School Bells Ring-Out Tuesday As Haskell's Fall Term Begins

Bells (not exactly freedom bells) will ring-out Tuesday morning, September 6, as the Haskell schools will begin the 1966-67 term.

With the completion of registration Monday and Tuesday of this week, doors will swing open at the halls of learning, next Tuesday, marking the 82nd session.

The high school faculty will meet Friday, September 2, at 9:00 a. m. Elementary faculty will meet this morning, Thursday, September 1, at 9:30 in the Elementary School.

Superintendent H. T. Wilkinson released the teacher placement list to the Free Press for publication in the August 18th edition and everything is in readiness for the official opening.

W. P. McCollum is high school principal; Hubert Bell, Junior High principal and Gerald McCoy, Elementary principal.

The fall term this year opens one week later than last year, giving students an extra week for their summer vacation period.

So, it's back to 'readin', 'ritin' and 'rithmetic (if you will pardon the pun), come next Tuesday...

The Haskell High School Indians, under the reins of head coach Sonny Everett, began working-out Monday, August 15, for the grid-iron season which is about ready to be kicked-off.

With some 30 practice sessions under their belts by the time school opens, the Indians should be in good shape for their first game of the new season, (a non-conference affair), Friday night, Sept. 9th, when they hit the road to go up against the Childress "11" at 8 p. m. in Fair Park Stadium.

As usual the loaded and pickers' place of Baylor Bears on the road is too surprising. Hogs 'hog it' as head coach says in interviews to go out and die.

Haskell Jaycees To Man Labor Day Rest Stop

James Franklin, president, announced that the Haskell Jaycees will participate for the sixth straight year in a Texas Jaycees-sponsored Labor Day weekend safety project, "Operation Rest Stop," and will keep vigil again here this weekend to provide a "coffee break" and other refreshments of cookies and cold drinks for fatigued motorists passing this way.

Rest Stop Chairman Charles Thornhill, said that the Jaycee operation in Haskell will be set-up on the northwest corner of the courthouse square at the intersection of U. S. Highway 277 and State Highway 24.

Thornhill said that signs will be placed on each of the four approaches, north, south, east and west to the "Operation Rest Stop," and local Jaycees anticipate a steady job of dispensing hospitality, as has been their experience in previous Labor Day Weekend Projects.

Diane Hester Completes Speech Workshop Course

Diane Hester, daughter of Mr. and Mrs. Ira Hester, of Haskell, was among the more than forty students attending the Fifth Annual High School Workshop in Speech which has just completed another successful season at the Department of Speech at the University of Texas, Austin.

During the four weeks of intensive activity the students attended morning lectures in Debate, Informative and Persuasive Speaking, Poetry and Prose Interpretation. In the afternoons the students went into workshop groups where they participated in laboratory experimentation with the subjects taught in the lecture.

Students also participated in television recording sessions where they were able to view their performances immediately after the activity. The last week of the workshop was spent with students competing in a sample tournament. This gave the members a chance to test their learning in simulated contest conditions. In addition to the learning activities the students were able to make field trips to summer events in the Austin area.

Dog Owners Are Warned

A number of complaints have been received by City Chief of Police Tom Paul Barnett that a large number of dogs are running at-large in Haskell.

Owners are warned that even if the dogs are tagged the pets should be kept from roaming around town destroying property and inconveniencing their neighbors.

Heavy Rains Hit Haskell Early Tuesday Morning

Rain that fell Tuesday morning brought Haskell its heaviest downpour in several years, flooding streets with curb high water in practically all sections of town.

Sam Herren, official observer for the Government, said that precipitation was 5.06 inches morning. Previously 1.25 inches had been measured from the early Monday morning rain, for a total of 6.31 inches.

Spring Creek, which runs southwest through Haskell, overflowed and blocked several streets in that section of town. The downpour left portions of two major highways and several farm-to-market roads impassable Tuesday night, although no rain had fallen since 8:00 a. m. that day.

Highway Patrol Sgt. Frank Jirek said traffic was still being re-routed late Tuesday on State Highway 283 between Rule and Rochester, and on State Highway 24 east of Rule. Several rural families living on or near farm-to-market roads in the northwest part of the county were stranded.

The Pete Amaro family, residing at 106 South Avenue F in a three-room house owned by Mrs. Edith McClain, was evacuated from their home shortly before dawn Tuesday as the flood waters rose four inches deep in their house.

Better than five inches fell at Weinert Tuesday morning, bringing the overall total there to eight inches.

