dark-town of Floydada the past few days, and sometime soon should reach the stage where the best man will win.

The blacks are a little more eloquent than the whites and they help putting their thoughts into words at times. However, we think of it, oceans of Galilee, Anglo-Saxon, and Latin blood have flowed over religious differences. Human nature's funny.

## THE RAININEST COUNTRY

Well, the country is ruined. Too much rain. Going to have to move further west. Every time a man tries to make a crop it comes a rain and drowns everything out. Sure is bad.

## PASS THE TIME AWAY

If you don't have anything else to do—or better said, perhaps, while you're resting between jobs these busy days,—an interesting subject for argument would be the question of whether the top half of some of the wheat heads were damaged by dry weather or the cold weather. If you have been taking it for granted it was the dry weather, there is some good argument that it was not but instead was the frost of two or three weeks since.

On the other hand, if you have been thinking the frost did the damage, there is some good argument that it was not, but was the dry weather. When you wear out your other pet question, try this one for a change.

Something seems to tell O. B. that he is going to get the court house painted and some movement made on that Municipal auditorium right away. Here's how: We know some things on some men in this city who are capable of starting this thing moving, and, of course we wouldn't even hint of blackmail, but if some move of some kind were taken on these two matters, the "dope" we have secured, will be dropped. What do you say?

You know, it is sure funny what a little rain will do. After so long a dry spell, some people will nearly go crazy when it rains. Why, they will even go so far as to parade the alleys of the city during the down pour, clad only in—well, what the ladies call undies. No, not crazy, nor drunk, just jubilant.

But rain doesn't always loosen up the pocket book. Imagine three men going into an agreement that if either of the three failed to have his hair clipped off, he would pay the other two twenty-five dollars. They all three had their hair clipped.

O. B. is sure a law abiding citizen and if there is anything he hates to see, it is blackmail. But dog gone, that Court house needs painting and we sure do need a Municipal Auditorium.

O. B. was navigating down the street bare-headed last week during the rain and somebody hollered: "Hey, O. B., ain't you afraid you'll get water on the brain." Now is that nice?

Fairy tale: And then there was the case of the Saliva Slinger who never believed we had too much rain and was always sure that we would get enough.

O. B. said something about two weeks ago, and he was really surprised that he didn't have half of the town on his neck about it. It was in regard to Sunday afternoon moving pictures. We believe it will be a good clean amusement for the folks on Sunday afternoon to have OUR new Theatre open with Sunday afternoon pictures. "Silence gives consent," so we guess that the people here all agree with us. That's the hot stuff. Glad to know that we live in a good, progressive town, ain't you?

That guy on California. Street came back from his vacation last week and now he says the preacher is about to throw him out of church.

**Got Up In The Morning Feeling DIZZY**

"I BEGAN to suffer with headache and biliousness," says Mr. John C. Malone, of Buena Vista, Ohio. "I had a hurting through the middle part of my body which seemed to come from indigestion. I would get constipated, and then feel all out of sorts. I would get up in the morning feeling dizzy, and everything I ate would disagree with me. Someone asked me why I did not try Black-Draught. I found it to be just the medicine I needed. When I feel a spell coming on, I begin by taking a dose of Black-Draught, dry, at night. I continue to take it for several days, and in a short while I am feeling fine. It is all the medicine I need."

Costs only 1 cent a dose.

**THEDFORD'S Black-Draught**

For CONSTIPATION INDIGESTION, BILIOUSNESS

WOMEN who need a tonic should take Cardul. In over 50 years. EX-146

for telling the truth about the fish he caught.

Dog gone it, why can't people read what they see and see what they read? When a newspaper head reading "Floyd County 14 Years Ago" sets up above several paragraphs, that means that everything in those paragraphs came from a newspaper of fourteen years ago. We have lots of subscribers who enjoy that column, but darn it, if you don't read it like it is supposed to be read, we are going to have to stop it. We don't want to be shot by somebody for miss-printing things.

Have you noticed that half of the people who voted against paving the roads will drive two or three blocks out of the way in order to get to ride on a few blocks of our paving here in town. Still they say that paving the highway is not worth while. It's a poor rule that won't work both ways, you know. Verily, verily.

## FLOYD COUNTY 14 YEARS AGO

News items taken from files of the Floyd County Hesperian published in Floydada fourteen years ago.

### ISSUE OF MAY 27, 1915

Note: There are four paragraphs to this item. All were taken from files of the Hesperian fourteen years ago.

On account of a largely increased population in the district, the need at Lakeview for a new school building is becoming marked. Plans are being made to build a new brick school building.

John Reynolds, about 35, who has been held in the local jail for the past six weeks pending grand jury investigation of alleged theft from a box car, took the Jake Hammonds buggy team Tuesday which was hitched to the rack around the court house yard and left town. No trace has been found of him up to noon today.

Even relatives and close personal friends were taken by surprise Sunday afternoon by two young couples of Floydada when they motored to Crosbyton and were married there at 6:30. The contracting parties were Miss Janie Ryals and J. B. Shurbet and Miss Dora Howard and Frank G. Tye. Following the ceremony the couples returned to their homes.

Mrs. S. L. Rushing left this morning for Memphis as delegate from the local Woman's Missionary Society to the district meeting in convention there.

Read The Hesperian for the news of Floyd County.

## SOLVING MARKETING PROBLEM PRESSING QUESTION IN TEXAS

Solution of the marketing problem is one of the pressing questions in Texas. Texas produce is favorably known to the consumers in every large city in the North and East.

People who have used Texas grapefruit want no other kind. But it is difficult to find it in many cities and impossible in many others. New York is importing Italian and Egyptian onions while down here in Texas the onion acreage is being materially reduced or eliminated altogether simply because of lack of a market to consume the available supply.

In Denton and Collin counties the acreage to onions is being reduced this year by around 60 per cent from last year. But that the crop is being largely planted elsewhere is indicated by the fact that Rio Grande valley growers have shipped thirty-six carloads—144,000,000 plants of onion sets this spring with an estimated 40,000,000 more going out by express and parcel post.

Celery seed vinegar is good for use in salads and in many other ways. To make it bring 1 pint of vinegar to the boiling point, cool for 5 minutes, and add to ¼ cup of celery seed and ½ teaspoon salt. Let stand two weeks, strain, and bottle.

Bull calves in the dairy herd can be fed and handled much the same as the heifers, except that it is better to delay weaning until 8 or 10 months of age. If raised on skim milk, bull calves over 3 months old should have a little more grain than heifers. Good-sized bulls are always preferred, and this method of feeding lets them get their best size and development.

Don't let the hogs make their own wallow by rooting a mud hole in the lot or pasture. Such a place is a nuisance and is insanitary. Provide a wallow made of concrete, and located in a convenient, shady place in the lot. Clean it and refill with fresh water frequently. Crude oil, enough to form a thin layer on the water, if poured into the wallow about every 10 days, will help to control lice.

## The TOWN DOCTOR (The Doctor of Towns) SAYS

### SOME TOWNS, LIKE TRUCKS, GET STUCK IN THE MUD

There is something about the building of a highway that is, to me, as a magnet to steel. When driving through the country, a "Road Under Construction" sign is a near command to drive around the barrier, and learn if the notice is telling the truth.

There is something majestic and awe-inspiring about the laying of a ribbon of concrete across a plain, through the valleys, or over the hills. Perhaps it is not the actual construction as much as the value of what the completed work will be to the communities it will serve, wondering if those it will benefit will take full advantage of the opportunity.

The paving of a country road is an epoch in the life of the area through which it passes, for it marks the passing of the old into the new, and to me, a changing from the old order of things is always of interest.

Last fall, while making what has been spoken of as a "clinic journey," I obtained permission to drive a twelve-mile strip of newly-laid concrete through the Palos Hills country in Illinois. It was a beautiful roadway in a beautiful country, and I could but marvel at the thoroughness—the perfect contour of this "sidewalk for motor cars" to hillside, vale and woodland—it was perfect.

Some miles from the convergence of this roadway with the main arterial highway, a large force of workmen with a score of dump trucks were making a fill. Trucks loaded with loose earth came from both directions; systematically they swung to the edge, half circled to the center of the pavement, then backed; a whistle blew, the truck stopped, the dump body tipped as the end gate opened; another whistle, and the truck moved out and on up the road. For an hour I watched them as like giant ants they came and went, filling the hole that was bad for the highway.

Then something happened. A monstrous truck, very heavily loaded, backed up too far, went off the pavement and down the embankment, settling deep in the wet, loose, spongy loam. It was STUCK—no doubt about it!

A loud whistle blew—trucks outbound stopped, swung around, and returned to the fill; inbound trucks drew up in a line. Chains rattled as each hitched to the other—a workman slid down to the truck in the mire, attached a chain thereto, and a whistle blew thrice. At the first whistle, all trucks moved forward taking up the slack, at the second, gears meshed into low, at the third, every clutch of every truck was engaged, and without jump or jerk, all, as one, moved forward, steadily, surely, until the stuck truck was back on solid pavement. There was no fuss, disension, excitement or bluster—all of the trucks pulled, NONE was standing at the side of the road, idling, watching or shouting advice; all pulled in the SAME direction at the SAME time.

The moral is plain. If your town is "stuck"—if it isn't moving forward, gather 'round, everybody, hook on, get a sure "hitch," then PULL TOGETHER—in the same direction.

## "Good Luck" Our Wish For Floydada Creamery

The fortunes of the newest manufacturing enterprise in Floydada—the Floydada Creamery—are inseparably tied up in the fortunes of the dairy industry of this section. If the dairy business keeps on growing and expanding as we hope, then the creamery will grow and expand its operations as it serves a need of the community.

So, that in wishing "good luck" to these folks in their effort to make a new type of industry go in our city, we are also wishing "good luck" to a good many hundred farmers who are making dairying a part of their farm program.

This new factory puts at the door of many producers a market that should help greatly to stabilize market conditions and make the production of quality cream easier.

As an enterprise that is calculated to be a big influence in aiding the dairy industry, and also an influence in increasing the local pay roll the Floydada Creamery should have a hearty welcome and the cordial support of local business interests.

## Texas Jersey Cattle Club Lead All States in Union

Texas is the leading Jersey cattle State of the Union. Figures of the American Jersey Cattle Club show that Texas makes more transfers than her nearest competitor. Until 1927 Ohio held first place, but today Ohio ranks second and henceforth the Lone Star will head the procession in this important division of the dairy world.

Why? What is the reason, or the set of reasons, for Jersey popularity in Texas?

Well, in the first place, the Jersey cow has been bred here so long that she has become indigenous to the State. By careful breeding, Jersey qualities have been intensified under Texas climatic, range and other conditions. Regardless of

reference is to the Jersey cow. Ever since there has been any dairying in the State, the average Texan has never known any other breed. Here the Jersey has been the family cow, the pet of the family, the source and happiness of thousands of babies.

Nearly every agricultural organization which pushes dairy development in Texas concentrates its effort on the time-proved Jersey. Almost always the farmers and his wife, and their boys and girls, favor the gentle, velvet-coated dairy animal because it has long held a high place in their esteem and affection. So the Jersey is taken as the basis of practically all club dairying activities.

It is not infrequently that the Jersey is the only breed seen at community county and district fairs. And at the State Fair of Texas the Jersey outnumbers all other breeds combined—and has for several years. In 1928 there were more than 300 entries of Jersey cattle. And in 1928 Texas Jerseys won State herd honors and took the award for national champion Jersey female at the National Dairy Show in Memphis. The largest dairy herds in the world are located in Texas, as well as some of the best.

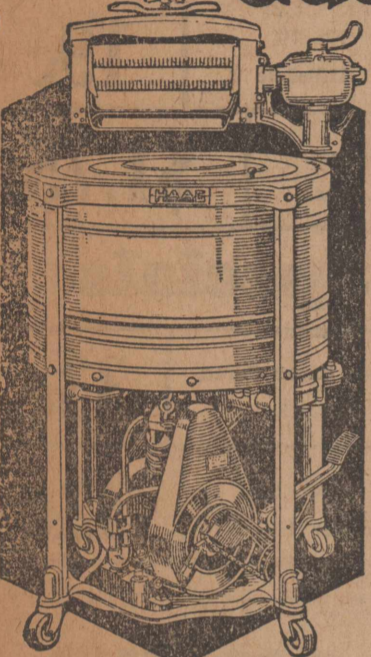

Still another explanation for the supremacy of the Jersey in Texas is the fact that the people promoting the breed are cognizant of the necessity of continuing to push it year by year, week by week, day by day. The American Jersey Club keeps D. T. Simons, one of its field men who is also secretary of the Texas Cattle Club, in this State practically all the time. He cooperates in boys' and girls' club activities, in the organization of bull circles, and in other ways looks after the best interests of the breed. He is one of the personal factors in educating dairy farmers, who are new at the game, in methods of feeding for efficiency and in handling milk for larger profits.

Now that creameries, milk plants and cheese factories are being built all over the State, and every indication points to a swift, continuous advancement in dairying, the future of the Jersey cow ought to be worth while indeed.

Cream, you know, is the basis of value in dairy-cow production. The average of all Jersey cows officially tested now stands at 5.36 per cent.

The firm ensconcement of the Jersey cow in Texas is largely responsible for the instantaneous success that has been met by the dairying movement of the last twelve to eighteen months. And upon the reliability, the proved value and the high butterfat yield of the Jersey rest most of the hopes of Texas dairying.

### It Has a 4 Cycle Gas Motor

**YOU don't need electric service to enjoy complete freedom from washday worries. The Haag Eighty Ownpower with the built-in, 4-cycle gasoline motor—powerful, simple and economical—is the happy answer to the problem.**

Don't confuse the Haag Eighty with other low-priced washers being offered for sale. It is not a "cheap" washer—it is durable, dependable and efficient, yet its price is very moderate. See it tomorrow.

## Panhandle Boys Feed Rutabagas To Cattle

Experimental Plots of Rutabagas Grow Rapidly in Plains Soil, Club Boys Find.

The agricultural boys are experimenting with the growing of rutabagas or Swedes in their experimental plots. In the dairy sections this Hardy Swede is considered the best variety for cow feed. It is the same variety as Imported Purple Top Yellow.

The feeding of these "bagas" to dairy cows is no experiment since the writer constantly fed them to Red Polled and Guernsey cows when making world's records for these two breeds. We may not have enough rainfall but it is not to be expected that a yield of 1100 bushels will be grown to the acre as was the case on the old Jean Du Luth farm at Duluth. If we can grow half as many the experiment will prove a great success. What we should do is to first get good pure-bred sires, raise high-grade dairy cattle and then grow feed for them so cows will be given a chance to produce. Then see that they do produce by proper care, management and good feeding.

High production records cannot be made without succulent feed in winter. This can best be furnished through use of the silo and the growing of root crops. Climatic conditions in the Panhandle are somewhat similar to those of southern Minnesota and Wisconsin although of course it is not nearly as cold here in the winter.

After spending several years in Texas, five years at College Station and two years in Carson county adopt northern methods of dairy farming rather than those of Southern Texas. We should have reasonably good barns to house our dairy cattle and then stall feed them during the coldest weather.

The Panhandle high school boys have demonstrated beyond a question that sweet clover may be grown with success here in Carson County. In fact, they have shown that it may be planted almost any time during the year when there is reasonable moisture in the ground; during warm weather it will come up in about six days. It may be planted in mid-winter and will remain in the soil until spring and come up as soon as it quits freezing nights. Sweet clover, sudan and other grasses for pasture, root crops and farm grown grains will bring success to Carson as a dairy center.

Rutabagas should be planted about the middle of June in summer-filled ground or ground that has been previously prepared. If it has been enriched with well rotted manure, so much the better. Roots should be planted in rows about 30 inches apart and later thinned to about one plant to every foot apart in the row. For winter use these rutabagas should be pulled when fully mature, the tops should be

cut off and they should be stored in a root cellar or pit.

We should realize better prices for our dairy products in more ways than one, but especially by reducing the cost of production through good feeding and the growing of our own feeds. At best we will have to buy enough commercial feeds, but more economical results will be had when they are fed together.—Panhandle Herald.

Read The Hesperian for the news of Floyd County.

### TEXAS TOWNS MIGHT ADOPT NEBRASKA TOWN'S EXAMPLE

The Chamber of commerce and city council of a Nebraska town have agreed that business men and local residents will park their cars on vacant lots which the city will prepare for that purpose. Streets will be left for cars of farmers and visitors. The idea might advantageously be used by many Texas towns, in nearly all of which the parking problem is acute.

Tall thin women who want to be well-dressed should have plenty of fullness in their clothing, choose designs with lines that go around the figure and apparently give breadth, accent the outside lines of the figure in decoration—the hips, sleeves, or shoulders,—wear flaring lines rather than straight ones, and be sure their clothing fits, as too loose clothes will emphasize their thinness.

Hesperian Want Ads Pay.

### COW NETS TWO-THIRDS OF OWN WEIGHT IN BUTTER

Weighing more than a ton and netting nearly two-thirds of a ton in butter, Illini Homestead Piebe Bonheur, owned by Illini College of Agriculture, is the 135th Holstein-Friesian cow to produce more than 1,000 pounds of butter fat in 365 days. She freshened at the age of 6 years, 4 months, 14 days and, last April 16, completed a record of 28,855.6 pounds of milk (more than 14 tons) containing 1,050.24 pounds of butter fat (1,312.8 pounds butter) in 365 days on 4-time milking.

Piebe also has a record of 20,508.5 pounds of milk containing 712.23 pounds of butter fat (801.25 butter) as a junior 2-year-old. During the lactation just completed, she produced 609.5 pounds of milk containing 23,568 pounds of butter fat (29.46 pounds butter) in 7 days.

Production is not the only factor for which Piebe is noted, however, according to the Illinois College of Agriculture, as in 1926 she was first prize 4-year-old at Peoria, Ill., eighth at the Waterloo Dairy Cattle Congress in Iowa, and sixth at the National dairy show. Piebe was also champion junior 2-year-old for milk and butter for the state of Illinois.

