

By JAMES E. KELLY

(Opinions expressed in this column are the views of the writer and should be so interpreted).

THE COLUMN WOULDN'T ATTEMPT to give the true official post James D. Eiland, holds down with the Cap Rock Electric Cooperative, Inc., but I do know from the frequent "ins" and "outs" he has been making the past two weeks to The Reporter office "juggling" in a copy and leaving publicity copy announcing the coming to Stanton of the Electric Fair, (that starts today, Thursday), on the grounds of the Cap Rock Electric Coop., on west highway 80, and hanging large placards in prominent places in the business district of Stanton, "Jimmy's" (my nondeplume for James), position in this instance, is a spread out all over "publicity department." On his every-day routine of work with the Coops., Eiland's time is pretty well taken up with visiting the homes hooked-up with the Cap Rock Electric in the rural sections of Martin, Howard, Midland and Glascock counties looking after the progress being made in the homes with the various electrical appliances, and keeping abreast of the publicity end. Nuf sed in this connection.

Advertisements carried in The Reporter, and the large placards strung about town, and the publicity appearing simultaneously in the news columns of the paper, The Electric Fair is here, and a program, filled with a variety of entertaining numbers, is to be staged under the Big Top. There will be skilled artists performing acrobatic stunts, slight-hand tricks, etc. There will be kiddie rides, contests, free movies, demonstrations, General Motors 'Previews of Progress.' The line given here on this Electric Fair business, may be messed up—but you be in attendance at the program and see for yourself. For other information read the news columns of this week's Stanton Reporter.

This is me—
A man seldom begins bragging about how many years he has lived, until he has little else to brag about.

THE TEXAS DIVISION OF THE American Automobile Association, sent this desk a little information that has to do with keeping the roadside along highways clean of loose paper, empty cans, bottles, etc. The Association dropped the hint that we should "practice the same good housekeeping on the highway as we do at home." That practice will not work in all cases. Some homes (but few, of course) you will discover are kept in no better orderly fashion that will be found in a well cluttered-up road alongside the highway.

Responsibility for the untidy condition found on highway roadides, is traced to the motorists who travel on the highway. When they want to discard from their car an empty bottle, tin can, carton, or an old newspaper, they pitch it out through the car window, and let the trash land where it wants to.

A good picture of a trashy, cluttered up roadside, can be seen on highway 80, leading from Stanton to either Big Spring or Midland. This state of affairs is no reflection on the highway department crew for they are doing their level best to keep the roadway free of refuse with the help they have.

What the Automobile Association is trying to drive home is to gain the cooperation of the motorists who travel on the highways, to get rid of their trash other than dumping it out of their cars on the roadside. The Association suggests a simple set of rules by which the motorists can help to correct the situation. Here they are:

Carry a few paper bags in the car, and have one handy for any refuse accumulated on an outing. Dispose of the filled bag at some receptacle along the way, or take it home for disposal in the garbage can. Cleanup after stopping for a picnic.

The Texas Division of the Three A's, points out that: "In one state alone the cost of 'roadside housekeeping' is \$450,000 per year. Much of this money could be saved or put to a more useful purpose, if motorists would cooperate with authori-

Electric Fair Here Will Feature Entertainment

Cap Rock Electric Co-op will bring the 1953 Electric Fair to Stanton August 6 and 7 for the Co-op's Annual Membership Meeting. O. B. Bryan, manager, said that it's all free, and that everyone's invited.

The Big Show opens at 6:00 p. m. Thursday on Hiway 80 west of Stanton. Opening night is a special show for the townspeople of Stanton. Exhibits of the latest electric and farm equipment, provided by local merchants, will line the Midway. Under the Big Top Tent, opening night visitors will see the highlights of the big entertainment program.

Then Co-op members will take over the following day (August 7) for their regular business session, plus the full entertainment program of the Electric Fair—cowboy music, an amateur talent contest, trained animal acts, juggling, Previews of Progress—a wonders-of-science show, and the laughable antics of Bozo the Clown.

A table model Stromberg-Carlson radio will be awarded the winner of the amateur talent contest, and the winner will also be judged for the state finals to be held in Mineral Wells in October. Winner in the state finals will receive a major Kelvinator appliance, an automatic laundry, an electric range, a home freezer, or a refrigerator—in addition to \$50 to pay expenses to Mineral Wells.

Principal business during the Co-op's brief business session will be the election of directors. The Co-op's nominating committee already have met to make nominations and additional nominations can be made by members attending the annual meeting, Bryan says.

During the business session, special movies will be shown for the kids. At other times during the day, movies of general interest will be shown in the special movie tent. And in addition, there's a kiddie ride, which like the rest of the Fair is free.

Martin Oil Activities

By JAMES C. WATSON
The Texas Company is testing No. 1-AH State, one location north stepout to production in the Block 7 (Devonian) field of Northwest Martin County, through perforations between 12,234 and 12,258 feet.

The project swabbed 220 barrels of fluid in 27 hours. The fluid was 25 per cent water and the rest was oil. Then the test swabbed 24 hours and made 113 barrels of fluid, 25 percent water and the rest oil.

The perforated section was acidized with 4,000 gallons. The producing zone is in the Devonian.

Location is 660 feet from south and east lines of the northeast quarter of section 12, block 7, University Lands survey.

J. D. Wrather, Jr., of Dallas No. 1 Quinn, Southwest Howard County wildcat, 10 miles east of Stanton, is bottomed at 4,505 feet in sand of the Clear Fork of the Permian and has been temporarily abandoned. I found no shows of possible production.

There is a possibility it may be re-entered at a later date and drill deeper.

Location was 660 feet from north and west lines of section 40, block 34, T-1-S, T&P survey.

Magnolia Petroleum Company No. 1 Ida Mae Oldham, Northeast Midland County wildcat, seven miles southwest of Stanton, is at plugged back depth of 10,405 feet and is testing perforations at 10,332-10,338; 10,380-10,400; 10,258-277; 10,318-323 and 10,239-246 feet.

These perforations were re-acidized with 10,000 gallons and then operator swabbed 23 barrels of load oil and 28 barrels of acid water in five hours.

The test then swabbed and flowed 239 barrels of new oil, 185 barrels of acid water and 16 barrels of sulphur water in 43 hours from all perforations.

Location is 660 feet from north and west lines of section 38, block 37, T-1-S, T&P survey.

Time Extended For Entering Contest

Time has been extended until Monday, August 10 for all persons wanting to enter the Stanton Merchants' Contest announced last week.

The contest page may be found in this issue of The Reporter. Requirements are easy and the prizes to be given away are large, so every member of the family should compete for one or more of the awards.

Use your new dial telephone book to fill in the phone numbers of all stores offering a prize. Write your name and address in the space provided. Then enter one or a many of the contests as you want by writing, in 25 words or less, "I like to trade at (name of store) because . . ."

Contest pages must be in The Reporter Office by 5:00 p. m. Monday, August 10. Enter the contest now, before you forget!

CITY-COUNTY HEALTH SANITARIAN Mrs. Leo Turner smiles approvingly as State Health Department X-ray technician Kathleen McElroy "fits" Jack Arrington for a chest X-ray. Next in line were Mr. and Mrs. Henry McNew of Lenorah, who were among 443 who took advantage of the free health service here Friday.—Reporter Staff Photo.

Board Announces Reopening Of Memorial Hospital Monday, Aug. 10

LOG OF EVENTS ANNOUNCED FOR FIELD DAY TRIP THROUGH COUNTY AUGUST 12

The annual Field Day Trip to Martin County farmlands has been chartered by Ray Hastings, county agent and Martin Vavra, local soil conservationist. Date is August 12.

The motorcade will leave the courthouse at 9:00 a. m. Making the trip will be many local businessmen as well as several out-of-county guests and officials of the Martin County Chamber of Commerce, sponsoring organization.

First to be visited will be wheat stubble of the Dr. Y. D. McMurry ranch, Hastings, chairman of the Chamber's Agricultural and Livestock committee, said. From there the party will move to the Northeast portion of Martin County where blowing is said to have caused severe damage to farmlands.

Terraces will be viewed on the Jarner McAdams farm and an inspection of irrigated cotton has been arranged at Ralph Hopkins farm in the Tarzan community.

Of particular interest to many will be the alfalfa being grown on Tom Brothers' place as well as the feed crops grown on the Tom Glenn place.

Vavra, chairman of the Chamber's Soil and Water Conservation committee, said the group would stop at the Inez Woody ranch, operated by Woody Smith, to see an example of conservation irrigation.

Chow At Courtney
Hila Weathers, Chamber manager, said that arrangements had been made to feed the entire group at the Courtney school building at noontime. She said the meal would be prepared and served by the County Home Demonstration Club women under direction of Mrs. Mildred Eiland, county HD agent.

Price of the meal will be 75 cents with each person paying for his own food, it was pointed out.

Irrigated cotton in the Courtney area will be observed as the tour continues toward the A. H. Houston estate, Southeast of Stanton. The Houston place is said to display some of Martin County's most attractive results in irrigated pasture lands.

Chamber President Bridges, who will lead the motor caravan, said the trip was arranged to be enlightening and interesting to any person who cared to make the trip. "Everybody is invited to come along," he said.

Those planning the trip expect it to be completed around 3 p. m.

TRANSFERRED TO CORPUS

Terrel Pinkston, son of Mr. and Mrs. John Pinkston of Stanton, has completed his training as corpsman at the Naval Hospital at Bainbridge, Maryland, and has been transferred to Corpus Christi Naval Base, where he and his wife, the former Miss Dorothy Mims, will make their home.

