THE AMERICAN PRESS ASSOCIATION

**RELIABLE ADVERTISING VS.
 BUNK**

The members of the Panhandle Hardware and Implement Association in session last week decided that newspaper advertising was the best and most reliable kind of advertising. At the same time they condemned the various kinds of stunts called advertising, which are nothing more than holdup schemes devised by grafters to fleece the unsuspecting. The real business man who knows advertising and its power usually will not fall for stunts called advertising, but it is usually the class of fellows who claim they do not believe in newspaper advertising who will stuff off a wad of money to have their names printed on a few bills which never reach the buying public, or will give a lot of merchandise to a so-called comedian to give away at a show. Such stuff lacks a whole lot of being advertising—Randall County News.

KILL RABBITS; MAKE MONEY

To make money killing rabbits in Floyd County this year it will not be necessary (for crop owners at least) to obtain a bounty from the county. Each rabbit eats a lot of the farmer's crop and causes a heavy economic loss. The rabbit crop in Floyd County the past year has been a bountiful one. The rabbit population of the county must have increased 5 to 1, or maybe more. At any rate, rabbits, partially thinned out a year or two ago, are getting mighty thick again. So thick that everybody ought to make it a point to help slay them.

The other day two farmers helped out a lot. They killed 65 rabbits on 100 acres of ground in just about an hour. Of course, they didn't kill all the rabbits there, which means that the rabbit population in Floyd County, which the crops must support, is a good many hundred thousand.

COST OF CARELESSNESS

As one result of the carelessness of the American people 21,000,000 letters last year went to the Dead Letter Office, and 803,000 parcels went to the same place, undelivered to the addressees. This information is being broadcast by the Post Office Department in an effort to get people to be more careful in addressing their letters and wrapping their parcels. \$55,000 in cash was removed from letters that were misdirected last year and \$12,000 in stamps were taken from the same kind of mail. \$3,000,000 in checks and drafts last year did not reach their intended owners. The Post Office Department declares that these sums of money could have been saved and the worry and trouble the mis-

directed mail caused, could have been avoided by two little things; one, by seeing that each piece of mail you send carries a return address, and two, by wrapping every parcel in strong paper and tying it with a strong cord. It cost the Post Office Department last year \$1,740,000 to look up addresses on misdirected mail, two hundred million letters have been examined. In New York City alone the cost for this service is \$500 per day.

BE A BOOSTER

If you live and do business in a town, for heaven's sake be loyal to it. If this town furnishes you with food and shelter, boost it; speak well of it; stand by it, and stand by the industries it represents. If put to a pinch, an ounce of loyalty is worth a ton of clever knocking. If you must vilify, condemn and eternally disparage, pack your trunk and get out, and when you are on the outside, knock to your hearts content. But as long as you are a part of a community, be a real man; do not condemn it. If you do you are loosening the tendrils that hold you as a part of the community, and when the first high wind comes along you will be uprooted and blown far away; and probably you will never know why."

A young man who recently "dipped into" journalism long enough to get out an edition of a weekly school paper, wound up his work by declaring that "I have found out there are more liars in this world than I had ever suspected." He had depended upon a number of class mates to gather in material for the paper. When press day came, there wasn't enough copy to fill one page. He had four to fill. A lot of reserve jokes and "time copy" saved the day, and they went to press on time. "Supposedly good, honest people will make promises about news and then either forget their promise or make profuse apologies after the paper has gone to press," he said. Of course, it tickled the regular editor and he had to write something about it. Newspaper work, done right, calls for a lot of work on schedule and the fellow who has his mind made up to get into the game and have an easy time of it, is due for a rude awakening.

More rain Sunday night means further insurance on the biggest row crop in the history of Floyd County. It also means that all the wheat that was left standing is going to make.

Slay the weeds and swat the flies is a good slogan any time. Right now it is a necessity in Floydada.

**TERRACING FOUND TO AID
 IN CONSERVING MOISTURE**

College Station, Texas, May 25—A startling discovery in the terracing work done in 124 counties of the state under the direction of A. & M. extension agents last year was that the terracing conserved the moisture in addition to preventing the washing of the soil and greatly increased crop production. In many cases on flat land in the northwestern part of the state the gain in production was from 25 to 35 percent advises M. R. Bentley, farm engineer of the Extension Service. In the past terracing has been urged only as a means to prevent the erosion of soil, particularly in rough or rolling country, but in the future recognition must be given to its usefulness in holding the moisture through the crop growing season. Particularly will this be of value in the regions of the state subject to drought.

Summer motor traffic on the narrow limited floor of the Yosemite Valley is so great that traffic officers are required to regulate it.

