Rotary Speaker Urges Service To Community

Towns and cities are built by people who put back into a community a portion of what they get out of it, Rev. Oscar Bruce, Methodist pastor, told members of the Rotary Club Thursday at the regular meeting and luncheon in the Texas Cafe. Vice president Tom Barfield presided in the absence of Robert R. King, club president. Report of plans for the club's first anniversary celebration, Ladies Night and installation of officers was given. The affair will be held on the evening of June 26. Barbara Elliott, daughter of Mr. and Mrs. Jean Elliott, was pianist for a sing-song led by Thos. B. Robertson. Rev. Bruce, in his talk, said that in town-building we are either mining or farming. "If we are mining our community we take out everything and in a sense exhaust our community resources," he stated. On the other hand, he pointed out, if we are farming our community we endeavor to put back into it some of the things that will nourish and enrich the community. Visiting Rotarians present were Bill Wilson of Snyder and M. E. Price, Rule postmaster.

Wheat Farmers Vote Friday on Market Quotas

Wheat farmers in Texas and throughout the nation will vote Friday in the national referendum on wheat marketing quotas for the 1959 crop. Wheat produced in 1959 will be supported at 75 per cent of parity, or about \$1.81 per bushel if two-thirds of the growers voting approve marketing quotas. If the quotas are not approved by a two-thirds majority, wheat prices will be supported at only 50 per cent of parity, about \$1.20 per bushel. Searcey M. Ferguson, chairman of the State Agricultural Stabilization and Conservation committee, has pointed out that acreage allotments will be in effect for the 1959 wheat crop regardless of whether marketing quotas are approved. Texas allotment for the 1959 crop is 4,099,094 acres, compared with 4,164,302 acres for the current crop. The \$1.81 per bushel support level announced May 1, is the minimum support for wheat if marketing quotas are approved. This support level may be raised if a combination of the wheat parity price and wheat supply relationships as of July 1, 1959, indicate a higher support price. Eligibility to vote in the referendum is limited to farmers who will share in the 1959 wheat crop from a farm in the commercial wheat area on which the wheat harvested for grain in 1959 will exceed 15 acres and provided they did not take part in the 1958 feed wheat program.

Failure of Knox City and Rochester to Join the Authority will not cancel plans for developing the project, city officials and directors of the Authority said.

The five towns comprising the Authority can easily carry out the program, engineers explained. However, withdrawal of Rochester and Knox City will necessitate revision of plans to fit the size of the new district. This will probably mean that the overall cost of the project to the five member cities will be proportionately less than under the original seven-city program. After results of Tuesday's elections in the seven towns have been certified to the State Water Board, members towns in the Authority will then be officially designated as Haskell, Rule, Munday, Goree and Seymour. Next phase in developing the five-town project will call for revised plans to determine its cost and financing schedule. Elections will then be held in each member town to vote on the required bond issue and on a water purchase contract between each town and the Authority.

The Role of Advertising

A new product is rarely accepted by the public, no matter how good the product is. None of us rush out to buy a new ball point pen just because a better one has been invented...

The products of American industry - undreamed of luxuries a century ago - could not attain volume sales until advertising created new demands.

Many of us can remember when housewives claimed that automatic washers could not get laundry really clean. Advertising changed that notion and relieved the homemaker of hours of drudgery each week.

The television manufacturers could not sell TV sets until newspaper advertising sold the American public on the idea of listening to television.

Any woman - or man, for that matter - who has washed a stack of greasy dishes is familiar with the virtues of modern detergents. Yet, remember, it took several years of consistent advertising after World War II to convince women that detergents would work.

Advertising truly has a place in the creation of wealth. For, the products which add to our wealth are not bought and used until they are advertised. Even the Salk polio vaccine had to be widely advertised before it was accepted by the public.

You Can't Afford a Mistake

Most Americans are good drivers - the high traffic toll notwithstanding.

This pat on the back for the average motorist comes from the National Safety Council as it opens its annual appeal for Fourth of July holiday safety.

The Council makes a good point: with upwards of 70 million vehicles whizzing past each other only a couple of feet apart, the average driver must make 20 to 50 decisions an hour, many of them literally involving life or death.

Most of us want to be good drivers. We pride ourselves on our skill and common sense. We obey the law. We don't want to hurt ourselves, our families or the stranger in the other car.

Carelessness is a catch-all word that covers a multitude of sins. Good drivers that we are most of the time, every one who has ever been behind the wheel of a car remembers the near misses - and our accident toll is made up of these that didn't miss.

We get tired. We burn up at some minor rudeness by another driver. We drive a little too fast. We take a chance in passing. We think a couple of drinks can't do any harm. Or due to any of a hundred distractions, we let our attention waver from the road for an instant beyond recall.

