City Tax Valuations Pass Two Million Mark

City Council in Meeting Tuesday Night Sets Levy at \$1.45, Same as Last Year.

Total taxable valuations in the City ritory this year.

The Public Health Association is sup-Total taxable variations in the City of Floydada for the current year have passed the \$2,000,000 mark, according to the totals of renditions which have been put into the city's tax rolls by City Secretary Burl Bedford, and on which hasis the council Tuesday night set the tax rots at \$1.45 the same as the rate tax rate at \$1.45, the same as the rate

\$2,029,000 to be exact, an increase over last year of approximately \$120,000. The same basis of valuations were used this year as last.

The tax rate of \$1.45 is divided among the various funds as follows: General 75c; waterworks bonds 30c; sewer bonds 25c: street maintainence 15c.

lowing their aproval by the council, will ter community church. A complete pro be ready for payment of taxes by the gram has been arranged for the three property owners.

November 11-24 Date Set For Red Cross Roll Call

Red Cross Answered Call to 77 Major Bullard. Disasters in America In Year Now Closing.

After receiving notice that the dates for the annual Red Cross Call this year Bro. D. I. Bolding. had been set for November 11 to 24, and an urgent request that every effort be put forth to obtain a full quota to the call this year in Floyd County, Judge F. P. Henry, County Chairman of the P. Henry, County Chairman of the 11:20-12:10—Sermon—Rev. Jones American Red Cross, announced the appointment of J. G. Wood as chairman of the Roll Call Campaign and urged that

1:30-2:20 unstinted support to the Red Cross program be given by citizens of the county

The fact that the year of 1927 has been one of many disasters in the United States has called for an outlay of great proportions in money and sup-plies by the Red Cross, the Mississippi Valley floods being the largest of seven-ty-seven disasters that have assumed major proportions in the year. For only two of these disasters has the Red Cross asked for funds outside of those provided by the drive of last fall, Mrs. Eleanor Finch, field representative of the Mid-western Division of the American Red Cross, declared here Monday.
Mrs. Finch was here aiding in assembling the forces and completing the local organization for the Floyd County drive.

"In asking the continued support of Floyd County people for the Red Cross, we ask that it be remembered there are still 30,000 ex-service men in hospitals P. Ashby. of the United States for whom we have 2:00-4;0 undertaken and pledged to supply recreation and attention to their social and family problems, in addition to the disaster work to which the Red Cross yet failed to respond," Mrs. has never yet failed to respond, Mrs.

Finch said to a reporter for The Hesperian. "In addition to this fact," she continued, "Only fifty cents of the membership paid in, regardless of amount of the donation by the subscriber, goes to the national fund, the balance remaining in the treasurer chest at home for home needs."

The goal of memberships the nation nounced. over this year is 5,000,000, an increase memberships subscribed last year. For Floydada the goal is set at 100, with an equal number asked from Lockney.

At Lockney. At Lockney an organization is being formed for the purpose of taking care of the Roll Call Campaign there.

Serving The Interests Of All

Citizens of Floydada will vote Monday of next week on a proposition of vital mport to the future civic beauty of their city. Not only is it fair and just that a large vote be cast, but also it is essential that every qualified voter indicate his or her preference in the matter that will have without question an important bearor her preference in the matter that will have without question an important bearing on local affairs in years to come. No minority should rule and the majority should express their opinions by voting Monday, October 31.

The proposition presented states: "That the City Council of Floydada be authorized to close Mississippi Street at the point of its intersection with the right of its intersection with the right of city will be one of the officials at the class of the local committee on arrangements named recently, and Geo. W. Sherrell, O. M. Morrow and B. G. Morton are members of the game would be called at 3:30 o'clock at the ga should express their opinions by voting Monday, October 31.

ly in entertaining the tremendous number of club women from over the world ber of club women from over the world below to be a second of the point of its intersection with the railway city, will be one of the officials at the plan was to hold the banquet at Zeek's Cafe. ompany to erect a passenger station and depot in and across Mississippi Street." Here are four main points that should be given full consideration:

1. Since the matter is of such importance, it is the plain duty of every qualified voter to go to the polls, no matter whether he or she is for or against closing

the street. Be sure and vote Monday, October 31. 2. There should be no confusion as to the location of the proposed depot. If Biennial. Mrs. J. B. Jenkins, of this the City Council is given the approved power to act, the first street south of the NEW HARMON STORE AT RALLS District on "County Co-operation," will be blocked. The approximate location of the new station will be one block south and two blocks east of the square. tion of the new station will be one block south and two blocks east of the square. It should also be noted and remembered that there are no other proposals for the closing of streets before the City Council at this time.

3. Gertain it is that some property owners will suffer damages but a close review of the proposal has disclosed that the loss to individuals will be slight when compared to the advantages that will be gained by the citizenship as a whole by compared to the advantages that will be gained by the citizenship as a whole by locating the new depot at the street intersection of the right of way. The advantages far out-weigh the disadvantages.

4. Under the signed statement of C. H. Sommer, president of the Q. A. & P., the people of Floydada have been given definite assurance that a \$35,000 station will be erected if a favorable vote is cast for the closing of East Mississippi Street. No doubt the railway company would erect an imposing depot even though they are not permitted to close the street, but when the interests of the citizens as ter he received his diploma as a graduate undertaker.