**NEW BUSINESSES AND MANY
 CHANGES AT SILVERTON**

From The Briscoe County Herald:

Higginbotham-Bartlett

Announcement was made this week that Higginbotham-Bartlett Co., of Lubbock, had purchased the three north front lots facing the Burson Motor Co's. building with the intention of building on them at once. This firm already owns other lots in the same block, it is said, and it is considered probable that they will put in a complete lumber and hardware establishment.

Buys Gin Property

Pete Blakney is now the sole owner of the Silvertown Gin, having bought out his partner, C. L. Martin of Seymour.

Mr. Blakney's friends are glad to learn of this fact because they believe that he is greatly interested in the development of this section of the country and they know that he is a real gin man.

Highway Designation

A delegation of Silvertown business men joined a group from Clarendon and went to Plainview Thursday to see the Honorable Joe Burkett, who is a member of the State Highway Commission, in reference to the proposed designation of a state highway from Clarendon through Silvertown and Floydada to Ralls. Business men at Clarendon and Ralls have been working on the project for several months and it is understood that the commissioners courts of Donley, Brisco, Floyd, Crosby and Garza Counties together with the county judges have signed the petition for the designation.

Breaks Jail

J. F. Harris, who was jailed here last week on a charge of robbery, broke jail early Sunday night and so far, has not been apprehended.

W. L. Allen who was arrested as an accomplice was acquitted in county court Monday, however, it is understood that he has been indicted by the grand jury of Floyd county on a burglary charge and that he will have to stand trial at Floydada in district court. He has secured C. W. Norrid, local attorney to defend him.

Buyers Garage Partner

Gene Simpson has bought V. L. Webster's interest in the Tourist Garage and he will continue to operate it under the same name. Mr. Webster has moved to Lockney.

Mr. and Mrs. W. H. Hilton and daughter, Laura Blanche, and Mrs. H. J. Willis and daughter, Troy, left last week on a visit down-state. Mrs. Willis is visiting relatives at McKinney and Durant, Okla., and the Hiltons are visiting Mrs. Hilton's relatives at Waco.

Lockney's New Fire Truck Has Arrived

Improvements Going on in City.—Two Children Drink Poison but Are Saved

From The Beacon:

Last Friday Lockney's new fire truck was unloaded, and is now at Montgomery Bros. garage, where it will be kept until a building can be arranged for as a regular fire station.

The new truck is an International and is equipped with two chemical tanks, special hand fire extinguishers, hooks and ladders, lanterns, hose, axes, and in fact everything needed for fire fighting purposes. The two chemical tanks make it possible to fight fire anywhere in the town or country, and while the firemen empty one tank the other can be refilled, making it possible to fight fire continuously for days at a time.

This new fire equipment is the very latest and best for a town in the Lockney size class, and will afford the very best of fire protection as far as equipment is concerned.

Dewey Floyd and D. E. Sullivan left Monday for Fort Worth and Dallas, whither they went to purchase fixtures for the equipment of a new cafe and filling station, to be installed in the new brick building, now being completed by J. H. Byington and K. D. Middleton.

The two year old daughter of Mrs.

Buchanan of Floydada, drank some gasoline, while her and her mother were visiting Mr. and Mrs. O. C. Bailey in Lockney Tuesday. Drs. Reed and Henry were summoned and cleaned out the little girl's stomach immediately and it is thought no real bad effects will be experienced by the child.

The four year old son of Mr. and Mrs. Colvern, who run the Home Laundry, went over to the Ford Service Station Tuesday afternoon and drank some antiseptic solution, which was being used by workmen to wash grease off their hands. Drs. Reed and Henry were called and washed out the child's stomach, and no after effects are looked for.

A deal was closed Monday by which Otis Harris became the owner of the City Tailor Shop, which was owned and operated by Mr. and Mrs. Hugh Counts. Mr. Harris will take active charge of the business on the first of June.

Mr. and Mrs. C. H. Huffman have

NOTHING LIKE IT ON EARTH

The new treatment for torn flesh, cuts, wounds, sores or lacerations that is doing such wonderful work in flesh healing is the Borozone liquid and powder combination treatment. The liquid Borozone is a powerful antiseptic that purifies the wound of all poisons and infectious germs, while the Borozone powder is the great healer. There is nothing like it on earth for speed, safety and efficiency. Price (liquid) 30c, 60c and \$1.20. Powder 30c and 60c. Sold by All Drug Stores

been quite ill at their home west of town for several weeks. Mr. Huffman is suffering from various complications and dropsy and Mrs. Huffman is sick from complication brought about on account of rheumatism. This highly esteemed couple are in very bad physical condition, and are appreciative of their friends coming to visit them.

Mr. P. J. Green has just moved his shoe shop and top shop, known as the Progressive Shoe Shop, to the rear of Montgomery Bros. Garage.

