THE LIONS CARNIVAL
The carnival committee reported that the club had made about \$900 off the carnival which was in town a few weeks ago. This was considered a pretty good project for the club to make for charitable purposes.

The program was given by our city manager, Mr. Mathis. He said that the revenue sharing fund had helped the city to buy permanent improvements that would have been a little difficult to purchase by some other means. A used pickup and a fire truck were mentioned as two things the city had spent money on this year. He urged the people to talk to their councilmen to express any desires they might have toward improvements in the city.

THE WEATHER

For the most part one could describe the weather as a pretty good example of Indian Summer. We have days almost warm enough to turn the air conditioners on and nights almost cool enough to turn the heat on. There has been little or no precipitation this week and not too much wind.

Veterans' Day

The atrocities American prisoners of war suffered at the hands of the North Vietnamese sound like something out of a horror film — not actions one would expect from fellow human beings. But it did happen and, as in wars past, our soldiers performed admirably under the circumstances. With the POW's return fresh in our minds, along with the memory of others who fought and died, throughout our national history, that we might live, it is right we should make Veterans' Day, October 22, a tribute to their sacrifice.

Veterans' Day is a time to let patriotism shine through. Because men and women were willing to meet their country's call, the United States has been able to grow and send its message of freedom across the world. One day out of 365 is not nearly enough to express our gratitude to the "American doughboy" for his efforts to preserve the liberty and Constitutional rights we enjoy today — but it's a start.

Rites Held Today For Mrs. Sanchez

Funeral services were held in Midland at 2 p.m. Tuesday at Our Lady of Guadalupe Catholic Church for Mrs. Clara May Sanchez, who died Friday in a Midland hospital at the age of 64.

The Rev. Ronald Marlow officiated at the rites and interment was in Fairview Cemetery under direction of Thomas Funeral Home.

Survivors include her husband, a daughter, a stepdaughter, two brothers and two sisters.

Andres Ramirez Dies; Rites Slated

Andres Sanches Ramirez, 36, died here Tuesday. He had been ill for several years.

Services are scheduled for 4 p.m. Thursday in Our Lady of Guadalupe Church. Interment will follow in Fairview Cemetery, under the direction of Thomas Funeral Home.

Ramirez, a lifelong resident of Midland, served in the U.S. Navy from August, 1956 until July, 1960.

Survivors include a son, Andy Ramirez of California. (See RAMIREZ, Page 8)

Wanda Bryan Wins Naming

FIRST PRIZE. Wanda Bryan receives \$25.00 check from Chamber President, Ed Lawson with Mr. Joe LaBay looking on.

AT THE BEAUTY SHOP. Billy Reagor and Sammy Yates do some last minute preening of an entry in the Dallas Stock Show.

New Auto Parts Store Opens

NEW BUSINESS. Friday Stanton witnessed the opening of a new auto parts and machine shop in town.

AND THE BAND PLAYED ON. The High School band under the direction of Mr. Walker does a few numbers at the open house Friday before the game with Reagan

Friday afternoon saw the opening of a new auto store in Stanton. The occasion was celebrated by letting the public see behind the scenes at the new establishment and a chance to meet the staff and management. Sandwiches and cokes were served to the visitors in attendance. They had pens, memo pads, and just about everything but free auto parts to give away to the visitors.

Some of the people present were: Mr. Walker, the owner of the Big Spring based firm along with Ethyl Trotter, the general manager. Also present from Big Spring were 2 members of the news media there. Later in the evening the Buff band played in front of the business while spectators enjoyed the music. Walker Auto Parts and Machine Shop has been in Big Spring many years and recently decided to establish a branch office in Stanton.

Even if you did not win a prize at the drawings held during the open house, you can still visit them any time for one of the most complete stocks of parts and accessories in the area.

COUNTY TAX ROLL READY

County Tax Assessor - Collector Dan Saunders advised the Stanton Reporter that the latest tax roll in the county's history was received Friday and he and his tax deputies worked over the weekend to have it ready to start collecting Monday morning. Saun-

The people of Stanton have been involved in a contest to find a name for the new nursing home that is rapidly taking shape in Stanton. The Chamber of Commerce has received quite a number of suggestions from people of the area, but the one that won was submitted by Wanda Bryan of Stanton. The winning name selected was "STANTON VIEW MANOR."

Attending the ceremony were several people from Stanton and representatives of the nursing home management. Mr. Joe LaBay, president of Christian Care, Inc., John Eck, Jr., vice president, and John Placick, the architect.

Some of the members of the Industrial Foundation attending the ceremonies were Ed Lawson, Don Tollison, Jesse Burns, Chuck Elmore and George Shellbourne. Also attending were Mr. and Mrs. Martin Gibson.

Mrs. Bryan is the wife of Bob Bryan who works at Cap Rock Electric. Their children are Jimmy, Eddie and Cris.

Mrs. Bryan said that she wondered if she should enter the contest and finally decided to do so. As the winner (See NAMING, Page 8)

Gilbert Sanchez Receives B.A.

Gilbert Sanchez

Gilbert Sanchez, a former Stantonite, received a Bachelor of Arts degree in art from Sul Ross State University in 1968. He was a 1964 graduate of Stanton High School.

Sanchez is the son of Mr. & Mrs. Inez Sanchez, Stanton. He is presently teaching elementary art & science at Crystal City.

Letters of commendation honoring them for their high performance on the 1972 Preliminary Scholastic Aptitude Test/National Merit Scholarship Qualifying Test (PSAT/NMSQT) have been awarded to a student at Stanton High School, Principal Wayne Mitchell has announced.

The commended student is Franklin Dale Henson, son of Mr. and Mrs. Homer Ellis Henson.

The National Merit Scholarship Corporation (NMSC) has named 38,000 commended students throughout the United States. These students are among the upper 2 percent of those who are expected to graduate from high school in 1974. Thus, the commended students rank high below the 15,000 Semifinalists in September by NMSC. Edward C. Smith, president (See HENSON, Page 8)

OUR FRIENDS IN MID-EAST WAR

By A. JESS ATKINS

It looks like we have been had again—unless there is a most dramatic victory.

I really don't know if the axiom is of Confusion or Brooklyn origin but it goes something like this: If you are trying to "do somebody in"—try to find if they have got friends with quick tempers and some natural seeds of animosity between them. If you find that this is the case the rest is easy—side with the one of your enemies' friends that can do you the most good and then get him to start a fight with the other friend. No matter how the ensuing fight comes out you win a friend and he loses one.

This is precisely the trap the U. S. is finding itself in with the Mid-East War. The U. S. has long been a friend of the Arab world and even helped Egypt get the Suez Canal from Britain. The U. S. is also strongly committed to Israel by our actions in the J. N. in helping them become a nation, etc. Now add the Soviet Union to one side, so that we must support the other to forestall its annihilation and you have a brilliant plan to sever us from one more of our friends.

Now this friend that is being cut off isn't just any old nation — it happens to be one we have poured millions into through our oil companies that they might develop their oil resources.

Just a short time ago we became a large importer of oil and with ecologist, government, and high prices fighting against our development of oil resources over here the U. S. is now susceptible to an oil black mail. It has been saying: "Leave the Israelis of about 3 million people to be chewed up by 100 million Arabs that have been goaded into a war to support the Egyptians and Syrians or to without the oil you need so desperately."

While you are tightening up on your energy consumption there is one thing to remember in this bleak picture: Israel does not have too much of a reputation for being a world fighting power since they are so small but they have a considerable reputation for putting up a whale of a fight for their size. Consider the 7 days war of recent history and army of Judas Maccabaeus who was said to have been the toughest army of all time, man for man. So, possibly if Israel gets those Phantom jets, which are already partly paid for, we could be buying our oil from them someday with a subsequent loosening of our energy belt and a tightening of our bill folds.

(CORRECTION)

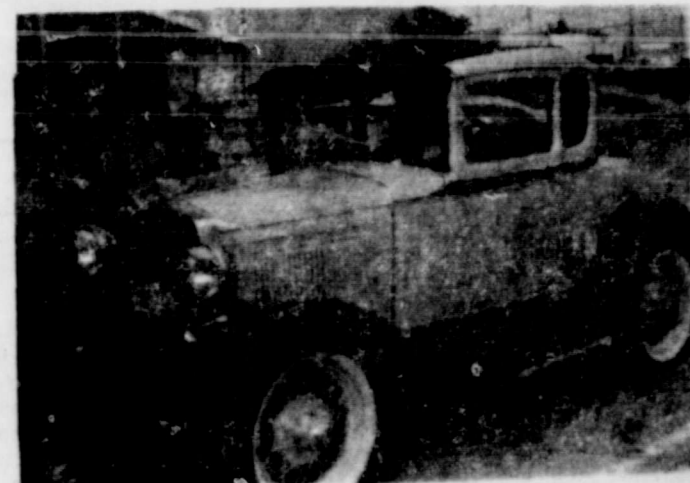

Dale Henson Commended By National Merit Scholarship

Letters of commendation honoring them for their high performance on the 1972 Preliminary Scholastic Aptitude Test/National Merit Scholarship Qualifying Test (PSAT/NMSQT) have been awarded to a student at Stanton High School, Principal Wayne Mitchell has announced.

The commended student is Franklin Dale Henson, son of Mr. and Mrs. Homer Ellis Henson.

The National Merit Scholarship Corporation (NMSC) has named 38,000 commended students throughout the United States. These students are among the upper 2 percent of those who are expected to graduate from high school in 1974. Thus, the commended students rank high below the 15,000 Semifinalists in September by NMSC. Edward C. Smith, president (See HENSON, Page 8)

Them Old Antique Cars Are Gonna Run Again

ANTIQUE CAR. Model T Ford owned by Bill Coggins of Stanton is ready for the contest.

ANTIQUE CAR FALL DRIVING EVENTS

This year they will be held October 21 at 1:30 p.m. in Stanton. The Stanton members of our Club, along with help from the Jaycees will block off the street east of the Courthouse. They will also handle the concession stand.