The quarters vacated by the law firm in the First National Bank Building are well as those of the railway officials can be served by carrying out a single plan, well as those of the railway officials can be served by carrying out a single plan, then the quicker the project is accepted the better it will be for all concerned. Week to Ralls to make their home. Verwho is moving today from his location in the Barrow Building at the northwest to give a heavy majority of ballots reading "For the Closing of the Street."

The quarters vacated by the law firm are not permitted to close the street, but when the interests of the citizens as made the statement that 69,994 Chevrolets that been sold in the United States since the first of October and up to give a heavy majority of ballots reading "For the Closing of the Street."

BAND GOING WITH FOOTBALL Baptists Set November

The Floydada Municipal Band will make the trip to Spur tomorrow with the Floydada High School football squad joining with the other fans of Floydada to cheer the local boys on to victory.

Chief among the various subjects to be discussed at the meeting of the loband are anxious to see the Green and held in the County Court room next Wed-Spur team, over which last year the F. H. S. squad nosed out a 14 to 13 victory.

TRAINING IN SPORTS

For the next few months football, the most popular of amateur sports will hold the spotlight of interest. The season is now in full swing.

Sports, it is asserted, furnish two important parts in the development of a the cemetery. Young man's life—the exercise and Resolve too. physical development and the true meaning of fair play. Sports may be strenuous or even rough, but they must be clean. The contests are tests of skill and fair strategy and without doubt contribute in the preparation of the young men for the tasks of life which lie before them.

It is an easy matter for the victor ious to be cheered by the grandstands but the vanquished, who often have a better reason for real pride in their game, often are neglected by the crowds. It does not so much matter which con-testing team wins as it does which play-ed the game in a truly sportsmanlike manner, striving to do their best but taking their losses like men.

And so it was last Friday at the Floydada-Hale Center game—the latter team giving their all and losing under overwhelming odds. To the Hale Center team, words of praise are due them for their valiant fight.

This same fighting spirit has been displayed upon occasion by the Whirlwind dropped to freezing following a north-teams of Floydada High. The dogged determination to struggle on and on even in the face of defeat is a visible barrels. Monday night the temperaexpression of the indomitable spirit of ture dropped to 28 degrees.

Young men of these teams with Last week H. E. Edwards formerly of such practice and ideals that spur them this city, and M. F. Slover, of Canyon, on in the sport world are the men who may later be trusted in the business world as associates or competitors. And when sports, generally, teach fair and honorable playing of the game, rather in exchange. than merely emphasize the winning, they will truly deserve the hearty support of every man and women who is interested in the future citizenship and the welfare

sport pages of the newspapers should give the fair winner his well-earned need of praise, yet not forget the applause which is due the loser who play-corresponds to those of the complete ed the game cleanly and well. It is up files. to the sport loving public to make the gridiron, the court or the diamond a Mr. and Mrs. W. U. White returned worth-while training ground for young home Sunday from Dallas, where they men, or render it a mere Roman arena had been for a week on business and where victory alone is the sought-for attending the State Fair.

CLEANING THE STREETS

Pavement on the streets is an asset to any city, not only during rainy weather but also during the dry seasons But the length of service of that pavement and its civic worth can be measured by the care taken in its preservation Any house wife would question the sanity of an individual who proposed that she attempt to keep her house clean by substituting a tooth brush for the broom. Such an idea is absurd? Quite true, but no more hopeless than attempting vainly to keep the streets of Floydada clean and free from trash with a push broom and a coal shovel.

Floydada needs a street sweeping machine and that need is apparent today, as a survey of the public square any Sunday morning will disclose. After a busy Saturday, the gutters are filled with refuse paper, sticks and rubbish. Dirt and mud from car wheels and fenders add to the collection until the many visitors here during the week-ends no doubt have a difficult time of deciding whether they are gazing upon the streets of a West Texas town or upon the floor of a circus tent with its customary layers of confetti, peanut hulls, paper bags and hay.

Keeping pavement clean is a big job and the fact that half of the main

thoroughfares around the court house are unpaved certainly does not reduce the size of the proposition one iota. One good rain and about one hundred cars moving from the mud around the court house can work wonders in a very few minutes in the way of making a per-

STRIVING FOR BETTER SERVICE

Ever striving to render a better service to our many customers of Floydada and Floyd County, we are now laying our plans for a greater plant.

From Good to Better. We have always claimed our service in laundry work to be excellent—but soon it will be better than ever. Just try our work one week, that is all we ask, then you, too, will let us do all of your work.

Santa Fe Purchases Promote Prosperity

WHILE the Santa Fe is itself a large employer of labor—its payroll in W 1926 totalled \$107,000,000, and its employes number more than 75,000—indirectly as a buyer of materials and supplies it helps to furnish employment to many more. Such purchases last year exceeded \$64,000,000. In addition it bought over \$12,000,000 of new cars and locomotives.