TWENTY DISTINCT USES FOR INTELLIGENCE TESTS

That the schools of the country are using intelligence and achievement tests with definite purposes in view is set forth in City School Leaflet No. 20 of the Department of the Interior, Bureau of Education. Of 215 cities reporting to the bureau, 64 per cent are using intelligence tests to classify pupils in the elementary schools and 62 per cent to supplement teachers' estimates of the pupils' ability. These cities report about 20 uses that are made of the intelligence tests, including, in addition to those named, diagnoses of causes of failures, guidance in the selection of highschool courses, determining the number of courses to be carried at one time by high-school pupils, extra promotions, etc.

FOR RATING RURAL SCHOOL-BOARD MEMBERS

A score card for rating rural school-board members has been devised by the Kansas State Teachers' College at Pittsburg, Kans., following the method of rating pupils, teachers, and superintendents of schools. According to this card, rural school-board members should have at least a good common-school education, own their homes read a standard farm paper and at least one good magazine, be in favor of spending money for well-trained teachers and of retaining such teachers; they should have expressed themselves as favoring good buildings and equipment, well-prepared and efficient teachers, and good supervision of instruction; and they should possess other desirable qualifications.

BIRTHDAY PARTY

Mrs. E. S. Randerson honored her daughter, Folia on her eighth birthday Tuesday afternoon of this week at her home from 4 to 6. Assisting the hostess were Mrs. B. P. Woody and Mrs. Calvin Steen.

The little guests played many outdoor games on the lawn under the direction of Mrs. Calvin Steen after which refreshments consisting of angel food cake and ice cream were served.

The guest list included: Lon Davis, Jr., Bert Lone Smith, Mary Anna Ross, Claribel Yearwood, John Knox Yearwood, Laverne McFarland, Mary Ann Kimble, John Wilson Kimble, Maxine Fry, Marylynn Fry, Junior Sanderson, Billy Price Woody, Rex Brown, Harold Brown, Billy Ray Randerson of Dallas, Carl Marshall and Vera Nell Marshall.

The honoree received many pretty and useful gifts.

If a good 40-acre farm in America were as highly populated as some farms of China, it would support 240 persons, 24 donkeys, and 24 pigs, according to the late Dr. F. H. King.

Between 4,000,000 and 4,500,000 snakes are used annually in Japan for medicinal purposes. More than 200 men make their living by serpent catching in the vicinity of Mount Iouki and ShigaKen.

CARD OF THANKS

We wish to take this means of thanking the many friends who were so kind and helpful to us during the recent illness and death of our loved one. We are so grateful to those of you who sent the many beautiful flowers.

RELATIVE VALUES OF PHYSICAL ACTIVITIES

Sports which seem to have the greatest value in a high school are walking, volley ball, playground baseball, tennis, swimming, dancing, soccer, jumping, basket ball, and the short races. These are also much the cheapest to provide and they require the least space. They should be furnished in all school systems. This statement is made by Dr. Henry S. Curtis, State director of hygiene and physical education for Missouri, in a study of the relative value of physical activities in high schools in School Life, a publication of the Interior Department, Bureau of Education. Doctor Curtis's conclusion is that walking represents probably nine-tenths of all the physical energy most of us develop, outside of the vital processes themselves. It is the only activity that most of us continue in after life. Every high school should have a walker's guide and develop a series of 20 to 30 walks of from 5 to 20 miles each.

"The Home of Good Merchandise."

Famous Advertiser of Advertising Makes Talk

Newspapers, however, are not in the habit of publishing misleading advertising, and for that reason the public has unlimited confidence in newspaper advertising.

The retail merchant who will figure on spending two per cent of his gross receipts for newspaper advertising and one-half of one per cent for direct mail advertising, such as letters, post cards, etc., and prepare this advertising the same as if he were talking to his customers when they come in his store, there would be no need to complain about quiet trade.

You may say, "How can I educate myself to write advertising?" I know many successful merchants who have gained their advertising education through reading and studying good trade publications which publish splendid articles in every issue. No one can prepare advertising for the goods you own and offer for sale as good as yourself. The merchant who is open-minded and visualizes his opportunity, getting his subconscious mind in working order, is not going to experience dull trade.

Like the bathing suit manufacturer a short time ago who originated a picture of a beautiful young lady wearing a bathing suit. He had an actual photograph done in colors and it was so unique and attractive that I have noticed thousands of these ads pasted on automobile windshield.