Mrs. O. W. Vaughn, Free Press Correspondent from Weinert, said that school at Weinert was not held Tuesday due to high water. Buses were unable to make their runs.

Rochester received a total of 10.30 inches; O'Brien 6.70 and Rule 2.70.

May, June and July were very dry months here, but rains this month turned August into a "wet one" moisture-wise, as rains varying from light to heavy have fallen off and on all through August.

August rains produced 1.05 on the 7th; .48 on the 10th; a half-inch on the 13th; .03 on the 21st; .02 on the 23rd; .76 on the 24th; 1.25 on the 29th, and 5.06, the 30th.

BACK FROM COLORADO

Mrs. Bob Herren and Mrs. W. O. Holden returned home on Tuesday night from a three-weeks' vacation at Friendship Cottage, Estes Park, Colorado.

The date is also a holiday for the Haskell National Bank, State Highway Department and all Government agency offices here.

All offices in the courthouse will also be closed.

Opening day of the new term for Haskell Public Schools has been deferred until Tuesday, September 6, because of the Labor Day holiday, Supt. H. T. Wilkinson announced.

No program will be observed locally in connection with the holiday, and the day will likely see many Haskellites fishing, golfing, picnicking at recreation spots in this area.

The 1966 Indian team, Coach Everett said, is placed third by the experts in their 5AA schedule.

Coach Everett praised the '66 Indians and pointed out that only 20 boys were on the Varsity team, but they are all hustlers.

"Competition in 5AA this year as has always been, will be tough," Coach Everett said.

"We teach the football players proper health and diet habits, how to budget their time, how to work with others, leadership, to control tempers, to make sacrifices and how to keep mentally and physically fit," Coach Everett said.

"Sports help the boys scholastically also because a player must maintain passing grades," Everett pointed out.

SCHOOL DAYS ARE BACK

All good things must come to an end...at least temporarily. And so it is, as the long school summer holiday draws to a close. Very shortly, millions of youngsters will be shouldering their school books once again. Other millions will see the inside of a schoolroom for the first time when school opens this fall.

While it is true that an educated man does not get all his education in the classroom, the fact remains that formal education is the foundation and best hope of civilization. Education is the seed bed of tolerance and understanding. It is the source of progress in every field of human endeavor.

Tomorrow's astronauts, engineers, scientists, technicians, men of medicine and the arts and business will be trudging back to the halls of learning, as the crisp days of autumn approach. Their return is an omen of a steady advance toward a better life.

FACTS ABOUT MEDICARE

Q. I have already run up a doctor bill of more than \$50 since medicare started with my family doctor. My doctor now suggests that I should see a specialist. Do I also have to have a bill of at least \$50 with the specialist before medicare will start to pay toward his bill?

A. No. You pay the \$50 deductible under the medical insurance plan only once a year. As soon as your covered medical expenses go over \$50, your medical insurance will pay 80 percent of the reasonable charges for all additional covered services for the rest of the year.

You can put in a claim for medical insurance as soon as you have any bills for covered services, but most people will prefer to wait until their bills go over \$50, because no payment can be made until then.

When you put in a claim, you will receive a notice that will show you met the \$50 deductible, or how much of the deductible you have incurred. You can show this notice to doctors and others from whom you subsequently receive medical treatment that is covered under the medical insurance plan.

Q. What other types of services are covered under the medical insurance plan?

A. Diagnostic X-ray and laboratory tests, electrocardiograms, basal metabolism readings, electroencephalograms, and other diagnostic tests; X-ray, radium and radioactive isotope therapy; Ambulance services where normal transportation would endanger health; Surgical dressings and splints and other devices for reduction of fractures and dislocations; Rental of medical equipment such as iron lungs, oxygen tanks and wheel chairs to be used in the patient's home; Prosthetic devices, such as artificial legs, braces and replacements for all or part of an internal body organ.

ATTENTION FARMERS AND RANCHERS

Farmers and ranchmen will not file a claim for refund of federal tax on gasoline used on their farm and/or ranch as they have done in past year. Instead, the refund of Federal tax on gasoline used on or after July 1, 1965, must be claimed as a credit on their annual income tax return according to County Agent Robert W. Schumann.

This credit will first be taken on the return for the first full tax year beginning after June 30, 1965. If the return is filed on a calendar year basis, the credit for gasoline tax refund taken on their 1966 return will include the tax on gasoline used in the period from July 1, 1965 through December 31, 1966.