City Council Meets In Regular Monthly Session With All Members Present

The Stanton City Council, meeting in regular session Tuesday night, was attended by its full membership including Mayor Woodford Sale and Councilmen E. Price, Bob Deavenport, J. T. Berry, S. W. Wheeler and Sam Wilkinson.

Minutes of last month's regular meeting, as well as the minutes of special called meetings were read by City Secretary G. B. Shelburne and approved by the council.

A resolution, presented in the July 7 regular session, which proposed that the city install a gasoline pump and storage tank to be used to store gasoline purchased for use in the city's motor vehicles, was also put in the form of a motion by its author, Councilman Deavenport.

New Dial Telephones Go Into Operation Here Friday

Friday is the big day in Stanton telephone history.

It will be "ring out the old, ring in the new" here at noon Friday when Stanton's new dial telephone system is put into operation by Southwestern Bell Telephone Company.

"Ringing out the old" means an end to the manual telephone system which has served the city since telephones were first installed here.

"Ringing in the new" heralds the advent of the automatic telephone system—a significant milestone in the city's communications history. It will mean that Stanton will have the finest, most modern telephone service available anywhere, C. W. Fisher, telephone company manager, said.

"Everything is in readiness for the switchover," Fisher said on the eve of the inauguration of the new system.

The new dial system is quite a contrast with communications in Stanton in January, 1924 when Miss Mamie McDurmon, local chief operator, first started work here.

At that time there were no telephones in the Martin County Courthouse, across the street from the old central office, she recalls.

"If somebody called in for the sheriff or other county officials, I would hang a large white flag on the front porch of this office. It was their job to watch for calls. If the call was urgent and nobody saw the flag, I would run to the courthouse and get them. I avoided this when possible because as the telephone company agent, I was the only employee here," she recalls.

Southwestern Bell telephone Company purchased the Stanton exchange in August, 1919 from the Western Telephone Company. There were 77 telephones in and around Stanton then. The system was expanded in 1930 to provide for more local customers

FIRE?—Dial 4-3333 24-Hour Day Service

Residents reporting a fire will dial 4-3333 after Friday noon. The report will be received by Arrington's Ambulance Service, the hospital, or some office which is open 24-hours a day.

The station receiving the report will be equipped with switch to immediately sound the city's fire alarm siren.

The reporting station will hold their phone line to the city hall open until the firemen arrive there and get the fire's location.

A resident, reporting a fire to 4-3333 will not have to do any waiting to see that firemen are given directions. They may hang up immediately after reporting fire, and go about their efforts to control the blaze until the firemen arrive.

This new arrangement will replace the former service of local switchboard operators who received fire reports and sounded the siren, later giving the firemen location instructions.

After Friday dialing the number 4-3333 will replace the old arrangement of "just turning the crank" for an operator. The new service is expected to be very efficient as the tone of this special number is distinctly different to an ordinary phone and denotes an emergency to the station responsible to attend to it.

DWI Charges Show Sharp Drop During Month Of July

DWI charges filed in the sheriff's office and tried in the County Court took a sharp drop during the month of July. One lone fine, amounting to \$98.48, including court costs, was paid by Powell R. Butler. Bond was set at \$500 in a DWI charge filed against Herman K. Hager. Nine defendants entered pleas of guilty to DWI charges and paid fines to the County Court during the month of June.

Bond was set at \$1,000 each for Felipe Arispe and Joe Arispe following charges of burglary and at \$500 for Molimar Raymond following a charge of aggravated assault.

Floyd S. Echols entered a plea of guilty to the county's charge of transporting beer and was fined \$323.45, including court costs. Also booked on the sheriff's docket, for transporting beer, was Jose Castenada.

Justice of Peace fines included \$33 paid by Kenneth Jones on a drunk charge and \$38 and \$28, paid respectively by Leslie D. Emfinger and Manuel Lopez for traffic violation charges.

CORRECTION

The Stanton Reporter prints the error, July 23, of listing residence of Pvt. Billy Smith of San Antonio. Pvt. Smith and his wife reside on Route 1, Stanton. He is the son of Mr. and Mrs. Tom Smith.

and add more facilities for long distance calls.

"Stanton's growth can be measured by its expanding telephone system," Fisher noted.

At the end of World War II there were less than 200 telephones in Stanton. Today there are 590 telephones here.

Now, Stanton is ready to change to dial telephones—the most modern telephone service available anywhere.

As the time for the change to dial approaches Friday at noon, a few last calls will be trickling through the present switchboard and the last familiar "Number, please" will be heard. At noon a final check of calls being handled will be made to assure that no emergency calls are involved. Then the cutover order will be passed to telephone men who will go into action at the present central office and at the new building.

Key cables which have been "half-tapped" so that they would be connected to both central offices while the new dial system was under construction will be cut so that all lines will tie only to the new dial office. Simultaneously at the new dial building, hundreds of small "blocking tools" will be quickly yanked out of the dial equipment by men pulling away hundreds of them at a time by means of connecting cords. Then each telephone line in the city will be connected directly to the new dial switching equipment. The power switch in the old central office will be thrown and the new dial system will be in operation.

With these moves, too, every telephone number in the city will change.

The actual change to dial operation will take perhaps one minute or slightly longer to perform. But the job to be done in sixty seconds climaxes several months of painstaking effort by telephone technicians all over the country, Fisher pointed out.

A new telephone building was constructed; loads of dial telephone equipment was engineered, built to order, delivered, placed and wired. A group of Western Electric installers were on the job. Installation of the new system required several thousand hand-soldered wire connections inside the new building.

In addition to this work, outside construction crews added thousands of feet of new wire and cable to the city's network of lines; local telephone men installed dial telephones all over the city; a complete set of records on every telephone in Stanton was set up and maintained; exhaustive tests on telephones and other equipment were made; and a new dial telephone directory was compiled and published.

Howdy Folks
By John Roueche

BOBBY CARLILE entertained Stanton Lion's Club members Monday evening with guitar music and songs. . . It is nice to know that when you help someone up a hill, you are a little nearer the top yourself. . . How slow we are to learn that half the woes we dread, do not come upon us at all. How much wiser it is to take things as we find them, making the most of the present with a view to building more wisely for the future. The Golden moments in the stream of life rush past us, and we see nothing but sand; the angels come to visit us and we only know them when they are gone. Sometimes, when things seem to be going against you, they may be coming your way. Nothing ventilates the mind like a resolution.

VISIT TO PORT STOCKTON

Miss Mrs. Tillman Morgan, and Bruce of Stanton, and Smiley Smith from Big Spring, visited in Fort Stockton, Sunday.

BIGTIME ENTERTAINMENT—and all free—when Cap Rock Electric Co-op holds its annual membership meeting and Electric Show in Stanton August 6 and 7. The meeting will be held in a big tent, as pictured. An amateur show, animal acts, performances by Bozo the clown, free movies, and the election of new directors by the co-operative will headline the event. The exhibit tent will contain a display of electrical appliances and farm equipment. Not only are members of the Cap Rock Co-op. urged to attend the show, but the general public is invited, according to O. B. Bryan, manager of the sponsoring concern.

250,000th Visitor To Texas Longhorn Cavern Pretty Houston Blonde

BURNET — Texas Longhorn Cavern, world's third largest cave and one of the state's top scenic wonders, is heading for its second quarter-million visitors.

A pretty blonde girl from Houston became the 250,000th visitor to the huge Cavern since it was opened to the public more than twenty years ago.

Mrs. Marlene Chadick, 22, passed through the legendary Sam Bass entrance with a group of visitors from Houston and was greeted by H. H. (Hob) Galloway, manager, and other cavern officials. She was presented with a complete western outfit as a memento.

The quarter-million attendance record was established at the high point of the cavern's best tourist season to date, Mr. Galloway said. Attendance so far is running ahead of the cavern's best year, which was 1951.

The record was also the second milestone in the past few days for Mr. Galloway, who doubles in brass as a Burnet bank president, Chamber of Commerce director and chief booster for Longhorn Cavern.

He was recently presented with an engraved watch for his 20 years service as cavern manager,

at a banquet here attended by more than 100 guests.

The guests included Chamber of Commerce officials from the neighboring towns of Lampasas, Bertram, Marble Falls and Llano. Also Frank D. Quinn, chairman of the Texas State Parks Board, and Max Starke, head of the lower Colorado River Authority.

The cavern is located in Longhorn Cavern State Park, four miles south of Burnet. Two miles of its eight miles of explored length have been developed and lighted. Guided tours are scheduled seven times daily.

DR. BILL LIVELY

Attorney General Releases Opinions For Month Of July

Attorney General John Ben Shepperd has released a list of all opinions written by his office during the month of July.

Opinions of general interest include the following:

A real estate dealer may offer premiums to a property owner who lists his property with the dealer but may not offer premiums to persons who submitted a "lead" which results in the dealer's getting a listing.

A County Judge may place defendants convicted of drunk driving on probation for not less than six months in lieu of a mandatory jail sentence.

The minimum amount of the board required of the tax assessor-collector of an independent school district is twice the amount of taxes collected in the largest single collection period of the preceding year.

Justices of the Peace who get a regular salary may keep fees collected for performing marriage ceremonies and for acting as ex-officio Notaries Public.

Fees may not be paid to a sheriff in advance for serving cita-

tions on delinquent taxpayers who are non-residents of the county.

A County Commissioners' court may make valid county tax levies even if one of the Commissioners is absent from the meeting because of duties in one of the reserve branches in the armed forces.

A County Commissioner serving in a military reserve capacity is entitled to his salary during his absence on military duty.

A contract to purchase stationery and printing for the legislature which was not let on competitive bids and approved by the Governor, Secretary of State, and Comptroller is not valid.

A County Judge acting as Ex-officio County Superintendent is entitled to keep the additional money paid him for such office.

