

FROM WHERE I SIT

By Hila Weathers
Manager of the Martin County Chamber of Commerce

our privilege to make two banners with the wording of our sign on them. These banners and the brochures which Bob is taking along to pass out, will tell the world about Stanton. They will have much to tell upon their return.

FROM ALL REPORTS the Dollar Day of July was outstanding. Many people from within our county, and others from nearby communities crowded the stores, and our merchants report a much better day than they had expected. This is a good report and we're happy for our business men and women.

ONE OF OUR SPECIAL visitors to the office last week was Jeanne Katherine Lively, the little three weeks old daughter of Dr. and Mrs. Bill Lively. She is a honey and she really gave us the once-over when she opened her eyes. We wish we could have had her all to ourselves, but her mother had to tag along! With Mrs. Lively, was her sister, Marie Vandever of Beaumont, who is visiting the Lively family. Hurry back, Jeanne Kay!

DURING THE WEEK we have found housing facilities for Mr. and Mrs. Dee Wolfe, the Raymond Wheeler family and Mr. and Mrs. T. C. Williamson. And as you will see in a story in this issue, we will have several families who are to be connected with the Cen-Tex Paving and Construction Company.

AMONG OUR VISITORS we have had our very good friends from The Stanton Reporter, James E. Kelly, John Roueche and Jimmie Allison. They were checking up on our activities. We compared notes in many things and the visit was nice. Others were Mrs. Leo Turner, City-County Sanitarian; Mrs. L. H. Batton, that lovely teacher of the

WE PROUDLY PRESENT this week, one of our newer places of business, the Rogers Electric Shop. Mr. and Mrs. R. K. Rogers own and operate this shop which is located on North St. Peter Street, in the building which the Chamber of Commerce formerly occupied. Mr. Rogers has been well and favorably known in Stanton most of his life and is thoroughly capable of handling all types of electrical work. A goodly display of light fixtures, appliances, radios and TV sets will greet the visitor to the shop. Our best wishes to Mr. and Mrs. Rogers for much success!

THANKS TO HALL DRUG, the Chamber of Commerce can now observe Flag Day when it comes again next year! So when any day of patriotic significance comes up on the calendar, you will find a flag in our window. Each and every place of business should see that their flag is ready to display—as it's great to be an American!

WE ARE EXTRA happy for Bob Deavenport, Robert Whitaker and Dee Gravens. They are now in California attending the National Boy Scout Jamboree, where over 50,000 Boy Scouts and their leaders are in attendance. It was

fifth grade came by; Martin Vavra, Ray Hastings, Bobby Yater and Modine Graves represented the Courthouse; Mrs. Sam Wilkinson, as always a welcome visitor.

WE HAD A CARD from Sam Martin while he and his wife were in Colorado on their vacation. With them were Mr. and Mrs. Ross Hays and little son, Mrs. Hays is the daughter of the Sam Martins. So glad they had time enough to think about us and haven't as yet heard their report, but am sure it will be worthwhile.

BE SURE TO READ the story of the meeting of the Board of Directors. The meeting was outstanding; all directors present and the committee chairmen who reported on their activities are deeply interested in the work they have planned for the community. We are sincerely happy to be working with such a fine group of civic minded men.

OUR QUOTE FOR THE WEEK: "Small minds discuss people; average minds discuss events; great minds discuss IDEAS!"

CONDITION IMPROVED Jim Turner of Sylvester, an uncle of Mrs. Carl Clardy, and brother-in-law of Jim McCreless, is reported to be improved in a Sweetwater hospital, following surgery last week.

Member Of Infantry That Captured "Heartbreak Ridge"

Here comes a communication addressed to The Stanton Reporter, (mailed from Korea June 23), it said. It bears information about a Stanton boy who is a member of 2D Infantry Division, in Korea.

Here's what the communication says: Pvt. B. J. Rice, son of Mr. and Mrs. Homer Rice, Stanton, Texas, is now serving with the 2d Infantry Division in Korea.

Rice, who entered the Army in December 1952, received his basic training at Fort Ord, Calif. In civilian life, he attended Stanton High School. The 2d "Indianhead" Infantry Division is most noted for the capture of "Heartbreak Ridge" in October 1951 and for dislodging the Reds from "Old Baldy" last summer.

STANTON VISITORS

Mr. and Mrs. Paul Peters of Big Spring visited Saturday in the home of her mother, Mrs. Joe Stroud.

HERE FROM COAHOMA

M. H. O'Daniel of Big Spring, and LeRoy Echols from Coahoma were business visitors in Stanton last week.

Mexican National Labor More Scarce Than In 1952

The crop-killing drouth prevalent over a great portion of Texas has cut down the number of Mexican National workers needed to harvest crops, particularly cotton, but areas with good stands of cotton may require supplemental labor, the Texas Employment Commission has announced.

When local or U. S. citizen labor is not available, Mexican Nationals can now be contracted under a new procedure which became effective on July 1, by individual farmers as well as associations. The new procedure will make it easier, faster, and less costly to the farmer.

The contracting procedure, which formerly took from five to six weeks, can now be completed in an average of from six to ten days. For the farmer needing only from five to 15 workers, the time can be even less because that many workers are usually on hand at the reception centers. Farmers needing several hundred workers may be delayed for as long as it takes to recruit them out of the interior of Mexico.

Farmers who contracted Mexican Nationals last year will also find that the rate per worker has been reduced from \$15 to \$11 on the original contract, and

from \$7.50 to \$5.50 on a recontracting basis.

Three main requirements must be met before Mexican Nationals can be contracted by either an individual or an association. First, the Texas Employment Commission must certify that it cannot fill the farmer's order from domestic sources, at which time the local office of the Texas Employment Commission will issue to the farmer of the association an "Authorization to Contract Mexican National Agricultural Workers." Second, the TEC must mail the authorization to one of three reception centers located at El Paso, Eagle Pass, or Harlingen—whichever the farmer may choose. Third, the farmer must send his check (\$11 per worker) to the reception center.

When these three steps have been completed, the reception center will notify the farmer direct when he may come and pick up his workers. Farmers contracting small numbers of workers,

may, in some cases, be able to pick up their workers the day the check is received by the reception center, but in no case should he go to the reception center until he has been notified that the workers are available, TEC said.