Prizes this year will be donated by Midland Club members. Let's all turn out and make this one of the biggest and best Driving Events yet!

Some of the events to be held will be a clothes hanging

contest; an old shoe race; an electric start and a hand-cranking contest. There will be at least two other events as well as three events for the kids in their miniature T-10 cars.

Prizes for the winners in each event will be donated by local club members, and presented at the end of the program.

The Jaycees will also man a concession stand.

Spectators are cordially invited and they will be treated to some good old fashioned fun.

MIGUEL SANCHEZ ADMITTED TO BAR

Miguel Sanchez, son of Mr. and Mrs. Ray Sanchez of 1000 N. Loraine St., was admitted to the State Bar recently in a formal swearing-in ceremony before the Supreme Court of Texas for new lawyers who completed the June Bar.

The ceremony was in the LBJ Library auditorium on the campus of The University of Texas at Austin.

Sanchez received the Doctor of Jurisprudence degree in

May from South Texas College of Law at Houston.

A Certified Public Accountant with the Permian Corp. in Houston, Sanchez graduated from Midland High School and received his B.B.A. degree from UT-Austin.

Sanchez resided in Midland until 1970 when he moved to Houston where he resides with his wife, the former Elia Gonzales, and their children.

Miguel is the nephew of Mr. and Mrs. Inez Sanchez, Stanton.

PEE WEE SUPER BOWL

The third annual Super Bowl for the Pee Wee Football League will be played on Saturday, October 20, 1973, at 7:00 p.m. in the Stanton High School Stadium.

At this time the Pee Wee Football Sweetheart for the coming year will be crowned by the reigning Sweetheart, Miss Cheryl Fleckenstein, daughter of Mr. and Mrs. Roger Fleckenstein.

The four candidates for each of the four Pee Wee football clubs are as follows: Packers — Miss Mer Vann, daughter of Mr. and Mrs. Tom Vann.

Dolphins — Miss Demarie Christian, daughter of Mr. and Mrs. Ronnie Christian.

Raiders — Miss Kristi Turner, daughter of Mr. and Mrs. O. C. Turner.

Redskins — Miss Shanna Briggs, daughter of Mr. and Mrs. Paul Briggs.

The boys have played hard this season, and the coaches have given many hours of hard work with an eye to future football successes.

The community is invited to come support these Pee Wee's.

Texas Electric Files A Counter-motion

Texas Electric Service Company, Dallas Power & Light and Texas Power & Light have filed a counter-motion with the Texas Railroad Commission to defend their right to a large supply of dedicated natural gas reserves owned by the three companies.

Burl B. Hulsey, Jr., TESCO president, said that the companies' counter-motion is in response to a motion made to the commission by four applicants: the cities of San Antonio and Austin, the Lower Colorado River Authority and the Board of Regents of the University of Texas system.

"The applicants' motion," said Hulsey, "seeks the aid of

the commission to confiscate and divert to their use natural gas supplies in the Permian Basin which were obtained by the three companies. Title to and ownership of this gas were acquired from the Lo Vaca Gathering Company in 1970.

"This motion would take, for the benefit of others not entitled to it, fuel that we were depending on — fuel for generating units that can use only natural gas for the continuous production of electricity.

"If we do not get this fuel, or if we get only part of our supply, we will face serious (See T. E. FILES, Page 8)

A Gopal I. O. U. Flood

If one can imagine oneself in a position whereby he has delinquent notes in every bank in town that have gone unpaid for months, or even years, and in addition, has placed himself in a judgment proof condition so the banks cannot collect, this is a start toward understanding opposition to any more foreign aid expenditures.

Then if one can further imagine going to these banks and saying you would like more money on personal I.O.U.'s because you want to give some gifts to brothers-in-law because they do not hold you in the highest regard and you want to change their attitude, then you can understand what the battle is all about.

Despite the fact that the United States hasn't the slightest chance of making good on the \$80 billion held by foreigners, there is still a drive to spend more on foreign aid. For a long time, voting through the National Federation of Independent Business, the nation's independent business people have called for an end to this give away.

The analogy cited above is pretty accurate. The United States has scattered paper dollars all over the world, and nobody holding them knows what to do with them. At one time, the United States said it would give up an ounce of gold for every \$35 but when the so-called "gold window" was closed, the world was denied this recourse. Of course this was largely academic, because

the National Federation of Independent Business

with around \$10 billion left in gold, the U.S. could have paid off only 16 cents on the dollar. As every business operator knows, whenever a business gets into that kind of a position, it's not long for this world. Yet, there is this strange push to plaster the world with more I.O.U.'s. Of course, there is a lot of intellectual sounding information released about reform of the monetary system somewhere in the area of the International Monetary Fund, or the IMF. But this is all predicated on nations exchanging I.O.U.'s with each other.

Among some nations this perhaps could work where the amount of the I.O.U.'s are limited, and are only out for a short time. But the U.S. is unfortunately, not in that position.

Thus, through all the world more I.O.U.'s which is all further foreign aid expenditure would amount to, is somewhat akin to the local fire department pumping gasoline on to the flames, destroying a building. But perhaps the fault is that the independent business people just don't understand the "new economics". Perhaps when they get into a financial bind, instead of trying to pay off creditors, they should take everything out of the cash register and hand it out to every bum and "con" man that comes down the street.

Phase 4 Controversy

When the Phase 4 wage and price control program was announced President Nixon said, "I hope that the American people will not be deceived by the idea that we can produce low-priced food out of acts of Congress or executive orders." Never were truer words spoken, and they apply not just to wage and price controls but in other areas where, by fiat, government attempts to smother the inflationary consequences of excessive federal spending.

One of these is the effort to shield low-paid workers against inflation by escalating the pay levels prescribed by the federal minimum wage law. Debate over an increase in the minimum wage follows a definite pattern. On one side are the "liberals" who

always try to do what the President has said cannot be done - alter natural economic laws by acts of Congress. In the case of the minimum wage, a congressional delusion persists that the poor can be protected against inflation if the law requires employers to pay a sufficiently high wage. On the other hand, those who recognize the limitations of the lawmaking process have repeatedly endeavored to limit the more extravagant minimum wage increase proposals by pointing out their inflationary nature and the fact that an unreasonably high minimum wage level causes unemployment among young workers in low-paying jobs.

In the same manner that laws setting artificially-low food prices can empty grocery store shelves, so will artificially high minimum wages dry up job opportunities for millions of young and unskilled workers. Hard experience with inflation shows the futility of laws that try to defy natural forces in the marketplace having to do with wages, prices and jobs.

Airman Sanchez Completes Course

DENVER—Airman Enrique I. Sanchez, son of Mr. and Mrs. Inez Sanchez of Stanton, Tex., has graduated at

Gilbert Sanchez

Lowry AFB, Colo., from the U.S. Air Force supply inventory specialist course conducted by the Air Training Command.

The airman, trained to inventory supplies by use of electronic data processing machines, is being assigned to Davis-Monthan AFB Ariz., for duty with a unit of the Strategic Air Command, America's nuclear deterrent force of long range bombers and intercontinental ballistic missiles. Airman Sanchez is a 1967 graduate of Midland (Tex.) High School. He received his B.S. degree in 1972 from San Angelo (Tex.) State University.

His wife is the former Guadalupe R. Flores.

News From The Oilpatch

Henry & Landenberger of Midland have rescheduled depth of 4,100 feet for their No. 1 Carlile, previously slated 3,800-foot Martin County searcher.

The drillsite is 1,320 feet from north and 2,173 feet from east lines of section 17, block 38, T-1-N, T&P survey, 7 1/2 miles northwest of Stanton.

Hanson Oil Corp., Roswell, will drill No. 1 Glendening as a 4,000-foot wildcard in North Martin County, about six miles north of Lenorah town-site.

It spots 1 3/8 mile southeast of the Phoenix (Grayburg) field, 660 feet from north and 1,980 feet from east lines of section 4, block 36, T-2-N, T&P survey.

Tom D. Fowler of Midland has filed application to re-enter and deepen to 10,000 feet at No. 1 Leora Planagan, for recompletion attempt as a third Fusselman oil producer and 3 8-mile northeast extension to that pay in the Morgan Ranch multipay field of Howard County.

Originally drilled by G. E. Kadane & Sons, at total depth of 8,173 feet, it was completed May 17, 1971, for 124 barrels of oil and 18.66 barrels of water per day, through perforations at 5,855-5,880 feet.

Location is 1,980 feet from north and 810 feet from west lines of section 26, block 32, T-1-S, T&P survey, six miles southeast of Big Spring.

Continental Oil Company plans to re-enter and pump back to wildcard depth of 9,800 feet at No. 1-14-7 University, former opener of the Mustang Draw (Devonian) field of northwestern Martin County.

Drilled to 12,800 feet, it was completed Oct. 14, 1971, for 339.74 barrels of oil and 8.4 barrels of water per day, through a 10 64-inch choke and perforations at 12,323-12,325 feet.

Location is 1,980 feet from south and west lines of section 14, block 7, ULS, 15 miles northwest of Tarzan, and one mile northwest of production in the Lacaff (Dean) field.

John L. Cox of Midland staked site for No. 4-D Guy Mabee as a one-mile southwest outpost to the Lacaff field, 19 miles north of Midland.

Drillsite is 2,600 feet from south and 1,330 feet from east lines of section 2, block OH. Planned depth is 9,800 feet.

Three projects have been scheduled for the Lacaff (Dean) field of Martin County.

John L. Cox of Midland plans No. 5-D Guy Mabee as a 1 3/4-mile southwest outpost to production in the field.

Planned depth is 9,800 feet. The test spots 2,720 feet from north and 1,320 feet from east

lines of section 3, block OH, but n section 6, block OH, 12 miles west of Tarzan.

Robert B. Holt of Midland accounted for two 9,800-foot projects, seven miles west of Tarzan.

No. 1 Holt, 933 feet from south and east lines of labor 17, league 320, Garza CSL survey, is 1/2 mile north of production.

No. 2 Holt, 933 feet from north and east lines of labor 18, is 5 8 mile northeast and northwest of the nearest completed producer.