Shepperd said that his office is continuing to win approximately 98 per cent of all cases tried since the first of the year. During the month of July, 94 cases were won out of 104 tried or appealed.

Make Sure Air Conditioner Matches Needs

BY EDNA MILES

PICKING the right air conditioner for your needs takes greater thought than that involved in the purchase of a deep freeze or a washing machine.

With air conditioners coming within the budget of so many families, it's a good idea for the housewife to forearm herself with practical information before the purchase is made.

Rules for getting the most for your money when buying an air conditioner come from an expert in the field. According to him, there's a common assumption that a room-air-conditioner of a given size will air-condition any room of a certain floor space. This is quite untrue.

The first consideration, even before thinking about the size, should be the room's exposure. The number and the size of the windows in the room, its location in the house, construction of the house, and whether the unit will be operated during the day or only at night, comprise four very important factors.

Perhaps you have an upstairs bedroom in an uninsulated frame house with a southwest exposure and no shade. You want to air-condition the room during the daytime hours only. This is the most difficult kind of room to cool. Compare it to a downstairs living room on the north side of a brick house. Even though both rooms are the same size, the upstairs bedroom will take a larger unit to pump out the heat that flows into the room.

But there are other considerations, such as the number of people who normally occupy the room, and the height of the ceiling. In addition, remember that it's a poor idea to let direct sunshine into the room you want to air-condition. The use of awnings, jalousies, or blinds will help cut the unit's operating costs.

By checking these points with your dealer, you may prevent the waste that results from buying a room-air-conditioner that's too small or too large. Match the unit to your room's requirements and it will perform both efficiently and economically.

A console model air conditioner like this one will cool a large room or several small ones.

Proper Beach Wear for That Trim Look

BY EDNA MILES

Halter top for shorts or skirts is in white or black pique. This Dorothy Korby design is ideal for beach or summertime evening.

LOOKING pretty at the beach takes work in the form of beforehand planning. Even casual observance of beach get-ups leads to the suspicion that seventy-five per cent of all women at the beach have never so much as glanced at themselves in the mirror before they left the house.

Full length appraisal is essential. The swim suit to cut down figure faults has been on the market for sometime now and is no rarity. The sand or sitting suit that performs similarly is designed to be kind to too-heavy thighs, upper arms and bust.

A good many women continue to cram themselves into that hardest of all suits to wear: white. This demands the absolute in figure perfection. Or, women with large derrieres bounce about in bloomer suits with ruffles across the back. They also are fond of pink which is definitely enlarging.

Another failing is that of "wearing out" old housedresses or just plain old clothes at the beach. This is fooling yourself, just like eating that last piece of pie "to keep from wasting it."

Casual summer shoe that takes readily to sand is this Desco design in gray denim with black leather trim. Light crepe sole is flexible; whole shoe can roll up into the palm of a hand.

You're in the public eye at the beach so look your very best.

Sleek top for a pair of trim shorts is Dorothy Korby's little molded pique halter in black or white with a single big shiny black button. Bring along a skirt for cover-up and you're ready to go on from the beach to dinner.

We've picked a sandshoe with denim upper and crinkly crepe sole as a likely beach candidate. It's light, very flexible and comes in gray denim with black kid trim.

Hopeful prayers for peace are made silently by a group of Gold Star Mothers. They want a truce that "can bring peace to hearts of mothers everywhere." Left to right are: Mrs. Lorena Knowlton, of Chicago; Mrs. Lornadette Gagne, Woonsocket, R. I.; Mrs. Genevieve Dahnke, Roseville, Mich., and Mrs. Broderick, Chicago, all delegates to the 16th annual Gold Star Mothers of America convention in Chicago, Ill.

'Half-Sized Miracle

A dress to work figure wonders for the half-sizer is this flattering wrap-around in nylon blend fabric by Fashion Frocks of Cincinnati.

ELECTRIC FAIR

(Continued from Page One)

Spring, J. D. McCreless, Stanton, is vice president and Miss Arah Phillips, Big Spring, serves as secretary and treasurer. Other directors on the board of nine members are: Dwight McDonald, Midland; C. F. Gray, Stanton; Edgar Phillips, Big Spring; Mrs. Lee Castle, Big Spring; Paul Adams, Ackerly, and W. D. Howell, Lenora.

Directors whose terms of office expire this year are McCreless, E. Phillips, and Howell.

When the Co-op convenes here for its 14th Annual Membership Meeting Friday, O. B. Bryan, Stanton, will have completed as many years as its manager. He said that the nominating committee had re-nominated the three directors whose terms of office expire this year but that nominations were also open to the floor.

Previews of Progress

James Eiland of Cap Rock's personnel arranging the Preview of Progress division of the Electric Fair, said that the following Stanton concerns would have exhibits: Bentley's, Billington Motor and Irrigation Company, Louder Electric, Sprinkler Irrigation and Equipment Company, Stanton Electric, Ector Thornton Implement Company, Stanton Implement Company, Woodard Tractor Company, and James Jones Hardware.

Exhibitors from out-of-town will include: Big Spring Hardware, Cook Appliance Company, Electrolux, Ken Scudder Household Equipment Company, Good Housekeeping Shop, Hilburn Appliance Store, and Saunders Company, all of Big Spring, and Electrolux and ABC, Elma-Nichl Sewing Circle, Midland.

NEW ORLEANS VISITOR

Mr. and Mrs. A. L. Moore of New Orleans, Louisiana, visited Monday in the J. D. McCreless home.

grade and staple of the bale is also accepted by merchants in place of actual samples. By using one, a farmer can sell his cotton by telephone if he desires, Matejowsky added.

August 15 Deadline For Group Applications In Smith-Doxey Program

With only eight days remaining before the deadline, 622 Martin County farmers have signed up in Cotton Improvement Groups under the Smith-Doxey Act.

This was revealed today by H. J. Matejowsky of the Abilene Cotton Classing Office, U. S. Department of Agriculture. Mr. Matejowsky reminded farmers that Group Applications must be in his office before August 15 to insure participation this year. Group leaders may obtain applications from Ginners, County Agents, or the Abilene Classing Office.

Under the Smith-Doxey Act, Matejowsky explained, farmers get free classing and market quotation service from USDA. This gives them an advantage in marketing their cotton. It also simplifies the procedure for getting price support loans, and eliminates the fee for classing price support bales. That's because USDA's green card will already be in the hands of farmers at loan time.

This green card, showing the

CATCHY CATCH—It looks like some fisherman made a lucky catch, but don't be fooled. That's darlin' Kathy Darlyn adorning the sands of Sarasota, Fla., with an attractive beach robe of shimmering fishnet made of metallic thread.

LADIES WITH LILIES—Pretty girls and traditional Easter lilies make an attractive sight. Seen above, Kathy Darlyn sits surrounded by the flowers while Betty MacDonald stands smiling behind her. The place is Cypress Gardens, Fla.

LOOK HOO'S THERE—These two Michigan screech owls give each other the eye in no uncertain terms. The fluffy little birds are misnamed, according to bird experts, who say their cry is a series of clear, tremulous and plaintive notes rather than a screech.

IKE HOOKS ONE—Probably thinking how good this speckled beauty will look in a frying pan and taste on a plate, President Eisenhower takes a trout off his hook. The President is seen above fishing in one of the trout streams in Custer State Park, South Dakota.

Only the new Ford Truck

—gives you the all-new DRIVERIZED CAB

—plus new LOW-FRICTION V-8 POWER

Reduces driver fatigue! New curved, one-piece windshield, 4 ft. wide rear window. Deep side windows. New wider, adjustable seat has non-sag springs and seat shock snubber. New push-button door handles! New rotor-type door latches! Try the Ford Driverized Cab for a brand-new experience!

Mightiest Ford Truck engine ever built! 155-h.p., overhead-valve Cargo King V-8. Low-friction gas-saving design! Also 145-h.p. V-8, 106-h.p. V-8, New Low Friction Six! Overhead-valve 101-h.p. Cost Clipper Six, 112-h.p. Six also available. Altogether Ford offers a total of FIVE great truck engines.

SALES AND SERVICE

STANTON, TEXAS

FROM WHERE I SIT

By Hila Weathers
Manager of the Martin County Chamber of Commerce

THIS WEEK WE PRESENT A. W. Wooley, who is with The Stanton Reporter. Wooley and his family came to us almost one year ago and since that time has been very active in all phases of advertising and publicity for Stanton and Martin County. Just recently he sent an article to the Associated Press and THAT gets all over the nation. We are very glad to welcome him as an active member, who has been named and is serving on several committees of the organization.

WE WERE HAPPY to receive a card from Mr. and Mrs. C. L. Clark while they were on their vacation. Mr. Clark is the local manager of the West Texas Gas Company. The card came from Lum & Abner's Jot 'M Down Store in Pine Ridge, Arkansas, and is certainly in keeping with the characters in Lum & Abner's program. We DO appreciate being thought about while you fine guys are on your vacations, as we believe "folks are the best guys of anybody."

SPEAKING OF THE DIAL System—it will be a reality Friday at noon. And bound for Jack Arrington to be the first in getting a novelty gadget for your telephone. It's very helpful and if you do not have one of these "jiggers," ask Jack for one. It is an attractive way of helping.

WE EXPRESS THANKS to Tom Ed Angel for a new kind of a cactus for our window display. Tom has been one of our good friends since coming to Stanton and we are happy to let you folks know that he has a very important position with a construction company, with headquarters 42 miles south of Midland. We are mighty proud of and for Tom, and will be betting on him.

ONE OF THE MOST PLEASANT visitors we've had in quite some time, was Robert and George Whitaker. Robert has just returned from the National Boy Scout Jamboree, and he came by to show us some of the "swaps" and souvenirs brought

home. We are very proud of Robert and glad that he and Dee Cravens, with Bob Deavenport, represented Martin County.