One of the most successful small town merchants who has been in business for forty years has the happy faculty of getting a lot of free advertising in his local newspapers. Upon his visit to the New York markets twice yearly he writes to the two newspapers of his town, telling about New York. He explains about the various improvements there that have taken place since his last visit—he tells about the merchandise market; he even goes so far as to give a brief history of the extravagant, as well as the economic, side of New York life. Hundreds of families in his territory look forward to reading his letters. You must capitalize upon everything pertaining to your business in order to get the public excited about your store.

Department stores in the large cities today never neglect to have their buyers, who go to foreign countries send thousands of letters to their customers and prospective customers, telling about the huge purchases they have made of foreign goods. I have received many letters from representatives of large Minneapolis stores mailed from Paris, London and other European points. They tell what time their goods will arrive in this country, they explain about the new unique styles, fabrics and values.

I am a great believer in taking my newspaper as a partner in my business. Every newspaper has hundreds of ideas that are workable and profitable that they are only too glad to pass on to retail merchants—a newspaper is a clearing house of ideas especially pertaining to retail business and I wonder some time if we try to get as close to our newspaper as we ought to, as they would like to be with us. If you are interested in your newspaper they will be interested in you, and if you follow up your advertising with attractive window displays, combining that with training your clerks and keeping up your direct by mail advertising, such as sending out a letter or post card monthly, you will find that your newspaper ads have greater pulling power than if you depended on it alone to sell your merchandise.

Take, for instance, the manufacturer, wholesaler, or jobber who backs up his salesmen with newspaper advertising and direct mail advertising. Practically 75 per cent of the salesman's work is already done, when he goes to call upon a prospective customer, through the advertising that has already preceded him, the prospective customer already having a very good idea of the merchandise through the advertising.

The crying need today is more advertising. No better illustration can I cite of the effectiveness of advertising than the case of Barker Bros., retail furniture dealers in Los Angeles. A few years ago they sold \$700,000 worth of furniture in their store and, through expanding their advertising investment, Barker Bros. last year sold 16 million dollars worth of furniture.

I should think we all take inventory of ourselves when confronted with actual instances like the above and note what Henry Ford has done the past year through advertising. Up to this year Henry Ford has done very little advertising, but, being far-sighted, he sold himself the idea that in 1924, and perhaps he had in mind not only 1924, but every year afterwards, he was going to invest a substantial amount of his gross receipts for advertising, and his appropriation for 1924 was seven million dollars. Within the past six months I have visited the Ford factories half a dozen times through some business dealings I had with this big firm, and I can assure you, Ladies and Gentlemen, that there has been no unemployment in the two Ford factories in Detroit—they have been running full capacity, three eight-hour shifts, steadily employing over 160,000 people besides the thousands they are employing in their other large plants all over the country.

Henry Ford has experienced a situation which makes it highly desirable

to advertise. Perhaps he foresaw the present slump, which has appeared to hit the motor concerns with special velocity. Perhaps he judged the time ripe solely because of the present restless attitude of the people and the fact that our Federal Government has declared an open season for swatting big business.

At any rate, for some six months now the Ford Motor Company has been displaying itself in the publications of the country, in newspapers large and small, in class periodicals, in farm papers, in general magazines, in street cars, in outdoor positions; and in many other forms of advertising.

With my brokerage business, we appropriated a million dollars for advertising this year, and we are like the National Cash Register Company, who claim they had the biggest business in all their business career during May of this year, and you know how difficult it is to sell cash registers. In an article I read the other day I noticed also that 400,000 Ford cars were sold during the months of May and June of this year and only a short time ago he started on his second ten million cars.

What is the Standard Oil Company doing? Their advertising appears religiously in about every newspaper in the United States. They bring home right to our very door the fact that it does not necessarily take money to do business—using your brains and thinking is what counts.

WHEN A GRIND GOES HARD

There are times when life seems pretty much hard work and discouragement, divided about evenly.

Day after day, week in and week out there is the same round of duties, to be done in the same old way.

Tasks that seem interesting when they are begun take on a deadly dreariness before they have finished.

Often the question "what is the use of it all," repeats itself time after time.

Outside the window people go and come, free apparently to do as they choose.

If we pass a railroad station on our way to or from work we see excited groups of travelers, looking forward eagerly to new and strange journeys. Thousands of people seem to have time to play and enjoy themselves.

Well, possibly. But apply the rule of comparison.

While we are working, quite comfortably at duties which certainly are not killing us, what are some of the other inhabitants of the world occupied with?

These are not alone Eskimos, who are more or less used to that sort of thing. Some who are white men, are up there doing the pioneer work that will sooner or later provide a better route of travel between the continents, and perhaps find vast riches which will be of use to the world.

In the heart of Africa, men are braving deadly serpent, and more deadly insects and diseases, that they may add to the knowledge of the people about the world that they live in.

Other people, and there are millions of these, are engaged in various parts of the world gathering and transporting goods that their fellow men may eat, and getting precious little of it themselves in return for exceedingly arduous labor.