Piebe ranks as the 57th high butter fat producing Holstein on the 1000-pound butter fat list. Her butter fat test throughout the lactation period was consistent and varied scarcely one-half of one per cent, averaging 3.64 per cent for the year. At no time during the year did she produce less than 2.3 pounds of butter fat daily, and her milk production during the final period averaged above 63 pounds daily.

At calving time Piebe weighed 2,020 pounds. Her sire is Sire Bess Pieterie. Piebe who has two other daughters with records above 600 pounds butter fat (750 butter). The dam is Illini Homestead Bonheur whose record is 19,844 pounds of milk and 748.65 pounds butter fat and three of whose half sisters produced above 800 pounds of butter fat (1,000 pounds butter).

To make orange ice for dessert, you need 2½ cups of orange juice, ¼ cup lemon juice, ¾ cup sugar, ¼ teaspoon salt, and 1 egg white. Strain the fruit juices, add the sugar and salt, and stir until the sugar is dissolved. Freeze with a mixture of 1 part salt to 4 to 6 parts of ice. Turn the crank slowly. When partly frozen add the beaten white of egg and turn until firm. Pack in ice and salt for an hour or so before serving.

The Hesperian \$1.50 per year.

### Took Soda 20 Years For Gas—Stops Now

"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—J. B. Hardy.

Adlerika relieves stomach gas and sourness in TEN minutes. Acting on BOTH upper and lower bowel, it removes old waste matter you never thought was in your system. Let Adlerika give your stomach and bowels a REAL cleansing and see how much better you feel. It will surprise you! Floydada Drug Co.

# Two Dairy Essentials

## A Lifetime Feed Grinder!

### LETZ No. 344 MIXED FEED MAKER

If you're looking for big capacity in a feed grinder, with the ability to stand up under extra-heavy duty, you will find both of these features in this sturdy Letz Mixed Feed Maker.

Load the double-automatic all-steel feed table to the brim! Keep it going at full capacity for any length of time! No matter how great the demand you make upon it, the No. 344 Letz will handle the material easily and smoothly, without clogging or breaking. It is a real lifetime grinder.

With its large capacity, the

## Never Before Such a Light-Running Separator!

Now, with its new ball-bearing upper-neck bearing, the Gold Medal has been made still easier to turn—it's the lightest-running cream separator on the market. Because this ball bearing is self-aligning and self-adjusting—an exclusive Gold Medal feature—the bowl is always perfectly balanced. Bearing is entirely enclosed and protected from dirt and moisture, insuring long life, and minimum friction.

You will be sure to like this new feature of the

### Gold Medal

And remember—Gold Medal Curved Disks skim closer!

That's because the curve provides a wide space at center of the bowl to take care of thick, sluggish cream that has a tendency to clog in the ordinary straight-disk bowl. This space becomes extremely narrow toward the outside of the bowl—separates the last particles of butterfat. Two cream outlets—another exclusive feature—aid in handling thick cream and maintaining uniform test.

Come in and try this easy-turning machine. See the new bowl design, the new type oil indicator which shows at a glance if your machine is being properly oiled and the many other features that make this an ideal combination of close skimming, light-running and longer-life. There's a Gold Medal in the size to suit your needs.

Report of Pupils of Mrs. O. W. Kirk at Festival.

Correct results of the Music Festival held in Amarillo recently, have been appearing in the Amarillo Daily News.

Class A receiving grades 95-100; Class B, between 92-95; Class C, 85-90; Class D, 80-95. Contestants were graded in technique 35; tone quality 15; Pedaling 10; Interpretation 40.

Report of the pupils of Mrs. Ohmer W. Kirk follow:

Solo—Marjorie Kirk, Class A, 95; Ensemble—Mary Wilson Hicks and Nell Stevenson, Class C, 89; Solo—Lois Sitton, Class B, 94; Bernice Holyfield, Class B, 94; Vic-

torine Fitch, Class B, 94; Jessie Merle Scoggin, Class C, 89. Ensemble (18 year old)—Jessie Merle Scoggin and Ruth Enoch, Class B, 92. No Class A given in this classification. This group made highest grade in Class B.

Ensemble (16 years old)—Lois Sitton and Bernice Holyfield, Class C, 89. None of contestants fell below 89, and each one won a place.

**Class Group Number One Act As Hostesses.**

T. E. L. Class of the Baptist Church met Wednesday afternoon at the home of Mrs. H. L. Crow with group Number One of the class as hostesses. Games planned by the hostess group furnished entertainment.

Refreshments were served to Mrs. Frank Johnson, Mrs. O. Stephens, Mrs. S. M. Cole, Mrs. S. J. Latta, Mrs. Clyde Bagwell, Mrs. R. E.

C. Henry, Mrs. I. W. Hicks, Mrs. E. L. Angus, Mrs. C. W. Dennison and Mrs. J. T. Hopper.

**K. K. Klub Friday With Mr. and Mrs. Hammonds.**

Mr. and Mrs. John I. Hammonds entertained members and friends of the K. K. Klub Friday evening. Mrs. Joe M. Day got high score for the visitors, in the games of bridge played during the evening, and Mrs. W. H. Hilton and Edd Bishop got high score for the members.

Refreshments were served to Mr. and Mrs. George Sherrill, Mr. and Mrs. W. C. Newsom, Mr. and Mrs. S. W. Ross, Mr. and Mrs. Joe M. Day, Mr. and Mrs. Calvin Steen, visitors; and Mr. and Mrs. Edd Bishop, Mr. and Mrs. Ray Dickey, Mr. and Mrs. D. Johnson, Mr. and Mrs. Ray Clements, Mr. and Mrs. W. H. Hilton, Mr. and Mrs. Otis Abston and Miss Jennie Lewis.

Mrs. Otis Abston will be hostess to the Club Friday afternoon at 3 o'clock.

**Friendship Bridge Club Met Monday Evening.**

The Friendship Bridge Club met Monday evening with Mr. and Mrs. Robert McGuire. In the games Mrs. Thurmond Bishop got high score for the lady visitors and Edd Bishop got high score for the gentlemen visitors. Mr. and Mrs. J. A. Arwine got high score for the members.

Refreshments were served to the following: Mr. and Mrs. Edd Bishop, Mr. and Mrs. Thurmond Bishop, Miss Blanche Bass, Miss Jean Ayres, Miss Marie Strange, Miss Lucille Mitchell and Mr. Jack Foley, guests of the club for the evening; and Mr. and Mrs. C. H. Davis, Mr. and Mrs. J. C. Gilliam, Mr. and Mrs. Flynn Thagard, Mr. and Mrs. A. B. Keim, Mr. and Mrs. A. A. Bishop, and Mr. and Mrs. J. A. Arwine.

The club will meet with Mrs. R. B. Rosson, Friday evening, June 14, the next regular meeting having been postponed on account of an Eastern Star Meeting.

E. J. Parsons, of Lubbock, J. C. Penney Company manager, was a business visitor in Floydada Tuesday of this week.

The Hesperian \$1.50 per year.

**Social Calendar**

Mrs. L. H. Dorrell will be hostess to the Stitch and Chatter Club at her home this afternoon at 3 o'clock.

Mrs. Otis Abston will be hostess to the K. K. Klub Friday afternoon at 3 o'clock.

The Wednesday Bridge Club will meet Wednesday afternoon, May 29, with Mrs. Leon Collins. After this meeting the club will disband for the summer.

The Woman's Council of the First Christian Church will meet Monday afternoon at 3:30 o'clock at the church. The lesson will be the hidden answers from "The World Call."

North Circle of the Baptist Missionary Society will meet Monday afternoon, May 27, at 3:30 with Mrs. Henry Cox. The lesson will be from the "Plan of Salvation."

East Side Circle will meet Monday afternoon at 4 o'clock at the home of Mrs. J. F. Sitton.

Ladies Aid of the Cumberland Presbyterian Church will meet Monday afternoon with Mrs. A. J. Fanning at 2:30 o'clock.

**Presbyterian Society Met Monday Afternoon.**

The Woman's Missionary Society of the Cumberland Presbyterian church met Monday afternoon at 4 o'clock at the church. Mrs. A. A. Collins gave the devotional. Mrs. B. M. Eubank, president, conducted a short business session. Mrs. W. M. Massie then gave a lecture on the lesson from "Our Friends of Africa." This lesson completed the study of the book.

**Camp Fire Past President Honored with Shower.**

Netopew Camp Fire Group met with Louise Conner Tuesday afternoon at 5 o'clock.

Officers for the coming year were elected as follows: Mary Ann Kimble, president; Margaret Smith, vice president; Virginia Welch, secretary Louise Conner, treasurer; Maxine Fry, Reporter;

Marcella Faulk past president of the group, and her sister, Nellie Frances, who have been staying with their aunt, Mrs. T. C. Russell and attending school and who will leave soon to spend the summer with their mother in Louisiana, were honored at this meeting with a miscellaneous shower.

The girls decided to sell candy Tuesday afternoon.

**Pageant at Methodist Church Instead of Regular Service.**

"The Fruits of His Labor," a playpageant, by Mattie Carruth Robertson will be given by the Porterfield Missionary Society at the Methodist Church Sunday evening at 8 o'clock. The pageant will take the place of the regular preaching service.

The cast of characters are: Rev. Jermiah Hopkins, known as pa—Mary Shenefelt. Nancy Hopkins, his wife—Dessie Walker. Mr. Odemyer, a collector—Dena Casey. Mr. Nathan Wiggins, an oil king—Thelma Slaughter. Soloist—Blanche Steen. Young Lady Angel—Ernestine Thomas. Small Angels—Ruth Palmer, Doris Casey, Jessie Bell Massie, Esther Finkner, Vallie Porterfield, Virginia McKinney. Spirits of Gloom—Mary Anna Ross and Addie Barker. Choir. Director—Violet West Sone.

**Celebrates Birthday With Party.**

Thomas Flynn Thagard, son of Mr. and Mrs. Flynn Thagard, celebrated his fourth birthday with a party Tuesday afternoon from 3 to 4 o'clock at the home of his parents, 416 West Kentucky Street.

Refreshments were served in cafeteria style and the birthday cake with four candles adorned the center of the table. Balloons were given as favors.

Guests for the party included: John, Lynn and Bobbie Colville, La Juana and Frank, Jr., Boerner, Leeman and Buddy Norman, Phil and Maurice Steen, Greer McCleskey, Kyle Savage, Joe Dick Moore, Eugene Standifer, Joe Arwine, Irvin Allen, Billy Clyde Davis, Pat Collins, Kenneth Johnson Dell King Bobbie James Eubank, Dorothy Louise Allen, Edelle and Dorothy King, Gladys, Mary May and Jimmie Lee Watson.

**Camp Fire Girls Given Permanent Home.**

The Watcheloven Camp Fire Group met with their guardian Tuesday afternoon at their new Camp Fire home. The group have recently been given a permanent meeting place by Mr. and Mrs. Glad Snodgrass at their home, of which the group are very proud. They have completely furnished it and are now planning to buy some new pictures. They are especially pleased with their new library.

Mrs. Tom Shaw resigned as Camp Fire Mother. Mrs. M. L. Probasco was elected assistant guardian.

The next meeting will be held at the Camp Fire home with the assistant guardian, Mrs. M. L. Probasco at 8 o'clock Tuesday night.

**San Souci Bridge Club With Mrs. Welborn.**

San Souci Bridge Club met Wednesday afternoon with Mrs. Jeff Bost, Mrs. E. L. Norman, Mrs. H. L. Crow, Mrs. D. R. Grisham, Mrs. W. B. Parrock, Mrs. J. P. Davidson, Mrs. W. I. Cannaday, Mrs. P. D. O'Brien, Mrs. D. P. Carter, Mrs. R.

Welborn. Mrs. Polk Goen got high score in the games played during the afternoon. Mrs. E. L. Norman was a visitor to the club. Miss Myrtle Henry was received as a new member.

Refreshments were served to Mrs. Polk Goen, Mrs. Leslie Surginer, Mrs. Ray Clements, Mrs. Terrell Loran, Mrs. Rip Snodgrass, Mrs. Joe M. Day, Miss Myrtle Henry and Mrs. E. L. Norman.

**North Circle Meeting.**

Mrs. W. F. Weatherbee was hostess to North Circle of the Baptist Missionary Society Monday afternoon at 3:30 o'clock. The Bible study was taught by Rev. P. D. O'Brien. There were sixteen members present.

Mrs. Henry Cox will be hostess to North Circle Monday afternoon, May 27, at 3:30 o'clock.

**South Circle Meeting.**

South Circle met Monday afternoon with Mrs. P. D. O'Brien. There were six members present for the Bible study. Mrs. I. W. Hicks opened the meeting with prayer. After a business session the meeting adjourned.

**East Side Circle.**

Mrs. D. J. Perkins was hostess to members of the East Side Circle Monday afternoon at 4 o'clock. Organization of the Circle which was begun at a previous meeting was completed at this time.

Plans were made to begin a study course Monday, May 27.

**DIET AS A CAUSE OF DISEASE**

It is known that an abnormal eater is likely to suffer the consequences, is likely to have gout and be obese beyond the bounds of comeliness. It is known also that excessive amounts of sugar and starches in the diet is never admissible in diabetes. Beyond these assumptions, there is little else definitely known of the evil influence of food. It would seem that ill arise from quantity rather than quality. This statement from those who have studied the effects of diet bears out the theory—"So far as the positive influence of diet in the production of disease is concerned, the established facts are exceedingly meager, and all sorts of wild statements are promulgated for which there is no basis either in experiment or inexperience."

There is a well known group of deficiency diseases which result from the deprivation of the body of vital substances, such as the vitamins and other important and necessary food factors. Among these may be noted rickets, scurvy, conjunctivitis, etc.—"But it is to be borne in mind that general malnutrition and susceptibility to infection are also the result of vitamin deficiency as are also abnormal growths, physical and mental."

Remington Portable Typewriters write good and last long.

When You Consider A Combine, Look For These FEATURES

**CASE**

Ever since your Grandfather was a boy, CASE Threshers have held a position of outstanding leadership everywhere. Now the CASE Combine has become the recognized standard among Combines because of its new and exclusive features.

**Five Case Advantages**

- 1ST—Gets all the grain from any field, because it has a floating header, Counter-Balanced by the thresher unit and quickly adjusted.
- 2ND—Fast threshing in light or heavy straw by a big capacity; all steel; unbreakable cylinder.
- 3RD—Complete Separation beginning at the perforated concaves and finger grates and finished over a Non-clogging; steel straw rack.
- 4TH—Thorough cleaning of grain by two complete cleaning shoes, equipped with under-balanced fans. Final cleaning under eyes of the operator.
- 5TH—Light draft because the weight is correctly distributed on main axle.

# Reindeer Meat Big Industry For Population of Alaska

In a special story appearing in the Amarillo Daily News of recent date, written by Bascom N. Timmons, from Washington, it is declared that the reindeer industry, which up until a few years ago consisted mostly of pictures of Santa Claus driving his prancing team over housetops, is no longer an infant taking uncertain steps.

Hearings before the ways and means committee on the tariff bill disclosed that over half the people of Alaska are in some way engaged in the reindeer industry. Carl J. Lomen, representing the Lomen Reindeer corporation, appeared before the committee and set out at length the growth and present status of the industry. The first year that the Lomen corporation shipped meat into the United States was in 1916, Mr. Lomen said, and they shipped 74 carcasses. Last year the

corporation shipped approximately 18,000 carcasses, each carcass weighing about 135 pounds.

Alaska contains approximately 350,000 square miles of range available for the grazing of reindeer, and that range is not worth anything for any other agricultural purposes, Mr. Lomen said. "The developing of the reindeer industry simply means that we are extending and enlarging the grazing areas of the United States, and the reindeer is the only domesticated animal that can graze in that north country without shelter," he told the committee.

**Foreign Competition Problem**

What the industry has to look out for is the venison and reindeer meat from Norway and Scotland, the larger part of the venison coming from Scotland. The Alaskan reindeer industry cannot get their products to the eastern markets and sell as cheaply as the Norway and Scotland shippers," Mr. Lomen said.

"Not so long ago," Mr. Lomen told members of the committee, "I ordered reindeer meat in one of the restaurants in New York City, and after tasting it, I called the proprietor over and said to him, 'this is not reindeer; this is venison.' He said, 'well, we have no reindeer today; I know that.' I told him I did not mind eating venison, but that I did not like to have it served as reindeer because that would prevent the development of the reindeer market."

When asked to explain the difference in taste between reindeer and venison, Mr. Lomen said that reindeer is between a lamb and duck in flavor and lacks the gamey flavor that venison has. But he insisted that reindeer will never compete with the lamb market in the United States. Mr. Lomen said that he had followed this phase of the market very closely with the department of agriculture, and that it was the belief that reindeer meat would never enter into competition with lamb.

A little less than 2,000,000 pounds of reindeer meat was brought into the United States during the past year. That number of pounds will probably double during this year, Mr. Lomen said.

**Reindeer Expense Enormous**

The expense of raising and marketing reindeer is enormous, Mr. Lomen told the committee. The Eskimos receive salaries from \$1,000 to \$2,000 a year, and in addition at certain seasons of the year their living expenses are paid in addition to the salary they receive. The committee seemed astonished at such high salaries for the class of work.

"Is that the pay for one man alone or does the entire family work with him?" Mr. Lomen was asked. "Oh, no; one man alone," he replied. Mr. Lomen said about 5,000 Eskimos are interested in the industry.

Mr. Lomen told the committee that approximately 100,000 wild deer are killed annually in the United States, but that they were not sold on the market.

The industry is asking for a tariff of nine cents a pound on reindeer shipped in from foreign countries.

The Hagenbeck-Wallace Circus, premier wild animal show of the world, will be the Grand Stand attraction at the 1929 State Fair of Texas, Oct. 12 to 27th. This will be the largest single engagement any circus has ever stayed in the South, having a total run of 32 performances.