Its largest class of material was fuel, which totalled \$24,360,000. This consisted of about 2,267,000 tons of coal, and 507,800,000 gallons of fuel oil. The use of coal or oil on any division is determined primarily by which is the cheaper fuel in that locality.

The second largest class of purchases was iron and steel products, for which the expenditure was approximately \$19,750,000. This included an expenditure of \$9,500,000 for 152,700 tons of rail, frogs, switches, and fastenings. \$1,500,000 went for wheels, axles, and tires, and \$306,000 for flues and tubes for locomotives. Bridges, turntables, structural steel, forgings, and fabricated, unfabricated, and pressed steel took nearly \$3,000,000. Steel and iron are basic necessities in railroading.

Purchases of forest products totalled \$6,412,000, which included over 3,000,000 cross ties, and large quantities of lumber and timbers. The Santa Fe creosotes its ties and much of its timbers, otherwise greater quantities would be needed each year.

Folders, report blanks, notices, tickets, tariffs, and various items in the stationery line required \$1,225,000, electrical materials \$660,000, lubricating oil and grease, illuminating oils, waste, etc., \$1,180,000, and air brake material \$617,600.

These purchases were necessary to maintain the railroad properly and to give satisfactory service to the public. They were covered by 130,000 invoices and were made from 3,347 individuals and firms. Note the wide spread of this buying.

Thus the Santa Fe and all railroads are an important factor in maintaining the prosperity of our country through the employment arising from these large purchases of supplies, as well as the millions directly disbursed among their own employes for services.

When the railroads are doing well, they buy materials and supplies on a larger scale than when net revenues fall off. Money thus spent mainly pays for the labor of many persons, helping merchants, farmers, everybody —your own community included. You therefore are vitally interested.

THE NEW COMBINATION

Delco-Light

COMBINING THE DESIRABLE FEATURES OF BOTH AN AUTOMATIC AND A BAT-

This new Delco-Light, a scientific marvel, possesses features never before incorporated in an electric plant. It it a great forward step—the greatest farm electric development since the introduction of Delco-Light in 1916.

This combination Delco-Light provides automatic service from the generator for heavy loads, and with this combines economical storage battery service when only a small lighting current is required. Every desirable feature of both types of plants has been retained in a successful combination of Delco-Light.

The model 778 Delco-Light truly represents the most advanced and greatest scientific achievement in the farm electric field.

CITATION BY PUBLICATION

Quanah, Acme & Pacific Ry. Co. Vs. L

Condemnation Proceedings Before the County Judge of Floyd County, Texas. To L. J. Valentine, Hettie Valentine, L. J. Valentin, W. L. Covey, Lou McGaughey, widow of J. D. McGaughey deceased L. Lackey, and Sid G. Castle, and the heirs and legal representatives of the said L. J. Valentine, Hettie Valentine, L. J. Valentin, W. L. Covey, Lou McGaughey, widow of J. D. McGaughey, deceased, J. D. McGaughey, J. L. Lackey, and Sid C. Coatley. and Sid G. Castle:

You are hereby notified that the Quanah, Acme & Pacific Railway Company, a Texas Corporation of Hardeman County, Texas, has filed its appli-cation with Honorable Wm. McGehee, County Judge of Floyd County, Texas, to have Lots Numbers Seventeen (17) and eighteen (18) in Block Number Eighty (80) of the town of Floydada, in Floyd County, Texas, as shown by plat said town of record in the Deed Records of Floyd County, Texas, con demned for the use and benefit of said railway company in the construction, maintenance and operation of its line of railroad over and across the above described land which is alleged to be owned and claimed by you, the above named persons; that said railway company has been unable to agree with you as to the damages in said condemnation and has asked for the appointment of special commissioners to assess said damages, and that the county judge has appointed

the undersigned as such commissioners.
This is therefore to notify you that we, the undersigned Special Commisioners, duly appointed as such, have selected Friday, December 2nd, A. D., 1927, at ten o'clock a. m. at the Court House in the City of Floydada, Floyd County, Texas, as the time and place for hearing the parties herein and to fix the mount of damages

E. W. Holmes,
W. T. Rogers,
N. T. A. Byars,
Special Commissioners.

CORRESPONDENCE CLASSES FOR CHILDREN IN AUSTRALIA NOW

Correspondence classes for children iving beyond the reach of schools have been organized in Western Australia, as described in an official account of the work in School Life, a publication of the Department of the Interior, Bureau of

Enrollment in correspondence schools has increased in eight years from 54 pupils to 1,296, with promise of further growth. Teachers engaged in corresprondence work enjoy the same privileges with regard to holidays, long-service leaves, salaries, etc., as those employed in ordinary schools. The work is carried on under the direction of a senior inspector of schools, with a staff of 1 head master, 25 assistant teachers, and 2 typists. Lesson sheets from the correspondence school center at Perth are sent to all parts of the State. A year's course is covered in 20 lessons. Textbooks and note paper on which the lessons are to be worked are supplied free by the education department. At pres-

university junior certificates.