And not so very long ago, only a few years, other millions of men were sleeping in reeking trenches or working their way into the enemy fire, so that the world might be saved from destruction.

Think about these things when the grind goes hard.

What would you give were you shipwrecked on a desert island to be back at the old job, sure of your next meal, an evening to spend with your friends, and a comfortable bed when you were sleepy?

What would you give, if you are facing an Arctic gale to be safe and warm in your place of occupation, even if the grind did happen to be going hard?

Establishment of a municipal university is under consideration in Boston. The City Council in September, 1924, requested the school committee to consider the advisability of such action and to report the findings to the city council. The board of superintendents recently made a report to the school committee in which the establishment of a municipal junior college was suggested.

\$11,000 Daily Salvage at Distillation Plant

Scraps and Sawdust Give up Score of Valuable Products in Ford's New Plant.

Detroit, Mich., May 27.—Operations have begun at the huge wood distillation plant of the Ford Motor Company at Iron Mountain.

This great plant, largest and most complete of its kind and a distinctly salvage development, has a capacity of daily producing charcoal and chemical products to the value of more than \$11,000 on the basis of present day prices.

It also constitutes the fifth unit in the wood working industry which the company has co-ordinated under one head at Iron Mountain, including everything from raw materials to the finished product and the reclamation of waste. The five are, logging, saw mills, dry kilns, body part plant and wood distillation.

Under the magic of modern science, hardwood scraps and sawdust from the Ford saw mills and small, gnarled and otherwise useless tree limbs from the Ford forests are now made to give up a score of valuable products. From a ton of such wood the Iron Mountain distillation plant reclaims:

- 135 pounds of acetate of lime.
- 61 gallons of 82 per cent methyl alcohol.
- 610 pounds of charcoal.
- 15 gallons of tar, heavy oils, light oils and creosote.
- 600 cubic feet of fuel gas.

The charcoal, pressed into briquettes, is suitable for producing the intensely hot fire required to purify high-grade iron and also is being sold through Ford commissaries as an exceptionally clean and economical fuel for home use.

Tar recovered from the wood, upon further distillation yields pitch, wood creosote and flotation oils, all of which are used in the Ford organization. The pitch is used for sealing batteries and insulating coils; the creosote as a preservative for poles, posts and railroad ties, and the flotation oils for mining purposes in the Ford mines.

The group of by-products containing methyl alcohol and acid, after being neutralized with lime, go to stills where the alcohol is driven off. The lime, combining with the acetic acid makes calcium and from this there is produced ethyl acetate, great quantities of which are used at the Highland Park Plant of the company in the manufacture of leather cloth for automobile tops and upholstery.

The methyl alcohol coming off goes to the refinery and emerges as methyl acetone and methyl alcohol, useful as solvents or denaturing agents. The remaining oils and the gas are used as fuel.

SWEET POTATO WEEVIL DRIVEN FROM TEST AREA

An indication of the effectiveness of the sweet potato weevil eradication work conducted cooperatively by the Bureau of Entomology of the United States Department of Agriculture and the Florida State Plant Board on the test area, which is known as the Baker-Charlton County, in northeastern Florida and southern Georgia, is the fact that no weevils were found in this area during the summer inspection in 1924. While two farms are still listed as "dangerous and suspicious properties," no weevils were found on any of the properties and it is believed that the area will be attained. At the beginning of the work in 1919 there were 196 infested farms and 68 doubtful farms. The number of infested farms has decreased considerably each succeeding year. It is felt that it will be necessary to maintain a careful patrol in this area for about two years after the last weevil has been found.

The importance of this eradication experiment lies not only in the quantity of sweet potatoes produced in this area, but in the fact that the infested zone is near Jacksonville, Fla., the principal railroad center of the State and the point through which practically all interstate shipments originating from Florida must pass. Had the infestation spread and included this point it is quite probable that it would have been impossible to ship any sweet potatoes from Florida to other States on account of the State quarantine now in force.

Sweet potato weevil eradication work has continued successfully also in southern Mississippi, Alabama, and two areas in southern Florida.

FIRST CHRISTIAN CHURCH DOINGS

We were glad it rained Sunday night, but sorry that it necessitated the postponement of the picnic, but owing to the dampness, muddy roads and cool weather we thought it best to postpone it. Be sure to be at Sunday School next Sunday and learn when it will be. The Sunday School will also start the Red and Blue Contest at that time, or rather select the captains and choose the sides and the contest will start properly on June 7th. You will want to be in from the start, so be present.