Texas counties have been given the privilege of selecting their own crops for exhibition at the 1929 State Fair of Texas. New score cards for agriculture at the 1929 exposition which has recently been adopted puts every county in the state on an equal footing. A third more space is being added to the Agriculture Building.

Mr. and Mrs. A. L. Scoggin and sons, Mack and John Harvey, and daughter, Marylu, left Tuesday for Collinsville, where they will visit his parents, Mr. and Mrs. John Scoggin.

Read The Hesperian for the news of Floyd County.

## WHAT FOODS DO

So much is heard these days of "natural foods," "acid forming foods," "raw foods," "pre-digested foods," "mucous forming foods," etc., that if Adam and Eve were living they'd doubtless become discontented with their "apple diet" as too simple to suit them. Everywhere is caught such phrases as "I am on a new diet. Now you should try it."—when probably the speaker weighs 185 lbs. plus, and the one spoken to is thin to emaciation. Then there is the convert to lamb chops and pineapple, who boasts the loss of ten lbs. and wants the world to know of this computation. People seem very easy victims of food fads. Some keen observer has remarked that unless it be religion, there is no field of human thought in which sentiment and prejudice take the place of good judgement and logical thinking so completely as in dietetics. It is amazing to see how eagerly many grasp each new idea regarding the food value of vegetables, fruit, cereal or nut, without any scientific corroboration and include it in their dietary test. Such people are apt to have violent prejudices and will not for any consideration eat at the same time any combination of milk and fish and will feel that orange juice and milk will almost if not quite kill the baby. Experimentation with food has proven that any food which is fit to be eaten can be eaten with any other food which has stood the test of fitness. If any combination has the effect of discomfort, then one of its members failed to qualify as a standard production. There are some foods which have borne a bad reputation that in the light of present day information are being restored to favor, such as the banana, the cucumber and the tomato.

One has to be on guard all the while for commercial exploitation of certain products. Extremes always are to be avoided. From certain advertisements the idea might be gotten that Somebody's Bran would cure all the ills that flesh is heir to. Roughage to a reasonable amount and for normal persons might be advocated, but without doubt, much harm may be brought about in digestion by a continuous diet of such coarse irritant as bran. Along with "know thyself," also know the biological value of vitamins, proteins, mineral salts, etc.

## U. S. Farm Radio Program For Week of May 27-31

Dr. Charles J. Galpin, in charge of division of farm population and rural life in the Bureau of Agricultural Economics, will deliver his third radio address in the noon-hour network series of the Department of Agriculture on Friday, May 31. Dr. Galpin's topic for this week's talk is "The Advantages of a Single Farm Community." This talk, and the others in the Department of Agriculture program during the week will be carried on a network of 17 stations associated with the National Broadcasting Company. The program comes at 12:15 to 12:30 p. m., Central Standard Time, 1:15 to 1:30 p. m., Eastern Standard Time, or 11:15 to 11:30 a. m., Mountain Standard Time.

There will be no Department of Agriculture program on Memorial Day, Thursday, May 30.

On the first three days of the week farmers and home makers will be given a variety of information by specialists of the Department. E. H. Wiecking, who is in

charge of the department's work in keeping tab on land values, will tell "What Has Happened to Land Values During the Past Year." His talk will report the annual survey of the department. Other economic reports on the dairy markets and on the spring feed situation will be sent to listeners. Mr. D. J. Price, who is in charge of chemical engineering research of the Bureau of Chemistry and Soils, will tell the causes of a good many mysterious farm fires—spontaneous ignition of hay or other products, and give listeners the hints for controlling such fires worked out by department investigations. "Summertime Toys," a talk for mothers of toddlers by Rowena Schmidt Carpenter of the Bureau of Home Economics, and "Ice Cream Making at Home," by O. E. Williams of the Bureau of Dairy Industry, also are included in the week's program.

The complete program follows:  
Monday, May 27—"Those Mysterious Farm Fires," D. J. Price, in

charge of chemical engineering research; and "The Spring Feed Situation," F. J. Hosking, grain and feed market news specialist.  
Tuesday, May 28—"Making Ice Cream at Home," O. E. Williams, specialist in dairy manufacturers; and "The Dairy Markets," L. M. Davis, dairy market news specialist.  
Wednesday, May 29—"What Has Happened to Land Values of the Past Year?" E. H. Wiecking, specialist in land valuation; and "Summertime Toys," Rowena Schmidt Carpenter, assistant to the Chief of Bureau of Home Economics.  
Thursday, May 30—No Program.  
Friday, May 31—"The Advantages of a Single Farm Community," Dr. C. J. Galpin, in charge, division of farm population and rural life, Bureau of Agricultural Economics.

These programs will be broadcast by the following stations associated with the National Broadcasting Company:  
WRC, Washington; KDKA, Pittsburgh; WHAS, Louisville; KFKX, Chicago; KSTP, St. Paul-Minneapolis; WOC, Davenport; WHO, Des Moines; WOW, Omaha; KOA, Denver; WDAF, Kansas City; WFAA, Dallas; WOAI, San Antonio; WSB, Atlanta; WSM, Nashville; and WMC, Memphis.

record of 602.80 pounds of fat in 365 days at the age of two years and one month and again as a senior three-year old produced 638.6 pounds of fat and 13,215 pounds of milk in 365 days.

This double medal winner is the third register-of-merit daughter of Gumbo's Fox's Agatha 467939, with three fine records of 635.54 pounds of butter fat and 11,815 pounds of milk in 365 days at two years as a senior four-year old, 638.33 pounds of fat and 12,314 pounds of milk in class AAA; and her third record at seven years of 787.34 pounds of fat and 17,311 pounds of milk.

All of the tests of the College gold medal cow were made under the direction of the American Jersey Cattle Club and are of record in the files of the organization. The College herd to which this cow belongs is in charge of T. M. Moore, who runs it as a laboratory for students of agriculture and as a source of milk supply for the two dormitories.

Young pullets are very sensitive to strange conditions and objects, and should not be disturbed or moved around from place to place. Pullets intended for laying should be kept by themselves and so handled that they will grow well and be in good laying condition by the middle of the fall. Free range on clear soil and plenty of green feed and shade are essential to good growth.

### Milk Production Of Gold Medal Cow High

Canyon, May 17.—The dairy herd of the West Texas State Teachers College boasts one of the few gold and silver Medal Jersey cows found in this section of Texas.

Gumbo's Fox's Little Agatha, 664623 recently finished the third production test, with a record of 648.48 pounds of fat and 10,853 pounds of milk in 305 days, class AAA.

During the ten months test her milk averaged 5.98 percent butter fat. Nine times during the test Little Agatha's name appeared on the list of cows reaching the fifty-nine pound mark, and her yield once reached 83.55 pounds for a month. This test was begun at the age of four years and ten months.

Dairymen were already interested in this cow as she had made a

THE STATE OF TEXAS,  
County of Floyd,  
City of Floydada,  
TO THE RESIDENT, QUALIFIED  
PROPERTY TAX-PAYING VOTERS  
OF THE CITY OF FLOYD-  
ADA, TEXAS:

TAKE NOTICE, that an election shall be held in the said City on the 11th day of June, 1929, on the proposition of issuing said bonds of the said city in the amount of One Hundred Fifty-eight thousand Four Hundred Thirty-three (\$158,433.00) dollars, for the purpose of funding a like amount of legally issued and outstanding indebtedness of said city pursuant to the following election order adopted by the City Council:

A RESOLUTION  
Calling an election submitting to the qualified voters residing in said city who are property tax payers therein the proposition for the issuance of the bonds of said city in the sum of \$158,433.00 dollars for the purpose of paying off, cancelling and in lieu of a like amount of the legally issued and outstanding interest-bearing time warrants and scrip more particularly described in the resolution.

WHEREAS, at various times heretofore the City of Floydada, Texas, has issued certain interest-bearing time warrants parts of which issues are now outstanding, constituting valid indebtedness of said city, which interest-bearing time warrants are more particularly described hereinafter, to-wit:

(a) City of Floydada Funding Warrants, Series 1928, dated April 27, 1928, bearing six per cent interest, payable semi-annually, in the denomination of \$1,000.00 each, aggregating One Hundred Thousand (\$100,000.00) dollars, issued for the purpose of funding an equal amount of indebtedness legally issued by said city, numbered One (1) to One Hundred (100), which warrants were issued under and by virtue of an ordinance passed by the City Council, and recorded in the minutes of said Council, the warrants outstanding and unpaid being numbered Two to One Hundred, aggregating \$99,000.00, maturing serially throughout the years 1929 to 1952.

(b) City of Floydada Funding Warrants, Series 1928-A, dated December 15, 1928, bearing six per cent interest, payable semi-annually in the denomination of \$1,000.00 each, aggregating \$50,000.00, issued for the purpose of funding an equal amount of indebtedness legally issued by said city, numbered One to Fifty, which warrants were issued under and by virtue of an ordinance passed by the City Council and recorded in the Minutes of said Council, the warrants outstanding and unpaid being numbered One (1) to Fifty (50), inclusive, aggregating \$50,000.00 maturing serially throughout the years 1931 to 1943.

(c) City of Floydada Funding Warrants, Series 1928, dated July 1st, 1928, bearing interest at the rate of six per cent, payable semi-annually in the denomination of \$500.00 each, aggregating \$4,500.00, issued for the purpose of funding an equal amount of legally issued indebtedness of said City numbered One (1) to Nine (9), which warrants were issued under and by virtue of an ordinance passed by the City Council and recorded in the minutes, the warrants outstanding and unpaid being numbered Three to Nine, aggregating \$3,500.00, maturing serially throughout the years 1929 to 1935.

WHEREAS, at various times heretofore the City Council has issued certain scrip warrants for the general administration of the government which warrants are now outstanding, constituting valid indebtedness of said city and are more particularly described hereinafter, to-wit:

Reg. No. 3198, Warrant No. 3198, Date 2-8-29, to whom payable, Hesperian Publishing Company, purpose, Office Furniture, Amt., \$809.50.  
Reg. No. 3204, Warrant No. 3204, Date 3-14-29, H. E. Cannaday, City Hall Improvement, Amt. \$399.60.  
Reg. No. 3205, Warrant No. 3205, Date 4-9-29, To whom payable, Herrington, Seaburg, purpose Traffic Signals, Amt. \$948.00.  
Reg. No. 3208, Warrant No. 3208, Date 4-26-29, To whom payable, Texas Utilities Company, Purpose, Installation of Traffic Signals, Amt. \$1647.40.  
Reg. No. 3209, Warrant No. 3209, Date 4-26-29, To whom payable, Burl Bedford, Purpose, Refund on Paving Assessment, Amt. \$2128.50.  
Total, \$5933.00; and,  
WHEREAS, the aggregate amount of the interest-bearing time war-

rants and scripwarrants above described is \$158,433.00 dollars; and  
WHEREAS, it is considered by the City Council to be to the best interest of the City of Floydada, that all of said interest-bearing time warrants and scrip above described, be funded into the bonds of said city payable over a series of years.

THEREFORE, BE IT RESOLVED AND ORDERED BY THE CITY COUNCIL OF THE CITY OF FLOYDADA, TEXAS:

That an election be held on the 11th day of June, 1929, at which election the following proposition shall be submitted:

"Shall the City Council of the City of Floydada, Texas, be authorized to issue the bonds of the said city in the sum of One Hundred Fifty-eight Thousand Four Hundred Thirty-three (\$158,433.00) Dollars, maturing serially in not to exceed forty years, and bearing interest at the rate of five and one-half (5½%) per cent per annum, payable semi-annually and to levy a tax sufficient to pay the interest on said bonds and to create a sinking fund sufficient to redeem them at maturity for the purpose of paying off, cancelling and in lieu of a like amount of legally issued and outstanding interest-bearing time warrants and scrip of the city under the provisions of Article 827, Revised Civil Statutes of Texas, and other applicable laws."

The said election shall be held at the City Hall in the said City and the following named persons are hereby appointed managers thereof, to-wit:

E. P. Nelson, Presiding Judge,  
W. H. Henderson, Judge,  
Mrs. W. B. Henry, Clerk,  
Mrs. Jno. Reagan, Clerk.

The said election shall be held under the provisions and in accordance with the General Election Laws of the State of Texas, governing City elections, and only qualified voters who are property tax-payers of said city shall be allowed to vote.

All voters who favor the proposition to issue the said bonds shall have written or printed upon their ballot the words:

"FOR THE ISSUANCE OF BONDS."

And those opposed to the proposition to issue the said bonds shall have written or printed upon their ballot the words:

### "AGAINST THE ISSUANCE OF BONDS."

The manner of holding said election shall be governed by the provisions of the Revised Statutes of Texas of 1925, and of the Constitution and laws of the State of Texas, regulating general elections.

A copy of this resolution, signed by the Mayor of said City and attested by the City Secretary, shall serve as a proper notice of said election.

The Mayor is authorized and directed to cause this notice of the election to be posted at three public places in said city for at least

thirty full days prior to the date of the said election.

The Mayor is further authorized and directed to cause this notice of election to be published in some newspaper of general circulation published in said city, and which notice shall be published once each week for four (4) weeks, the date of the first publication shall not be less than thirty (30) full days prior to the date of said election.

(SEAL) W. C. HANNA,  
Mayor, City of Floydada, Texas.

Angell "One Way"  
Disc Plow

Revolutionized  
Wheat Farming

**FAMOUS Ohio**

The need for a faster, cheaper, better method of preparing wheat land was answered when Charlie Angell developed the "One Way" Disc Plow on his own farm at Plains, Kansas.

His neighbors saw how it cut the cost of fitting wheat land by one-third; how it killed volunteer wheat; left the soil level for the combine and did away with all the other tillage tools the wheat farmer used. Demand spread and grew until it can truthfully be said that this Genuine Angell One Way Disc Plow has revolutionized wheat farming in the west.

We believe it is well to bear in mind this fact—the Angell "One Way" Disc is the plow that has revolutionized wheat farming, that is why we recommend it to you.

### Floyd County Clubs PROVIDENCE GIRLS CLUB

There were seven members present at the meeting of the Providence Girls 4-H Club, held at the club room on May 14. Miss Strange was with us.

The first year girls are through with their sewing for this year, second, third and fourth year girls are to have their garments finished.

We will start our cooking next meeting, May 28. We will cook muffins, soup and make a salad.

### McCOY 4-H GIRLS CLUB

The McCoy 4-H Girls Club met on May 16 at 10:30 a. m., in their club room for their last meeting, at which cooking was the subject for study and discussion. Each girl answered roll by telling what kind of dish she had prepared for lunch.

After the members had handed in their last clothing articles and received their grades, luncheon was prepared. A dish either of vegetables or fruit, was brought by each girl. Miss Strange gave rules of etiquette which were carried out

through the lunch.

At the next meeting, the first Thursday in June, a continued study of cooking will be made.

All members, with one exception, were present at the last meeting and received a gold star. For the next meeting we are hoping for a one hundred per cent attendance.

### THE HESPER OF 1929

The Hesperian must acknowledge, with more than passing pleasure, receipt of a copy of The Hesper, yearbook for 1929, of the Floydada High Schools, which is the most ambitious effort of a class of that school yet brought to a successful close.

Excellent in printing, in binding, in editorial composition and make-up, good drawings and illustrations—in other words a dandy yearbook, the Hesper of 1929 is a thing for which student body, editorial staff and management, as well as the printers and binders should have warm words of praise.

Thanks for the copy you presented us, seniors of 1929. Here's hoping all your undertakings prove as good, as complete and excellent as this one has proven.

## Personal

Mr. and Mrs. Clyde Nelson of Munday were week end guests of Mr. and Mrs. Edwin Heald.

Mrs. B. W. Hemphill, of Wink, returned home Sunday after a visit here with her parents, Mr. and Mrs. H. P. Puckett, and also friends.

Mrs. G. R. May and daughter, Bert Ione, spent Monday with her mother, Mrs. J. C. Edwards, of Petersburg. Bert Ione remained for a visit with her grandmother during the absence of her grandfather, who is visiting relatives at Waco.

Mr. and Mrs. W. U. White returned Sunday from a business trip to Dallas.

Mr. and Mrs. H. M. McDonald returned Sunday from Lubbock, where Mr. McDonald took treatments in a sanitarium. Mr. and Mrs. W. D. Smith who have been visiting their daughter, Mrs. P. T. Rucker, returned home with Mr. and Mrs. McDonald.

Hyram Williams and his friend, Mr. Nieland, of Winstboro, came Tuesday for a visit with his uncle, W. I. Cannaday, and family. They are enroute home from a trip to California.

Mr. and Mrs. W. H. Scoggin will go to Lubbock the latter part of next week where they will enter school at Texas Tech for the summer.

W. G. Collins left Tuesday for Sulphur, Oklahoma, where he will spend a few weeks for the benefit of his health.

Mr. and Mrs. Wilson Mahan left Sunday for a vacation trip. They will visit relatives in different places of the state.

Mrs. Edgar D. Tarpley and children of Clovis came Saturday for a weeks visit with her parents, Mr. and Mrs. R. F. Jackson and family.

Mrs. Gean Pittman of Lubbock spent last week here with her parents Mr. and Mrs. R. F. Jackson while Mr. Pittman was in Temple for medical attention. She went to Temple Friday having received word that he was very ill. He is recovering now.

Byron Clark returned Friday from Temple where he had accompanied his brother-in-law, Gean Pittman of Lubbock for medical treatment, a week earlier.

J. C. Gilliam of the Higginbotham-Bartlett Lumber Co., left Tuesday for Dallas where he will undergo a tonsil operation.

Mrs. H. H. Hatchett of Clinton, Oklahoma, spent several days with relatives here and attended the graduation exercises of her niece, Miss Jessie Merle Scoggin. Mr. Hatchett came Tuesday and accompanied her home.

