#### LET'S TALK ABOUT THE BAND

Recently there has been some difficulty in securing arrangements for the band at the events which are of major importance. The organization has been one of the outstanding achievements in Burkburnett for several years. The honors that it has won, the many public appearances, would come out, and for months and its willingness to serve at the personal sacrifice of as it happens in Texas no more time on the part of the membership have all been appreciated by the entire city. There have been many occasions tion would decide to postpone the Mrs. Dave Jones, motored out to many cars parked around them which would have been impossible or at least would have fallen flat except for the music provided by the band.

However, the group has had the loyal support of the entire citizenship. Several thousand dollars have been to pay a fairly stiff contribution. They will arrive back home some raised for the purpose of keeping the group going. This money has been donated in small amounts by the members of what is called the "Band Club." This band club on the whole derives only the incidental benefit of praise in the city and advertising from its donation. Not even a majority of the members have children in the organization.

So the major part of the band's work is to appear as ately. If we had started a so- Well, it has. There were several often as possible in order that the original purpose for which it was organized may be accomplished.

Burkburnett has definitely become a "football town." The major events of the year are our football games. A football game without a band is insipid to the average spectator. The martial music is just part of the show.

A positive understanding is necessary right now. It is imperative that we know why it is impossible for trans- bution for the services we deportation and in some instances players of the major in- mand that the state render. struments are not available for the important games.

> Landmark Burned As Burnett House Destroyed Here

An appropriate period was placed at the end of one of the most romantic stories of West Texas ranching industry Tuesday morning at 10:30 when the original ranch house of the famous 6666 Burnett ranch went up in flames.

The old house that served as the headquarters for one of the most hectic periods in the history of the cattle industry had been deserted soon after the boom. Its usefullness had been brought to an end when the land on which it stood spouted the liquid wealth almost everywhere the owners cared to sink a hole. For years the old dwelling had been deserted, but it was recently purchased by Tom Bush, remodeled and was the home of Mr. and Mrs. B. F. Rush. The fire ending the life of the historis old ranch headquarters started in the flue of the kitchen range and spread so rapidly throughout the structure that nothing was

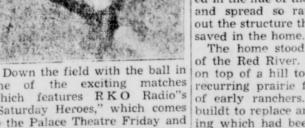

The home stood on the banks

of the Red River. It was placed on top of a hill to escape the oft one of the exciting matches recurring prairie fires, the dread which features RKO Radio"s of early ranchers. # An Expression of Appreciation

During the first eight months of 1937, citizens of Burkburnett expressed their loyalty to the municipal light plant in a concrete manner. In that period local customers used \$2,200.00 worth of power more than was used for the same period last year.

This expression of appreciation for the efficient service of the Hardin Municipal plant is an indication of sincere loyalty on the part of Burkburnett citizens.