Farmers previously contracting Mexican National will not be required to furnish an approved "Statement of Housing and Facilities" if they do not contract in excess of the number previously contracted. Farmers contracting for the first time or contracting in excess of previous demands must furnish a new statement, the agency continued.

RETURNED TO CAMP

Bobby G. Peters, son of Mr. and Mrs. Paul Peters, Rt. 2, Big Spring, has returned to Camp Carson, Colorado, following a 15 day furlough with his parents. While on leave, he visited friends and relatives in Stanton.

IT'S THIS WAY

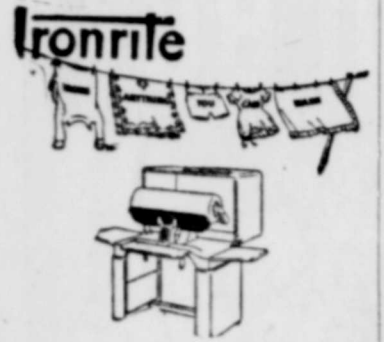

If it doesn't rain soon, it will still be a long dry spell.

But we will say this much—a cool wave blew into Stanton Sunday evening leaving behind about a 50-degree decension in the temperature until sunup Monday morning.

We're just more kind to our "poidner" than "Dirt, Squirt and Quirt" columnist in the Sunday issues of the Midland Reporter-Telegram, who has his "poidner" in a stew worrying him with a reminder to keep his slicker handy for use. The "goldner" roaming over here says he can stand out in any kind of rain without a slicker and live through it, but he doubted he could make the grade and live over it standing out in the middle of a blizzard 40 degrees below without long-handles. So it's longhandles for him says my "poidner" he wants ready for a quick change-over

Texas-New Mexico farmers at Laredo threaten to bring suit against Maverick County Irrigation District over release of Rio Grande water. Farmers claim the water flow in the Rio Grande canal has failed 37 per cent to return the Mexican share of the flow. Mexican farmers say that unless water is distributed in 10 days they stand to lose their tomato crop valued at \$3,000,000. They figure the loss of the cot-

James Jones
Hardware & Appliance
119 St. Peter St. Phone 15

ton crop at \$1,500,000. Twelve wells have been drilled in the Laredo area, producing 40 gallons per minute from a depth of 150 to 300 feet. Drilling costs range from \$1,100 to \$1,500 per well.

It's Big Business this cotton business has grown into. You can't tell the grower from the aristocrat. Not so many years ago the cotton grower came to town with the first bale of cotton, was a "seedy" looking chap, calloused and rusty looking hands from helping the hands pick the bale. A subscription amounting to near \$100 was taken up around town to give the grower as a prize for the first bale. The grower's contribution was giving the bale free of charge.

The contrast today was noted with the receipt of a magazine arriving this week at this desk displaying on the front page a picture of a first bale of cotton with four immaculate dressed gentlemen standing around the bale. They had the appearance of just having lifted the lid and stepping out of a band box. One of the four gentlemen was shaking the hand of the grower of the first bale, whose appearance was in the height of fashion, while with the other hand he was extending the grower a check for \$4,336 as a prize for the first bale of the season. Fitting ceremonies had been held by the chamber of commerce for the cotton grower, at which occasion he was presented a \$2,500 check that made up the total prize.

At the auction sale of the bale the bid started with an offer of 35 cents per pound but only momentarily did that bid hold when a bid of \$3.00 per pound was hurled at the auctioneer by the manager of a Texas Brewing Company, and that ended the festivities.

The bale weighed 612 pounds, and was raised near a town located in the Rio Grande Valley of Texas.

It's logical that the Martin County irrigationist would not oppose being placed under a system of control as to the amount of water he used for his crops if he knew the control treated all water user alike, and it was done for the purpose of making the supply in the underground basin last as long as possible—a matter of conservation. But as matters now stand with no control whatever as to the amount of water used by anybody, the irrigationist wonders if he is using as much of the water as others who are watering the same acre-

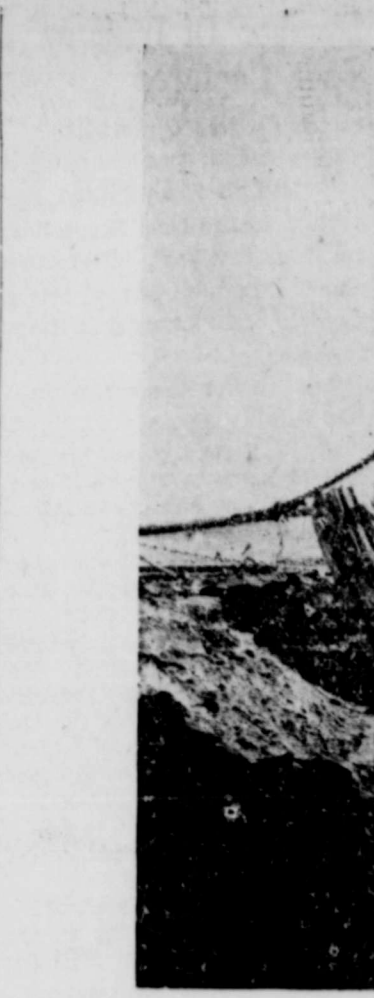

age and the same crops. It's natural he bend over a little backward and use more than it would really be necessary. If the water supply should give out, he wants to be one that participates in getting the last drop. All the water users of the same mind, if they had the right kind of conservation law to abide by, this column is not afraid to bet that the irrigation farmers of Martin County, will say many loopholes where wasted water is now passing would be closed, more water conserved without pinching down to the damaging point in having plenty water for their crops.

But at this moment there is no water district organization functioning in Martin County. The County had one but the moment it started to function its operation was tied hand and foot by an injunction granted by one of the state's district courts. So there Martin County stands on taking any hand in controlling the conservation of its water.

Maybe the reader of last week's Reporter had a cooling sensation pass over him as he imagined seeing the deep snow and sleet that usually accompanies the visit of Santa Claus and his reindeer. It was the announcement that again this December 11, Santa and his reindeer will be in Stanton.

That the extended drought is getting in its work on the predatory animals hereabouts was made evident one day last week when Jimmy Allison, president of the Permian Basin Publishing Company, meandering over here from Midland taking the place of a member of the Reporter news staff away on a vacation, and Collin Mott, a dealer in irrigation supplies, visited a ranch to inspect an irrigation project in full operation. They spied a fox, unloaded the magazine of bullets into the fox and he just stood there. He ran off into the bushes as the Stantonites started a closer inspection of their target. Because the fox withstood the number of piercing shots, the boys figured the drought had dried up the vital organs on the interior of the fox. This column has another answer to that story. None of the shots directed at the fox took effect.

