Obituaries

Katherine Ann Jones
January 27, 1950 - February 3, 2014

Katherine (Pugh) Jones, 64, died peacefully in her home in Texhoma, Texas on Feb. 3, 2014.

Katherine was born in Guymon, OK on January 27, 1950 to Odell & Goldie Pugh. Katherine was a tomboy from the start and the son Odell never had. From raising cattle, breaking horses or rescuing orphaned dogs, cats, or birds, Katherine loved and cared for all animals. Katherine graduated from Texhoma High School, attended Texas Tech, and then graduated from the Nursing Program at Amarillo College in 1978. Her first husband was Fred Jonas. She met her soul mate, Bill Jones, in San Diego in 1980 and they married April 25, 1981 in Newport Beach, CA spending 22 loving years together. Katherine was an avid reader and relished a good mystery. She also inherited her Dad's love of "watching the (insert anything here) grow" and was happy with a shovel or many times a kitchen spoon in her hand, planting or weeding. She always had a kind word and smile for you and would readily give you the shirt off her back, the last five dollars in her pocket and, if you weren't careful, maybe a puppy or kitty too.

Katherine is survived by a son, Marvin Kitten of Overbrook, KS, daughter-in-law, Stephanie, and two grandsons, Aden and Xander, who became the joy of her life. Sisters, Pamela Brennaman (husband Doug, son John Barnes) of Springfield, MO and Jeannie Rosenbaum of Amarillo TX. Step-son, Bryan Keith Jones of Mohave Valley, Ariz.

Katherine was a member of the First Christian Church in Texhoma. Katherine was preceded in death by her parents and husband. Burial will be in the family plot at the Texhoma Texas Cemetery. The family suggests memorials go to Guymon Animal Shelter, 219 NW 4th St Guymon, OK 73942, (580) 338-6461.

SNACK PAK 4KIDS

Giving a Voice to Hungry Kids

We all know that there are children who have free breakfast and lunch provided for them at school Monday through Friday. Have you ever stopped to think what these children do for food on the weekends? Have you ever eaten lunch on Friday and then not had another actual meal until Monday morning? Can you imagine trying to listen to your teacher on Monday morning when all you can do is watch the clock and count the seconds until lunchtime? Unfortunately, there are children in Stratford and the surrounding towns in the Texas panhandle who face this struggle every weekend and during school holidays. Snack Pak 4 Kids is a program that provides food for children in these situations every weekend of the school year. 100% of all money is used for food only.

Natural Ways To Fight The Cold And Flu

(NAPS)—The flu is nothing to sneeze at: Between the extreme body aches, chills and high temperatures, the flu threatens your well-being. According to the U.S. Centers for Disease Control and Prevention, 5 to 20 percent of Americans come down with it each year, hospitalizing more than 200,000—but there are ways to keep yourself and your family out of such statistics this season.

How the Cold and Flu Are Spread

The cold and flu are spread mainly by the germs released when someone already infected coughs, sneezes or speaks. A single sneeze can send 100,000 germs into the air, allowing virus droplets to land in the mouths or noses of people up to six feet away. The cold or flu might also be contracted by touching something that has the virus on it and then touching the mouth or nose. A person may be able to pass the cold or flu to someone else before he or she begins to notice symptoms, which typically appear one to four days after the virus enters the body. That means people can spread the virus a day before they know they have it and up to seven days after symptoms start.

Flu symptoms often include fever, chills, cough, sore throat, runny or stuffy nose, muscle or body aches, headaches, fatigue, vomiting and diarrhea.

The Pharmacist's Prevention Advice

To avoid falling victim to the cold and flu, follow these tips from author and syndicated columnist Suzy Cohen, RPh, known as America's Pharmacist:

• **Prepare your body in advance.** Get your annual flu vaccination. Supplements such as vitamins C and D and probiotics may help boost your immune system before an infection sets in.

• **Keep clean.** Viruses can also live on surfaces for two to eight hours or longer outside the body, so frequent hand washing is one of the best ways to avoid getting sick and spreading illness.

• **Control stress.** Stress weakens the immune system. To prevent additional immune suppression, an ample amount of rest is also needed.

Suzy Cohen, "America's Pharmacist," says there are natural ways to fight flu symptoms.

What To Do if the Cold or Flu Still Gets You

"Arming people with a new approach to cold and flu relief specifically designed to target points of virus entry—the throat and nose—can provide protection when those around them are not feeling well. In addition, it can help anyone who's already feeling the onset of symptoms," says Cohen.

Many individuals get relief from a nonprescription, homeopathic spray such as FluNada, designed to inhibit replication of cold and flu viruses by coating the nasal and throat pathways. It was developed by a physician and a pharmacist looking to close the gap between vaccines for influenza prevention and anti-viral medication for treatment.

The zinc-free formula contains a blend of safe and natural homeopathic ingredients—including elderberry, mint, eucalyptus and gaultheria—which are endorsed by the Homeopathic Pharmacopoeia and recognized by the U.S. Food and Drug Administration.

How To Use It

FluNada may be used by adults and children over the age of 4 at the first sign of symptoms. Simply spray it three times to the throat and once in each nostril, four times daily for up to five days.
