ative, released.

The jury hearing testimony in the trial of Robert Marvin (Hoss) Kingston in 39th District Court last week, Thursday returned a verdict finding the defendant guilty of aggrav-ated assault and setting his punishment at a fine of \$1,000 and two years in county jail.

Kingston was tried under a grand jury indictment charg-ing him with murder with malice in the death last March 6th of George Bell Elliott, 39-yearold farm worker living between Rule and Rochester. Elliott died of injuries received in an altercation which occurred in the business section of Haskell early in the morning of March

Hearing of testimony in the case was concluded shortly af-ter noon Wednesday, with the case going to the jury about 7:30 p. m. Wednesday. The jury verdict was returned about 11:30 a. m. Thursday.

The defendant, who was represented by Dennis P. Ratliff of Haskell and L. G. Mathews of Brownsville, has 10 days in which to give notice of appeal from the trial court verdict. At noon Wednesday, no in-

dication had been given by defense whether the verdict would be appealed.

Jury hearing the case was composed of Bailey Toliver, foreman; Clay Hattox, Shelby Johnson, Charles Campbell, Loil Cameron, J. Lee Glover, Grady Newsom, Dan Wadzeck, Glenn Caddell, D. H. Carroll, Wallace Allison, L. W. Jones

No Need for Moth Balls

Proposed federal legislation would create a national wilderness system of 55 million acres, within which there could be no disturbing of either the face or processes of nature. No timber harvesting would be allowed: no roads could be constructed; recreational value would be restricted and exploration for minerals or oil would be hampered.

Every citizen has the right to expect that wild areas will be retained for the enjoyment of future generations, free from the intrusion of four-lane freeways, hot dog stands and litterbugs. This is part of our heritage and should never be destroyed. But moth-balling 55 million acres is not necessary for this purpose, and could have serious economic effect.

Forest, mineral and oil resources in wilderness areas can be adequately developed without detracting from the wild beauty of the land where they are located-and often such development is of real benefit. Experience has shown that a well-managed forest protects watersheds, and increases the opportunities for hunting and fishing. Managed forests also sustain a minimum of economic loss, due to fire, insects and disease. Unmanaged forest areas without access roads are a danger to other timber lands adjacent to them, and are of little recreational value, since very few people have the time or means for traveling through

In developing a national program, a fact to be remembered is that conservation and productive use of land, in no way conflicts with the goal of establishing more wilderness parks and

Hurricane Hits Austin

Hurricane Carla had its impact on the State Capitol, But not like it did on the Coast.

Refugees camped on the Capitol grounds the first night of the storm. They were moved into public buildings as the rains reached Austin. Several giant trees of the Capitol grounds were blown down, and the Board of Control estimated damage of \$5,000 to Capitol grounds and buildings

State officials were busy, too. Gov. Price Daniel's on-the-scene inspections led to several coastal counties being declared disaster areas. Thus they became eligible for Federal aid.

State Insurance Chairman Thomas Ferguson announced that several hundred insurance adjusters had moved into the coastal area to begin estimating damages to insured properties.

So far no one had any estimate of the total damage Carla did to Texas

One sure thing is that insurance companies, which have C. Jenkins. Thurman E. Love, taken in about \$15,000,000 in premiums this year for windstorm Otis H. Henshaw, M. L. Thomp-One sure thing is that insurance companies, which have and rain damage in the seacoast territory, will have substantial son, Earl E. Hunt. R. C. Pool. losses to pay above their income from this source.

State draft quota for October, calling for 911 men, is 201 less than September call. State Selective Service Director Morris Schwartz reports 6,002 men will be given pre-induction examinations in October.

About a nickel a day—that's what tax experts figure the new sales tax will cost the average Texan whose income is figured in the three-to-four-thousand-dollar bracket.

State Treasurer Jesse James reports a slump of \$57,746 in August sales of cigarette tax stamps

Insurance Classification Plan Saves Money for Most Motorists

Approximately 55 per cent of type of motor vehicle. If a pri-vate passenger automothe private passenger automobiles in Haskell County can now be covered for basic limits public liability insurance for only \$6.00 more than the same insurance cost in 1938. This is due to the use of insurance classification plans, including the Texas Safe Driving Insurance Plan, according to the State Board of Insurance.