John L. Cox, Midland, No. 3-B McReynolds, has been completed as an addition to the Martin County portion of the Spraberry Trend Area, 10 miles southwest of Tarzan.

It flowed 241 barrels of 40-gravity oil and 15 barrels of water on 24-hour potential test, through a 16 64-inch choke and perforations at 8,788-9,540 feet, which had been fractured with 100,000 gallons.

Wellsite is 475 feet from south and 5,775 feet from west lines of section 5, R. N. Grisham survey.

The Lacaff field of West Central Martin County was extended 1/2 mile east with completion of Amoco Production Co. No. 2-B Marion Flynt, about 10 miles northwest of Tarzan.

On 24-hour potential test, it pumped 41 barrels of 38.4-gravity oil and three barrels of water, with gas-oil ratio measuring 146-1. Production was through perforations at 9,531-9,690 feet, which had been acidized with 1,000 gallons and fractured with 60,000 gallons and 120,000 pounds.

Well spots 933 feet from north and west lines of labor 17, league 249, Hartley CSL survey.

Adobe Oil Co., Midland, extended the Lacaff (Dean) field of Martin County 2 1/2 miles northeast with the completion of No. 1-A Wolcott, 25 miles north of Midland.

It was completed to pump 44 barrels of 39.8-gravity oil and three barrels of water daily, with gas-oil ratio of 1,341-1, through perforations at 9,341-9,636 feet, which had been fractured with 80,000 gallons and 160,000 pounds.

Drilled to 9,700 feet, it has

The STANTON REPORTER Sells BUSINESS FORMS

5 1/2-inch casing set on bottom. It had been scheduled as a 9,800-foot wildcard.

Wellsite is 5,313 feet from north and 3,472 feet from west lines of league 250, Hartley CSL survey.

Gulf Oil Corp. No. 4-A Sweetie Peck, former Ellenburger producer, has been recompleted as a seventh Devonian well and a 1/2-mile south extension to that pay in the Sweetie Peck field of southwest Midland County.

It was completed to flow seven barrels of 53.8-gravity oil per day, plus one barrel of water, with gas-oil ratio measuring 19,929-1. Production was through a 24 64-inch choke and perforations at 11,628-12,034 feet, which had been acidized with 6,000 gallons and fractured with 60,000 and 35,250 pounds.

Wellsite is 665 feet from south and 735 feet from east lines of the northwest quarter of section 21, block 41, T-4-S, T&P survey, 23 miles southwest of Midland.

The Midland County part of the Spraberry (Trend Area)

gained its third Clearfork oil producer and a 1 3/4-mile southeast extension to that pay with recompletion of Jim Jones, Midland, No. 1-7 Cabot Corp., a former Spraberry producer.

On 24-hour potential test, it flowed 15 barrels of 37.8-gravity oil and had gas-oil ratio of 5,000-1. Production was through an 18 64-inch choke and perforations at 6,548-6,660 feet, which had been acidized with 3,000 gallons.

Drilled to 7,975 feet, it has 5 1/2-inch casing set at 7,014 feet, and is plugged back to 6,930 feet.

Location is 1,980 feet from south and 660 feet from east lines of section 7, block 37, T-5-S, T&P survey, two miles northeast of Midkiff.

natural energy HOME

CLEAN ENERGY FOR TODAY AND TOMORROW

A Natural Energy Home uses natural gas for heating, cooling, water heating, cooking and clothes drying to save you money and help conserve our cleanest natural energy resource... natural gas.

That's because electricity in West Texas is generated by burning natural gas, and in the process of generating and transmitting electricity to your home, 2/3 of the gas energy is lost.

So, by using gas directly in the home for the jobs it can do, you're helping to conserve it and you're getting more energy for your money.

PIONEER NATURAL GAS COMPANY

NEWS OF ECOLOGY

REVERSING POLLUTION IN OUR LAKES

Science has come up with a new way to prevent and reverse pollution of our nation's 1.6 million lakes, more than half of which are already decaying, or eutrophying.

During summer, a lake has three distinct layers. The top layer is the warmest and the bottom layer coldest.

Water currents in the bottom layer are minimal, and no surface oxygen gets down that far. This absence of oxygen speeds up the decaying process with many harmful results. Cold water fish such as trout and salmon can't survive. Foul-smelling gases are given off. And nutrients formerly trapped on the bottom are released promoting dense growth of unwanted surface plants and algae.

The harmful results could be prevented, or reversed if they have already begun, if only it were possible to oxygenate the bottom layer of water. But scientists have long known that if a hose were run to the bottom, and air bubbles pumped through the hose as in a fish tank, most of the air would simply float to the surface instead of oxygenating the bottom layer of water.

THE NEW IDEA

At an ecology-oriented chemical company, a group of scientists decided to try a new technique that has been confined essentially to use in Europe.

An aerator is submerged on the bottom of a lake and connected to an air compressor placed in an acoustically insulated enclosure on the shore. The aerator draws water into it, saturates the water with oxygen, then

expels the oxygenated water. This way, instead of the oxygen bubbling up to the surface, it stays on the bottom where it is needed.

To demonstrate the idea, scientists of Union Carbide Corporation have submerged two cylindrical aerators, each 8 feet in diameter and 15 feet high, at the bottom of Lake Waccabuc near New

York City. Every day, each unit will add about 550 pounds of oxygen to the water.

As part of the program, Union Carbide will maintain a mobile laboratory—a chemistry lab on wheels—at the site to monitor and control results. In addition, continued assessment of the two neighboring lakes will be conducted for comparison purpose.

The project to restore Lake Waccabuc is part of a broad scientific program

in the area of aquatic environmental sciences. Union Carbide initiated over two years ago. It aims to develop expertise in four distinct but related aquatic areas: assessment, where the nature, cause, extent, and complexity of an existing environmental quality problem in a body of water can be specifically determined; aquatic bioassay studies, in order to develop reliable, standard methods to determine the impact of chemicals and heavy metals on aquatic ecosystems; monitoring and control methods, to quickly spot physical changes in a body of water, and restoration approaches designed to return a body of water to a quality consistent with a given desired use.

Specific programs in all four areas are in progress, some of which are being conducted under contracts with the Environmental Protection Agency.

"We are trying to make up lost time," stated Clem Cowley, Manager, Aquatic Environmental Sciences for Union Carbide. "As is usually the case when science attacks a broad problem it has ignored for too long, what we don't know exceeds what we do know. However, in the last two or three years we have cut into that deficit significantly."

Mr. Cowley also reported that Union Carbide will conduct two other lake oxygenation programs in 1973 using a different approach which is proprietary to Union Carbide. The Attica Reservoir in Attica, New York, and the Ottoville, Ohio, quarry, both of which are highly eutrophic, will be aerated using pure oxygen.

A Gopal I. O. U. Flood

If one can imagine oneself in a position whereby he has delinquent notes in every bank in town that have gone unpaid for months, or even years, and in addition, has placed himself in a judgment proof condition so the banks cannot collect, this is a start toward understanding opposition to any more foreign aid expenditures.

As every business operator knows, whenever a business gets into that kind of a position, it's not long for this world.

Yet, there is this strange push to plaster the world with more I.O.U.'s.

Of course, there is a lot of intellectual sounding information released about reform of the monetary system somewhere in the area of the International Monetary Fund, or the IMF. But this is all predicated on nations exchanging I.O.U.'s with each other.

Among some nations this perhaps could work where the amount of the I.O.U.'s are limited, and are only out for a short time.

But the U.S. is, unfortunately, not in that position.

Thus, throwing around the world more I.O.U.'s which is all further foreign aid expenditure would amount to, is somewhat akin to the local fire department pumping gasoline on to the flames destroying a building. But perhaps the fault is that the independent business people just don't understand the "new economies."

Perhaps when they get into a financial bind, instead of trying to pay off creditors, they should take everything out of the cash register and hand it out to every bum and "con" man that comes down the street.

National Federation of Independent Business

Phase 4 Controversy

When the Phase 4 wage and price control program was announced President Nixon said, "I hope that the American people will... not be deluded by the idea that we can produce low-priced food out of acts of Congress or executive orders." Never were truer words spoken, and they apply not just to wage and price controls but in other areas where, by fiat, government attempts to smother the inflationary consequences of excessive federal spending.

One of these is the effort to shield low-paid workers against inflation by escalating the pay levels prescribed by the federal minimum wage law. Debate over an increase in the minimum wage follows a definite pattern. On one side are the "liberals" who always try to do what the President has said cannot be done — alter natural economic laws by acts of Congress.

Airman Sanchez Completes Course DENVER—Airman Enrique I. Sanchez, son of Mr. and Mrs. Inez Sanchez of Stanton, Tex., has graduated at

LOWRY AFB, Colo., from the U.S. Air Force supply inventory specialist course conducted by the Air Training Command. The airman, trained to inventory supplies by use of electronic data processing machines, is being assigned to Davis-Monthan AFB Ariz., for duty with a unit of the Strategic Air Command, America's nuclear deterrent force of long range bombers and intercontinental ballistic missiles. Airman Sanchez is a 1967 graduate of Midland (Tex.) High School. He received his B.S. degree in 1972 from San Angelo (Tex.) State University. His wife is the former Guadalupe R. Flores.

News From The Oilpatch

Henry & Landenberger of Midland have rescheduled depth of 4,100 feet for their No. 1 Carlisle, previously slated 3,800-foot Martin County searcher.

The drillsite is 1,320 feet from north and 2,173 feet from east lines of section 17, block 36, T-1-N, T&P survey, 7 1/2 miles northwest of Stanton.

Hanson Oil Corp., Roswell, will drill No. 1 Glendening as a 4,000-foot wildcard in North Martin County, about six miles north of Lenorah town-site.

It spots 1 3/8 mile southeast of the Phoenix (Grayburg) field, 660 feet from north and 1,980 feet from east lines of section 4, block 36, T-2-N, T&P survey.

