FLOYDADA, Floyd County, TEXAS, THURSDAY, June 7, 1917

NUMBER

914 Men Register In Floyd County

Registry Under Selective Draft Greatly Exceeds Estimate for Floyd County

Nine hundred and fourteen men in Floyd County twenty-one years of age and over and under thirty-one registered under the Selective Draft Act on Tuesday, comprising practically thirty per cent greater registration than was estimated and affording a big surprise to officials and others. The estimate made early after the passage of the law was that Floyd County would furnish probably 550 men within the age limit.

Reports from all over the county indicate that the registry passed off with no friction whatever. At Floyd- than 25 per cent more than this regisada the rush in the forenoon was all tered here. If the same percentage out of proportion to the ability of the prevailed over the county the total registratars to handle, and the early will run close to one thousand in all. comers were compelled to wait in line from thirty minutes to an hour and a was anticipated, but none was evihalf. to France at the earliest possible mo- Manager or a General Superintendent ment.

Railroad executives have been asked to give immediate attention to a communication which has just been sent them, which says in effect: • "The French railways are badly run down. They need more or less com plete rehabilitation. France has no men who can be spared for this work.

She wants all her men at the front. "Before we can train men to go into the trenches we can supply France's railroad wants and we can do it practically immediately. Any men we send over must be soldiers, it will be necessary for the railroad men of engines, and engineers of have made the horrible discovery that forces to enter the army.

"We propose to make up five construction regiments of six companies each to do this rehabilitation. Each regiment will have an engineer officer of the United States Army as Colonel and another officer from the army as Adjutant. The other officers will be made up of railroad men, except that the commissary will be provided by the United States Army. The Lieutenant-Colonel will be a Chief Engineer of a railroad, or some one else of similar experience. Captains will be taken from the Engineers of Mainetnance of Way, Lieutenants from supervisiors or roadmasters, and the non-commissioned officers from track and bridge foremen. The privates will be track laborers.

"The pressing need just now is for officers for these regiments. They will require five Chief Engineers, thirty Engineers of Maintenance of Way, ninety supervisors or roadmasters, sixty track foremen, and thirty bridge foremen. Each company will have 150 track laborers and fourteen bridge carpenters as privates.

"The next important requirement on the French railways is for shop forces. They are short of men to repair their locomotives. It is proposed to organize a shop regiment, to be

"WHERE A DOLLAR DOES ITS DUTY"

They Also Serve Their Country----Who Buy a Liberty Loan Bond

THE LIBERTY LOAN

There is not a single selfish element in the cause we are fighting * * *. The supreme test of the Nation has come. We must all speak ,act, and serve together."- Woodrow Wilson, President of the United States.

> They Also Serve Their Country-Who Buy a Liberty Loan Bond.

THE FRENCH BOND BUYERS

The French people are the greatest investors in Government bonds in the world. At the close of the Franco-Prussian War in 1870 Germany demanded and collected from France \$1,000,000,000 indemnity. The French people, who were loyal then in responding to their country's need as their soldiers are today, hastened to loan this tremendous sum to their country.

Their patriotism turned a great misfortune into a great benefit. Their thrift in thus saving their money and investing it in Gocernment bonds not only brought great prosperity to France but the bonds rose in value all over the world and made the French national credit good wherever civilization existed. Ten years after the bonds were issued they commanded a premium of 25 per cent.

What the American Nation is called upon to do in lending the American Government \$5,000,000,000 and taking its bonds therefor is little compared with the loan of \$1,000,000,000 to France after the Franco-Prussian War by the French people. Called upon to do much less than their present allies, the French, the American people will demonstrate that they are second to no people in the world in patriotic support of their Government.

THE TERMS OF THE LIBERTY LOAN

The act authorizing the Liberty Loan Bonds of 1917 was passed April 24, 1917. It provides for the issuance of \$5,000,000,000 of 31/2 per cent bonds, the interest payable semiannually on December 15 and June 15 of each year. The principal is repayable on or after the 15th day of june, 1932, at the option of the Government, and if this option is not exercised the bonds will run full 30 years and become due June

The bonds are exempt both as to principal and interest from all taxation, national, State, county, or municipal, except the inheritance tax, which is really not a tax on the property, but on the transfer of property by will or inheritance.