Next Lord's Day will be "Pentecost Day". The messages will be in accord with the day and occasion. It is known throughout the religious world as "Unity Sunday," and all the churches—the Catholic, Protestant and Christian Churches—are asked to bring a message on Christian Union. We will therefore, comply with this request. The subject of the morning sermon will be "How to get Christian Union." The night subject will be "How does it come we have so many different churches"—a chart sermon. This is a message that should be heard by all Christians and will be instructive and interesting to all. No one will be abused and the message will be given in the spirit of the Christ. Come hear it.

In the afternoon at 3:30 the pastor will preach out at Mayview School house. This will be a message on Christian Union also. Those living near there are invited to be present. If it rains and the roads are muddy we will not go, but if not, will be there.

UNDERGRADUATE SCHOLARSHIPS FOR STUDY ABROAD

To increase understanding and friendship among nations through encouragement of gifted American college and university students to pursue a part of their education in the universities of other countries, a group of donors have entrusted to the American Council on Education the sum of \$8,000 to provide for scholarships during the year 1925-26, each worth \$1,000.

To be eligible to receive one of these scholarships a student, either man or woman, must be not less than 18 years of age, must have been in residence for a period of two academic years at an American institution approved by the American Council on Education, and must expect to return to his American college to take his degree. There is no limitation concerning the countries or universities in which students may study, nor as to the field of study.—School Life.

MISTAKES AT DIFFERENT VALUES

When the plumber makes a mistake he charges for it.
When a lawyer makes a mistake it is just what he wanted, because he has a chance to try the case all over again.
When a carpenter makes a mistake it's just what he expected.
When a doctor makes a mistake he buries it.
When a judge makes a mistake it becomes the law of the land.
When a preacher makes a mistake nobody knows the difference.
When a printer makes a mistake—Good night!

A SOCIAL AGENCY AS WELL AS EDUCATIONAL

Alameda Public School, Baltimore, is conspicuously adapting itself to environment. The neighborhood is industrial and most of the people are of foreign birth. The teachers are active not only in classrooms and in supervised study but in outside activities as well. In cooperation with various agencies, medical examinations have been given 958 persons, 297 cases treated in the dispensary, 43 tonsils and adenoid operations performed, glasses prescribed and in some cases furnished, and 8,645 visits made to babies; and through clubs and games, hikes, and classes for mothers the school has become a community center. It is doing a far-reaching work in promoting higher ideals of living and of good citizenship.—School Life.

Mojica Will Appear in Concert at Plainview

Dashing Young Tenor of Chicago Opera Company Coming Back to Panhandle for Recitals.

Mojica (J has the sound of H) the dashing young tenor of the Chicago Opera Co. who has been rapidly rising as a famous star by singing in the greatest operas with Galli-Curci and Mary Garden is to appear in Plainview on Tuesday night June 2nd. Mojica made a tremendous "hit" in the Panhandle Music Festival in Amarillo last month and Emil F. Myers is bringing him back there on the strength of many hundreds of requests for his return. It is in connection with the Amarillo date that Mr. Myers is also placing him in Plainview. This will afford our people a great opportunity as Plainview is much closer than Amarillo where many Floydada people are accustomed to go to hear such artists.

Mojica has a wonderful, sweet, sympathetic tenor voice, and he also has a charming personality. His good looks has won him the title of the "Valentino of Opera". Singing Spanish folk songs in English, with costumes of his forefathers, as a big feature of his program. In these songs he completely captivates any audience anywhere. Jake Burkett of Plainview has charge of the ticket sale and Floydada people can secure tickets by writing Mr. Burkett. The prices are \$1.10 and \$2.20 according to location. The concert will be held in the Plainview Methodist Church. Mojica will also appear in concert at Lubbock and Amarillo.

SHERIFF'S SALE

The State of Texas, County of Floyd, Notice is hereby given that by virtue of a certain Order of Sale issued out of the Honorable District Court of Floyd County, on the 4th day of May 1925, by G. C. Tubbs Clerk of said Court for the sum of Five Hundred Forty Three and 21-100 Dollars and costs of suit, under a Judgement, in favor of Z. E. Mickey in a certain cause in said Court, No. 1642 and styled Z. E. Mickey vs. T. J. Dobson et al placed in my hands for service, I J. R. Maddox as Sheriff of Floyd County, Texas, did, on the 6th day of May, 1925, levy on certain Real Estate, situated in Floyd County, Texas, described as follows, to wit:

Located in Floyd County, Texas, 7 acres of land out of South West one fourth (SW 1/4) of survey 28, Blk. S. C. Patent No. 481, Vol. 27, described by metes and bounds as follows: Beginning 94.9 varas East of the NW corner of said Survey for the NW corner of this tract; thence East 142.6 varas for the NE corner of this tract; thence South 475 varas for the SE corner of this tract; thence West 71.3 varas for the SW corner of this tract; thence North 395.5-6 varas for corner; thence West 71.3 varas for corner; thence North 79 1-6 varas to place of beginning.

