## July Fourth Traffic Count . . . 1966?

What will this July Fourth bring traffic-wise? If it is similar to the ones in the past it will be deadly, injurious, and destructive. Our forefathers thought back in 1776 after declaring Independence that future generations would be free from wanton deaths and destruction. However, they were greatly mistakn to what the future would bring. During the last 190 years since our nation declared its Independence there have been eight major wars claiming 1,130,393 American lives. The automobile has been in existence for about 65 years claiming 1,559,950 lives. Thus, the battlefield has been a safer place than the "homefront."

The 1965 July Fourth holidays covered a period of three days in which there were 19 persons killed and 372 persons injured in rural traffic accidents in Texas. The 19 persons killed were involved in 14 fatal accidents. These fatal accidents involved 21 hazardous violations and one pedestrian violation. The 372 persons injured were involved in 178 injury accidents. The injury accidents involved 167 hazardous violations and 11 vehicle defects. There were 305 property damage accidents involving 344 hazardous violations, 28 vehicle defects, and one pedestrian violation.

On the rural highways in this DPS Region there was one fatal traffic accident claiming one human life. This fatal accident involved two hazardous violations. These injury accidents involved 19 hazardous violations and four vehicle defects. There were 51 property damage accidents involving 40 hazardous violations and two vehicle defects.

Remember-Alcohol and Gasoline don't mix.

## REPEALING HUMAN NATURE

. . . . . .

Right now, the United States is busily engaged in the creation of the most gigantic structure of public welfare that the world has ever seen. The resources which we have at hand to turn over to government for distribution to groups of citizens entitled to benefits under ever-broadening welfare legislation are immense. Of course, all this wealth was created under a different philosophy which put a premium on individual initiative and provided the incentive of rewarding the productive people and enterprises.

The history of this country should have demonstrated one fact: That all men simply are not equal, never were and never will be. An editorial in the Colorado Trumpet and the Public Ledger points are created equal, but it says nothing about the duty of a government to maintain citizens at an equal level thereafter." A good example of welfare state "equality" is provided by the following: "Two families living side-by-side are a dramatic example of government favortism. The one with an income of \$3,100 a year is entitled to special tutors and medical checkups for their four to six year old children, summer jobs or free summer seminars on college campuses for their high school kids, and Youth Corps benefits for the school dropouts. They reap numerous other special privileges as well, but the family next door with an income of \$3,300 a year gets nothing.

As taxes go up and dollars go down in value, it becomes more and more apparent that the super-welfare state may bankrupt us, but it cannot ever make us equal ... except perhaps in the sharing of universal national poverty

BOOST YOUR CATCH BY MAKING A POLARIZING POLARIZING SUNGLASSES SUNGLASSES 26p ALL IT TAKES IS A GOOD PAIR OF SUNGLASSES WITH POLARIZING LENSES TO ELIMINATE REFLECTED GLARE

> Like every angler who has ever wet a line, you probably dream about finding a wonderful transparent lake or pond where you can actually see right through the water and all but lift the fish you want right

onto your hook.

The problem, of course, is to turn the shiny mirror-like surface of the water into a ginclear "window" which will enable you to see your catch below. It sounds impossible, but is not as difficult as you might think. All it takes is a good pair of sunglasses equipped with polarizing lenses to elimi-hate the reflected glare. When the sun strikes the sur-

face at an angle, most of the light rays bounce off the water and produce a phenomenon called "linearly polarized light." This is more commonly known as reflected glare. Instead of the water appear-

ing as a semi-transparent medium, the reflected glare gives its surface a shiny, unpenetra-ble sheen much like the blind-ing reflections off a mirror. The float on your line, your hook under water, the approaching fish - all disappear behind a screen of harsh and annoying brilliance.

It doesn't have to be that

way. That blinding sheen is eliminated from your view if you are looking through polarizing lenses. While ordinary sunglasses only darken the glare, the polarizing lenses in Cool-Ray Polaroid Sunglasses wipe

out up to 98 per cent of it.

The molecules in Cool-Ray
Polaroid lenses are arranged, Polaroid lenses are arranged, so that they at like a row of invisible vertical bars. When reflected glare, which vibrates horizontally as it comes toward your eyes, meets the invisible molecular "picket fence," it is stopped dead.

Only the useful light reaches your eyes, so you see clearly and without strain. The annoying sheen is eliminated and you

ing sheen is eliminated and you can actually see beneath the surface of the water.

Choose your sunglasses with care, and they may help boost your catch. And, if the fish just aren't biting, at least you'll see comfortably.

### Mrs. Quattlebaum Back Home After 18-Day Vacation

Mrs. Alyce Quattlebaum has returned from an 18-day vacation in Arizona. Accompanied by Mrs. Kay Davidson, she enplaned a Continental Air Lines "Golden Jet" at Lubbock and flew to Phoenix where they were the guests in the home of their son and daughter, the Billy Davidsons of Scottsdale.