NEW SERVICE FOR AIRMEN

Cross-ocean flying demands a new service by the United States Weather ust 13 and again on August 15 by the broadcasting for the first time of United States weather reports in a foreign language. The first example of such a service came in connection with the unsuccessful attempts of the German airplanes Bremen and Europa to fly from Dessau, Germany, to the United States. The Weather Bureau telegraphed comprehensive weather information to the naval radio station at Bar Harbor, Mt., for broadcasting in German. The bureau suggests that "it is probable that with the progress of intercontinental flying the practice will become fairly common in the near future."

H. T. Bridges and wife, of Sanger, Texas, visited here serveral days the past week with Fred Taylor and family. They

Frequent Attacks

"I suffered with severe bilious attacks which came on me two or three times every month," says Mr. Ollie Miller, of Murray, Ky.

"I would become dizzy. My head would ache terribly, feeling as if it would almost burst. It felt exactly like a tight band was being drawn closer and closer around my temples.

"My stomach would be so upset I could not retain any kind of nourishment for hours. I would have to quit work and go to bed.

"My color was awful. I was yellow and my skin was drawn and dry. I did not have any

and dry. I did not have any energy—no ambition to work. I was just about half sick most of the time because of these spells. "One day one of my neighbors, who has used Thedford's Black-Draught for years, said he had noticed how bad my color was and thought it would help me. "I got some Black-Draught immediately and began to take it regularly until I got my system clear of the poison I had been absorbing. I soon began to feel better and developed a fine appetite. I had no more bad headaches or bilious spells." E-126

ORGANIZE DRAMATIC CLUB

Students of F. H. S. met recently and Biebel acted as president during the prcanization and election of officers. The ollowing students were elected as of-icers: Orville Moore, President; Truman Webb, vice president; Ruth Jen-kins, secretary; Claudie Green, treasurer Ouida Bell, reporter.

A refreshment and program committee was appointed by the president at the

organization meeting. The second meeting of the club was held on Tuesday afternoon of last week. A delightful program was rendenred by a sextette, saxaphone duet and Robbie Archer entertained with a pianologue.

The next meeting of the club will be held in the form of an initiation party on Tuesday evening of next week.

DATE GROVES IN CALIFORNIA

Date growing is now a promising ousiness in California and Arizona. The quality of the product is far superior o that which comes from the Persion Gulf, region and more sanitary and attractive than the dates of north Africa, rom whence most of our varieties were ntroduced. But date growing is an expensive venture. To prevent importa-tion of dangerous plant diseases the Department of Agriculture exercises a gid quarantine on importation of nur sery stock. The date palm is propagated only by the taking of offshoots from established trees. It is thus impossible to multiply the groves at a rapid rate, and prices for offshoots of the best varieties suitable for planting are high, ranging from \$10 to \$25 each. About so the investment for stock alone would amount to from \$500 to \$1,250 an acre. The estimated profit per acre, with prices at the present high level, averages about \$500 a year. A single palm in full bearing will yield from 100 to 200 pounds of fruit annually under avorable conditions.

BETTER-SIRES IN KENTUCKY

in relation to music was stressed. The class work was prefaced by a short lecture in which Mr. Young gave the following interesting facts: that approximately twenty thousand schools of music throughout the United States had national affiliation. That all music teachers in order to secure affiliaton must pass examination put out by national examining board.

A special feature of the demonstration was the rhythm of the keyboard presented thru means of the Rhythm Orchestra. Tambourines, Castinets.

BETTER-SIRES IN KENTUCKY

The department cooperates by furnishing literature on animal breeding and also farm signs carrying the statement "Purebred sires used exclusively on this tock in Kentucky is going forward under a system of better-sires campaigns, the purpose of which is to replace scrub and grade bulls and other male breeding animals with purebreds of good breeding. During July such campaigns were held in Gallatin, Owen, and Grant Counties in Kentucky, according to a report to the United States Department of domestic live-stock in Kentucky is going forward under a system of better-sires campaigns, the purpose of which is to replace scrub and grade bulls and other male breeding and also farm signs carrying the statement "Purebred sires used exclusively on this trended to make the purpose of which is to replace scrub and grade bulls and other male breeding and the Nousand persons have attended the meetings held in connection with the National Rabbit Federation and the Fontana Farms Co. - Two Trucks

that lead the world in popularity

The number of Ton and 1/2-Ton trucks in use today is far greater than that of any other capacities—for these are the units used by thousands upon thousands of retail merchants to meet the requirements of modern delivery service.

And because Chevrolet offers the greatest value available in each of these two sizes -and because it offers the world's lowest ton-mile cost -both the Chevrolet Ton and 1/2-Ton trucks are leading the world in popularity.

Come in-and see for yourself what Chevrolet offers you in comparison with other haulage units. Then you'll know why Chevrolet is the world's largest builder of gear-shift trucks-with undisputed leadership in both the Ton and 1/2-Ton fields!