Mr. and Mrs. George Snodgrass and children of Phoenix, Arizona, left Thursday for their home after a visit with his sister, Mrs. Carr Surginer and family.

Leslie Surginer left Sunday for Temple where he will go through the clinic of the Scott and White Sanitarium. He was accompanied by his father, Carr Surginer.

### PRaises Beauty of Mason Green House and Flowers

"I have been hearing of the Mason Green House so last week I visited it." Miss Ophelia Bartlett said recently. "The flowers, ferns, palms and other flowers are all so beautiful that you just want to have flowers about you all the time."

"Anyone who has the desire to work with flowers surely can make a home more beautiful with them."

"The gorgeous colors of Geraniums are beautiful and there are many other beautiful things, also."

"Everyone who loves flowers should take the opportunity to see the many beautiful flowers in Mr. Mason's Green House."

### SANITARIUM NOTES

D. W. Holladay, city, underwent an operation at the Smith and Smith Hospital, May 21 for tonsillitis.

E. J. Bragg, city, underwent an operation Sunday, May 19, for appendicitis.

Miss Essie Baskin, city, underwent a tonsillectomy this week.

BORN—to Mr. and Mrs. G. E. Bond, Campbell, at the hospital, Wednesday, May 22, a girl.

Buever Sargent, city, was dismissed from the hospital Wednesday following an appendicitis operation. He left for his new home at Roaring Springs.

### SAVING THE SITUATION

Last summer a pretty married woman went to a certain seaside resort for rest and recreation. She simply could not stand the city any longer without a change. She could not bear to stay there and see her husband work in the heat.

There is an old saying that if the devil finds you doing nothing, he will put you to work. This pretty married woman at the seaside resort had nothing to do. She met at the resort an attractive, lone, lonely man who had nothing to do. He was a bachelor. All attractive, lone, lonely men are bachelors, to hear them tell it, or their wives don't understand them.

"Two capable persons with nothing to do!" quoth the devil; "I'll put them to work," and he did.

Some kind hearted person who thought it a shame that a pretty married woman should get to going at such a gait, dropped an anonymous line to her husband.

The husband immediately packed his grip and took the first train for the seaside. He did not come with a pistol in one hand and a dirk in the other. His principal equipment was a head full of brains.

"Look here, Rosy Morn," he greeted his wife, "pack up. We are going back to the steaming city. It's hotter, but it's safer."

The husband refused to give his wife's affair any dignity or weight by treating it seriously.

"I worked too long and too hard getting that girl," the husband told a group of perfect strangers in the hotel lobby, "to let any fellow walk away with her just like that."

No use to pretend nothing had been going on when everybody in the hotel knew something had been going on. The guests laughed sympathetically. The lover grinned sheepishly. The pretty wife smiled demurely. And went back to town with her husband. Thus, what might have been something else, stopped right where it started.

Probably most married persons who find their mates hitting the wrong trail take the matter too seriously. They feel that the circumstances call for a heavy tragedy part and they play it.

A man may not care two hoots for his wife, but let him find she is thinking twice about any other fellow and immediately he pulls down his brows, narrows his eyelids, distends his nostrils and spouts fire. He considers this procedure the proper caper.

A woman's husband may be her chief weariness, but let him begin to act sprightly around some other woman, revive the wise cracks he used to know, and develop an interest in the new Negroid dances and watch the wife.

Many an illegitimate infatuation goes through to a disastrous climax because everybody concerned gives it too much reality; whereas the matter often might be disposed of quickly and effectively, particularly in its incipency, if the offended mate would take the offending mate by the ear and say: "Here, You! Snap out of it!"—Ex.

Commander Byrd has picked out about the only solid South a good Democrat can find.—Arkansas Gazette.

Portes Gil, we read, is provisional President of Mexico. The provision being that no revolution succeeds.—Judge.

### POST OFFICES ENCOURAGE AIR SIGNS TO AID AIRMEN

Acting Postmaster General John H. Bartlett, in an article in a recent issue of the Postal Bulletin, stresses the importance of every town of 1000 population and over to have the name of the town painted in large letters on about two roofs in town as an aid to aerial navigation.

He states that he takes up the matter with all postmasters and urges them to present the matter to the various commercial and municipal organizations with a view of getting action in conformity with the proposition.

Mr. Bartlett states that the Department will shortly issue a map for the guidance of the air mail and commercial points, on which will be given the location of each town complying with the request, as well as information concerning its principal industries and resources. This is an opportunity for Levelland to appropriate a share of publicity that will go throughout the United States. Also, it is highly probable that as soon as the air routes in this country has been definitely determined, this town will be on a line between Lubbock and Roswell and points west. It is possible that at not far distant day we might be served with the air mail and it might become a stopping place for commercial planes. Action should be taken as we have some lumber sheds that would be ideal places on which to place the signs.—Levelland Leader.

### STAKING AND PRUNING GIVE BETTER TOMATOES

"In setting out tomatoes it's a good plan to plant them about two feet apart in the row, which is closer than is ordinarily advised, and later stake them. This increases the number of vines that can be grown in the garden, puts the fruit up where it is easy to gather and to spray, and make pruning easy," says the horticulturist in the Extension Service, J. F. Rosenborough. "Four-foot stakes should be used, driving them into the soil three or four inches away from the plants. Coarse twine or cloth strings are used for tying the plants to the stakes, and string should be carried along with pruning done so that plants may be re-tied where needed."

As tomato plants begin growth it is advisable to remove sucker sprouts at least once each week, otherwise these sprouts will tend to reduce the size of the fruit. It is true that pruning decreases the yield but it permits the production of earlier tomatoes and fruit that is smoother and more uniform in size. Pruning should be done regularly from the beginning of the growing season, cutting off every sucker at the main stem. They emerge here at the base of the leaf."

Prayer.  
Leader's Talk.  
"Search the Scripture."—Bernice Gresham.  
Discussions of the lesson in life: Ruth Enoch, Morris Burcham, Blanche Enoch, Hazel Probasco, Mary Alice Summerville, Waldo Houghton, Ruth Jenkins, Starks Green, and others.  
The Pastor's Talk.  
Business: Benediction.

**B. Y. P. U. PROGRAM**

Senior B. Y. P. U. will have a missionary meeting Sunday evening, May 26. Johnnie Mae Lanier will give the introduction and the following will have a part in the program: Winfred Newsom, Mildred Abernathy, Archie Wales, Louis Wright, Zella McRoberts, Robyn Swinson, Paul Wright, Ona Mae McMurray.

**PROTRACTED MEETING**

Elder Alva Johnson, of Turkey, Texas, will hold a series of meetings at the Church of Christ building on South Wall Street, beginning Saturday, June 1st, at 8:15 o'clock p. m., and continue over two Sundays. Everybody cordially invited to attend this series of meetings.

**EPWORTH LEAGUE INSTITUTE HELD AT LOCKNEY THIS WEEK**

Sixty-five league workers enrolled for the institute held by the Ansil Lynn Union of Epworth League at Lockney each night this week, Rev. G. T. Palmer said Wednesday. The institute will close Friday night.

The purpose of the institute is to acquaint young people with League work and is preparatory to the general assembly which will be held in Abilene June 10. Four courses of study are being used, the Bible, the League Hand Book, Missions and Social Service. The institute is an annual event.

Following the study period each night, a recreation hour is held. The Missionary Society serves refreshments at 7 o'clock each evening to the students and teachers.

The union is composed of Floydada Circuit, Aiken, Dougherty, Lockney, Petersburg, Hale Center and Plainview Leagues.

**Program Outlined For W. M. S. Conference**

Plainview district of Woman's Missionary societies of the Northwest Texas Conference will meet in Tulia May 30 and 31, opening at 2 o'clock Thursday afternoon.

Two conference officers will attend the meeting, according to Mrs. H. N. Porterfield, district secretary, Mrs. S. H. Crossley of Chillicothe, treasurer and Mrs. R. A. Metcalf, Slaton, superintendent of Children's work. Miss Foreman, Hot Springs, Ark., who is a missionary to Africa is also expected.

Tulia is extending a broad invitation to all auxiliaries to come, Mrs. Porterfield said, and homes will be secured for all those who attend.

The following program has been planned:  
Thursday, 2 p. m.  
Opening hymn, Take Time to be Holy.

Prayer, Miss Anna Carr, Carr's Chapel.  
Consecration service of officers, Rev. M. M. Beavers.  
Song, All Hail the Power of Jesus Name.

**Noon Luncheon**

Let us be grateful, Rev. G. T. Palmer.  
Zone Conclave.  
Recognition of Jubilee Auxiliaries (Whiteflat, Flomot, Liberty, Vigo Park, Wayside, Halfway, Aiken, Cone) and Jubilee Numbers.  
Special district representative for "Voice," Mrs. Ella Johnson, Floydada.

**Friday, 1:30 p. m.**

Fellowship groups for the perpetuation of the Spiritual Cultivation—Mrs. Jake Griffith, Lockney.  
How to do our full part for the children, Mrs. R. A. Metcalf, Slaton.

# Building Production of Dairy Herd Important, Experts Say

By T. W. Gullikson, University of Minnesota, in The Dairy Farmer.

Building up and maintaining the production of the dairy herd is a problem that constantly confronts every dairy farmer. The herd is undergoing changes all the time, and new individuals brought in to take their places, all of which keeps the problem alive.

It is estimated that on the average the entire dairy herd must be replaced once in every five years. Under these conditions it is appar-

ent that the proper selection of all animals brought into the herd is of the greatest importance if production is to be increased or even maintained.

The plan to follow in selecting animals for the herd will depend to some extent on the purpose for which the herd is being kept. A practical plan and one followed by most dairy farmers is to develop the future herd cows from the herd. The chief advantage of this plan is that it eliminates the danger of introducing disease into the

herd which is likely to occur when cattle are purchased. It also involves the use of less money and is for this reason the only plan that can be followed by some. However, it requires considerably more time to build up a herd by this method than if desirable animals are purchased. Also, this plan does not insure that the producing ability of the herd will be increased to any great extent, or even maintained.

That this is true is shown by the fact that, under present conditions, not more than two out of three cows are worth keeping. In many herds the percentage of culls is even greater. Some method of finding these undesirable individuals so that they may be eliminated must be followed.

Selection on the basis of type or looks is the plan most commonly followed. That "looks are often deceiving" in a dairy cow is a fact well known to experienced dairymen. This method of selection should be followed only when no other can be used and when the dairyman himself is a competent judge of dairy cattle. Really good cows may be selected from the very inferior ones by this method, but where animals are near the same ability, errors in judgment frequently occur. The only satisfactory method of selecting an animal is on the basis of what it is able to do rather than upon personal judgment and opinion.

To make it possible to select animals according to their producing ability, records must be kept of each animal in the herd. Anyone who has never tried to do this might consider it a difficult task, but it is not. All that is necessary is to record the weight of the milk produced by each cow at every milking and testing it for butterfat once every month. At the end of the year the production of each animal may be totaled and the unprofitable individuals detected and discarded.

This is a simple task and one which any dairy farmer can easily carry out for himself if he desires. However, like other simple jobs, it is a plan seldom used in the selection of the individual.

Fortunately, a practical method of keeping these records is available to dairy farmers in the form of the dairy herd improvement association. This is an organization made up of 25 or more farmers who unite in hiring a man to weigh and test the milk, and keep the feed costs and production records of their herds. This man, known as the tester, spends a day every month on each farm, where he weighs and tests milk from each cow in the herd and from this date calculates the amount of milk and butterfat produced during the month and its value at the market price. He also keeps a record of the feed consumed by each cow, computes its value and subtracts this from the value of the product produced. In this way the owner is enabled to make his selections on the basis of production.

Detecting and eliminating the unprofitable producers from the herd will not alone build up the production of the dairy herd. Producing ability is inherited and can only be brought into the herd by getting animals which possess such qualities. The most simple and perhaps also the least expensive way in which this may be done is thru the use of a bred-for-production sire.

Numerous examples of improvement in a herd following the adoption of this practice could be given. Perhaps one of the most striking is to be found in the dairy herd owned by the Minnesota Branch Experiment Station at Grand Rapids. In 1905 a group of cows of native and mixed blood was purchased as a foundation herd. The average production of the original herd was 196 pounds of butterfat yearly. Ten years later a herd of 41 cows averaged 280 pounds. By culling to 27 animals the average

production was brought up to three years later to 358 pounds. This indicates the influence of the sire in helping to build up production of the herd, and emphasizes the importance of extreme care in making a selection.

The care required in selecting a sire will depend somewhat on the present quality of the herd. Any one who is planning to build up a herd from common cows must first decide upon the breed before buying his first purebred bull, and it should be emphasized that a purebred bull must always be used if one expects to make progress in building up a herd. For such a herd, and even in a fairly well-developed grade herd, the bull is best selected upon his pedigree and the production of the bull's ancestry with some attention given to breed type. The experienced breeder usually has given some attention to the matter of interpreting pedigrees. The man unfamiliar with pedigrees had better secure someone with such knowledge to help him in the selection of his herd sire.

It should be emphasized that an excellent pedigree is not a guarantee that a sire will transmit high-producing ability to his offspring. In general, however, a background of good ancestors should be considered as fair evidence of his ability and probable value. When an old and proven sire is selected, the producing ability of his daughters should receive first consideration. Uniformly good or medium production on the part of all of his daughters is more desirable than exceptional production in one or two of them with the others very low or ordinary. The pedigree of such a sire is second in importance. Desirable proven sires are usually hard to find and still harder to buy at any price. For this reason, most dairy farmers must be content to select their herd sire by pedigree and type and when this is done properly the results are usually satisfactory.

### NEARLY TWO-THIRDS OF WORLD'S TELEPHONES IN U. S.

At the close of 1928 there were approximately 19,380,000 telephones in the United States, of which about 3,500,000 were dial telephones, according to Stanley R. Edwards, editor of Telephone, a telephone trade magazine. All of these have long-distance connection except about 160,000 on independent lines not connected with Bell long-distance service.

There are now approximately 31,500,000 telephones in all of the United States are manned by about 400,000 men and women. During 1928, it is estimated that new private branch exchanges were installed employing about 15,000 operators. In the Bell System alone there are now approximately 125,000 private branch exchanges in service, through which are connected 2,700,000 telephones.

During 1928 the average number of telephone conversations was 76,000,000 daily, of which more than 3,000,000 a day were toll conversations.

The Bell System spent approximately \$430,000,000 in 1928 for new construction and improvements of its property. It now has more than 200,000 miles of carrier channel in operation on long toll routes.

### CONTEST AIM TO DEVELOP BETTER LOCAL RURAL NEWS

College Station—As an aid to county and home demonstration agents in gathering and writing constructive news of farm and home demonstrations for their local newspapers, and Extension News Writing Contest is announced by W. H. Darrow, editor of the Extension Service. The contest is to begin August 1st and last one year, during which time the contestants will be given various aids from headquarters designed to sharpen

the nose for news. Exhibits of printed material in the six classes of competition will be made at A. and M. College in the summer of 1930 and judged by a group of editors.

The contest is a recognition of the local newspaper as an important medium extending the results of demonstrations to the entire rural public. The Extension Service is encouraging the closest

co-operation between its agents and newspapers, not for the sake of self-seeking publicity, but to make demonstration work effective on more farms and in more homes.

## Its style is the first indication of its big car qualities

One look at the New Pontiac Big Six and you know that here is something different in low-priced motor cars. It has the proportions, the rakish lines and the style of a fine big automobile. And this is only the first indication of its many splendid big car qualities with which it is endowed.

Prices \$745 to \$895, f. o. b. Pontiac, Michigan, plus delivery charges. Bumpers, spring covers and Loewjoy shock absorbers regular equipment at slight extra cost. General Motors Time Payment Plan available at minimum rate.

Consider the delivered price as well as the list price when comparing automobile values . . . Oakland-Pontiac delivered prices include only reasonable charges for delivery and financing.

## An Investment That Pays Big!

HERE'S AN INVESTMENT that pays good dividends. It's the Case E-B Great Plains Disk Plow—a new tillage tool that cuts costs and increases yields in a way you'd hardly believe possible.

Plowing is the most expensive operation of all in the growing of small grain—but with the Great Plains Disk Plow you can cover from 2 to 3 times the acreage a day with the same tractor you now have and get a better, higher yielding seeded.

There's a real investment—you decrease costs and increase yields. And you keep it up year after year with this strongly-built, new type plow that thousands of farmers are using.

Exceptionally easy to operate and with many distinctive features you'll appreciate. Come in today and see the Case E-B Great Plains. High class service all the time.

## Middle Life Troubles

"ABOUT twenty years ago, my health was very bad," says Mrs. Mat Howard, of Terrell, Texas.

"I was passing through a critical time in my life, and I suffered a great deal. I was not at all strong, and my nerves got all upset. I had hot flashes, and sometimes would get suddenly so faint I could not stand up. My head would whirl, and I could not see a thing. I would have to lie down for hours at a time."

"I improved so much after I had taken Cardui for a while. I continued the medicine for some months, until I had passed the critical period. Since then, I have given Cardui to my five daughters. All of them have continued the use of Cardui in their homes. We have all been better for having taken it."

## Ahead of the Parade

EVERY industry—every group of competitive products has a leader . . . one outstanding product which assumes first place by sheer merit.

DIAMOND "SEVEN-SIXTY" is such a product among motor oils. It is in a class by itself . . . without real competition . . . ahead of the parade.

It is the first oil on the market to be 100% heat resisting and evaporation loss is the big problem today in lubricants. The high speed, high compression motor has created a need for different and better oils.

DIAMOND "SEVEN-SIXTY" is a selected 100% paraffin base lubricant—tough, durable, smooth, pure and clear. All these are important features . . . every good oil must have them. But in addition, DIAMOND "SEVEN-SIXTY" is practically non-evaporating. It is tested to 760° F. and even at this terrific heat, evaporation loss is negligible.

