Seasoned Fisherman Exhausts Funds and Catches No Fish

Craves Fresh Strawberries With Either Thick or Whipped Cream

The fish in the big lake, eight mile south of San Angelo, are nodoubt be ry and much annoyance since the party of Stanton fishermen decamped from the lake last Sunday afternoon. If ever a group of fishermen worked more aggressively to coax fish to bite their bait than did the Stanton anglers, they're not from the dry land region.

The local fishermen were chaperoned by French Gray of the Higginbotham-Bartlett Lumber Co., with John Whitson, second in command. Whitson was selected vice-commander of the expedition forces to act in case the generalissimo was kidnapped by a fish or the effects of drinking branch water proved too efficacious to the innerman of the ring leader. These two boys had "broken bread" on many occasions with a prominent San Angeleon, until they had become entitled to remove all the formalities of calling him "Mr," and directed all the questions and answers to him with the intimacy of alluding to him as plain and common Fred Axtell, manager of the local branch house for the Axtell Windmill and Supply Co. Mr. Axtell had been warned several days ahead of the pilgrimage to the San Angelo fishing sector by the Stanton party. Consequently, Mr. Axtell hurried out on the lake in his motor boat and dropped a trot line in the water to insure the Stanton boys some fish for supper upon their arrival, and oh, boy, and how, he did have them for us. Not only that, when the party arrived at his place of business Saturday afternoon in San Angelo, Mr. Axtell freight in a row boat across the lake be of an edible sort before they chanc-

to EXPECTANT MOTHERS

If you have ever been a patient in any hospital, you are probably familiar with the advantages of a liquid laxative.

Doctors know the value of the laxative whose dose can be measured, and whose action can thus be controlled to suit your individual

The public, too, is fast returning to the use of liquid laxatives. People have now learned that a properly prepared liquid laxative brings a perfect movement without dis-comfort at the time, or after. Dr. Caldwell's long experience with mothers and babies, and his re-markable record of nearly three thousand births without the loss of one mother or child, should give

anybody complete confidence in any prescription which he wrote!

But most important of all, a gentle liquid laxative does not cause bowel strain to the most delicate system, and this is of the utmost importance to expectant mothers and to every child.

Expectant mothers are urged to try gentle regulation of bowels with Dr. Caldwell's Syrup Pepsin. It is a delightful tasting laxative of delightful action, made of fresh herbs, pure pepsin and active senna. Not a single mineral drug; nothing to cause strain or irritate the cause strain or irritate the

kidneys. Dr. Caldwell's Syrup Pepsin is an approved preparation and kept ready for use by all

to be dissatisfied with telephone service

The men and women who furnish your telephone service here could not do their job so well without the help of Bell Telephone Laboratories, research organization of the telephone service.

Pour thousand workers in Bell Telephone Laboratories, the research organization of the telephone service, search constantly for scientific short-cuts and inventions that will give you better telephone service at a low cost.

They have, through their researches, made it possible for you to talk across continents and seas. They have made a single long distance line carry four simultaneous conversations. In scores of ways, they have contributed to the quality and clearness of your local telephone service.

Bell Laboratories is one of a specialized group of organizations that serve the 24 Bell operating companies, of which the Southwestern Company is one. It plays an important part in giving you good telephone service at a fair cost.

This is a fundamental Bell System policy. Back of it is our belief that in an undertaking planned, like the telephone service, for the long pull, what is best for the telephone user becomes in the end the policy that will bring us the sounder, more enduring success.

4,729 MILES ON A TOTAL OF FIVE QUARTS OF OIL!

Here is the winner! Here is the winner—
—the car that covered 4,729 miles at fifty miles an hour, lubricated with New and Improved Conoco Germ Processed Motor Oil.

THE "HIDDEN QUART" PRINCIPLE OF PENETRATIVE LUBRICATION PROVES GREATLY SUPERIOR IN **COMPETITION WITH FIVE NATIONALLY KNOWN MOTOR OILS!**

ONOCO has a New and Improved Germ Processed Motor Oil. Its many advantages were so evident to us, that we arranged with the Contest Board, American Automobile Association, to test five other widely advertised and nationally known motor oils along with Conoco's new and improved oil in a daring "Destruction Test." By letting the results speak for themselves, we are able to present to America's motoring public for the first time proved facts of superiority, not empty claims.

These six oils, with a single fill of five quarts, with no more oil added in six strictly new stock cars, were driven until the motor in each car was destroyed from lack of lubrication. Here are the results: the first oil failed at only 1713.2 miles; others failed in rapid succession. The best of the competing oils went only 3318.8 miles . . . while New and Improved Conoco Germ Processed Oil completed 4729 miles . . . more than 3000 miles farther than the first oil to fail . . . and more than 1400 miles farther than the second best oil! The "Hidden Quart" had proved superior again!

Conoco wrecked these motors to show you which oil has the lowest consumption and true economy. Drive into a Red Triangle Station, drain and fill with this new and improved oil. Whether your car is new or old, you need this extra margin of economy and safety.

Warning

TO NEW CAR OWNERS Some car manufacturers are using new types of bearings which will stand greater pressures and temperatures, resulting from increased power and speed. New and Improved Conoco Germ Processed Motor Oil has been exhaustively tested on these new bearings. The results show that it gives them greater protection against damage than many straight mineral oils now on the market.