EVEN THOUGH SCHOOL is not in session, we had two mighty nice little school girls to pay the office a visit last week. They were Franzell Britton and Freida Maker. Both girls were interested in displays in the office and we were glad for them to "prowl" around.

WE HAVE ADDED a copy of "The Furrow" to our shelves of literature for your convenience. This magazine was sent to the Chamber of Commerce through the courtesy of Ector Thornton Implement Company. The Furrow is another good magazine full of information and helpful hints to farmers. Thanks, Mr. Thornton.

FOR SEVERAL WEEKS this hall has been kept quite active from the "coming and going" of our farmers and ranchers to the PMA office. Our congratulations to the manager, Charles Daniels, and his efficient staff for their extra hours spent in helping meet the drought needs of the farmers and ranchers.

OUR QUOTE FOR THE WEEK: "I complained because I had no shoes until I met a man who had no feet."

RETURN FROM VISIT TO STATE OF MISSISSIPPI
Mr. and Mrs. Charlie Matthews of Stanton, and their son-in-law and daughter, Mr. and Mrs. Douglas Mims and daughter, Sandra Ann, of Kermit, have returned from a vacation trip to Tupelo, Mississippi. The Matthews reported the country had received fine rains, the crops were looking fine, and the fishing was wonderful. They also visited at various points in Oklahoma, Tennessee, Arkansas and Texas.

BIG SPRING VISITORS
Mrs. L. B. Russell and Mrs. Fred Eaker of Big Spring, visited with Mr. and Mrs. R. H. Kelly and daughter, Ima, last week.

Our Hospitals Are Among Our Greatest Assets

Unfortunate circumstance and they're many, and when they strike they have no pets, individual or institution, to pass up. And in this instance, an "unfortunate circumstance" struck Stanton, in the form that it has stopped the Martin County Memorial Hospital from functioning for some time now. This "unfortunate circumstance" hit Stanton at a critical time, and it struck a blow that for the time being has stopped the operation of the county's most important and greatly needed institution.

The writer picks, without any authoritative source he can lay his hands on the facts in the matter, to back him up, but as in most all cases, where an incident of this kind takes place, the matter of sufficient funds for operating, holds the top position to the failure of the institution to progress. The writer has been informed by a close individual of the workings of the local institution, that the outstanding accounts owing the hospital reaches \$40,000. Sometimes, we wonder if the people really understand the very importance of a hospital in their county, serving the sick, the injured, caring for the emergencies where the saving of a life is dependent upon a scant few moments required to get the patient in the hands of a doctor and skilled nurses.

Not to further exploit the circumstances that surround the closing of the local hospital, we change the subject to include an editorial written by a friend of this writer and published in the

newspaper with which he is associated. The friend is Willard Jones, editor of the Hamlin Herald. Recently, while working around the large newspaper press, Jones got a hand caught in the moving machinery and the result was a badly mangled member. His visits to a hospital in Fort Worth for plastic surgery, and to the local hospital in Hamlin for treatment, gave him the opportunity to learn something of the real value of a hospital to a community, and last week, he published on his editorial page what he learned about hospitals.

His confinement in a hospital, or even having had to submit to the services that doctors and nurses rendered him in hospitals, was the first time in Jones' over 40 years of life.

What Willard Jones has to say should be important to the people of Stanton and Martin County, to the extent that they should join forces and assist in whatever remedial steps are necessary to be taken to re-open the institution. And those who are indebted to the hospital, either from failure to pay their pledges when signed at the beginning of the first steps taken in founding the hospital, and debts owed the institution for hospital services, should make a special effort to pay them, or as much of their obligation as they can, in order to raise the finance necessary to operate the hospital.

The headline used over this article appeared over the Jones editorial.

The editorial follows in toto: Editor of this home town weekly has been a resident of three hospitals during the past several weeks—not by choice, we want you to know, but of necessity—and we have come to have a lot more respect for the citadels of mercy and cure. Previously we had never spent a night in one—how fortunate for our more than 40 years!

No doubt we were like so many of our people of today—the hospitals looked like pretty buildings; they were nice places for folks who needed them; they provided places for doctors and nurses and others to make a living; and their records proved they were making people well and patching up broken bodies—but other than that they were just like other businesses of the cities.

But our hospitals are more than that. They are brick and steel and mortar dedicated to serving ailing, hurting, suffering humanity. They provide the accumulated knowledge, skill and equipment needed to relieve distraught humans of disease, affliction and wounds. A great deal of tenderness, compassion and care is included in the treatment of ailing bodies.

Modern science and research are reflected on every hand in the modern hospital. Medical progress of the past two decades is very phenomenal. We could not help but marvel at the reactions of new medicines in our own case. For example, not a partical of swelling has ever hampered our wound; doctors apparently never worried about poisonings that a few years ago would have been as much a problem as trying to repair damage to an injury. Our hats are doffed to these medical marvels.

Because of advances in doctor's knowledge and methods, countless lives are saved in our modern hospitals, but many of them waited too long to see about their ill or were unaware of them. Most doctors are efficient, competent, trustworthy, gentle, considerate, patient.

Nurses, orderlies and other hospital staff members generally, we found, were good, common-sense people. We saw enough overbearing, demanding, unap-

Introducing a Shiny, Space-Saving Trio

BY EDNA MILES

Slicing a loaf of bread is a simplified operation for this pretty young homemaker. She uses a cutting board built into the lid of the breadbox.

A NEAT and efficient kitchen is not always easy to attain. The room may be so old and poorly planned that it successfully defies the daily clean-up sessions. Yet, nearly any housewife knows what a burden it is to produce three meals a day in a cluttered, inefficient kitchen.

One solution to this problem is offered by a neat, space-saving trio which includes a canister set, breadbox and step-on refuse can. All gleam with shiny chrome.

The breadbox, for instance, has a cutting-board built into the lid to aid in slicing chores and to eliminate the need for a separate breadboard. It also has a horizontal divider-shelf that is removable to facilitate storage of baked goods on two levels.

In the canister set, the lids have counter-sunk knobs to prevent rolling and the corners are designed to allow stacking. This saves space, thus giving a neater look to the kitchen.

The cylindrical step-on disposal can has an inner pail of porcelain enamel to aid sanitation, and a chlorophyll defumer built into the lid to reduce unpleasant odors.

The housewife with a problem kitchen may not be able to have all the things she wants, but products like these help greatly.

Waste odors are reduced by the chlorophyll defumer built into the lid of this chrome disposal unit. The porcelain-enamel inner pail aids sanitation.

preciative people in the hospitals to try the patience of all the staff members.

Yes, our hospitals are among our most valued assets. We all should appreciate them more.

TO VISIT IN CALIFORNIA

Mr. and Mrs. Cliff Hazlewood and daughter, Elaine, of Courtney, left Friday to visit relatives in Bakersfield, California.

No Reason To Be Jubilant Over Peace

United States Senator Lyndon J. Johnson, in his "Your Senator Reports" letter to The Reporter this week, says of the truce pact signed with Communist China, ending the fighting:

"We can be solemnly thankful that the fighting and the dying

and the destruction have been halted in Korea. But there is no reason for us to be jubilant.

"The agreement in Korea does not actually settle any basic issue. I know from my mail that there is much sympathy in Texas for the position taken by President Rhee, a patriot who for many years has battled for his country's freedom.

"There is no sign that the

Communist aggressors have undergone a change of heart. We must remain alertly on guard."

Senator Johnson is in Texas following the adjournment of Congress, to spend a few days looking after things on his farm at Junction City.

"I expect to do quite a bit of travelling over Texas. I want to discuss matters with as many Texans as possible."

REMEMBER THESE THINGS IN DIALING

Look up the number in your new dial directory. All numbers will be changed.

Wait for the "hum-m-m" of the dial tone before you dial.

Dial according to the instructions in the front of the new dial directory.

At noon Friday, August 7, Stanton's new dial telephones will begin to work.

When the signal is given at noon Friday to make the change, men in the new telephone building will pull a network of strings. Switches in the dial equipment will click into place, and Stanton's new telephone system will come to life.

Until noon Friday, August 7, continue to give your calls to the operator.

After that time, please dial your calls.

C. W. FISHER, Manager

SOUTHWESTERN BELL TELEPHONE COMPANY

IT'S THIS WAY

The column has been informed that the little round bolls that cling to the cotton stalks are not "all gold" that the irrigation farmer considers, as it is requiring the expenditure of gold to keep them on the stalk and their insidestogther at this stage of the game. The worms are raiding the cotton patches and the poison is being spread far and wide over the growing cotton fields. The column has heard some farmers had ordered a quantity of Lady Bugs to turn loose on the worms to eat them up, but with what success they are having with the Bugs clearing their cotton fields of the worms, we are unable to inform the public.

Every time a rain cloud is discovered floating around in Martin County, it's not so much the worry if it rains, as to what the cloud has in it should it decide to rain. A hail storm to visit this fine prospect of a cotton crop on the county's irrigated farms, at the present time would destroy the crop yield for this county. The last good rain to visit this county nearly three years ago brought a flood of water and a hail storm that destroyed 5,000 acres of fine growing cotton. The irrigated acres promises a cotton yield of

from one bale to two bales to the acre.

Marvin Graham going out of Stanton the other morning in his pickup wiping great beads of perspiration from his brow, remarked to this column, "look at the sacks of worm poison in the back end of the pickup. You'd sweat, too, if you had to pay for poison to spray over your cotton to kill the worms." He was on his way to his farm just west of Stanton to poison his cotton. Duster planes have been flying over the cotton fields in Martin County the past week.