DIAMOND "SEVEN-SIXTY" offers you a new degree of motoring satisfaction . . . of motor performance . . . of safety . . . and economy.

**REFRIGERATOR INSTALLED AT MANASCO'S CAFE**

An "Electrolux" gas burning refrigerator was installed Wednesday at the Texas Cafe by B. F. Manasco. The refrigerator was purchased from the Panhandle Gas Refrigerating Company of Amarillo and was installed by Leonard Sharp, representative.

The Electrolux freezes by heat. It has an automatic water and gas control and all parts are hermetically sealed and because of this claims are it can not wear out.

Containing eighteen feet of shelving space, it is large enough to take care of all present needs of the cafe. Mr. Manasco said. He expects to keep on hand a larger variety of meats and other foods.

**Locals and Personals**

Mrs. Ida M. Hicks of Abilene is here for a visit with her son, Dr. I. W. Hicks and family.

Mr. and Mrs. Lon M. Davis went to Canyon Wednesday where they will visit until Sunday with her parents, Mr. and Mrs. Henry Bradford.

W. E. Douglas, of Sunset, Montague County, spent last week-end in this city on business. Mr. Douglas is a large property owner in Floydada.

Dr. Hubert Seale and his mother, Mrs. J. A. Seale of Denver, Colorado, are in Floydada this week on business and are visiting Dr. Lon and Dr. George Smith and other old friends. They are former residents of Floyd County. Dr. Seale is with the veterans hospital at Denver and will receive his commission as Captain in June.

Mrs. E. L. Angus and Miss Virginia Lewis spent Wednesday in Plainview.

Mrs. Arthur Savage and son, Kyle and Mrs. Frank Moore and son, Jo Dick, and Miss Kathleen Snodgrass returned Thursday from a visit with relatives in Amarillo.

**Automobile Contest**

For Boys and Girls Up to 18 Years.

FIRST PRIZE \$35.00 Automobile—To the one getting the greatest number of votes.

# THE FLOYD COUNTY HESPERIAN

VOLUME 36

FLOYDADA, FLOYD COUNTY, TEXAS, THURSDAY, MAY 23, 1929.

NUMBER 13

## Opening of Floydada Creamery Set For Saturday of This Week

### Plan To Manufacture Butter During The Day

### Are Hoping For Liberal Share Of Cream Business, Angus Says.

An insight into the workings of a modern butter-making establishment will be given cream producers and others of Floyd County who take advantage of the invitation extended by the Floydada Creamery to visit the plant on Inspection Day—Saturday, May 25, when the formal opening of the new plant on Wall Street, near the southeast corner of the square, is held.

**Invitation Is General**  
The invitation to visit the plant is extended to the general public, but cream producers of the county especially are invited to be present and get first-hand information on the manner in which the cream which comes from their herds, is handled after it reaches the manufacturer, E. L. Angus, manager said this week.

"We'll be mighty glad to have everybody who is interested to come and see us on that day, and inspect the plant," Mr. Angus said. "We plan to have light refreshments and make it as pleasant as we can for all who visit us."

"We hope to make the establishment a worth-while business institution in the community," he continued. "And while we don't expect to get all the business, we are hoping for a liberal share of the cream production of the section and will be glad to have all persons interested in the cream business, whether or not they are customers, or expect to be customers of ours, to be with us and look over the plant."

The plant was tuned up for the first time the first of this week, and while workmen have been busy making adjustments and last-minute installations and fittings, it has been receiving cream during the week and will manufacture and run into the refrigerating department at least one churning of cream during the day Saturday, according to the plans being made. Thus the

## Begin Manufacture of Butter in New Plant Floydada Creamery

visitor will have the opportunity of seeing the raw cream come in at the front door and go through the processes of pasteurizing, churning and finally into the tubs and into the refrigerator.

Associated with Mr. Angus in the conduct of the business will be Oscar Penland, who will have charge of the manufacturing processes. Mr. Angus will be manager and will handle the business of the concern with the public.

Several local men are interested in the project, which is admittedly an experimental line for this territory. Walter Fuller and Robt. L. Brock, Lawton, Oklahoma, cream manufacturers are also interested in the business, having become convinced of the possibilities of cream production in this section when they were induced to visit this section shortly after the first of the year.

### Federal-Accredited T. B. Test For Jerseys

Distinction Comes to Local Herd of Being First in Floyd County.

The distinction of having the first herd of Floyd County purebred cattle to hold a federal-accredited tubercular test, falls to the lot of O. L. Stansell, of Floydada, who the latter part of last week received a certificate giving his entire herd credit for being free of tuberculosis. The certificate was received following a visit of Dr. Covington, State Veterinarian, who made the last test, completing the official inspection of the cattle. None of the herd were found to be infected.

O. L. Stansell, proprietor of the herd of purebred Jerseys, pointed out the desirability of such tests in an interview given a reporter for the Hesperian this week. Testing for definite information as to production of butterfat and for freedom from tuberculosis are essential and invaluable and can be worked out to the point where neither will be more expensive than the dairy breeder or raiser can afford, Mr. Stansell said. The inspections and tests for tuberculosis among dairy cattle is especially desirable and essential for the purposes of sanitation and the protection of the health of the public.

### 'To Be Better Looking' Is Slogan of 4-H Club Girls

College Station, May 20.—A peck of garden stuff and a quart of milk is the recipe for becoming beautiful given to Texas 4-H club girls by Mrs. Dora R. Barnes, clothing specialist in the Extension Service. Asked what this has to do with clothing work, Mrs. Barnes replied, "You must have a good looking clothes rack if you want clothes to look well. The slogan in club work this year is 'to be better looking' but we can't make clothes 'do their stuff' for girls with bad complexion and poor posture."

"Complexion and posture come with health, and that comes from right diet, hence the recipe. To be an all-around good looking girl she must develop physically, mentally, morally and spiritually. It may sound funny but there is the foundation for good dress, and that is one reason why home demonstration agents are getting the girls to grow garden plots; to properly can and cook the products; and to learn

### Floyd Falling Behind

Dr. Covington, the state veterinarian who made the inspection and test of the Stansell herd is spending this week in Hale County, where more than two hundred herds are being inspected and tested, the Hale County dairymen having in mind a goal not far distant of not a herd of dairy cattle in the county that is not certified free of tuberculosis, and federally-accredited. Where that great number of dairy breeders become interested in the tuberculosis tests the work of ridding a county of tuberculosis cattle is made much easier, economically and otherwise. Floyd County is falling behind in this respect, the lack of a county agent or similar agency through which the workings of the federal department of agriculture and extension work of A. & M. College can be brought actively to the attention of farmers, being sorely felt. Only a few herd breeders in this county have expressed an in-

terest in the tuberculosis tests, Mr. Stansell said, probably because of lack of information on the subject.

It is another instance of paying for something you're not getting.

Protracted meeting close at Sand Hill Sunday night. Sixteen new members were added to the Baptist Church membership roll at Sand Hill at the close Sunday night of two weeks protracted meeting held in that community by Rev. G. W. Tubbs, pastor. He was assisted in the services by R. E. Bost, association missionary.

"Twenty-one new members have been added to the church within the past month," Rev. Tubbs said, "five having been added preceding the meeting."

Services were dismissed Friday and Saturday following the heavy rains.

### Sacred Harp Singing At Crosbyton July 7

From The Crosbyton Review:

The West Texas State Convention of the Old Sacred Harp songs, will be held in Crosbyton on the first Sunday in July beginning on Saturday before the first.

Large crowds always attend these Old Sacred Harp Singers. It would be of interest, perhaps, especially to the younger generations, to know that the sacred harp music has only four notes and most of this music was written in the seventeenth century. It is extremely interesting to those who sing it, and equally so to those who listen. This convention will be held at the Primitive Baptist church if the room will be sufficient, otherwise some other place will have to be secured for the occasion.

### HEALTH EXAMS GIVEN 133 CHILDREN HERE LAST WEEK

Physical examinations were given to 133 children of pre-school age at the first summer round-up held in Floydada last Tuesday and Wednesday, sponsored by the local Parent-Teacher Associations.

Miss Julia Moore, state itinerant nurse, conducted the examinations. Her services are being given by Dr. J. C. Anderson, State health officer, to the counties that do not have a county nurse. In this way the state health department expects to correct a number of common defects of school children. A follow up committee will be formed from the P. T. A.s and each one of these women will "adopt" during the summer six or more of the children needing physical corrections and try to get them physically ready to enter school in the fall. Another round-up will be held before school starts.

Miss Moore held similar examinations at Aiken Monday, and at South Plains Tuesday.

### SKILL REQUIRED IN FAT-TENING BEEF CALVES

Because of the higher price of beef, smaller families, and a smaller proportion of the population doing heavy manual labor in recent years as compared with former years, the consumer is demanding lighter weight cuts of beef. Cattle breeders and feeders have been gradually adjusting their operations to meet this big change. Instead of feeding the heavier type of heaves commonly marketed 40 years ago at 4 or 5 years of age, they are now feeding calves and yearlings and marketing them when they weigh from 700 to 1,200 pounds. On account of the tendency of calves to grow rather than to fatten, more skill is required to fatten them within a reasonable time than is necessary in the case of older cattle.

### DISTRICT WESTERN UNION MANAGER VISITS FLOYDADA

Boone Jenkins, of Amarillo, District Manager for Western Union Telegraph Company, was among the representatives of public service companies who visited Floydada last week.

Mr. Jenkins called on a number of the customers of the company here to get first-hand information on the service being given and their needs in connection with his company's services.

Read the Hesperian \$1.50 per year.

### What Becomes Of The Creamery Buttermilk?

"What becomes of the buttermilk that comes off with one of these big churnings?" asked the reporter of Oscar Penland, buttermilk maker at the Floydada Creamery this week. And he was shown a convenient faucet that could be turned to put the buttermilk into the sewer lines mightily quick if there were no takers present when it came time to take the butter out of the churn.

One plan followed by creameries in the disposal of the buttermilk is to maintain a herd of hogs where the buttermilk is fed as a part of the ration, balanced with other feeds. Another plan is to sell the buttermilk to hog raisers who contract for it in such quantities as they may demand.

If none of these develop, it is impractical for the creamery not to support a herd of hogs on a farm sufficiently close to justify hauling it and feeding, and if there are no takers on a commercial basis, the milk goes into the sewer, because the buttermilk from a creamery is gotten out of the house on quick-step time to prevent odors or bacteria from affecting the cream and butter in the factory.

### PROTRACTED MEETING CLOSE AT SAND HILL SUNDAY NIGHT

Sixteen new members were added to the Baptist Church membership roll at Sand Hill at the close Sunday night of two weeks protracted meeting held in that community by Rev. G. W. Tubbs, pastor. He was assisted in the services by R. E. Bost, association missionary.

"Twenty-one new members have been added to the church within the past month," Rev. Tubbs said, "five having been added preceding the meeting."

Services were dismissed Friday and Saturday following the heavy rains.

### PATTY LOOPER TO SING AT RECITAL IN PLAINVIEW

Patty Looper, daughter of Mr. and Mrs. C. P. Looper, of this city, will sing for the Tom Thumb Wedding feature of a kindergarten recital to be given by the pupils of Mrs. Virgil B. Rogers of Plainview tonight at the City Auditorium.

Patty will also appear in two costume numbers of the evening's program, it is announced.

### Over-Production Not Seen In Dairy Line

Over-production, that bugaboo of industry and enterprise in all lines, is not foreseen at least in the immediate future, by Robt. L. Brock, of Lawton, Oklahoma, who is a director in the affairs of the Floydada Creamery, which is this week being put into operation.

In fact, there is a lively demand for butterfat at present, and unless producers of cream increase their output to a point not now even indicated by conditions, the demand will keep up and the markets of the country will consume all the offerings of butter and other dairy products, is Mr. Brock's opinion. He is actively engaged in the sale of butter every week and keeps in close touch with conditions in the industry.

### SAVAGE VISITS FLOYDADA

F. E. Savage, former superintendent of the Floydada Public Schools, and now head of the History Department of West Texas State Teachers College at Canyon, visited for a short time Thursday last in Floydada, renewing acquaintances. He was in company with Rev. C. E. Jameson pastor of the First Methodist Church of Canyon.

They were on a tour of the cities and towns of half a dozen counties on the Denver and Frisco lines.

Read The Hesperian for the news of Floyd County.

### Up-To-Date Equipment Assures Good Product

Capacity Exceeds Million Pounds of Butter Per Year.

The announcement that Floydada Creamery this week will begin the manufacture of butter at their new plant on South Wall Street, near the southeast corner of the square, brings to consummation the beginning of a local industry that was only dreamed of a short three years ago as a possibility of a far-distant future.

### Plant Thoroughly Modern

The new establishment which was opened for business Wednesday, and at which the public is invited to visit Saturday, May 25, for inspection, is made up of the most modern units for the manufacture of butter that has been possible to devise to date, according to the men who are responsible for its establishment.

From the time the cream enters the door, where it will be tested and handled in the same manner as at other cream handling stations, to the time it comes out of the churn and goes into the refrigerator, it will be passing through various stages of manufacture in chimes, heating, cooling and other devices, such as are found in the better creameries of the country. And while the plant is not large as creameries elsewhere, it has a capacity far in excess of demands or probable future demands. It will handle, should patronage develop, four million pounds of butter daily, considerably in excess of the present annual output. (Continued on back)

## Dairying ... for profit

We are glad that a creamery has been added to the list of industries in Floyd County. We believe that it will help to foster dairying, one of the most profitable enterprises for any county.

The chief factors in successful dairying are high production and economic maintenance. Unscientific, haphazard methods will not do in this modern age. An essential factor in the management of the dairy herd is that of proper ventilation of the barn. Dairy cattle need an abundance of good pure air at all times. All barns should be provided with a working ventilation system.

Just as important as housing comes fencing. Liberal use of good farm fence, small fields, frequently changed pastures contribute to the profit. For your dairy building needs come to—

## Higginbotham-Bartlett Co.

"Everything to Build Anything"

## To Our Customers and Friends:

With the opening of the new creamery, the farmers of this community will have an opportunity of an exceptionally good local market for their milk and cream.

Dairying is not new to the community of Floydada, yet it can be developed so that the revenue from this industry will be greatly increased.

You have probably noticed that dairying regions are prosperous. The steady income, week in and week out during the whole year enables farmers to make improvements, to enlarge bank accounts, and to make new investments.

We congratulate and wish the best of success to our local men who are responsible for establishing this new creamery.

## Petersburg High Given Four And Half Credits

Petersburg, Texas, May 20.—Word has been received here from the state department of education that Petersburg High School has won this year two additional credits in English and two and one-half credits in history. These credits were granted by the department without the usual material being furnished, but were given on the recommendation of the state inspector after inspecting the material on hand. This places the Petersburg High School on the top notch in English and within one-half credit of the top in history.

## Blanco News

Blanco, May 21.—We had from 3 to 4 inches of rain Friday which put water in the lakes. We have been very fortunate not to get any hail.

Several from this community attended the Mother's Day program at McCoy Sunday night.

Our school program last Wednesday and Thursday nights were well attended and everyone enjoyed it very much.

Mr. and Mrs. Williams left Saturday for Hillsboro where they will spend a few days with his parents before entering school at Denton.

Mrs. Will Snell returned home from Turnersville Wednesday where she has been visiting her mother.

Mr. and Mrs. Bennett of Providence visited her mother Mrs. Wright the latter part of last week. J. H. Prater of Fort Worth is visiting his nephew, W. F. Daniel.

Mrs. Williams of Plainview spent last week with her sister, Mrs. Gilbreath. Mrs. Gilbreath and family accompanied Mrs. Williams home Sunday and spent the day.

Mr. and Mrs. G. R. Smith spent Sunday with Mrs. Mike Smith of Sand Hill.

Miss Ruby Farley who graduated from Lockney high school returned home Saturday.

J. M. Gamblin and family of Floydada and Mr. and Mrs. Will Simpson of Plainview visited Mr. and Mrs. Ham Smith Sunday.

Miss Johnnie Christian who has been teaching at Memphis returned home Saturday to spend the summer with her parents, Mr. and Mrs. J. D. Christian.

Mr. and Mrs. Lewis spent Sunday with Mr. and Mrs. Benn Gullion of Floydada.

Mr. and Mrs. L. C. Wheeler entertained the young folks with a party Saturday night.

Clyde Snell and Irene Cates who have been attending school at Floydada came home last week.

Rev. and Mrs. Matt Harder of Cone spent Sunday with Mr. and Mrs. D. R. Badgett.

Miss Ada Pope of Sand Hill spent Sunday with Miss Ruby Farley.

T. L. Brown and son Bely spent Sunday in Lubbock.

Mr. and Mrs. Earl Rodgers visited her father, Tom Millican of Acuff Thursday.

Mr. and Mrs. O. T. Johnes of Floydada spent Thursday night with Mr. and Mrs. Snell.

Mrs. Henry of Wellington spent the week end with her brother, Harry Christian. Mr. Henry and Mrs. Christian made a business trip to Lubbock Monday.

We are glad to report Mrs. Horace Simpson improving. She is still in the sanitarium.

Mrs. W. F. Farley left Monday evening for Asher, Oklahoma, to spend a month or two with her mother, Mrs. Davis.

## Mayview News

Mayview, May 21.—A good crowd attended Sunday School last Sunday, 69 being present. An interesting lesson was discussed. Allen Peacock resigned as superintendent

## Popular Dairyman

O. L. Stansell

of Floydada, who is president of the Panhandle-Plains Dairy Show and who is also a director of the Texas Jersey Club. Mr. Stansell is one of the largest breeders of registered Jersey cattle in this section of the state. Figures recently compiled show that the Texas Jersey Club lead all states in the union in the number of transfers and Floyd County has a singular honor of having Mr. Stansell as a director of this organization.

and Lloyd Readhimer filled his place.

A large crowd attended the South Side Singing Convention which was held at Dougherty Sunday. Everyone enjoyed the singing very much.