Tom D. Fowler of Midland has filed application to re-enter and deepen to 10,000 feet at No. 1 Leora Flanagan, for recompletion attempt as a third Fusselman oil producer and 3 1/8-mile northeast extension to that pay in the Morgan Ranch multipay field of Howard County.

Originally drilled by G. E. Kadane & Sons, at total depth of 8,173 feet, it was completed May 17, 1971, for 124 barrels of oil and 18.66 barrels of water per day, through perforations at 5,855-5,880 feet.

Location is 1,980 feet from north and 810 feet from west lines of section 26, block 32, T-1-S, T&P survey, six miles southeast of Big Spring.

Continental Oil Company plans to re-enter and plug back to wildcard depth of 9,800 feet at No. 1-14-7 University, former opener of the Mustang Draw (Devonian) field of northwestern Martin County.

Drilled to 12,800 feet, it was completed Oct. 14, 1971, for 339.74 barrels of oil and 8.4 barrels of water per day, through a 10 64-inch choke and perforations at 12,323-12,325 feet.

Location is 1,980 feet from south and west lines of section 14, block 7, ULS, 15 miles northwest of Tarzan, and one mile northwest of production in the Lacaff (Dean) field.

John L. Cox of Midland staked site for No. 4-D Guy Mabae as a one-mile southwest outpost to the Lacaff field, 19 miles north of Midland.

Drillsite is 2,600 feet from south and 1,330 feet from east lines of section 2, block OH. Planned depth is 9,800 feet.

Three projects have been scheduled for the Lacaff (Dean) field of Martin County.

John L. Cox of Midland plans No. 5-D Guy Mabae as a 1 3/4-mile southwest outpost to production in the field.

Planned depth is 9,800 feet. The test spots 2,720 feet from north and 1,320 feet from east

5 1/2-inch casing set on bottom. It had been scheduled as a 9,800-foot wildcard.

Wellsite is 5,313 feet from north and 3,472 feet from west lines of league 250, Hartley CSL survey.

Gulf Oil Corp. No. 4-A Sweetie Peck, former Ellenburger producer, has been recompleted as a seventh Devonian well and a 1/2-mile south extension to that pay in the Sweetie Peck field of southwest Midland County.

It was completed to flow seven barrels of 53.8-gravity oil per day, plus one barrel of water, with gas-oil ratio measuring 19,929-1. Production was through a 24 64-inch choke and perforations at 11,628-12,034 feet, which had been acidized with 6,000 gallons and fractured with 60,000 and 35,250 pounds.

Wellsite is 665 feet from south and 735 feet from east lines of the northwest quarter of section 21, block 41, T-4-S, T&P survey, 23 miles southwest of Midland.

The Midland County part of the Spraberry (Trend Area) gained its third Clearfork oil producer and a 1 3/4-mile southeast extension to that pay with recompletion of Jim Jones, Midland, No. 1-7 Cabot Corp., a former Spraberry producer.

On 24-hour potential test, it flowed 15 barrels of 37.8-gravity oil and had gas-oil ratio of 5,000-1. Production was through an 18 64-inch choke and perforations at 6,548-6,660 feet, which had been acidized with 3,000 gallons.

Drilled to 7,975 feet, it has 5 1/2-inch casing set at 7,014 feet, and is plugged back to 6,930 feet.

Location is 1,980 feet from south and 660 feet from east lines of section 7, block 37, T-5-S, T&P survey, two miles northeast of Midkiff.

On 24-hour potential test, it pumped 41 barrels of 38.4-gravity oil and three barrels of water, with gas-oil ratio measuring 146-1. Production was through perforations at 9,531-9,690 feet, which had been acidized with 1,000 gallons and fractured with 60,000 gallons and 120,000 pounds.

Well spots 933 feet from north and west lines of labor 17, league 249, Hartley CSL survey.

Adobe Oil Co., Midland, extended the Lacaff (Dean) field of Martin County 2 1/2 miles northeast with the completion of No. 1-A Wolcott, 25 miles north of Midland.

It was completed to pump 44 barrels of 39.8-gravity oil and three barrels of water daily, with gas-oil ratio of 1,341-1, through perforations at 9,341-9,636 feet, which had been fractured with 80,000 gallons and 160,000 pounds.

Drilled to 9,700 feet, it has

That's because electricity in West Texas is generated by burning natural gas, and in the process of generating and transmitting electricity to your home, 2/3 of the gas energy is lost. So, by using gas directly in the home for the jobs it can do, you're helping to conserve it and you're getting more energy for your money. PIONEER NATURAL GAS COMPANY

NEWS OF ECOLOGY

REVERSING POLLUTION IN OUR LAKES

Science has come up with a new way to prevent and reverse the pollution of our nation's 1.6 million lakes, more than half of which are already decaying, or eutrophying.

During summer, a lake has three distinct layers. The top layer is the warmest and the bottom layer coldest.

Water currents in the bottom layer are minimal, and no surface oxygen gets down that far. This absence of oxygen speeds up the decaying process with many harmful results. Cold water fish, such as trout and salmon can't survive. Foul-smelling gases are given off. And nutrients formerly trapped on the bottom are released promoting dense growth of unwanted surface plants and algae.

The harmful results could be prevented, or reversed if they have already begun, if only it were possible to oxygenate the bottom layer of water. But scientists have long known that if a hose were run to the bottom, and air bubbles pumped through the hose as in a fish tank, most of the air would simply float to the surface instead of oxygenating the bottom layer of water.

THE NEW IDEA At an ecology-oriented chemical company, a group of scientists decided to try a new technique that has been confined essentially to use in Europe.

An aerator is submerged on the bottom of a lake and connected to an air compressor placed in an airtight insulated enclosure on the shore. The aerator draws water into it, saturates the water with oxygen, then

expels the oxygenated water. This way, instead of the oxygen bubbling up to the surface, it stays on the bottom where it is needed.

To demonstrate the idea, scientists of Union Carbide Corporation have submerged two cylindrical aerators each 8 feet in diameter and 15 feet high, at the bottom of Lake Waccabuc near New York City. Every day, each unit will add about 550 pounds of oxygen to the water.

As part of the program, Union Carbide will maintain a mobile laboratory—a chemistry lab on wheels—at the site to monitor and control results. In addition, continued assessment of the two neighboring lakes will be conducted for comparison purposes.

The project to restore Lake Waccabuc is part of a broad scientific program

in the area of aquatic environmental sciences Union Carbide initiated over two years ago. It aims to develop expertise in four distinct but related aquatic areas: assessment, where the nature, cause, extent, and complexity of an existing environmental quality problem in a body of water can be specifically determined; aquatic bioassay studies, in order to develop reliable, standard methods to determine the impact of chemicals and heavy metals on aquatic ecosystems; monitoring and control methods, to quickly spot physical changes in a body of water, and restoration approaches designed to return a body of water to a quality consistent with a given desired use.

Specific programs in all four areas are in progress, some of which are being conducted under contracts with the Environmental Protection Agency.

"We are trying to make up lost time," stated Clem Cowley, Manager, Aquatic Environmental Sciences for Union Carbide. "As is usually the case when science attacks a broad problem it has ignored for too long, what we don't know exceeds what we do know. However, in the last two or three years we have dug into that deficit significantly."

Mr. Cowley also reported that Union Carbide will conduct two other lake oxygenation programs in 1973 using a different approach which is proprietary to Union Carbide. The Attica Reservoir in Attica, New York, and the Ottoville, Ohio, quarry, both of which are highly eutrophic, will be aerated using pure oxygen.

Courtney Baptist Church Guest Devotional

W. M. IRWIN
Pastor, Courtney Baptist Church

"All things are possible to him that believeth." Mark 9:23.

The road is too rough, I said:
It is uphill all the way;
No flowers, but thorns instead;
And the skies overhead are grey.
But one took my hand at the entrance dim,
And sweet is the road I walked with Him.

The Cross is too great, I cried:
More than the back can bear,
So rough, and heavy and wide,
And nobody by to care.
And One stooped softly and touched my hand.
I know, I care. And I understand.

Then why do we fret and sigh;
Cross-bearers all we go;
But the road ends by and by
In the dearest place we know,
And every step in the journey we
May take in the Lord's own company.

We live in a very challenging world. God's blessings are all about us and yet sinful self has caused much grief. We blame so much on Washington and those in authority at the top when in reality God would have each of us to purify his own life. Redemption begins in the life, the local church, and the local community. The question is, "Can I be changed and can

Koffee Kup HD

The Koffee Kup H. D. Club met Thursday, Oct. 11, at the home of Mrs. Nelda Turner. Mrs. Melba Luna presided and the devotional was given by Mrs. Mickey Lander. The program was given by Mrs. Janie Linney who explained the supplies used and the different mediums employed in painting. Plans for Martin County's Achievement Day to be held Oct. 30 were discussed. A new member, Mrs. Gracie Hanson, was welcomed by those present, Mrs. Patsy Odom, Mrs. Barbara Bowlin, Mrs. Mickey Lander, Mrs. Paula Lewis, Mrs. Nelda Turner, Mrs. Melba Luna, Mrs. Kathy Phillips, Mrs. Betty Billingsley, Mrs. Joan Henley, Mrs. Joyce Huckaby and Mrs. Virginia Morrow.

I change the things about me? Is it possible?"

All things are possible to him that believeth. The "all things" do not always come simply for the asking, for the reason that God is ever seeking to teach us the way of faith, and in our training in the faith there must be room for the trial of faith, the discipline of faith, the patience of faith, and the courage of faith. Often many stages are passed before we realize what is the end of faith, namely the victory of faith.

If we would live in a country of decency and honesty, we as individuals must be decent and honest. What can one accomplish? Daniel could have blamed others, but looking to God for strength through prayer, he lived steadfastly believing and saw God's victory. Let those who know the Lord double their prayer life and see God's victory come shining through.

The Newest You
BY ANN D ALLEN

Are you one of those "I-Hate-to-Cook" people? If you are and there are some around, you're looking for the instant food, a natural food.

Milk is an easy solution, and a convenient one: simply pour it in a glass. There's no peeling, no rind, no seeds to pick out. Just pour it and drink.