The column drops a few lines here to inform members of the Locker Plant of the Cap Rock Refrigeration Cooperative, Inc., that their annual meeting is booked for this Friday at 4 p. m.

This Friday is the last day of the Foodhandlers' School. At this late date in the session of the five days of school, this notice may be of little importance, as it is supposed that all who intended to attend the School, is doing so, but it might call to the attention of an individual who expected to attend, but kept putting it off.

A story written by Vern Liles, a former Stanton girl whose parents, Mr. and Mrs. T. S. Liles still live here, appears elsewhere in this issue of The Stanton Reporter. She writes on the history of Libraries, and says at one point in her story that, "Libraries are older than the works of Socrates, or the printing press, or the invention of paper." She speaks of "one of the pioneer libraries is that of the British Museum, established in 1753. That library has the dubious distinction of having had its first

100,000 pounds of its financing raised by lottery."

Miss Liles is associated with the Texas State Library, and has written a story of Martin County that promises to be published in book form.

The first bale of cotton from the 1953 crop, was raised at Veribest, and brought to San Angelo Friday to be auctioned off. B. R. Weatherford claimed the distinction for raising it on his irrigated farm. The bale weighed 550 pounds and graded middling 29-32. The bale came from 1,800 pounds of lint cotton. Weatherford believes his 100 acres in cotton will yield half a bale to the acre.

News comes from L. J. Cappelman, state director of the Farmers Home Administration, that FHA is ready to make drought loans immediately.

This means distressed livestock raisers in all Texas can borrow money through FHA. Amounts higher than \$50,000 must be passed on by Agricultural Secretary Benson.

Farmers were reminded by Cappelman that loans from the separate crop disaster for a variety of purposes are still available.

Livestock loans are for three years at 5 per cent interest.

Applicants won't have to sign a "pauper's oath" to get loans.

Crop disaster loans are being made at a rate of more than a million dollars a month.

"Any farmer who has suffered a production loss and needs more credit than is available through his local bank or other lending agencies is eligible to apply for the FHA crop disaster loans," Cappelman said.

Now the father, Ed White, of Texas Agriculture Commissioner John White, gets himself sent about the country in an Associated Press story, announcing from his home in Wichita Falls, that we haven't seen nothing yet, talking about the drought. He asserts the farmers and ranchers are "fat as town dogs." He laughs at the comparisons of the agricultural situation now with that of the '30s. He says, "Why then, I hipped a load of ewes to Fort Worth and it cost me more than I got for them. I lost 25 cents on the deal."

White's two boys John, 8 and

First Financing Of English Library Raised By Lottery

By VERNEN LILES

Although the present generation takes libraries pretty much for granted, our forefathers had to manage generally without the benefits of a handy library.

Yet libraries, as an institution, are older than the Christian era, researchers at the Texas State Library in Austin point out. Libraries are older than the works of Socrates, or the printing press, or the invention of paper. For libraries existed at least as far back as the ancient cities of Egypt and Mesopotamia.

In the ruins of the Karnak Temple of Thebes, dating back to the eighth century B. C., has been found an inscription of a "House of Books." The "Keeper of the House of Books" was the original librarian, and for a long time that office was hereditary.

Texas today can be proud of her public library facilities for, despite the far-flung borders of the state—where frequently many miles intervene between homes—more than fifty per cent of Texas' 7,000,000 citizens have ready access to public libraries. Projected plans, already underway, call for that ratio to be greatly increased within the next decade.

The oldest American college library is that of Harvard, start-

ed in 1638 when it received 260 volumes from the estate of the Rev. John Harvard.

Harold 12, rode tractors from daylight to dark and helped milk by hand the family's 35 Jersey cows." He said that, despite the long hours of work, the family's income was \$2.50 per week. That was in the year 1931.

White is not a believer in running to the government for help. He says: "But right now we are all living high on the hog. And with our national debt at a dangerous high, this is no time to be running to the government for help."

If this column is not mistaken it was in the '30 when I knew a stockman who shipped a train of cattle to the Kansas City markets and the price he was offered on the train load wouldn't more than pay the freight. He had to pay the freight both ways to get the cattle back home.

its first 100,000 pounds of its financing raised by lottery.

TENNESSEE VISITORS Sunday night guests in the home of Mrs. Loie Lyerla, were Mr. and Mrs. W. L. Waters and daughter of Memphis, Tennessee.

VISITED PARENTS Mr. and Mrs. John Priddy, Jr., of Odessa, visited Thursday with his parents, Mr. and Mrs. John Priddy, Sr., at their ranch home south of Stanton in Glasscock County.

"ELECTRIC SERVICE is the **BIGGEST** BARGAIN IN YOUR HOME!"

... and especially right now ... when electricity is keeping you cool and comfortable in spite of hot weather ... when electric refrigerators and home freezers are keeping your foods fresh and wholesome. With air conditioners, fans and coolers running at full speed around the clock ... with refrigerators and freezers having more work to do ... and other electric appliances performing their daily duties at the same time ... you can realize what an everyday bargain electric service really is. It's truly the biggest bargain in your home.

WEST TEXAS PRESS COMMENTS

With its July 23rd issue, the Foard County News turned back the pages on 62 years of publication and opened a brand new page on its 63rd year. The News was established in 1891, and purchased by its present publisher, T. B. Klepper, in 1929. At the time the News reached its 63rd birthday, Mr. and Mrs. Klepper, were vacationing in California. In the same issue the News carried its birthday announcement, the county was visited by a general rain, and Crowell received 1.5 inches.

The fading days in July seemed to be red letter ones for Stamford. The American reported that in one day the city was visited with upwards of seven inches of rainfall. The new Stamford lake which had been dry as a bone, had an estimated 4,033,000,000 gallons of water in it. It is hoped that the laying of the pipe line from the new lake to Stamford, will be completed, and the filter plant installed by August 15.

In that section of Hockley County around Anton, had showers of rain every day for five days last week, measuring a total of 1.65 inches. They came as a relief to the irrigation farmers, as they could shut down their wells while the good old rain water provided the moisture.

Since some good rains have fallen in the Hamlin sector of Jones County, the city of Hamlin is receiving water from its South Lake, one of the city's former sources of water supply. Hamlin has been depending on their water supply the past 13 months being hauled in by rail in tank cars from Rule. The water rate to consumers has been lowered from \$6 per 1000 gallons to \$2.50 minimum for 2,000 gallons and 75c per 1,000 thereafter.

Up in Knox County, where two weeks ago it was so hot and dry that the land terrapins were go-around with their mouths open and pantin, and their tongues hanging out. The Munday Times said in its last week's issue: "For the week 6.18 inches of rain had fallen. Puddle holes are full, stock tanks are full, the city lake is full. Water almost got into some of our buildings; and one farmer was heard to remark, 'it could rain too much.'"

The West Texas newspaper exchanges published in the sections northeast of Martin County, came to this desk beaming over with joy. All the areas had big rains to fall. One exchange, The Matador Tribune, said: "Dry parched soils of Motley County fields and ranches are soaking under an abundance of water. In five days more rainfall was registered than in the past ten months, while the creeks and the draws ran bank full." And at Alpine, the Avalanche reported 1.75 inches of rain fell there.

Over at Baird the Star announced, the total rainfall over the week was 3.5 inches; and even up in my friend, E. C. Wade's home community, Jayton, he said in his Jayton Chronicle, that Kent County, through three days last week, received 5.50 inches of rain. At Memphis, in Hall County, the Democrat reported the week witnessed a rainfall of two and three inches.

Farmers were planting large amount of grain sorghum, and yet the headline over an editorial in the Democrat read, "More Water Needed."

At Post, Garza County, Publisher Eddie Warren, captioned a news story on the front page of his Dispatch: "Feed Planting Under Way On Large Scale Following Rains." The July rainfall in Post totaled 3.30 inches.

This item of news appearing last week in the Mitchell County News, is encouraging: "The way it looks now, gins will be humming in Loraine again this fall." The growing of cotton in the Loraine area is on dry land farms, so the information let out by the News leads one to believe the section has been visited of late by good rains.

From The Echo, the Texas State Prison's newspaper, published by the inmates of the prison system at Huntsville, reported in its monthly publication for July, that The Texas Prison System is entering the cattle business. The prison has been raising beef to provide meat for the inmates, but this year the system is starting in the cattle business as an investment proposition. The prison board has ordered the purchase of 1,500 head of cattle. A board member said: "We have the grass and the feed and cattle are cheap. The system's pastures can well carry an additional 1,500 head of cattle."

From the office of Governor Shivers at Austin, went an announcement addressed: "To All Inmates and Parolees" of the State Prison System, in which it said, "more than a third as many persons came back to the penitentiary as violators each month as are released on conditional pardons." Referring to this state of affairs, The Echo, prison newspaper, said, editorially: "Those of us who return here for violation of clemency are those by whom those to come after are judged. The fellows who are making good don't make the newspaper headlines... the violators do!"

Up in Hockley County it is reported by the Anton News, is being raided by rats. The county sponsoring a program of typhus control. The rat carries fleas and lice, germs that contact the people and give them dengue fever, a disease that lays low the victim, and it requires a long time to get rid of it.

In one and one-half hours up in Foard County, one day last week, rain fell to the amount of 4.55 inches, according to the Foard County News at Crowell. Water ran into some of the stores. The precipitation recorded was the largest for the community in over 20 years.

Since the rains of the past week falling in Kent County, the Jayton Chronicle spoke up in its issue of last week and said: "We expect that, since the rains, the farmers of this area have put in about the most intensive two weeks' work they have had to do in three years—planting and cultivating ever acre of ground."