Questions On Health

What length of time is required for the development of rabies in a dog

that has been bitten by a rabid animal? (JA.C., Corsicana)

2. What effect does poor ventilation have upon health? (Teacher, Canton) What is a simple antidote for

poison ivy? (Rambler, Woodville)
4. How can poison ivy be distiguished from other plants? (Rambler, Wood-I have been bothered quite a good

deal with indigestion for a year or longer. What should I do to prevent this? (M.E.L., Sour Lake)

6. How should milk be cared for in the home after being delivered by the dairyman? (Housekeeper, Brownsville)

ANSWERS

1. The incubation period of rabies is extremely variable. Dogs that have been bitten by a rabid animal may de-velop symptoms in two weeks or even less, or in exceptional cases, may not become rabid until from six months to a year. The incubation period varies according to the virulence and quantity f the virus introduced, and the loca ion of the bite. Deposition of the virs in large nerve trunks or in tissues ear the central nervous system, as in the case of bites about the head tends shorten the period.

2. Poor ventilation may manifest it-self not only in listlessness and indiference on the part of the child, but lso in sluggish digestion. Overheated oorly ventilated rooms have an effect on the nervous system and upon the balanced distribution of blood to all arts of the body.

3. As soon as the poisoning is dis-overed, the affected parts should be athered well with brown laundry soap nd rinsed with hot water. The lye o in the soap serves to kill oison. Do not use a basin to wash the ffected parts, as the poison oil from he wounds may be rubbed into the skin gain and cause further poisoning of naffected parts of the skin. Gasoline or alcohol may also be used to wash the offected parts when laundry soap is not available. If these simple remedies ail to stop the trouble, consult your family physician.

4. Beware of plants that have three leaves in a cluster, as poison ivy is one of this variety. Plants having five leaves in a cluster are considered "harmless to man and child." The leaves of poison ivy also have a glossy yellow

5. That distressing feeling termed indigestion," is a warning that trouble exists within the body, which be serious organic disturbance. Simple spells of indigestion may be due to improper diet or other causes, and the relieved when the cause is removed. Intestinal distress that continues over any period of time, should be given serious attention, and one's family physician should be consulted. Some good rules to follow in preventing indigestion are: eat slowly at regular times; chew your food well; avoid eating foods that are known to disagree with you; do not overeat; drink plenty of water; rest awhile after meals.

6. Take in milk as soon as possible after it is delivered, and place it on ice; do not remove the milk from bottle until it is needed for use; wash the mouth of bottle before pouring out milk; if all of milk in bottle is not used, re-turn bottle to ice box and replace cap; wash bottle thoroughly after it is em ptied, and return promptly to milkman.

FIND USE FOR WHEAT STRAW IN MAKING NEW INSULATION

Turning wheat straw-a waste by product of the farms of the Central West-into insulating "boards" is the latest and most interesting development of the scientific investigation of the possibilities of utilizing waste material of the farms in industrial enterprises and as a source of revenue to the farmer. Wheat straw is of virtually value to the farmer except as bedding material for his stock. It isn't worth the cost of the time and labor that is required to spread it over the land, be ause it has no fertilizing value. turning it under a little humus is added to the soil, but it takes so long to break down its fibrous structure that the straw is more of a nuisance than a benefit, because it interferes for several seasons with the work of putting the land in proper tilth for succeeding crops. comes the scientist with lemonstrated fact that wheat straw because of the long tough quality of its fiber, its low moisture content and its resistance to the corroding influence of the elements can be manufactured into insulating "boards" of the highest quality known through the use of vegetable

When reduced to a pulp and formed into "boards" the product is an ideal non-conductor of heat and cold and is fire resistant to a high degree. These boards are used in the roofs, and as a plaster base in place of lath in the consturction of buildings and as insulating material for refrigerators and cold

storage warehouses. The first mill to engage in the manufacture of straw into insulating boards

SCHOOLS CONTRIBUTE TO INTERNATIONAL GOOD WILL

petitive games in connection with the celebration of child health day at Caexico, Calif. For this occasion the Mexican guests were given free passage through the United States customs and immigration barriers. The event was can teachers in the Imperial Valley of California and Mexican teachers in Lower California, organized in the in terest of international good will and to promote interscholastic activities. Earlier events were the participation by American teachers in the observance in Mexicali, Mexico, of the birthday of Benito Juarez, and the visit of Mexicar teachers to a California town on February 22, to honor the memory of George Washington.

SCRUB-SIRE TRIALS AID MUCH IN LIVESTOCK IMPROVEMENT

As a means of increasing public interest in improved livestock, scrub-sire trials have been unusually numerous during the last few months, according to the Bureau of Animal Industry, United States Department of Agriculture. They are commonly held in connection with picnics, livestock-association meet ings, and similar gatherings. Many of the trials are staged according to an utline which the Bureau of Animal Industry distributes, but the participants are usually local officials. One of the latest trials reported to the department was held under the auspices of a cooperative creamery in Michigan in connection with its annual "ice-cream feed." Two local attorneys, an exjudge, the county clerk, and the county sheriff handled the legal part of the trial. The county agent arranged for the educational features, including the display of posters and pictures furnished by the United States Department of Agriculture.

Although the trials are mock affairs at which the prisoner is commonly a scrub bull, boar, ram, or rooster, the jury's decision represents nevertheless the sentiment in the locality. In all cases thus far reported the trials have resulted in a verdict against sires that are not pure-breds of good breeding.

On July 1 a total of 17,600,380 cattle in the United States were under supervision for the eradication of bovine tuberculosis. Besides this number, considerably more than 4,000,000 cattle are on waiting lists and will be tested as soon as the Federal, State, and county veterinary inspectors complete other work for those owners who signed up earlier for tuberculin testing.