Miss Grace Readhimer spent Sunday with Miss Lorain Spence of Dougherty.

Mr. and Mrs. T. J. Campbell took dinner with Mr. and Mrs. R. W. Lotspeich Sunday.

Miss Roblue Lotspeich took dinner with Miss Ophelia Bartlett Sunday.

Stokes Campbell spent Sunday with Lloyd Readhimer.

Mr. and Mrs. Heard, Mr. and Mrs. W. W. Emert and Mrs. Heard's son all took dinner with Mr. and Mrs. V. A. Readhimer Sunday.

Rev. V. Bartlett spent Sunday in Dougherty with Cecil Spence.

Mr. and Mrs. T. J. Campbell and Mr. and Mrs. R. W. Lotspeich spent Sunday afternoon with Mr. and Mrs. H. E. Edwards.

Miss Roblue Lotspeich spent most of last week with her sister, Mrs. Cecil Payne.

(Too late for last week)

Mayview, May 12.—Sunday School and church were both rained out Sunday but we are more than glad to have the nice rain on the wheat crops.

The Mother's Day program was postponed because of the rain.

Miss Roblue Lotspeich spent Thursday, Friday and Saturday of last week with her sister, Mrs. Cecil Payne of Center.

Several of the neighbors attended the ball game at Dougherty Friday afternoon.

Mrs. C. E. Bartlett and Ophelia spent Monday morning with Mrs. Arthur Kreis.

Norman Payne spent a week with his parents, Mr. and Mrs. W. W. Payne. He is attending National Business College in Abilene.

Miss Ophelia Bartlett spent Sunday afternoon with Miss Luella Lincoln.

## JACK RABBITS CAUSE BIG LOSSES TO U. S. FARMERS

Preliminary experiments conducted in Arizona by the Biological Survey of the United States Department of Agriculture as to the quantity of food consumed by jack rabbits have thrown some light on the question of how much damage may be caused by these injurious rodents. These studies indicate that on the average a jack rabbit will consume 0.68 pounds of green alfalfa a day. According to the Arizona Agricultural Experiment Station, a 120-pound ewe sheep will consume approximately 8 pounds of green feed a day. Hence, it would take the equivalent of only 11.8 jack rabbits to consume as much green forage as a sheep. A 750-pound cow will eat 40 pounds of green roughage in a day. Therefore, the equivalent of 58.8 jack rabbits would consume as much feed as a cow.

The average quantity of dry feed or alfalfa hay consumed by a jack rabbit was 0.28 pounds a day. A 120-pound ewe sheep will eat approximately 4 pounds of dry feed in a day; consequently, 14.2 jack rabbits would consume as much a day as a sheep. The consumption of a 750-pound cow is approximately 20 pounds of dry feed a day. According to that, it would take the equivalent of 71.4 jack rabbits to sume as much dry feed as a cow.

## HOW TO PUT UP EGGS FOR USE NEXT WINTER

The U. S. Department of Agriculture advises farmers that now is a good time to put up eggs for use next fall and winter, when they will be worth more than twice as much as they are now, and tells how to put them up so they will be as good then as they are now.

Follow these instructions: "Dissolve two or three pounds of unslacked lime in five gallons of boiled water; allow it to settle, drain it off and use the clear liquid. Put the eggs and lime water in earthen crocks, and not in galvanized pails or cans, and keep in a cool place but not in freezing temperature."

Advice from the U. S. Department of agriculture on matters of this kind may be relied upon. What is said is based on experience.

A. D. White left Tuesday on a business trip to Post. He will probably be gone two weeks.

## SUGAR CONSUMPTION IN UNITED STATES IS 110 POUNDS PER CAPITA

Sugar consumption in the United States has generally tended upward since 1909, says the United States Department of Agriculture. The peak seems to have been reached in 1925. In that year the total-estimated raw sugar available for consumption reached 6,648,000 short tons, making a per capita consumption figures for the year of 114.4 lbs.

In 1926 and in 1927 both the total and the per capita consumption declined. For 1926 the per capita consumption figures was 110.6 pounds, and in 1927, 110.1 pounds. Figures for 1928 are not yet available.

World consumption of all raw sugar in the year ending August 30, 1928, according to an Austrian estimate was 28,375,000 short tons, or 4.8 per cent more than in the corresponding sugar year of 1926-27, and 21.1 per cent greater than in 1923-24. The gain is largely attributed to increased consumption in Europe, where both production and imports have advanced. Europe's total consumption in 1927-28 was 49.6 per cent greater than in 1923-24. Small increases took place in Asia, and Austria. Sugar consumption in North and South America during this period expanded in a considerably smaller degree.

The largest power press in the Ford industries, outside the frame presses for the Model A automobile, is used to shape fenders, wheel housings and radiator shells at the Lincoln automobile plant. It weighs 250,000 pounds and stands 24 feet 10 inches above the floor line. Three feet of the structure extend below the floor level and it has a foundation 11 feet 9 inches deep.

In line with the activity of the Ford Motor Company to stimulate interest in aviation, the Rapids Motor Company, Ford dealers of Dell Rapids, South Dakota, own and operate a government licensed airplane landing field, equipped with the latest power night-landing lights.

Mrs. H. L. Braly and two daughters of Shamrock were recent visitors in the homes of her brother and sister, T. S. Stevenson, and Mrs. Kenneth Bain.

No. 291875, one year old on March 5, 1929, Junior Champion at the Second Annual Panhandle-Plains Dairy Show. We invite you to inspect this animal, as well as our herd bull.

We are glad to see the Floydada Creamery get under way, because we believe it will be a great aid to the dairy producers and raisers of Floyd County.

## O. L. Stansell

Breeder of Purebred Jersey Cattle  
Floydada, Texas

WE ARE GLAD TO HAVE THE NEW—

## CREAMERY

in Floydada. We believe it will mean a new source of industrial development in Floyd County.

Profits are of great importance on all dairy farms. Every progressive dairy farmer realizes this and welcomes all machines and equipment which lighten the work and yet make more money for the owner. Massey-Harris cream separators do this. Every day they give steady efficient service and save money for the owner. Every machine is tested and must skim to less than 2/100 of 1% before it leaves the factory.

The guarantee of Massey-Harris, an organization which reaches nearly every part of the civilized world, with an enviable record extending over many years, is your protection when you buy a Massey-Harris Cream Separator.

You will be interested in one of the six sizes.

## 1922 Study Club Holds Last Meeting of Year.

Mrs. J. M. Willson and Mrs. J. C. Gilliam were joint hostesses at the last meeting of the year of the 1922 Study Club Thursday afternoon, May 16 at the home of Mrs. Willson.

As the guests entered the house they were served with delicious fruit punch by Mrs. W. A. Baker and Miss Ruth Baker.

Each member had invited a guest and roll call was answered by introducing the guests. "Bible and Sacred Songs" was the subject of study. Scripture reading was given by Mrs. Kenneth Bain. A "sing-song" of the old sacred song favorites was led by Mrs. E. L. Angus.

Mrs. Wilson Kimble gave an interesting paper, a short sketch of religious song writers. Mrs. J. C. Gilliam led a round table discussion on "Sacred songs that impressed me as a Child."

A business session was held and a vote of thanks was given Mrs. George Linder, retiring president for her wonderful leadership of the club for the past two years.

Several new names were put on the waiting list. Mrs. A. P. McKinnon was made an associate member of the club.

After adjournment a short social period was enjoyed and the hostesses served pineapple ice and angel food cake.

Visitors were: Mrs. J. C. Dickey

Mrs. Wm. McGehee, Mrs. E. F. Stovall, Mrs. J. S. Solomon, Mrs. P. M. Felton, Mrs. Champ Walters, Mrs. W. M. Colville, Mrs. G. V. Slaughter, Mrs. E. C. Henry, Mrs. W. M. Massie, Mrs. C. Surginer, Mrs. W. L. Boerner, Mrs. H. Collins, Mrs. W. A. Baker, Mrs. A. P. McKinnon, and three out-of-town visitors, Mrs. Ida M. Hicks, Abilene, Mrs. Joe Williams, Temple, and Mrs. Vern Nelson, Amarillo.

## P. T. A. Officers Honor Teachers With Dinner.

Officers of the East Ward Parent-Teacher Association surprised the teachers of the school with a chicken dinner at noon Wednesday of last week.

Places were laid for Mrs. A. H. Thornton, Mrs. Hazel Hughes, Miss Vera Hamilton, Miss Brownneyes Hawkins, Miss Eddythe Walker, Miss Fannie Bolding, Miss Louise Wright, teachers Mesdames C. R. Houston, Mat Jarboe, G. N. Shirey, Lon V. Smith, J. T. Howard, R. C. Officer, Frank Johnson, W. H. Scoggin, hostesses, and Mrs. S. E. Duncan a special guest.

## Council Honors Birthdays Of Two Members.

The Woman's Council of the First Christian Church met Monday afternoon at the home of Mrs. L. B. Fawver to honor the birthdays of Mrs. Lon M. Davis and Mrs. J. B.

Jenkins. Appropriate toasts were given to each of the honorees. Ice cream and cake were served to fifteen members.

The society will meet again Monday afternoon at the church at 3:30 o'clock.

## Dinner Honors Relatives On Birthdays.

Mrs. Autrey Sparks and brother-in-law, Horton Sparks, were honored with a surprise dinner on their birthdays, Sunday, May 19, by friends and relatives at the home of Mrs. Sparks, four miles south of Dougherty.

Those attending the dinner were Mr. and Mrs. Andrew Harbor and family; Mr. and Mrs. John Hopper and daughter, Laddelle; Mr. and Mrs. S. M. Crawford and family; Mrs. Mary A. Sparks and the honorees.

## M. E. Society Met Monday At Mrs. Baker's Home.

Mrs. W. A. Baker, Mrs. W. H. Alexander and Mrs. J. G. Wood were hostesses to the Woman's Missionary Society of the Methodist church at the regular monthly program and social meeting Monday afternoon at the home of Mrs. Baker.

The program on "Broken Homes" from their year book was observed, led by Mrs. E. B. Massie. Mrs. G. T. Palmer and Mrs. Wilson Kimble gave interesting discussions of the lesson. Ruth Palmer gave a reading.

Mrs. Lee and Mrs. Miner were guests at this meeting.

The Society will meet Monday afternoon at 3 o'clock at the church for the sixth and seventh lessons from their Bible study. Mrs. W. W. Porter will be leader.

## Mrs. Howard Club Hostess Thursday Afternoon.

Stitch and Chatter Club met Thursday afternoon with Mrs. John Howard as hostess. The club had as their visitors Mrs. J. Key Green and Mrs. J. D. Starks.

Sandwiches, cake, punch and mints were served to the following: Mrs. Edd Sparks, Mrs. John McCleskey, Mrs. W. H. Sharp, Mrs. Zell Probasco, Mrs. L. H. Dorrell, Mrs. M. L. Probasco, Miss Myrtle Meador and the hostess.

The club will meet this afternoon with Mrs. L. H. Dorrell.

## Mrs. Norman Hostess To New Study Club.

Mrs. E. L. Norman was hostess to the 1929 Study Club Thursday afternoon, May 16. The afternoon was spent in discussion of the yearbook and their preparation.

After the business session delightful refreshments were served to the club members. New members present were Mrs. J. G. Martin and Mrs. O. Stephens.

The next meeting of the club will be at the Baptist church Thursday, May 23 at 3:45 o'clock. At this time a memorial day program will be given.

## Cedar News

Center, May 21.—I can't speak for all of Floyd County but this part of the county has a real good season in the ground. We have had at least seven inches of rainfall during the past week.

There was a large attendance at Sunday School Sunday.

Mr. and Mrs. C. O. Spence and sons; Mr. and Mrs. Veach and children were guests of Mrs. Montgomery and children at dinner Sunday. They all went to Dougherty to sing in the afternoon.

G. H. Jackson and family and Mr. and Mrs. A. A. Tubbs attended the singing at Dougherty Sunday.

Mr. and Mrs. Mathews and children, Mr. and Mrs. Kirk and children were guests at dinner Sunday of Mr. and Mrs. T. J. Gill.

Donovan and Miss Doris Spence were our graduates from Floydada High School this year. They braved the mud and water to be present at the exercises Friday night.

Mrs. Dennis had bad luck with her chickens during the rain. The water got up in the coops so bad they put all of the chickens in the cellar, when they went to see about them later, the water had broken into the cellar and filled it full, drowning all of the chickens, floating the incubator, a mattress, some quilts and other things stored in the cellar.

Mr. and Mrs. J. Q. Carpenter had a reunion of most of their children at the family home here last Sunday. Their children from Floyd County, Ralls and Mr. and Mrs. Fred Cone and children, of Wichita Falls were present.

Miss Alina Goodman spent Sunday with Mr. and Mrs. David Caruthers.

Rev. and Mrs. Bost were guests of Mr. and Mrs. W. B. Jordan at supper Monday evening.

Mr. and Mrs. McCuehan and children have been on the sick list during the past week.

Our school and the patrons all planned to go to the Canyon on the Massie place south of town for a picnic last Friday but it kept raining until the picnic had to be given up. We had a very successful school this year.

Our superintendent, O. S. Miller is retiring from the teaching business. Our intermediate teacher, Mr. J. W. Cole, will go to a large rural school near Post next year. Mrs. Irene Winters will remain with us. Mr. and Mrs. London who have been teaching on the North Plains, will be principal and intermediate teachers for another year.

Mrs. H. B. Mankin has been real sick but is improved at this time.

Mr. and Mrs. Webb have been visiting Mrs. Webb's parents, Mr. and Mrs. Dennis, for a few days.

Mrs. Gill visited Mrs. Cook last Tuesday.

Mrs. Fields spent Sunday with her daughter, Mrs. Sawyer.

Mr. Cole left Sunday for Crosby and Dickens counties. He expects to be back with us next Sunday and go on to his home sometime next week.

Next Sunday is our regular church day here. Everyone come both Saturday night and both services Sunday.

Mr. and Mrs. Marion Carpenter visited her parents, Mr. and Mrs. Bryant, of Sand Hill, Sunday. They went to singing at Dougherty in the afternoon.

## Hillcrest News

Hillcrest, May 20.—The program rendered Thursday night by the pupils and teachers of Hillcrest was enjoyed by a large crowd.

Miss Thelma Kinnard and Miss Enid Scoggin were visitors of Miss Ora Scoggin Thursday and Friday of last week.

Mr. and Mrs. J. L. Jones and children returned home Thursday afternoon from a visit with her parents at Memphis.

Mr. and Mrs. J. O. Dudley were visitors in Oklahoma City and Ft. Worth the past week.

The pupils of Hillcrest did not go on a picnic Friday because of the rain but the day was spent by playing games at the school.

## Campbell News

Campbell, May 21.—Our school will close Friday. Thursday night a program will be given by the primary and intermediate grades. Friday night a program will be given by the seventh, eighth and ninth grades, the title will be "Aaron Slick from Punkin Creek."

The characters for the play are as follows:

Aaron Slick, not as green as he looks—Truman Fuqua.

Mr. Wilburn Merridew, a crooked speculator—J. C. Powell.

Clarence Green, mysterious young man—Cloyde Hinkle.

Mrs. Rosa Berry, an Oklahoma widow—Louana Garner.

Glady May Merridew, a sweet young thing—Bernice Murray.

The girl in red—Rena Mae Lyles.

Little Sis Riggs, a regular Tom-boy—Opal Owens.

Mrs. A. D. Ryan, of Burkburnett, visited her daughter, Alta Gibson, the past week.

Mr. and Mrs. A. C. McNutt spent last week with relatives near Petersburg.

Several from this community attended the singing at Dougherty Sunday.

Mrs. John Buchanan, of Floydada spent Sunday with her parents, Mr. and Mrs. Garner.

Miss Mary Boner spent Sunday with Mr. and Mrs. Smith of Mayview community.

Mr. and Mrs. Walter Robertson visited Mr. and Mrs. Readhimer of the Mayview community Sunday.

The party given at the home of Mr. and Mrs. Keith Monday night was enjoyed by a large number of young folks. Ice cream and cake were served after the games were played. All reported a fine time.

## FUEL, NOT WATER, TO FURNISH POWER OF FUTURE—EDISON

"Every so often some one tells us that water power is to take the place of fuel as the dominant force in generating electricity. Visions of great hydroelectric plants, all over the nation, are conjured up, based on the theory that the coal supply, in the not distant future, will be exhausted, or that coal will be abandoned as an economic expediency for water power," says Thomas A. Edison in Nation's Business.

"Now the fact is that this country has merely scratched the surface of its coal deposits. The coal supply will last indefinitely. It is nothing to bother about.

"Another fact is that hydroelectric power will never supplant fuel as a generator, since water power, in order to be utilized to its greatest efficiency, is generally dependent upon operating in a network system, linked with fuel-burning plants.

"Developed water power today is but a small fraction of the power required in the country, the balance being essentially generated from fuel-burning plants. Approximately 80 per cent of the undeveloped water power of the country lies in the Rocky Mountains and in the Pacific Coast region. The large market for power, unfortunately, is east of the Mississippi. Great as have been the advances in transmission of electricity, the art has not yet reached a stage that makes it probable, or even possible, for electrical energy to be transmitted from the Pacific to the Atlantic.

"The charge has been made that when coal has been exhausted the country will be dependent upon water power alone. The coal mined

to date is less than one per cent of the available supply. On the other hand, the efficiency of coal utilization is low and has steadily increased with the development of the art to about 20 per cent, with the possibility of this going still higher. Water power now operates at over 90 per cent and has about reached perfection in its utilization.

"With the continued improvements in the burning of fuels yet to come to offset the increased power demands, the coal supply will carry us indefinitely into the future. Water power, then as now, will be quite in adequate to meet the demands for electric power, and posterity will have to develop other substitutes. But that is so far in the future that it is a matter of small concern today."