To give a specific illustration: basic limits public liability insurance (bodily injury and property damage combined) on a private passenger car, used only for family purposes, and not owned or operated by a male under 25 years of age, and principally garaged in a town or city in such county now costs \$36,00. If the owner and his co-resident operators are accident and conviction free under the Texas Safe Driving Plan (sub-class 0) a 20 per cent differential is allowed which would reduce the rate to \$29.00. In 1938 the same insurance on a private passenger car in a city or town in Haskell County would have cost \$23.00. Ap-proximately 55 per cent of the number of insured losses. non-farm private passenger cars in such county are entitled to this reduced rate.

Farm automobiles carry a lower rate because they are not exposed to hazard in the same degree as non-farm cars In most counties in Texas farm cars will enjoy about the same ratio of benefit from the Safe Driving Plan in relation to former costs as the non-farm cars will receive.

The purpose of insurance classification plans is to allo-cate more of the cost of insurance to the class of risks which result in the most losses.

Classification begins with

ification for liability insurance is by territory where principally garaged, use of the vehicle and driver characteristics. On physical damage, including collision, fire, theft and comprehensive insurance, the list price of the inusured automo-

sidered. Rates are made separately on commercial types of motor vehicles from private passenger cars, and on private passenger cars according to the use made of them. The State is now divided into 26 statistical territories and 10 rating territories. Large metropolitan counties are separate territories since there are a sufficient number of cars in such counties to afford a sound basis for separate rating. Smaller counties are grouped with other counties having a reasonably similar loss experience for rating purposes. Each rating territory can largely control its own rates by reducing accidents and consequently the

Wednesday: Cheese meat loaf, green beans, jellied orange ambrosa salad, rolls butter, apple cobbler, milk, Thursday: Hamburgers, let-

tuce, tomatoes, chions, pickles, potato salad, canned apricots, oatmeal cookies, milk, Friday: Hot dogs, pinto beans, tos's ed green salad pickled beets, onion rings, cin-

namon rolls, milk. RETURNS FROM TOUR OF NORTH AND EAST

R. L. (Spot) Lemmon, who is here from San Diego, Calif., for an extended visit, returned Sunday from a tour of states in the North and East, including the New England States. He will remain here until after the 961 Homecoming before returning to San Diego.

If only one survivor is receiving social security checks in an amount under \$40 per month, the check due early in September will be for \$40.

AN OPEN LETTER TO DRIVERS AS SCHOOL

Dear Mr. Driver:

Today my daughter, who is six years old, started to school. She wore a dark blue dress with a white collar, black shoes and blue socks. Her cocker spaniel. Scoot, sat on the front porch and whined his canine belief in the folly of education as she waved goodbye.

girl who sits in front of her . . the little girl with the yellow curls, and the boy across the aisle who makes funny faces.

She told me about her teacher, who has eyes in the back of her head . . . about the trees in the school yard, and about the big girl who doesn't believe in Santa Claus. We talked about a lot of things . . , tremendously vital, important

We studied spelling, reading and writing, and then to bed, She is there now, up in her room, sound asleep. And "Prin-cess Elizabeth" (her doll) is

cuddled in her arm. You guys wouldn't hurt her would you? You see, when her doll's finger is cut, or when a DDT, Sprays are: Methyl par-leg is broken, I can fix it. But athion - DDT, Toxaphene-DDT, when my little girl starts to school, when she walks across more applications at 5-day inthe street . . well, then she is in your hands.

She's a nice kid, She can run like a deer, and darts about like a chipmunk. She likes to ride her tricycle and go for a tervals after cotton has pro-walk with me on Sunday after- duced an average of 3 squares walk with me on Sunday after-

But I can't be with her all the time. I have to work to pay for her clothes and education. So, won't you please look out for her and the other children. Please drive slowly past the schools and intersections . . and please remember that children forget-you must not. -A Father

County Has One Rural Accident In August

The Highway Patrol investgated one accident on rural highways in Haskell County during the month of August according to Sgt. Frank Jircik. Highway Patrol Supervisor of this area.

