No complaints have been filed by anybody as yet, the judge stated, but if the nuisance doesn't let up somebody is going to file complaint soon, according to the tone of voice some of the citizens are using in protesting against skating in the business district.

"I read with interest The Hesperian's little editorial on the "cold check" situation in Floydada, and while I do not know that it is any worse here than in other sections of West Texas, I do believe that the editorial was timely, and presents a matter that has grown to the proportions of the most troublesome nuisance the merchants and banks here have to contend against," J. #### THINGS WE NEED

Every West Texas town and community has been taking stock and resolving resolutions during the past imagine it was awful. But it wasn't. few weeks, and in naming over the things they need have set down as goals for the year anywhere from one new 100-room hotel to a trunk

line railroad or two.

Floydada well could use some of these bigger things. Fact is, Floydada expects to have them sooner or later. But among the immediate things that more nearly fit our abili-ty to accomplish we mention two or three, in the belief that if enough hard work is put on the little things that go to increase the payrolls and further the betterment of living con-ditions in the community, the big things will come along as fast as we

are able to take care of them.

It seems a well-established fact that for the ordinary run of mercantile establishments there are always a sufficient number of men who are looking for such opportunities to establish these, such as dry goods, clothing, groceries, etc. However, we have the suggestion from a friend that there is one business establish-ment not now in Floydada which could enjøy a lucrative business from the beginning. This is a music house. Such a business ought to thrive in Floydada. The same is true of a green house and a flower shop.

## COLD HANGS ON

Although the mercury has not dropped to the zero point since the cold flurry shortly before the opening of the Christmas holidays, cold weather has hung on with considerable more tenacity this winter season than for some four years past, and thermometers standing around 20 degrees above zero in early mornings have been the rule rather than the exception.

Wheat raisers have complained that the continued cold dry is damaging the wheat, but the possibility that this damage will be met with an equally good result in the killing off of insect life including grasshopper eggs is to be considered.

## **Notice to Wheat Growers**

## Contest to Find the Cost per Acre of Combining Wheat with a J. I. Case Combine.

Any person can enter this contest, who owns a Case Combine Harvester and cuts as much as 500 acres in the season 1925, If he complies with the following rules:

1. He must live in the trade territory of our Floydada Branch or our Plainview Branch. If he has bought his Case Combine from someone else or has moved it in from some other place this does not make any difference. 2. He must call at our office and get a record book and

register.

3. He must keep an exact account of Labor, Repairs, Gas, Oil, expense on Combine, also on tractor power. If he uses horses keep account of feed bill and other expenses.

4. This account must be kept correctly and in a form so there will be no guess work about it and be sworn to before a

5. The money and labor used in getting an outfit fixed up before the harvest season starts will not be counted, because we want the used machines to have an even start with the new machines. This applies to tractor as well as combine.

As a reward to the contestant having the lowest cost record -at each point, Plainview and Floydada- we will give \$40.00 in cash, and for the lowest cost, considering both places, we will give \$20.00 in addition to the \$40.00 above—which will be a gift of

\$60.00 to one and \$40.00 to the other. There will be no judges, unless something comes up out of our power to settle. It will be a case of figures and facts.

The contest will close as soon as all contestant's accounts are turned in, which must be as soon as you are finished your 1925

We suggest that each person wanting to enter put his machinery in perfect shape at once, for if he buys parts after the season starts they will be counted against him.

If you use other makes of tractors than Case, bring us an itemized statement of repairs and labor bill if there should be any If we have not made the rules and ideas of the contest plain to anyone we will be glad to have you ask any questions you wish. And let us hear from you at once.

Quick Way to Stop Them

Persistent, racking coughing, which by rapidly weakening your entire sys-

Persistent, racking coughing, which by rapidly weakening your entire system lays you open to more dangerous infections, can be checked often with the first dose of that old-time tried and proved remedy—Dr. Bell's Pine-Tar Honey. And there's a reason. Doctors say there is nothing like pinetar to quickly loosen and remove the phlegm and congestion which are the direct cause of the coughing, while the honey both gives a pleasant taste and helps soothe irritation. It is often astonishing how quickly this combination relieves the stubbornest cough.

But he sure you get the original Dr. Bell's Pine-Tar Honey, and no substitute. Dr. Bell's has been known for over a quarter of a century as the best. It is scientifically compounded of just the right proportions of pine-tar, honey and other quick-acting healing ingredients which the best doctors have found to aid in quick relief. Contains no opiates or other harmful drugs, so can be given even to young children—fine for spasmodic croup. If you want the best, a medicine that often relieves the severest cough overnight, make sure you get Dr. Bell's. Only 30cat any good druggist's.

commonly referred to here in Floyd County, is certainly flourishing this year with a cotton crop practically picked that has perhaps established a new high mark for that section of

country.