The pictures appearing in last week's issue of The Stanton Reporter, presenting the scene of an irrigation project in operation was good for sore eyes that were made so by "blaring" into

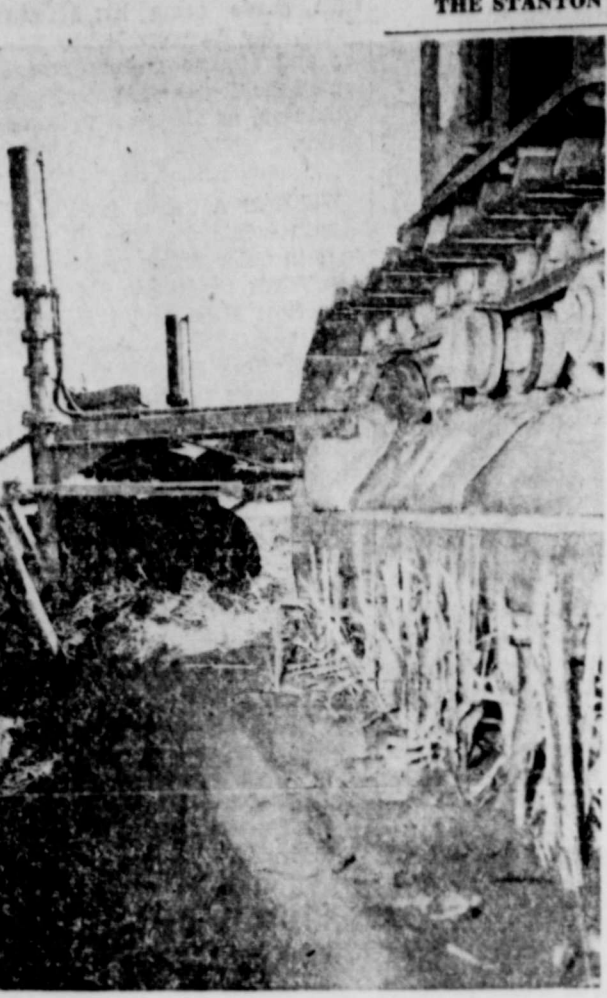

CLOSE-UP VIEW of large disc plows pulled by huge track-type tractors, typical of deep-plowing operations in West Texas to increase water-holding capacity. Photos courtesy of the Farmer-Stockman Magazine.

the faces of a blazing sun and sandstorms that have ranged around hereabouts the past over three years. They were scenes of a plot of land that within less than six months' time had been cleared of a thick growth of mesquite trees, bushes and bunch grass, and converted into one that had growing knee-high sudan grass, under water applied by a sprinkler irrigation system. The water was being pumped from a well that had been drilled at the time the ground was being cleared, and water was spraying over acres of other crops that had been planted.

Indeed, a fortunate situation Stanton finds itself. Plenty of underground water waiting to come to the rescue of farmers in just such times as the present, by being lifted to the top of the ground and spread over its surface to produce crops in despite of droughts.

VISITING COLORADO SPRINGS
Mr. and Mrs. Bob Jamison and Mrs. Clarence Cox of Spraberry, are visiting relatives in Campo and Colorado Springs, Colorado.

THIS MONSTER moldboard plow also is widely used when farmers want to turn under the heavy sand and mix some of the clay with topsoil.—Courtesy Farmer-Stockman Mag.

PLOW DEEP AND YOU MAY HIT PAY DIRT IN DRY WEST TEXAS

Deep plowing is a paying proposition in Martin and Midland counties, according to Sam Whitlow, Texas editor of the Farmer-Stockman magazine. Whitlow explains, in the July issue of the Farmer-Stockman magazine, the advantages of

plowing deep that he has learned from farmers and other agriculture experts. The following is his article:

"Deep plowing—some as deep as 24 inches—increases the water-holding capacity of the soil, and breaks up the plow pan. It also brings clay-bearing, subsoil to the top to help control wind erosion.

"One farmer pointed out that weed seed are plowed under so deep that they won't come up, and this helps cut down on the hoe bill in raising cotton.

"Charlie Green, Midland county agent, said deep plowing started about three years ago as a fairly general practice. The cost of plowing an acre 24 inches deep is about \$10, and PMA has been footing about half this cost. Smaller payments are made for shallower plowing. Generally, deep plowing in the area ranges from about 15 to 24 inches.

"Deep plowing is being used on both irrigated land and dryland. "We don't believe deep plowing is suited for all types of land," Green said. "I don't think it is worth anything on deep sand, where they can't go deep enough to get clay."

"Following deep plowing, Green recommends developing a rotation that will include a soil protection crop that will return some of the residue to the soil. There is not much benefit in deep plowing if the land is left exposed to wind erosion. Green believes that the clay turned up will tend to break down and blow away unless protection is afforded.

"Generally expressed, deep plowing is a mechanical means of bringing closer to the surface of the soil, plant nutrients that will be within the reach of plant roots.

"Some farmers in Midland County who have had good results with deep plowing are T. A. and B. W. Golladay, Max Stephens and W. N. Locklar.

Dr. W. B. Coke, extension agronomist of Texas A & M College went with Green last year to visit a farm where cotton roots were dug up and observed. About four to six inches down, the cotton roots hit the hard pan and turned out at a right angle, Coke said. "This meant that the cotton root couldn't go down in the ground to get badly needed plant food and moisture."

"In Martin County, Ray Hastings, county agent, said farmers like the deep plowing practice. "Charles Daniel, PMA officer

Crusted Ice Cream Balls Means Glamour Dessert

Shape any flavor ice cream into balls. Roll immediately in slightly crushed Sugar Frosted Flakes mixed with chopped nuts and shredded coconut. Place in freezer to harden. Serve with fudge, butterscotch, or other appropriate sauce. Pretty super with fresh sweetened berries or peaches. Because this dessert may be prepared ahead of serving time—and because it is so simple to make, it fits the bill for both family meals and large parties. Use ice cream scoop to make the balls. One quart of ice cream will make 8 medium size balls.