If depluming mites and lice infest the poultry flock at the same time, a treatment with the following dip will destroy both kinds of parasites. Make a solution of 3-4 ounce of sodium fluoride, 2 ounces of sulphur, 1-2 ounce of laundry soap, and 1 gallon of water, and dip the fowls. The dip should be kept stirred so as to keep the sulphur in suspension.

When pigs are five or six weeks old they need some protein feed. Shorts or middlings are fine for this purpose. They should be fed separately from the feeder and not mix with corn. Tankage or fish meal or old-process linseed meal may be used as a substitute for shorts or middlings.

The Hesperian \$1.50 per year.

**Methodist Circuit News**

The Mother's Day program which was to have been rendered at Dougherty last Sunday had to be postponed on account of the weather and was given at the school house Thursday night May 16 with a large and appreciative audience in attendance. Everyone seemed to have the spirit of the occasion and that greatest of all earthly friends, physicians, lovers, and soldiers was honored in a fitting and proper manner. Many eyes grew dim as the significance of the hour was borne in upon us as we recalled the days of long ago when hearts were free and light with the joy of living in the joyous hours of youth and childhood, and mother was the queen of our life. Numerous white roses were in evidence worn in memory of her who fought for us so long, and they were like the pure white lips of hope breathing assurances of an eternal life beyond the tomb. God bless our Mothers and preserve them for whom the red roses were worn. They are the ground work of civilization—the cornerstones of the free institutions of America. "She is a good man's paradise, the bad's first step to Heaven. She is a golden sentence written by our Maker of whom the angels love to discourse—whom only men know how to use and only Devils violate." She is the uncrowned queen of our south land, the hope of the nation, and the joy of the world.

**Pastor and Wife Pounded**

At the East Side Methodist Parsonage last Monday afternoon like angels on missions of good will came representatives of the splendid Lakeview community to remember the Pastor and family most substantially in terms of a whopping big bounding. They did not bring five and ten cent packages, but deluged us with flour, meal, bacon, sugar and etc., all in large quantities. Besides all this they brought home-canned fruit, vegetables, and the like until our eyes fairly bulged in contemplation. Brother R. H. Conway and daughter-in-law, Mrs. John Conway led in the movement and too much honour cannot be paid these faithful friends of the Kingdom of God. Such occasions and the splendid Christian spirit which dominates them cause us to take heart and thank such whole hearted people. Sometimes, like Elijah we get under the Juniper tree, but it is worth it when God's bounty is revealed to us. Elijah didn't have anything on us. He was fed by raven and we have been fed by the Lord for "Are they not all ministers?" But we would be like Elijah under the tree than to be like poor reconcilable Jonah with a vine growing over his head, because he could not have his out everything.

**Interview and Dougherty**

Church building at Fairview is up rapidly now and hastening completion. We have the aid of Mr. McDonald and Mr. who are pushing the work as rapidly as possible. It is going to be a beauty—"A thing of beauty is a joy forever," and soon we will have a new keeping house for the Lord

over at Fairview. Work will begin within a very few days over at Fairview. Work will begin within a few days on the basement at Dougherty. Steps have been taken to begin the excavation of the dirt next Monday morning. Owing to the continued rain it may be impossible to start so soon, but we have sufficient funds to insure the erection of it and it is no longer a doubtful proposition. The building is assured and soon the growing and thriving town of Dougherty will be graced by a place of worship. Contrary to the persistent effort of some to spread the rumor that we have abandoned the idea, we never were more determined to put it over than now. No, Sister, you ought not to talk that way. It is all wrong, for there is not now and never has been any foundation for any such report. We have never at any time considered giving up. We are not the giving up kind, and besides why should we give up, when we have just about enough money to pay the cash for what we have to have? No, Brother, you are all "wet" if you think we have quit. We have only commenced when we appear to be slackening in our efforts, we are merely pausing to get our "second wind," and strengthening our hold for the long glorious pull ahead. Don't talk that way about us any more, for there is no excuse for it. Blessed be God, we have no idea of retiring from the field until God is honoured by the consummation of this worthy enterprise.

A. D. Jameson, Pastor.

**MAN WITH AN IDEA**

The death of Briton Hadden, co-founder, editor and publisher of Time, removes one of the most promising young men that Yale has turned out since the war. Conceiving when still in College the idea of a weekly magazine that would merely summarize the news, he set out to prepare himself for his chosen work.

After spending eighteen months on a Baltimore and then on a New York Newspaper, he launched the enterprise. In the six years of its publication the magazine has grown rapidly, owing largely to his personality hard work and singleness of purpose.

Mr. Hadden's record is one that few men of 31 can touch. His example in determination, his organizing ability, his frankness and great personal charm won him a wide circle of friends and a not inconspicuous place in the broad field of journalism.

His life, in its achievements, remains as an example of the fruits that can be plucked by youth; his industry, his touch of genius and his character have added a novel chapter to the book of journalism. —New York Times.

**TOO STRICT**

Hector had become engaged to a school teacher. The wedding was fixed to take place within three months, and Hector's friends, after offering their congratulations, began to send presents along to them. It caused a big sensation, therefore, when the engagement was broken off a week before the event. "What on earth happened?" asked all his friends on learning the

news. "You must still love each other. You were so well suited." Hector shrugged his shoulders. "Perhaps we were," he said. "But, dash it, I can't be expected to marry a woman who wants me to bring her a written excuse from my mother when I don't happen to turn up for an appointment.—London Answers.

**HIGHER BUTTERFAT COWS NEED OF DAIRY INDUSTRY**

In an article by Victor H. Schoffelmayer in a recent issue of the Dallas News in which he was stressing the need of higher butterfat cows to further the Texas dairy industry, he said: "The average Texas farm cow is said to produce approximately 3,600 pounds of milk a year and about 135 pounds of butterfat. Manifestly such an animal will pay elsewhere. Since income from the farmer's milk comes chiefly from the sale of butterfat, and since it costs somewhere around \$50 a year to feed a cow, it will be seen that the average farm cow will not leave much profit above her cost of feed.

"There is the main trouble at present with any plans to develop a successful dairy industry. The cow population of the State not only must be increased but the types of farm cows now mostly kept must give way to more productive dairy animals. In place of the 135-pound cow Texas farms must be stocked with 300 and 400-pound cows which will assure a fair profit over cost of feed.

"The following table based on studies made by J. D. McDowell, dairy specialist of the United States

Bureau of Dairy Industry, who studied the records of some 42,000 cows in various states and some 3,000 herds in 96 cow-testing associations between 1910 and 1922, will prove the wisdom of the forgoing procedure:

(1)	(2)
109	\$ 12.48
154	27.90
202	42.45
251	57.82
298	73.34
347	89.67
396	105.07
446	124.85
493	135.30
543	143.80
600	157.87

(1) pounds of butterfat per year.  
(2) average income over cost of feed per year.

"The average feed cost per year of the cows studied by Mr. McDowell was \$52 a year. Butterfat prices averaged 44 cents a pound. A 330-pound cow gives more than four times as much income as a 160-pound cow and the 600-pound cow gives nearly six times as much. In this direction lies the success of dairying whether it be in Texas or in Missouri, Iowa or Wisconsin."

**SILVERTON BOY SAVES VALUABLE DAIRY COW**

J. D. Strickland, one of the future farmer club members, had an opportunity Sunday to apply his new knowledge in an emergency and demonstrate a case of the son leading the father.

Sunday morning the best cow in C. M. Strickland's dairy herd was discovered dangerously ill with milk fever. J. D. undertook the treatment and assumed full respon-

sibility for the cow's recovery. The valuable milk producer is now pronounced sound and well as ever, responding readily to the remedies applied by J. D.—Briscoe Co. News.

**SEX OUT, CRIME IN**

E. Phillips Oppenheim gives this literary market report: "Sex is dropping a little and crime is coming in again. A good sound romantic story is what the American wants. In England, where the sex story has always been popular, the demand remains the same. In France they want nothing else. I get less for my translation right into French than even into Jugoslavian. I attribute my popularity to keeping away from sex."—Kansas City Star.

**MAKING THE COUNTY SAFE FOR HEALTH**

College Station—The battle for rural health through sanitation isn't won yet, but steady improvement is noted from year to year, home demonstration authorities of the Extension Service say. Indeed, it is not too much to expect, they think, that the fly may soon be almost entirely excluded from houses due to the constant screening of more and more homes. Last year 4100 homes were reported by home demonstration agents to have been screened, or flies, mosquitoes and other insects controlled in various ways, or sanitary outhouses built. The country is a naturally healthful place to live if simple precautions are taken, but lack of information, agricultural distress, and high costs have combined to retard sanitation measures.

**Take Your Car**

—TO THE BODY AND FENDER DOCTOR

When dents or holes are knocked in the body or fender that hurt its appearance.

When dents or holes are knocked in the body or fenders of an automobile rust, that enemy of iron, starts its dirty work, but a coat of Duco at this authorized Duco Finishing Shop will stop it.

*We Believe In The Dairy Industry For Floyd County*

And for this reason we are glad to welcome the Creamery Industry as an addition to the business family in Floydada, and acknowledge our belief that the building of the—

**Floydada Creamery**

was a logical thing to do in the process of developing this year-round industry that can be made to vastly improve business conditions and better economic conditions in Floyd and adjoining counties.

We feel sure the men who are responsible for the Floydada Creamery are going to put forth every effort to make it a worth-while project, worthy of the patronage of Floyd County dairy producers, and we wish them every success in the undertaking.

This bank has been giving thoughtful aid to the financing of Floyd County development since 1903. Its officers and directors are convinced that Dairying offers a safe, conservative and profitable way for the farm operator to better his financial position.

**THIS SEASON**

Has become known as a Tornado period. At this season of the year the Twister's Terrifying Threat often becomes a reality laying waste thousands and thousands of dollars' worth of property and snuffing out many lives.

Tornadoes are beyond the control of man, and the only defense is Insurance to pay for the damage they cause. Almost every day the newspapers carry big headlines with reference to the latest disaster. No locality is exempt—yours may be next. Anywhere in this country — windstorms can and do destroy millions of dollars' worth of property. Each year adds to the list of places which "could never have a destructive wind storm" — and did. Windstorm insurance rates are so low that it is not worth the risk to be without it. Let us tell you how little it costs to protect yourself from loss through damage done by wind to home, business property or car. Wind destroys anywhere! Play safe and INSURE!

### Suggests New Plan To Open Denver Highway

Road District Two Miles Wide Would Issue Bonds If Idea Advanced Is Followed.

From The Lockney Beacon:  
The voters of Precinct No. 2 said by their action Saturday that they did not care to have the roads of the precinct put up in good shape, and hence, the bond issue for \$25,000 was voted down. In the Lockney voting box the issue carried by a vote of nearly three to one, but the three country boxes gave a sufficient vote against the bonds to keep the necessary two-thirds vote from being in force.

M. D. Arterburn, farmer living four miles north of town, suggests that a road district two miles wide, or in other words, one mile wide on each side of the Lubbock-Silverton railroad, be designated as a road district, and an election called for \$9,000 in bonds to be issued to pay for the opening of the road. The taxable property in the town of Lockney and along this two mile strip is sufficient that it would only cost the tax payers 5c on the \$100 valuation to take care of the \$9,000 bond issue, or in other words, the same amount that it would have taken to retire the \$25,000 bonds in the whole precinct. About half of the valuation in Precinct No. 2 is in the city limits of Lockney, or more than half of the valuation is in the strip two miles long along the Denver Road.

A petition will be prepared and every voter along the two mile strip and in the town of Lockney will be asked to sign same, and it will be presented to the Commissioners Court asking for an election to be called to vote on the bonds. If the bond issue fails to carry on this proposition, then a county wide election may be asked for to vote anywhere from \$100,000 to \$150,000 to fix practically all county roads now in existence in shape and the opening up of new roads that are favorable to designation as highways by the state department.

#### WORK OF PROMOTING CAVERN HIGHWAY PROJECT GOING ON

Hope to Get Federal Designation to Route Running Through Crosby County.

From The Ralls Banner:  
In a special called meeting of the directors of the Ralls Chamber of Commerce held Thursday morning at the municipal auditorium decision was made to assist the Oklahoma City Chamber of Commerce in fostering one of the greatest advertising campaigns in the Southwest in promoting the newly created Carlsbad Cavern Highway.

R. A. Singletary and E. J. Price, both of Oklahoma City, were present at the meeting and presented the directors plans of the advertising. Mr. Singletary is manager of the road department of the Oklahoma City Chamber of Commerce and Mr. Price is the publicity director for the Carlsbad Highway.

Oklahoma City Chamber of Commerce has spent several hundred dollars in the past few weeks on the new highway project and is still working to promote the Carlsbad Cavern Highway as one of the largest arteries of traffic in the Southwest. Ralls, too, through the work of the highway committee, of which P. B. Ralls is chairman, has been placed on this highway.

The advertising plan, which will be staged within the next few weeks is to secure newspaper publicity in the largest periodicals of the country, showing maps, scenes of the Carlsbad Cavern, giving mileage statistics, and other information pertaining to this new highway in order that a greater portion of the traffic which treks to the cavern

each year will be sent over this road by so advertising Ralls, as other places on the highway, will be benefited with the advertising.

"We find that the spirit of co-operation along the highway is wonderful, and we feel that every town will be greatly benefitted through this advertising campaign," Mr. Singletary stated to the Banner.

"Should a great amount of traffic to the cavern be directed over this highway then it will be of no significant matter to get federal designation for the road, which, of course, would mean more than one could tell to all towns located on the highway," Mr. Singletary further commented.

#### COWS WORTH KEEPING WILL PAY A PROFIT

Cows really worth keeping should be profitable during the next year as well as for several years. Four main indications of this favorable outlook for prices of dairy products are summarized briefly in these points as follows:

No pronounced gain in production is probable—there has been no increase in numbers of milk cows since a year ago and a favorable beef situation is pulling some in-and-out dairymen back to beef production. Time needed to produce a dairy cow, investment needed and natural conditions tend to keep down expansion. Beef outlook also good for several years.

Consumptive demand promises to remain strong—People have just begun to realize that milk is a "wonderful juice." Consumers can be counted upon to do their part to maintain good prices if dairymen maintain a policy of beefing low-producing cows and save only healthier calves that give promise of raising average production of their herds.

Foreign competition carries no new threat—Transportation costs to the point of entry and the tariff must be paid on products coming into this country and steps are being taken to increase consumption of dairy products.

Feed costs seem likely to be reasonable—Pastures have started off better than last year but increased production resulting from good pasture comes at low cost. Feed grains at low cost. Feed grains not likely to be higher than last year, depending on yields. There is promise of a larger supply of rough feeds.

#### U. S. STOCK HERDS FREE FROM FOOT-MOUTH DISEASE

It is generally known among stockmen that foot-and-mouth disease is one of the most dreaded livestock maladies. Fortunately, the United States has been free from it, except during occasional outbreaks caused in each instance by the introduction of the infection from abroad. The great danger from foot-and-mouth contagion lies in both the malignity of the disease and the great rapidity with which it spreads among animals and from place to place. The disease has gained a permanent foothold in many countries throughout the world.

Since 1870 this country has had nine visitations of the disease, but each outbreak has been stamped out by vigorous action in destroying all infected or exposed animals and disinfecting the infected premises. This drastic method is conceded to be the only successful way by which the United States can maintain freedom from the disease.

#### PAVING THROUGH PADUCAH

Howard & Farmer have been awarded the contract for paving the Lee Highway through the city limits, a distance of twelve blocks. There will be a 5-inch concrete base, with a brick top. The paving will be 51 feet wide.

It will be several days before the work commences.—Paducah Post.

# An Announcement

—OF IMPORTANCE TO FLOYD COUNTY PEOPLE

## And An Invitation

FROM THE

# Floydada Creamery

—We have been completing and tuning up our plant in Floydada this week, and have it now running, and believing that the Cream Producers and Consumers of this county will be interested in Seeing—

## One of The Most Modern Butter-Making Plants in Operation

And get first-hand information on how the raw cream is pasteurized and made up into the Finished Product we have decided to—

# Hold Open House All Day Saturday, May 25

In this modern plant, we have expended many thousand dollars, necessarily, to provide a Modern Plant that will take care of the Cream Produced in This Territory, and—

## We want to and must make this plant worth while

To the people of this section. Won't you help us help you and the dairy industry in this section by giving us a liberal share of your Cream Business? We will appreciate it, and promise you the very best of treatment that we can possibly give, keeping in mind that your prosperity means our prosperity.

## We believe in the dairy industry for this section

We believe it is going to continue to prove profitable to the farmers of this section, and that the grade of the dairy cattle will continue to be improved, making a constantly increasing volume. For This Reason we have provided a plant that has a capacity far in excess of present actual requirements. Our plant in Floydada could take care of all the cream produced in this section, even if it were tripled. We expect to grow with the dairy industry, however, and feel that every cent of outlay we have made is fully justified.

We extend you a cordial invitation to visit our plant on opening date at which time we will be actively in the market for your cream.

LOST—Oregon City gray overcoat. Finder return to Fred Brown for reward. 10tfc

FOR SALE or trade—Ford truck. W. C. Hanna. 123tc

Hogs weighing from 190 to 235 pounds generally command a better market price than those of lighter or heavier weights.

The time to destroy grasshoppers infesting fields of alfalfa or other crops is while the pests are young, when the injury is slight and the "hoppers" are wingless and more easily killed. A poison-bran mixture such as the following can be used; 25 pounds of wheat bran, 1 pound of Paris green or crude arsenic, 2 quarts of low-grade, strong smelling molasses, 3 gallons of water. In dry regions more water may be needed. Ten pounds of bait wet weight should be broadcast to an acre. In California and other semi-arid regions the bait should be distributed in late afternoon or evening. In moister regions it is best applied in the morning. Eggs usually hatch in the North in May or June.