The wrecks accounted for wo persons injured, and a property damage of \$150.00.

The rural traffic accident summary for Haskell County from January through August of 1961 shows a total of 30 crashes. As a result of these rashes there was one persor killed and 16 persons injured. The estimated property damage amounted to \$13,390.00.

With the starting of school the Sergeant reminds all motorists of the State law regu-lating traffic in regard to school buses "The driver of a vehicle upon a highway outside the limits of any incorporated city or town upon meeting or overtaking from either direction any school bus which has sotpped on the highway for the purpose of receiving or discharging school children shall stop the vehicle immediately before passing the school bus, but may proceed past such school bus at a speed which is prudent, not exceeding (10) miles per hour, with due cautics for the safety of such children."

Haskell Marine Finishes Recruit Training

SAN DIEGO, Calif. (FHTNC Completing recruit training Sept. 6, at the Marine Corps Recruit Depot. San Diego Calif., was Marine Pvt. Henry A. Sherman, son of Mr. and Mrs. Henry A. Sherman of 110 N. Fifth, Haskell, Texas.

Cotton Boll Weevil and Its Control

(Second in a Series)
By F. W. MARTIN County Agent

Early Season Control: When weevils cause damage every year, early season poisoning of one or two applications (5 to 7 lbs.) of calcium arsenate is a good investment, especially if Tonight, we talked about the practice covers a large school. She told me about the area. The dust should be apthe practice covers a large plied just before the cotton starts squaring. It may be necessary to make a second application five days later. This allows an early crop to set and saves more expensive late-season control. Other insecticides that may be used during this period are: Methyl parathion, Toxaphene-DDT, Strobane-DDT, Malathion and Se-

> M.d-Season Control: When 10 to 25 per cent of the squares are punctured, insecticides should be applied. Some insecticides that may be applied are: In dust form-5% methyl par-athion - 10% DDT, Low - lime calcium arsenate - 1% parathion, and 21/2 % Guthion - 10% and Guthion-DIT. Three or tervals may be necessary depending upon the severity of the infestation and weather conditions. Infestation counts should be made at weekly in-(1/3 grown) per plant. A sim-ple and accurate infestation count can be made by walking diagonally across the field picking 100 squares at random from the top, middle and low-er limbs. If the field is extra large or conditions are variable, it may be desirable to take more than one sample of 100 squares.

Late Season and Harvest Control: Plowing under cotton stalks immediately after harvest is a good farm practice. The stalks improve the soil and their destruction helps control insects. The earlier the stalk destruction occurs, more favorable the results that

done over a wide area. This deprives the weevil of food and therefore it must enter the winter months in a starved condition which means that chance of survival is greatly

Winter Control: Destruction of hibernating quarters of the boll weevil is also very beneficial. Plowing the fields during the winter months will assist in killing many hibernating weevils. Destruction of weeds and trash especially on turn rows, fence lines and borders of the fields will destroy a large number of the weevils

NOW! A NEW WORLD OF WOR

NEW FROM DIESEL TO DAZZLE!

High Torque Power Here they are—handsome, functional '62 Chevrolet trucks powered to work harder in every weight class with the highest

torque in Chevrolet history. Meet the eagerest, earningest crew of new trucks that ever shouldered a load!

There's a wider choice of power, a wider choice of torque, across the board. For heavies, there's the new High Torque 409 V8°, with 16½ per cent more torque than ever before available from Chevrolet. Big news in the middleweight class is the new Chevy-GM 4-53 Diesel, backed by years of GM Diesel experience. In the light-duty lineup, the High Torque 261 Six* adds new sock in extra-tough applications. All told, you can pick from nine rarin'-to-work, ready-to-save 62 Chevrolet truck engines.

Handsome new work-styling includes forward-sloping hoods that allow drivers to see as much as 10% feet more of the road. Chevrolet's famous Independent Front Suspension gives you a smoother riding, easier working, longer lasting truck. New heavier duty, smoother hypoid rear axles add new beef and brawn in the middleweight class. Rugged new I-beam front axles* of 9,000- or 11,000-lb. capacity are available on Series 80 heavyweights. Mufflers are longer lived

on all models.
You'll find a total of 198 models in the new '62 Chevy line—including three work-proved, versatile Corvair 95's. Every model is built to out-haul, out-last and out-value any other truck at anywhere near the price. See your Chevrolet dealer! Optional at extra cost

CHEVROLET

New SERIES 80 TANDEM. Best choice for the big ones! Has extra-rugged Kbraced ladder frame and true-tracking Eaton-Hendrickson tandem bogie.