Mrs. H. A. Houston is in Shannon Hospital, San Angelo, as a medical patient.

in Martin County, observed that in the last two years, some 60 of the total PMA payments have been made for deep plowing.

"Of all the advantages, listed for deep plowing, farmers show more interest in the use of this practice to increase the moisture holding capacity of the soil.

"It takes a lot of power to plow deep, but in dry West Texas, farmers have found it is one of the best ways of "stockpiling" water. They don't get much and it is certainly important that they hold onto and use for crop production what they do get.

"Deep plowing is a way to do it."

NEWS BRIEFS

DINNER GUESTS OF BERRYS

Dinner guests in the home of Mr. and Mrs. Phil Berry Tuesday night were: Mr. and Mrs. H. B. Keagan and children, Judy and Ross, Mr. and Mrs. J. A. Coffey and Glenda, and Mr. and Mrs. S. M. Smith, all of Big Spring.

MONAHANS VISITORS

Mr. and Mrs. Hubert Ray Kelly of Monahans, visited over the week-end in the home of his parents, Mr. and Mrs. R. A. Kelly. Tom Kelly accompanied them home for a visit.

VISITOR FROM ALABAMA

Mrs. James W. Moore of Halcyonville, Alabama, arrived Monday to spend three weeks visiting her parents, Mr. and Mrs. J. E. Kelly. Mrs. Moore's daughter, Franchelle Moore, accompanied by her roommate, Margaret Stewart, came over from Midland, and spent Monday evening in the Kelly home.

VISITING IN WYOMING

Mr. and Mrs. James Jones and daughter, Janelle, and Mr. and Mrs. Ray Simpson, are vacationing at Laramie, Wyoming, the guests of Dr. and Mrs. Randall Watkins. Mr. and Mrs. Bud Jones of Lenora, are also visiting in the Watkins home.

VISITED IN ROCHESTER

Mrs. Ralph Jones and daughter, and Mrs. Lila Flanagan, visited Sunday in Rochester with Mrs. Jones' father-in-law, L. A. Jones.

JOINS WEBB GROCERY STAFF

S. J. Foreman of Lenora is now employed at the Jim Webb Grocery.

Like Christmas in July!

YOU LL know right quick what we mean by that headline when you learn what your dollars buy in this great new 1953 Buick SPECIAL.

You get a lot more room than the same money buys elsewhere—real, man-sized, six-passenger room.

You get power—flash-fast Fireball 8 power—the highest horsepower and compression ratio ever put in a Buick SPECIAL.

You get a ride that's big-car soft and steady and level—the Buick Million Dollar Ride of all-coil springing, torque-tube drive, X-braced framing.

You get wonderful handling, luxurious interiors, superb visibility—plus a long list of "extras" that don't cost you extra.

And those "extras" alone, at no extra cost, are like a welcome

Christmas bonus. Direction signals, twin sunshades, lighter, trip mileage indicator, automatic glove box light, dual map lights, oil-bath air cleaner, full-flow oil filter, vacuum pump, bumper guards front and rear—they're all yours in this Buick at not a penny extra. So—how about looking into the good cheer to be had here?

How about visiting us this week for a thorough sampling of the greatest Buick value in 50 great years?

- World's only car with all these features:**
- HIGH-COMPRESSION VALVE-IN-HEAD FIREBALL 8 ENGINE
 - TWIN-TURBINE DYNAFLOW* • POWER STEERING*
 - BALANCED MILLION DOLLAR RIDE
 - TILT-AWAY FRONT SEATS • CUSTOM-RICH INTERIORS
 - DOUBLE-RAIL FRONT BUMPER
 - PANORAMIC ONE-PIECE WINDOWS FRONT AND REAR

THE GREATEST BUICK
IN 50 GREAT YEARS

*Standard on Roadmaster, optional at extra cost on other Series.

NOTICE TO CREDITORS

THE STATE OF TEXAS COUNTY OF MARTIN TO THE CREDITORS OF DAVE FOREMAN:

You are hereby notified that Dave Foreman, of the County of Martin, on the 20th day of June, 1953, executed a deed of assignment, conveying to the undersigned all of his property for the benefit of his creditors and that the undersigned has accepted said trust, and has duly qualified as required by law. All creditors consenting to said assignment must, within four months after this notice, make known to the assignee their consent in writing, and within six months from the time of the first publication of this notice file their claims, as prescribed by law, with the undersigned who resides in Stanton, Texas, and is also his post office address.

Witness my hand this 1st day of July, 1953.

G. B. Shelburne, Assignee 7-9; 16; 23

CITATION BY PUBLICATION

THE STATE OF TEXAS, To James Smith, Cecil Smith and Clara (M. L.) Smith, if living, and if any, or all, are deceased, then to the unknown

heirs and legal representatives of them and each of them, and to all other persons claiming any title or interest in land under deed heretofore given to M. L. Smith of Dawson County, Texas, as grantee, Defendants in the hereinafter styled and numbered cause:

You and each of you are hereby commanded to appear before the District Court of Martin County, Texas, to be held at the courthouse of said county in the City of Stanton, Martin County, Texas, at or before 10 o'clock A. M. of the first Monday after the expiration of 42 days from the date of issuance hereof; that is to say, at or before 10 o'clock A. M. of Monday the 17th day of August, 1953, and answer the petition of Charles Theophilus Smith, Plaintiff, in Cause Numbered 1883, styled Ray Gobble, et al Vs. James Smith, et al, in which the following persons are plaintiffs: Ray Gobble, et ux, Roger Cole, et ux, and Charles Theophilus Smith, and those persons are defendants who are first named in this citation and to whom it is directed, which petition was filed in said Court on the 7th day of January, 1953, and the nature of the said suit is as follows:

A suit in Trespass to Try Title involving all of Lots Numbered One (1), Two (2) and Three (3) of Block Number Sixteen (16) of the First Addition to the town of Akerley, Martin and Dawson Counties, Texas.

If this citation is not served within ninety (90) days after date of its issuance, it shall be returned unserved.

Witness Doris Stephenson, Clerk of the District Court of Martin County, Texas.

Given under my hand and the seal of said Court at office in the City of Stanton, Martin County, Texas, this 1st day of July, 1953.

Doris Stephenson, Clerk of the District Court of Martin County, Texas. Issued this 1st day of July, 1953. Doris Stephenson, Clerk of the District Court of Martin County, Texas. 7-9-16, 23, 30.