The bonds are to sold at par; that is, dollar for dollar, no premium and no discount. They are to be sold by the Treasurer of the United States and by all Federal Reserve banks. But all banks, National and State, post offices, and express companies have been designated as agents of the Government to receive applications for these bonds. It is almost as easy to purchase one of these bonds as it is to get a post office money order.

It is not necessary to pay cash in full for a bond. One can pay down 2 per cent of the purchase price on application-that is, \$1 for a \$50 bond, \$2 for a \$100 bond, etc.-18 per cent on July 25, 1917; 20 per cent July 30, 1917; 30 per cent August 15, 1917; and the balance, 30 per cent, August 30, 1917.

WHAT A GOVERNMENT BOND IS

The Government of the United States has two methods of raising money. One is by taxation. The other is by the sale of bonds, whichis a method of borrowing money.

The Government bond is the printed promise of the Government to pay back the borrowed sum of money at a certain time, and to pay interest on it at regular intervals until it is repaid.

The Government borrows money in this way only after it has been the right to do so by act of Congress approved by the President, and the terms of the loan are set out in the act.

Back of the promise of the Government stands the honor of the vernment and all its taxing resources. Really the whole wealth of the Nation stands behind this solemn promise of the Government to

This makes a United States Government bond the safest investment in the world. If the bond of the United States Government is not safe, 🕋 no property in the United States is safe. If the United States can not pay its bonds, it is hardly probable that it will be able to protect the citizens in their other rights. The Liberty Loan Bonds of 1917 are especially attractive investments. Not only have they this absolute safety characteristic of all United States bonds but they aretax free not only from all existing taxes but from any war tax that may subsequently be levied. No State, city, nor county may tax them. The inheritance tax of the United States and of some States may affect them, or, rather, affect their transfer after death of the owner by will or by inheritance. Another advantage these Liberty Loan Bonds possess is that if the Government issues bonds later on during this war at a higher rate of interest the holders of Liberty Loan Bonds will be allowed to exchange t par their bonds for bonds bearing the higher rate of interest.

person in every 11 inhabitants of the United Kingdom subscribed to this loan, and the average subscription was \$950, though a great many subscribers took only £1, or about \$5. The great number of subscribers to this loan is pointed out as evidence of the patriotism of the British people.

Germany's wealth is estimated at \$80,000,000,000. Germany has put out five loans since the commencement of the war, aggregating \$11,-750,000,000. In Germany's latest loan 1 person in 13 of the population is reported to have subscribed, and the average amount taken by each subscriber was \$700.

Taking into consideration these figures ,the \$5,000,000,000 loan of the United States with an estimated wealth of \$220,000,000,000 and a population of over 100,000,000 seems almost small. With a wealth nearly three times as great as that of Great Britain it is trying to borrow less than one-half of what Great Britain has borrowed. With a population one and one-half times as large as that of Germany our loan is much less than half of the amount that Germany has borrowed.

America's Liberty Loan is less than one-sixth of the bank deposits in our country. An ordinary borrower does not think he is ruining himself when he borrows 40 per cent of the value of his property. The United States is borrowing less than 3 per cent of its wealth.

THRIFT AND LIBERTY LOAN BONDS

There is a great campaign for thrift being conducted all over the United States-thrift in production by the farmer and other producers, thrift in economy in use and consumption by all persons, and thrift in saving. This thrift campaign is nation-wide. Not only have business, manufacturing, agricultural, and other associations and individuals taken up this campaign, but it has been carried into universities, colleges, and schools.

In connection with the last aspect of this thrift campaign, that of saving, the Liberty Loan Bonds of 1917 offer an ideal investment of savings for small investors. No other small investment, or large one either for that matter, has quite the advantages that the Liberty Loan Bond has. Savings invested in a Liberty Loan Bond are just as safe as it is possible to make them and will constantly draw interest. While the interest is only 3½ per cent, the bonds being nontaxable makes the investment the equivalent of a 5 or 6 per cent interest-drawing investment in ordinary securities.