In many of our dairy herds to-day culling should begin with the elimina-tion of the sire, says Dr. J. C. McDowell, of the Bureau of Dairy Industry United States Department of Agriculture. Breeding to inferior bulls may pull production down as fast as the culling of low-producing cows builds it

Doctor McDowell tells of one herd in which a scrub cow produced 146.8 pounds of butterfat in a year. Her daughter, ired by a scrub bull, produced 126.3 pounds, and the granddaughter, sired by the same scrub bull, produced 99.7 pounds, hardly as much as the world's record for a goat.

The owner finally woke up, sold the scrub bull to the butcher, and purchased a good registered bull.

AVERAGE HAUL OF LUMBER ON INCREASE IN UNITED STATES

The average rail haul of lumber from place of maufacture to place of use has practically doubled in the United States in 10 years, according to the Forest Service, United States Department of Agriculture. Estimates for 1924 placed it at 725 miles, whereas in 1914

estimate put it at only 360 miles. Inbound lumber to the Northeastern States travel an average distance over the railroad of 840 miles; to the Lake States, 910 miles; to the Central States, 890 miles; and to the Prairie States, 1,515 miles. This does not take into acount the larger amounts of lumber that ome by water through the Panama Canal from the Pacific Northwest to the tlantic coast.

The Northeastern, Central, and Lake States were once great lumber-producing regions, but are now producing only a small fraction of their lumber needs, necessitating the bringing in of lumber rom great distances. Better and more widespread practice of forestry on farm woodlands and the reforestation and proection of idle, cut-over and burned-over lands in these States, says the Forest Scripture: Rom. 4:1-5; Gal. 3:23-29, Service, will reduce this necessity in time, as they are still potentially large lumber producers.

HALLOWE'EN FESTIVAL

A Hallowe'en Festival will be held at Starkey School Auditorium October 29,

Real fortune telling, fishing pool, games and other spooky amusements. Everyone invited. Proceeds go to benefit of school.

GORGEOUS DAHLIAS GRACE DESK AT HESPERIAN OFFICE

Two of the most gorgeous dahlias for four days last week graced the main desk in the editorial office of The Hesperian, having been grown and presented by Mrs. Maude E. Hollums, of the Hollums Greenhouse.

From tip of petal to tip of petal the lahlias measured full five inches across yard in length, the equal of dahlias wn in New Jersey, the natural home this type of dahlia. Dahlias are easily grown in Floyd County yards Mrs Hollums said, if they will only be given a little care and attention. These particular dahlias were grown in the open yard and are an indication, she said, of what any home owner could do in the way of beautifying home grounds.

PROTECTING ORCHARDS FROM

The most satisfactory method of controlling field mice in orchards is by the use of poison bait. Put the poison in wooden or other containers, which are accessible to mice but which will protect the poison from the weather and also from birds, and place these near the fruit trees. In orchards where mice are abundant it is advisable to place container under each tree. The following preparation is designed for use as a permanent bait in poison stations or containers and has also proved satisfactory for general use:

Mix together, dry, 1/8 ounce of powdered strychnine and 1/8 ounce of baking soda. Sift the strychnine-soda mixture over 1 quart of rolled oats, stirring constantly to insure an even distribution of the poison through the grain. Thoroughly warm the poisoned rolled oats in an oven and sprinkle over them 6 tablespoonfuls of a mixture of 3 parts of melted beef fat and 1 part of melted paraffin, mixing until the oats are evenly coated. When the grain

is cool it is ready to use.

The Biological Survey of the United States Department of Agriculture has developed several formulas for preparing baits and directions for distributing them. This information will be sent free upon request to the bureau at

BAKED STUFFED CYMBLING

Members of the squash family are sometimes overlooked by even the homemaker most anxious to vary her menus. The Bureau of Home Economics U. S. Department of Agriculture, suggests baked stuffed cymbling as a good way to combine pork with a delicious vegetable. Try the following method of preparing it: 1 large tender cymbling; 1½ cups dry bread crumbs; 1 tablespoon chopped onion; 1 tablespoon chopped green pepper; 4 tablespoons butter; salt and pepper; ½ cup vegetable if desired, such as cooked peas, carrots, beans, or celery; Crisped bacon or cubes of salt pork. Wash the cymbling. Scoop out the pulp with a spoon, being careful not to break the outer skin. cook the cymbling shell until tender in boiling salted water. Remove and drain. While the shell is still warm, rub the inside with butter so the flavor will go through the vegetable. Brown the onion and green pepper in the fat, add the bread crumbs, and stir until well mixed. Cook the inside of the cymbling until tender and dry; add to it the seasoning and the bread crumbs. Mix small pieces of the crisped bacon or salt pork and any of the vegetables mentioned with the other ingredients. Place the mixture in the shell and cover the top with buttered crumbs. Bake in the ove until hot through and golden brown

Phone 27 and let us deliver your order

Like getting a premium

One thing is certain; all cotton must be ginned, and the cost, based upon pounds of seed cotton delivered at the gin, is the same.