If you're high on a natural food kick, then you'll find milk an ideal companion for many other "naturals" and "instants." Have you teamed it with a real nature lover's delight like fruit-in-hand, crisp apples, mellow pears, bananas, or grapes? How about a handful of nuts with the fruit?

There's no sweat in reaching for a box of ready-to-eat cereal and pouring on some milk. How about a snack of cheese, crackers and milk? That's as easy as flicking on the TV. And, of course, milk's an old nostalgic favorite with chocolate cake, cherry pie or sugar cookies that "I-Love-to-Cook" people may be kind enough to give you.

Perhaps you like nibbling on pumpkin or sunflower seeds. They're a handy snack, too. So is spooning yogurt or having a dish of ice cream.

With all of these foods, especially the natural kinds like dairy products, you're getting a serving of good health, a toast to the newest you, as it were.

ANNIVERSARY. Mr. and Mrs. Edmund Morrow celebrate their Golden Wedding Anniversary.

Edmund Morrrows' Golden Wedding

Mr. and Mrs. Edmund Morrow were honored with a Golden Wedding anniversary reception at the Cap Rock Auditorium on Sunday, Oct. 14. The couple was united in marriage on Oct. 11, 1923, by the late Rev. R. A. Crosby. They were married in the Coleman County home of Mrs. Morrow's parents, the late Mr. and Mrs. E. L. Woodward, near Santa Anna. She is the former Gyda Woodward. Mr. Morrow is the son of the late Mr. and Mrs. W. C. Morrow, early settlers of Martin County.

Registering guests were Tommy Morrow and Leann Biggs, grandchildren of the honorees. Serving in the houseparty were Mrs. Richard Woodward and Velda Woodward of Lamesa, Mrs. J. C. Flowers of Lubbock and Mrs. Gene Hodges of Kermit, also a granddaughter of the Morrrows.

150 guests registered from Stanton, Midland, Odessa, Lamesa, Lubbock, Muleshoe and Kermit.

ISABEL SANCHEZ TEACHES AT PARDIN COLLEGE, N. J.

Mr. Isabel Sanchez, son of Mr. & Mrs. Inez Sanchez, of Stanton began teaching band at Pardin College in New Jersey.

Isabel Sanchez

Isabel received his degree in New Jersey after serving in Korea for three years. He attended Sul Ross State University for four years prior to his military service. Isabel is a former Stanton High School graduate.

He is married to the former Wendy Fure and they have one daughter, Dora.

Smartness is never synonymous with vulgarity and improprieties.

Bergs Visit Here

Visiting in the home of Mrs. O. R. Rich this past week were her daughter and son-in-law, Fraser & Lillian Berg from Tucson, Ariz.

They had spent a week in Duluth, Minn., with Mr. Berg's mother; then came to Stanton on their way to Ruidoso, N.M. to attend the Aspencade Motorcycle Rally & Race which they help sponsor.

Mr. Berg returned to Tucson Monday where he is stationed with the Arizona Air National Guard. Mrs. Berg will return home sometime in November after visiting with her mother and relatives here and at Colorado, City.

Martin Co. Hospital Auxiliary

The ladies auxiliary of the Martin County Hospital met Tuesday night in the Texas Electric Reddy Room with Mrs. Phil Berry, presiding.

Mrs. Forest Smith, secretary, read the minutes of the last meeting. She also reminded members that dues were being accepted.

Volunteers were asked to help at the Thrift Shop that the auxiliary operates. Mrs. John Atchison told of uses and needs of many items. Among new items at the shop are a refrigerator and a clothes dryer.

Mrs. Jim McCoy reported that items of worth given to the shop are tax deductible and receipt slips are available for this use.

Present were Mrs. Johnnie Brooks, Mrs. Ray Simpson, Mrs. Forest Smith, Mrs. John Atchison, Mrs. Jim McCoy, Mrs. Glenn L. Brown and Mrs. Phil Berry.

Beta Sigma Phi

Rho Xi

Rho Xi met for their third regular meeting in the home of Mrs. P. M. Bristow with Marsha Todd as hostess.

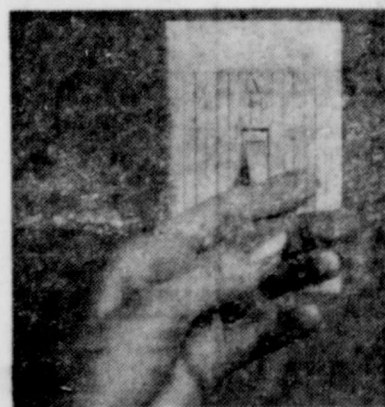

Marsha Todd, president, presided over the business meeting. It was decided the chapter would sponsor the Little Miss Martin County Pageant again this year. Plans for the Halloween costume party were discussed.

The meeting was adjourned and Bonnie Franklin presented the program, "Speech."

Refreshments of pecan pie and ice cream were served to the following members: Mary Barnhill, Mary Deitiker, Bonnie Franklin, Paulette Hahn, Marilyn Newman, Beverly North, Mary Sale, Clara Stewart, Judy Brandenberger, Carolyn Stone, Patricia Wilson, Bonnie Yater and Marsha Todd.

THE STANTON REPORTER Sells BUSINESS FORMS

Now, more than ever, electricity is worth using wisely.

Electricity, like all forms of energy, should be used wisely — especially now, with growing shortages in supplies of natural gas and oil, the basic fuels used to generate electricity in Texas.

At Texas Electric, natural gas is our major fuel supply with oil used on a standby basis. To reduce our dependency on these fuels, we have well developed, long range plans to diversify our fuel sources.

We have joined with Dallas Power & Light and Texas Power & Light in acquiring long range supplies of east Texas lignite. We now have one lignite plant in

operation and two others under construction. The three companies have also announced plans to have a nuclear fueled plant in operation by 1980.

One big advantage of lignite and nuclear fuels is that neither is being used extensively for any purpose other than the generation of electricity. A disadvantage is that generating plants that use these fuels cost much more to build. And, because of the long lead time required to plan and build these plants, it will be many years before natural gas can be replaced as our major fuel supply.

Barring difficulties with our existing natural gas supplies or delays in the development of our lignite and nuclear generating capability, we will be able to provide the electricity our customers need. However, the much higher cost of diversifying our fuels and inflation make it inevitable that the price of electric service will rise.

As rising costs and the energy squeeze make electricity increasingly valuable, we will continue to encourage its efficient use. Now, more than ever, electricity is worth using wisely.

Martin County Farm-Ranch Report

Co-Extension Agent's Report

By KATHRYN LUCKENBACH

FROZEN INGREDIENTS
Recipes often call for chopped, grated, diced or minced ingredients.

Do this time-consuming work ahead of time — then freeze the various ingredients until needed, suggests Miss Luckenbach, county extension agent.

For example, grate cheese a pound or two at a time. One pound makes about four cups grated cheese. Measure it in one-cup units — or in the amount wanted most often.

Place cheese in air-tight containers or wrap in moisture-vapor-resistant plastic wrap, and freeze. American process cheese freezes well.

Chop a pound or two of onions at a time, either with a knife or in a blender for finely chopped pieces. Wrap in 1/2-cup or 1/4-cup units in air-tight plastic wrap.

Place packages in a glass freezer jar that can be tightly closed to keep the onion odor from escaping, and freeze.

Green peppers also can be chopped and frozen. Mince parsley and then put in the freezer. Both should be packaged in convenient-sized units, then placed in air-tight containers.

Keep bread crumbs on hand in the freezer, too. Save bread heels until you have several. Crumb them in the blender,

or between two sheets of wax paper with a rolling pin.

Store in an air-tight container. If preferred, lightly butter the heels before crumbling to make buttered crumbs.

Texas Tech News

LUBBOCK — Optimizing beef production from rangeland, agricultural credit and marketing range livestock under "Phase IV" were among the topics covered at the 1973 Ranch Management Conference Oct. 12, at the Farmers Co-op Complex, 3800 Southeast Drive in Lubbock.

The day long meeting dedicated to the theme, "This Business of Ranching."

Registration will begin at 9 a.m. to be followed by the morning session of the meeting at 9:45.

Discussion topics scheduled for the conference include small grain and improved pasture for optimizing beef production from rangeland.

Some alternatives for range improvement in the High Plains and Rolling Plains Resource Area, agricultural credit—range improvements and the ranch business, the role of exotic livestock and cost accounting as a basis for decision making, and marketing range livestock under "Phase IV."

AgriCulture? HOW'S YOUR?

FARM INVESTMENT IN LAND, BUILDINGS, LIVESTOCK AND EQUIPMENT HAS DOUBLED IN LAST 20 YEARS

YET FARMERS' RETURN ON THEIR INVESTMENT IS ABOUT 5% COMPARED WITH AROUND 15% IN ALL MANUFACTURING

AT THIS RATE, FARMERS COULD GET EQUAL RETURN BY PUTTING THEIR MONEY IN GOVERNMENT BONDS!!

Open Horseman's Playday

The Stanton Jaycees will sponsor an Open Horseman's Playday Oct. 27 at 1:00 p.m. at Bobby Kelly's Arena. Barrel racing, pole bending, flag races and ribbon races will be held for four age groups. Pee wee classes will be for children 9 and under, junior ages 10 through 14, senior 15 through 19 and adult 20 and over. Ribbons will be given for 1st through 10th places and belt buckles will be given to all around champions in each age group.

A special event will be held along with the play day. A goat roping and hair pulling will be held. Anyone interested in participating in the play day, come on out. Entry fees will be \$1.00 per event, except in the goat roping, and entry fee for that will be \$2.00.

For more information call Bobby Kelly, 756-3606, Stanton, Texas.

Martin County Farm Bureau

The president of the Martin County Farm Bureau, Board of Directors, said today that if controls are imposed on agricultural exports, the result will be financial disaster for many farmers.

Jack Kuhlman made the comment in reference to legislation currently pending in Congress that would impose export restrictions.