And levied upon as the property of T. J. Dobson & W. E. Jetton and that on the first Tuesday in June 1925, the same being the 2nd day of said month, at the Court House door, of Floyd County, in the town of Floydada, Texas, between the hours of 10 a. m. and 4 p. m. by virtue of said levy and said Order of Sale I will sell said above described Real Estate at public vendue for cash, to the highest bidder, as the property of said T. J. Dobson & W. E. Jetton.

And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Floyd County Hesperian, a newspaper published in Floyd County.

Witness my hand, this 6th day of May, 1925.

BURGLAR LEAVES W. H. PENIX A COLLAR AND BRIDLE

W. H. Penix Friday morning of last week went out to hitch up and go to planting, when he found he had had a visitor the night before, who had taken all of six sets of harness except one cloth collar and a bridle. The burglary had been committed some time Thursday night, by someone who evidently needed harness and needed it at once.

But our job is always the same. A fixed starting time. A fixed quitting time, the same time off for lunch. The same hours of the day allotted to the same old duties. Truly a sad life.

NOTICE BY PUBLICATION OF FINAL ACCOUNT

A letter, postcard, parcel, or newspaper, entering the mails is simply a piece of mail.

If, because of inadequate or incorrect address, and, in the case of the package—improper wrapping—a piece of mail must be taken out of the regular postal machinery for "directory service" or "hospital service", it becomes a NIXIE.

If the postal sleuths are able to correct the address, or return to sender for a better one, it again becomes a piece of mail—though "delayed mail" is the better sobriquet.

If, after an extensive effort, the postal "detective" must give up the puzzle, and there is no return address, the piece of mail is consigned to the Dead Letter Office, where it again changes its name to dead letter or dead parcel, as the case may be.

Its period of existence as a Nixie is the most expensive one. It demands special attention from the very best clerks. Valuable time is spent in its behalf, time which also may prove more costly to the mailer or intended recipient through the attendant delay.

But in the long run, the postal service loses most. In Chicago 400 workers do nothing but handle nixies. In New York the service costs \$500 daily. In all the nixie costs the government about \$1,740,000 a year.

OFFICER—NICKELS

Miss Faye Officer and Herschel Nickels, of this city, were married in Plainview Saturday of last week. Rev. J. Pat Horton officiated at the wedding.

Mrs. Nickels is a daughter of Mr. and Mrs. J. P. Officer. Mr. Nickels is a son of J. A. Nickels, of this city, and is associated with his father in the gin business.

Other thousands, from our point of view have work that must be absorbing and fascinating.

WHITE HOUSE HAS OLD TELEPHONE STAFF

There are three White House telephone operators, each of whom is on the staff of the Secretary to the President and has been a White House employee for more than a score of years, says the Texas Public Service Information Bureau.

So familiar have these operators become with the voices of the most frequent callers that usually they are able to call them by name before they have had the chance to identify themselves. Of course only a few people are permitted to talk personally with the President. Cabinet members, some of the leaders of the House and Senate and personal friends have their calls put through. But otherwise you are connected with the secretary to the President or one of the assistant secretaries.

HOW'D YOU LIKE THIS JOB?

News photographers are accustomed to working in dangerous places, but G. A. Shoemaker of the army air service is said to be the only one who risks his life regularly by falling in order to take a picture says Popular Science.

With three small motion picture cameras strapped to his belt and a parachute on his back this daring photographer, a senior instructor in parachute jumping, leaps from the wing of a Martin bomber.

As he falls, he looks about him calmly, taking photographs of bits of scenery or other objects of interest. If the parachute opens properly and he lands safely he then has for sale several photographs that are of unusual value and interests.

A few of them, up in the Arctic country, are dipping their shoe strings in oil and eating them, day at a time, to ward off starvation till they can find a seal or a caribou to give them food.

All work is hard. There is drudgery in all effort. But is all useful, and out of it a future may be built, provided you do not let the grind wear down your courage.

IT DRIVES OUT WORMS

The surest sign of worms in children is paleness, lack of interest in play, fretfulness, variable appetite, picking at the nose and sudden starting in sleep. When these symptoms appear it is time to give White's Cream Vermifuge. A few doses drives out the worms and puts the little one on the road to health again. White's Cream Vermifuge has a record of fifty years of successful use. Price 35c. Sold by

Home Demonstration Club News

19 DRESSES ENTERED IN CONTEST HERE SATURDAY

Last Saturday, the second annual Dress Contest as sponsored by the Home Demonstration Clubs of Floyd County was held in the County Court Room with 19 dresses entered. The four dresses winning the highest honors were those of Mrs. J. C. Collins, Sand Hill, first; Mrs. A. R. Hanna, Sand Hill, second; Mrs. Ernest Grigsby, Starkey, third; Mrs. L. H. Gruver, Lockney, fourth. These prize winning dresses will be sent in the fall to the Dallas Fair, as were the dresses of last year, to compete for State honors.