But when your cotton is ginned according to principles which produce a better sample and greater turnout, your ginning cost actually is less; you get the equivalent of a crop of larger yield and higher quality. That means more money for you, as truly as if the ginner had paid you a premium on every bale ginned for you. Such, in brief, are the advantages you gain when your cotton is ginned on a

LOOSE ROLL

AIR BLAST-

WE HAVE MORE CLEANING EQUIPMENT

In operation with one battery of gin stands than can be found in any gin plant in this territory. We will operate this machinery in such manner as not to damage the staple, but will remove all cotton from burrs and all burrs and trash from the cotton—thus insuring a sample when coming from a Murray Gin that will make everybody take notice.

We are presenting each customer with his first bale a beautiful art panel with calendar which will be appreciated as an adornment in any home.

> Our plant is Murray equipped. Bring your cotton here. On your crop, get that greater profit to which you are entitled.

Descendant Tells Odd Story About Gen. Senior and intermediate unions at Robert E. Lee.

Gen Robert E. Lee, the military hero and leader of the South, was born Quirk. fifteen months after his mother had is one of our Southwide Denominational

ess. History, so far as it touches the ife of this great military genius, fails

Warfield Lee of Castlettsburg, Ky., is familiar with the story of the incident and occasionally relates it to his acquaintances. And the Castlettsburg man is in a position to know, for he is a grandnephew of General Lee. The distinguished military leader was a brother of Warfield Lee's father, Samuel Lee. He tells the story as follows: He tells the story as follows:

"Light Horse" Harry Lee's wife was n very ill health in 1809. The family hysician had pronounced that his skill and knowledge of medical science could physician had pronounced that his said and knowledge of medical science could not save her. Her condition grew steadnot save her arecarious until one day four n very ill health in 1809. The family physicians about her bedside pronounced her dead. She lay in state in the great Lee mansion on Arlington Heights for four days. On the sixth day she was removed to the family mausoleum.

On the seventh day the sexton went into the mausoleum to lay flowers on the casket and sweep the floor, for the day before had been quite rainy and the shoes of those following the distinguished woman to her final rest dropped conbefore had been quite rainy and the shoes of those following the distinguished woman to her final rest dropped coniderable mud.

While sweeping, the old sexton heard a weak, far-off sounding voice call, "Help, held, help." The sexton could not account for the voice unless it were from the dead, and he soon was without the walls of the mausoleum. Arguing to himself the voice had been entirely his imagination, he finally took courage and returned to his sweeping. and returned to his sweeping.

and returned to his sweeping.

Finishing his sweeping, he walked to the casket to strew the flowers over the lid. Again he heard that weak, far-off voice calling, "Help, help, help," He was standing directly over the glass of the lid, and looking into the face of the supposedly dead woman he saw her lips quiver. The lid was hurriedly removed by him before he summoned assistance. Mrs. Lee was taken from the mausoleum to the house, where she soon recovered and lived to a ripe old age.

and lived to a ripe old age.

Fifteen months after the incident Robert Edward Lee was born.

UBLE SHOOTING" AIDED
BY NEW TELEPHONE DEVICE "TROUBLE SHOOTING" AIDED

"Trouble shooting" on the thousands of miles of telephone wires which stretch out over the wide space of Texas may be simplified by a new device

Standing before a small instrument board of numerous dials and keys, a telephone "testboard man" is now able to locate accurately a distant break in a circuit, when a person within reach of the break might not be able to see it, says the Texas Public Service information Bureau.

it, says the Texas Public Service information Bureau.

The development of this apparatus has been taking place for a number of years, but only recently has it been brought to a point of efficiency so great that it is almost uncanny. By this means a telephone expert can determine the place at which a single wire in a cable containing several hundred wires is broken, and thereby save considerable time and money in making repairs.

In the early days of the telephone, when open wires were used on all the lines, a break was found by going out and looking for the trouble. Later an electric test was used that would only approximate the place where a break had occurred. By connecting a telephone receiver and battery between a broken line and the ground, the test man by listening could determine whether the break was close to the office or located miles away.

Beauti inpurovements in the testion.

man by listening could determine whether the break was close to the office or located miles away.

Recent improvements in the testing equipment have now provided the test man with an apparatus that will locate trouble with an accuracy far greater than was previously possible. This equipment is highly accurate because an error of measurement as small as one-tenth of one per cent will lead to errors as great as 500 feet in locating trouble on a fifty mile length of cable, and fifty mile lengths of cable are frequently involved in such tests.

United States Navy adopted the practice freased from £16 to £20. Reports from chased more than 9,000,000 pounds of home.—School Life. sweet-cream butter from more than 100 creameries. A New York butter dealer packed much of this butter for the Navy and was so favorably impressed by the remarkable uniformity in quality, even though it came from many scattered plants, and by its unequalled keeping quality, that he decided to sell it under his own brand. Other butter dealers followed his example. Dealers and con-sumers approved the butter, and each tity manufactured. During the coldstorage season in particular buyers are eager to obtain the product. Last year one association of creameries reports to have marketed 50,000,000 pounds of sweet-cream butter and to have paid to its members one-half cent a , und more for it than for high-quality ripenedcream butter.