And It's Martin County Water, Helping!

From a page writup in a Sunday issue of the Fort Worth Star-Telegram, written by a special representative sent into the area by the Fort Worth newspaper, it uncovered some interesting facts the Martin County people would like to know.

In the first place, the Star-Telegram correspondent learned from his personal contact with the proper authorities that the Odessa mayor said: "Its water supply is adequate for a city of 75,000." That Odessa, with Big Spring and Snyder, is a member of the Colorado River Municipal Water District. The correspondent said, "Summer before last the city was rationing water. It was against the law for a man to wash his car. Now there's more than enough."

Another quote from the correspondent: "City water currently comes from two sources — 60 Ector County wells and 23 Martin County wells." Then it was revealed the "city's peak consumption so far this summer was 10,800,000 gallons a day." It was estimated "pipe line from Martin County — 27 miles — can bring in 15,000,000 gallons a day," and according to the correspondent, "currently about 6,500,000 gallons comes through it daily. The rest is pumped from Ector County."

The Reporter here quotes the offerings made by the Fort Worth correspondent as he found them on the round for his news story in Odessa.

"An 85,000-gallon storage tank is expected to be completed by January 1, as insurance against a pipe line break. "Later storage facilities will be expanded to about 300,000,000 gallons.

"The Martin County water costs the city \$16,900 a month, plus 6 cents for each 1,000 gallons. May's bill was \$29,000."

(What will be the June, July, August bills to be paid by the city of Odessa for Martin County water, the amount to go into the treasurer of the CRMWD).

"Customers pay \$3.00 for the first 3,000 gallons. "Pipkin (City Manager of Odessa) said a bill for 25,000 gallons, for instance, will run \$10.70."

Appearing under a picture, showing one man turning the large screw bolt on top of a water hydrant, as he converses with another man sitting on his heels beside the hydrant, bore this description:

"PLENTY OF WATER—Mayor Fred Gage, left, and City Manager Dick Pipkin look satisfied as they show that Odessa's water supply isn't hurt by a little extravagance."

That "extravagance" business with using Martin County water is all the more reason why the State of Texas should have a water law that will enable the Martin County Water District to function and to have a form of control that the district can cut off consumers who resort to "extravagance" with the use of water, and too, a law that the district can make all water consumers "toe the mark" as to the number gallons they can use per day.

And as a climax to his page story the correspondent said: "Nearly \$300,000,000 in oil field equipment is sold here annually. It has an ample supply of water, a wealthy county that's working with it side-by-side and energetic, intelligent civic leadership."

And to think "Summer before last the city was rationing water. It was against the law for a man to wash his car." That's Odessa, with the help of Martin County water.

FOR RENT—Furnished apartment, 503 St. Francis, James D. Elland.

It stands to reason **Chevrolet trucks must be the best buy!**

Big truck users, small truck users, all truck users buy more Chevrolet trucks than any other make. It stands to reason Chevrolet trucks must offer more of what you want.

When you stop to think about it, the best proof of outstanding value in any product is continued public preference. That's the way it is with Chevrolet trucks. They're the top selling trucks in America today . . . for the twelfth straight production year.

This is a mighty important fact to consider before you buy your next truck. You'll also want to consider that, while Chevrolet trucks give you more features you want, it's the lowest-priced truck line of all! Come in and talk it over with us.

AMERICAN LEGION'S NEW STATE HEADQUARTERS BUILDING

Above is the new \$205,000 state headquarters building of the American Legion, Department of Texas. Located two blocks north of the State Capitol building at 15th and Congress Avenue, the structure is of polished native Texas granite and cream colored bricks. It was dedicated July 7.

American Legion's \$205,000 Headquarters Building Formally Dedicated July 7 In Austin

AUSTIN—After 35 years, the American Legion has built its own state headquarters building, a modern \$205,000 structure located two blocks from the state capitol building at North Congress and 15th Streets here in Austin. The building was formally dedicated July 7 with the American Legion's state commander, Albert D. Brown, Jr. of Austin, presiding and the National Commander Lewis K. Gough of Pasadena, California and Governor Allan Shivers, the principal speakers. The building is two stories with a foundation and elevator shaft

Congress Avenue and 180 feet on 15th Street. Ground was broken for the building July 22, 1952 and it was dedicated a few days less than a year later. Members of the building committee were V. F. Taylor, Austin, chairman; R. C. Gusman, Bay City; Lou Roberts, Amarillo, Ralph Holman, Joiner-ville; Howard Hudgins, Amarillo; Willis Jarrel, Tyler; and E. L. Jackson, Cisco.

Pvt. Raymond Polson Visiting Parents

Pvt. Raymond R. Polson is in Stanton on an eight-day furlough visiting his parents, Mr. and Mrs. E. L. Polson. Pvt. Polson has completed his basic training at Camp Gordon, Alabama, and will report for duty in Germany on his return to Camp Gordon.

The Polsons have another son, Corporal Lee W. Polson, who is fighting with the 15th Infantry Division in Korea. His parents received word last week Corp. Polson has been promoted to the rank of sergeant.

SNOOTER KNOWS

(Continued from Page One)

On January 13, 1924, Miss Mamie McDurmon, was made the local manager of SWBC, and will hold that position with the company until the conversion of systems is made August 7. Following a two weeks vacation mamie will make her home in Midland, assuming the position of supply clerk for the Southwestern Bell Telephone Company in that city.

It's a new \$70,000 enterprise for Stanton — this dial telephone system — housed in a modern, recently completed building on the site of the old telephone exchange. Since the end of World War II, SWBC has spent \$42,000 to enlarge the system up to the expenditure of the \$70,000 investment in the dial system.

One of the greatest puzzles in life is how a fool and his money got together in the first place.

And it's to the crews that are at work changing over the old system into the new, that goes the bulk of the credit. To this column the boys who have had to work outside in a blazing hot sun, digging holes to place some extra poles and to replace others that showed bad condition, climbing poles to string wires in the dead of heat, laughing and joking as the perspiration rolled off them in a stream, and at the stroke of 12 o'clock noon, file into the cafe, order a double helpin' of everything on the menu, and call for ice tea to be served them in half-pint fruit jars, well, those are the boys on the construction crew, converting the old telephont plant into the new, that I bend low and doff my hat.