Schumann says that the refund is claimed as credit in a manner similar to the credit for tax withheld on wages.

The Good Earth

by MRS. B. F. COBB

My, how the "Good Earth" has soaked up these nice slow showers of the last few days.

I stood at the door as it rained and watched wilted, droopy plants raise their foliage toward the sky, as if in thanks to God, for the life-giving moisture.

Although we didn't get any tank-filling rains, there should be enough moisture to help mature cotton and give fall maize a big boost. September, October and November are all good months for rooting cuttings. Althea, crape myrtle, photinia, roses and all hedge plants root well in the cool fall months.

I like to put my cuttings into the soil where I want them to remain. Plants rooted in the fall should be given winter protection.

When a twig will snap in the hand like a snap bean it is just right for a cutting. Always use this year's growth for quick-rooting results.

Cuttings six to eight inches long are just right for rooting. Cut the twig straight across at the base and cut out a small one-inch sliver out of the side, starting at the base. Dip the cutting into a rooting medium and put into the soil where you wish the plant to remain.

Forty-six ounce juice cans, with both ends cut out and the top mashed almost together, makes nice green houses to protect the newly rooted plant through the cold winter months.

Careful attention should be paid the cuttings through dry periods. Never let the soil get hard and dry. The ground must be damp and soft to accommodate the tiny new roots. Watering once every two weeks through dry winter months is usually sufficient.

A good plastic greenhouse, for house plants can be made from two quart freezing bags. Take brown fibrous peat moss and sift it through a coarse screen to remove any rough twigs or stems. Add 1 part clean white sand to two parts peat. Water mixture until a few drops will squeeze out when pressed. Firm about 4 inches of this rooting medium into the bottom of the plastic sack. Prepare cuttings same as far outdoors. Trim off lower leaves, insert the cutting two inches into the rooting medium. Be sure the sack is free of holes. Fasten the top of the bag and gently set it in a window where light, but no sun, enters. After six to eight weeks roots should appear.

Harden the cuttings, after they root, by opening the bag a few times each day for a few days. Set the rooted plant in the desired pot.

Do not forget to exhibit something in the Haskell Show Case provided by the Haskell Garden Club in their flower show at the Haskell County Fair.

RETURN HOME Mrs. Letha Carter and Teresa of Coahoma have returned home after spending a month with their parents, and grandparents, Mr. and Mrs. Coyt Hix, O'Brien.

Area Residents Invited To Take Peace Corps Test

Haskell area residents interested in putting their skills to use in developing nations around the world are invited to take the Peace Corps placement test at 9 a. m. on Saturday, September 10, at Abilene, Room 2201, New Post Office Bldg.

The Peace Corps uses the placement test to determine how an applicant can best be utilized overseas. The test measures general aptitude and the ability to learn a language, not education or achievement. (If test scores indicate a limited language-learning ability, for example, the Peace Corps tries to place the applicant in an English-speaking country.) The placement test requires no preparation and is non-competitive--an applicant can neither pass nor fail.

The application form, not the placement test, is the most important factor in the selection of Volunteers. Persons interested in serving in the Peace Corps must fill out an application, if they have not already done so, and present it to the tester before taking the test. Applications may be obtained from local post offices or from the Peace Corps, Washington, D. C. 20525.

The placement test takes about an hour and a half.

mand, that producers wishing a price support program would have to cooperate in acreage reduction regulations and that there was little chance of any changes in present skiprow regulations.

Mr. Emory Boring, area entomologist, gave a report on the insect survey work just completed and explained the value of the survey for control and eradication work in the future.

Mr. Earl Younts of the National Cotton Council gave an interesting comparison of the markets of synthetics and cotton at the present and told of plans for cotton promotion which will begin this fall through national magazine advertising.

Charles Stenholm, executive vice president of the RPCG, gave a resume of the work accomplished the past year and plans for the coming year. Bob Hartgrave, CPA, gave a report on the 1966 audit which showed a net income of \$30,686.44 for the fiscal year against expenses of \$36,709.49, showing a loss of \$6,023.05.

Following a complete explanation of the Research and Promotion Act, the president called for a vote on complete support

of the Act, which vote was unanimous by the members present.

A meeting of Directors was held following the members meeting at which time the Directors discussed and approved setting up 10 districts in the 31 counties based on comparative production bases, increasing the number of directors from seven to 10. In the re-organization session, Mr. J. B. Cooper, Jr., of Roscoe, was re-elected president, Johnny Hansen, of Avoca, was re-elected secretary, and Neuman Smith, of Ballinger, was elected vice president, to succeed S. N. Reed, of O'Brien.