WHOLESOME INFLUENCE CLAIMED BY GREEK-LETTERS FRATERNITIES

Character as the most important quality to be considered in seeking new members for national Greek-letter social fraternities was given by three-fourths of the answers to a questionnaire recently sent out by H. E. Stone, dean of men of West Virginia University, to heads of 100 chapters in colleges and universities in the United States. Capacity for friendship was rated next, and scholarship third. Other considerations were athletic ability, popularity, financial ability, social standing, and relationship to older members. The

financial ability, social standing, and relationship to older members. The average value of homes owned by the fraternities investigated was \$65,000.

Responsibility on the part of fraternities for "pledges" is shown by statement of the following methods used in training them: Enforcement study hours; senior advisers; senior-freshman meetings; direct assistance in studying; school; scholarship committee; curtailment of social activities: "example first advice second, paddle last"; and en-couragement. Practically all national fraternities have rules against bringing liquor into fraternity houses, and the general attitude is in favor of strict bedience to the prohibition law.

Just received a new shipment of leather hand-bags, bill-folds, and key-tainers, in all the new designs.

SALADS SPARE THE COOK IN HOT WEATHER

(Editor's Note: You'll get many hot weather cooking tips from this article—one of a series which 6 famous cooks are contributing to this paper.)

Of course we're hungry, even though the weather is hot! But we don't need the heavy

foods so essential on cooler days. And there is no reason for any woman to wear herself out in the summertime. laboring over the stove.

MRS. KATE B. VAUGHN

Spare Yourself Do as much of the preparation and cooking as possible in the early morning hours. If you must bake, do it just once a week. Don't light the oven every day.

And remember that salads, dainty or substantial, are a boon to cooks during hot

Mrs. Kate Brew Vaughn, director of household economics, Los Angeles Evening Express, suggests a simple cabbage

Use Cabbage and Carrots

Grate three raw carrots. Chop enough cabbage to make one cup. Chop one pimento and green pepper. Mix these ingredients with mayonnaise and put in icebox to chill. Serve on lettuce leaves.

If preferred, this salad may be served with French dressing.

With Cranberries This is a cooling dish—cranberry salad. Here's Mrs. Vaughn's own recipe.

1 pound cranberries
2 tablespoons gelatine
2 cups sugar
4 cup water
1 tablespoon lemon juice
1 cup nut meats
1 cup celery
1 cup mayonnaise

Boil sugar and water, add cranberries and boil until they pop. Add gelatine, softened in 2 tablespoons water. Cool and add lemon juice, nut meats and celery. Mold or serve in spoonfuls on lettuce leaf with sweet mayonnaise.

There is a big hot weather advantage in cooking with oil. You use only as many burners as are absolutely necessary. Then, too, in the best oil stoves the burners come in a row. There is no reaching across a hot fire.

Two Fruits

Another simple salad, suggested by Miss Margaret Allen Hall, nutri-tion specialist at the Battle Creek College of Home Economics, is made of dates and apples.

2 cups diced apples
1 cup cut dates
2 cup Golden Dressinz

Peel the apples and cut into one-half inch cubes. Marinate with the juice of a lemon to prevent discoloration. Put the dates into cold water. Remove the stones and cut each date into about four pieces. Pour boiling water over them. Chill thoroughly. Mix apples and dates and stir in the Golden Dressing. Garnish with lettuce or nasturtium leaves.

Golden Dressing

3 cup pineapple, apple or other light colored fruit juice 1/2 cup lemon juice

1/3 cup sugar 2 eggs

Beat the eggs sufficiently to blend the yolk and the white, but not un-til foamy. Add the juice and the sugar. Cook in a double boiler, stirring constantly until thickened. Set in cold water to cool.

One of the biggest advantages of cooking with an oil stove is the fact that it can be moved to the coolest spot. Cook on the back porch, the summer kitchen, wherever it's most convenient. No flues or piping to connect. Take the stove wherever you want it.

Lettuce and Bacon

Boiled or mashed potatoes, with "wilted" lettuce, or lettuce salad with bacon dressing, make a good luncheon with a dessert and bever-

This is the recipe used by Miss Lucy G. Allen, head of the Boston School of Cookery.

Wash lettuce and set away to chill. At lunch time make the bacon dressing. Dice four or five very thin slices of bacon and fry until crisp. Mix one-half teaspoonful mustard, one teaspoonful sugar, and add to one egg slightly beaten.

Then add one-third cup of vinegar which should be very weak. (Too strong vinegar will coagulate the egg and give a curdled appearance to the dressing.) Pour this into the pan containing bacon and fat. Have a low flame and stir rapidly until the mixture is the consistency of heavy cream. Pour over lettuce.

Make Your Own Combinations

Instead of warming up leftover meats, dice and combine with cold cubed potatoes, peas and salad dressing. This makes a luncheon dish in itself. Other combinations will no doubt occur to you.

(Watch for next week's opecial cooking

HALLOWEEN PROGRAM AT MT. BLANCO

A Halloween program and social will be given at the Mt. Blanco school house Friday night, October 28, it was announced this week. The program will be given for the benefit of the new church, which will soon be built in that com