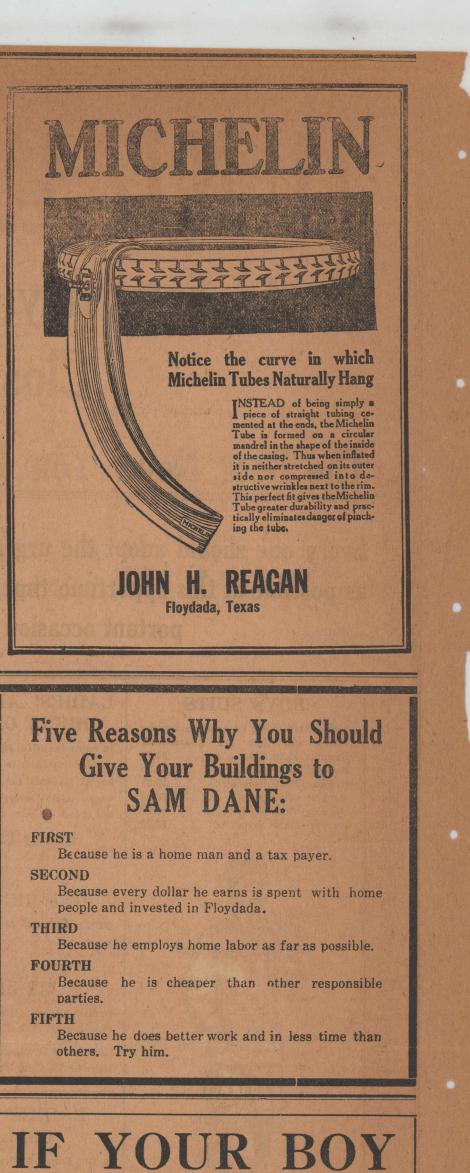

Not only is the investment absolutely safe but it is practically as readily converted into money as a United States Treasury note. To dispose of one of these Liberty Loan Bonds may require the owner to go to a bank instead of passing it over any counter. Yet this is an advantage. The trouble and time required to convert the bond into cash will give the owner time for thought and reconsideration, and it is not improbable that in many instances the result will be preserved intact where savings in money would be spent, in part if not in whole.

There is one other incident to be considered in regard to the purchase of a Liberty Loan Bond. The investment has a nature which should appeal to every American citizen. It is backing our Government, helping the winning of a victory for America in war. This has no money value, but it has a value not to be measured in dollars and cents.

LIBERTY LOAN BONDS-PATRIOTIC AND SAFE

The patriotic nature of an investment in the Liberty Loan Bonds of 1917 is something that all Americans will consider. The fact that in purchasing such a bond the investor is lending his money to his Government-to his country-to prosecute a great war, gives the investment a dignity that the ordinary investment does not possess. The use to which the money is to be put, the noble purposes to which it is to be devoted, all are things which appeal more or less to the American heart.

But let no one be led by these considerations to look on buying a Liberty Loan Bond as a piece of benevolence or merely a contribution to a worthy cause. The Liberty Loan Bond is as good an investment as an American citizen can well make. The rate of interest it bears may seem small, but when its absolute safety is considered and the fact that it is nontaxable, and the further fact that it is to be immune taxes which later on and still another fact that in case the United States Government should later during this war have to borrow more money and pay a higher rate of interest, that the holders of these bonds can secure bonds bearing that higher rate--when all these things are considered, an investment in Liberty Loan Bonds possesses advantages that no other investment in the world possesse.

WAR LOANS

Great Britain's estimated wealth is \$85,000,000,000; she has made aree great loans since the commencement of the war, aggregating 10,000,000,000. Her last loan was for \$487,000,000, which was the greatest single loan ever floated in the history of the world. It was taken up in 30 days, 5,289,000 individuals subscribing to the loan. One

There is another point which wise and thoughtful people will give due consideration to and that is an investment in Liberty Loan Bonds is an investment in the defense and preservation of all their other property and all they hold dear-the preservation of their liberties. We would be in danger, if all our citizens refused to fend their money to the Government, of losing all that we have-our property, our liberties, and our national honor. It has come to this, that we must fight for these things, and to wage war in this day and time requires not only men and arms but great sums of money.

