now consider the last word in safety and convenience, as the first electric iron was over the sad irons heated on top

Imagine an iron that turns itself off before it gets too hot - then turns itself on again before it gets too cool!

What a help, and what a safeguard! You don't have to press and pull on fine fabrics to help out an iron that's underheated. You don't have to rush with fussy sheer things for fear your iron will get too hot.

Always there's heat just as it should be, evenly distributed all over the generous broad surface of the iron, down to the very end of the tapering point designed especially for those hard-to-iron places.

The temperature is controlled automatically by the Million Dollar Disc Thermostat — a simple bi-metal disc, nothing to go wrong, nothing to get out of order.

Due to oil tests starting in Floyd County there is some inq leases and also for Royalty interests. There could be nothing at preent to create this demand except the development feature of the game. We might see a big oil field developed in Floyd County and then it might be a blank but while the fever is on is a good time to get some of the money. The land owner has THE LONG END OF THE STRING provided he pulls the string at the right time. When you are offered a fair price for your lease SELL, reserve part of your land in case leases go higher. DON'T get excited and think they have to have your land for they do not, if you won't sell, your neighbor will.

We have some customers now for leases priced right and in right location. Do not lease your land until you have talked to us. We handle leases and Royalties on a commission basis and will do our very best to handle them satisfactorily.