Mr. and Mrs. M. Y. Benton

Why a winter check? Because of all the seasons, winter is the hardest on your car. Cold operat-ing conditions and cold starts combine to cause

excessive wear during winter driving. So drive in today and prepare for the cold driving ahead by letting us winter check your car. We'll check radiator hoses and connections so that not a drop of your costly anti-freeze is wasted, and you'll be protected against freeze ups all winter long.
And if you still have old summer type motor oil

in your car, it's time to change to Cosden 10 W 30, the all weather motor oil that flows from a cold start. Cosden 10 W 30 prevents fouled plugs and harmful carbon deposits.

We'll check your battery too, for batteries are the foremost victims of the cold weather that kills your battery and leaves you stranded. To be safe this winter drive in today for your winter check.

DOIN'S to come . .

Alarm Draws Ire of Angry Parent

The following letter, from an early-day student in Haskell school, was prompted by the approach of the 1961 Homecoming of ex-students, teachers and patrons of Haskell schools, and patrons of Haskell schools.

Now, that Homecoming will scoon be here again, it brings up many memories of my lone.

Many, many changes have taken place in the town since then and most of the old names are of the past, the Alexanders, Ealdwins, Sanders, Posts, Ballards, Grissoms and so many others. It myself, have been gone for 30 years. But 40 years of my life was spent in the county and town of Haskell and a veritable fire trap at that was known as the Sayles com-

munity. During the time I was there I had among my pupils two boys who became prominent citizens of your town, Ed and Charlie Fouts. Several years after I was married, we made our home in Haskell for 18 years and our two older children went through elementary and high school there. My husband, the late Earl Morgan, was superintendent of the cotton oil mill and a gin manager in Haskell for a number of

ENGAGEMENT Mr. and Mrs. R. E. Mathis are announcing the engagement

A flashing high-performance addition to the Oldsmobile line of cars for 1962 is this Star-fire coupe with its distinctive band of brush-textured anodised aluminum extending from front to rear. Luxuriously and tastefully appointed, it offers the same color, trim and mechanical features as Oldsmobile's spectacularly-received Starfire convertible. In-

cluded as standard equipment on the new 345-horsepower Starfires are front bucket seats, a sports-type power console, an even smoother 1962 4-S Hydra-Matic transmission, self-adjusting power brakes, and dual ex-hausts. Genuine leather is extensively used in the car's interior.

A majority of fatal falls oc- In North Zone Find Few Birds

Dove hunters in the North Zone have found slim picking so far since opening of the season Sept. 1, according to re-ports to J. B. Phillips, law enforcement coordinator of the Game and Fish Commission

In some areas where the grain sorghum harvest has been underway, doves seem to be fairly plentiful. Waterhole shooting, however, has been

very skimpy. According to reports from Oklahoma, dove shooting there has been very good. It is expected that with a change in weather conditions, many of these doves will be moving on

Feed then is the problem. If dove weed seeds are ripe and there is plenty of feed to hold doves, they may remain scat-tered through the northern zone, according to game war-dens who have been watching the whole dove situation.

Outlook for a good quail season this year is still good, ac-cording to many of the war-

Keynote of the Center of the Southwest

West Texas Utilities Company's service facilities are growing as the area we serve grows.

This service area is the Center of the Southwest - the very heart of a fivestate region that is growing 25 per cent faster than the Nation.

A multi-million-dollar growth program is now under way, and even more expansion is in the planning stages. Major examples are our new generating, transmission and distribution facilities, where much construction is now going or.

Our continuing growth program is seen also at the local level. Pictured here, for example, are three of our local offices which have been remodeled recently.

This Company is convinced that we face Growth Unlimited. The money we are spending for expansion today is our INVESTMENT IN THE FUTURE.