"Although we feel older than our age at times, we still can't hold much appreciation for those

New Vehicle Law To Go Into Effect September 15th

The new period, during which Texas motorists will be required to have their auto inspected under the new modified Motor Vehicle Inspection law which was enacted by the recent 53rd Legislature, has been officially set for September 15, 1953, through April 15, 1954, it was announced today by Col. Homer Garrison, Jr., Director of the Texas Department of Public Safety.

Garrison said that the State Public Safety Commission has advised him that they will confirm the designation of the new period on August 26, the effective date of the new act.

The old law which aroused much controversial argument during the last session of the Legislature will expire at midnight August 25 and no inspections will be made under its provisions after that date.

Garrison explained that this means that no inspections of any sort will be made between that time and the beginning of the new period on September 15th.

The modified law calls for inspection only of brakes, lighting equipment, horns, rear view mirrors and windshield wipers.

"In view of the fact that the state are already set up and equipped to perform this work," Garrison said, "we feel that the full seven months of the new period will afford motorists ample time to have their vehicles inspected."

He urged, however, that car owners not wait too long lest they get caught in a last minute rush to meet the inspection deadline.

HOLIDAY VISITORS

Mr. and Mrs. Ladd Laws and daughter, Rita Ann, of Holliday, visited recently with relatives in Stanton.

who refer to us as an old man," says Editor Edgar in his Munday Times.

Boy, you'd better get used to the "name calling." You'll be there soon enough. But wait! What do you call old? They say you are as old as you feel, and this column feels as young as a spring chicken, and doesn't mind being called old.

Rains last week in Knox County filled all the lakes. The lake at Monday has been restocked with 1,000 channel cat fish and 1,500 bass by the State Game and Fish Commission.

White Motor Co.

201 E. St. Anna — Phone 18 SALES AND SERVICE STANTON, TEXAS

PRICE the "low-priced" cars, add a few dollars more, and there you are.

Because that's all the money it takes to buy this great new 1953 Buick SPECIAL.

That's all it takes to boss its high-compression Fireball 8 Engine—now stepped up to the highest horsepower in Buick SPECIAL history.

That's all it takes to enjoy its still finer Million Dollar Ride—its full six-passenger roominess—its light-as-a-flyrod handling ease.

But if you're surprised at this news, we can't blame you a bit.

Most people are—when they learn that you can get Buick styling, Buick structure, Buick room and power and comfort and steadiness, all for just a few dollars more than the cost of the so-called "low-priced three."

Add another happy surprise. In this Buick you get a long list of "extras"

at no extra cost—things like direction signals, dual map lights, twin sunshades, lighter, trip-mileage indicator, automatic glove-box light, oil-bath air cleaner, full-flow oil filter, bumper guards front and rear—things most other cars of similar price charge as extras.

So there you are—definitely able to move right into this big, broad, robust-powered Buick for a price you'd expect to pay for a lesser car.

Why not drop in on us to see and drive this honey of a buy? The rest we'll leave up to you.

Move right in for less than you think

Come in and ask us about the low delivered price on this new **1953 Buick SPECIAL** 2-Door 6-Passenger Sedan

New Dial Telephone, Friday

Just in case you've forgotten about it at this time of the week, and to give you a few hours advance notice to study over just what you are expected to do when you want to telephone somebody, The Reporter, is informing all readers of the paper who have a v e telephones, that this Friday, at 12 o'clock noon, the old style of telephoning central for a number, will be dethroned from the position it has occupied in Stanton ever since it has had telephone service, and the new dial system will go into action. Brother, you tell me, the confusion that will take place when the telephone customer goes to handle the "gear", (that whirling, called the dial), to get the number he wants.

The rules how to handle the call is printed in the new telephone directories that were distributed last week to the places of business and the homes in Stanton. But that fact will not relieve the slight attack of nervousness that is sure to strike the guy who makes his first try at dialing his number.

Printed on the inside of the cover page of the directory are the rules governing Emergency and Service Calls, such as fire, police, sheriff, telephone repairs and "How To Use Your Dial Telephone." Anyway, you will be hooked-up to the new dial system of telephoning after noon Friday, and it will be up to you from here on out as to how well you handle the "gear" correctly to get your number over the telephone.

A Champion Steer Roper In His Day

In a recent issue of the San Angelo Standard-Times an editorial appeared, reviewing the record of the old time champion cowboy steer ropers in West Texas and New Mexico, naming among the champs, Clay McGonnagill, well-known among the early day cowmen and cowboys of Martin County. But one world champion steer roper the Standard-Times failed to mention, was that of the late Ellison Carroll of Big Lake, who won the world's championship crown away from Clay McGonnagill.

In the early days of Greer County, then attached to Texas, later to be annexed to Southwestern Oklahoma by the United States Ellison Carroll was manager of a large ranch in Greer County, and a very familiar figure on the roping grounds of the Cowboys' Reunions, held at various points in Southwestern Oklahoma, the Panhandle of Texas, and Eastern New Mexico regions.

The reunion event was held on grounds near one of the frontier towns, out in the wide-open spaces, with a few hard wooden benches along the sideline provided mostly for the women folk and the elderly people to sit on—no shade—out in the open sun—some under the shade of parasols and umbrellas—others sitting in wagons and buggies with the sun beaming down in all its blazing glory. The event was held in the month of August.

In Ellison Carroll's championship steer roping days, the cowboys, ranchers, and guests, came from many miles around to the Cowboys' Reunion, on horseback with packhorse, in buggies and wagons, to form a crowd of some 2,000 to 3,000 people for the three-day event. The entrants in the cowboys' contests—roping and the riding of wild broncs—loosened their six-shooter belts with their round of cartridges and the scabbard, hung to it, the gat, from around their waists and laid them in the back end of wagons and buggies, or piled them on the ground under the yellow-colored Fish Brand slicker, to remain until the rodeo activities for the day closed down.

The steers to rope, were of the large red-colored, or roan, heavy built, from grazing on lucious mesquite grass—wild and as ill-tempered as the "wild and woolly west" from roaming the open range for miles and miles, far out of sight of civilization, could make them in those frontier days.

The boy who tied the steer after downed by the roper, kept his horse at his fingertips to mount as soon as the steer was loosened from his bondage, as he, (the steer) came up raging mad to take his temper out on any cowboy who happened to be off his horse on the ground nearby.

The roping horses used in those days were not of the cayuse type. They were of the large, rangy type, weigh from 1,000 to 1,200 pounds, solid copper-bottom built. They had to be to cope with holding the steer when he reached the end of the rope dropped over his horns or neck by the roper, to pull the rope taut to hold the steer while the roper threw him down and hold him down during the time the roper had to tie-down the s t e e r. A n d t h a t flipping a steer over on his back to tie him if he failed to be landed on his back when the noose fell over his head and the stopping abruptly of the horse when roped, required the strength of pretty much of a man, and my recollection of Ellison Carroll's weight at that time stood at 240 or 250 pounds—all man, and his horse was Palo Pinto colored, with long cream-colored mane and tail, and would weigh 1200 pounds or over.

While Ellison Carroll was a rancher in Greer County, Oklahoma, he called Big Lake, Reagan County, Texas, his home.

Following the annexation of Greer to Oklahoma by the United States, the arrival of settlers to take up claims, moved the ranching interests out of the county, and Carroll moved back to Big Lake. He served Reagan County as sheriff, and also engaged in the cattle commission business.

And it was in Big Lake in recent years, that Ellison Carroll died, removing from the history pages a colorful figure of the pioneer days of the cowboys who "rode herd" for the cattle barons of Southwestern Oklahoma the Panhandle of Texas, and Eastern New Mexico, and a World Champion steer roper.

It's this kind of courage and determination that brings success in the end to the farmer, the businessman, in fact to all of us. A farmer and his wife living in the drought section of the San Angelo country, the wife, has been applying the money she earned baby sitting to make the latest mortgage payment on their farm that hasn't produced a crop in three years. The "stick-to-it-tiveness" and determination to hang on to her prized possession—her home, displayed by this farmer's wife, is certain to bring success to the couple. And Martin County has farm families who have suffered through three years of drought that have not lost their courage and determination. They may be forced to leave their farms to seek employment to carry them on until better conditions show up on their farms, but they have not for one moment lost faith in the country. They know it has always rained and that the county will produce bountiful crops on the farms and profuse grass on the ranges, and that the time will not be long off when they will experience that condition.

Bible Comment:

Apostles Received Thorough Training At Master's School

JESUS was a great teacher, though He conducted no school in the ordinary sense of that word.

A famous adage described the ideal college as a log with Mark Hopkins, eminent college president, at one end and a student at the other. That conception stresses the necessary quality of all true education, that knowledge must become personalized.

The school of Jesus had that basic quality. It was mostly a school in the out-of-doors, a school of companionship and personal contacts, a school in which the Teacher taught by constant example, and in which He encouraged every success in emulating that example. It was a school, too, in which the Teacher had infinite patience, as every true teacher must have.

The school of Jesus was like some of the schools of today in which knowledge and guidance are combined with experience and practice. Jesus sent the disciples in His school out into the villages, two by two, to practice what they had learned and to proclaim what they had heard.

When one considers how, even toward the end of His ministry, some of the Twelve were quarreling, one wonders just what the missionaries of the new-found Messiah taught the villagers. But they at least had some success, for they returned to Jesus with enthusiasm and wonderment at what they had been able to achieve.

A good school is judged by its results and its product. What a school, then, was that of Jesus, in which humble men became Apostles and spiritual world conquerors!

Philosopher Could Put Meat Tenderizer To Other Uses

Editor's note: The Martin County Philosopher on his Johnson grass farm on Mustang Draw probably is assuming too much power for the latest evidence of scientific progress.