Buckwheat is useful for something else besides furnishing the wherewithal for griddle cakes. It is a great help in fighting quackgrass, and on land rich enough to produce a good crop of buckwheat, it will smother out most of the quackgrass. In addition to producing a good crop of grain. Land to be cleared of quackgrass should be cropped a year to get rid of sod, and then plowed in full or early spring. All quackgrass plants must be kept down until buckwheat-sowing time in early summer, by sufficient workings with a spring-tooth or disk harrow, or be plowed again if necessary. If the land is poor, some manure and fertilizer should be added. Sow four or five pecks of buckwheat to an acre.

# 'Big Six' Henderson Pardoned By Moody; Convicted By Lions

Within forty seconds after he had been found guilty and given the extreme penalty by the Lions Club Grand and Petit Jury of this city last Tuesday noon, W. H. (Big Six) Henderson produced a signed and sealed pardon by Governor Dan Moody, freeing him of all charges made by the Club and annulling any charge that they may make in the future. The court was so astounded by the pardon that for several minutes there was absolute silence preceding the storm of jeers and cheers that followed.

**Case is Sensational**  
 "Big Six" was charged by the club with using "violent language, boisterous behavior and (beyond Matador) offensive breath on the excursion trip to Oklahoma City, April 15 to 18, 1929." He was found guilty on the count of Boisterous behavior and was given the extreme penalty of furnishing a box of five cent cigars and a Coca-Cola for the members of the jury and court. The accused was protected on one side by Dr. George Smith and on the other by Ex-Sheriff Stegall when C. H. Davis, Jury foreman, read the sentence. The court room hardly had time to express their sentiment before Henderson brought forth his pardon by Moody. Many sensations were brought out in the case Tuesday at the regular noon meeting. Most important

was the testimony by Ex-Sheriff Stegall for the Club. Stegall denied signing a sworn statement that he had turned witness for the defense and brought out many facts that caused the jury to render a verdict of guilty. In part, he said that he had known the defendant for forty-five years and had never known anything, good about him. He said that he could not bring out too many facts in the case of the accused because of personal reasons. "Persecuting attorney" Dick O'Brien wound a cleverly planned case around the charges and, although the defense tried many channels of escape, they found them all blocked. Their main defensive plea was that Henderson did not make the trip but was ill at the Smith and Smith Sanitarium at the time. Failure of the brain cells to work was given as the cause of his illness, and the club accused the defense of trying to produce a new kind of insanity plea.

**Henderson Well Defended.**  
 Roy Snodgrass, especially employed lawyer for the defense, made such a reputation in the "Big Six" case it is expected that he will run for the governorship of Oklahoma in the future. Snodgrass used Lions Maxwell, and Clements as his star witnesses and the Club used Lions Lon Davis, P. G. Stegall and G. V. Smith as their star witnesses.

Instead of retiring to return the verdict, the jury used the huddle system and was only huddled a few minutes before the unanimous decision was reached. The jury was composed of Lions Wester, Breed, Wood, Bedford, Windsor, Williams, Bishop, Palmer, Hicks, Davis Arwine, and Ross.

Moody's "Unconditional pardon by the powers that be," as read by "Big Six," said in part. "Knowing, as I do, that this defendant is innocent of the crime, and that he has been haled before a Kangaroo Court by a bunch of Jealous, Bigoted and Prejudiced Persecutors, to be tried before a hand-picked Jury of Disreputable citizens whose verdict of Guilty was rendered before the evidence in this case was submitted to them, I hereby restore the said W. H. Henderson to full rights of a citizen without limitation for this offence or any other offense he may hereafter commit while a member of said Lions Club of Floydada, Texas. The governor's seal was attached to the pardon.

Thus was closed the dramatic case of the Lions Club Grand Jury versus W. H. (Big Six) Henderson. Several Visitors Present  
 Immediately following the regular noon day luncheon of the Lions Club Tuesday, visitors were introduced to the club. Carl L. Minor, Frank L. Moore and Rev. R. E. Bost, from this city, and Lion Alexander, of Perryton, were visitors.

## Farm Wages Compare Favorably With Others

Many Non-Cash Items Bring Total For Farm Labor Up With That of Industrial.

A favorable comparison between wages of hired farm hands and industrial wages for comparable work, when allowance is made for the various perquisites such as board, rent, food, etc., received by farm hands in addition to wages, is disclosed in a preliminary report of a survey by the Bureau of Agricultural Economics, United States Department of Agriculture.

In the bureau's survey, 2,117 farm employers reported that the total average farm value of all per-

quisites was \$30.34 per month, wages \$46.44, or a total of \$76.78. Should the farm value of perquisites, of which food is a large part, be expressed in terms of retail prices, the total of perquisites and cash would compare favorably and in some cases probably exceed wages for comparable labor in industrial employment.

By geographical divisions of the country, the survey shows the total monthly farm value of perquisites and wages to farm hands in the New England States at \$88.15; Middle Atlantic States, \$85.20; East North Central States, \$78.60; West North Central, \$78.21; South Atlantic, \$59.78; East South Central, \$56.72; West South Central, \$63.47; Mountain States \$90.94, and Pacific States \$104.98.

The American method of express-

ing farm wages is to name as wages the cash amount to be paid, modified by inclusion or exclusion of board. This does not take account of other payments in kind or privilege of value also given to farm hands, and which are frequently of considerable value as indicated in the bureau's survey. The English method, on the other hand, is to set a total figure, deduct the value of various perquisites, and pay the remainder in cash. When discussing wages the English speak in terms of the total figure which in both England and America is not much if any different from the wages paid for comparable work in industry.

The American method of expressing farm wages may be responsible in a slight degree for the undue emphasis often placed by the farm

laborer on the relative superiority of city wages, expressed entirely on a cash basis, as compared with farm wages that consist so largely of non-cash items. On the other hand, farmers may at times fail to appreciate the possibilities of retaining capable laborers and keeping them contented by giving them perquisites which cost the farmer little.

Detailed results of the bureau's survey, made in 1925-26, of perquisites and wages of hired farm hands have been published in a multigraph report entitled "The perquisites and wages of Hired farm Hands," copies of which may be obtained from the Bureau of Agricultural Economics, Washington, D. C.

## An Invitation

To all our friends to visit our new quarters in the Enoch Building on the East Side of the Square, Floydada, Texas.

It will give us pleasure to serve you in any way. New cars, Used Cars and Shop or Battery Service of the Best for you here.

Come in anyhow—Get acquainted with us and you'll like us and our service.

**Rutledge Motor Co.**

Jay Laverty, Manager

## Congratulations - to the creamery folks

Diversification, crop rotation methods, practical short cuts and a host of other workable practices are bringing in cash returns for successful farmers in every locality. Increasing volume of diversified products has brought with it increasing market facilities and more competition which results in better prices since products are handled in a way that makes them acceptable to world markets.

The modern farmer turns losses into profits by applying efficient methods instead of haphazard, come what may, farming. He utilizes every labor saving device possible so that he will have more time to devote to the head work. And here is where electricity plays such an important part.

The immense production capacity of the new creamery is made possible by machines electrically driven. By employing the forces that are available today the creamery, like many other industries of its kind will help in the development of the country.

**Texas Utilities Company**

"Your Electric Servant"

You will forget that there is--  
 "such a thing--as TIRES."

Very confidently we predict that you will forget that there is—"such a thing as tires."

Maybe you'll look 'em over, even as the paint on your car, when you're ready to trade. Confident, we are, because we know the strength and endurance of Sieberling's newest and finest tire. Know that it is tougher, far tougher—than any tire before.

We'd like you to know, too, and it will take only a few minutes at our station.

## WILL YOU BUY A COMBINED HARVESTER?

If you are contemplating buying a Combine this year we ask your comparison of the many merits of the "Holt."

- 1—The Enclosed header Drive Gear Nest Assembly running in oil.
- 2—The weight and quality of the Canvasses—the quality of leather used on canvasses, as well as the general construction—insuring long life.
- 3—The Sickle Pittman having shim adjustments for wear take up, and equipped with counter balance weights, and equipped with Alemite Reservoir Oiling System.
- 4—The principle of threshing that cleans the tough uneven ripening grain from the straw.
- 5—The wide high space from front to rear of machine—permitting the handling of long tangle straw.
- 6—The heavy steel frame bolted and hot-riveted, representing the foundation of any machine.
- 7—The Grain Bin built solid and mounted low directly over the main frame, perfectly balanced centrally over the machine.
- 8—The Oiling System so complete and protected, that you can oil while grain is damp in the morning—then keep the machine moving thru the day—oiling only two or three places at noon. Thereby increasing materially the acreage each day.

Our oiling system, our grain bin unloading system our principle of separation, we claim superior to the old threshing principle of straw walker and rack system with the unsatisfactory result when you stop a machine of this kind for unloading with the machine full of straw and grain that when you start up slowly before the machine gathers speed will naturally lose some grain.

There are many merits that are practical that we would appreciate the privilege of showing you, or to have you write us for catalog and complete information.

## "CATERPILLAR TRACTORS"

(A size to meet every agricultural requirement)  
 BETTER — QUICKER — CHEAPER

ALL CATERPILLAR USERS SPEAK THE SAME LANGUAGE

Fowlerton, Texas, May 4th, 1929

B. P. Clark Machinery Co.,  
 San Antonio, Texas.

Gentlemen:-

"Old Betsy," my best "Caterpillar" "60," bought from you five years ago last March is still going good.

It has broken more than 200 acres of brush land, plowed up and graded 60 miles of road, broken hundreds of acres of old land, moved houses, and done many other jobs, and has never had a track removed, nor have they been taken up more than one inch. I have put in one set of new piston rings, and my total expense will not exceed \$75.00.

Yours for success, I beg to remain,

Yours very truly,  
 (Signed) W. B. STANFIELD.

## Up-To-Date Equipment Assures Good Product

(Continued from page 1)  
 machinery and manpower assembled that the promoters of the project feel sure it will equal in quality any butter manufactured in this section.  
 The principal machines installed in the new plant are pasteurizer, churn and refrigeration system, including compressor, brine tanks and built for storage.  
**1,000 Pound Churnings**  
 The first process through which cream passes after it is received at the plant is that of pasteurization. Here it is dumped into a highly sanitary vat, where it is heated through a coil system of about 145 degrees to kill any germs of uncleanness which this process and while the same container the

churning is reduced in temperature to around 45 degrees and pumped into the churn. The cooling and cleaning processes all are controlled and handled by the operator simply by the turning of valves, the power of electric motors and the use of gas-heated water. The big white churn used handles the butter on the same principle as the home-churn but it handles a very considerably larger churning than does the housewife. In fact it has a capacity of 1,200 pounds per churning, although usually, Oscar Penland, churner for the company, said 1,000 pounds was about the usual amount handled at a time.  
 From the churn, after it is rinsed and cooled, the butter goes into butter tubs for shipment to the central markets, or if it is to be distributed through retailers, it goes into pound cartons and thence into the refrigerator provided to await the day of sale and shipment.  
**Large Refrigerator Provided**  
 A refrigerating system is one of

the things on which a heavy outlay of funds was demanded at the new creamery. This refrigerator is similar in all respects to the commercial ice-manufacturing plants, except that it does not use the ice containers in the brine tank and the cold is used to control temperatures in churn, pasteurizer and storage vault. This vault is a cork-lined refrigerating room where temperatures may be kept at any desired temperature. It has a capacity of several hundred tubs of butter—sufficient to fill a railroad car at a single shipment. This refrigeration is an essential to the maintenance of the condition and quality of the butter.  
 Cream patrons and others who desire to inspect the plant have an especial invitation to visit it Saturday of this week when special arrangements are being made with the thought that hundreds of people over the county may be interested in seeing it in operation, E. L. Angus, manager said.

The plant is installed in a brick building recently completed by J. G. Martin to house it. The company has a term-lease on the building.

## Single Variety Cotton Sections On Increase

College Station—More than a quarter million acres are devoted to the growing of single varieties of cotton on the community standardization plan this year, this acreage being divided among 8318 farmers in 115 communities in 39 Texas counties. This information on the progress of the move to increase cotton growing profits by concentration of varieties has been gathered by E. A. Miller, agronomist in the Extension Service, from questionnaires sent county agents.  
 "The decline in quality of Texas cotton brought about by increases in planting seed of poorer grades and staples will seriously affect the cotton farmer unless checked," Mr. Miller declares. "It is difficult for an individual farmer to secure a premium for superior cotton, but when an entire community grows one good variety enough volume is obtained to permit pooling and sale to grade and staple. Last year premiums from such cotton averaged about \$6.85 per bale.  
 "The acreage in standardized community cotton has almost doubled this year over last. Data from county agents show that there are now 37 gins in the state devoted entirely to the ginning of a single variety, and that 41 gins plan special gin days for the standardized cotton. This is important in order to avoid admixture of seed and cotton from inferior varieties and to reduce the losses from gin cut cotton. The advantages of keeping seed pure and reducing gin cut cotton are almost as important gains from standardization as the premiums obtained.  
 "This year 29 communities plan to pool their cotton for sale, and 17 expect to market partly at least through the Texas Farm Bureau Cotton Association to obtain prices based on quality."

## FASTER CARS DEMANDING SAFER, BETTER HIGHWAYS

(By E. E. Duffey)  
 Most automobiles now being made have a speed of at least 50 miles an hour.  
 Car speeds and the great volume of traffic now thrown on the roads are exerting a beneficial influence on highway design and construction. In the early days of rural pavement laying, for instance, many surfaces were built to a width of no more than 16 feet, scarcely room enough for a load of hay and a car. Later, an 18-foot pavement width was adopted by most states with the thought that six yards would surely be adequate for two passing automobiles.  
 Recently, however, experience and government tests have demonstrated that in the interest of speed with safety a rapidly traveling car should have a ten-foot lane. Some drivers of course, should have even more space, but highway authorities are in accord on a 20-foot width for the ordinary rural road subjected to fairly heavy traffic.  
 Illinois, Michigan and Wisconsin are among the states now specifying 20-foot pavements on well traveled roads. Twenty per cent of the mileage of rural pavements built on Federal Aid projects last year were 20 feet in width. New York, particularly, has gone in for even wider rural pavements with many being built 27, 36 and 40 feet wide.  
 Safety is being introduced into pavements through other mediums, such as smooth surfaces, easier curves of a pitch suitable for fairly high speeds, wider shoulders, greater sight distance at curves, better guard rails, better grade crossing facilities such as under-passes, and better designed highway intersections.  
 Where traffic is quite heavy, streets and roads are in some instances being separated at intersections through the elevation of one thoroughfare over the other. The cost of such structures is soon returned through the elimination of congestion.  
 Less expensive but quite suitable arrangements for continuous and safe travel at intersections may be made.  
 Notably in New York and New Jersey, traffic circles, sometimes called rotary intersections, are in service. These consist simply of a circular pavement into which traffic pours from the intersecting highways. This avoids all left hand turns—one of the greatest contributors to accidents.  
 Some states are adding two extra lanes to all highways at the intersection. This extra space permits a free flow of cars. Another method is the curved intersection where in each of the cross roads is joined to those adjacent by a curve, cutting off the corner and forming a simple design similar to that on some of grand-mother's old comforts.

**But Slightly Impressed**  
 Since our personal memories of Mrs. Langtry were so well received, we are moved to revive certain things we recall about the late Melville E. Stone. We met Mr. Stone at an editorial meeting on the campus of the University of Kansas. Mr. Stone shook hands cordially enough, but, after that, paid no attention to us whatsoever. We thought then, and we think now, that Mr. Stone was very slightly impressed by the meeting and had probably forgotten all about it by 3 o'clock that afternoon.—Jay E. House in Philadelphia Public Ledger.

## WEIRD PLANTS HIS FRIENDS

As Charles P. Steinmetz praised under the influence of disease and flattery, a measure of self appreciation he began to indulge his fancies. Soon after his arrival at Schenectady he had a small conservatory built adjoining his house, and this he gradually filled with cactuses.  
 They are not the beautiful, delicate specimens seen in the windows of fashionable florists but vast, ungainly columns of thorns, misshapen bulbous masses covered with needle-pointed white hairs, snaky horrors with groups of unnatural fruit growing like ulcers at the tips.  
 These were Steinmetz's friends. He spent thousands of dollars pumping steam into the conservatory to keep it at tropical heat while the temperature outside was 20 degrees below zero.  
 Whenever his mind was not engaged on some enthralling problems the twisted little man would putter among his twisted plants. He'd water them, he'd test the sharpness of their thorns with the tip of his finger.  
 They represented to him the survival of the almost fatally handicapped. Their ancestors, forced to live in an unwelcoming desert, had adapted themselves to their environments. They had even achieved beauty of a sort, and they were safe from browsing cattle or destroying insects.

Steinmetz probably never wondered why he liked these strange friends so much. But he, like they, had earned his niche in an unwelcoming world.—J. N. Leonard in World's Work.

E. J. Norman and family, of Crosbyton, visited last week-end here with his parents, Mr. and Mrs. W. I. Norman, and attended the graduation exercises of Floydada High School. Herma Lea Norman was a member of the graduation class.

Mr. and Mrs. S. M. Cole and daughter, Marilyn left Wednesday for Streetman, Texas, where they will be joined by his parents, Mr. and Mrs. J. B. Cole and the party will go to Mississippi to visit relatives.

Mr. and Mrs. Seaborn 1 who are away on a honeymoon, wired relatives here this week that they were in Anaheim, California, and had visited Mr. and Mrs. Tobe Picklesimer, former long residents of Floyd County.

Mrs. J. N. Farris and daughter Audrey, and son Kinder, left Saturday for San Antonio and the Rio Grande Valley. They will be joined in San Antonio by Mrs. Farris' son John, who has been attending the Peacock Military School.

Mrs. C. O. Thomas and daughter, Miss Virginia, returned Thursday afternoon from a visit with her son, C. L. Thomas, of Marfa. Mrs. Thomas said Floyd County looked better than any of the territory covered on her trip.