Subscribers to Liberty Loan are charter members of a society to maintain American honor and to maintain democracy here and in other parts of the world. Honor and interest, patriotism and business judgment all argues the wisdom of an investment in Liberty Loan Bonds.

THE TORRENS SYSTEM OF LAND TITLES By C. O. LANEY, IN THE TEXAS FARM AND RANCH

some system of state guaranty of ti-

tle, for instance the Torrens system.

It is against the best interests of the

general public to have possible legal

disputes over the ownership of land.

* * * Some American states have

taken the first step, and the United

States government has recognized the

principle by prescribing the Torrens

system of transfering titles for the

And in the report of the committee

on banking and currency, concerning

rural credits, to the 64th congress,

first session, on February 15th, 1916,

"It is well understood that the laws

in the several states vary as to land

titles, registry, exemptions, home-

stead rights, foreclosure, and equities

in those states where the laws do not

loaning on first mortgage. Very few,

In other words, the states are put

on notice that they must adopt the

Torrens system if they wish to "bring

the benefits of the farm loan system

This measure was defeated. The

time is not very for distant when the

people of Texas will realize the great

benefits that would flow from the en-

actment of such alaw and doubtless

"FROM A BAPTIST GIRL"

within reach of their citizens."

they will demand its passage.

in reach of their citizens."

Phillippine Islands."

we find this paragraph:

The "Land Question" originated mous benefits that would be derived with the eviction of Adam and Eve from the passage of such a bill. Inlong as civilization shall last. Adam would provide a safe and speedy methand Eve were evicted because they od of selling land or using it as col-He has been confined to his bed had sinned. Unfortunately their de- lateral for the purpose of borrowing ever since the accident and unable to scendants, time without number, have money. Sweeney will some and archaic system of land laws As is well known the Federal Farm news to his many friends to know that from time immemorial. No branch of by one or more federal commissioners he is improving and we trust that he the Anglo-Saxon law has developed so on rural credits. Senate document will continue to improve and be able slowly as that branch which seeks to number 380 of the 63rd congress, secto again mingle with his friends on regulate and control the ownership of ond session, 1914, giving the report real estate. Even the Fendal System, of one of these commissions, contains which was based upon the grossest these words: sort of tyranny and oppression, was "Every student of the subject must

clung to with a tenacity which now conclude that the states should adopt seems little less than astounding.

So the time will come when we will be amazed that we have with apparent equanimity, for so many years, endured the present system in vogue in Texas. A system which even cursory examination clearly demonstrates is the direct cause of inexcusable delay, as well as an enormous economic waste.

No one man has done more to bring about a reformation of the "Land Question" than Sir Robert Richard

Torrens, an Irshman born in Cork, in 1814. In January, 1852, he was appointed colonial treasurer and registrar general of South Australia. Later he represented the city of Adelaide in the house of assembly, and still later became the first premier of South Australia. About this time he of redemption. It is therefore made concived the idea of applying the prin- the duty of the farm loan board to ciples of the shipping laws to the investigate these questions in each registration of titles to lands, and in state and to declare mortgages ineli-January, 1858, what is now known as gible as security for farm loan boards the "Torrens Act" became the law of South Australia. Since that time in give adequate protection to those one form or another it has spread all over the English-speaking world. In if any, states will fall within this rule, the United States the following states and they will doubtless amend their have already enacted laws based up- laws promptly in order to bring the on the Torrens system: Massachu- benefits of the farm loan system withsettes, Minnesota, Illinois, California, Oregon, Colorado, Washington, New

York, North Carolina, Mississippi, Ohio, Nebraska, Virginia and South Carolina. In other states this law is being considered.

During the regular session of the 55th legislature of Texas a bill based upon the "Torens Act" was introduced in both branches of the Texas legislature. It was passed by the senate, but stubborn opposition on the part of the membership of the house prevented it from ever being reached for con-