The U.S. House of Representatives passed a bill (H.R. 8547) on September 6 to increase the President's authority to control exports of materials and agricultural commodities. The U.S. Senate is holding hearings on similar bills (S.2035 and S. 2411).

Jack Kuhlman stated that the Martin County Farm Bureau solidly supports the expansion of exports of agricultural commodities and the development of mutually advantageous trade with other nations.

He added that the legislation aimed at limiting exports are much like price controls in that they divert attention from the need for a direct attack on our economic problems through effective action to reduce government spending.

Jack Kuhlman said consumers who are crying for export controls just don't understand the consequences of such action. "The intensity that we are involved in exports is not common knowledge to the consumer," he said.

According to the United States Department of Agriculture, the 1973 fiscal year export sales, which were 60 percent higher than a year earlier, required the output of 85 millions acres of U.S. cropland—or the production

of one of every four acres harvested.

The sharp rise in exports is contributing significantly to the expected increase in farm income from the record of \$20 billion in the calendar year 1972 to an estimated \$24 billion in 1973.

Jack Kuhlman said advocates of the export controls should be aware of the consequences of the current Senate hearings. "Can you imagine," he said, "what the results would be to farm incomes if the U.S. were suddenly not able to continue export of three-fourths of its wheat production, two-thirds of its soybean crop and cattle hides, and nearly two-fifths of the U.S. output of tobacco, cotton, tallow, and almonds."

Texas farmers' and ranchers' share of the 1973 fiscal year export sales amount to almost \$800 million.

Martin Co. Farm Bureau strongly advises to telegram or write your Senators, John G. Tower & Lloyd Bentsen that you oppose closing exports.

Mr. Jimmy Sawyer

Mustang Soil Conservation News

Jimmie Sawyer of Lenorah was elected to a 5 year term as the Zone 5 Director of the Mustang Soil and Water Conservation District. The election was held at 10 a.m. on the 9th of October in the Gin Office at Lenorah. Sawyer who began serving on the board in 1971 has been farming for over 20 years and is presently operating 2,000 acres of dryland cropland in Martin County. In addition to his position on the Mustang District Board, Sawyer is a mem-

ber of the Grady School Board and is active in the Lenorah Baptist Church.

Serving with Sawyer on the Mustang District Board are Floyd Martin in Zone 1, Bob Cox in Zone 2, Newell Tate in Zone 3 and Rufus Tom in Zone 4.

Directors meetings are held the 4th Tuesday of each month at 8 p.m. in the Soil Conservation Service Office in Stanton. Anyone interested in the conservation of our natural resources is welcome to attend.

BE ACCIDENT FREE IN '73

Mr. Buddy Stewart, Vocational Agriculture Teacher at Grady High School, offers the following suggestions for preventing accidents.

Fires, drownings, firearms, falls, and tractors cause the largest number of deaths on farms. Animal accidents, machines, and suffocation rank next as killers. Animal accidents, mostly horses, kill as many as electricity, poisoning and lightning combined.

Careless handling of fuels, matches, and smoking causes the most fires. Lightning causes many more fires than fatalities, and so does elec-

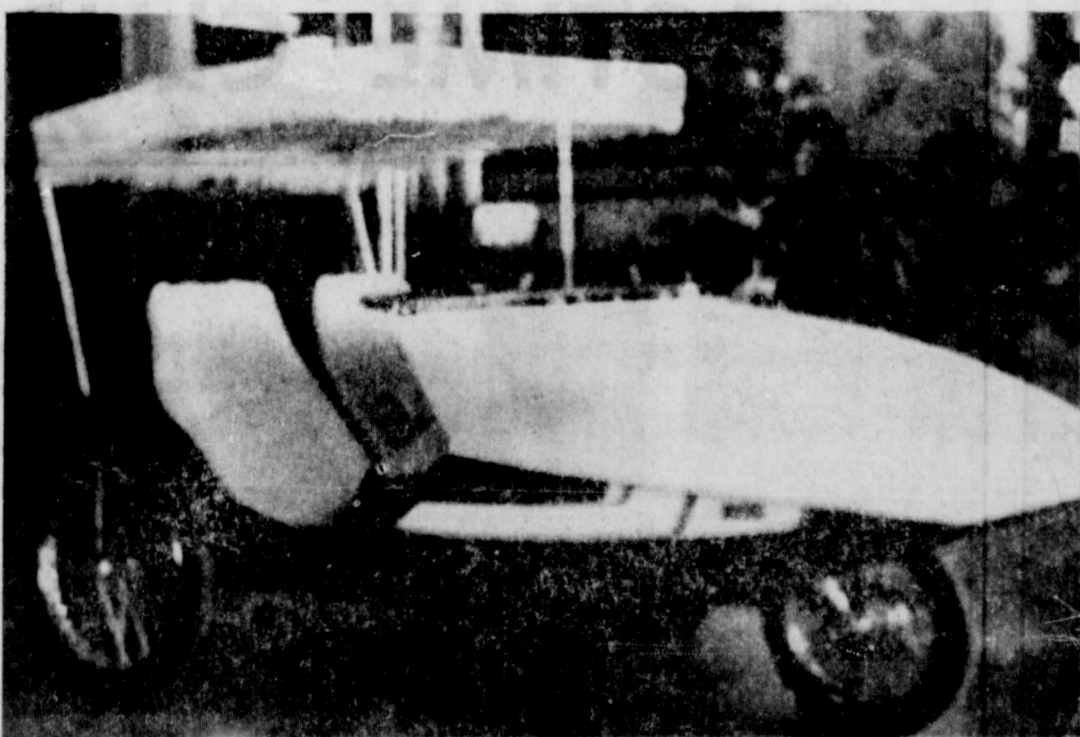

tricity and overloaded wiring. Drownings and suffocation accidents claim a staggering number of victims under five years of age.

Prevent fires by more careful handling of fuels, providing adequate wiring to prevent overloads, and providing lightning protection. Teaching children to swim early in life and learning water safety rules early could save many of these little people from drowning. Stings from flying insects kill more people than snake bites and spider bites combined.

What have you done lately for safety?

STANTON JR. VARSITY BOPS PUPS

FINAL HUDDLE. The Buffs and Owls show their sportsmanship and faith by the closing benediction.

The Stanton Jr. Varsity walloped the Coahoma Bulldogs Thursday night and sent them home with their tails between their legs with a 17-0 defeat.

The Buffaloes played a real fine game with all of the scoring coming in the first half. The defense did an outstanding job the entire game, holding Coahoma to four first downs. Three of these came after the opening kickoff and then no more in the first half. The Bulldogs made only one first down in the second half.

Stanton scored first in the first quarter, driving 48 yards in four plays with a big pass completion from Gary Hanson to Kenneth McCallister for 30 yards to the 18-yard line. Three plays later Gary Hanson rolled around his left end for 11 yards and the T.D. The extra point was added by Bobby Richardson and Stanton led 7-0.

Stanton scored again midway through the second quarter on a 53-yard drive with Keyv Allred getting the

	St.	Co.
First downs	13	4
Rushing yds.	13	48
Passing yds.	79	0
Passing attempts	9	6
Completed	6	0
Intercepted by	1	2
Fumbles rec. by	2	2
Punts	6-30	6-37
Penalties	7-90	2-20

touchdown on a one-yard run. The extra point was added again by Bobby Richardson to up the lead to 14-0.

With :11 seconds remaining in the first half, Bobby Richardson added a 30-yard field goal and Stanton led at half, 17-0.

This was all of the scoring, but not all of the ball game. Although Stanton could not get on the scoreboard again, they kept Coahoma from moving the ball. Stanton led by a big margin in statistics.

Yardage was distributed evenly between four Stanton backs. Allred had 53 yards on 11 carries; Allen Douglas, 50 yards on 11 carries; Gary Hanson, 40 yards, 11 carries; and Nicky Irvin 30 yards on five carries.

JR. VARSITY IN ACTION. The Junior Varsity in their game against Coahoma last Thursday. The Buffs won 17-0.

TIME MAY BE RUNNING OUT FOR STATE SETTLEMENT ACTION

In keeping with the view that the best possible regulation of an industry comes from within, the American Land Title Association this year has developed a new model law to help states strengthen their regulation of title insurance.

Included in this model law are provisions to prohibit kickbacks in real estate transactions, disclose to home buyers that owner's title insurance is available to protect them, and require close state supervision of title company rates and operations.

Signs from Washington strongly indicate that state legislators may not have much time for response to the need for stronger title insurance regulation within their boundaries. Last summer, the Department of Housing and Urban Development and the Veterans Administration began activity to set charges for title insurance and other real estate settlement services related to FHA and VA loans. This federal action resulted in a wave of protests - including those from state insurance commissioners who said the move is

in direct conflict with existing state authority. Last year, legislation was proposed in Congress that would have further extended HUD and VA settlement regulatory powers.

ALTA Executive Vice President William J. McAuliffe, Jr., has announced that the model law offered by that Association was developed in conjunction with the organization's position that state regulation of title insurance is more responsive to the public interest than federal regulation. State legislators and regulators who agree should act quickly. There is no lack of examples to demonstrate that state failure to assume responsibility has led directly to federal intervention and federal control.

LETTERS TO EDITOR

To The People of Stanton:
I am a student, a STANTON HIGH SCHOOL STUDENT. I am worried about the pride of our school and town.

It seems to me that everything is said to be the BOYS football team or BOYS basketball team. I want to know what happened to the STANTON HIGH SCHOOL football team? And by the way isn't there a girls basketball team? Don't they deserve a little recognition I mean this is a mixed school and the boys are not the only ones that participate in activities. And also athletics is not the only thing school is about.

The most spirited and hard working organization does not get near the recognition it deserves. I am speaking of the STANTON HIGH SCHOOL band. They earned a No. 1 in competition and all they got were a few congratulations. Can you imagine if that was one of the football teams what this town would do for them? And finally the people got Mr. Parker something he has deserved for many, many years. To think that his FFA teams have gone to state ever since he has been here and nothing has been done to thank him. And all of the other STANTON HIGH SCHOOL organizations and UIL teams that have done so well but have not gotten anything.