The National Safety Council estimates that more than 45 million cars will be on the roads over the three-day Fourth of July holiday. So don't be a good driver most of the time. You can't afford to make even one mistake.

Much has been said of late about what is wrong with this country's educational system. A headline in the papers this week might shed some light on the subject. The headline: "Biology Teacher Goes, Football Stays Despite \$29,370 Loss." The story under the headline said Sul Ross had turned loose the biology teacher because of inadequate funds, but football, a \$29,370 a year loss at Sul Ross, will be continued.

PEOPLE, PLACES AND THINGS

By A. PATE

One of the few early-day landmarks remaining in Haskell was destroyed last Sunday when fire spreading from burning weeds levelled a two-room frame house one block west of the county jail.

The house, unoccupied in recent years, had stood for more than 70 years and was known to old-timers as the "Grandma Posey" place. She died sometime in the early 20's and since then the house had deteriorated into a ramshackle structure.

Albert English, who came here as a boy in 1889, remembers the small house as one of the few homes in Haskell at that time. Located on the west side of Spring Creek, it was occupied then by Grandma Posey, Mr. English recalls.

The elderly woman owned a few head of cattle, and because all the cowboys knew and respected Grandma Posey, they looked after the small herd at roundup and shipping time her cattle were delivered to her credit, with the cowboys making certain that "Grandma" received every penny coming to her.

In those days, every family kept one or more milk cows, and Mr. English especially remembers a black spotted milk

cow belonging to Grandma Posey. "That cow was a smart critter, and a rustler when it came to getting something to eat," he recalls.

Farmers, coming to town in their wagons, always piled hay and other feed in the back of the wagon. Arriving in town, they'd unhitch their teams and tie them to the back wheels of the wagon where the animals would have access to the feed.

When that spotted cow saw a wagon with feed that looked attractive, she would lower her head, hook and butt the mules or horses away and help herself.

Sometimes the cow would rear up and put her forefeet in the wagon bed in order to clean up every morsel of feed in the wagon.

Saturday night was reminiscent of the hectic weekends of the early 30's, when a few fights were the rule instead of the exception among Saturday night crowds. And occasionally, a falling-out might end up with a little target practice on the part of one or the other disputants.

It was that way last Saturday night, or to be exact, Sunday morning.

There is no little complaint among the freighters and others, who have to use the road from this place to Seymour, of the recent changing and fencing of the road which lengthens the distance some eight or ten miles, besides throwing it on worse ground and over rough crossings on a number of ravines. All this has been done in Baylor County.

A. M. Robertson of the Abilene Dry Goods Company, and also mayor of that city, visited his brother, S. L. Robertson of this place this week.

Remember his first great adventure?

With full heart and watchful eyes you helped him enjoy very first taste of independence. And how proud you were when he achieved his goal... Nothing you can give your child is half so precious as wonderful opportunity to be himself. All through life you want him to be free to choose his way. That's why it's so important to be on the watch for ideologies that could set limits to his independence. For instance, that government should own and run more businesses, services, institutions. Don't forget that when government runs more and more things, the individual has less and less freedom and independence! Think of your son's first "independence day" when you hear like that. Point out that in countries where government does almost everything, the individual is controlled, also. And that of anybody's independence is a threat to everybody's freedom. Very much aware of this danger are the independent electric light and power companies, because government already runs a part of the electric business. And powerful people are pressing to take over more.

Nettie McCollum Heads B&PW Club As President

Nettie McCollum was installed as president of the local Business and Professional Women's Club in an impressive ceremony Tuesday evening.

Zaida Brown of Snyder, immediate past director of District Seven, conducted the installation, using Mary Stewart's club collect and a bouquet of multi-colored carnations. As each of the officers for 1951-52 was charged with their duties they were presented a flower. In addition to the president, others taking office were:

First vice president, Ramia Lee Frazier.

Second vice president, Esther Helber.

Recording secretary, Brucille Nellums.

Corresponding secretary, Grace McKelvain.

Treasurer, Lois Jones.

Reporter, Ozzie Frierison.

Parliamentarian, Leone Pearsey.

Following this portion of the ceremony, Leone Pearsey, retiring president, presented the gavel and president's pin to Nettie McCollum.

The scrapbook was displayed on a lighted table with a large rooster silhouetted in the background. The tables in the dining room were attractive with centerpieces of daisies and rooster figures. The president's table was centered with an arrangement of roses with three candles, designating the three years of the organization. Scrolls with the club collect stood at intervals along the tables. Places were marked for the 30 members and guests with envelopes decorated with a rooster proclaiming "Well Worth Crowing About." Inside each envelope was a list of things the club could well crow about.