Dear editor: You can't always tell how far ahead of his times a man is just by looking at him.

Take me out here on this grown-up-in-woods-and-Johnson-grass place. You'd think that by looking around I was at least twenty-five years behind the times, but there is nothing to it. I may be twenty-five years behind in my work, that's true, but I do not intend to stay that way; a year from now I'll be twenty-six years behind, the year after that, twenty-seven. I believe in progress. It's people who stand still that hold this country back.

Yet you can't always judge by appearances. Take my cattle. Lots of people have poked fun at my cows, on account of they look sorry, and up to now maybe they have been sort of sorry, and I'll admit I haven't seen any cafes with menus advertising West Texas Jersey Steer T-Bone Steaks, but I read last night where a couple of men have invented a process for tenderizing meat, and under this new system it may be hard to tell a Jersey steer steak from a Kansas City four-dollar number. Under this process, as I understand it, all you do is sprinkle the meat with this atomic dust or whatever it is and a stringy roast, the kind a dog would tire out his jaw muscles on tryin to handle, becomes as tender as the right side of a high-priced T-bone.

Of course, my production-per-animal out here may not be so great as it is with these registered cows, the per-pounds-per-acre of pasture may not be so big, the growth-per-day may not be so fast, but in the final analysis when I sit down to a steak it ain't much concern of mine how long it took the thing to reach my plate or how many miles the calf had to walk to find enough grass to grow up on. Just give me elbow room and keep the salt, pepper and the bottle of tenderizer handy, is all I ask.

However, I ain't too hopeful yet. Some bird is liable to throw a monkey wrench in the thing somewhere, or cows are liable to catch on and develop an immunity to the tenderizer, but I don't intend to change my whole cattle program out here until the thing has been tested out fully, which will take years.

I hope it works, and if it does there may be other fields of endeavor where it might be applied. For example, there are times when a little tenderizer, sprinkled on a banker, would be just the thing to help swing a loan. There

ties in keeping the roadside clean."

C. F. GREY, AN OLD RESIDENT of Stanton, and who was one of the persons here to take a leading part in laying the groundwork to bring to Martin and Howard Counties, the Rural Electrification Administration (REA), signed and issued notices last week, announcing the annual meeting of the Cap Rock Refrigeration Cooperative, Inc., at 4 p. m., August 7. Gray, is secretary of the board of directors of CRFC, and has been since its organization.

From the time the first membership blank was signed for establishing REA September 11, 1939, for Martin-Howard Counties, Gray has been an active member of the board of directors of the Cap Rock Electric Cooperative, Inc. and through his untiring efforts put forth into the bringing of REA to the county, the headquarters office was located in Stanton, with the addition of the Cap Rock Refrigeration Cooperative.

THE COLUMN HAS BEEN reading much the past week excerpts from editorials in newspapers about the blanket of moisture that has been hanging over Texas, and extending from Fort Worth to over West Texas. Frank Grimes, editor of the Abilene Reporter-News charges in his editorial comment that the Fort Worth weatherman announced that the great blanket of moisture floating over Texas is responsible for the rain showers that have fallen over the various parts of the state. The weatherman claims, according to Grimes, that the moist air cloud is 20,000 feet thick. For the good the moisture blanket has done in bringing rain to Martin County, the moist cloud just as well have been 20,000 miles away. It didn't produce nary a drop of rain here.

A news item reports that a four-year-old boy who had not spoken before, started his parents by suddenly remarking: "This is a heck of a world!" Instead of talking, that kid had been thinking!

If it would be of any help to rest the larynx of the radio announcer, he has my permission

to skip announcing periodically all day and night that the weather will be "clear with widely scattered showers in the South Plains and Pecos Valley."

I still stay with the Indian's sign when it's going to rain: "When it's raining down the middle."

NINETY-TWO YEARS OLD. IN 1889 he was pronounced dead while in a 23-day coma. Got up from his "death bed," moved to California. Entered the real estate business. Now at 92 years old he owns a food supplementary factory, drives his own plane, rides his own motorcycle, and is an honorary member of the police force. That's the record of a man who didn't think the world owed him a living—he went out and made his own living. I think he did a good job of it!

IT'S NOT THE PRO AND CON discussion that is taking place over the signing of the Korean truce pact with Communist China, that counts. It's the fact that the lives of the hundreds of American soldiers have been saved, stopped the wounding of many more, and the missing of others, that counts at the particular moment in the homes of families of the United States and

their Allies. The period of anxiety, and the suspicion we have as to whether or not the signing of the truce pact is not a trick the Communists intend to pull from their sleeve when they consider the time is ripe, is one that carries a potent charge of suffering by the populace.

It is estimated that Texas alone, has had 1,087 boys to die, 4,646 wounded, and scores still missing in the Korean war.

NORTHWEST TEXAS COUNTIES have been plessed with good rains during the month of July. Some of the counties have reported as much as 5 and 7 inches of rain falling in one day. Only one of the counties report the rain general over the county—that was Baylor, Seymour, the county seat. Tanks on ranches were full of water, green grass and weeds starting to grow. Lakes that had provided towns with their water supply but dried up during the drought are full to the degree they furnish their citizens and stop the shipment into the towns of train-long tank cars filled with water.

The American tourist was looking down into the famous Greek volcano. Finally, he commented: "It sure looks like hell."

"Oh," retorted his guide, "you Americans—you've been everywhere."

A case in point is Hamlin, in Jones County, where during the time its water lake was dry from the drought, and had to depend upon train of water tanks to bring in their supply, rains have fallen to fill their water lake. Hamlin has stopped shipment of water from Rule, and using the water from its lake.

Baylor County reported so much rain in July, ranging from 5 to 10 inches, the farmers are praying for "dry weather!" The county agent of Haskell County reported the rainfall in the month of July amounted to as much as received during the year of 1952, and the best crop prospects since 1950.

MOST ALL OF US THINK THE better than three years drought we have had visited upon us, is the worst that has ever happened. Here comes a farmer that went through a drought. Compare his feeling toward his dry spell with yours of today. He nailed a notice on the door of his farm home as he was leaving with his family, which read:

Six miles to hell
God bless our home
Gone to live with the wife's folks.

MAYBE YOU CAN TELL US— WHERE DOES HE FIND TIME TO WORK?

R. S. Brashears, head of the advertising department of the Midland Reporter-Telegram, spoke before the Texas Press Association, at its 74th annual convention held in June at Mineral Wells. His topic was "How To Keep 'Em, and Keep 'Em Happy," meaning of course, the employees in his department. The writer will not go into any detailed account of the address made by Mr. Brashears—it was a good one, but what struck the writer's fancy he found in the closing sentence of his speech. Brashears said:

"Add to these things the admission before employees that no one makes mistakes but the boss; attend all office personnel weddings and wakes; kiss the new babies, pat the kiddies and compliment the mothers; always insist on pie with the coffee and pick up the check; suggest that employees leave a couple

ple of days early on the vacation trip; keep plenty of cigars and cigarettes around, just in case someone runs out; drop nickles in the meters whenever you are out with an employee; keep telling the girls in the office how young and lovely you look... and you may have some idea of what we at The Reporter-Telegram do to try to keep 'em, keep 'em happy, and keep 'em working." The writer is puzzled to know if it requires all this to

keep 'em happy and working, where does Brashears find time to work?

Mr. and Mrs. Bill H. Cox of Pampa, are visiting relatives in Stanton.

HELPING BUILD WEST TEXAS SINCE 1927

This demonstration showed me the way to a better deal!

I'd been planning to buy a higher-priced car until I found out all Chevrolet offered—and how much I could save!

You're "sitting pretty" behind the wheel

Take this Bel Air model. First thing you'll notice is the quality of the interior. Rich-looking appointments. Roomy seats with foam rubber cushions. Turn the key to start the engine and you're ready to go.

You can see all around You look out and down through a wide, curved, one-

piece windshield. The panoramic rear window and big side windows provide a clear view in all directions.

Bigger brakes for smoother, easier stops

An easy nudge on the pedal brings smooth, positive response—right now! Chevrolet's improved brakes are the largest in the low-price field.

It's heavier for better roadability

You're in for a pleasant surprise at the smooth, steady, big-car ride of this new Chevrolet. One reason is that, model for model, Chevrolet will weigh up to 200 pounds more than the other low-priced cars.

You get greater getaway with the new Powerglide*

A lot finer performance on a lot less gas. That's what you get with the new Powerglide automatic transmission. There's no more advanced automatic transmission at any price.

You get more power on less gas

That's because Chevrolet's two great valve-in-head engines are high-compression engines. In Powerglide* models, you get the most powerful engine in Chevrolet's field—the new 115-h.p. "Blue-Flame." Gearshift models offer the advanced 108-h.p. "Thrifty-King" engine.

And it's the lowest-priced line

A demonstration will show you that Chevrolet offers just about everything you could want. Yet it's the lowest-priced line in the low-price field.

*Combination of Powerglide automatic transmission and 115-h.p. "Blue-Flame" engine optional on "Two-Ten" and Bel Air models at extra cost.

Let us demonstrate all the advantages of buying a Chevrolet now!

MORE PEOPLE BUY CHEVROLETS THAN ANY OTHER CAR!

MISS MARILYNN McNATT BECOMES BRIDE OF WILLIAM ALLEN WHEELER

MRS. WILLIAM ALLEN WHEELER

Miss Marilyn McNatt, daughter of Mr. and Mrs. J. Reid McNatt of Wylie, became the bride of William Allen Wheeler of Stanton Friday night in a ceremony performed at the home of the bride's aunt, Mr. and Mrs. H. M. Bradford, Jr., 1232 N. Selva Dr. Dallas.