What I am trying to say is this PRIDE should be for the whole school and not for just one organization. You, the people of STANTON, should not only boost the BOYS football and basketball teams but everything that goes on in STANTON HIGH SCHOOL. Not only should the school be boosted but all the organizations in STANTON should deserve recognition for the things they do to make our town the great place it is to live in.

I am a sports fan also. But I still believe in backing all

the other things that go in MY town; and school and try to improve it in any way I can. And when the girls run out on the court I like to show just as much spirit as if it were boys running out on the court or football field. I'd like to look around and see just as many people at the girls game as at the boys. I would like to ask you to help me bring a great PRIDE into our town. A PRIDE that when something bad is said, that the kids and adults of this town are ready to fight to keep them from condemning us. And a school and town that everyone will be proud of and not ashamed to admit this is where they live. A PRIDE where everyone is treated equal and not condemned for doing wrong. A PRIDE with Christians holding it up. A PRIDE that will always stay and will not be lost. A REAL STANTON PRIDE.

Thank you,
A PROUD STANTON HIGH SCHOOL STUDENT
Barbara Trimble

Buffaloes Lose To Reagan County's Owls

The Stanton Buffaloes were defeated Friday night by the fifth-ranked Reagan County Owls. The Buffaloes played a good first half but couldn't get going in the second half and led at one time, 7-6.

Reagan County took the opening kickoff and with 7:33 left in the first quarter, Fullback Johnny Hickman went 14 yards for the T.D. The extra point try was blocked by Mitchell Irvin.

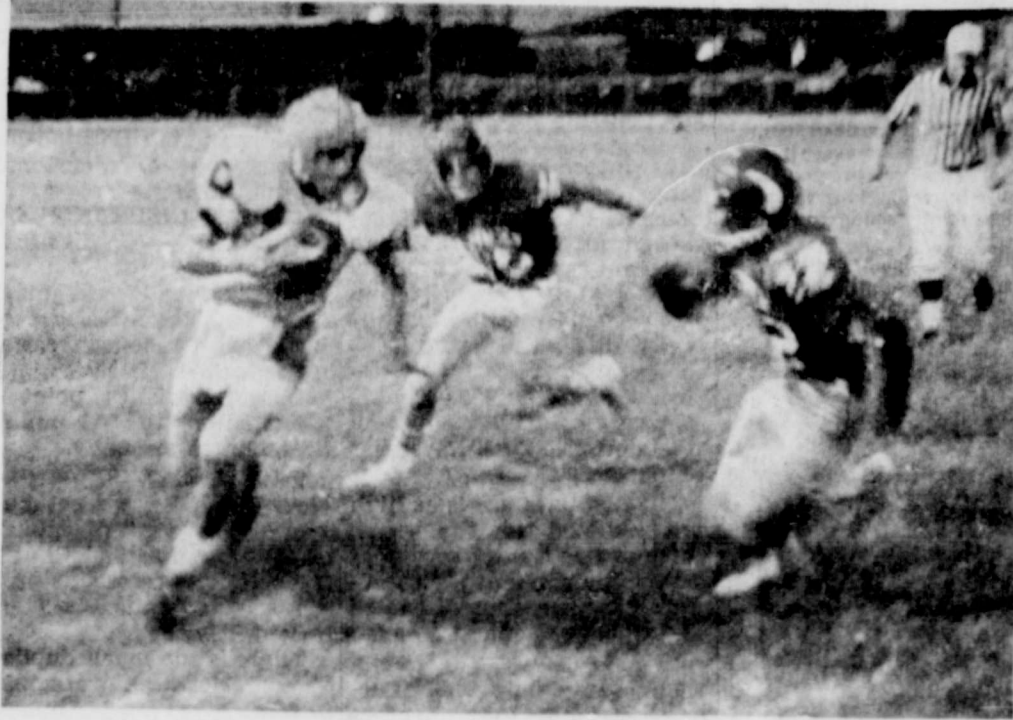

After an exchange of punts Stanton took the ball on their own 39-yard line and on the second play, Mark Eiland broke through between left tackle and end for a 45-yard gain to the 10-yard line. From there Elvin Brown took it in for the score. He got 1, then 6, then 2, bringing up fourth down and 1. Howard called Elvin Brown's number again and he picked up the touchdown on the first play of the second quarter. Gordon Eiland kicked the extra point and Stanton led, 7-6.

Stanton threatened again after picking up a fumble on the 45-yard line. Elvin Brown gained 42 yards down to the 10, but Stanton was called for clipping and moved the ball back to the 29. Two plays later Howard fumbled and Reagan County recovered to stop this threat. Reagan County then drove the ball 57 yards and scored with 7:37 left in the second quarter when halfback George Thompson went 33 yards for the T.D. The pass for extra point was no good and Reagan County led 12-7.

On the next series, Stanton drove down to the Reagan County 14-yard line before failing to pick up a first down on fourth with 3 yards to go, when Mark Eiland could only get one of the three yards needed.

With 1:01 remaining, quarterback Ken Stout went five yards for a T.D. Kevin Webb kicked the extra point and at half Reagan County led 19-7.

The third quarter was scoreless until only 47 seconds were left, when on third down Q. B. Ken Stout crawled over from the one-foot line and the officials gave him the T.D. Reagan County had set up first and goal on the Stanton 1. On first down Mitchell Irvin stopped Hickman for no gain.

REAGAN CO. vs. STANTON. An Owl tries another end run as two Buffaloes close in on their quarry.

On second down Hickman was stopped by Mark Eiland and Steve Cook for no gain. On third down, Stout went back to pass, and with receivers covered decided to run. He was hit on the two-yard line, fell forward and then crawled into the end zone for a T.D. The try for the extra point was no good.

On the ensuing kickoff, Vernon Brown fumbled the kickoff and three plays later Hickman scored from 12 yards out with :07 showing in third quarter and Reagan County led, 32-7.

Reagan County scored again with 10:30 left in the fourth quarter after a bad snap on fourth down did not allow a punt and four plays later Q. B. Ken Stout found H. B. Carl Settle alone in the end zone for the T.D. The try for two extra points was good on a pass from Stout to Barnes and Reagan County led 40-7. This was three touchdowns in a period of two minutes and 10 seconds.

The last score was added when George Thompson scored from 12 yards out with 7:16 left. Kevin kicked the extra

point which was the first Southern Assembly for this year.

After the assembly on Monday Mr. Mitchell presented Dale Henson with a letter of Commendation from the National Merit Scholarship and Aptitude Test. Congratulations Dale!

The Science Club met last Tuesday, elected officers and discussed U.I.L. competition. The officers chosen were: President, Skeeter Straub; Vice-president, Dale Henson; Treasurer, James Franks; and Secretary, Karen Anderson.

The Student Council met Wednesday and talked out the Texas Student Council Forum.

The P.T.A. held a meeting Thursday and elected a committee for district office. Karen Anderson will run for district vice-president at the district meeting October 27th. The Club received membership cards and discussed the chance they will sponsor the first week in November.

The J.V.'s played Coahoma last Thursday night and pulled in a victory, 17-0. Congratulations! This week the J.V.'s play Crane here.

The Buffaloes hosted the Reagan County Owls last Friday night and were defeated. This week the Buffaloes will be traveling to Coahoma to play the Coahoma Bulldogs. Good Luck Buffs!

High School Happenings

By JACKIE JONES

Last Monday Jeff Gauze and his wife visited the school and presented a Southern Assembly for the high school and junior high. Mr. Gauze is a trick gunman and an expert with the whip. He told about the history of various guns, the weight and make and also demonstrated for the students. Mr. Gauze provided for a better understanding of his occupation by having a "question and answer" period after his performance. The students thought

which was the first Southern Assembly for this year.

After the assembly on Monday Mr. Mitchell presented Dale Henson with a letter of Commendation from the National Merit Scholarship and Aptitude Test. Congratulations Dale!

Pee Wee Football

The Redskins finished in first place for the 1973 season after they lost to the Raiders Saturday. The Raiders managed a 37 to 13 victory to end their regular season play. Scoring for the Raiders was by Bobby Mims. He scored all 6 of the touchdowns. The TDs came on runs from 9 yards, 9 yards, 47 yards, 16 yards and 63 yards. He also scored on a 34-yard pass play. David Luna scored the only extra point.

The Redskins managed only two touchdowns. Tracy Irvin scored from 60 yards and Richard Perry scored from 56 yards and also added the extra point.

The Packers won an upset over the Dolphins, 31 to 7. Scoring for the winning Packers were Lee Byrd from six yards, Alonso Padron from 35 yards, 24 yards and four yards, and Joe Hinojosa on a 40-yard pass interception. Steve Walton added the only extra point.

Scoring for the Dolphins were Craig Eiland from 35 yards and Floyd Brown added the extra point.

Final Standings
The Redskins are in first place with a 4-1-1 record. Their coaches were Dewey

Anderson, Johnny Louder, and Doug Carder. The Raiders are in second place with a 4-2-0 record. Their coaches were Larry Adams and Bill Pardue.

The Dolphins are in third place with a 2-4-0 record. Their coaches were Herb Sorley, David Pinkerton and Jimmy Graves. The Packers finished last with a 1-4-1 record. Their coaches were Dusty Dillard and Bubba Standefer.

The Pee Wee teams have only one game remaining — the Super Bowl. All stars from the first place Redskins and the fourth place Packers will play the all stars from the second place Raiders and the third place Dolphins.

The All Stars are:
Redskins: Freddy Hernandez, Grig Douglas, Richard Perez, Gary Douglas, Tracy Irvin and John Smith.

Raiders: Mark Luna, Kerry Holcombe, Eddie Bryan, Bobby Jay Mims, Randall Koonce and David Luna.

