A TIME FOR CAUTION

What has happened to the federal budget?

One primary reason, as financial writer Sylvia Porter points out, "...is the simple fact that Congress has been substantially increasing the costs of non-military programs requested by the President...has voted outlays running hundreds of millions of dollars above what the administration asked for programs ranging from public works and poverty to housing and aid to schools."

It is true, as Miss Porter also writes, that the budget when measured as a percentage of the Gross National Product, which is the total value of all the goods and services we produce, is lower than in the past. That is to be expected in boom times. And there are those who look for no decline in economic expansion in

It is argued, even if there is some economic letdown, the government can take care of it by pump priming. But history also illustrates the dangers that lie in that kind of optimism. We could at the rate we are going, run head on into deficit situation of such sity in various cities in Texas monumental proportions as to be disastrous. If ever there was a time for caution...fiscal caution...this is it.

TAX MAN SAM SEZ:

Internal Revenue usually hires applicants with a college degree in the appropriate field. These new employees are sent to school to learn how to be a tax man, but this doesn't end their education. During a tax employee's career he has to go to school many times. Internal Revenue wants all their employees to know how to do the tax job right. It takes a lot of study to be a good tax man, but most of us taxpayers won't even read the instructions.

You can save tax dollars by following the tax people's example and studying your tax instructions this year.

Fire destroyed our building at 512 North First Street about two weeks ago and we are now open for business at our new location, 510 South First Street, through the generosity of Bailey Toliver Chevrolet Company.

510 SOUTH FIRST STREET

We have new merchandise coming in daily including new Zenith radios, black and white T. V., as well as Zenith Handcrafted color T. V.'s record players, stereos and appliances.

Our service department is in charge of Boyd Rousseau. We have all new test and service equipment. When we get back in our newly remodeled building, we will have the best equipment obtainable.

We are cleaning all merchandise damaged by fire, smoke and water, and pricing it 'way down. Some hardly damaged at all, but all prices are down.

We have really taken a beating but hope to get started rebuilding within a week.

It taught us one thing and that is that we have a lot of friends and faithful customers. Everyone, almost without exception, has been very kind and helpful.

We went down but got up before the count of three and are looking to the future.