IF THIS COLUMN IS A JUDGE of what it takes to set afire an area for many many miles around from the point that creates the disturbance in this time of the high cost of living, he only has to cite his readers to what the grocery and meat stores in the

Comment On "Red" Gibson Comes From Big Spring Editor

On the recent appointment of LeRoy (Red) Gibson, to the Naval Academy at Annapolis, Maryland, Tommy Hart, sports editor of The Big Spring Daily Herald, had the following to say in his column, "Looking 'Em Over."

"LeRoy Gibson, a fine footballer for Stanton High School a few years ago and more recently at Texas Western College, is headed for the Naval Academy at Annapolis, Maryland. "Gibson should help the Middle graders no end.

"Woodrow Wilson went from Stanton to West Point before World War II and became a football star."

LeRoy (Red) Gibson, is the son of Mr. and Mrs. Martin Gibson of Stanton.

town of Muleshoe, Bailey County, pulled last week-end. These stores advertised the price they would sell the various cuts of meat, and if my readers want to know something, the price slash the merchants made had all chain grocery stores' meat offerings beat a city block.

Nothing can hold liquor so well as a bottle.

For example, Muleshoe merchants offered the following prices on meat cuts compared with the prices of the same meat cuts offered in Midland, Big Spring, San Angelo and Dallas:

- Muleshoe — Hamburger, 9c lb; Midland, 29c lb; Dallas, 33c lb.
 - Muleshoe — Short Ribs, 5c lb; Big Spring, 49c lb; San Angelo, 10c lb; Dallas, 15c lb.
 - Muleshoe — Chuck Roast, 15c lb; Big Spring, 29c lb; Midland, 33c lb; San Angelo, 29c lb; Dallas, 29c lb.
 - Muleshoe — T-bone Steak, 23c lb; San Angelo, 45c lb.
 - Muleshoe — Loin Steak, 23c lb; Big Spring, 55c lb; Midland, 45c lb; San Angelo, 35c lb; Dallas, 53c lb.
 - Muleshoe — Rib Steak, 23c lb; Big Spring, 49c lb; San Angelo, 35c lb; Dallas, 53c lb.
 - Muleshoe — Round Steak, 33c lb; Big Spring, 63c lb; Midland, 55c lb; San Angelo, 45c lb; Dallas, 63c lb.
- Muleshoe has a population of 3,789.

GUESTS IN PAYNE HOME Miss Alice Powell of Fort Worth and Leon Payne from A & M College were visitors in the home of Payne's parents, Mr. and Mrs. Leo Payne, last week.

High School Graduates Now Eligible For Aviation Cadet Training

Continuing needs of the Air Force's Cadet Training Program have effected a change in eligibility requirements that now permits high school graduates to apply for the Aircraft Observer phase of aviation cadet training. Captain Alden C. Clark of Aviation Cadet Selection Team number 207, Webb Air Force Base, Big Spring, Texas said today.

The Air Force flying training program is divided into two phases, Pilot and Aircraft Observer; and previously, two years of college were required of both type applicants. An immediate, critical need for applicants for Aircraft Observer training has brought about a reduction in educational requirements.

Training time is from 54 to 62 weeks, and upon graduation, cadets are commissioned Second Lieutenants in the United States Air Force Reserve. Such officers are required to serve a three year tour of active duty, and are paid \$438.58 monthly if single and \$455.68 if married.

Aircraft Observers function as members of Aircrew Teams in such capacities as Bombardier, Navigator, Electronics Countermeasure Officer, Aircraft Performance Engineer Officer.

WEST TEXAS PRESS COMMENTS

Question of the week—"Will We Know Each Other in Heaven?" comes to this desk by way of an exchange newspaper carrying it as a head over a story. We've a lot to learn about our next door neighbor, by being companionable, co-operative, not "snobby", homefied in little things, here on earth before we are likely to be able to distinguish them in Heaven, or that any one else will know us when we get up there. And we might add if some of us don't change our ways of being unfriendly and living nearer up to the golden rule, "Do unto others as we would have them do unto us," we might miss reaching the pearly gates to see, if we know anybody up there. There is one class of folks that stand a pretty good chance getting to Heaven—that is the weekly newspaper folks. They have had a pretty good taste of hades while here on earth.

Harry Scobee, the Mile-High correspondent who writes the historical facts in feature stories to big daily newspapers, wrote one that appeared in last week's Alpine Avalanche. The subject of his story was a Fort Davis lady 100 years old. She knew the year she was born but didn't know the day or the month. She is Mrs. Isador Talavera, born in 1853, on Gibbo creek in Presidio County, Texas, near where the town of Shafter now stands, 40 miles south of Marfa. Scobee said, she was living within the sound of the bugles of the frontier army post of Fort Davis when she was married in 1868 at the age of 15. Despite her age Mrs. Talavera, still cooks and sews. She makes her own dresses and threads her own needles. And that, without the use of glasses.

It must be a pleasure to live in a county that when the folks decide their county needs a plot of ground to build a county park with all improvements, they up and vote a \$320,000 bond issue, knowing that all the oil companies and associated industries will pay more than ninety per cent of the tax money. Winkler County voted that amount of bonds at last Saturday's election to be used in building two county parks. According to the Wink Bulletin \$265,000 is to be spent for park facilities at Kermit, and \$55,000 for park improvement project in Wink.

At a recent Lion luncheon meeting at Matador, Lion Rev. W. B. Vaughn was asked to pray for rain. Within eleven hours after the Reverend Gentleman said the prayer, rain was falling in Matador, according to Editor Doug Meador in his Matador Tribune. It was the first time in the history of the Lions Club that Divine Blessings in the form of rain-fall had been invoked.

Reagan County has set its golden anniversary celebration for August 21-22 to be held at Big Lake. The program will include roping, two nights of dancing, a

bathing revue, and barbecue to be held on the court house lawn. Provision is being made to feed 1,500 people, so reports the Big Lake Wildcat.

The Big Lake Wildcat reports that the meeting of the Reagan County Home Demonstration Club held last week was in recognition of the county's fiftieth anniversary this year, and devoted the program on giving historical sketches by club members. Mrs. John O'Bryan, mentioned the fact that the first ranch house built in what is now Reagan County, is on her property near Best. A crude structure of stone, about 12x20, built in 1885 by John Gardner, an early day Indian fighter and frontiersman, who later served as county commissioner and became well-known for his string of fine horses.