Due to the extremely busy time getting the seeds in the ground many of the club ladies who had their dresses ready for the contest were unable to bring or send them in last Saturday for the contest, so that the anticipated number of dresses to be entered at that time fell far short of Miss Faulkner's expectations. However, the judges, Miss Bess Edwards, Assistant State Home Demonstration Agent, Mrs. J. G. Clements, Head of Household Economics, Floydada High School and Miss Gertrude Connor, Instructor in Economics, Canyon High School, declared the dresses entered in the contest to be the most attractive group of dresses of that type that they had seen this year. Miss Faulkner stated that they showed a great improvement in general over all dresses of last year.

It is interesting to note that in the Dress Contest that the first and second places were won by ladies of Sand Hill. In the Kitchen Contest held recently the two first places in Class I and Class II were also won by ladies of Sand Hill. Mrs. A. R. Hanna of Sand Hill who won second place in last Saturday's Dress Contest won first honors in Class I of the Kitchen Contest.

SAND HILL CLUB

The Sand Hill Home Demonstration Club met last Wednesday, May 20th, in the home of Mrs. Walter Knight. The program was carried out as was announced. There were twelve members present and several visitors. We are always glad to have visitors. We feel quite sure that everyone enjoyed the demonstration on salad and salad dressings for they were very appetizing as well as attractive.

We were joyfully surprised at having Miss Blair from A. & M. with us at this meeting. She gave us some very interesting facts regarding good health and developing normal bodies. Those who missed this meeting missed something worth while. We hope every member will strive to go to every meeting. The cheese that we have been mentioning heretofore was served at this meeting; and it sure was good.

Our next meeting will be on June 3 in the home of Mrs. C. C. Green. The program will be "Roll Call; Value of a Steam Pressure Cooker". Leader, Mrs. V. C. Scott. Subject: "Fireless and Steam Pressure Cookery; Meal

Service". Making a Fireless Cooker—Mrs. M. B. Holmes. Demonstration Using Pressure Cooker—Mrs. G. C. Collins. Adjournment.

HARMONY CLUB

The Harmony Home Demonstration Club met at the home of Mrs. R. B. Gary May 19th. About 12 members were present and a number of visitors. One new member was added to the roll. Miss Faulkner was with us and gave a very interesting course in salad making. Several delicious salads were made and we all feel that this was a very profitable meeting.

The next meeting is to be with Mrs. O. H. Heard.

ALLMON CLUB

The Allmon Home Demonstration Club held its last meeting at the home of Mrs. Leslie Hix. Miss Fannie Harris was leader. Subject, salads and salad dressings. Miss Mabel Faulkner was with us and gave a demonstration of several kinds of salads which were much appreciated by all.

We had one visitor, Mrs. Foster and three of the junior club girls met with us. All come again.

June 12th is our next meeting date, at the home of Mrs. Krause. Subject: Fireless and Steam Pressure Cookery; and Meal Service. Leader, Mrs. Brown.

ERRORS IN PAPER

"The editor does not want anyone to send him any more copies of his paper in which they find mistakes," complains a Missouri exchange. "If they find a perfect copy, however, he will pay a big price for it. If the fool critic who hunts for mistakes in newspapers would find them all he would be kept busy. We will be pleased to find a merchant who never makes a mistake in putting up an order; a lawyer who never lost a case through his own error; a doctor who never diagnosed a case wrongly; a druggist who never made a mistake; a postoffice official who never put up mail in the wrong box; a woman who will never forget to put tea in the teapot before putting in the water or put in salt while she was cooking. Bring in some of your mistake paragons who find it so easy to criticize the newspapers and we will give them the chance of their lives to find out if they are really human."—Oklahoma Odd Fellow.

Frederick W. Taylor, the efficiency expert, always shielded his wife from worry, at one time even going so far in the testing of a new saddle horse as to wear one of her borrowed skirts and ride a side saddle that she would use.

ASK DAD

THAT'S RIGHT ASK DAD—WHERE HE DRESSES WHEN HE WANTS TO FEEL LIKE HE'S DRESSED UP.

And we've never even suggested that you could buy ten cent cigars here for five cents.

We learn, too, as we proceed; and the experience of learning always shows itself in general details of betterment. So I say with all earnestness. My stock is better than ever.

If there is better merchandise for men I can sell at a popular price—I'll have it.