Special guests were Zaida Brown and Florence Letwicht of Snyder, Evie Wilson, past District 7 director, Artie May Burkett, recently installed as District 7 director, and Velma Campbell, new member of the local club.

Committee chairmen named by the incoming president were: Membership, Esther Helber; Finance, Edna Mae Lytes; International Relations, Stella Trice; Legislation, Elizabeth Stewart; Health and Safety, Grace McKelvain; Projects, Leone Pearsey; Telephone, Odell Bynum; National Security, Clara Beard; Career Advancement, Louise Greene; Public Affairs, Opal Dotson; Public Relations, Ozzie Frierison; Scrap Book, Elaine Blohm.

A "get-together" was suggested for July and the annual picnic is scheduled for the month of August.

The new club year will officially begin September 2 with the Program Coordination Committee in charge of the presentation of the year book.

Light-weight stockers, with quality, also sold on a stronger basis. Canner and cutter cows were firm, but fat cows were 25 to 50 cents lower. Fed steers closed weak to 50 cents lower, however, earlier sales were fully steady.

Good and choice slaughter steers and yearlings drew \$24 to \$27, while plain and medium sorts sold from \$17 to \$22. Fat cows drew \$17 to \$20, and canners and cutters cashed at \$12 to \$17. Bulls sold from \$17 to \$21.50.

Good and choice slaughter calves cleared at \$24 to \$28.25, and common and medium sorts sold from \$18 to \$23, with culms from \$14 to \$17. Stocker calves cashed at \$32.50 down, and stocker yearlings drew \$27.50 down. Feeder steers sold from \$25 downward.

Runs continued light at Ft. Worth and other major market centers of the nation Monday, and prices strengthened. Choice hogs topped at \$23.25 and \$23.50 at Fort Worth, with other good butchers from \$22 to \$23. Mediums sold around \$21 to \$22, and sows sold from \$18 to \$20.50. Stags drew \$11 to \$14.

Texas Cowboy Reunion to Have Special Feature

Visitors to the Texas Cowboy Reunion at Stamford July 2, 3 and 4th this year will have the opportunity to see the Working Border Collies which caught the fancy of all those who saw this act when Dewey Jontz, Field Representative of the Iowa State Sheep Association, brought the famous Imported Tess to Stamford. This year Mr. Jontz, who is one of the most widely known men in the business of working and breeding these dogs in this country, will have his famous female Muff, daughter of Imported Tess. Muff is quite a star in her own right, having been on many national television shows and appeared at many of the Nation's outstanding shows. She is an international champion in both male and female divisions having won in the National Plowing Matches in 1956 and the Invitation Trails at the Calgary Stampede.

Shepherds used this type of dog four centuries ago in Great Britain where they are used as old as the sheep industry itself and nowadays they are used with livestock and poultry. When they watches the man and dog, it is as an unwritten message between them. It has been said of the old British shepherds that, should you visit one of them in quest of one of the dogs, you would find him more willing to part with his wife.

Even if the weather might be a little warm, it will be a treat to see these little black and white Univacs lower the temperature of the sheep and you will say they are the best wranglers to ever wear a ten gallon hat.

New Home Garden Insect Guide Available

A good home garden can be a source of much pleasure and reducer of the family budget. But both the pleasure and saving can be greatly reduced by harmful insects if proper control is not exercised, says Texas extension entomologists.

With few exceptions, vegetable insect control is a preventive program. Control measures should begin before insects appear in damaging numbers. Dusts and sprays, in most instances, are equally effective.

A new leaflet has been released by the Texas Agricultural Extension Service entitled "Texas Guide for Controlling Insects on Vegetable Crops." It has a thorough rundown on insects that might harm almost any vegetable crop. It includes information on home garden mixtures, methods of application and precautions and contains a chart outlining a dust or spray program for controlling vegetable insects.

This leaflet should prove most helpful to all home gardeners. It can be obtained from local county agents or the Agricultural Information Office, College Station, Texas. Ask for L-255.

Summer Season Pushes Cattle Sales to Normal

BY TED GOULDY
FORT WORTH—The livestock business all across the United States swung into a normal marketing pattern for the first time this year, with the opening of the summer marketing season and the start of June.

In the previous five months of 1958 below normal numbers of cattle and calves have been sold, and this has resulted in some warnings from government statisticians. These experts feared the buildup in cattle numbers was being too rapid, and warned that the light selling was killing prices which might later result in an unduly sharp downward adjustment.

However, with the summer sun hastening the harvest all over the southern parts of the Great Plains, and field work advancing in the corn belt, cattle numbers at the markets soared to surpass the previous week and also the same interval a year earlier.

Cows were still in small numbers at all markets, however, yearling steers and feeder heifers were numerous in stocker cattle centers.