This column mentioned last week it was waiting with much "pomp and glory" to see the coming week's issue of the Andrews County News, as about all the News' force had gone on their vacation and left the paper with Charley Roberts, the publisher to get out. Well, the issue came, and it was a money-maker—that is, the issue carried more advertisements than the general run of the paper when all hands were at their posts. Roberts said the readers might find the news dull, but the advertisements made interesting reading, a line of news that affects your pocketbook and your standard of living.

This is what the Stamford American has to say about their new lake that had been standing dry as a bone until the rain the other day:

"The new Stamford Lake has been a popular place since the rain. Many folks have driven out to survey proudly that vast expanse of water. Apparently, Stamford's water problem is licked for a long time."

This is displaying West Texas' "good neighbor policy" in all the term implies. The Munday Times last week reported:

"Nineteen tractors were going full force, their drivers and owners all of one purpose and intent—to help a neighbor who had experienced misfortune. The tractors were assembled at the M. L. Jacobs farm. Mr. Jacobs had been ill for sometime and was recuperating from a major operation at a Wichita Falls hospital."

The farmer's crop was in bad shape because of his being unable to work it. Three hours after the neighbors with their tractors entered the field they had the crop completely worked out.

WILKINSONS VISIT CRIMS

Mr. and Mrs. Sam Wilkinson are visiting in Franklin, Louisiana, with Mr. and Mrs. Roy Crim. The Crims are former residents of Stanton.

Newspaper Publisher Takes Lead To Preserve Eisenhower Birthplace

DENISON—President Eisenhower's birthplace recently termed a firetrap, is going to be made as fire-resistive as possible.

Fred Conn, publisher of The Denison Herald and a leader of the effort to preserve the two-story frame house where the President was born, has asked two of Texas' ranking fire prevention engineers to inspect the birthplace and recommend the steps necessary to make it fire safe.

The experts are A. Sidney Briggs, manager of the Fire Prevention Engineering Bureau of Texas at Dallas, and Hugh V. Keepers, the assistant manager. Their organization is the engineering and fire prevention arm of the capital stock fire insurance industry in the state.

They'll be in Denison Friday, July 17, to examine the Eisenhower home from floors to rafters. Then they'll recommend ways and means of making the six-room house as fire safe as possible.

The condition of the house was first made public last April during a city-wide fire hazard inspection of Denison conducted by the North Texas Division of the Texas Insurance Fieldmen's Association. At that time, the inspectors ordered the tourist mecca closed to visitors until some of the more dangerous hazards could be corrected.

During that check, the inspectors found a serious gas leak in an antique kitchen cookstove,

PERSONALS

Mr. and Mrs. Herman Fisher have as their guests this week, their daughter, Mrs. Ted Ware, and granddaughter, Sherrie. The Wares are from San Francisco.

Mrs. Charlie Ross and daughters, June and Doris Ellen, of Alpine, recently visited in the home of Mr. and Mrs. Claude Kelly and Mr. and Mrs. P. T. Ross.

Mrs. J. N. Clark and children, Kay and Phil, of Andrews, visited in the home of Mr. and Mrs. Claude Kelly recently.

Mrs. P. T. Ross and son-in-law, Howard Avery, were visitors in Alpine Saturday. They were accompanied home by Mrs. Avery, who had been visiting Mr. and Mrs. Charlie Ross.

Mr. and Mrs. James D. Eiland left Saturday on a tour of South and East Texas. They expect to be gone about a week.

INJURED BY FALLING PIPE

Willie B. Hickman of Sunray was injured in an accident in the oil fields near Andrews last week when a pipe fell on him, resulting in severe lacerations on his arm. Hickman and his wife were here visiting Mrs. Hickman's parents, Mr. and Mrs. Ogal Avery.

Two open flues capable of spreading a fire throughout the building in a matter of seconds, and other hazards.

It was then that Denisonians decided to get expert help. The insurance engineers agreed to make the thorough inspection set for July 17 as a public service.

Don't Have To Be An Athlete To Have Athlete's Foot

AUSTIN—You can't have to be a Mickey Mantle or a Babe Zaharior to be eligible for athlete's foot. You're qualified just by being human.

This ringworm foot infection can come to either sex at any age at any time, although it is probably more prevalent during summer months when feet are more apt to perspire.

You'll know you've got it when your feet begin itching and blistering, and when you see the soggy dead skin between the toes or on the soles. Take action then, and you can usually get rid of it in a hurry. But neglect it and you're in trouble.

Here are some suggestions from State Health Officer George W. Cox which will prevent athlete's foot or help you get rid of it if you have it now:

Dry carefully and thoroughly between your toes after bathing and as often as practical during the day. The disease is caused by a fungus which thrives on damp, perspiring feet.

Massage your feet with a mild rubbing alcohol. This will help prevent spreading the infection from one spot to another.

Dust a good fungicide powder or even an unscented talcum powder or powdered boric acid, between the toes, in stockings and shoes. If at all practical, change stockings once during the day.

Swab all cracks or soggy areas between the toes with one part

iodine diluted with ten parts of alcohol.

Wear absorbent socks and put a piece of cotton on areas between the toes where cracks or soginess are evident.

Don't use remedies which have been sold for eczema. Consult your physician if the cracks and blisters and soginess do not yield to these measures.

And keep this in mind: If athlete's foot is neglected, it can spread readily beyond the feet. The lesions will go deeper and deeper, and may cause critical damage.

HERE FOR WEEKEND

Sadler Bridges of Odessa spent the weekend with his parents, Mr. and Mrs. Cecil Bridges.

HAYWORTH FAMILY REUNION

Mr. and Mrs. Bill Hayworth of Fort Worth; Mr. and Mrs. Henry Rabidnor and children of Tampa, Florida; Raymond Hayworth, Kerman, California; and Mr. and Mrs. Lois Hayworth and children of Oakland, California, attended a reunion of the Hayworth family in the home of Mr. and Mrs. R. L. Roland in Big Spring last week. The Hayworths are former residents of the Merrick community in Martin County.

GUESTS FROM FLOREY

Mr. and Mrs. J. E. Ashley and children of Florey visited in the home of Mr. and Mrs. V. E. Duncan last week.