They visited several points of interest including the Frank Lloyd Wright designed Grady Gammage Auditorium on the campus of Arizona State University in Tempe, the Mormon Temple and gardens in Mesa, the beautiful red rocks at Sedona, Indians ruin at Montezuma Castle and Cast Grande National Monument as well as movie sets in Old Tucson. Evenings were spent in sampling the offerings of the cafes and restaurants, including Paul Shank's Safari in Scottsdale and shopping in the air conditioned malls.

Quattlebaum especially enjoyed picking citrus fruits from the trees. Another highlight was the Scottsdale Wax Museum where recent additions of Barry Goldwater, President Johnson, the late President and Mrs. John F. Kennedy vie with the reproduction of the shooting of Lee Harvey Oswald by Jack

### Naomi SS Class Meets In Home of Mrs. Jno. Payne

Naomi Sunday School Class of the First Baptist Church met in the home of Mrs. John P. Payne, Monday night, June 27, for their regular monthly busi-ness and social meeting.

The meeting was called to order by Mrs. Opal Adkins, president. Opening prayer was given by Miss Betty Jo Clanton. The devotional for the evening was brought by Miss Nettie McCollum, using as her subject "The Giants In Our Life." She stated we have giants in our church ed we have giants in our church as Christians, lack of faith, lack courage and temptation. The question is what to do with these giants. Miss McCollum then related the story of David and Goliath in the Bible and how David overcame Goliath, not by his own strength, but by faith in God. He fought with the whole armor of God. Some of the special stones we need to take to battle with us today are faith, respect, humility, sincer-ity and preparedness. Miss Mc-Collum's devotional was an inspiration to all present.

Refreshments of punch and sandwiches were served to the following members: M mes. Opal Adkins, Claudia Mae Bland, Catherine Schwartz, Ruby Smith, Aleene Wheatley, Ethel Lou Shelton, Grace McKelvain, Mrs. Jno. P. Payne, Clara Biard, Elsey Eastland, Misses Nettie McCollum and Betty, Jo Clarton

# Luther League Willow Cemetery

The Luther League (youth group) of Trinity Lutheran Church held their meeting on Wednesday, June 22, at Willow Cemetery to discuss the topic "Death."

Some discussion centered around the misconception that
man is divided into two entities
such as the body and the soul
and that the body is the "prison
house of the soul." Once a person dies the soul is freed and
departs the body to enter heaven. The proper thinking is that ven. The proper thinking is that man is a "total-unit-body-soul." When man dies all of him dies, Scripture teaches the resurrection of the body and not the immortality of the soul. Some further discussion centered about "what is heaven?" is it a place or a state of mind? However, death involves more

than biological extinction. Death

is a very presence and power in our lives and it is seen in such

# Tuesday Night

Luther Leaguers of the Trinity Lutheran Church were in Abilene Tuesday night at the Hardin-Simmons University Theatre viewing "For Heaven's Sake," a controversial comedy review dealing with the emo-tions expressed by many church members toward effective wit-

The medieval theatre grew from a rebirth of interest in the church-related possibilities of the drama. The plays first in the church, later in the streets of the town, were given in a series of adjacent sets called "Mansions." This "simultaneous staging" allowed for a continuous presentation of scenes, without the use of devices to divide scenes for set changes. It was customary to place "the church" Heaven on the left and the "military defense headquarters (hell)" on the right, and buildings in between that represented the homes and businesses of the people of the town.

This review places in a contemporary context the question of the relatedness of our Christianity and points to some significant problems therein.

Those attending were Pamela Druesedow, Linda Klose, Pat O'Keefe, Delores Peiser, Galen Peiser, Alvin Schmidt, David Fischer, Deborah Grogan, Al Johannes, Kathy Moeller, Clara Fischer and Verlene Rueffer.

Rolling Plains: Thrips infes-tations have decreased during the past week. Cotton plants seem to be outgrowing damage caused by these pests earlier in most counties. Medium infestations of thrips were reported from fields in Haskell, Throck-morton, Hall, Nolan and Jones counties. Slight aphid infestations were found in many fields in the area, Reports of medium infestations came from two fields in Taylor County. Fleahopper activity has increased during the past week. A few fields reported economically important infestations in several counties in this area. Over-wintering populations of boll weevils were reported from fields in Haskell, Stonewall, Hardeman, Wilbarger, Wichita, Scurry, Baylor, Taylor, Nolan and Callahan counties. These reports ranged from 50 to 75 weevils per acre. Reports of 131 and 196 overwintering weevils were received from fields in Mitchell and Tom Green counties. Bollworm eggs have been reported from fields in several Rolling Plains counties with two young bollworms being reported in one field in Cottle County. Infestations of cabbage loopers have been reported in fields in Shackelford, Jones, Wichita, Wilbarger, Hardeman, Foard, Runnels, Throckmorton, Chil-dress and Cottle counties.

### Research On Durability Of Fitted Sheets

Next time you go shopping to buy new fitted cotton sheets, here's a suggestion that will relaxing and enjoyable week-end at Ramada Inn, 2121 Allen Parkway, Houston, Texas. Friday through Sunday was spent at the lovely modern mohelp you pick a long-wearing style and save you money. According to recent tests

made by the American Institute of Laundering, fitted bottom sheets with elastic sewn into the corners wear longer than those fitted cotton sheets with non-elastic corners, says Mrs. Jane Berry, Texas A&M University specialist in housing and home furnishings.