Rev. E. E. Kifer, pastor of the First Methodist Church in Wylie, officiated at the 8 o'clock rites.

Mr. and Mrs. S. W. Wheeler of Stanton are parents of the groom.

The bride, given in marriage by her father, wore a gown fashioned in frosty white chantilly-type lace. Life size lace flowers, beaded in the center, bordered the deep neckline, barely should-

er high. A misty yoke of tulle reached to the throat. The long sleeves petal-pointed over each wrist. Great gathers of lace formed the skirt over satin and tulle, worn over an old-fashioned petticoat which is a family heirloom. A crescent of matching lace formed a cap, releasing a finger tip veil of illusion.

Her flowers were a white cascade bouquet with orchids and stephanotis in lace streamers.

The bride's only attendant was her sister, Miss Thelie Ann McNatt, of Wylie.

Mr. Wheeler attended his son as best man, and music was presented by Truett Smith, vocalist, and Freddie Christopher, pianist, both of Wylie.

A reception was held at the Bradford home immediately following the ceremony. Members of the house party included Miss Jane White of Sparkman, Ark., Miss Geanne Glover of Pine Bluff, Ark., Mrs. Jimmy R. Davis, Dallas, Miss Ann Landrum, Fort Worth, and Miss Sue Lovett of Denton.

Candlelighters were Harold Harris of Pittsburgh, and Jake Moore of Fort Worth.

The bride graduated from Sunset High School in Dallas, and attended North Texas State College in Denton, where she was a member of Zeta Tau Alpha Sorority. Mr. Wheeler attended Howard County Junior College, and was graduated from North Texas State College where he was a member of the Trojans.

After a wedding trip to West Texas and New Mexico, the couple will be at home in Odessa, where Mr. Wheeler is awaiting orders for Officers Training School in the U. S. Marines in Quantico, Va.

BILLY RAY McMORRIES RECEIVES PROFESSIONAL LICENSE ENGINEERING

Billy Ray McMories, wife and baby, visited over the week-end with his mother, Mrs. Nellie McMories, postmistress at Tarzan.

M. McMories has received his professional license in engineering and is now employed at the Randle Engineering Co. in Amarillo. Before going to Amarillo he was connected with the Hassie and Green Engineering Co. in Lubbock for two years.

He was graduated from Courtney High School and received his B. S. and Master degrees in engineering from the University of Oklahoma. He is a brother to Judge James McMories of Stanton; and Melton and W. E. McMories of Tarzan.

RETURN FROM ATTENDING POST OAK HOMECOMING

Mr. and Mrs. G. Tunnell, have returned from attending the Post Oak Homecoming, held at the Post Oak school house, near Junction City.

The place of assembly of the oldtimers, some ranging past the 80 year old mark, brought back old memories when small lads, they attended school right in that very school house.

Tunnell, while not having the honor of being identified among the oldest of the old-timers present, yet he was eligible to have his picture among the many pioneer Post Oak residents who attended the Homecoming.

He attended school when a lad at Post Oak.

Mr. and Mrs. Tunnell report a wonderful time was enjoyed by them.

COACH ROBERTSON ATTENDS ANNUAL COACHING SCHOOL

Stanton High School Coach Melvin Robertson, accompanied by Mrs. Robertson, left early this week to attend the annual Texas State High School Coaches Association Meeting and Coaching School convening in Houston August 3-9.

Robertson said he expected to hear a lecture on the Split T formation which will be given by Johnnie Vaught of the University of Mississippi, as well as a lecture on the Single Wing by Dallas Ward of the University of Colorado.

He said that an attendance of more than 2000 coaches from Texas and surrounding states was expected.

Miss Hamilton To Serve As Song Director At 4-H Camp

Mary Lynn Hamilton, daughter of Mr. and Mrs. Clark Hamilton, has been selected to serve as song director for the 1953 State 4-H Conservation Camp being held in Tyler this week.

Mary Lynn was one of six 4-H girls in the state selected in June to attend the Junior Leaders' Recreation training school at College Station. As a result of her training and her contribution to the 4-H Round-up program, the State Recreation Specialist, Miss Lucille Moore, recommended Mary Lynn as song director for the State Camp. Her job will include helping with the music throughout the Camp program and direct songs and help other 4-H members to direct songs.

She will direct the singing at the daily camp meeting in the morning and at the evening programs. The camp will close Friday morning with a farewell singing session.

Barbara Puckett Is Party Honoree On Tenth Birthday

Mrs. Alveta Puckett entertained with a party Friday afternoon at the City Park honoring her daughter, Barbara, on her tenth birthday.

A series of games entertained the guests and pictures were made of the group.

Refreshments of punch and birthday cake were served. Thirty-four guests attended.

443 Persons Avail Themselves Of Chest X-Ray Service

443 were given free chest X-rays Friday when the Texas State Health Department set up the X-ray apparatus at Rogers Electric offices here. Mrs. Leo Turner, city-county health sanitarian, said the number was even larger than she had expected and expressed thanks to every person availing themselves of the service.

"I was especially impressed with the large number of persons holding health certificates who had the X-rays made," Mrs. Turner said. "This indicates that our food handlers are anxious to co-operate with our efforts to protect the health of the public."

Mrs. Turner said that the X-ray service, extended to all persons over 15 years of age, attracted a large number of community's colored population.

Assisting Mrs. Turner and State Health Department X-ray technicians Kathleen McElroy, were Mrs. Glenn Brown, Mrs. R. K. Rogers, Mrs. Euell Winslow, Mrs. Harold Nix, Mrs. Jim Tom, Mrs. P. M. Bristow, Mrs. Morgar Hall and Mrs. Jewel Reed.

"We are deeply indebted to Rogers Electric for the use of their office," Mrs. Turner said, "as well as to all others who assisted and made the day an enjoyable occasion for all workers."

ATTEND WEDDING OF SON AT GEORGE WEST

Mr. and Mrs. S. E. Cross, accompanied by their daughter, Mrs. Earl Creech and granddaughter, Becky Creech, all of Stanton, and their niece, Helen Schauer of Chicago, Illinois, have returned from George West where they attended the wedding of their son, Taylor Cross and Miss Ruby Jean Ginn.

The wedding took place July 25 at the home of the bride's parents, and the couple will make their home in Midland, where both are employed.

They also visited Mrs. Cross' brother, Frank Davis, former Stantonite, in Rockport and stopped in San Antonio to visit Brackenridge Park.

TO VISIT CHILDREN AT CAMP

Mr. and Mrs. Gordon Stone, Mr. and Mrs. Phil Berry and Mrs. S. W. Wheeler, will leave Saturday morning to visit their children, Carolyn and Gordon Stone, Betty Berry and Jimmie Wheeler, who are attending Summer Camp near Kerrville.

ATTENDS REUNIONS

E. M. Massey has returned home after attending a reunion of the Henselee family at Fall Creek Saturday. He also attended the Hood County reunion, held at Grandbury, on Sunday.

VISITED IN MONAHANS

VACATIONING IN MISSOURI

Mr. and Mrs. Harold Ervin and daughter, Deborah Kay, are vacationing in Missouri.

THE STANTON REPORTER, THURSDAY, AUGUST 6, 1953

Fathers Face Draft Call Under New Regulations

State Selective Service headquarters received official regulations last week which will enable Texas local boards to draft fathers on August 25 and thereafter.

This change in regulations is authorized by the recent executive order of President Eisenhower on the subject, Brigadier General Paul L. Wakefield, state Selective Service director, said.

Only two paragraphs of dependency regulations have been revised, General Wakefield said. He quoted Section 1622.30 (a) of the Selective Service Regulations as follows:

"In Class 3-A shall be placed any registrant who prior to August 25, 1953, has submitted evidence to the local board which establishes to the satisfaction of the local board that he has a child or children with whom he maintains a bona fide family relationship in their home. Such a registrant shall remain eligible for Class 3-A so long as he maintains a bona fide family relationship with such child or children in their home."

General Wakefield stressed that any draft-age man who has a child or children before August 25, 1953, does not notify or submit evidence to the local board before that date, he is and will remain eligible for draft.

The state director of Selective Service quoted the remaining pertinent paragraph applicable to the change in regulations:

"No registrant shall be placed in Class 3-A under paragraph (a) of this section because he has a child which is not yet born unless prior to August 25, 1953, and prior to the time the local board mails him an order to report for induction which is not subsequently cancelled for a reason not related to the filing of the certificate hereinafter mentioned, there is filed with the local board the certificate of a licensed physician stating that the child has been conceived, the

Complaints Made Of 'Hysterical Crackdown' Drives On Motorists

From time to time, traffic enforcement officials bestir themselves to sporadic enforcement "drives." At the present time, there is much talk and some evidence of special "crackdown" campaigns, with motorists arrested in wholesale numbers and haled into already overcrowded courts.

The net results of such activity is a lot of public fanfare and whoop-te-do but with no real or lasting improvement in the safety record.

If there's one thing we've learned in a little more than a half-century of motoring, it is that enforcement, to be effective, must be a continuing activity. It should be a day in and day out effort aimed at getting the worse violators off the road for keeps, while maintaining a cooperative attitude on the part of the great majority of law-abiding motorists and keeping them constantly alert as to their responsibilities.

probable date of its delivery, and evidence upon which his positive diagnosis of pregnancy is based."

"This means that any draft-age man who does not report pregnancy of his wife until August 25 or thereafter will be subject to draft," General Wakefield commented.

Texas local boards received copies of this change in regulations at the same time state headquarters did.

General Wakefield saw two effects produced by the new regulation:

1. Draft boards could now defer men for other reasons without fear of their marrying and having children and thus avoiding induction.
2. The number of men under 20 years old being inducted would be reduced to some extent.