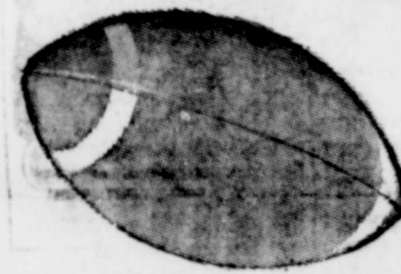

Packers: Joe Hinojosa, Alonso Padron, Tommy Ramos, Ernest Byrd, Steve Walton and Dean Lawson.

Dolphins: Loyd Brown, Norberto Arguello, Jim Woody, Craig Eiland, Doug Lambert and Demby Snell.

(Continued from Page 1) problems in providing electricity to meet the needs of our customers," Hulsey added. "Certainly the needs of our customers in north central and west Texas are not different and have the same priority as the customers whom the cities of San Antonio, Austin and the others seek to serve with our gas supplies. We are committed to meet our customers' needs and we plan to vigorously defend our right to fuel supplies we own that are required to help fulfill that obligation."

"Texas Electric and the other two companies have for many years expended vast sums in developing fuel sources and generating capability for their customers' needs," Hulsey said. "This has included the purchase of specific gas reserves, construction and ownership of natural gas pipelines, and more recently, the expansion of oil storage capability. For some time we have had long range plans to diversify our fuel sources to lignite and nuclear and reduce our dependency on natural gas and oil. However, because of the long lead time required to plan and build plants that use these alternate fuels it will be many years before natural gas can be replaced as a major fuel supply in meeting our customers' needs for electricity."

Texas Electric Service Company provides electric power to customers in 47 north central and west Texas counties with a total population in excess of 1,200,000. The company serves Fort Worth, Arlington, Grand Prairie, Wichita Falls, Odessa, Midland, Big Spring, Sweetwater, Eastland and some 100 other cities, towns and communities.

Customers in a much larger area of Texas would be adversely affected, Hulsey noted, if the gas were not available to the three companies.

Together the companies serve 99 counties and some 320 municipalities with a combined population of approximately 4 million—more than one-third of all residents of the state of Texas.

Hulsey said that consideration of the matter by the Texas Railroad Commission is expected soon.

A time to think is as important as time to work.

Good Psychology

by Dr. Oswald Hoffmann

CHANGE YOUR PERSONAL PUBLIC RELATIONS

When someone knows you—whether you're a college student, small businessman, employee, whatever—that person attaches to you a definite, if unconscious, value. He has some feeling toward you.

Although techniques vary, principles dealing with people are pretty much the same. Here are ten ways to groom your public relations image that will pay off with interest:

1. You can construct the character of a man and his

age not only from what he does and says, but what he fails to do.

2. Estimate the score you give your public. Do you take suggestions as thinly disguised criticism? Do you consider any of your public distinctly inferior to you? Do you give a compliment as if you expect a receipt? If your answer to these is "Yes," you are almost sure that your score of them is mirrored in their score of you.

3. Be friendly.

4. Be neat.

5. Learn the basics of being a good host(ess).

6. Conversation is shared communication. So look a man right in the eye when he talks to you so that he knows that he has your undivided attention.

7. Say "Thanks."

8. Keep your word.

9. Watch your mannerisms.

10. Watch your p's and q's.

UTOPIA UNREACHABLE

Vice President Spiro Agnew, in an interview with Mr. Stewart Alsop of Newsweek, touched on one of the reasons why frustration and inflation have become the order of the day. He observed, "The greatest problem facing the country today is that we have become utopians. We are never satisfied with achievable, measurable gains. We insist on utopia." Mr. Agnew explains that the American attitude toward poverty is typical of this utopianism. No one is satisfied with the fact that there are now fewer poor people in the United States than ever before in any country's history. The goal is to abolish poverty, which is defined in Mr. Agnew's words as, "... a relative status. Not having what others have, or what most others have, is poverty." Utopia is an unattainable vision—like the end of the rainbow.

In striving to reach the unattainable, rather than being satisfied with "... measurable gains ..." the substance of national well-being—the integrity of government, the value of money, and basic principles of self-reliance—has been placed in jeopardy.

You can never tell from the way a woman smiles at you what she is thinking of you.

... Henson

(Continued from Page 1) of NMSC, said: "The high standing of Commended students in the Merit Program competition shows that they have great promise of continued success in college. Although Commended students advance no further in the Merit Scholarship competition, their attainment in this nationwide program deserves public recognition.

To increase their scholarship opportunities Commended students' names are reported to the colleges they named as their first and second choices when they took the PSAT-NMSQT in October 1972. The reports include home addresses, test scores, and anticipated college major and career intentions of the commended students.

... Ramirez

(Continued from Page 1) a daughter, Rosie Marie Ramirez; four brothers, Ramon Ramirez, Fidel Ramirez, Emilio Ramirez and Tony Ramirez; his mother, Mrs. Cruz Ramirez, all of Midland; and two sisters, Fausta Ramirez of Sacramento, Calif. and Mrs. Cruz Winger of California.

... Naming

(Continued from Page 1) of the contest she has been given the honor of naming one of Stanton's largest enterprises as well as the \$25 prize money awarded the winner by the Chamber of Commerce.

Drooping celery can be rejuvenated by trimming the butt ends and placing stalks in water.

AUSTIN — The chairman of the State Railroad Commission has issued a grim new warning that natural gas shortages will hit Texans hard this winter.

In a speech to Texas Mid-Continent Oil and Gas Association at Dallas, Chairman Jim Langdon said:

"Propane already is in short supply due to stockpiling to offset the natural gas shortage."

"As much as 500,000 barrels daily of distillate fuel oil will be needed from November to March."

"If distillate use is as high as predicted in the state, three to five times above normal, shipments to out-of-state consumers may have to be cut 50 per cent."

"Out-of-state commitments, mandatory federal allocations and other factors may require that Texans share proportionately in shortages."

"This means that Texas might not only be denied access to its total distillate needs, but that access to its normal requirements could be cut," said Langdon. "The gasoline supply-demand situation, as well as every other petroleum product, will experience shortages this winter."

Langdon recommended early construction of offshore deep-water ports to accommodate super-tankers from foreign countries and stepped-up development of domestic reserves of oil and gas (including shale oil and increased use of coal).

Meanwhile, only one major customer of Lo-Vaca Gathering Company, Lone Star Gas Company of Dallas, rejected

a Railroad Commission temporary rate increase — to 29.55 cents per 1,000 cubic feet — on natural gas delivered by the big Houston-based company to its customers around the state.

CREDIT INSURANCE CUT UNCERTAIN — Credit life insurance rates, which haven't been cut since 1968 in spite of reductions in losses, are going down, but it isn't certain how much.

Board statistics point to \$15 million to \$18 million overcharges annually.

TASK FORCE CREATED — Gov. Dolph Briscoe set up a multi-agency task force on youth care and rehabilitation to coordinate efforts at problem solving in the area.

Said Briscoe: "There is too much duplication of effort and overlapping of service; too much emphasis on institutionalization and not enough on prevention; not enough inter-lay between governmental agencies; not enough study to determine how to correct deficiencies; and too many cases of child abuse and neglect."

COURTS SPEAK — The Court of Criminal Appeals held unconstitutional a resentencing provision of the new law reducing marijuana penalties, designed to permit lighter sentences for those convicted under old statutes.

U. S. District Judge Jack Roberts directed the federal government to spend the entire \$11 billion appropriated by Congress to build water treatment plants. He granted a summary judgment sought by Texas.

The U. S. Supreme Court held Texas cannot hold back on giving prisoners credit for good behavior until their appeals are final. The decision affirmed a lower court finding that the system rewards prisoners while denying time credit to others.

AG OPINIONS — Atty. Gen. John Hill held cities can charge regulatory fees (but not taxes) on coin-operated amusement machines for children.

In other opinions, Hill concluded: "Appeals court judges must be paid at least \$1,000 a year more than state district judges; and courts of civil appeals judges must get at least \$1,000 less than State Supreme Court Justices."

An appraisal study on assets of a Houston rapid transit line can be withheld from public disclosure under an exception to the open records law because the city is negotiating for purchase of the company, and publicity may have a detrimental effect on the negotiating position of the governing body.

The chairman of the 1973 constitutional convention must be one of the 181 legislators who are delegates.

Golden Gleams

Let no man deceive you with vain words. —Ephesians 5:6.

A blow with a word strikes deeper than a blow with a sword. —Robert Burton.

Deliver your words not by number but by weight. —H. G. Bohn.

Words are the most powerful drug used by mankind. —Rudyard Kipling.

As fire is kindled by bel-lows, so is anger by words. —Thomas Fuller.

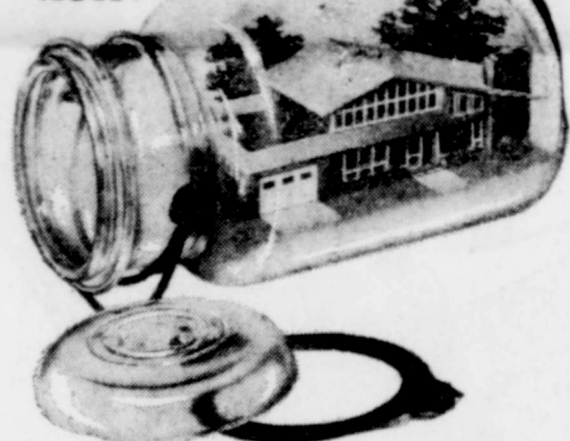

It is not of so much consequence what you say as how you say it. —Alexander Smith.

TO INFORM BUYERS

WASHINGTON—The three biggest American auto makers and eight major foreign car manufacturers have agreed to start telling buyers how much gasoline the cars will use, the Environmental Protection Agency said. It's about time.

"If anyone were to lie awake nights trying to think up ways to destroy a free enterprise system, he would surely conclude that fostering and promoting inflation would be his best and most secret weapon. Free civilizations tend to disintegrate as the citizens become bewildered, confused, frustrated, suspicious, and lose confidence in leadership. Inflation does all of these things in greater or lesser degree and makes it impossible for people to provide for their own security. Accordingly, they must look to government for even minimum maintenance." — Mr. John A. Florriaga, president of the United States National Bank of Oregon.