The following directors were elected: Paul Montgomery, of Memphis, Dist. 1; Joe Liles, of Childress, Dist. 2; L. H. Wall, of Vernon, Dist. 3; Sammy White, of Knox City, Dist. 4; J. T. Odell, of Woodson, Dist. 5; Johnny Hansen, Dist. 6; Ross Hargrove, Colorado City, Dist. 7; J. B. Cooper, Jr., Dist. 8; Neuman Smith, Dist. 9, and R. O. Verner, of Miles, Dist. 10.

Mr. Stenholm announced that he and Mr. Cooper would attend the hearing on the Research and Promotion Act in Dallas on Thursday to testify in approval of the bill for the RPCG.

The Many Bleaches On The Market Today Often Confuse Homemaker

The many household bleaches on the market today often confuse the homemaker, says Mrs. Barbara M. Elliott, Home Demonstration Agent.

There are two main types of bleaches. The chlorine type comes in liquid or dry form, and the oxygen type is a dry form labeled potassium monopersulfate or sodium perborate compound.

Read the labels carefully to tell the differences between dry chlorine and dry oxygen bleach. Oxygen bleach is safe for all fabrics. Dry chlorine bleach should not be used on silk, wool or non-colorfast fabrics. Water softeners, fabric brighteners, and detergents can be added to dry bleaches. This is not possible with a liquid bleach.

After reading the directions on the bleach package, measure the amount you need accurately, using a standard measuring cup. Chlorine bleach should be diluted before it is added to the wash. If there is any doubt about colorfastness, don't pour dry bleach directly on clothes.

Liquid bleach can be added to wash water in two ways. Pour the measured bleach into the water while the tub is still filling, before the clothes are added, or dilute the measured bleach in a quart of water first, and add it to the wash load after agitation has started. If the bleach is poured directly on the fabric without being diluted, fabric damage will result. This damage may or may not show up immediately.

Many washer manufacturers have simplified the process of adding bleach by providing automatic bleach dispensers. Some allow the bleach to be added at the proper time during the washing process and in correct amounts.

The bleaches which come in packet or tablet form enable you to add the correct amount of bleach without having to measure. Directions should be followed carefully since all packets or tablets are not the same.

Chlorine bleaches get rid of hard-to-remove soil on collars, cuffs, underwear and pillowcases. They whiten clothes and serve as an effective disinfectant.

Dry oxygen bleaches which can be used on fine fabrics are more effective in keeping things white if they are used regularly and in the hottest water the fabric can stand. The potassium monopersulfate bleaches perform well in warm water, so they can be used on silk and wool which should be washed in

VA Questions And Answers

Editor's Note: Veterans and their families are asking thousands of questions concerning the benefits their Government provides for them through Veterans Administration. Below are some representative queries. Additional information may be obtained at any VA office.

Q—I have been told that I am not eligible for treatment at a VA hospital for my non-service-connected disability because my military service was in a so-called peacetime period and was not considered wartime service. Is this correct?

A—If you were separated with other than a dishonorable discharge anytime after January 31, 1955, you are eligible for all medical, hospital and domiciliary benefits to which veterans with war-time service are entitled, and on the same priority with war-time veterans.

Q—My son enlisted in the Air Force in 1955. Shortly after he was in they did away with the G. I. Bill. When he was dis-

charged after four years he decided to go to college, and with our help and working himself, he graduated in 1960. It was a struggle. Now the G. I. Bill is back. What he would like to know is can he get a loan on the bill to start him in business? Two or three thousand dollars would help him a great deal.

A—Loans may be made only for the purchase of homes; to make alterations, repairs or improvements in homes already owned and occupied; to purchase farms or farm supplies or equipment; to obtain farm working capital; or to refinance delinquent indebtedness on property to be used or occupied by the veteran as a home or for farming purposes. The post-Korean G. I. Bill does not authorize business loans.

Q—Several people have told me that my husband, a World War II veteran now deceased, is entitled to a marker on his grave site stating he was a veteran. Could you give me any information on this matter?

A—Headstones or grave markers are available for any de-

ceased veteran of wartime or peacetime service whose last period of service was terminated honorably by death or discharge. If you desire a headstone or grave marker you may contact the nearest VA office, which will provide an application and assistance in filing. If you mean a marker in which the service organizations place flags on Memorial and Veterans Day, contact the service organization to which your husband belonged.