In the research tests, sheet with elastic corners were used and washed for 52 weeks with no repair needed. Fitted sheets with non-elastic corners had to The Kirkpatricks express their appreciation to the mer-chants of Haskell who partici-pated in the Free Press and be repaired after only 21 weeks of use. Both types of sheets were of comparable quality materials.

Mrs. Berry explained that the fitted bottom sheets usually do not last as long as flat sheets which can be rotated to distribute the wear more evenly. Other factors to consider when shopping for sheets are the various qualities of fabric

included in the sheets. It may be more economical to purchase the better quality sheet at slightly higher cost than to attempt to economize on the price, the specialist adds.

od of recording information on distance telephone calls will be placed in effect this month in General Telephone Company of the Southwest's Seymour long distance center.

Called 'mark sense' ticketing, the new procedure is described by General's Seymour district manager, F. A. Robinette, as "...a purely automatic operation once it has passed from the operator's hands.

"Although the improvements realized through the new method are not visibly apparent to the customer, this change represents a much faster, more reliable and efficient means of recording information on long distance calls," Robinette said Using specially treated graph-

ite lead pencils, operators record information such as the area code, the called number and the calling number, whether the call is station-to-station, person-toperson, collect, etc., on elaborately designed tickets which include scores of boxes or "bubbles." This new method requires use of the area code," Robinette explained, "and it eliminated the need for giving the name of the town called.

The tickets are shipped daily to General's revenue accounting center in San Angelo where they are fed into IBM machinery which convert the data in-to punched cards, then tapes, and finally into printed information to be included in the customer's monthly bill. The function of rating calls is also performed automatically, eliminat-ing the possibility of human error, Robinette added.

The billing equipment includes an "editing unit" which automatically sorts out tickets

# Rotarians Learn **About Cemetery** Endowments

Judge Ben Charlie Chapman spoke to members of the Rotary Club concerning the Willow Cemetery Endowment Trust Fund at last Thursday's noonday luncheon meeting at Felker's Restaurant dining room.

Roy Johnson was in charge of the program and introduced the guest speaker.

Judge Chapman explained to Rotarians how the Willow Ceme-Endowment Trust Fund worked and the fact that care for the cemetery in Haskell had been done without having to ask for donations from time to

is hoped that everyone having lots in the cemetery will take part in the trust fund in order that we may have per-petual care. The Endowment fund has grown in the past 20 years to the point where it furnishes a big part of the expense in caring for the ceme-tery," Judge Chapman said,

'It is hoped that others may see the need of the trust fund in order that the entire cemetery will be cared for." guest speaker said.

There is over \$100,000 00 in the endowment fund, and the interest from this investment furnishes some \$6,000 per year, but it will take almost twice as much endowment as we now have in order to care for the entire cemetery," Judge Chap-

R. C. Couch, Sr., was a guest Thursday's meeting. Abe Turner was presented by Rotarian Johnson for membership in the club, Membership card and pin, with books and pamphlets on Rotary, was presented Mr. Turner.

Rotarians voted to take care of the Anderson Park near the hospital. Four men will be appointed every two weeks for this responsibility.

Crowell, Goree, Haskell, Knox City, Munday, Rochester, Rule, Throckmorton and Weinert. Long distance calls originating and terminating in the commu-nities of Elbert, Foard City. Thalia and Truscott...which are served by area telephone coop eratives ... are also handled through the Seymour traffic center. A total of 42 traffic people are employed in General's Seymour toll center, including the company's traffic supervis-or, Mrs. Thelma Bailey.

"The average number of long distance calls handled in our Seymour traffic center has increased tremendously during the past few years, Mrs. Bailey stated.

Five years ago we were handling around 2,200 long distance calls per average business day, whereas today the average is running close to 3,000." Robinette pointed out that the influx of calls requires constant

### Asperment Shows Appreciation To Local Riding Club

The Haskell County Sheriff's Posse was in Aspermont last Thursday serving as host club and to set the pivots at the ro-deo, but did not compete for honors; however, in appreciation of the Haskell Club's services. Aspermont awarded the Haskell County Sheriff's Posse a nice trophy.

Next trip for the local club is

to Stamford July 1, 2 and 4. They will ride in the parade and serve as host club, but will not be competing for honors

study to determine faster, more workable means of handling long distance messages. Oper ating improvements such as mark sense ticketing also nec-essitates additional training for supervisors and operators.

"Our operator force has been preparing for conversion to the mark sense method for several months," Robinette explained. Robinette also explained that using this new method the most efficient way to place a long distance call is to give the operator this information and in this order...Area Code, called number, called party (if person-to-person). Wait...'till the operator asks for your number, give your name only if the operator

asks for it. It will no longer be necessary disc plow, r to give the operator the name the town you are calling if phone 2461, Three you can furnish the area code