Forty five hundred bales of cotton have been ginned so far this season at Quitaque, and the gin yards are full of unginned cotton by day and by night even this late in the season with perhaps from five hundred to a thousand bales yet remaining in the fields adjacent to Quitaque. The yield per acre around Quitaque is running on an average around three quarters of a bale to the acre. Several farmers report yields of a bale to the acre while some few have yields that have exceeded this enviable mark.

The First National Bank of Quitaque, according to Olin Stark its cashier, on December 31st when the call for report of condition was made by the Comptroller reported deposits of \$328,695.36. This is a very flourishing statement and reflects the general prosperous condition of the Brakes

Quitaque is building despite the fact that it is located thirty five miles from the nearest railroad. New residences are going up, a forty five thousand dollar school bluilding that is a model of beauty has been finished during the past few months. A ten thousand dollar hotel has been built on the main street of the town and a new gin of large proportions is contemplated in the new future.

Over at Gasoline, which is about five miles from Quitaque they have ginned four thousand bales of cotton. Turkey has ginned twenty five hundred bales with quite a bit more to gin before the season is closed. Flomot had ginned two thousand bales when its gin burned in the early part of December. The gin has been re-built and last week had already gin-ned fifty bales since its rebuilding.

The feed crop in the Quitaque section was one of the best in history and is stacked in every field that one passes in going through the country.

A good deal of land is changing

hands in that section, but most of it is being bought by people who have lived in that country for several years. Many have been renting and now find themselves in position to buy. Several thousand acres of the Howard Lands located there have been sold to such

## FROM A VISITOR'S VIEW POINT

When I dropped off at Floydada recently, it was for the purpose of adding to my fund of information concerning towns having a population in excess of 5,000. I believe I can, without being egotistical, lay claim to the title of being "Champion Roamer of the U. S." As I have visited and written up almost every town of any size in the country.

It was not my privilege to remain long here, but I had time to give you something more than just a "once over" before I left, and, as a result, I can report, without fear of honest contradiction, that with the many advantages Floydada now has there isn't any reason whatever for not doubling her population within the next few years. When one takes into consideration the rich agricultural and horticultural lands surrounding this city and then realizes, as every thinking person should, that a prosperous farming section about a town is the best and most substantial asset in the world, there remain but one point or problem to work out in order to bring about the things we all hope for, viz: the growth, prosperity and progress of your city.

Admitting that, in these wonderful rich acres, the production end of the problem is secure, what then is the other main essential to the prosperity of Floydada?

IT IS A GET TOGETHER AND PULL TOGETHER CIVIC SPIRIT

Now I was here just long enough to ascertain that you are blessed (I use that word because it fits in here just right) with a very wide awake Chamber of Commerce composed of the live business men of the city and under the management of the most efficient secretary. Right here I want to say, that not long ago I was a guest and speaker at a Lion luncheon and the question was put to me as to what I considered to be the most important thing in the civic structure of a live town. My answer was emphatic, because I happened to be fully informed on the subject. I said:

"SHOW ME A WIDE AWAKE CHAMBER OF COMMERCE AND I WILL SHOW YOU A WIDE AWAKE TOWN."

Having many advantages, natural and otherwise, Floydada is looking into the future with unbounded faith and optimism, and well she may, for when the civic structure of any town, no matter what its size, is built upon such a foundation, there is nothing in the world, short of unforeseen disaster, that can check its steady progress. Just keep on pulling together. Naturally, there are some slackers amongst your population, there always are; but if you work it out rightly these can be brought into line and made good, loyal substantial boosters.

You've got to PULL TOGETHER, Folks, in order to keep up the pace and be in the running at the finish. You citizens and you farmers who have been short on your contributions of COMMUNITY PATRIOTISM cannot afford to stand by and expect your business element to carry more than their share. Just imagine, if you please, a town where the majority of the population are perfectly willing to let the merchants shoulder most of the load, and then, instead of giving those merchants the support they deserve, and have earned, these people send away and patronize merchants in other trading centers. Can't you see what the ultimate result will be?

Prosperity means but one thing and that is the ability of an individual or either a community, to keep earnings, or income, above expenditures. You readily realize that for every dollar spent a dollar must be earned, otherwise failure will result. For every dollar that goes out of your community, a dollar must come in from outside sources to replace it. A community's prosperity, therefore, is based on the ability to make income exceed out-go. Modern conditions make it impractical, if not impossible, for any community to live entirely within itself. We must buy outside to some extent, but does it not behooves us to be cautious and careful about so doing when we know that every dollar sent away improverishes our community just that much (and THIS IS SOUND LOGIC AND IS WORTH THINK-ING ABOUT).

It is the community backing up and standing shoulder to shoulder with its civic organizations, that is the key note to the situation. Don't forget that, you "out-of-town buyers". BACK UP YOUR TOWN BY TRADING AT HOME.