From where I sit... by Joe Marsh

An Honest Night's Sleep

Slim Johnson, just back from a business trip, tells about a hotel he stayed at one night.

"I hit town late and went right to the hotel. There was no clerk at the desk, but there was a sign that said: 'Gone to bed. Rooms \$3. Take a key. Pay when you leave. Sleep Well.'"

"Upstairs, the room was real clean, the bed comfortable, and I slept like a log. Came down in the morning—still no clerk. So I left three dollars at the desk and went on. Can you imagine folks that trustful?"

From where I sit, running a hotel on the honor system shows a real trust in people. And people always appreciate being trusted. Letting your neighbor follow his personal preference is a kind of trust too—trusting in his good judgment. I like a temperate glass of beer occasionally, you may prefer buttermilk, but let's hope neither of us "registers" a complaint against the other.

Joe Marsh

NOW!

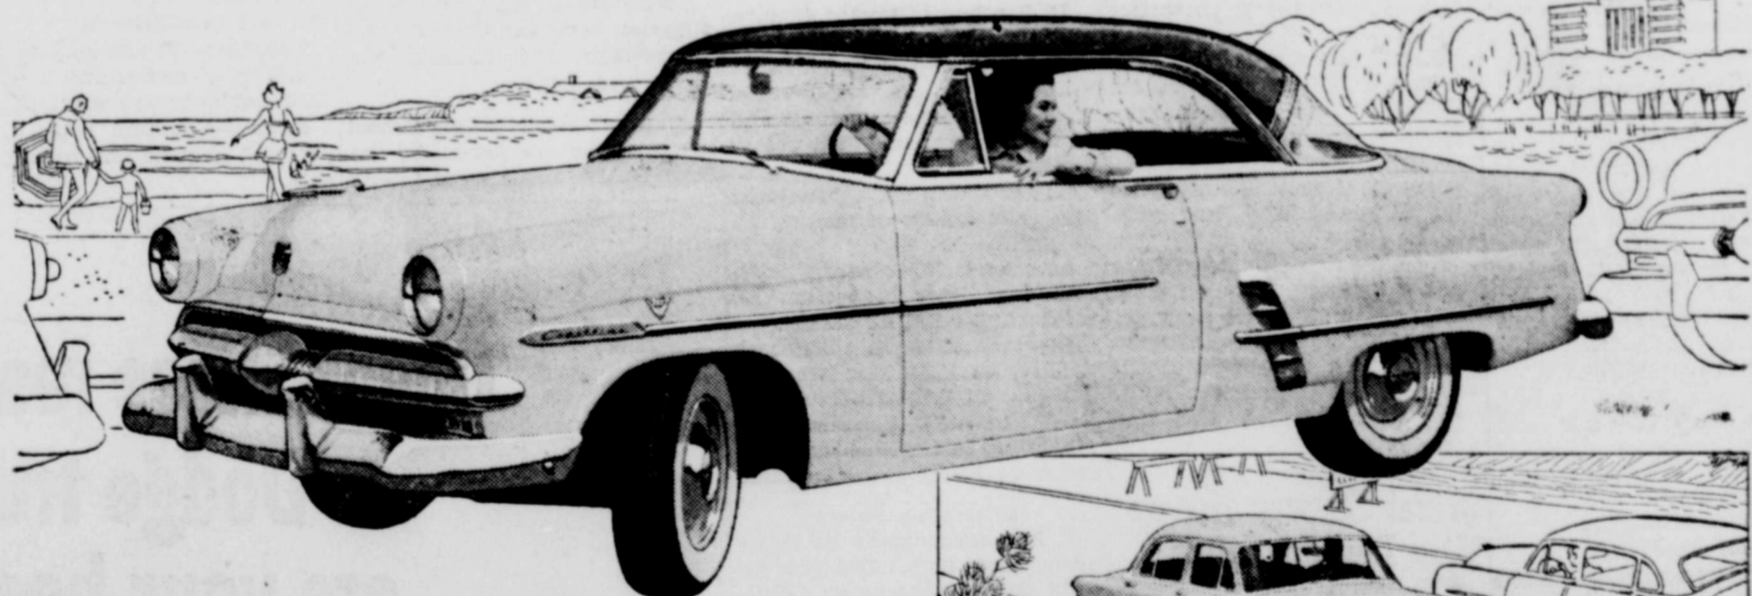

Ford Master-Guide

the last word in

Power Steering!

Master-Guide applies hydraulic steering power automatically... and in varying degrees as required... right at the steering linkage, close to the wheels. At the same time the system serves as a hydraulic shock absorber to keep road jars and jolts from your hands. As a result all you do is... guide the car... Master-Guide supplies the muscles.

It's the newest in a long list of Ford advancements that make this Ford the outstanding car for '53!

No other car near Ford's price has ever offered you so much!

Ford was the first in its field to bring you V-8 power. Today, Ford alone of all the low-priced cars offers you the smooth, unsurpassed performance of a V-8 engine. And Ford's Six—the most modern in the industry—with Overdrive, won the Grand Sweepstakes in this year's Mobilgas Economy Run.

Ford first brought to the low-price field a completely automatic transmission that combines the smoothness of a torque converter and the gas-saving "go" of automatic gears. Fordomatic remains the most versatile automatic you can buy.

Ford's new "ride" brings you road-hugging and bump-leveling qualities never before known in low-priced cars. Front end road shock alone has been reduced up to 80%.

Easier-acting suspended pedals. Center-Fill Fueling and Full-Circle Visibility are just a few of the many important advancements first introduced by Ford.

And now Ford brings you the newest and finest in power steering... Master-Guide, a system exclusive in Ford's field! It's no wonder, then, that Ford is the "Worth More" car... worth more when you buy it... worth more when you sell it.

HELPS YOU OUT OF "TIGHT SPOTS!" The tougher the going the more Master-Guide works for you. For example, if you go off the pavement onto a soft shoulder or a rough, rutted road, Master-Guide provides the muscles to keep you on a steady course. At the same time, Master-Guide absorbs the shock that might otherwise be transmitted to the steering wheel. You'll find all handling is easier with Master-Guide and that parking requires only one-fourth the normal effort. Should Master-Guide ever lose its power, the standard steering mechanism will operate just as usual. Thus, Master-Guide provides new ease and stability, with a natural feel and full security, wherever you may drive.

Optional on all V-8 models of extra cost.
